Foals of Mares Covered in 1911 to Trot and Pace at Two and Three Years Old.

\$2,850 for Trotting Foals.

TO BE GIVEN BY THE

\$2,150 for Pacing Foals.

California State Agricultural Society, Sacramento, Cal.

ENTRIES TO CLOSE FEBRUARY 1, '12.

MONEY DIVIDED AS FOLLOWS:

\$100 to Owner of Stallion, sire of Winner of Three-Year-Old Trot when mare was bred.

For Two-Year-Olds to Take Place at the California State Fair, 1914.

| | |
|-----------------------|-------|
| Two-Year-Old Trotters | \$600 |
| Two-Year-Old Pacers | 400 |

CONSOLATION, for horses that started in above and won no money.

ENTRANCE FREE—Otherwise same conditions to govern as in the main events.

| | |
|-----------------------|-------|
| Two-Year-Old Trotters | \$350 |
| Two-Year-Old Pacers | 250 |

\$100 to Owner of Stallion, sire of Winner of Three-Year-Old Pace when mare was bred.

For Three-Year-Olds to Take Place at the California State Fair, 1915.

| | |
|-------------------------|--------|
| Three-Year-Old Trotters | \$1400 |
| Three-Year-Old Pacers | 1100 |

CONSOLATION, for horses that started in above and won no money.

| | |
|-------------------------|-------|
| Three-Year-Old Trotters | \$400 |
| Three-Year-Old Pacers | 300 |

ENTRANCE AND PAYMENTS—\$2 to nominate mare on February 1, 1912, when name, color, description of mare and stallion bred to must be given; \$5 July 1, 1912, \$5 December 1, 1912; \$10 on yearlings February 1, 1913; \$10 on two-year-olds February 1, 1914; \$10 on three-year-olds February 1, 1915.

STARTING PAYMENTS—\$15 to start in the two-year-old pace, \$25 to start in the two-year-old trot; \$35 to start in the three-year-old pace; \$50 to start in the three-year-old trot. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

No additional entrance will be charged in the Consolation Stakes.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

CONDITIONS.

The races for two-year-olds will be mile heats 2 in 3, and for three-year-olds, 3 in 5. Distance for two-year-olds, 150 yards; for three-year-olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before February 1, 1913, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1911.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$5000, the amount of the guarantee, only. Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Races for Two-Year-Old Stake and Consolation end with the conclusion of the third heat.

Races for Three-Year-Old Stake and Consolation end with the conclusion of the fifth heat.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

All contestants not winning a heat in three or awarded second position twice will be retired from the race, but do not forfeit their winnings as shown by the summary.

Entries open to the world.

A. L. SCOTT, President.

AS WE enter the new year with its unknown and unlimited possibilities awaiting us, it is useless to dwell over the trials and disappointments of the past. We must begin again that all absorbing and fascinating study of planning for the future. We are all guided by that great incentive expectancy: Hope, which the poet says, "springs eternal in the human heart." Without it what would life be? What a blessed thing it is that we are endowed with it. From prattling childhood until the frosts of time whiten our locks it remains with us and every recurrent holiday time, especially at the dawning of the new year, it seems to be more potent and powerful. It urges us to look forward to better things and smoothes our pathway of all doubts and fears. As horseowners and breeders we go into the pasture fields and paddocks and watch the young colts and fillies gambol and play and wonder if their names will not be enrolled upon the scrolls of equine fame. We had all to do with the selection of their sires and know just how good their dams were; and look upon them as the living results of our study and experiments in breeding. We hope they will reflect credit on our judgment and repay us for all we have done and will do for them. We pass into the paddocks, where the stud matrons heavy with foal, are nibbling the new grass, or are standing by the stacks of hay, and we wonder if the new-comers will be all we pictured they will be. Hope triumphantly leads us to believe they will, and we determine then and there to give these mares and their foals every possible show. We visit the stud barn and carefully inspect the lord of the harem there and hope he will get a share of mares this year that will prove creditable to him, for without getting fairly bred ones or those that have gained renown as producers of colts and fillies that are endowed with speed, we realize that it will be a hard struggle for that grandly bred young stallion to forge to the front as a sire. We determine to advertise him, knowing that on his breeding and performances, his claims will appeal to many owners of good mares. We hope his book will be filled with the names of celebrated mares and we trust that when the race meetings commence we shall be able to have him returned to the race track to lower his record. We never look for failure, for the sheet anchor of Hope prevents us from drifting on the rocks of disappointment. We do not look upon our little collection of trotters with an eye solely trained to gaze at them from a monetary point of view. The true lover of a horse is guided by sentiment strongly fortified by Hope. It is a natural heritage and has been observed long before our days of money earning developed. Money is a necessity, but it is not everything. Man may be able to supply his physical wants with it but the mental and spiritual man, the one who loves to have all those who rely upon him happy, is not satisfied to accumulate wealth unless he can share the enjoyment of it with those dependent upon his efforts. He wants it to make every human being, besides every horse and animal he owns, enjoy all the good things that he can furnish and buy for them. Hope is ever present and its fulfillment is one of the never failing principles that sustains him through life. Hence, with this virtue ever present we enter the year of 1912 better prepared to carry out our best ideas than ever. We have profited by all the lessons of the past. We will now commence a new chapter and never let Despair usurp the place so long held by the star of Hope.

MR. SHIRLEY CHRISTY, secretary of the Arizona Fair Commission, who mailed circular letters to the leading horsemen and associations on this coast, writes regarding the formation of a continuous circuit:

"I have received a great many replies from associations and horsemen in regard to the organization of the proposed circuit, and all are enthusiastic. The time is certainly ripe for the formation of such a circuit, and we should strike while the iron is hot. In order to obtain results for the 1912 season an early start should be made; therefore, I have suggested that January 18 be named as the date, and the Palace Hotel, San Francisco, as the place where the meeting be held for the above purpose."

ONE of the best of the Futurity stakes in California is the State Fair Futurity, No. 4, for foals of mares covered in 1911, to trot and pace at two and three years old. The sum of \$2850 is offered for trotting foals, and \$2150 for pacing foals. These stakes are to be decided in 1914 and 1915. There is no reason why every owner of a good mare bred last year (1911) should not make an entry in this stake, the amount required is only \$2, and no better way of enhancing the value of a colt or filly can be thought of than by making an entry like this. There are conditions embodied in the making of these entries which strongly appeal to owners of stallions also, and they should strive to see that all mares bred to their horses last year are named in these stakes, entries for which close February 1st.

On March 2d we will issue a splendid "Breeders' Number." In it we shall publish a number of choice articles on subjects that will appeal to every horseman and stockman. We shall also endeavor to make it one of the best issued from this office, and to that end will strive to have every trotting and pacing stallion as well as many of the best mares, colts and fillies on the Pacific Coast represented.

HOLIDAY NUMBERS.

The "Horse Review," Chicago, as usual, publishes a number which will always be kept for its fund of valuable information and able articles. Every year it presents something new, novel and interesting, and this Christmas issue is no exception. The amount of labor expended in gathering statistics can hardly be comprehended by the average reader, and the choice articles that always make this publication one of the best published demonstrate clearly that everyone "on the staff" takes pride in making it the best of its kind published. It has the " earmarks of prosperity" on every page.

The "Christmas Horseman," Chicago, this year is different from its predecessors and is filled from cover to cover with much valuable information, statistical and historical, and is very instructive. The Horseman is always welcome and this number is one of the best ever issued.

The "Trotter and Pacer" is the representative of its class and every page teems with articles of merit. Its illustrations are superb and it is not to be wondered at that it has cut a path for itself into the best circles in New York, and is always a welcome messenger for the upliftment of the great industry.

The American Horse Breeder, published in Boston, fills in a niche in the temple of equine publications, that cannot be excelled. Its Christmas number is full of instructive and entertaining articles, besides statistical tables of great value. It is a welcome visitor to every horseman's library and its issues every week are replete with many things which go to make it one of the best trotting horse papers published.

The Christmas Horse World, published in Buffalo, New York, is one of the best holiday numbers issued, and includes special departments on draft horses, ponies and livestock on the farm, besides able articles on the trotting horse industry.

The "Rural Spirit," published in Portland, Oregon, comes out this year in finer holiday raiment than ever and is full of able articles by the most advanced of our thoughtful writers of the north.

"Wheel and Saddle," published in this city, is the latest born of turf journals, but its holiday edition shows it is a lusty infant and has much to attract the attention of the public. It is well illustrated and contains many able articles which reflect credit on its editor and publisher.

The Breeders' Gazette, as is its usual custom, appears in elegant dress and is certainly the most valuable (as it is the leading) publication in America. No stockbreeder should be without a copy of this useful publication, and this Christmas edition is "a gem" and shows the wide scope and growth of the livestock interests of America.

The fast trotting filly Mabel Claire, by Constructor, out of Lady Belle Isle, which is in Patsy Davey's string at San Jose, has recovered from the lameness which affected her last summer and is trotting nicely. Mrs. F. H. Burke, her owner, is well pleased with her recovery.

CONDITIONAL ENTRIES.

One of the best rules in the book to promote fair and honest racing is the rule regarding conditional entries, which is Rule 3, Section 3, and reads as follows:

"All entries not governed by the published conditions shall be void. Any proposed deviation from such published conditions shall be punished by a fine of \$50 for each offense, and any nominator who is allowed privileges not in accordance with the published conditions of the race, or which are in conflict with these rules, shall be debarred from winning any portion of the purse, and upon sufficient proof of the fact he shall refund the amount. If any be awarded him, and it shall be awarded the remaining horses entitled thereto, and the said nominator and the secretary or other persons who allow such privileges shall be deemed to have been parties to a fraud, and be punished by a fine, suspension or expulsion, according to the judgment of the Board of Review."

In view of the above ruling it is surprising how often a horseman endeavors to make conditional entries whenever a secretary can be found that will accept them, not only taking a chance of a fine, suspension or expulsion, but should his horse win, and the fact that he made a conditional entry be known to other money winners in the race, his winnings could be taken away from him as well. Under the rules it is impossible for him to win any money in case his entry is in any respect conditional and his winnings are protested.

At the last session of the Board of Review, a single instance, covering a conditional entry, was brought out in the case of H. G. Lambert, and R. J. Lambert, of Norfolk, Va., vs. Lafayette Race Track, Incorporated, Norfolk, Va., and the secretary of the association, O. T. Granger. The Lamberts had entered the horses Albanner and Eugene Bedworth, conditionally, and, failing to start in their classes, were suspended along with the horses for non-payment of entry fees by the secretary. Refusing to pay, the Lamberts made application to the Board of Review for release of themselves and horses. The case was continued and the secretary of the N. T. A. was ordered to bring a case against the men involved.

The ruling on this matter will probably put a stop to the practice indulged in by many drivers and horse owners and acquiesced in by unscrupulous secretaries who are anxious to pad their entry lists for race meetings and go to any limit to secure what they think would be star attractions; regardless of the fairness to other nominators in the race. Many horsemen try to take advantage of secretaries because they happen to have a big string of horses and insist on some special concession or they will not enter. These are the horsemen who are unwilling to take a chance. They never want to start a horse in a race unless the field is to their liking, and are confident they can win before they put up their entrance money. With such a secret bargain between themselves and the secretary the association has no redress, for complaint to the trotting authorities would not only implicate the nominator but the officer or officers of the association that were cognizant of the arrangement. Any association that wants to permit nominators to enter two or more horses in one race and be held for only one entry, or to enter one horse in several races, but only be held for one entry, should advertise such inducements in their conditions instead of offering them in secret as a bonus to get some particular string of horses to their meeting. Secretaries have even gone so far as to make an arrangement with the nominator that if the horse entered is lame or ailing that no entrance fee need be paid, while they exact from other nominators in the same race full entrance fee and require them to live up to the advertised conditions of the meeting in every respect.

A case was noted in the Philadelphia Record where the writer of the article sent to Baltimore to obtain entries for a contemplated meeting to be held in his locality, and was given strict orders not to take a single conditional entry. He struck a driver who had six horses eligible to start in the classes arranged for the proposed meeting. The driver made the proposition to make five straight entries, if the other animal would be taken conditionally. The result was that the driver took all of his horses to another city, probably on his own terms.

Another practice that is carried on extensively at the present time is the premiums offered by secretaries and others interested in getting entries for race meetings. Some are offered the chance of starting in two events, pay for one only, or "if you don't start you are not to be held liable for the entrance." One favorite driver gets his shipping expenses paid; others get free hay, feed and straw, but the majority are held strictly to the rules.

Tricks that the unscrupulous race promoters are not up to are beyond the cognizance of the officials and if they can correct the evil of making or receiving conditional entries it will help the sport far more than the average man would think possible.

Al Schwartz, of Alameda, is banding that pure-gaited Cupid gelding, Kid Cupid, which the owner, Mr. Gifford, of San Francisco, won several races with at the Stadium last year. He looks and trots like a 2:10 horse and as he has no record will be a money-winner this year. There is another good one in this trainer's stable; she is called Miss Helen, sired by Greco B., dam by Nutwood Wilkes 2:16½, and belongs to Mr. A. Hardy, of San Francisco. She is a very pure-gaited trotter and is heavily engaged in the Futurity stakes to be decided this year and will, if she keeps improving, "bring home some of the money."

SUGGESTIONS FOR THE IMPROVEMENT OF RACING.

By George Starr.

There has been felt of late years among managers of associations, owners and trainers of the horses and patrons of the sport a general need for changes in our system of racing, which would add to the interest of the public and to the earning capacity of the horse. It was probably this belief which brought about the Buffalo Dash System, and Mr. Welch's Handicaps given by the Readville Association. But what little has been done in dash races and in imitation of the Austrian Handicap System has been only half done. For instance, at Boston in the American Derby, something like thirty-five horses were started—entirely too many for one race—and I am informed that every horse was rated as being able to do forty-five yards per second, whether he was a two-minute horse or a two-thirty horse. The horses were asked to go from a standing start, which is not the case in Austria, though that system was probably in mind. In their races the horses are kept turning at their respective posts until all are headed the right way of the track, and when they get the signal to start all are on the move.

While it is evident that a departure from our ways is being agitated, yet I have not seen in print any suggestion which gets at the foundation upon which to build the changes that would improve the present system and increase the earning capacity of our horses.

For we have two classes of horses that have little or no earning capacity; the one that cannot beat 2:11 or 2:12, and the horse which gets a record better than 2:05. The first is not good enough to win, and the latter has no earning power because the associations do not give many classes for horses with fast records.

This condition will always exist under the record system, but cannot under the Russian and Austrian systems, where horses are classified by their earnings. Any horse that can beat 2:15 has an earning capacity there as long as he keeps sound. A horse is given a record as with us—but is not classified by it.

Therefore, why not drop the record system and group or handicap by earnings? Many years ago the Russians changed their classification, similar to ours, to their present system of grouping by earnings, and time has proved its success. Austria changed its system some time ago, and Mr. Pajoneck, who is the leading trainer in Denmark, and is now in this country for a short time, tells me that 1912 will be the last year for the American System of classifying by records, and the Danes will change in 1913 to a classification by earnings. Their races are all dashes and handicaps.

Under the Russian system there are eleven groups and thirteen named races (such as The Emperor's Prize, etc.); to all of these a horse is eligible at the beginning of his racing career, starting in the first group, he remains in it until he wins the sum allowed to that group, then advances into the second group, remains in it until he wins a certain sum there, and so on until he reaches the eleventh group, when he has won in the neighborhood of \$30,000 or \$40,000. During the time he races in the eleven groups he is eligible to start any number of times in the thirteen named races until he has won each event, and thereby adds \$30,000 or \$40,000 more to his earnings, if he wins them all.

In Austria the classification is by earnings, and a race is based upon the amount that he has won. The distance that one horse is given over another in. For example, a horse that has won \$3,000, starts in the same race with a horse that has won \$5,000, and is given a certain distance at starting over the horse that has won \$5,000. Where the fields are large the entries are divided into two races and the purse doubled. Each division gets the same amount that was originally offered, the public has two races to bet on, and the association gets a commission therefrom.

In foreign countries races are of different distances and a horse can be raced at a distance that suits him best. Why, with us, is every horse, regardless of his age, sex or physical ability, required to race the same distance and draw the same weight? No other association in the world, either trotting or running, requires this. We ask a horse like Emboy and a horse like Cresceus to go the same distance—one is purely a sprinter and the other a long distance horse.

I had often thought, before knowing anything of European methods, that a horse should not be penalized with a record until he had won a purse. Often we have seen a horse win a heat in a race, get a low record, and in that same race be distanced, or drawn, or even staying in the race get no part of the money. Yet he is penalized with the record. It has happened, too, that a horse entered in all the important stakes wins a heat, or a race and is on account of lameness or sickness withdrawn from racing at the beginning of the season, and his owner, in addition to the expense of training, has the entrance to pay on the stakes and his horse has a record which may outclass him for all time.

The entrance fee in foreign countries is usually 1 to 1½ per cent of the purse raced for, and in Russia the purse is divided into three parts; 10 per cent to the third horse, and the division of the remaining 90 per cent depends upon how close the second horse is to the first. This insures a contest. With us it often happens that a driver having second

money won makes no effort, as there is nothing further to be gained.

A fault with our system is the opportunity for a horse to go through all of the stakes in the Grand Circuit and outclass every horse he races against without being penalized. Of course, this gives the others no chance of winning, neither does it give the public a contest.

Why do we not have racing in June, the finest month of the year? In the days of William Dohie, Turner and Mace, and even as late as Budd Doble's time, meetings were held in May and June, in New York, Philadelphia, Baltimore and Washington. Managers will reply "we can't get entries for June racing—trainers can't get their horses ready." Yet, we hear of horses being worked better than 2:10 in June.

The remedy, therefore, might be brought about by these three things: the dash system, classification by earnings and over-night entries for the majority of the events, only the fixed events requiring an entrance fee in advance. Horses can race oftener and do not require as much work to go dash races as to go heat races, and can be gotten ready to race earlier. Also, it is possible to race an unsound horse occasionally, for when he pulls up, the race is finished, and he is not required to come back and go another heat to save what he has won.

Dash racing eliminates the distance flag. (A distance flag is very humiliating to some unfortunate people).

Abroad two-year-olds are not raced; three-year-olds go only about three-quarters to seven-eighths of a mile; four-year-olds and over from one and a quarter to two and one-half miles with an occasional race of greater distance, or a race of two one-mile heats, the horse standing best at the end of the second heat is the winner. If both stand equal at end of two heats, the horse having won the fastest heat is the winner.

Much reference to European racing has been made in these notes and if any suggestions are worth considering the Russian and Austrian rules and conditions could be sent for and the Grand Circuit Stewards, who would be the initiators, could consult with Mr. Keyes and Mr. Pennock, who are familiar with every point of racing in Russia and Austria.

A pleasing feature of the Lexington Trots is the annual presentation of the Walnut Hall Cup. Many owners would rather win this cup race than almost any other race in this country.

There should be given with any special event, or race to the value of \$5,000 or more, a piece of valuable plate to commemorate the victory.

It might be good policy to have many representative people of the community as shareholders in the racing plant; each would have an influence toward increasing the attendance.

Make the grounds more attractive by planting hedges, rows of trees, and permanent shrubs—this sort of planting does not require an annual florist bill.

Toward increasing the attendance two or three prices of admission might be tried; this custom prevails abroad and is practical at other sports in this country, and at all theaters. At the recent International Polo Match where admission at fifty cents entitled one to stand at the fence, and \$2.50 and \$5.00 to seats, many took advantage of the fifty-cent privilege.

It would be an improvement to lay the dust the entire length of the track two or three times during the afternoon's racing for the benefit of the drivers, as is now done in front of the stand for the benefit of the spectators. In a race it is sometimes impossible for the drivers to see ten feet ahead; this condition is not only disagreeable, but dangerous.

Eliminate announcements. The bulletin board is sufficient.

Place the officials in the grand stand and do without the small stands which obstruct the view.

Try open booking instead of the associations' selling the privilege which permits a combination hook.

The foregoing suggestion are offered with due consideration to the managers of the association, to the owner and to the trainer, and the proposed changes in our system are not visionary, but have been proved by two countries and are about to be adopted by the third.

PERIOD OF GESTATION

The time usually counted for the period of gestation in mares in this country is 340 days. This figure was derived from the records of 1071 foals from trotting mares. In these records there was a variation from 319 days, the shortest period, to 373 days, the longest.

It is the general observation that variations in our mares are great and perplexing. An interesting investigation that may help to explain this matter for American as well as European conditions has just been made by O. Wellman, of Germany.

He found that with brood mares the average length of the gestation period in the case of 5,437 births was 335 days. The periods were shortest in the births which occurred in July, the average length for that month being 322 days. From July there was a constant increase from month to month until May, when it reached 346 days. With working mares the average length in 171 cases was 326 days, with a seasonal variation as in the case of idle brood mares. The average gestation period of 223 Hungarian cows was 245 days, and of 291 Simmental cows 291 days. Apparently there was also a seasonal variation in cows, but much less in amount than in the case of horses.

DISTEMPER IN HORSES CONTAGIOUS.

Distemper is a disease peculiar to the horse, and it is likely that it will be affected with it some time. It is contagious and can be carried on the clothes of a person from one horse to another. It may break out in a stable and no other cases in the neighborhood. The contagion may have been brought in some unknown way.

There are signs of catarrh; the animal is dull, has a cough, and when it swallows makes a peculiar sound in its throat; there is soreness in the throat and some of the water it may be drinking will come back through its nose; the head is poked out, a little frothy saliva from its mouth, sooner or later a swelling will appear at the back of the jaw; when this takes place the animal has great difficulty in swallowing water and food, especially the former. In some cases there is very little fever and the appetite remains good; in others there may be considerable fever, pulse from 60 to 70. In the course of a few days the inflammation in the lumps relieves itself in the formation of matter, which will soon come to the surface and the lumps break of their own accord if not opened. After this takes place the animal is much relieved. Cases may be met with where a small abscess may form and the animal may show no other symptoms; this soon breaks, discharges and heals; in others, although not very sick, the condition of ill health may continue for several weeks and finally an abscess appears, matures and the animal soon recovers. Again, others may swell on the inside of the throat and suffer great distress and may suffocate.

Irregular strangles is where abscesses form in other parts of the body, such as on the shoulders, hips, flanks, side of the neck or back of the elbow; also in the liver, between the lungs or in other parts. So long as the abscess forms on the outside it is not dangerous to life, but those on the internal organs usually cause death.

The sequel of distemper most frequently occurring is a thickening of the lining of the throat, which interferes with the animal's breathing, causing what is called roaring or whistling. The more serious sequel is blood poisoning from the absorption of matter from the abscesses forming on the internal organs. About the ninth or tenth day the animal ought to begin to improve. On the other hand, if at that time the fever is increased, appetite lost, breathing fast and somewhat labored and the temperature from 105 to 106 there is occasion for alarm, as it indicates that something is going wrong inwardly.

Treatment.—In the early stages of distemper put the animal in a warm, well ventilated stable; clothe the body and bandage the legs. If the throat is sore put a piece of camphor gum into a pail of boiling water and put it under the animal's head (but not near enough to scald), and throw a blanket loosely over it to keep in the steam; continue this for fifteen or twenty minutes and repeat it three times a day. Dissolve two drams chlorate of potassium in half a pint of cold water and put in one teaspoonful of the fluid extract of belladonna. Shake up and gargle the throat. This is best done by holding the head above the level and pouring a little into the mouth, rubbing the tongue to make the animal move it. If the animal coughs let the head down at once, and after it ceases coughing hold the head up and pour in a little more, and so on until it is all used; do this three times a day. If there is any fever give half an ounce of nitrate of potassium in its drinking water once a day. Physic should not be given. If the howels are confined give injection of soap and warm water; if an abscess forms poultice, changing the poultice once a day. When the abscess becomes soft open it and inject a little lotion made of carbolic acid, half an ounce, and water one pint. Poultice for a few days after it breaks, to soften the surrounding part so that there will be no bunch left after it breaks. After the acute stage has passed mix and divide into twenty-four doses four ounces sulphate of iron, four ounces nitrate of potassium and two ounces nux vomica, one to be given twice a day in bran mash mixed with a little oats. If there should be a great discharge of matter from the nose after the animal is convalescent put one ounce of oil of turpentine into a pail of boiling water and put in under the head as above, not near enough to scald; do this several times a day. If the abscess is tardy in forming mix two drams cantharides and one and one-half ounces of vaseline and rub a little once a week. If the glands of the neck should remain enlarged after the animal has recovered rub on a little of the following: Mix one dram biniodide of mercury with one and one-half ounces of lard; repeat every second week. If abscesses form on other parts of the body they should be treated as above.

If the animal's appetite is poor give one ounce each of tincture of ginger, gentian and chloride of iron in a quart of oatmeal gruel three times a day. Give half this quantity to colts a year old. Give the animal small quantities of food at a time and often, as it will eat a little fresh hay or oats when it would refuse to eat that which was in its manger.

The three-year-old Mahomet Watts 2:17½ by General Watts (3) 2:06¾ is out of Alla 2:21½ by Palo Alto 2:08¾; grandam Lula Wilkes by George Wilkes, and Ruby Watts, a yearling colt by the same sire, is out of Cupid Belle by Dan Cupid 2:09¼; grandam Vesper Bells 2:15¼, by Advertiser 2:15¼, he was also out of Lula Wilkes by George Wilkes. It's strange how these youngsters hark back to some good mare.

SOME SUGGESTIONS AS TO RACING.

(By Wm. I. Higgins.)

I notice communications from a number of horse-men, outlining various plans for the improvement of racing conditions throughout the United States. Since so many are writing upon this subject, it would seem that conditions must be bad, and so they are, but there will be no departure from the old methods for some time to come, as, while the horsemen would very generally like to see many changes in the present mode of racing, the associations upon whom devolves the work of carrying out any reforms are loth to do it for fear of a possible deficit. No radical changes can come except through the horsemen themselves, and then only through an organization composed of owners and drivers.

The attempt to organize horsemen into a working body has been a failure in the past. It is certainly not due to a lack of intelligence upon their part, as beyond question, they will compare favorably with the same number of men in any other branch of sports. Yet, it is possible in all other sports to have a strong working organization for its promotion, advancement and protection. Then, what is the reason horsemen cannot do this? Is it selfishness? Or, is it fear of what the association might do to them by refusing their entries, and in other ways annoying them, if they discovered they were banded together for their own protection and incidentally to compel the associations to right the wrongs too frequently practiced on them?

As the game is run today it is every fellow for himself, and the devil take the hindmost; and, the devil does quite a business each year.

No, it is not selfishness, for the majority of horsemen are liberal to a degree. Anyone in trouble or distress is rarely turned away empty handed from them, although the giver may need the money he is handing out as much as he who is receiving it.

Then, according to my deduction it must be fear, and that it what I think it is. Fear of the wrath of the associations. Whether I am right or whether I am wrong matters little, the fact remains that the horsemen have never been able to get together, as one harmonious, thinking, acting body, and until they do, conditions will continue about as they are.

There are a few things that appear to me that, if carried out, would in my opinion help the horsemen, and anything that helps them would of course help the associations.

1st. Give the big money to the fast classes. When this is done the associations will have no cause for complaint about the lack of entries, as horsemen will always enter where the big money is, whether their horses have records or not. It is my firm belief if this is done that the rule for laying up of heats and the pulling of horses can be abolished, for horsemen will not be afraid of marking their horses as they will be fully as able to earn money then with a fast record as they are now without a record or with a slow one. Patrol judges can be stationed around a track every sixteenth of a mile, and still a driver can lay up a heat and not be detected; can pull a race and not get caught. No rule that can be made will make people honest, the only thing to do is to remove the incentive for dishonesty, and pay them well to be honest, and then the problem of good clean racing has been solved.

The associations, and the patrons of a race meet all clamor for fast time, and the horse that can go the fastest is widely advertised in order to bring the crowd. But, it is expected that he will go out and trot fast and get the same pay as a two-fifteen or two-twenty trotter. This is unfair, because it costs a great deal more money to make a two-five trotter than a two-fifteen or two-twenty trotter. There are great numbers of young sound horses, with fast records that should be racing and furnishing the best of sport for the grand stand, (as it has been my experience that the average person would rather see a field of fast horses turn for the word than a field composed of slower ones), that are idle or are being used for matinee purposes.

The purpose of mating with great care a sire and dam of speed producing lines, is, I have always thought, to get more speed.

But when you have delivered the goods, shown the speed and got a fast record, the associations say, (by not giving decent purses to race for) "Back to the woods, we are through with you." The faster a horse's record the greater should be his earning power.

2d. Divide your purses twenty per cent to each horse. Let each heat be a race, and when one horse takes a heat he is sent to the barn and at the end of the fourth heat the race is finished, the horse finishing second to the fourth heat winner getting fourth money by virtue of his position.

Take for example a thousand dollar purse, under the old way, first horse gets \$500, second horse gets \$250, third horse gets \$150, and fourth horse gets \$100; first horse makes four hundred dollars, second horse makes one hundred and fifty dollars, third horse makes fifty dollars and the fourth horse makes nothing. Under my plan the first and second horses would lose one hundred and fifty dollars, but the third and fourth horses would gain this, and all of the four horses would quit winners on the race. What is needed is to keep the horse that can't get up in front coming along from meeting to meeting and the way to do that is to let them have some of the money. It is not necessary to worry about the first

and second horses as they will go to the next town anyhow.

For example, a \$1000 purse:

| | |
|---|---------------|
| 1st wins two heats | \$400.00 |
| 2nd wins one heat | 200.00 |
| 3rd wins one heat | 200.00 |
| 4th is second to fourth heat winner | 200.00 \$1000 |

3d. Reclassify your horses every third week and the horses that have been finishing way back of the money will go to the next meeting and the next and the next, knowing that when the reclassification takes place that they will be in the money. As the game is today there are so many horses on the track at the first meeting and the fields are so high that they are unwieldy, but they begin dropping out when they have not got a chance to get money enough to even buy oats and hay, and the consequence is, that about the third meeting there is a dirth of starters.

Now what the associations want is starters, and I believe by adopting the big money for the fast classes, a more equitable division of the money, and a reclassification of the horses every three meetings, that they will get all the starters that they desire.

Now, what the horsemen want is a guarantee from the associations that they are going to carry out their programmes as advertised. The guarantee that horsemen should have is a statement from some bank in the town where the meeting is being held, that thirty-five per cent of the total amount of the purses advertised is on deposit in their bank. Then, the temptation to start a meeting on a shoe string and take chances on the horsemen and the gate pulling them out, will be removed. If the game is going to succeed it must be recognized that there are two sides to it, the horsemen and the association. As it is now, there is only one and that is not the horsemen.

I want to say in conclusion however, that the great majority of the association are all right, but there should be a rule such as the above to make them all be right.

Deer Lodge, Montana.

LOS ANGELES MATINEE RACING.

This is the report of the race meeting held over the new mile track at Los Angeles on Christmas Day as written by Harry A. Williams of the Tribune; it is, to say the least, a new way to describe light harness horse racing. The pedigrees are omitted for some reason, nevertheless, the meeting was a most enjoyable one:

The Christmas matinee of the Los Angeles Driving Club at Exposition Park yesterday afternoon served a dual purpose.

It provided an excellent card of light harness events, and reminded something like 4000 persons that the horse, while not as important a part of the scheme of civilization as formerly, is not yet an extinct species.

The automobile may be slowly but surely crowding the horse off the earth, but that the latter still is popular as a play thing was evidenced by the big crowd which gathered at the course despite limited seating facilities and the manner in which it lingered along into the gloaming or until the last heat of the day had resulted in Bessie L., Charley Chick's bay mare, being crowned winner in the 2:25 trot.

The equine may be forced to run second when it comes to the utilitarian side of life, but it lacks considerable of being wholly and entirely consigned to the soap factory.

It seems that nearly every light-hoofed nag in the entry list was out to disprove all assertions to the effect that the horse is a dead one, with the result that in a majority of the events they stepped above their class. While the track was in fine shape, the weather was a bit too cool for the best work, and the good time made in some of the events came as something of a surprise.

There were a number of green horses in the lot and Starter Ed Smith had his troubles. But Smith proved himself a persistent sort of person and in nearly every instance succeeded in getting the field away to a satisfactory start.

With eight events on the card, some difficulty was experienced in cramming it into the allotted time. This was accomplished by chopping the 2:30 trot down to one heat, but even with this amputation the program was as long as originally outlined, as the yearling event, which had been scheduled as a half mile dash, was trotted in heats.

Will Durfee sent Carlok in a mile against time in an effort to do better than 2:10. The handsome son of McKinney, paced by a runner, turned the trick without trouble, trotting the mile in 2:09½. Zulu Belle, driven by Durfee, did an unpaced mile in almost as good time, circling the course in 2:10. Zulu Belle won the Futurity as a three-year-old, while trotting and recently worked a mile in 2:07 at Woodland. She paced in yesterday's exhibition.

Carlok's time was almost equalled in the free-for-all pace, which was the feature race of the day. Steve Bailey, owned and driven by I. C. Mosher, won this in straight heats. Steve stepped the first mile in 2:10 and the second in 2:10½. The second heat was a beauty, the horses racing nose and nose until they entered the home stretch. Fred E. Ward's brown horse, Nordwell, was a good second in each heat and each time pressed Mosher's gelding down to the wire in a way to provide a thrilling finish. W. A. Clark Jr.'s handsome black gelding Jean Valjean, was off form and forced to take third place.

It required three heats to decide the half-mile trot

for yearlings which Henry Berry, who was acting as chauffeur of one of the timepieces, characterized as a race for "bushers." This brought into competition three promising youngsters, Zomboyage, owned and driven by Ted Hayes; Castro, owned and driven by W. N. Tiffany, and Dr. Hagan, owned by Clarence Berry, and driven by Durfee. Hayes' colt took the first heat in 1:15, and Castro, who was sired by Carlok, took the second and third in 1:14 and 1:16. "Doc" Hagan looked just as fast as either of his sprightly young rivals, but was ill-behaved in that he preferred galloping to trotting at times, all of which caused considerable chagrin in the Berry household.

The 2:30 pacing event was a good race to watch. S. Watkins sent Joe W. under the wire a winner in straight heats. Billy N., who until recently has acted as the motive power for a buggy, acquitted himself creditably under the direction of C. S. Willis, taking second in both heats and losing the last one by a scant neck.

Lady Love made the best time in the 2:25 trot, which was cut down to two heats on account of darkness. She stepped the second mile in 2:18, but as she could do no better than take third in the second heat, the race went to Bessie L., who took the first heat in 2:19 and placed in the second.

Luna M., owned by William Morgan and driven by Frank Williams, took the 2:40 trot in straight heats from a field of eight starters. Smith got the hunch away to a beautiful start in the second heat. R. B. Moorehead halted Bobby Boy before the field had rounded into the first turn and after tuckering around Bobby's head for a few precious seconds, resumed the race, but not in time to finish in sight of the other nags. L. J. Christopher declared Moorehead stopped in order to slip Bobby a chew of fine-cut and recommended a fine, but he failed to make the charge stick.

Two heats were lopped off the 2:30 trot, which was a waltz for L. E. McClelland's livestock, his Rattler breezing home in 2:39. The results:

Half mile trot, yearling class—Won by Castro, c. c. First heat—Zomboyage, Ted Hayes, owner and driver, first; Dr. Hagan, Clarence Berry, owner, Will Durfee, driver, second; Castro, W. N. Tiffany, owner and driver, third. Time, 1:15.

Second heat—Castro, first; Zomboyage, second; Dr. Hagan, third. Time, 1:14.

Third heat—Castro, first; Zomboyage, second; Dr. Hagan, third. Time, 1:16.

Half mile pace 2:25 class—Won by Auto Zombro, b. g.

First heat—Auto Zombro, Charles Branscom, owner and driver, first; Stella, J. S. Nickerson, owner and driver, second; Ma Julia, L. E. McClelland, owner and driver, third. Time, 2:17½.

Second heat—Auto Zombro, first; Stella, second, Alacker, L. J. Christopher, owner, W. A. Glascock, driver, third. Time, 2:19.

Half mile trot, 2:40 class—Won by Luna M., blk. m.

First heat—Luna M., William Morgan, owner, Frank Williams, driver, first; Jot, Dr. William Dodge, owner, and driver, second; Billy Edgewood, H. R. Holland, owner and driver, third. Time, 2:31.

Second heat—Luna M., first; Joe, second; W. C., third. Time, 2:28.

Half mile trot—Exhibition by Carlok in to beat 2:10, paced by runner—Quarter, :32; half, 1:05; three-quarter, 1:37; mile, 2:09½.

Half mile pace, 2:30 class—Won by Joe W., s. g.

First heat—Joe W., owned and driven by S. Watkins, first; Billy N., owned and driven by C. S. Willis, second; Burney, owned and driven by W. G. McGaughy, third. Time, 2:28½.

Second heat—Joe W., first N., second; Burney, third. Time, 2:26.

Half mile pace, free-for-all—Won by Steve Bailey, ch. g.

First heat—Steve Bailey, I. C. Mosher, owner and driver, first; Nordwell, Fred E. Ward, owner and driver, second; Jean Valjean, W. A. Clark Jr., owner, Teddy Hayes, driver, third. Time, 2:10.

Second heat—Steve Bailey, first; Nordwell, second; Jean Valjean, third. Time, 2:10½.

Half mile trot, 2:25 class—Won by Bessie L., br. m.

First heat—Bessie L., Charles Chick, owner and driver, first; Lecona, John O'Keefe, owner and driver, second; Lady Love, A. L. Love, owner and driver, third. Time, 2:19.

Half mile pace—Exhibition by Zulu Belle without pace-maker—Quarter, :32; half, 1:05; three-quarter, 1:37½; mile, 2:10.

Half mile trot, 2:30 class—Rattler, owned and driven by L. E. McClelland, first; Alambra, owned and driven by Charles Winter, second; Prince, owned and driven by Sam Farrell, third. Time, 2:39.

Officers and directors of the club and the officials of the meet follow:

L. J. Christopher, president; Clarence Berry vice-president; E. Diffebach, treasurer; E. J. Delorey, secretary; J. W. Nickerson, C. C. Colyear, C. A. Canfield, C. G. Willis, R. B. Moorehead, Dr. William Dodge, William A. Clark Jr., directors.

Speed Committee—Dr. William Dodge, R. B. Moorehead, J. W. Nickerson, Chr. Willis.

Judges—Henry Berry, W. A. Glascock, C. C. Colyear.

Timers—Dr. A. D. Huhbell, A. J. Feild, J. Thomas. Starter—Ed Smith.

ANSWERS TO CORRESPONDENTS.

What is the pedigree of MacKie?
 Ans.—He was foaled in 1903, and was sired by McKinney 2:11¼, dam by Baywood (son of Nutwood 2:18¾); second dam Lily by Geo. M. Patchen Jr. 2:27; third dam Nellie by Pieta, son of William's Belmont; fourth dam Nellie, a mare that came across the plains from Illinois and claimed to be by the great four-miler, Gray Eagle.

Can anyone give us the breeding of a mare called Carrie L., that was trained at San Jose about twelve years ago by B. O. Van Bokkelen? A subscriber is anxious to know.

K. T.—Can you give me the breeding of San Juan 2:22½. Ans.—San Juan 2:22½ is a bay stallion foaled 1901, was sired by Nutwood Wilkes 2:16½, out of Rowena McKinney by McKinney 2:11¼; second dam Judy Fee by Pilot Prince 20439. He was bred by Prof. E. P. Heald, of this city.

NOTES AND NEWS

Lady Suffolk, the first 2:30 performer, trotted in 1845.

Ninety and nine pacers entered the standard list in 1911.

Not a single new 2:10 pacer or trotter of 1911 was bred in Pennsylvania.

Start the New Year right by subscribing for the "Breeder and Sportsman."

T. E. Pollock, Flagstaff, Ariz., is the owner of the pacing mare Blanche 2:06 $\frac{1}{4}$.

There are not forty thoroughbred stallions left in Kentucky, where there were hundreds in 1907.

Remember, entries for the State Fair Futurity Stakes will close February 1st. Don't overlook this!

McKinney 2:11 $\frac{1}{4}$ is the sire of 13 trotters and 10 pacers with records below 2:10; also sire of the dams of six pacers in the "charmed circle."

Wm. Land, one of the oldest members of the State Agricultural Society, passed away last week at his home in Sacramento. The deceased was a noted hotel man and universally liked.

Will G. Durfee has a full brother to that great pacing mare Blanche 2:06 $\frac{1}{4}$, which he calls Aviator. There is another called The Aviator, with a mark of 2:18 $\frac{1}{4}$, it is a pacer, also, by Milton S. 2:08 $\frac{1}{4}$.

Carlokin trotted a mile in 2:09 $\frac{1}{2}$ over the new track at Los Angeles, while Zulu Belle, the Pettigru mare that Will Durfee drove, paced a mile the same day (Christmas) in 2:10. She has no marks as a pacer but will get one this year.

Contrary to report, the racing days of R. Ambush 2:09 $\frac{1}{4}$ are not at end, despite the purchase of the trotter by Tangner & Brosius for stud purposes. After his stud season he will be trained and raced over the mile tracks.

There are one hundred and thirty foals at the Walnut Hall Farm. They are the get of Walnut Hall 2:08 $\frac{1}{4}$, Moko, San Francisco 2:07 $\frac{1}{4}$ and Ozono. Everyone looks like a winner.

It was semi-officially announced a few days ago that the Kentucky Trotting Horse Breeders' Association has decided to change the Kentucky Futurity for three-year-old trotters from a three in five heat race to a two in three heat event.

Sister Florentine 2:08 $\frac{1}{4}$, pacer, by Consternaro, that was at Pleasanton last fall, has been purchased for breeding purposes by Walnut Hall Stock Farm. She will be bred to Moko.

It is claimed that the mile paced by Saladin 2:09 $\frac{3}{4}$ over the Wilmington, Del., track in 1893, was the first mile ever recorded better than 2:10 over a two-lap ring.

The meeting of horsemen and delegates from the trotting associations on this coast that have been notified by Mr. Shirley Christy of Phoenix, Arizona, will take place at the Palace Hotel in this city, Thursday, January 18th.

The Midwinter auction sale to be held by Fasig-Tipton Company at Madison Square Garden, New York City, takes place February 6th, 7th, 8th and 9th. As it is the last to be held at this historic place it promises to be one of the best.

Harry Hersey, for eight years trainer of Dan Patch 1:55 $\frac{1}{4}$, and other members of the campaigning stable of M. W. Savage's International Stock Farm, Savage, Minn., has resigned, to take effect January 1. Ned McCarr, who developed Dazzle Patch the past season, takes Hersey's place.

John Toy, of West Philadelphia, owner of the stallion, Owyho 2:07 $\frac{1}{4}$, by Owyhee, dam Bertha, the greatest of brood mares, by Alcantara, and a number of other speed prospects, has decided to send the stallion to H. R. Tyson, at Newark, Del., to winter and race next season.

A. L. Blackwell, trainer at the Sierra Vista Stock Farm, Chino, writes that his horses are rounding to in fine shape for this time of the year and that he will take at least twelve trotters and pacers to the Los Angeles track this spring and hopes to make a showing with them.

Just prior to leaving for New York City to sell his horse Kinney Lou 2:07 $\frac{1}{4}$, Mr. Budd Doble was married in San Jose to a most estimable lady (Mrs. Rucker), and on their return from their honeymoon they stopped at Los Angeles to see Mr. Doble's daughter, and from there journeyed to Hemet where they occupy a very pretty home and are as happy as every true friend of the genial little gentleman and his bride can wish them.

Royal McKinney's record should be 2:29 $\frac{1}{4}$, instead of 2:15 $\frac{3}{4}$. That makes this good stallion eligible to the 2:30 class, but it does not prevent him from getting a mark of 2:15 or better which he will obtain if no illness or accident prevents.

Of the new 2:10 pacers of 1911, twenty-seven were bred west of the Missouri river, sixteen in California, three each in Colorado and Kansas, two in Nebraska, and one each in Montana, Oklahoma, and Texas. Dick V. 2:08 $\frac{1}{4}$, by Silkwood p. 2:07, believed by many to have been bred in Kansas, was bred in California.

The trotting horse industry is not languishing—on the contrary it is growing in importance with each season's racing and why? Futurities! That explains it briefly and to the point. This being true then, why not adopt Bascomb's slogan of "going while the going is good," and prepare to patronize the futurities of 1912?

The Pacific district of the National Trotting Association, comprises the States of California, Oregon, Nevada, Washington, Montana, Colorado, Idaho, Utah, and the provinces of British Columbia, Athabaska, Alberta, and Saskatchewan in the Dominion of Canada.

F. D. Meyers, former owner of Belle Medium 2:20, and a number of other good ones, recently brought two fine Kentucky bred saddle horses from Los Angeles to Hemet where he has several others and will undoubtedly make his home there. Mr. Meyers and Budd Doble will often compare notes of their experiences with trotters.

The Spring Valley Water Company recently purchased nearly the entire valley adjacent to the city of Pleasanton and will divide it into small farms just as soon as the leases expire. This assures a bright future for Pleasanton. The company has also declared it will not purchase any more property there, so the Pleasanton race track will remain as it is, one of the best in America.

The "Horse Review" is advocating the publishing of a supplemental chapter in the Year Book which would contain a list of all full and corrected pedigrees that have heretofore been given as unknown or are erroneous. The idea is a most excellent one and will receive the aid and unqualified endorsement of every turf writer in the United States. We trust the Registry Association will adopt the idea.

Dennie Neyland has sold to Far Western parties, through Jimmie McQuillan, of Bozeman, Mont., the three-year-old colt, Benboe, by Bingen 2:06 $\frac{1}{4}$, out of Nonita 2:17 $\frac{1}{4}$. Benboe is a first-class individual and something of a trotter, as Dennie worked him better than 2:30 as a two-year-old and quarters in 33 seconds. McQuillan, who is a Boston reared young trainer, will have Benboe and will winter with the balance of his stable in California.—American Sportsman.

A starter should not be a judge. In the event of a close finish, or any change being made, the entire blame falls on his head, and why? Everyone knows who the starter is, and nine out of every ten attending races, thinks he runs the entire outfit, so heap all blame on his head. Its unpleasant to hear adverse criticism when one's friends be the starters, and also places the starting judge in a place where the public never exactly appreciate him.

A splendid opportunity is afforded horsemen to purchase or lease the perfectly proportioned standard bred stallion Unimak (full brother to Sterling McKinney 2:06 $\frac{1}{4}$). His pedigree and description is published in our business columns. There is a mare by him at Woodland that can trot in 2:16 and several colts like her are marvels of symmetry and perfect gaited trotters. As Unimak has breeding, color, size, perfect trotting action and a splendid disposition, he will be a valuable acquisition to anyone and will pay for himself the first season.

A New York dispatch says: "As a result of the statement of Gen. Leonard Wood to congress, that legislation hostile to horse racing in this department of the United States army by causing the removal of important studs to European countries, another attempt will be made to have the New York legislature repeal laws which killed horse racing." Any port in a storm. General Wood may be long on military matters, but he is very short in horse affairs. The trotting horse breeders can furnish the government with the best of cavalry horses, if Uncle Sam is willing to pay living prices.

Mr. Chris Smith, of Menlo Park, former owner of the beautiful stallion Abbottsford 2:19, She 2:12 $\frac{1}{2}$, and a number of other good trotters, recently purchased the brown gelding Charley T. 2:10 $\frac{1}{4}$ by Zombro 2:11, dam Sarah Benton (dam of Ella Madison 2:12 $\frac{1}{2}$) by Albion 5514, grandam Bessie by Inca 557, and those who remember this horse while he was on the circuit would hardly recognize him. He has filled out and weighs at least 100 pounds more, and, as a show horse, will compare favorably with anyone ever sired by Zombro. Mr. Smith says he never saw a more intelligent or pleasant roadster and he would sooner drive him than handle the best automobile ever made. He intends to take him to this city in a few months and use him on the park drives.

We regret to hear that Mr. Wm. Hendrickson, one of our pioneer horsemen, who lives at Pleasanton, met with quite a serious accident last Saturday. He was driving a fine colt by McKena from Pleasanton to the race track when a portion of the harness broke, the horse took fright and ran away, throwing Mr. Hendrickson out and fracturing one of his ribs. At last accounts he was doing nicely, but it will be sometime before he will be able to drive.

The Toomey sulkies and carts, and the Frazier track sulkies, which are offered at such ridiculously low prices at Studebakers', should "go like hot cakes," for bargains like these may never come within the reach of horsemen again. Just think of it, a Frazier sulky for \$80, and a Toomey for the same price, while a Toomey low seat pneumatic track cart, just the thing for matinees, for \$70, and a gent's nobby Toomey pneumatic cart for \$60.

There were several sons and daughters of Elmo 2:27 shipped to Australia and New Zealand, and their descendants have figured in many races and proven their worth as trotters and pacers, viz: Judge Belden, Doncaster, Lady Elmo, Ben Hur (brother to Alfred S. 2:16 $\frac{1}{4}$), Bonnie Clara, Mountain Maid, Hattie Weir, and Strideaway. One sire, Lord Elmo, is very popular in New Zealand, his grandam was Lady Elmo by Elmo.

In a short time the formal announcement will come from Lexington that the Kentucky Trotting Horse Breeders' Association has given ear to popular clamor and changed the racing condition of its famous futurity from the best three in five to the best two in three heats. This step never would have been taken had the affairs of the association remained in the hands of men who controlled it a year or so ago, for they did not breed nor did they race colts, hence they knew only the one side of it—profit for the race track.

Jos. H. Neal, of Pleasanton, who was for many years superintendent of the Pleasanton Stock Farm, and Monroe Salisbury's right hand man, sends the following toast for the "Breeder and Sportsman": "May the good old times of the past be so far overshadowed by the future that they will fall into oblivion and sleep the sleep of the just, and when they awaken in 1915 they will say 'we used to think we knew what horse raising and horse racing was, but in view of the present, the past was an iridescent dream.'"

"I am a great stickler for well-bred trotters or pacers," writes a Colorado trainer, "and am through with the short-bred ones. It is up-hill business trying to race horses that are always looking for short miles and very hard to convince their owners that they won't do to race. When slow miles are in order, early in the spring, you may be able to show an owner a fast quarter, or even half, and after that it is impossible to explain to said owner why the horse cannot go and race his miles out like a stout-bred one can."

The Kentucky Trotting Horse Breeders' Association announces that 965 weanlings have been kept eligible to the twenty-second renewal of the rich Kentucky Futurity for foals of 1911, on second payment, which was due December 7. The list shows an increase of nearly 100 over the list received last December. The nominations come from 36 States and Canada, the largest Canadian nominator being Miss Katherine L. Wilkes, and her eligibles are mostly the get of the coming young sire Kentucky Todd. There are 309 breeders represented in the list, only 38 of whom have as many as five entries, thus showing that the small breeders are taking an interest in racing and nominating their mares.

Daniel J. Campau, who inaugurated the classic M. and M. stake, the feature of the Grand Circuit races in Detroit, makes announcement of The Horseman and Spirit of the Times Futurity for foals of 1912. In addition to the guaranteed value of \$20,000 and the customary divisions for three-year-old trotters and pacers and two-year-old trotters, it makes a place for four-year-old trotters and for three-year-old records on half-mile tracks. The division of the stake is as follows: Three-year-old trotters, \$10,000; three-year-old pacers, \$2000; two-year-old trotters, \$3000; four-year-old trotters, \$3000; three-year-old records on half-mile tracks, \$2000. The three-year-old trot and pace and the four-year-old trot will be on the three-heat plan and the two-year-old trot best two in three heats. Entries will close on March 15, 1912.

Mr. Sanford Gordon, who is now a contractor in Vancouver, B. C., is a very enthusiastic follower of the light harness sport. He is a former resident of Buffalo, N. Y., and while there built the grand stand for the Buffalo track. He was a close friend and associate of the late C. J. Hamlin during the years when the Village Farm was the greatest nursery of harness race horses in the world. Mr. Gordon is the owner of the handsome little lay mare Just It Sure 2:19 $\frac{1}{4}$ by Nearest, dam by Danton Moultrie 17064. She took her record as a three-year-old at Sacramento in a walk-over for a stake; earlier in the season she started in a three-year-old stake at Santa Rosa, got third money and finished second the third heat in 2:14 $\frac{1}{2}$. Mr. Gordon will matinee her next season and breed her to some good stallion in British Columbia. That she will be well driven is sure, for her owner gave Belle T. 2:10 $\frac{1}{4}$ her record in 1895.

Belwin McKinney 2:21¼, the fastest and the highest priced yearling of 1911, is at Hamburg Place. John E. Madden made the statement Wednesday afternoon that he had that day paid Jacob S. Estill \$8000 for the colt, for the account of his sons, Edward and Joseph Madden. This sum is \$500 in advance of the \$7500 for which the son of McKinney 2:11¼ and Belle Winnie (4) 2:25, by Adbell (1) 2:23, was knocked down to him at the Old Glory sale a fortnight ago. W. J. Andrews will train Belwin McKinney, as he will also that other good young trotting prospect, the colt by Vice Commodore 2:11, dam Fanella 2:13, by Arion (4) 2:07¼, which under the name of John E. Madden, got a record of 2:27 here the past fall. Mr. Madden bought this colt several days ago and he says his name will be changed to Magowan, in appreciation of James R. Magowan, who owned and named the colt, and for whom he trotted to his record.

W. F. Whittier returned to San Francisco last Friday for Christmas, after spending only a few days in Hemet. He spent most of his time looking after improvements at the stock farm while here, which are now about all made and places the buildings at the farm in the most convenient condition possible. The building and painting is now all finished and a handsome goldleaf weathervane in the shape of an exact replica of Wilbur Lou, the world's champion yearling trotting stallion, has been erected. This gilt adornment flashes from the top of Wilbur Lou's stable and can be seen from a long distance. The men's club house has been completed and now has a first-class bath, lockers for the clothing and a fine sitting room. The blacksmith shop is also properly arranged and is one of the best of its kind in the country. It is made with all the advantages that fit it particularly for trotting horse shoeing and everything is perfected to make this end of the work complete.—Hemet News.

When the progressive rule barring hoppers was adopted by the National and American trotting associations it was made mandatory. Last season the rule forbid the use of hoppers on three-year-olds, but a few of the half-mile track associations advertised that hoppers would be allowed in their three-year-old classes. It happened in a few instances that these races were won by hopped three-year-olds and owners of free-legged colts in the race carried the case to the National Trotting Association. The latter has ruled that the hopped three-year-olds are not entitled to any money and has ordered the winning redistributed. It is evident from this action that the parent associations are in earnest in regard to enforcing the rule against hoppers, but whether they can successfully cope with the situation next year when the rule applies to four-year-olds is another question. It is known that many of the half-mile track associations throughout the East are very anxious to allow the hoppers on four-year-olds and it is said that some of the individual associations will advertise that fact. Whether there are enough associations desiring to allow the use of hoppers to force the parent associations to rescind the rule is an open question.

Fasig-Tipton Co. have reserved space in the new exhibition building to take the place of Madison Square Garden. Definite announcement of the new building was made last week. It will be near or adjoining the New York Central's new stations at Forty-seventh street and Lexington avenue. According to the early plans the structure will cost \$2,000,000, will seat 3000 more persons than the Garden and the arena will be 50 per cent larger than the present one. Contracts already have been closed with nearly twenty associations which give annual exhibitions. These shows will cover 200 days, which will mean a guaranteed income for the promoters of \$200,000. James T. Hyde, representing the Madison Square Garden directors, is actively engaged in making the future arrangements for the new structure. Fasig-Tipton Co. was among the first to register their claim on the new building for their annual horse sales. The others were the circus representatives, the Poultry, Dog Show, Sportsman's Show, Real Estate, Electrical and a number of other business associations which give annual exhibitions.

It is currently reported that W. E. D. Stokes, owner of the Patchen Wilkes Farm, intends to sell every horse he owns, with the exception of three fillies, at the Fasig-Tipton sale in February. His protracted illness will prevent him from paying any attention to this beautiful farm. If the news of this sale proves true it is a matter of regret, for there has not been a more liberal patron of the trotting horse industry than he, and several shipments of trotters from California made through the late F. J. Kilpatrick, found splendid homes on his elegant farm in the Blue Grass region. Should the sale take place there should be a syndicate of horsemen formed here to attend it and Purchase Peter the Great 2:07¼, Peter Donna (3) 2:14¼, J. J. Audubon 2:19, or at least two carloads of the young mares and colts to be offered, for they represent the acme of fashionable breeding and should find places here on the Pacific Coast where representatives of the blood that has made this farm famous are very scarce. There is a big consignment of yearlings from this farm to be sold at the Mid-winter sale, but the addition of their sires and dams will make it one of the greatest sales ever held in America.

Dr. O. J. Osborn, one of the best qualified veterinarians in California, has located at Hemet, where he has fitted up a splendidly equipped hospital with all the latest paraphernalia; undoubtedly he will soon have a fine practice.

W. A. Shippee's good bay stallion Moses, by Moses S. 2:19½, out of a mare by Rajah, son of Sultan 2:24, is being handled by that well-known horseman, Jas. Thompson, at the Sacramento track and is doing remarkably well. Jim likes him and that is proof enough that Moses is fast and has the "git everything in sight" instinct very strongly developed.

Mr. R. J. MacKenzie has decided not to ship the balance of his horses to Pleasanton this winter, as the season is late and he does not care to take them from the warm stables where they are, place them on the cars and run the risk of losing them in transit, as he did with two good ones that recently died at Ogden. Next fall he will ship all his horses earlier to Pleasanton. They will then avoid the extreme cold of the high altitudes of the Rocky Mountains and the Sierra Nevadas. Mr. MacKenzie started for Chicago last Tuesday and will be back in California about the 18th of this month.

Schuyler Walton has Mr. A. S. Kellogg's good filly Verda Ray in his string of good ones at Fresno. She is the mare described in last week's issue as being in charge of C. E. Clark. Mr. Walton also has in his string of fourteen horses a two-year-old brother to Athasham 2:09¼ that is entered in all the futurities and gives every promise of adding honors to the fame of his remarkable sire, Athadon (1) 2:27 and the great broodmare Cora Wickersham. This colt belongs to Geo. L. Warlow and it would not be surprising if Schuyler would not capture a few futurity stakes with him. It is a habit he has.

It is reported that the estate of the late August Uhlein has decided to dispose of the champion stallion, The Harvester 2:01. The great son of Walnut Hall 2:08¼ is on the market, but will be disposed of, it is said, to "the highest bidder" and not sent to the auctions. Last summer it was said that C. K. G. Billings wanted the horse, but that Mr. Uhlein refused to put a price on him. It is now said that the heirs and executors of Mr. Uhlein's estate have decided to dispose of the champion.

IT MUST HAVE BEEN A BLUFF.

The amazing degree of self-abnegation and lofty purpose which impelled the editor of a Western horse paper published in Chicago, to announce some weeks prior to the appearance of his annual Christmas number that paid write-ups of breeding farms and sensational horses would not be solicited, but would be featured at the expense of the publisher, is not difficult to understand after an inspection of the pages of the special number referred to. So far as any elaborate representation of great farms or noted horses and horsemen is concerned, the case is a good deal like the story of snakes in Ireland—there are none. Doubtless the harassed and tormented owners of the horses which have achieved great fame and won fabulous sums during the year arc grateful for the immunity accorded them by our esteemed contemporary, but its readers may view the situation in a different light, and prefer to have had the features represented, even at the sacrifice of the dignity and moral heroism of the editor. At any rate, in the light of the subsequent developments the unctuous assumption of superior virtue on the part of this horse editor and his supercilious rebuke to his less punctilious contemporaries turns out to be only a little cheap buffoonery.

It is a strange and distorted—and in this case characteristic—conclusion which conceives any impropriety on the part of a turf paper in asking the owners of important breeding farms or stallions which have won distinction to pay for the publicity accorded to them in its columns. These stallions and these farms are beneficiaries of this exploitation, and the conditions which have enabled them to be successful are to a large degree created by the reports of the turf papers in building up and maintaining the interest in the sport upon which the stability of the breeding pursuit depends. Every turf paper devotes columns every year to famous stallions and prominent breeding farms for which no compensation whatever is sought or expected. If they should cease to do this, by concerted determination, the neglected owners would realize keenly the loss of the publicity and feel that they had a right to protest. There is not a farm, or a stallion, or a horse of any consequence anywhere in America that has not received from the turf papers hundreds of dollars' worth of free advertising for every cent's worth they have paid for. Under these circumstances it is asinine to maintain that the publisher of a turf paper who at great labor and large expense issues an annual special number devoted to a showing of the resources and progress of the light harness sport and the breeding industry, and asks the men who have been most successful and prominent during the year to be represented therein and to pay for their representation, is guilty of any impropriety or transgression of the ethics of the newspaper profession. No one ever suggested that idea except the Western horse editor referred to, and, as before stated, his high and mighty parade of generosity and magnanimity was only a bluff.—Trotter and Pacer.

RACING AT RIVERSIDE.

"Well, fellers, that was some hoss race, anyhow, wa'n't it?" was the phraseology indulged in by one enthusiastic old-timer who had just ceased laughing over the manner in which the classy little Riverside horse, Monk, won the free pace from the Los Angeles competitors. Also there were several hundred others at the racing matinee on New Year's day, that were equally enthusiastic at the track. The Riverside Military band played during the lulls in the sport.

"There couldn't have been a better combination for good racing sport than we had today," said Secretary W. L. Scott of the Riverside Driving Club to a Morning Enterprise man last evening. "The day, the track, the animals and the general conditions all favored good racing, and we had it—with close finishes that made 'em lean far out over the front of the grandstand to determine which was to be the winner."

Fighting to maintain the record of the track, Monk captured the first heat of the free-for-all pace against the Los Angeles horse, Nordwell, with a mark of 2:08½, and the celebrated Hal McKinney, boasting of having stepped it in 2:06½. In the second heat the plucky little Riverside horse, owned by H. Eigenbrod, came in third, but when the third heat was on she dug out of the pocket and coming down the stretch under a full head of steam and an abundance of ginger, took first place, while the crowds howled their applause, bandmen hammered the drums, and hats were thrown up by the admirers of the local winner.

No less exciting was the finish of a number of the individual heats of the meeting, the 2:25 pace being among the most pleasing to the big gathering. After ending in third place in the first heat, Auto Zombro took the second by a few feet and captured the third heat by a neck-and-neck finish with Zella Z., driven by Charles June.

There were three horses here from Los Angeles, Nordwell, Auto Zombro and Midnight, and four from San Bernardino, Bolock, Mabel Van, Larry K. and Copper the Ore. Summaries:

235 Trot:

| | | |
|--|---|---|
| Miss Worth While, by Worth While | 1 | 1 |
| Dark Streak | 2 | 3 |
| Loretta | 4 | 2 |
| Larry K. | 3 | 3 |

Best Time, 2:33.

| Maud Wilkes | 3 | 2 |
| Marigold | 2 | 3 |
| Copper the Ore | 4 | 4 |

Best time, 2:31.

Those who officiated during the matinee were the following:

Judges—H. A. Hammond, Riverside; Theo. Holmes, San Bernardino; Budd Doble, Hemet.
Timers—W. A. Hayt, Riverside; F. Vantress, San Bernardino; Dr. W. S. Rogan, Hemet.
Starter—H. G. Stanley.
Clerk of course—H. P. Zimmerman.—Morning Enterprise.

GOING TO SAN DIEGO.

Keefer & Spencer, whose string of trotters have made Woodland famous, are preparing to remove their training and breeding stables to San Diego. They recently returned from a circuit that included Oregon, Washington, Illinois, Oklahoma, Texas, New Mexico and California, on which they were very successful. They have leased the Sweetwater track near San Diego and purchased seventy-five acres near the track. Spencer has gone to San Diego to construct a residence and to make other arrangements for removal. He will return for the horses and they will be taken south about the 1st of February. The A. Brown trotting stable will also be taken along. Brown, who owns Woodland's track, will keep his broodmares, colts and stallions at Woodland, and A. B. Kenny will succeed Spencer as manager. Spencer has been Brown's trainer for eleven years. He has developed some great colts by the stallions Nushagak and Prince Ansel. During the season just closed he placed two horses in the 2:10 list, being one of four drivers in the United States to accomplish that feat during the year of 1911.

Attention is called to the advertisement of the great green pacing mare Celia K. (trial 2:10¼) and her full sister, a four-year-old, that is just as promising. There are no better "prospects" in California and seekers after first-class racing material will do well to inspect these good ones.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

FISH AND GAME COMMISSION NOTES.

Frank M. Newbert of Sacramento was elected president of the State Fish and Game Commission, on motion of M. J. Connell at a meeting of the Commission held last Tuesday. Mr. Newbert was appointed by Governor Johnson as a member of the board, vice David Starr Jordan, who resigned several months ago. He is the secretary of the Kimball-Upson Company in Sacramento.

Mr. Newbert is an ardent devotee of rod and gun, a champion trapshot, has a practical knowledge of game and fish affairs and is personally known to and popular with sportsmen in almost every county of the State.

Carl Westerfeld, appointed by Governor Johnson several weeks ago in place of Fred D. Sanborn, resigned, had his initial sitting as an executive member of the Empire Gun Club and the Exposition City Gun Club, and is in through rapport with the protection and propagation measures for our fish and game.

M. J. Connell of Los Angeles is one of the leading sportsmen of the Angel City and has been prominent for several years past, as a staunch advocate and supporter of measures for the protection of fish and game in this State.

The main office of the Commission is located in this city. A branch office has been recently established in Sacramento. For some time past the Los Angeles office has been of great efficiency in the administration of matters pertaining to the southern part of the State. A fourth office branch of the Commission is in active operation in Fresno.

The increasing business of the Commission is thus being handled from four different points at the same time. Commissioner Newbert at Sacramento, Commissioner Connell at Los Angeles, and Commissioner Westerfeld in this city enable executive action and dispatch of business to a material extent. Secretary Ernest Schaeffle is in charge of the San Francisco main office, and Deputy A. D. Ferguson conducts the Fresno office.

The business meeting of the board Tuesday was adjourned at a late hour in the afternoon and to be concluded Wednesday.

Among other things the finances of the board show a balance of \$104,899.13 on hand. The expenses for November totaled \$17,678.37.

A report of the State Board of Control to the Commission showed by the recent expert examination that the accounts, vouchers, expenditures, etc., were properly made and carried out, and, so to speak, showed a clean bill of health for the board.

The Board of Control's system for accounts, vouchers and a detailed routine of documentary reference matter, for the mutual expediency of official business, was offered to and accepted by the Commissioners for future use in the offices of the board.

Dr. C. H. Gilbert resigned as the Commission's trout and salmon expert. Future investigation in these lines will be conducted by W. H. Shebley, recently appointed superintendent of hatcheries, a piscicultural expert for 20 years in charge of the Sisson hatchery.

The appointment of a superintendent of the Game Department of the commission, or head field deputy, it was intimated would come up before the board Wednesday. This important office has a number of applicants. Among those best posted it was intimated a "dark horse" may be the appointee.

The secretary's report showed that for 1911 a total of 766 arrests for violations of the law were made—271 fish cases and 495 game cases. Of these there were convictions in 612 cases, with a total of \$13,593.50 in fines collected, together with jail sentences embracing 309 days.

During the session Tuesday afternoon a committee composed of President Dr. A. M. Barker of San Jose, Secretary E. A. Mocker of Capitola, Henry M. Keller of Los Angeles, Fred Foster of Hanford, H. Chase Hall of Corte Madera and Frank V. Bell of this city, representing the California State Fish and Game Protective Association, met the Commissioners in conference over a proposed amalgamation of the State association with the newly projected county fish and game associations.

The old-line State association has been in existence ten years, has accomplished much good in fish and game legislation, and has, it is claimed, a membership of 40,000 sportsmen.

Since the subdivision of the State into six game districts, fish and game interests, while no less important, were under the nature of the present laws, diversified in application and much in need of closer local attention.

This new condition of affairs prompted the organization of county fish and game associations—a project fathered by Commissioner Newbert and fostered by the Commission. The county organizations claim now a total membership of about 2000, acquired within a few months.

So far as actual joining of forces is concerned, the conference brought about nothing definite. The work of the new county clubs will receive co-operation from the State association—both organizations and

their aims are acceptable to the Commission in aiding its work.

The visiting delegation withdrew and held an executive session shortly afterwards in the Palace Hotel, at which meeting, among other matters transacted, it was decided to hold the next annual convention of the California State Fish and Game Protective Association in September at Hanford.

There will be no change of location this year it was decided for the State Game Farm, now in operation at Haywards.

The branch farm of thirty acres at Folsom will be used as a propagating and distributing depot, from which valley quail will be sent to restock different localities where the birds have been thinned out.

At the suggestion of Dr. T. S. Palmer of the Biological Survey, Washington, D. C., experiments will be carried on at both establishments for the purpose of domesticating valley quail. That this can be accomplished is sanguinely believed. Results in this line, although comparatively few, prove to a great degree the tractability and intelligence of the native quail to training and kindly treatment. Superintendent W. N. Dirks of the Haywards farm tamed and trained a bevy of quail at his Alameda home. It is believed that good results in this line can also be accomplished with mountain quail and sage hens.

A statement in the Pleasanton Times regarding the State Game Farm is as follows:

"The State Game Farm, threatened with removal to Folsom the past few weeks, is to stay in Alameda county. This decision was reached last week at a meeting with Governor Johnson and Senators Stetson and Strobridge with Commissioner Newbert. The Folsom location will be used as a quail propagating depot.

Whether this means that the farm is to remain at the Mt. Eden location has not been stated. From statements made some months ago it has appeared that trouble over the lease would necessitate the moving from present quarters about the first of the coming year. If this difficulty has been settled it has not been made public. In the event that it has not, and another location must be selected, it is to be hoped that the Sunol location will be thoroughly looked into before any other is decided upon. Sunol offers the grandest spot for the purpose of game propagation in Alameda county, removed from the denser populated districts of the hay plain and protected from damp and chilling winds by mountains. Water of the purest quality, feed, both wild and cultivated, "cover" for birds and conditions as near to nature as can be found within a radius of miles and miles of San Francisco are a few of the inducements Sunol holds forth.

The Times has asserted time and time again that the Commissioners will have a long look to find a better place. It is sincerely to be hoped that the entire commission will at least visit Sunol in the event they are compelled to move. The Spring Valley Water Company offers to aid in the protection of any birds escaping from the farm and also will make to the State a nominal renting proposition, which may be accepted without fear of criticism from any source in Alameda county other than that which may arise from localities wishing the farm nearer them.

Sunol does not want the farm unless it is possessed of every requirement necessary. These it believes it has. The Commissioners are again invited by the Times to look the field over."

Game Birds Released.—Three pair of Hungarian partridges and two pair of "Bob Whites" arrived last week from Pennsylvania, consigned to C. L. Crellin and to be used for propagation purposes at his farm near Pleasanton. The birds arrived in first class condition and seemed glad to be liberated when their new owner opened the box and let them loose in the seven acre enclosure he has prepared for propagation purposes. All of the increase from the birds received last week will be allowed to go on open ground, the plan Mr. Crellin is adopting with the pheasants and other winged creatures he is raising.

Ducks are beginning to "work in" on the west side bay shore, and Belmont and San Mateo gunners are beginning to have a "look in" on the sport. Ed L. Hoag, Commander Reynolds and Bill Hogan were the Leslie Gun Club members shooting at the salt works preserve that were in the limit class a week ago for strings of sprig and wigeon.

Hunters in the Los Banos country a fortnight Saturday and Sunday were numerous. The Saturday contingent had the best shooting. Plenty of new water in the valley flats have induced mallard, teal, widgeon and spoonys to tarry long. The sprigtails were nearly all gone from that section a week ago. This variety of the webfeet were to be seen by thousands in the Suisun bay and lower San Francisco bay regions, taking comfortable daily siestas during the calm weather.

This week it is reported that the valley section was pretty well deserted by the ducks.

ECHOES FROM THE NORTHWEST.

[By August Wolf]

Harry Yarnell, an eastern Washington rancher, residing on Pine creek between Roosevelt and Bickleton, is making a highly profitable business out of trapping for fur-bearing animals during the winter months. A total of 37 prairie wolves and 11 bobcats represent the catch of bounty animals taken from his "trap lines" in 27 days during the month of November. In addition to the value of the furs, he received a bounty of \$1 on coyotes, and \$5 on the bobcats. The estimated net value of the entire catch is close to \$300.

Mr. Yarnell does his trapping along the Columbia river, Pine creek, Rock creek and Squaw creek. His line of traps covers a total distance of 150 miles. He makes the rounds on horseback, with a pack horse to carry bait and the pelts of the animals ensnared. Six days are required to make the trip, and besides looking after his traps Mr. Yarnell has to kill jack-rabbits, which he uses for bait.

In addition to animals caught in his traps, Mr. Yarnell shoots many coyotes. He uses 350 traps and places them in sets of three, about 20 feet apart, around trees and covers them with dirt. He swings the carcass of the rabbits used for bait to a limb of the tree. He catches many of the bobcats in traps buried in trails without bait. Traps for bobcats are also placed in trees.

He has trapped \$2 bobcats since he came to Klickitat county in 1901, but has only seen two of the animals before he caught them.

In addition to coyotes and bobcats Yarnell catches coons, badgers, skunks, porcupines and eagles. He is also a taxidermist, and mounts the best specimens of the smaller animals and eagles that he catches. In his last catch he found an animal in each trap of two sets, getting three bobcats and three coyotes out of six traps. In 1910 he trapped 100 skunks at Grand Dalles in two weeks. These pelts brought him 95 cents each.

The annual rabbit hunt started at Wilson Creek, Wash., December 27. Two hundred started on the chase. A fresh fall of snow during the night made the conditions ideal for a successful hunt and it was expected that a large number of hunnies would be captured. The country was thoroughly covered for a radius of 10 miles, and the rabbits driven toward the town, where the final roundup was held, late in the afternoon. Last year over 400 rabbits were killed at the annual hunt. Nearly all of these were shipped to Spokane and turned over to the Salvation Army for distribution among the poor. A big celebration in the form of a dance and supper wound up the hunt in the evening.

Secretary John T. Little of the Inland Empire Game Protective Association is planning a big coyote drive between Sprague and Lamont, Wash., early in January, a number of farmers in that vicinity reporting that the pests are particularly numerous there. "With a party of from 30 to 50 men, starting from four different points and driving toward a central spot, a district of 10 miles can be covered and plenty of sport insured the hunters," states Mr. Little. "I have had much experience in this sport in Kansas and there is no reason why a drive of this kind cannot be pulled off here."

Fred Hoesly killed a timber wolf near Eastport, Idaho, several days ago, bringing down a big 70 pounder with a shotgun. He took one shot at the wolf and finished it with another load when it started to attack him.

That the waters of the lakes and streams in the Inland Empire are the best in the United States for the propagation and growth of the Eastern brook trout, is the opinion of G. Hansen of Osceola, Wis., who is the owner of one of the largest trout plants in the country. Mr. Hansen is spending the holidays in Spokane with his brother, Otto Hansen. He is loud in his praise of fishing conditions in the Inland Empire. Hansen has furnished over 5,000,000 Eastern brook trout eggs to the Spokane Fish Protective association in the last five years. A shipment of 50,000 eggs was received by Secretary Wieseman from his plant last week. They were sent to the Little Spokane hatchery and will be planted in the Spokane river next spring.

A big rabbit hunt has been scheduled by the Inland Empire Fish Protective Association to be held February 13 and a championship trophy cup will be awarded to the hunter making the best bag for the day. Every entrant will register with the secretary before starting on the hunt and also after the day's sort. As the hunters return the game will be counted and the winner decided. This will be the first shoot under the auspices of the Inland Empire Fish Protective Association, and will probably be followed by others before the close of the season. The winner's cup will be donated by the association.

Danny McCarter, a baseball player, and Ed. Jessem, bagged two deer near Priest Lake, Idaho, recently. The season just ended has been by far the most successful in recent Idaho history, only exceeded by the enormous "killings" reported in Montana.

Thirty hunters killed 250 rabbits in the Columbia Flat Gun Club's second drive on the Smith ranch, twelve miles west of Mesa, Wash., a few days ago. After the drive L. D. Smith, assisted by the wives and daughters of the neighbors, served a dinner.

Sportsmen in Spokane and other parts of eastern Washington have been invited to take part in the big "varmint" hunt to take place in Pierce county in December, January and February. Twelve cash prizes are offered by the Pierce County Game and Fish Protective Association, and it is expected that the hunt will be the biggest affair of its kind ever held in the West. For killing a cougar a hunter will be credited with 2500 points, while the lowest possible number of points allowed is five for killing an English sparrow. The prizes range from \$50 to \$5.

The Game Protective League of Okanogan, Wash., has forwarded letters to the federal authorities upon the subject of transporting elk from Wyoming, where their numbers are extensive. Officers of the United States Department of Agriculture have written that elk could be secured for the Okanogan forest, providing enclosures were made that would insure the safety and feeding of the animals. An endeavor will be made to convince the authorities that it is unnecessary to keep elk in an enclosure here as the Okanogan forest is a natural breeding place for elk and deer, the snowfall being light and the winters mild in comparison with their present abode in Wyoming.

Scores of wolves and coyotes were killed during the drive in the Grand Dalles district of Klickitat county, Wash., on December 3. The drive was planned by stockmen, headed by Leo F. Burns, owner of the Loma Alta ranch, and 25,000 acres were covered, the hunters following the quarry on horseback. Besides one hundred local men there were hunters from The Dalles, Vancouver, Portland, Walla Walla and Spokane. Coyotes, which abound in large numbers on account of the sheepfolds, are more plentiful than ever this year, as many as seven having been seen in one band.

Rabbit driving with the gunmen and brush-heaters in high-power automobiles is a popular sport in Franklin county, Wash. B. F. Short, formerly of Spokane, now a resident of Pasco, had charge of the first drive in December, when hundreds of long ears turned somersaults. Short says it is real sport, adding that when a marksman is traveling thirty-five miles an hour in a machine and the rabbit is doing from seventy to 100, it takes a cracking good shot to get his target. Expert trap shooters acknowledge that the sport is the best they have ever experienced.

Charles Best of Coeur d'Alene, Idaho, killed a cougar weighing 150 pounds near that city on December 5. The hide measured seven feet from tip to tip. He received \$15 bounty from the county.

M. Dickey, a trapper at Colfax, Wash., recently killed three timber wolves, on which the bounty is \$15 each; one bobcat on which the bounty is \$5, and three coyotes, on which the State paid a bounty of \$1 each.

A party of seven Rathdrum Idaho, hunters returned recently from a two weeks' hunting trip at Priest Lake Idaho. They bagged 14 deer and one black bear. They report a good time, though the snow was four feet deep.

Since the expiration of the hunting season in Montana the deer have been returning to the valleys in large numbers and are reported to be causing considerable damage to orchards and haystacks in various localities.

AMERICAN GAME PROTECTIVE AND PROPAGATION ASSOCIATION.

Over three thousand dollars, mostly in payment of one dollar yearly membership dues, have already been received by the American Game Protective and Propagation Association, according to figures given out last week from its offices at 111 Broadway, New York. Although little more than two months have elapsed since its incorporation, the Association has lent valuable aid to the cause of game protection, and sportsmen from all over the country, realizing the necessity for prompt and concentrated action if our fish and game are to be saved from extinction, are hastening to enlist under the National standard. Over a dozen life, and a number of club memberships have been secured.

The New York Fish, Game and Forest League, which counts among its members most of the local clubs of the State, and which has been very influential in securing the enactment of good legislation, joined the new Association by the unanimous vote of the annual convention held recently in Schenectady.

Canada, and almost every State in the Union, have furnished members, paying from one to one hundred dollars a year. Memberships are secured on the following basis: Associate, one dollar or more annually; Club, five dollars or more annually; Life, one hundred dollars at one time; Patron, one thousand dollars; and Benefactor, twenty-five thousand dollars.

The funds derived in this way, together with an income of \$25,000 subscribed by manufacturers, is administered by experts trained in the profession of game and fish protection and propagation. They stand ready to give their support to any good cause for the furtherance of these ends.

Among the things already accomplished by the Association is a complete re-organization of the protective forces of one State where a special agent spent ten days, during which time more convictions

were secured against violators than in the preceding ten months. The agents work with the local authorities, in most cases turning over all evidence to them so that they may obtain the convictions.

The president of the Association, John B. Burnham, who has for years been identified with protective work, and who is an authority on game laws, has been asked by the State of New York to assist in codifying its laws. He is one of a committee of three engaged in this work.

Reports of local conditions, which members have sent in, are strikingly similar. Inadequate or conflicting laws, poorly enforced, are the rule almost everywhere. Laxity in the enforcement of game laws is often due to considerations of local politics from which the Association's special agents are immune, and are therefore able to obtain evidence against, and prosecute violators, where the county or State officers would not do so. In other cases the local authorities are simply handicapped by lack of funds and are too glad of the assistance of the Association's trained men.

Another of the commonest obstacles in the way of bringing to justice those who are ruthlessly despoiling the country of the game which rightfully belongs to all the people, is inertia on the part of a public as yet unawakened to the disastrous results which are sure to follow this despoliation. If the community under his surveillance is not behind him, a warden can accomplish little. The Association's agents are active in spreading the gospel of game protection among those who do not realize its necessity.

The interest that has been manifested from the start, and the loyal support which sportsmen and others have accorded to the American Game Protective and Propagation Association, shows that the people are ready to take the same position in the matter of saving our wild life that they have taken towards the conservation of some of our natural resources. Nothing but united effort can save the fish and game. The business of the National Association is to organize as well as to exert this effort.

MILITARY SCHOOL RIFLE SHOOTING LEAGUE OF THE UNITED STATES.

List of schools represented, season of 1912, the rifle club secretary and the N. R. A. judge.

Columbia (Tenn.) Military Academy, R. D. Garner, Lieut. W. H. Westmorland, U. S. A.

Harvard Military School, Los Angeles, Cal., H. M. Fletcher, Mr. H. M. Fletcher.

Hitchcock Military Academy, San Rafael, Cal., W. H. Edmands, Maj. S. J. Halley.

Marist College, Atlanta, Ga., L. Bramen, Maj. E. R. Schmidt.

Miami Military Institute, Germantown, Ohio, F. J. Moterman, Lieut. C. R. Street, U. S. A. (retired).

Mt. Tamalpais Military Academy, San Rafael, Cal., Maj. N. F. Vanderbilt, C. N. G.

N. Y. Military Academy, Coruwall-on-Hudson, N. Y., Douglas Leslie, Mr. Geo. S. Clark.

Northwestern Military Academy, Highland Park, Ill., W. Thode, Maj. R. P. Davidson, I. N. G.

St. Johns Military Academy, Delafield, Wis., John Saunders, Lieut. C. F. Severson, U. S. A.

Wentworth Military Academy, Lexington, Mo., Warren E. Dewey, Capt. G. B. Pritchard, Jr., U.S.A.

Schedule of Matches.

January 13th—Columbia vs. Harvard, Hitchcock vs. St. John's, Marist vs. Northwestern, Miami vs. N. Y. Military, Mt. Tamalpais vs. Wentworth.

January 20th—Columbia vs. Hitchcock, Harvard vs. Wentworth, Marist vs. St. John's, Miami vs. Northwestern, Mt. Tamalpais vs. N. Y. Military.

January 27th—Columbia vs. Marist, Harvard vs. Hitchcock, Miami vs. St. John's Mt. Tamalpais vs. Northwestern, Wentworth vs. N. Y. Military.

February 3d—Columbia vs. Miami, Harvard vs. Marist, Hitchcock vs. Wentworth, Mt. Tamalpais vs. St. John's, N. Y. Military vs. Northwestern.

February 10th—Columbia vs. Mt. Tamalpais, Harvard vs. Miami, Hitchcock vs. Marist, N. Y. Military vs. St. John's, Northwestern vs. Wentworth.

February 17th—Columbia vs. N. Y. Military, Harvard vs. Mt. Tamalpais, Hitchcock vs. Miami, Northwestern vs. St. John's, Wentworth vs. Marist.

February 24th—Columbia vs. Northwestern, Harvard vs. N. Y. Military, Hitchcock vs. Mt. Tamalpais, Marist vs. Miami, St. John's vs. Wentworth.

March 2d—Columbia vs. St. John's, Harvard vs. Northwestern, Hitchcock vs. N. Y. Military, Marist vs. Mt. Tamalpais, Miami vs. Wentworth.

March 9th—Columbia vs. Wentworth, Harvard vs. St. John's, Hitchcock vs. Northwestern, Marist vs. N. Y. Military, Miami vs. Mt. Tamalpais.

Conditions Governing the Competitions.

Eligibility: Open to teams from rifle clubs representing a military school or a private school having a military department, affiliated with the National Rifle Association and in good standing. Any number of club members up to ten may shoot on the team, the best five scores to count for the team's record score.

Distance: Fifty feet from end of rifle to target.

Number of Shots: Twenty for record, Ten standing and ten prone, ten shots on a target, no sighting shots.

Target: The N. R. A. gallery target. One to ten count to be used. Official stamped targets, furnished by the N. R. A., must be used. No other targets will be received for record. Used targets will be held subject to call by the N. R. A.

Position: Standing—offhand, body and rifle must be free from all artificial support. Prone—head toward target, rifle, forearm and hand must be free

from all artificial support. Use of strap not allowed in either position.

Rifle: Any .22 caliber rifle, weighing not over ten pounds.

Sights: Any, in front of the firing pin, not containing glass.

Trigger Pull: Not to be less than three pounds. Ammunition: .22 caliber short.

Time Allowance: Ten minutes will be allowed for each string of ten shots.

Judges: A judge appointed by the N. R. A., or his representative, will supervise the shooting of all matches and certify to the scores made. He will see that all conditions are adhered to, determine the score and report same to the N. R. A. by mail on the official blank at the completion of each month. He will take charge of the official targets, before and after the match.

Matches, When Shot: Harvard School, Hitchcock Military Academy, Mt. Tamalpais Military Academy and St. John's Military Academy will shoot on Monday of each week or the Saturday preceding if preferred; Wentworth Military Academy, Miami Military Institute and Northwestern Military Academy on Tuesday and Columbia Military Academy, Marist College and N. Y. Military Academy on Wednesday or before.

Entrance Fee: Three dollars per team.

Prize: To the team winning the most number of matches a plaque emblematic of the military school rifle shooting team championship and five silver medals to the individual members of the team.

Note: The Interscholastic Indoor Championship Team Match for the Astor Cup for 1912 will be held during the week ending April 20th.

DOGDOM NOTES.

A request to give some information as to the origin of the pointer and where it came from affords an opportunity to attack a whole lot of very erroneous conclusions, which have been passed along by writer after writer, apparently for no other reason than that no one has ever taken the trouble to make any personal investigation, but preferred the easy way of all predecessors by saying the pointer originally came from Spain. We got our pointers from England, of that there is no question, but to say that the English pointer came from Spain is altogether wrong. Some reached there from Spain; that needs no discussion, but all latin Europe had pointers, and so had Germany, and so had England, writes James Watson in the Philadelphia Enquirer. I am pretty well convinced that Italy first began shooting flying and made use of the dog we now call pointers. That country was well ahead of any other in the development of what the English called the fowling piece, and I had a small engraving which dated back well towards 1600 by an Italian artist representing shooting at flying partridges with pointers in front of the sportsmen. Not only that, but in Jacobbo Bassano's painting of Moses striking the rock, which is in the Dresden gallery, there is an excellent representation of a liver and white pointer, a dog quite fit to put in the ring with dogs of the present day.

Bassano takes us back to 1550, as he was born in 1510, and died in 1592. It is no fancy picture. I mean to say it must have been either a dog he well knew or it was a typical dog of the period. In the picture there are a white Arabian horse, a mule, a donkey, two lambs, a rabbit and a rooster, all so true to life that it would take the very best of our present day animal painters to do anything like equal work. Then you need only say that a man who would so faithfully represent all these animals must be credited with faithfully reproducing things he knew well. There was no use for the pointer as a pointer until the quick-firing gun began to be developed up to which time guns were fired from a rest, and the process of firing the gun was slow and called for several different things to be done to fire the powder. Even when the improvement came there was nothing like what we have, or even what our grandparents had in the flint lock, but it was a decided step in advance and it did permit of shooting from the shoulder, and from this quite naturally followed shooting on the wing.

Up to this time the setter had been the only dog used with partridges, but not to shoot over. He was still the setting spaniel used to "set" the covey, and over the birds a net was drawn. This sounds rather like pot hunting to us, but there were ethics of sport in those days, and the right thing to do was to make a selection of such as were in the best condition for the table and let the rest go. This setter was not quite what was wanted for the gun, but there had been in use for many years tracking hounds, which had developed the pointing instinct and stood the game, not birds, but animals of the chase. By years of parental education these dogs came naturally by this, showing by their standing and pointing. Perhaps it will be better to give a quotation from a print engraved by Blome's book, published in 1640. He is speaking of the tracking hound, whose duty was to go on a lead in the early morning, pick up the slot of the deer or other animal, and trace it to where the deer had "harbored" for the day. The man with the hound then returned to the head huntsman and reported where the deer was. The hounds were taken there in couples, and the deer was "un-harbored," driven out for the chase. The quotation referred to is as follows: "Some are of that nature that when they have found the game they will stand still till the huntsman comes up, to whom in silence, by their face, tail and eye, they show the game." What is that but pointing. And that was originally

written early in the seventeenth century, and possibly earlier.

These tracking hounds were used all over Europe; in France they used basse hounds, which I am very sure were the real St. Hubert hound, not the legendary dog usually supposed to have been of that breed. Ridinger gives several illustrations of this deer tracking in Germany, and at the same time he illustrates the pointers of Germany. I have some half dozen of these illustrations, showing several differently named pointing dogs, and the question as to their work is set at rest by their being shown pointing partridges and pheasants. These French and German dogs are much lighter, as shown on almost every illustration that I have seen, than the Spanish pointer, as typically illustrated by Stubbs, or as usually described in books of that period. What we know about them is that they were slow and sluggish, but had good noses. Some described them as being peculiar from other dogs in having a split nose, but I have come across that feature as being claimed specially for German dogs, and within the past week read in a good English work of a hundred years ago that the split nose was peculiar to the French variety of pointer.

It will be seen from this that published information has not been in the least reliable. The fact is that there is hardly a single reiterated assertion regarding pointers which has for the last century passed muster as a fact which is absolutely reliable. For instance, you will find in every dog book, with but few exceptions, the statement that flying shooting was introduced into England by an impoverished baron, who had brought some Portuguese pointers there some little time before Sydenham Edwards published this statement originally in 1806. This has ever since been accepted as gospel truth by bookwriters. Even Rawdon Lee, in "Modern Dogs," repeated it within the past decade. To refute that it is only necessary to turn to the poems of Guy, who in 1711 wrote the poem "Rural Sports," and described faithfully the actions of the pointer in the field, as well as the sportsman shooting flying. He was describing an every day incident in the sporting field of that time, and one is at liberty to form his own estimate as to how long before that period there were pointers and wing shooting in England for a poet to recognize it as an every day affair.

I did read some time ago in one of the old sporting magazines, 1796, if I remember correctly, that the flint lock was in operation in the fourteenth century, but that seems to be too far back. However, as soon as sportsmen had that contrivance put on their "arquebuses" shooting flying at once followed, and to accommodate the man who wanted to find where the game was, this self-educated tracking dog was still further developed. In European countries he had several names, and in England alone he was named the Pointer. He was just as much an English dog as any other dog in that country, and bore no more affinity to the Spanish dog than did either the French, the German or the Italian dog used for the same purpose, each of these having a distinct name.

The best evidence one can get in the way of back tracking in the way of breed history is in paintings. Poets and descriptive writers used phrases which may now be misinterpreted, but when you get a painting, such as the Bassano above referred to, or anything of a like nature, you get on canvas what the artist knew of what he actually had before him. It is by this total absence of any pictures showing pug-faced black and tan spaniels we know that King Charles never had any of what we now call King Charles Spaniels. The spaniels he fancied were snippy-faced, small, leggy, liver or black and white spaniels, bearing not the slightest resemblance to what we see at dog shows as English toy spaniels.

AIREDALE TERRIER CLUB OF AMERICA SHOW.

The specialty show of the Airedale Terrier Club of America, which was held last Saturday in the Murray Hill Lyceum, was well attended and despite the absence of such celebrated dogs as Tintern Royalist, Prince of York, King Oorang and Soudan Swiveller, also a consignment of five which Francis G. Porter, of Chicago, was importing from England by the steamer Baltic, and which he had hoped to receive on Friday, but was detained by fog, was in every way high class.

Chief interest attached to the appearance of the famous imported Colne Rockley Oorang, owned by Joseph A. Laurin, of Montreal, Canada. Mr. Laurin received the dog only three weeks ago from England and came on with it himself to let New York breeders and fanciers see his acquisition. Unfortunately, however, the dog, for which Mr. Laurin was declared to have paid not less than \$2500 and which is known as the sire of all the winning young dogs in England, as also of four full fledged champions, was brought into the ring in poor condition and rough of coat and was beaten on all hands.

Appearing in the limit class he was defeated by Red Hackler, the property of Russell H. Johnson, Jr., of Chestnut Hill, Philadelphia, and in the open class had to give precedence to G. W. Batson's Soudan Stamboul and Mr. Johnson's Red Hackler.

Soudan Stamboul was declared the winner in dogs, but later was defeated for the championship by William Prescott Wolcott's hitch Champion Kenmare Sorceress, whose manners and expression carried her through the supreme test in spite of a ragged coat and somewhat soft condition. Soudan Stamboul seemed to realize that his behavior was likely to prove detrimental to his chances of annexing the premier honors and sought to disturb his rival's

mental equilibrium by a display of temper. Through all the snarling and snapping, however, Kenmare Sorceress comported herself with a quiet dignity.

Puppies, especially bitches, formed a very promising display. Larchmere Kennels, of Hamilton, Mass., produced the female blue ribbon winner, Larchmere Laurel, fine animal of seven months, that gives promise of a bright future in the ring.

The Awards.

Puppies (dogs)—Theodore Offerman's York, the Past Master, first; A. Albright Jr.'s, Baughfell Comet, second; Thomas Cadwalader's Cleek, third; J. F. Stanton's Stanley King, reserve.

Novice (dogs)—Theodore Offerman's York, the Past Master, first; South Mountain Kennels' South Mountain Duke, second; J. F. Stanton's Stanley King, third; Larchmere Kennels' Larchmere Performer, reserve.

American Bred Dogs (champions barred)—Russell H. Johnson, Jr.'s, Red Hackler, first; Theodore Offerman's York, the Past Master, second; South Mountain Kennels' South Mountain Duke, third; Larchmere Kennels' Larchmere Performer, reserve.

Limit Dogs—Russell H. Johnson, Jr.'s, Red Hackler, first; Joseph A. Laurin's Colne Rockley Oorang, second; Thomas Offerman's York, the Past Master, third; South Mountain Kennels' South Mountain Duke, reserve.

Open (dogs)—G. W. Batson's Soudan Stamboul, first; Russell H. Johnson, Jr.'s, Red Hackler, second; Joseph A. Laurin's Colne Rockley Oorang, third; Theodore Offerman's York, the Past Master, reserve.

Winners (dogs)—G. W. Batson's Soudan Stamboul, first; Russell H. Johnson, Jr.'s, Red Hackler, reserve.

Junior Dogs—Over six months and not over eighteen months—J. F. Stanton's Stanley King, first; Silas Wodell's Eden Hill Authority, second; Harold Ober's Malvern Brushwood Boy, third; Leicester Kennels' Clonmel Beau, reserve.

Puppies (bitches)—Larchmere Kennels' Larchmere Laurel, first; Theodore Offerman's York Mayfly, second; Silas Wodell's Eden Hill Authoress, third; Mrs. W. H. Mulford's Hedgeley Flintstone, reserve.

Novice (bitches)—Theodore Offerman's York Mayfly, first; Larchmere Kennels' Peelsborough Clover, second; Mrs. W. H. Mulford's Hedgeley Flintstone, third; John McGough's Lady Bolton, reserve.

American Bred Bitches (champions barred)—A. Albright, Jr.'s, Baughfell Sceptre, first; John McGough's Lady Mary, second; Theodore Offerman's York Mayfly, third; Larchmere Kennels' Peelsborough Clover, reserve.

Limit (bitches)—Francis G. Porter's Springbank Sceptre, first; G. W. Batson's Soudan Sapphire, second; John McGough's Lady Mary, third; Grasmire Kennels' Grasmire Dona, reserve.

Open Bitches—William Prescott Wolcott's Champion Kenmare Sorceress, first; Francis G. Porter's Springbank Sceptre, second; G. W. Batson's Soudan Sapphire, third; John McGough's Lady Mary, reserve.

Winners (bitches)—William Prescott Wolcott's Champion; Malvern Sorceress, first; Francis G. Porter's Springbank Sceptre, reserve.

Junior Bitches—Over six months and not over eighteen months—Silas Wodell's Eden Hill Authoress, first; Mrs. W. H. Mulford's Hedgeley Flintstone, second; Malvern Kennels' Malvern Golightly, third; Knob Hill Kennels' Knob Hill Princess, reserve.

Selling Class (bitches)—Larchmere Kennels' Larchmere Fern, first.

Brace Class—G. W. Batson's brace, first.

FIELD TRIAL NOTES.

After decisively defeating the setter Rena Celle, owned and handled by J. M. Girton, of South Lebanon, Ohio, in the second series of the Derby of the Southern Field Trial Club, which began with twenty starters, the pointer Blue Diamond was declared the winner.

Blue Diamond is the property of W. L. Blankenbaker, of Louisville, Ky., and was handled by E. D. Garr, of La Grange, Ky. This is the third time this dog has been played in the last three starts, his work here in these trials being the best that he has ever done, thus winning the stake easily.

Second in the race was the pointer Success, owned by U. R. Fishel, of Hope, and handled by Herbert Fishel, of Washington, Ind. Third place was divided between the setters, Summit Chick, owned by Gustave Pabst, Milwaukee, Wis., and handled by W. H. Elliott, Courtland, Miss., and Mocharley, owned and handled by J. M. Avent, of Hickory Valley, Tenn.

The English setter Happy Day owned by U. M. Fleischmann, New York, and handled by C. H. Babcock, New Bedford, Mass., won the all age stake of the Georgia Field Trial Club, at Waynesboro, Georgia, which began Wednesday of last week, with sixteen starters. Second to him was the English setter Uncle Dave, owned by G. S. Parson, New York, and handled by Jake Bishop, Rutherford, Ala., and third was awarded to setter Miss Hettie owned by H. R. Edwards, Cleveland, Ohio, and handled by G. T. Dozier, Hannon, Ala.

The race between Happy Day and Uncle Dave was a good one, in which neither dog had it on the other, but the first heat of Happy Day was unquestionably the best of the race, and on the strength of the two heats he was entitled to the decision. These two dogs were run an hour before a decision was arrived at. The winners in this stake are well known on the circuit and have been placed on frequent occasions. The closing of this stake concluded the trials in this section.

EARNING CAPACITY ESTABLISHES VALUE.

The light harness horse that cannot trot or pace fast enough to win in its class, or, at least, cannot make a buyer believe it can win, is a hard horse to sell at the price usually placed upon the animal by the owner. It is the earning capacity that establishes the value of the trotting-bred horse, just as it fixes the price of the drafter, and the trotter or pacer without an earning capacity is worth less upon the markets of the world today than an ordinary farm animal. This is a truth that should be brought home to every breeder and dealer in this class of horses. The available speed of the trotter or pacer is what sells him and there is no getting away from that fact. The trotting-bred horse without speed is actually worth less on the market than western-bred range horses. This fact was plainly demonstrated less than two months since, when something like two carloads of trotting-bred horses sold at a Western sale for less than \$100 per head, while, at the same place, and on the same day, a carload of Western range horses sold for \$100 per head, or, as they say at the stock yards, "\$100 a round." And why? The range horse could be worn out to advantage under the saddle, while the trotting-bred horses referred to possessed not one single desirable quality.

It is true, nevertheless, that a market exists for very many trotting-bred horses, providing breeders, or owners fit the animals for that trade. Reference is had to combination harness and saddle horses, and during the early season of 1911 the demand for that class of horse was far greater than the supply. The trotter having good looks, substance, style, soundness and quality, can easily be shaped into a high-class combination horse. In fact, he is the ideal horse for that class or type. Over in central Missouri a number of trotting-bred horses are prepared each winter for this very demand, and the prices obtained always bring profits to the dealer. Occasionally a farm has done this sort of work, one in mind at present having for a number of years turned its trotters that could not trot fast enough to race into saddle horses, or combination horses, and at a good profit. One great trouble with too many Western breeders of trotters is that they expect the "other fellow" to do all the fitting for market, hence the lack of profit in breeding, growing and marketing the product of the farm.

This thing of the "earning capacity of the horse," as regards the price placed upon it by the buying public, has never been more forcibly illustrated than in the instance of recent sales of thoroughbred horses in Kentucky, where stallions, bred in the very height of fashion so far as running-bred blood lines go, sold at ridiculously low prices, even as low as \$50 per head for mature animals. In fact, a son of St. Simon brought only \$51, and in at least one instance, a great brood mare went at the same price. Thoroughbred racing has been legislated from the map, and the earning capacity of the thoroughbred horse is best given as "thirty cents," when the opportunity of betting on his performances is done away with.—Horse Review.

SOME HORSEY TERMS.

A white spot in the forehead is a star. A white place from eye to eye is a bald face. A strip between the nostrils is a snip. A white eye is a glass eye. A horse has pasterns, not ankles, and there is no such joint as a hind knee or fore shoulder. White around the top of the hoof is a white coronet. White below the pastern joint is a white pastern or above the pastern it is a white leg. A snip cannot be anywhere but on the nose. Amhle is a gait like pacing, but slower, in which the two legs on the same side are moved together. The croup is that part of the horse back of the saddle. The forearm is that part of the leg between the elbow and the knee, and the elbow is the joint of the foreleg next above the knee and 'not to the side. When the horse forges, it strikes the toe of the fore foot with the toe of the hind one, and this is sometimes the result of bad shoeing. Everyone should know that the hand, a term commonly used in describing the height of a horse—is one-third of a foot, or four inches.

While Missouri has recently lost by death Gratt 2:02½, the fastest horse yet bred in the state and Harold, Jr., she gains two of the best that California could send. Harry E. Wood of Northrup brings in Lynwood W., sire of Sonoma Girl 2:04¾, and Henry G. Tangler of Carthage, Mo., has bought R. Ambush 2:09¾, by Zolock 2:05¾, son of McKinney. This is a nine-year-old horse and the third 2:10 trotter to make a season in Jasper county. The first was Early Reaper 2:09¾, owned by E. Krull. The second was the Thomas W. Lawson horse Dare Devil 2:09¾. R. Ambush is sired by the fastest son of McKinney, whose dam was by Gossiper, giving us there the blood of Pilot Jr. through his fastest son, and that is not all, this horse's dam is by Silkwood, out of a daughter of McKinney. He was first started as a five-year-old and won all his starts. In 1908 he was started eleven times and scored his present record, trotting several times in 2:10 or better. Henry G. Tangler, his present owner, has within the year completed a farm training track that has cost him about \$1500. He has a well selected lot of brood mares, among them Miss Kankakee, 2:1¼—L. E. Clement.

Drink Jackson's Napa Soda.

ATTENTION TO DETAILS.

When a breeder states that it is too much trouble to nominate his colts in the futurities and keep track of the payments, and for that reason he nominates but a portion of his colts, it looks as though the breeder was conducting his operations on too large a scale or else he lacks in system and sufficient help. Perhaps it would be better for him to curtail his operations, sell the mares of doubtful breeding qualities or those lacking in breeding, and devote all his energies to looking after the remainder as they should be, says the Western Horseman.

There is work and lots of work on a stock farm. Of course there is. But if the work is attended to as it should be the reward is great. When mares noted for producing early speed are mated with the right stallions the sale of the colts is the reward, and that is greater or less according to circumstances. One of the latter is whether the colts are eligible to the futurities. The breeder loses a great portion of his reward if the colts are not entered, for purchasers of speed do not care to bother with youngsters unless there is a chance to race them in the big stakes.

Unless there is such an opportunity the owner of a campaigning stable will spend his money for aged horses, ones he will not have to wait on for several years in order to get to the races. The present day buyer wants quick action. It is because of this that there are now fewer breeding farms in New England than formerly. The rich men in that section who race horses are too impatient to breed race horses. They want them ready made.

Breeders in the West and Middle West find the Eastern market an extremely profitable one for that very reason. If they can find the golden "nick" to produce speed they find a great reward in the above mentioned market. These purchasers will buy colts if they can race them just as quickly as they will aged race horses. In fact it has become rather a fad to purchase a well-engaged colt, but it has got to be eligible to all the leading futurities.

To be too busy to enter colts in the stakes means the loss of great prospective profits if the breeder is accomplishing what he set out to do—produce high-class, early extreme speed colts. Even breeders on the Pacific coast can well afford to patronize the futurities, as has been proven the past season. One colt on the Pacific coast sold for \$10,000 because it was eligible to the big stakes. Another equally as well bred and that trotted faster in its work late in the fall sold for a fraction of that sum because the purchaser would have to wait until next year or the year after before being able to race.

The difference in the prices of the two colts would pay the expense of entering all the colts bred on the Pacific coast in the leading futurities. Surely breeders who wish to make the greatest financial success possible will not find it too much trouble to enter their colts. It means work, perhaps "bother," but no success in any line of endeavor is attained without a great deal of very hard work. Not only work, but infinite patience in looking after every little detail. It's an old saying and a true one that "the big things look after themselves; it's the multitude of details that need attention." This is especially true on the stock farm. The little things too often make the difference between success and failure.

That breeding is on the increase on the Pacific Coast is evident from the patronage extended the futurity recently closed by the Pacific Coast Trotting Horse Breeders' Association. This stake has 455 entries, 39 more than was ever received for this event since its inception. This is good news, for the Pacific Coast has turned out many of our greatest trotters and pacers, and while there was a decrease in breeding after several of the large farms which had made California famous had passed out of existence, owing to the death of their proprietors, yet the aggregate of small breeders is more than making up for the loss of these great nurseries of speed. The best blood in the Trotting Register is to be found on the Pacific Coast and there is no question but that among the large number of entries made for this latest futurity that a large number of high class colt trotters and pacers will appear that will add greatly to the fame of the coast as a breeding center. There is no question but that there is a greater interest in the breeding of the light harness horse all over the United States than there has ever been, and the prospects for the future are most brilliant.—Western Horseman.

\$2,500,000 will be the cost of the new arena that will succeed Madison Square Garden as the scene of future horse shows and sales to be held in New York City. The new building, which will be erected in Lexington avenue, between Forty-seventh and Forty-eighth streets, adjoining the new Grand Central station, will be completed, barring unlooked-for delays, by early fall of next year. At a recent meeting of numerous parties interested as prospective tenants of the new building, an organization to be known as the Exposition Managers Association was formed, and it was announced that already contracts covering 212 days a year for five years have been signed. E. J. Tranter, representing the Fasig-Tipton Company, whose 11812 Old Glory sale is scheduled to take place in the new arena, was elected as a member of the executive committee.

ANOTHER ARRIVAL.

Mr. G. M. McPherson, of Montreal, Canada, has engaged ten stalls at the Pleasanton race track and sent for his string of trotters so he can winter them there, the majority belong to Messrs. McLeod & Wilkinson. Among them is the handsome bay stallion Belmar 40477, record 2:21¼, sired by Moko (the great futurity stake sire), dam Chestnut Belle (dam of Mobil 2:10¼, full brother to Belmar, Dartmore 2:11½, Chestnut King 2:12, Chesko (3) 2:19¼, Slipaway 2:17½, Lady McGregor 2:24, Belmo 2:27, Yellow Belle, dam of Native Belle 2:06¼, and Native Beauty 2:27, and the sire Vanko 2:19¼) by Red Wilkes 1749; second dam Mary, by Gov. Sprague 2:20¼; third dam Maud, by Gilroy, son of Lexington; fourth dam Belle, by Mambrino Chief II. Mr. McPherson believes he will be a whirlwind pacer and will convert him to that gait. When it comes to bloodlines this stallion is a "top nother" that has been "buried" in Nova Scotia for years. He also has Rose Lecco by Lecco 2:09¾; Blaze Wilkes by Zombro 2:11; a handsome yearling by Belmar 2:21¼, out of Dell Bars 2:11¼, by Monbars 2:11¾; Carlea by Carlockin, out of Lady Rea 2:25; a three-year-old by Kinney Lou 2:07¾; a three-year-old by C. The Limit 2:04¼; and three colts by Oro Wilkes Jr. 2:12¾, he by Oro Wilkes 2:11, out of Abby Delmarch by Delmarch 9787; second dam Abby 2:26 (dam of Abbie X. 2:23½, Wilkesview 2:28½, etc.), by Geo. Wilkes 2:22; third dam Mattie Wilder (dam of 1) by American Clay 34; fourth dam by Smith's Sir William. Mr. McPherson has trained at Jewettville track and at Kalamazoo and Terre Haute for three winters, and this is his first visit to this coast. He was most cordially welcomed by all the horsemen on the historic course at Pleasanton, and was delighted to find Messrs. Havis James, G. Spencer and Chas de Ryder, three old friends, there.

LORD DENMARK, THE CHAMPION SADDLE STALLION.

We herewith present a picture of Lord Denmark, the gaited saddle stallion that made such a sensational record in Kentucky as a three-year-old during the season of 1909. Shown in the saddle ring fourteen times, he won thirteen first premiums and one second, including first at both the Kentucky State Fair, at Louisville, and the Bluegrass Fair at Lexington. Shown in the harness ring five times, he won one first, three seconds and one third, the latter being at the State Fair.

Immediately after he won the blue in the three-year-old gaited stallion class at the State Fair, he was purchased from Gay Bros., of Pisgah, Ky., by Mr. R. H. Whitten, of Los Angeles, Cal., who has since owned him. In the invigorating California climate Lord Denmark has developed into one of the hand-somest horses in the country, as will be seen from his portrait, which is a perfect likeness of him.

It is not to be wondered at, though, that sty'e, action and finish are so admirably combined in Lord Denmark, for he is by the great sire of show horses, Highland Denmark, and out of the show mare Lady Glascoe, by Glascoe, he by Forrest Denmark; consequently, his greatness is his by right of royal breeding.

Lord Denmark promises to win even greater fame as a sire than he has as a show horse, for all of his colts inherit his conformation, style, action, disposition, and perfection of manners. They have been shown freely on the coast and have won blue ribbons everywhere, the colts of no other saddle stallion ever having won over them.

Mr. Whitten is an enthusiastic devotee of the saddle horse game, and it is largely through his efforts that California is coming to the front as the home of high-class saddle horses.

MAN'S BEST FRIEND.

Of all the brute friends of man, the horse is certainly by far the most useful and the most valuable to him. In these latter days he earns the living for his master, his master's family and himself; usually works six days a week and hauls the family around on the seventh, accepts the poorest shelter or none at all, takes what food his master allows him uncomplainingly, is always ready to do his best at any task to which he is assigned and through thick and thin, had luck or good, weal or woe, is the reliable, faithful, efficient and optimistic friend of his master, his family and his interests.

In peace the horse toils for man in many ways; in war he suffers and dies for him. In disaster he carries his master out of danger; in victory he hears him proudly in the triumphal march. He shares his sorrows and his poverty in full and gets but little share in his prosperity. Though he would enjoy rest and recuperation in the green fields, he contentedly toils and struggles at his task on the bare roads between them. Blows he receives patiently from the hands of his taskmaster, nor resents them except when long continued, and sometimes not even then. Worn and weary, he drags out his day in and out, whether he is mortally ill or weakened from loss of rest or lack of food. He coins his life-blood for his master, every heart beat is for his master's welfare, and he is truer to man than man is to himself. In war, in peace, in sorrow, in joy, in wealth, in poverty, the horse, the nobility of the animal race, is the closest, most valuable, most noble, most intelligent friend of man. His name is benevolence.

CAPTURING ARIZONA WILD HORSES.

An attempt to clear the ranges of the Prescott National Forest of wild horses is being made by the stockmen of Williamson and Skull valleys, and the first rodeo resulted in the capture of about thirty animals on the Tonto divide, says the Arizona Republican.

Forest Ranger Mercer had a conference with George A. Carter, Clarence Stewart, J. V. Dickson, J. M. Cook, H. N. Cook and E. Contreras, representatives of the Burnt Ranch Company, and others, and a rodeo was arranged, with J. V. Dickson as captain. During that week a stockade corral was built at the old chimney in Tochey canyon and wire fences were strung along the canyon to inclose the water holes, leaving a narrow entrance at the south end.

"Mormon wings" of cheesecloth were stretched upon the brush for more than a mile from the entrance of the fenced lot along the hillsides to the open country at Tonto divide. A rodeo camp was established at Carter's corral on the old Tochey place and at the beginning of the following week a dozen men began the work of gathering broomtails and outlaws.

Lookouts were posted upon high points near the south end of the canyon, while the larger number of riders went in search of wild horses in the open country west of Granite mountain. When a band was found the riders gave chase and tried to drive the horses into the canyon. Sometimes they got a band headed toward the canyon and sometimes the mustangs had notions of their own and went elsewhere.

When the broomtails took to the hills there was wild riding through scrub oak and over rock-strewn slopes and ridges, and the lookouts plunged down from their stations and tried to head off the bands or picked out single horses and roped them among the rocks. Before the "Mormon wings" were stretched it was difficult to keep a band going down the canyon. The wild horses seemed to suspect a trap and broke from the hills regardless of the riders who tried to turn them.

The cheesecloth, however, proved an effective barrier in most instances, although one small band went through it when alarmed by the presence of men near the corral. A band of thirteen mares and colts was kept in the straight and narrow way by the streaks of white rag fluttering in the hush and ran directly into the corral.

THE SUPPRESSION OF TIME.

The suppression of the time at different race meetings throughout the land, is not too frequently noticed. That it should be stopped no honest man will deny. What is more disgusting to a breeder of the trotting horse, than to take a seat in the grand stand directly opposite to the wire, take out his stop watch and carefully time the different heats of the trotting and pacing races, and hear the time announced from two to three seconds slower than it should be given. This discrimination in favor of some particular horse who is owned or managed by some one that happens to have more than ordinary influence with the timers, brings this state of affairs about, and when the timers are approached upon the irregularity they invariably give as an excuse that it was, seems hard to put the horse in question out of a certain class when a second or two would leave him where he was formerly, also another excuse they offer is that they were in the judges' stand right over the wire and that you were five feet to one side of the same, they forgetting that a horse trotting a forty gait moves thirty-three feet per second, and when going faster a greater distance is covered per second, and the mere fact of the outside timer not being in the stand with the rest of the timers simply amounts to nothing as long as he starts and stops his watch when the first horse's head is even in line with the center of the judges' stand. To hang the time back in the manner mentioned above is just as much of a crime as it is to ring a horse, you simply assist in robbing some one sooner or later. There should be almost as great a penalty upon any person for doing this irregular timing, who is found guilty of the same as the penalty imposed upon the man who is found guilty of ringing a horse, one crime in a way, is just as great as the other, and tends to make the trotting meeting more and more unpopular, with the honest horseman, and race-going patronage. Let something be done by the law makers that will tend toward the stopping of this practice, for the breeding interest demands it in the strongest kind of terms.

ARMY MOUNTS VERY SCARCE.

In their zeal to suppress racetrack gambling, the legislatures of the various states have seriously threatened the supply of proper mounts for the army, according to Major General Wood, chief of staff, who has called the attention of congress to the subject.

General Wood says that thoroughbred studs are being shipped out of the country in such numbers as to assume the magnitude of a calamity.

While other countries are spending immense sums of money in importing stock, many of America's most renowned breeders have sold out entirely, shipped abroad, or are gradually reducing their establishments.

THE FARM

TREATMENT OF YOUNG CALVES.

Every new-born calf needs early cleansing by the licking of its dam.

If the cow neglects this, it may be induced by sprinkling a little salt on the calf's back. If after the navel string is severed—which the cow does with her teeth—it should bleed, it must be tied with a strong cord.

If there be inflammation at the navel, a soothing ointment should be used; if a tumor should appear, it should be lanced and poulticed. The mother's milk is the best nourishment for the young calf. It also furnishes needed correction and regulation for the bowels and other organs. Diarrhoeal affections destroy many young calves. Unsuitable food may induce it, or overheating of the dam. Two ounces of castor oil containing one teaspoonful of powdered ginger is a valuable correction. It should be followed by gentian root tea mixed with two ounces of lime water, a pint being given three or four times daily. When this treatment and attention to the diet of the mother and calf fail, resort may be had to strong teas of oak bark or willow bark, with ginger added in either case. There is a form of colic called "sboote," which is very common among young calves, often affecting many in the herd. The first step in the treatment of this is complete isolation.

This disease shows itself in loss of appetite, listlessness, griping, frequent water discharges from the bowels, exhaustion and death. The prompt administration of a mixture of flour, eggs and linseed oil is desirable. One dram of essence of ginger and two drachms of laudanum, mixed in gruel, may be given at intervals until relieved. Young calves, if exposed to dampness, fogs, etc., are liable to croup, or inflammation of the upper part of the throat and the formation of a whitish substance, or false membrane on these parts.

This disorder is shown by a hoarse cough, a running at the nose and in breathing by a whistling or croaking noise. All of these symptoms increase as the disease progresses. Mild purges must be used at once; small quantities of saltpetre should be given in drinking water, and the vapor of slacking lime may be inhaled to relieve the throat of the false membrane.

Young calves are also troubled with lung worms, which are white, thread-like, parasitic worms, which are often found in the windpipe, the bronchial tubes and lungs of calves. Low, marshy pasture lands, especially in August and September, are conducive to this disease. The accumulation of these parasites is sometimes so great as to choke the afflicted animal to death. A hoarse, husky, bronchial cough, loss of flesh and difficulty in breathing are the more evident symptoms.

Sometimes the worms may be seen in the saliva or mucus which is coughed up, but where the disease is suspected careful examination of them should be made. Separate the afflicted animals from the herd; place them in a warm, dry stable; burn sulphur so they shall inhale its fumes, which are destructive to the parasites. A half ounce of turpentine should be given daily in gruel. Half a pint of lime water with a teaspoonful of turpentine given once a day is very effective. Relief from this disease should be followed with a tonic treatment, giving twice each day a tablespoonful of the following mixture: One-half ounce of turpentine, two drachms carbonate of lime, four ounces solution of gum arabic.

LEGISLATION WANTED.

That something in the way of legislation giving the State power to eradicate tuberculosis from the cattle herds—both dairy and beef stock—and also from the swine, is of the greatest importance to California, is the declaration of State Veterinarian Keene. In order to bring this important matter to the attention of the Legislature at

its next regular session, the California Livestock Sanitary Association has adopted resolutions asking the Governor to name a Commission to make a thorough investigation of conditions in this State with respect to the disease among cattle and report to the Governor and the next Legislature.

"There are 600,000 dairy cattle in California," said Dr. Keene, recently, "and in a majority of the herds there are tuberculosis cattle. This condition is dangerous in the extreme because of the fact that dairy products containing tuberculosis germs are consumed by the people. Beef cattle have it and swine, especially those known as 'dairy fed,' have it also, to a great degree.

"Reports coming into my office from Government Inspectors show that at the large abattoirs a large percentage of bogs slaughtered for food have tuberculosis. Some of the carcasses are condemned, while others are used after the affected parts have been removed.

"The fight against tuberculosis in the herds of dairy and other cattle has been waged thus far in this State under an agreement between the State Veterinarian and the owners. This agreement is to the effect that all cattle which show marked symptoms of tuberculosis shall be slaughtered and the carcasses disposed of so as not to spread infection.

"In California the laws are inadequate to cope with the disease. We have no power now to go into a herd of dairy or other cattle and condemn and slaughter the ones having tuberculosis. We have not the machinery for cleaning out tuberculosis from the swine herds. This is getting to be a serious subject because the disease is so generally distributed throughout the State."

The California Livestock Sanitary Association asks Governor Johnson to name a Commission for the investigation and to make recommendations consisting of two veterinarians who have had five years' experience, one dairyman, one stockman, one physician, one hog raiser and a citizen who has not been in the cattle or hog raising business or has any professional knowledge of the subject.—Sacramento Bee.

TRIANGLE TRIP OVER THE Northwestern Pacific Railroad

One of the most delightful scenic one-day jaunts in America.

150 miles of Mountain and Redwood Forest Scenery, a Boat Ride on San Francisco Bay and by rail along the Russian River.

Leave San Francisco 7:45 A. M. daily except Sunday, and 8:45 A. M. Sunday only, by boat across the Bay of San Francisco, in full view of the Golden Gate to Sausalito (the Sorrento of America), thence via picturesque San Rafael and thriving Petaluma (home of the chicken industry), through Sonoma Valley to Santa Rosa and Fulton. From Fulton, through magnificent mountain scenery and redwood forests and along Russian River, to Monte Rio. Return is made along the coast, passing Tomales Bay, Point Reyes, San Anselmo, etc., to Sausalito, arriving at San Francisco 7:35 P. M. daily except Sunday and 7:05 P. M. Sunday the same evening. If preferred, trip can be reversed, leaving San Francisco at 8:15 A. M. via the coast to Monte Rio and returning along the river and through the valleys, arriving at San Francisco 7:35 P. M. daily except Sunday and 7:05 P. M. Sunday the same evening.

Round Trip Fare for Triangle Trip, **\$2.80**, except on Fridays or Saturdays, it is **\$2.50** and on Sundays only **\$2.20**.

Tickets on sale at 874 Market Street (Fleet Bldg.) and Sausalito Ferry Ticket Office.

PUBLIC TRAINING STABLE. DICK WILSON Of Pleasanton

Announces he will train a few good "prospects" for outside owners this winter and prepare them for next season's campaign at very reasonable rates. Mr. Wilson has given 15 horses race records of 2:10 or better, 51 with records of 2:15 or better, besides giving the double team Hedgewood Boy and Lady Maud C. the world's record to pole of 2:02½, besides winning many races with them. Address **DICK WILSON, Race Track, Pleasanton, Cal.**

CHAS. WHITEHEAD'S Public Training Stable Pleasanton Race Track PLEASANTON, CAL.

Horses and colts trained at reasonable rates for next season's campaign. Best of care given. Developed and campaigned successfully the Futurity stake winners North Star 2:11½, Della Derby 2:11½ and many others. Address **CHAS. WHITEHEAD, Pleasanton, Cal.**

J. L. McCarthy LIVESTOCK AUCTIONEER.

Fifteen years experience at Chicago, St. Louis and Kansas City stockyards. Thoroughly posted on pedigrees of standard-bred horses.

Country Sales a Specialty Address **KEY ROUTE HOTEL, Oakland, Cal.** Phone, Oakland 5924.

TWO GREAT SIRES.

The Bondsman

Reg. No. 37641

SIRE OF

Colorado E. (3) 2:04³/₄ champion 3-year-old of the world. Winner of the Matron, American Horse Breeder and Kentucky Stock Farm Futurities; second in Kentucky Futurity.

The Plunger (4) 2:07¹/₂, second fast-old stallion of 1910.

Grace Bond (3) 2:09¹/₄, winner both divisions of Kentucky Futurity.

Creighton 2:08¹/₄, record made in 1911, and 31 others.

Half brother to Jay Hawker 2:14³/₄, sire of Country Jay 2:05³/₄, Susie Jay 2:06¹/₄, etc.

Half brother to The Tramp, sire of Bervaldo 2:08³/₄, Trampfast (2) 2:12¹/₄.

Half brother to Sorrento Todd (4) 2:14¹/₄, Belle Sentinel 2:15, etc.

THE BONDSMAN 37641

BARON WILKES 2:18.. Sire of 12 in 2:10, including Bumps 2:03¹/₄, Rubenstein 2:05, Baron May 2:07¹/₄; sired dams of 4 in 2:10.

SORRENTO..... Dam of Jay Hawker 2:14³/₄, Sorrento Todd (4) 2:14¹/₄, Belle Sentinel 2:15, Bola 2:19¹/₄, Lazy Bird 2:26³/₄, Teddy Sentinel, 2:29³/₄, The Tramp (sire), etc.

4th dam Virgie—by Abdallah 15.
5th dam Lucy—by Highlander (Veech's).

GEORGE WILKES 2:22 Sire of 83, dams of 204.

BELLE PATCHEN 2:30³/₄ In great brood mare list.

GRAND SENTINEL 2:29³/₄ Sire of 23, including Nettle 2:16¹/₄, Tosca 2:18³/₄.

EMPRESS..... Dam of 2 and granddam of 9.

HAMBLETONIAN 10 Sire of 40.

DOLLY SPANKER Dam of 1.

MAMBRINO PATCHEN 58.

Sire of 25, dams of 162.

SALLY CHORISTER By Mamb. Chorister, dam of 2 in 2:20, etc.

SENTINEL 280 Sire of 8 in list.

MAID OF LEXINGTON By Mamb. Pilot 29.

ABDALLAH MAMBRINO Sire of 15, dams of 42.

BIG ELLEN By Clark Chief.

THE BONDSMAN is the only stallion that sired three new 2:10 performers with race records in 1910. In spite of the fact that he has no record, The Bondsman was a colt trotter of great merit. He was a contending colt all through the Kentucky Futurity of 1899, getting third money. This was a six-heat race and was won by Boralma. As a four-year-old he was not raced, but trotted a public trial in 2:11. As a sire he is destined to be the leading son of the great Baron Wilkes, founder of the greatest futurity winning family. He will make the season of 1912 ut

Pleasanton Training Park. **\$100** the Season with usual return privilege 1913. Season ends June 1st.

THE PATCHEN BOY 39033

Three-Year-Old Record 2:10³/₄ In a Winning Race.

Sired by the Great WILKES BOY 3803, sire of 107 in standard time.

A Genuine Race Horse and a Sire of Early and Extreme Speed.

The Patchen Boy 39033 is sire of the following:

- | | | |
|--|---|--|
| Francis J. 2:08 | Legal Patchen .. 2:15 ¹ / ₄ | Dorothy C. 2:19 ¹ / ₄ |
| Evelyn Patchen... 2:10 ¹ / ₄ | Lucile Patchen .. 2:16 | Louise Patchen .. 2:18 ¹ / ₄ |
| Scott Patchen ... 2:12 ¹ / ₄ | Jerry Patchen ... 2:16 ¹ / ₄ | Dr. Warren 2:19 ¹ / ₄ |
| Dessie Patchen .. 2:13 | Knightstown Belle 2:16 ¹ / ₄ | Roscoe Binning .. 2:20 |
| Frank Patchen ... 2:13 ¹ / ₄ | Alec Williams ... 2:18 ¹ / ₄ | Mary Patchen ... 2:20 ¹ / ₄ |
| Ruby Patchen ... 2:13 ¹ / ₄ | Lois Patchen ... 2:19 ¹ / ₄ | Black Patchen .. 2:20 ¹ / ₄ |
| J. C. Patchen ... 2:14 ¹ / ₄ | Auduous the Miller 2:19 ¹ / ₄ | and 11 others in 2:30. |

Dam Lady Clay, the dam of The Patchen Boy (3) 2:10³/₄, C. W. M. 2:24¹/₄ (trotted to high wheels), Anglin Wilkes 2:16¹/₄ over half-mile track, trial 2:09¹/₄, by Metropolitan 1372, son of Hambletonian 10; second dam, Haggie Brown, by Ashland Clay; third dam, Pitty Pat, thoroughbred. The Patchen Boy was the greatest three-year-old race colt in the world, winning six straight races in the Grand Circuit the only year he was raced. His produce are good-headed and real race horses. (No tin cups.)

THE PATCHEN BOY is a beautiful black, 16.1 hands and weighs 1290 pounds. His colts are of fine size, great individuals and the kind that sell for the high dollar.

Season of 1912 at Pleasanton Training Park. Fee: **\$50** Return privilege 1913

Both of the Above Horsees Will Remain in California.

Best of care and attention given mares, but no responsibility assumed for accidents. Good pasturage at reasonable rates. For further particulars and full tabulated pedigree, address

FOR SALE

The Stender and Registered Trotting Stallion

ROYAL DERBY 31239

Sired by Chas. Derby 2:20; dam Clipper Simmons by Mambrino Boy 2:26¹/₄; second dam Susie Simmons by Simmons 2:28; third dam Susie by Broken Leg 9667; fourth dam Fannie Grant by Bishop's Hambletonian. A magnificent representative of the Electioneer-Strathmore - Wilkes and Mambrino Patchen blood.

Royal Derby is a big, handsome, brown horse; stands 16 hands, and weighs 1350 pounds. He has plenty of style and action. Has never been trained for speed, but can show a 2:20 gait on road trotting. He is one of the surest of foal getters and his progeny, although quite young, is pronounced by competent judges to be the finest, handsomest and best proportioned of any in Southern California. My reasons for selling are I have sold my ranch and intend to devote my time to another calling. I will sell him very reasonably, if applied to at once. I know of no one that will take better among farmers and horsebreakers. Besides his excellent bloodlines, he has all the qualifications of a great sire. For further particulars, apply to

O. A. HORN, Anaheim, Cal.

Box 137, R. F. D. No. 3.

FOR SALE OR LEASE

The Standard-Bred Trotting Stallion

UNIMAK 40936

(Full brother to Sterling McKinney 2:06¹/₄.)

Sired by McKinney 2:11¹/₄, dam Twenty-third by Director 2:17, second dam Nettie Nutwood (dam of Hillsdale 2:15) by Nutwood 2:18¹/₄; third dam by Ethan Allen Jr. 2903; fourth dam by Williamson's Belmont.

Unimak is a beautiful seal brown; stands 16.1 hands, and weighs 1250. He is one of the finest-looking, best-bred and best-gaited trotters on this Coast. His disposition is perfect. For terms and other information, apply to this office.

CHOICE ONES FOR SALE.—The six-year-old black pacing mare Celia K. (trial 2:10¹/₄, at the Stadium); no record; by Arner 2:17³/₄; dam by Direct 2:05¹/₂; second dam Carrie S. by Mambrino Wilkes. This mare stands 15.2, weighs about 1050; free legged; wears six-ounce shoes all around. Is absolutely sound and guaranteed; not afraid of anything; perfectly gentle, and she will be a 2:05 pacer this year if she goes into capable hands. I will sell her with a proviso that she will pace in 2:05. This is a beautiful mare, one of the handsomest and best prospects in California. I have also a full sister to her, a jet black four-year-old, which I will also sell. She is a strong, rugged mare, and will undoubtedly be as fast as her sister. For further particulars, apply to H. OLSEN, 5014 East Fourteenth Street, Oakland, Cal.

FOR SALE, CHEAP.—The best bred mare in California. Bay filly, 3 years old; sound. With 6 weeks' work paced a mile in 2:20 to a cart and had just 2:00 speed. Sired by Nutwood Wilkes; 1st dam by Bonnie Direct 2:05¹/₂; 2nd dam by Searchlight 2:03¹/₂; 3rd dam by Director; 4th dam Lida W., dam of Nutwood Wilkes by Nutwood 600. Bred by Martin Carter, Nutwood Stock Farm. Address T. W. BARSTOW, 1042 Alameda Ave., San Jose, Cal.

HOMEPHONE PRAISED.

A new subscriber writes the Home Telephone Company under date of October 28, 1911:

"Please install a phone at my home. I did not know anything about the good points of the Homephone and was rather prejudiced against it until I began using it in my office. I use it all the time now, not only in phoning around the building, but getting outside numbers, because it saves me time and trouble. The Homephone delivers the goods."

"You know the burners of candles rioted in London about 500 years ago when gas was introduced. Most of us object to changes. Possibly that is the reason why I am so late in ordering a Homephone."

The Man Who has Come Back.

The host of admirers of what the veteran war horse of the shooting game—**The Hon. T. Bill Crosby**—has done lately with his 34-inch barrel Parker gun, will be glad to read the following, viz:

- In the Eastern Handicap . . . 100 out of 100 targets.
- In the Western Handicap . . . 492 out of 500 targets.
- In Evansville, Ind., Tournament . . . 395 out of 400 targets.

Making a continuous run of 987 out of 1000 targets

The only straight score ever recorded in the **Grand American Handicap** event was made with a Parker gun, scoring 100 out of 100 at 19 yards rise. Furthermore the same Old Reliable has won the **National Championship of America** every year it has been shot for.

For information regarding small bore guns, address the pioneer makers of the 20 gauge

SMITH GUNS

HUNTER ONE-TRIGGER

WEATHER conditions aren't always at their best in the "blind" or in the skiff. That's when you don't want your gun to balk or double.

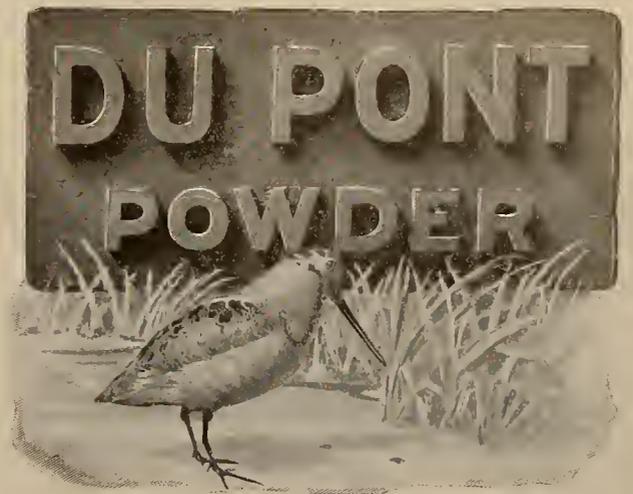

YOU CAN easily wear gloves if you shoot with a Hunter One-Trigger. And without "adding." It won't balk—because there is no friction to make it balk. And it won't double—because there is no second trigger to get tangled up in your glove.

The very newest Hammerless Smith Gun is the 20-Gauge Hunter One-Trigger. Weighs only 5 3/4 to 7 lbs. Just the finest gun that can be made at the low price.

RESULT OF OVER A CENTURY'S EXPERIENCE.

Perfection in powder-making is only achieved by exercising the most scrupulous care in the selection and preparation of raw materials, employing skilled workmen exclusively, and using only the most improved modern mechanical equipment.

This is the **DU PONT** method and accounts for the unequalled reputation among sportsmen enjoyed by the **DU PONT** brands of **SMOKELESS SHOTGUN POWDERS**

Two of these brands that are in high favor among shooters are

A perfect shotgun powder with light recoil. Unlike other powders of light recoil, Schultze gives high velocity and remarkable patterns.

Hard grain—Smokeless—uniform. Requires no special wadding to make it do its best. Loaded just as easily as Black Powder. "The Old Time Favorite."

These powders positively will not pit the gun barrels. **Unequaled for Field and Trap-Shooting.**

See that your shells are loaded with either **SCHULTZE** or **E. C.** Send to-day for Schultze and E. C. pamphlet No. 99. It contains information of interest to all shooters.

Post and Montgomery

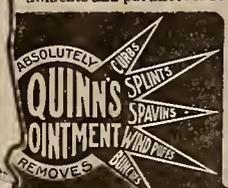

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like buncle. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stars cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all buncees it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

1911 Grand American Handicap

THE GREATEST TRAP-SHOOTING HONOR OF THE YEAR WON WITH

PETERS SHELLS

AT COLUMBUS, OHIO, JUNE 22, 1911

By a Record Score, 99 out of 100 From 20 Yards

Mr. Harvey Dixon of Oronogo, Mo., handicapped on the 20-yard line, and shooting PETERS Factory Loaded Shells, purchased by him out of the regular stock of the Columbus Gun Club, won the most coveted honor in the trap-shooting world, together with the Inter-State Association Trophy and the \$1,000 purse. The score of 99 from 20 yards in the Grand American has never been equaled. It pays to use PETERS Shells---the kind having "Steel where Steel belongs."

WINCHESTER

Repeating 'Rifles the Hunter's Choice.

Winchester Repeating Rifles have been the favorite hunting rifles for decades, and with the introduction of new models from time to time to keep pace with discoveries and improvements in firearms and powders, they have remained first in the esteem of experienced hunters. There is a Winchester repeater for every kind of shooting; and whether you wish a little .22 Caliber or a big .405 or .50-110 for the largest game, you will find your requirements best met by a Winchester. Don't overlook the Winchester Self-Loading Rifles, which are made in calibers from .22 to .401, suitable for all kinds of hunting. These rifles are simple and reliable in action and exceedingly rapid and accurate in shooting.

| | |
|-----------------------------------|--------|
| Three-Year-Old Trotters | \$1400 |
| Three-Year-Old Pacers | 1100 |

CONSOLATION, for horses that started in above and won no money.

| | |
|-----------------------------------|-------|
| Three-Year-Old Trotters | \$400 |
| Three-Year-Old Pacers | 300 |

ENTRANCE AND PAYMENTS—\$2 to nominate mare on February 1, 1912, when name, color, description of mare and stallion bred to must be given; \$5 July 1, 1912; \$5 December 1, 1912; \$10 on yearlings February 1, 1913; \$10 on two-year-olds February 1, 1914; \$10 on three-year-olds February 1, 1915.

STARTING PAYMENTS—\$15 to start in the two-year-old pace, \$25 to start in the two-year-old trot; \$35 to start in the three-year-old pace; \$50 to start in the three-year-old trot. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

No additional entrance will be charged in the Consolation Stakes.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

CONDITIONS.

The races for two-year-olds will be mile heats 2 in 3, and for three-year-olds, 3 in 5. Distance for two-year-olds, 150 yards; for three-year-olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before February 1, 1913, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1911.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$5000, the amount of the guarantee, only. Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Races for Two-Year-Old Stake and Consolation end with the conclusion of the third heat.

Races for Three-Year-Old Stake and Consolation end with the conclusion of the fifth heat.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

All contestants not winning a heat in three or awarded second position twice will be retired from the race, but do not forfeit their winnings—as shown by the summary.

Entries open to the world.

A. L. SCOTT, President.

IN THIS city Thursday, January 18th, a meeting of delegates and representatives of the various agricultural fair and racing associations will be held in the Palace Hotel. This gathering has been called by Shirley Christy, secretary of the Phoenix, Arizona, Fair Association for the purpose of considering the advisability of holding a continuous racing circuit on the Pacific Coast and arranging meetings accordingly. In order to facilitate matters we herewith publish the list of dates of meetings held in 1911 and believe that if those present act in unity and arrange dates amicably they will be able to return to their respective organizations and convince the members thereof that for the good of the industry, insuring larger fields of horses, better class races and fairer conditions, it will be better to follow the schedule as decided upon at this meeting. The dates claimed last year were as follows:

| | | | |
|------------------------------------|-------|-----------------|-----------|
| PLEASANTON | | July 25-29 | inclusive |
| P. C. T. H. B. A.—Salinas | | Aug. 2-5 | " |

It will be seen by the above that the dates of several of the largest meetings conflicted, and the object Mr. Christy had in calling this meeting is to prevent its recurrence. It is hoped the meeting will be largely attended, as it is really the first logical step toward forming a first-class racing circuit on this Coast.

WITH the assumption of office by Mayor Rolph and the new Board of Supervisors in San Francisco the people have every reason to feel hopeful of the future and to still further make the happiness of everyone complete, Mayor Rolph has placed upon the Board of Park Commissioners two of the ablest men in California, Mr. A. B. Spreckels and Judge Curtis Lindley. They are men of rare judgment, splendid executive ability, and lovers of the beautiful. Commissioner Spreckels was formerly a member of this Board and the active part he took in its administration is not forgotten. He was one of the best, if not the best, Park Commissioner San Francisco ever had. He took the greatest pride in seeing that Golden Gate Park had everything possible for the people's comfort: good walks, beautiful lawns, rare flowers, playgrounds, tennis courts, little lakes, an attractive collection of birds in an aviary second to none in America, and a rare zoological collection, and contributed from his private funds large sums to carry out his pet projects. From boyhood he has been identified with the trotting horse industry. He bred and owned some of the best and fastest campaigners in California. Dione 2:07½, Hulda 2:08½, Psyche 2:16½, Zarina 2:13¾, Gracie S. 2:22, Venus II 2:11¼, Crown Princess 2:13¾, Chloe 2:24, and that great winner of 1911, Bernice R. 2:11¼. He also owned Cupid 2:18, and Dexter Prince, and many others. He engaged in the breeding and racing of thoroughbreds and was very successful in this, having at present on his beautifully appointed stock farm at Napa the largest and best collection of thoroughbreds of any breeder west of Lexington, Kentucky. For many years he has been a director of

the P. C. T. H. B. Association. In the conduct and care of the Stadium and athletic grounds in Golden Gate Park it will be found that he is a true friend of every one interested in or engaging in any outdoor sports. Judge Lindley is also an ardent enthusiast, and with their associates on the Board the people of San Francisco are to be congratulated upon having such men to care for the "beauty spots" of this fast-growing city.

GENERAL WOOD is deploring the fact that so many thoroughbred stallions are being shipped away from America, "because they are just what the United States Government wants to use in the breeding ranks for the siring of remounts for cavalry purposes." For almost seventy years there were hundreds of thoroughbred stallions standing for public service, yet no one ever heard of our Government's desire to buy geldings for remount purposes that were sired by these stallions. In fact, the officers wanted stockier built horses, that were more of the Morgan type, and a glance through the various troops of cavalry horses today on any of our reservations will convince one that there are very few half- or even quarter-bred geldings among them. A number of leading horse breeders in the Eastern states have lately donated some royally bred stallions to the Government, and it is almost a certainty that when the inspectors come to look their progeny over and weigh and measure them they will be rejected. Let the United States Government pay a good living price for saddle horses and farmers and horse breeders will be encouraged to breed horses of the proper type to supply the demand. In the past there has been so many opportunities for "graft" in the selection and purchase of suitable horses that many breeders abandoned the idea of even letting the officials of the United States Army know they had any for sale. Their horses are just what the Government needs. They are not half thoroughbreds, and should bring a fair price, not the mere pittance the Government inspectors claim breeders should receive for horses which fill every requirement for the army. All this talk about keeping thoroughbreds to use on mares for the production of cavalry horses is humbug, pure and simple, and is only the expression of some enthusiastic horseowner who is using this splendid officer as a mouthpiece to sell his useless stock.

THE example set by the late Wm. Land in bequeathing \$250,000 for a park in Sacramento, \$200,000 for the relief of the indigent poor, and the many thousands for the leading charities in the city he loved,—the city that he recognized as having claims upon him for the liberal portion of wealth he was enabled to accumulate during his long and active life there,—is one that is seldom followed by philanthropists of this generation. The deceased was a plain, blunt, straight-forward man. He felt that he had an object to live for, and that was to have all who were dependent upon him comfortable and to leave the bulk of his fortune to make the citizens of Sacramento happy, and relieve those who, by illness or misfortune, became wards of the city and county. Never since the days of General John A. Sutter has anyone who, because of the opportunities Sacramento presented to him, remembered her in this way. There were scores who came and laid the foundations of their fortunes there, and when other cities called them, took all their wealth away, and tried to forget the start they received in that city on the banks of the Sacramento river. Wm. Land's name will live when these men are all forgotten, for in this act he has set an example which might well be followed by others to their everlasting credit.

IT IS a penal offense to insert a fraudulent advertisement in any newspaper passing through the mails. Two horse "gyps" in Philadelphia, Pa., who used to publish the most alluring advertisements about horses they had for sale "that had to be sold as they belonged to some doctor's widow," or "some fine family horse that had always been a pet," etc., are now serving six years at hard labor, and Postal Inspector Cortlyou has given orders for every postmaster to run villains of their kind to earth. Here in San Francisco we notice there are some advertisements in the daily newspapers that should be investigated, for many of the horses so well described never "fill the bill." Swindling by the use of the mails has been rendered so hazardous that crookedly inclined horse dealers in the East are hunting some other means for earning a livelihood.

THE BIENNIAL meeting or congress of members of the National Trotting Association will be held at the Murray Hill Hotel, New York, at noon, Wednesday, February 14, 1912, in accordance with Article VII, Section 1, of the by-laws. Prof. E. P. Heald, President of the P. C. T. H. B. Association, has been invited to act with the Committee on Rules, and will go as a representative of the Pacific Coast members.

SOME owners of highly-bred trotting stallions do not care (so long as they can have enough mares sent to their horses at a low service fee) how the mares that are booked to these stallions are bred. In three or four years these stallion owners are wondering why the 2:30 list does not contain the names of the progeny of their horses, and these broodmare owners who patronized them before are not even booking their most ordinary mares to them. It is about time these "penny wise and pound foolish" stallion owners realize that in pursuing this policy they are in a fair way to lose all they invested in their high-priced, royally-bred stallions. If they will only stop and consider that they should do their utmost to enhance the value of these stallions by striving to get the patronage of the choicest bred mares, the best speed-producing matrons, and those that have records, the produce thereafter would be making a reputation for their horses on the race track; and the increase in valuation of these as money-winners and record-makers would also be enhancing the value of their stallions. Let such owners consider what would be the value of McKinney 2:11¼, Nutwood 2:18¾, Guy Wilkes 2:15¼, Onward 2:25½, Peter the Great 2:07¾, Moko, or any of the other priceless sires, if they were not advertised, so as to attract the attention of owners of the choicest of mares and their merits as sires extolled. For purposes of this class of advertising the "Breeder and Sportsman" is one of the very best mediums published in the United States. It goes into the homes of every owner of a good well-bred mare, every speed-producer, and every mare holding a record on this coast, whose owners become deeply interested in the breeding, conformation and performances of these stallions, and, if the right ones appeal to them as proper mates for their mares they do not hesitate to make arrangements to ship them. Thus it can be seen that money is not wasted when used to advertise good stallions. It is better to get a few of the best mares than to breed such stallions to a hundred ordinary ones owned by folks that live in the neighborhood and never will develop their produce. Such patronage is better to be avoided than encouraged. Many a good stallion in California had just his chances ruined as a money-maker by just such methods, and, instead of bringing from \$10,000 to \$25,000, he has been sold for a few hundred dollars by the owner, who was totally unfitted to have him.

DEATH OF M. M. DONNELLY.

Last Saturday evening this well known horseman passed away after a brief illness, the immediate cause of his death being pneumonia. The deceased was stricken Wednesday, and on Thursday sank into unconsciousness and failed to recover. "Mike" Donnelly, as he was more intimately known, was born in Flint, Michigan, 47 years ago, and when a boy moved to South Bend, Indiana, where he was apprenticed in the blacksmithing trade. He became one of the most skillful workmen in the shop he worked in, and being always a great enthusiast wherever trotting horses were, he began to drive them and proved to be a very skillful reinsman, piloting many winners in Colorado. He gradually moved farther West and finally settled in San Francisco, where he engaged in the horse shoeing business and soon built up a fine trade. As a workman he had few superiors. Years ago he saw the benefits of having a circular mile track in Golden Gate Park in preference to the old straightaway course there, and became so enthusiastic he paid a surveyor to lay out a track to prove his contentions correct. He was an active member of the Park and San Francisco Driving Clubs, and drove in many of their matinees. He was a very quiet, whole-souled man, who never made any enemies and was respected by all who knew him. He leaves a widow and one child to mourn his loss. His friends in all walks of life were many, and his funeral was largely attended.

C. McCarty, owner of a splendid broodmare by Prodigal and her two colts, one a three-year-old by Nutwood Wilkes 2:16½ and the other a four-months' old filly by Bon McKinney 2:28 has gone to the San Jose race track and joined Joe Twohig in the latter's training stable. When Ted Hayes sees this Bou McKinney he will want to buy it, just to show what beautiful foals Mr. Clark's good young horse sires.

EXPOSITION PARK, LOS ANGELES.

Some Events Connected With the Old Park and Features That Make the New One Unsurpassed.

By Wm. G. Layng.

A sale of land was held in 1866, six miles from the old Court House, in Los Angeles, and 160 acres of this (which was only a sandy plain) was purchased for \$6000 by some men who had combined to get it for the purpose of building a park devoted to the holding of annual fairs and, in conjunction therewith, a mile track upon which racing could be held. They knew that when they had a plant worthy of the name and had formed a fair and agricultural association, they would receive State aid for its advancement and for premiums.

Charles Durfee then erected an eight foot board fence around it, and to pay for this and to build the track, grandstand, stables and other necessary buildings, the tract was mortgaged. Some dissatisfaction arose between some of the members of the organization and finally the mortgagee foreclosed on the property for the \$9000 loaned and interest. Then a meeting was held by those who had the interests of racing uppermost in their minds, and a company was formed with a paid up capital of \$13,000 divided into 130 shares of \$100 each, with this inducement to shareholders: forty acres on the western end of the property was set aside to be divided into lots and every holder of a share was entitled to one of these lots. The most prominent of these men were L. J. Rose, Hancock M. Johnson (son of Gen. Sidney Johnson), George Hines, J. H. Hollenbeck, Chas. Durfee, Capt. J. C. Newton, L. H. Titus, Wm. Ferguson and Newton Moore. After reorganization, L. J. Rose proposed, in order to avoid any more trouble should adversity overtake their enterprise, that they give a trust deed of the property to the State of California, the property to be devoted to the holding of an agricultural fair in perpetuity. Judge O'Melveny drew up the trust deed but unfortunately omitted to mention the words "race track." This was the cause of much litigation. Governor Gage, the leading attorney there, was engaged by the stockholders to rectify this error of omission, but finally all his efforts failed and the commissioners set aside the lower portion for the location of the track, where it is now made. C. A. Canfield, one of the leading men in Southern California, contributing thousands for the expense of making it as it is today.

But I am digressing. After the tract was first enclosed a mile track was surveyed and made, a makeshift grandstand, club house and some stables built. A pavilion was then erected for the holding of agricultural and mechanical exhibits, and small paddocks made in which cattle, sheep and hogs were to be exhibited for premiums.

With that enthusiasm which always marked a new era in the sporting line—especially when it appealed to the old Spanish, Mexican and frontiersmen who predominated there,—the first race meetings were remarkably successful. Men and women rode hundreds of miles to attend, and the country was scoured for the best and fastest race horses, for the racing was principally confined to running events: quarter and half-mile dashes, mile, two-mile and five-mile racing, and even at longer distances, with changes of riders on these longer stretches every mile. There were vaquero races, and exhibitions of rough riding which were the means of bringing forth many ounces of glittering gold for betting purposes. Everybody seemed willing to take a chance, and money was plentiful enough to keep everything at fever heat night and day during this, the festive week of the year. The plains and valleys near the Santa Ynez mountains were the pastures for herds of cattle, hands of horses and flocks of sheep,—these formed the principal sources of revenue. It cost very little for pasturage as the country was only sparsely settled and railroads were unknown.

As stated above, among the first to come to this track and see a future for it was Charles Durfee, the well-known horseman, and in 1872 he planted those beautiful rows of eucalyptus and pepper trees in front of, and in the rear of the long rows of stalls which were built like the spokes of a wheel, the ends facing the first curve on this elliptical course. In time, the foliage from these trees afforded delightful shade from the heat of the sun's rays and made this one of the most picturesque of all the race tracks in California. A few of these trees are still there, and it was with feelings of sorrow the other day I saw the contractor making his preparations to cut out the only clump of trees which remained in the infield. But they obstruct the view and the space occupied by them can be utilized for better purposes.

The late L. J. Rose was one of the pioneers in this part of California. He owned a beautiful tract of land in the famous San Gabriel Valley about ten miles from Los Angeles, where he had achieved quite a reputation for the excellence of the vines he planted and wines he made. He had rows of fruit trees and fields of alfalfa,—the latter being about the first seen in this State. The place was appropriately called "Sunny Slope," and became one of the leading attractions in a region where well-tilled farms and beautiful meadows were almost unknown. Mr. Rose was an ardent lover of good horses, and as he seemed gifted with an almost prophetic vision as to the success of the trotting horse industry, he decided to go east and bring out a few good stallions and mares, breed them, and develop their products. So he journeyed to Milwaukee, Wisconsin,

and purchased The Moor by Clay Pilot, a stallion called Overland and two mares: Minnehaha (that afterwards produced eight trotters in the list, including Beautiful Bells 2:29½, the dam of eleven standard performers), and Barbara, these three were by Bald Chief, a son of Alexander's Bay Chief. Besides these, he purchased Gretchen by Mambrino Pilot, Maggie Mitchell, and several others, and took them to "Sunny Slope," where he built a track and placed them in charge of Jim Hurd, a brother-in-law to Dr. Herr, of Mambrino Patchen fame. Mr. Rose soon learned that this trainer was not the man he wanted, so he hired and discharged in succession: Hank McGregor, Billy Donathan, "Doc" Williams, Andy McDowell, and Dick Havey. Finally, he employed the latter's "understudy," a very quiet young man named Walter Maben, and with him success after success followed his long series of racing misfortunes. This was early in the seventies. Although all of Rose's horses had been raced on this mile track and were defeated with a regularity that would have disheartened a more resolute man, Maben turned the tide and Mr. Rose never wavered in his admiration of and gratitude to him.

Captain A. J. Johnson, of San Diego, then came to the track with old Pele, by Williamson's Belmont, out of Liz Givenz, by imported Langford. She was a full sister to Bonnie Belle, Langford (sire of Thad Stevens), Gladiator and Error, all famous race horses. This mare Pele was the first thoroughbred to beat the native horse Bandera, that belonged to the Machado Bros., which, before that eventful race, had never met defeat. Capt. Johnson won a "pot of money" on his mare. He also owned a very fair trotter called Belle, and won several races with her. His trainer being "Whispering" Johnny Donahue, whom I met at the recent Fresno fair for the first time in twenty years, and, to my astonishment, he did not appear to be a day older, neither did he show any sign of losing his ability to handle trotters.

L. H. Titus, another enthusiastic horseman, then brought the handsome Hambletonian stallion Echo from the East. Hancock Johnson bought Crichton, by Imported Glencoe, and the pure white stallion A. W. Richmond, from my old friend, Jos. Cairn Simpson. Senator Finn Slaughter, of San Bernardino, had several pretty fair trotters, so did E. L. Mayberry, who had, among others, Lady Washington, the dam of Geo. W. McKinney 2:14½, etc. Louis Wolfskill, one of the members of the famous family of that name, had three or four, and W. H. Robinson, also owned some splendidly bred trotters. There were a few others that were always ready to make entries in the races "just to make 'em interestin'." Wm. (Monte) Smith being one of these.

Chas. Durfee was, in those days, a "running-horse man." He had a big livery and sale stable in Los Angeles, and always kept a few "good ones on the side." His jockey was Walter Maben (that was before the latter became interested in trotters), and Mr. Durfee says, he was the "kingpin among the boys there." He could ride anything, was a good judge of pace and always had light hands. One race Mr. Durfee tells about that Walter won for him was such a notable affair that he says he never will forget it, and he is sure the backers of the other horses feel the same way. It was a quarter mile dash. The sprinter he owned was a noted equine celebrity called Walking John. With 126 pounds on his back and a heavy flat English riding saddle, this horse ran a quarter in 22¼ seconds, timed by several horsemen. It was the fastest quarter mile race ever seen, and Walking John, at that time, was well along in years. The story of this horse was a remarkable one: Some years previous there was a "quarter hoss" man named Dick Kitchen, who had been very successful in picking up and training "short horses," and earned quite a reputation as a judge of this class of sprinters, besides, he had accumulated considerable wealth. Having heard of a wonderful mare that was racing at Santa Fe, New Mexico, which had never suffered defeat; and that any amount up to \$100,000 could be obtained in wagers against her, if anyone had a quarter-horse that could head her, he immediately determined to get busy, for that money "looked good to him." So he journeyed to Kansas City and had almost given up hope of getting the one he wanted, when he happened to notice a young girl driving a fine looking golden chestnut gelding to a buggy. The horse stood almost 16 hands high and was the best muscled one he had ever seen. His practiced eye detected that this horse was a thoroughbred. He tried to buy him from the girl, but she would not sell. He then heard that her father was a banker, and after making his errand known to him it did not take long to give twenty shining twenty-dollar gold pieces and take the horse away. He found the animal was fast walker, so he called him Walking John, and rode him almost 2000 miles across the plains and desert to Santa Fe. On this journey there were times and places where he galloped his mount fast quarters. He then became convinced from what he had seen that when he got to Santa Fe he would give that great mare the race of her life. Walking John was put up in a livery stable in Santa Fe, and Dick sauntered in to where the owners of the fast mare were, and, in a few moments, the match was made. When the day of the race arrived there never was such an assemblage seen of white men, cowboys, ranchers and gamblers, Indians and Mexicans, all prepared to wager everything: Coin, jewelry, blankets and clothes, on the mare. In those days money was wagered on the first fifty yards, 100 yards, 150 yards, etc. Those who bet on the winner at these different points took the money. Thousands were wagered

and Dick Kitchen lost at every point, until the last one of fifty yards, when Walking John beat the mare by a neck. Kitchen pocketed over \$20,000 on the result and rode Walking John across the desert into California. This horse became foundered and could not be warmed up and then he was allowed to cool out before a race, for he would become so stiff he could hardly walk, but, when taken out and galloped around slowly until his rivals were on the mark, he would walk up beside them and get away at the first word. He raced in Sacramento, Oakland, and San Jose, and finally was taken to Los Angeles, where, on account of his infirmity, he was raffled and Chas. Durfee won him. In his hands the horse improved and won several good matches. Durfee could get no horses to race against him, so the horse was raffled again, and a man named Harvey McClain, having shaken the highest throw in dice, got him. For two years Walking John had a life of ease. One day Dave Bridges came to the Los Angeles track and said he had matched his mare Nellie Grant against another quarter mare called Flora, and Durfee, seeing there might be a chance to get into this, sent for Walking John. When the old horse saw the track he pricked up his ears, walked behind Nellie Grant, and as the word was given, went by her like a shot, passed Flora, and came in a winner. This was the race Walter Maben rode.

It was on this old track that Charles Durfee and Billy Donathan made their first appearance as trotting horse drivers. The former had a horse called Enoch Arden, by Billy Blossom and the latter one called Man Eater. Honors were even in the first two heats of this race, but in turning around for the other, their horses shied and in a second as the big high-wheeled sulkies collided, Durfee was on the ground. Owing to the fact that these young men had only one sulky apiece the race was declared off. This horse Enoch Arden defeated nearly all of L. J. Rose's horses. He could trot in 2:27 and do it nicely, and was a good money winner for his proud owner and driver.

It was over this course that Tom Mott's Lugo, a California mustang, took all of L. J. Rose's trotters into camp, and many of the spectators predicted he was a second Dexter. So I could go on recalling incidents of those days of exciting joy and hilarity, of the heavy betting and strange characters met at these race meetings. The games of chance of every conceivable kind by the army of men who "bucked the tiger," "played the wheel," sat down to all night poker games, rolled tombola, chucked props, dealt monte, played ronda, and shook dice, for heavy stakes in the club house.

The growth of the trotting horse industry and the influx of so many enthusiasts in the sport from the far East and Middle West created a demand for better trotting races, better horses, and better conducted meetings. The old quarter-horse men were gradually forced to go with the Mexicans, Spaniards, cow punchers and sheep berders, and finally they became a thing of the past as "drawing features" at these fairs. The trotting horse men had all the opportunities they wanted for wagering money on the races, auctions and Pari-mutuel pools being plentiful. That was another reason why the old games of chance were gradually stamped out. The reins of government of this agricultural association were placed in different hands, and, thus guided, its progress was never impeded until Gov. Budd lopped off the appropriation for district fairs. Prior to that fatal day many races held there are still remembered as the most exciting ever seen on this coast. The Stamboul-Arab race where the former, driven by Walter Maben, a mere boy, defeated the latter, driven by Orrin A. Hickok, the celebrated reinsman, and incidentally causing the latter and his backers to lose over \$20,000 on the result. Then there were the races where McKinney 2:11¼, Wanda 2:14¼, W. Wood 2:07, Frank M. 2:17¼, Waldo J. 2:08, Silkwood 2:07, Silas Skinner 2:17, Sweet Marie 2:02, Sonoma Girl 2:04, Carlokin 2:07¾, Copa de Oro 1:59, Primrose 2:09, Welcome Mack 2:07, Belmont 2:09¼, Miss Georgie 2:08¾, Zolock 2:05½, Delilah 2:06, Queen Pomona 2:05¼, Silver Dick 2:09¼, Bon Voyage 2:08, Blanche 2:06¼, Nordwell 2:08½, and scores of other good horses—the best in California,—drew thousands into the grounds and new grandstand which replaced the old one.

But those days have passed away and naught but the remembrance of them remains, for the old track with its many buildings (save one), has been destroyed. Even the title "Agricultural Park" which greeted the visitor at the entrance is obliterated. In its stead, the name of this, the most beautiful race track and grounds in America, is changed to "Exposition Park." What a transition! As I alighted from the electric car and walked over to where the old entrance used to be, I felt lost, for I could not realize this was the same place I had spent those days of pleasure and excitement so many years ago. There are no traces of the old track, the new one crosses its site at right angles, the three-quarter pole being where the grandstand was. Instead of lying north and south, this one is east and west, the back of the new grandstand will face the setting sun, a most desirable feature for spectators.

But what a track this new one is! The picture on our front page gives but a faint outline of its beauty. In shape it is almost a copy of the fast one at North Randall, Ohio. On the homestretch it is seventy-two feet wide and on the hack stretch it is forty-five feet. This track will be enclosed by a new shrub fence made of privet, cypress or hawthorn. The inner fence is a neat panel one and divides this course from the one inside, which is to be used exclusively for exercising horses. Inside

this track is another on which automobile, bicycle and motorcycle races will be held. The gradient of the outer track is three-quarters of an inch to the foot making it very fast and safe. No better evidence of this is needed than the fact that the stallion Carlokin 2:07½ has trotted miles in 2:09¼ over it, and the course is not considered "settled" yet. The infield lies some distance below the track. It is being leveled and rolled and will be converted into a grass-covered military parade ground, athletic field and play grounds. There will be two subway entrances, thus obviating crossing over the track. There will be a series of barns screened from view with dense shrubbery, and these will be subdivided into large, well-ventilated, fourteen feet square box stalls, with every convenience that experience has taught and money can buy. In front of these long barns wooden awnings will extend about twelve feet so as to insure shade and places to "cool out" the horses.

The grandstand will set back from the outer edge of the track about fifty feet, and be elevated twelve feet above the course. It is to be built at an angle so as to afford every occupant a perfect view of the horses as they enter the stretch without compelling spectators to arise to the annoyance of their neighbors. The grandstand is to be made of concrete, and will seat 5000 people comfortably.

The judges' stand will be a neat little structure placed on the outer edge of the track, just as the majority of those are on our most modern tracks.

There are about one hundred and seventeen acres in this inclosure, and to get this acreage considerable property had to be purchased at high prices from private owners. There is a force of sixty men with teams levelling and grading this land preparatory to making it the most beautiful park for recreation and rest west of Chicago, and, it is a question if there is any place in America to surpass it. There are eight car lines to the park, and it only takes twenty minutes for passengers to ride from Seventh and Broadway, the center of Los Angeles, to any of its entrances.

Over \$1,150,000 will be expended on this magnificent property ere it is finished. Adjacent to the track, and within the limits of this park, there has just been erected a State (permanent) Exposition Building, costing \$250,000; and a County Museum and Art Building, costing \$240,000. These are models of architectural beauty—both exterior and interior—built of brick with stone facings and are of the very latest and most approved designs, with plenty of heat and ventilation. There will be another attraction here, called the "Sunken Garden," similar to the famous one in Fairmount Park, Philadelphia, but much larger, having an electric fountain. There is to be a beautiful lake with a cement coping about it, surrounding this Sunken Garden. A \$200,000 armory will be erected here, which will surpass any on the Pacific Coast, and from it to the parade ground the boulevard, as well as all others on this place, will be wide and smooth, with water always flowing in drains on each side.

There is also to be a playground, exclusively for children, which will cover a plat of about seven acres in extent. This will be ornamented with shrubs, shade trees, flowers, and lawns. All the latest appliances such as merry-go-rounds, carousals, swings, seesaws, toboggan slides, are to be erected, and a little track whereon pony and goat carts will be provided, besides every novelty that can be thought of to amuse the happy little ones. Besides, the biggest and best bath house in the United States and other improvements to make this all its projectors and enthusiastic founders contemplated.

The fairs, race meetings, and livestock shows to be held here will create an interest among all classes that has never been dreamed of in the past, and Los Angeles, as well as the State of California, will reap untold benefits from it, for it will take its place among the manifold attractions of the south.

The Los Angeles Driving Club, composed of 128 of the wealthiest men in Southern California, will hold their matinees here throughout the year. Some of the members own horses that money cannot buy and the pleasure they derive from racing these is indescribable. Every member of this thriving organization loves a good horse and is doing everything possible toward making this place one of the most inviting and hospitable to invite their friends. A club house will be erected in its vicinity, with the latch string always hanging outside, where the fame of Southern California hospitality will never be tarnished and where every member will feel he is appointed a committee of one to entertain guests.

Great credit is due the members of the Sixth Agricultural District Association for the work they have done and are doing to make this one of the greatest shows places in California. Their names should be imperishably inscribed and placed where the present and future generations can see them: President, Wm. M. Bowen; Joseph F. Sartori, treasurer; F. B. Davison, secretary, and Frank Wiggins, manager. The Board of Directors consists of W. M. Bowen, Geo. R. Murdock, John Parkinson, F. E. Pierce, John H. Reynolds, James Slauson, N. W. Thompson, and Perry W. Wiedner. Dr. Wm. Dodge has also been very active in pushing this work through, and the Board of Park Commissioners of Los Angeles has done everything possible to assist the agricultural association in their great undertaking. The Park Commissioners are: Mayor Geo. Alexander, Henry O'Mulvenny, J. B. Lippincott, Chas. H. Randall, and Judge Chas. Silent. The architect of this California Exposition Park is Wilbur David Cook, Jr., of Los Angeles.

ANDY McDOWELL'S CAREER.

According to recent advices from Philadelphia, the veteran reinsman Andrew McDowell has adopted the Quaker City metropolis as his home. He was born in Kingston, Can., July 3, 1847, and has been a prominent factor on the trotting turf for over 41 years, traveling from Maine to Mexico, and from the Atlantic to Pacific coasts, besides putting in five years' service as driver and trainer in Austria and Russia. He has driven on more tracks than any other man on earth.

In his early life McDowell was a dealer in fast stock and began his turf career as a driver at the age of 19 years in Canada, with the trotter George Dorsey, that was afterward sold for \$8000. This horse Dorsey was also the first trotter he drove on a grand circuit track (Buffalo) in 1880-81, when his skill as a reinsman attracted the attention of Count Valensin and Monroe Salisbury, who induced him to train and drive the Salisbury string of Pleasanton, Cal. McDowell was in the employ of Salisbury for eight years, then took charge of the Marcus Daly string in Montana for two years at a salary of \$10,000 per annum. He then drifted back to Salisbury for another year and since that period has been busling on his own account as driver for different stock farms, including John Shultz, of New York; Penn Valley, near Morrisville, for various European owners during his five years' trip abroad, and for Mrs. Dan McPhee.

McDowell's greatest success occurred during the period that he was employed by Salisbury, when he got the title of the "White Knight," owing to his appearing dressed in white costume in all of his races. He afterward drove Alix 2:03½, by Patronage, to a world's record, beating Nancy Hanks' time of 2:04. He also gave Flying Jib, pacer, with running mate, a mark of 1:58½.

He started his California career by driving Edenia, by Endymion, in a race against Shyllock, by Tom Benton, in 2:13½, setting a new track record for the San Jose, Cal., track. At Fresno, in 1895, he drove the black colt Directly, by Direct, against his two-year-old record of 2:07½, winning in 2:07¼. The same year he drove Flying Jib in 2:05½ and Alix in 2:04¼, the mile by Alix smashing all Pacific Coast records. At Galesburg, Ill., he made a new world's record of 2:03½ with Alix, accompanied by a pacer-maker driven by Charles J. Jones. Time by quarters, :30¼, 1:01¼, 1:32¼, 2:03¼. Alix defeated Directum at Mystic Park, Medford, Mass., for a purse of \$11,000. The time of the first heat was 2:14¾. Then Directum went an exhibition mile in 2:07½, first half in 1:03¾. At Napa, Cal., he drove Home-stake in a race against Hazel Wilkes, Emma Temple and Maggie E. in 2:15½, 2:14½, 2:14¼, then the fastest time on record in the State.

Among the many horses, trotters and pacers that McDowell has driven and marked in this country are: Flying Jib, to pole, with running mate, 1:58¼; Alix, by Patronage 2:03½, exhibition mile, and 2:04¼ in a race; Azote 2:04¼, by Whips; Coney, by McKinuev, pacer, to wagon 2:05½; in harness in a race, 2:02; Yolo Maid, pacer, by Alexander Button 2:14, at three years old, 2:12½ at four years; Cricket, by Steinway, pacer 2:10 (world's record for mares in 1891); Georgena 2:07½, by Epaulet; Lena N. 2:05¼, by Sidney; Direct 2:05½, by Director; Directly (2) 2:07¼, by Direct; Margaret S. 2:12, by Director; Expressive (3) 2:12½, by Electioneer; Edenia 2:13½, by Endymion; Doc Sperry 2:09, by Altamont, and Adair 2:14½.

While in Europe McDowell had remarkable success with American-bred trotters. He won the trotting championship of Europe with Louis W. Winans' Wig Wag, by Wiggins, dam Edgelight, in the race for four-year-olds, mile heats, in 2:14, 2:13½, the stake carrying with it the championship gold medal. With Levente, by E. L. Robinson 2:17½, son of Epaulet, dam Leola, by Quartermaster, he won the Austrian trotting Derby at Vienna, there having been more money wagered on the race than on any other previous event in Austria—over 480,000 kronens. With Belle Kuser, by Colonel Kuser, he was second to Freund Fritz, by Simmons, in the Summer Prize, 20,000 kronens, at Vienna, open for international horses, two in three heats, in 2:10, 2:14, 2:13. With Wig Wag he also won the Greenbrino Prize at Baden and only lost one race out of five starts.

Twenty-eight years ago this globe trotting reinsman married Miss Maggie Floyd, daughter of Mr. and Mrs. Edmund P. Floyd, of Oakland, Cal., who has accompanied him on all of his campaigns in this country and abroad. During the past two years McDowell has been located in Philadelphia, taking things easy and driving occasionally on the half-mile tracks. His latest stake win was with Clowney, two years old, by Admiral Dewey, dam Santa Clara, by Lancewood, at Belmont track, Narberth, Pa.

Owners of stallions should lose no time in advertising them. Broodmare owners are anxiously waiting to see what stallions they will patronize. Remember the "Breeder and Sportsman" is the only weekly publication on the Pacific Coast devoted exclusively to this branch of horse industry and it reaches every owner of a good mare, the very ones stallion owners should strive to communicate with, and the best and most satisfactory way to do this is through an advertisement in this journal.

Drink Jackson's Napa Soda.

LOS ANGELES DRIVING CLUB.

The winter and spring racing season will be replete with matinees, according to the present program outlined by the Los Angeles Driving Club.

The completion of the new track at Exposition Park has served to revive interest in the sport, and the owners of speedy trotters and pacers are eager to experience again the thrill and the exhilaration which are the reward of the man who manipulates the "ribbons" in competition of this sort.

So marked is the enthusiasm of some of the members that they favor holding matinees at the rate of two a month during the winter and spring. Others believe that this is crowding the calendar a little, and argue that one big show a month would be better than two small ones. This is a matter which the club will decide within a short time.

Meantime preparations are being made for putting on a star matinee at Exposition Park on February 22, and Secretary Delorey is already formulating plans for it.

The local racing season will continue until the latter part of April. The horses will then be given a month's rest in preparation for the summer campaign on the Grand and other circuits.

The new course is one of the fastest in the country, and with this aid it is possible that several of the club records, some of which have stood for years, will be shattered during the present season. It is this possibility, some say probability, that will give an added zest to the next few months of racing. Club records which have not yet been lowered are as follows:

Exhibition mile, trotting—Sonoma Girl, 2:07.
Fastest mile in race, trotting—Carlokin, 2:08.
Exhibition, wagon, trotting—Belmonte, 2:10.
Fastest mile in race, pacing—Copa de Oro, 2:07.
Exhibition, wagon, pacing—Miss Georgie, 2:10.
Fastest two heats, pacing—Welcome Mack, 2:08¼ and 2:08¾.

A number of promising yearling trotters, including Zombowage, by Nobage, a stallion owned by A. S. Kellogg of Fresno, Zombowage belongs to Ted Hayes; Dr. Hagan, a bay colt belonging to Henry Berry, and Carsto, a bay son of Carlokin and the property of W. N. Tiffany, are expected to make history in the juvenile ranks during the season. This trio trotted three beautiful half-mile heats on Christmas day and, while Carsto won the race, all the heats were close and warmly contested right down to the wire. Carsto took the second heat in 1:14, which is stepping some for a baby.

Carsto celebrated the day he was eleven months old by doing one-eighth of a mile in :22½, trotting the last sixteenth in :10 flat. At the age of two and a half months Carsto was placed in light training, jogging along the road at the side of his mother. At three and one-half months old this youngster, trotting beside his mother, did a sixteenth in :12½.

This colt is entered in futurity events for two and three-year-olds, with stakes aggregating about \$85,000. Because Carsto was born March 10, 1910, after most of the futurity events for 1910 colts had closed, Tiffany had to enter him in several futurities which may be likened to taking time by the forelock.—Tribune.

THE ANTIQUITY OF RACING.

The race horse in the eyes of many is a necessary evil. From the days of Ptolemy down to the present, men have raced horses in spite of all manners of opposition, raised by the many fanatics and individuals, who seem to hold the belief that they were created for the sole purpose, of directing affairs in keeping with their narrow and warped ideas.

In Wallace's "Ben Hur," he makes his description of the chariot race the most beautiful and interesting chapter of his "Tale of Christ," and when the magnificent story was staged, the reproduction of the race proved to be an attraction of the greatest value.

The Egyptians, Babylonians and Assyrians raced horses, Cyrus had a stable of the very best obtainable; so had many prominent Greeks and Romans, and without even the slightest degree of abatement in the interest of the sport, it has gone on down the centuries, even to the present one.

Job's best description is of the horse—his very poorest, of his wife. And yet from what we learn, his peculiar physical condition certainly required more assistance from the gentle touch of the tender female, than from the "war horse who snuffeth a battle afar off."

Solomon, too, had more horses than wives. From what we can learn, that vigorous gentleman whose chief desire appeared to be to raise fine horses and thankless children, managed to always keep up about three horses for every new bride he took unto himself.

There is hardly a great man in history, which can be touched by a pen, but speaks of his favorite horse.

Darwin once said, that man was distinguished from all other animals in that he laughs; and we may as well add, that a civilized man is distinguished from all other men, in that he will bet on a horse race. It is wrong, we admit; just as it is wrong to bet on the price of stocks, grain, raffie off any article, or make a bill with your grocer when the chances are "ten to one" that you will never pay it—and a hundred other kinds of wagering. We can't stop it—being inherited from our earliest ancestors and will no doubt remain with us till the end of time. But we may do one thing—we may refrain from betting ourselves, and if people must bet on a horse race, we should insist that the race be an honest one.

NOTES AND NEWS

Send in your items.

A horse with flat feet is only fit for slow work.

We have unsurpassed facilities for tabulating pedigrees and publishing stallion cards.

Remember, entries to the State Fair Futurity Stakes No. 4, value \$5000 will close February 1st.

Jas. Thompson is handling quite a string of trotters and pacers at the Sacramento track this winter.

J. Twohig, the well-known trainer, has moved his string of trotters and pacers to the San Jose race track.

Mr. G. M. McPherson, the well known horseman of Montreal, Canada, left Pleasanton last Friday for Los Angeles.

Beazley, 2:12, a full brother to Branaham Baughman, 2:05½, by Gambetta Wilkes, is one of the most successful sires standing in Missouri.

Don Pronto 2:05½ has gained over 100 pounds in weight since his return to Los Angeles, and Will Durfee, his trainer, has reason to be proud of his improved appearance.

More horses have their wind broken by being worked quickly and hard with their stomachs distended with hay, grain and water than from all other causes combined.

W. E. D. Stokes, proprietor of the Patchen Wilkes Stock Farm, Lexington, Ky., is steadily improving since his operation for an abscess on the kidneys and is able to sit up in his apartments.

Billy Andrews is credited with having driven six horses to records of 2:05 or better—John R. Gentry, 2:00½; Hamburg Belle, 2:01¼; Soprano, 2:03¼; Cherry Lass, 2:03¾; Mascot, 2:04, and Tiverton, 2:04½.

A. B. Coxe, Paoli, Pa., has three world's record horses at Nawbeek Farm—Peter Thompson, 3-year-old gelding, 2:07¼; Czarevna, fastest heat for a 3-year-old filly, 2:07¼, and Muda Guy, fastest 3-year-old filly over a half-mile track, 2:12¼.

Harold B. 2:12 is not by Kinney Rose 2:13¼, but by Kinney Lou 2:07¼. The bay four-year-old trotting colt Kinney H. 2:22, however, is by the first named. The lines were transposed in the Pacific Coast 2:30 list published in our Holiday Number.

If any nominators in Pacific Breeders' Futurity Stake No. 11, for foals of 1911, who have kept their entries paid up to date, have lost their foals, they have a chance to sell their nominations. Notify Secretary F. W. Kelley to that effect as he has several applications for substitutions in this stake.

Fred Chadbourne, at Pleasanton, has Aerolite 2:07½, the grandly bred and remarkably fast son of Searchlight 2:03¼, looking stronger and hotter than ever. This horse should be well patronized this season for everything he sired has proven to have early and extreme speed, and all are dead game.

At the matinee on Christmas Day at Los Angeles, a statistician figured that the little group of officials who presided represented something like \$40,000,000. The Los Angeles Driving Club, to which these few belong, is reported to have more wealthy men on its roster than any other in the United States, and they are all enthusiastic horsemen, too.

Among the high-class brood mares in foal to Sidney Dillon that will be shipped to Copenhagen, Denmark, this week are Corona H., by Cresson; Pilot Girl (dam of three trotters), by Pilot Medium; Maywood Gem, by Sterling McKinney, 2:06¼; Lizette Dillon, by Sidney Dillon, and Aileen Dillon, by Sidney Dillon.

It appears that the rumor that W. E. D. Stokes was to sell all his horses (with the exception of three) is another one of the creations of some wild-eyed, long-haired daily newspaper reporter. This "breed of disturbers" traces to "trouble" on both sides, a little inbred, as it were, and therefore not exactly accountable for all they write.

Alexander's Bay Chief, sire of Steven's Bald Chief, the sire of the late L. J. Rose's great broodmare Minnehaha, was a bay stallion foaled in 1859, sired by Mambrino Chief 11, dam by Keokuk; second dam by Stamhoul (Arahian). Bay Chief trotted a half in 1:08 and was killed by guerrillas during the Civil War. He sired the grandam of Onoqua (4) 2:08¾.

The breeding of Harry R. (1) p. 2:24½ is as follows: By Armond Lou 2:27½, a son of Kinney Lou 2:07¼; dam Lady Woolsey by Woolsey 5337 (a son of Elerdoneer 125, and Waxana by General Benton 1755), second dam Sepsie by Imp. Crichton, thoroughbred. He is a chestnut colt foaled in 1910 and was bred by Hemet Stock Farm, Hemet, Cal.

The MacKenzie string, in charge of Havis James, which is wintering at Pleasanton, Cal., will finish its spring training at Libertyville, Ill. The information comes from Dick McMahan's camp. Dick has leased the track for the coming year and may extend his option to a ten-year term. Also there is some talk about a race meeting at Libertyville.—Horseman.

Wm. Hendrickson, of Pleasanton, the gentleman who was thrown out of his buggy in a runaway two weeks ago, was not so seriously injured as reported. He is able to be around and supervise the training of his fine brown five-year-old gelding Tom Hendricks, a son of McKena and a mare by Owyhee 2:11. This is a very promising trotter and will be raced this year on the Pacific Coast Circuit.

Capt. C. H. Williams, of Palo Alto, owns several very choice trotting stallions, broodmares, colts and fillies. Last Friday he visited Woodland, where he has three very promising daughters of Unimak (brother to Sterling McKinney 2:06¼). He was delighted with their appearance, and as all have shown speed while being worked he will undoubtedly have them racing when the races begin this year.

Chas. James received an addition to his string at Pleasanton last week. Jas. Dunne, of Donnelly, Dunne & Co., of Hollister, sent him the handsomest three-year-old gelding he has ever handled, he is called Dicto, and was sired by Dictatus Medium, out of Letter B. (dam of Cresto 2:12½). He is a free-legged pacer and, if there is anything in breeding, conformation and a perfectly natural gait, Dicto should prove a money winner this season.

Dr. T. H. Brents, of Walla Walla, is the owner of Magladi 2:07, by Del Norte 2:08; second dam, Laurelia (dam of Helen Norte 2:09¼) by Caution 2:25½, (son of Electioneer and Barnes by Hambletonian 725); third dam, Buttercup, by Alwood 972, son of Almont 33. Last summer she dropped a beautiful black filly by Bon Voyage 2:08 at San Jose that is just being handled. It trots, but eventually will pace, and from its breeding it should be extremely fast.

S. S. Bailey, of Pleasanton, is more than pleased with the reports he receives from Oregon regarding the progeny of his handsome stallion Tidal Wave 2:06¼. The owners say that all out of trotting mares trot fast, and those from pacers pace fast, and their gaits are not interchangeable. Tidal Wave is beautifully bred, being by Nutwood Wilkes 2:16½, out of My Miracle (sister to Coney 2:02, etc.), by McKinney 2:11¼, and is one of the surest foal getters in California.

It is essential that the sire and dam should themselves possess really great qualities, should have something of their own to transmit to their offspring and not be entirely dependent on the merits of some remote antecedent. Breeders of the light harness horse are gradually recognizing the importance of this principle of heredity and as a consequence the great young trotters who are stake winners are patronized as soon as they are retired to the stud to the exclusion of older horses, even though the latter have established reputations.

The Sheepshead Bay racetrack, New York, which was placed on the market two months ago, is not to be cut up into building lots after all. It has been purchased, according to announcement today, by a syndicate which will transform it into an immense amphitheatre, where outdoor sports of all kinds may take place. The proposed changes include the construction of a two mile automobile track, golf links, archery and tennis courts, several baseball diamonds, polo fields, a steeplechase course and artificial canals providing a course for motor boat racing.

We respectfully call the attention of racing secretaries and managers to the fact that in Russia one of the coldest countries on the globe and one having the longest winters, that racing begins long before it does in this country and that the same is true wherever the sport flourishes on the continent of Europe. Abroad the racing public and the managers of the sport fix the time it begins, in this country, the trainers are the arbiters, and that they are qualified to control so absolutely one of the most fascinating sports in existence, seems extremely doubtful.

Chas. De Ryder has a trio of trotting habies (none is older than ten months) at Pleasanton, and everyone who sees these little things hitched to sulkies claims there never were such pure trotters of their age shown at this historic track. It is a question which is the best. They are owned by P. H. Smith, of Los Angeles. One is Zomarine S., a filly by Zomibro 2:11, out of Katharine 2:19, by Diahlo 2:09¼, another is a filly by El Volante 2:13¼ (son of Zomibro 2:11 and Mamie Elizabeth 2:20, dam of Amo K. 2:20¼, by Red Regent) out of Rosemary by Raymond 2:27¼ (son of Simmons 2:28), and the other is a colt by El Volante 2:13¼, out of Seville S., by Strathway 2:19, second dam Simmone, by Simmons 2:28; third dam Mi Lady (dam of Ackerland 2:13¼, and Oreno 2:27¼), by Baron Wilkes 2:18; fourth dam Lady Gay, by Mambrino Patchen, etc. These are just what one would expect to find from such rich breeding, and De Ryder says he never, in all his experience, saw such promising youngsters.

McKinney still heads the list of sires of extreme speed, having 13 trotters and 10 pacers in 2:10 or better. Peter the Great has 12 trotters and only 1 pacer in the "select circle." Gambetta Wilkes has 3 trotters and 16 pacers, while Direct, "the little black rascal," has 4 trotters and 11 pacers. Nutwood leads all sires of speed-producing daughters, having sired the dams of 11 trotters and 9 pacers; Strathmore comes next with 6 trotters and 12 pacers, and Alcantara is third, with 4 trotters and 14 pacers in the 2:10 list.

A free-legged pacer with a pronounced earning capacity is practically of equal value with a trotter of like class. This fact has been demonstrated a number of times within a very few years. All of which brings us around to the point that since the pacing horse has been termed a by-product of the trotting horse industry, why worry about the future? If a by-product has an equal value with the main thing produced, there is ample ground for encouragement and breeders can look to the future with satisfaction.

There are 128 active members of the Los Angeles Driving Club and at the last general meeting thirty more applications for membership were sent to the efficient secretary, E. J. Delorey. Following is a list of the officers and directors: Officers—L. J. Christopher, president; Clarence Berry, vice-president; E. Deffenbach, treasurer; E. J. Delorey, secretary; Frederick J. Terrill, assistant secretary. Directors—J. W. Nickerson, C. C. Colyear, C. A. Canfield, C. G. Willis, R. B. Moorehead, Dr. Wm. Dodge, William A. Clarke, Jr. Speed Committee—Dr. Wm. Dodge, J. W. Nickerson, C. J. Berry, R. B. Moorehead, Chr. Willis.

The well-known breeder, M. T. Grattan, of Preston, Minn., in a recent letter in regard to working his trotting bred mares on the farm, adds: "Many farmers in this section appreciate the value of trotting blood for farm work, and have for years back. The late Charles A. DeGraff bred splendid individuals from Percheron mares and a trotting stallion; they are fine workers, good roadsters and ready sellers. The progenies of the hackney and coachers have, with rare exceptions, proved worthless for any practical purposes, as well as unsaleable. The hackney, especially, lacks constitution and staying power, none of them liking a day's work, cutting up, washy and stringy before noon. The trotting horse sticks to it all day, does the errand of the evening and goes to church Sunday."

"Lou Rass," which campaigned through the northwest and won at a number of places, has been identified as the trotting gelding Dr. Frazee 2:11¼, bred by Jas. W. Rea, of San Jose, and was sired by his horse Iran Alto 2:12¼. Dr. Frazee, in charge of Sam Squires, of La Grange, Ill., raced through the Illinois Valley Circuit several seasons ago. He also started the Doctor at Libertyville against Sonoma Girl 2:04¼, and Highball 2:03¾, and heat 2:10 in pretty nearly every heat. Judge McCreary and Sam Squires identified the Doctor at Grand Island, Neb. As a result Tom Bradstreet and T. R. Arhuckle of Grand Island, Neb., and "Lou Rass" are suspended until further identification is furnished of the horse entered or driven by them during the year 1911; also until the winnings of said horse under the name of "Lou Rass" during the year 1911 be returned for redistribution.

Col. J. C. Kirkpatrick, manager of the Palace and Fairmont Hotels, San Francisco, is one of the best horsemen and amateur drivers on the Pacific Coast. He has a beautiful home adjacent to the Pleasanton race track where he always keeps a few young trotters to handle. He is the owner of Charley D. 2:06¼, by McKinney 2:11¼, one of the handsomest as well as fastest sons of this great sire, and recently he has been jogging a few by this pacer that are very promising. He has a two-year-old colt out of Mountain Maid (dam of Kenneth C. 2:13¼ and Ben Hur 2:17¼), by Cresco; and another out of May T. 2:15 by Monterey 2:09¼, that are doing remarkably well. Then he has another big Charley D. weanling filly out of a mare by Silver Bow 2:16, and a black weanling colt by Bon Voyage 2:08, out of Flewy Flewy (dam of Charley D. 2:06¼) by Memo, son of Sidney 2:19¼.

A man who could not be regarded very deeply versed in horse history would consider a stallion at eleven or twelve years of age, that has been raced to a good trotting record and that has demonstrated that he is a sure foal getter and sires speed, as too well up in years to command the top price which his breeding and proven capabilities showed him to be worth. George Wilkes 2:22 was a fortune to put in the stud and a great success, and he started his career at seventeen years of age. No stallion developed in speed and raced enough to reveal his campaigning quality, could he tested as a sire in addition, under eleven, or twelve, and he is only then at the beginning of his best years for the stud, or paying stallion value. Every year from that up to anywhere from twenty to thirty or older he should earn twice over the price of untested, unmarked, young studs. It is worth good hard dollars to breed, raise, and make a record stallion, and show men that he sires colts and good ones likewise, and a man not willing to pay a good round sum for such a one if not over fifteen or eighteen years old, does not deserve one, and would be too close and dense in understanding to handle one if it come into his possession.—Exchange.

The attention of every stallion and broodmare is called to the fact that our "Breeders' Number," to be issued March 2d, will be the best advertising medium to exploit the merits of their horses ever published.

Last week, Frank Turner, of Santa Rosa, sold two fillies by Guy Dillon 2:23, to some Alameda buyers through J. Groom. They are two years old, one is out of Adioo, by Guy Wilkes 2:15½, and the other is out of Center Eye, by McKinney 2:11¼.

Now is the time to order from Studebakers, Fremont and Mission streets, San Francisco, one of their Toomey track carts for \$70, a Frazier sulky for \$80, a pneumatic road cart for \$60, or a splendid Toomey sulky for \$80, the best made; these prices cannot be beat.

Harry Brown, the well-known horseman of San Jose, recently sold his Bon McKinney colt, dam Helen Keyes by Sidney Dillon, to Ted Hayes. Competent judges claim he is one of the handsomest colts as well as the fastest of his age in California.

The body of the late John J. Sangster, who died in the County Hospital at Woodland last Monday, is being held while an effort is made to locate a brother believed to live in Los Angeles. Deceased came to Woodland from Chico with a string of horses, intending to spend the winter at the race track. His affliction was pleuro-pneumonia, and he was sick but two days. He was about 55 years of age.

With one kick of its hind leg a horse in Oregon City, Ore., committed three murders and a suicide. Friends of Robert Norris, a rancher, have found his dead body in a corner of his barn where it had been hurled, while in the various stalls were found the dead bodies of two cows and the horse. Norris had been missing for several weeks. Investigation showed that Norris in passing the stall, had been kicked in the head and instantly killed. Then the murderer and two cows, all securely tied, had starved to death.

El Rio Rey, one of the greatest race horses in the history of the turf, died on Monday on the stock farm of the late Theodore Winters, a few miles south of Reno, at the advanced age of 24 years. El Rio Rey was the only Western horse that ever won the Eclipse Stakes at Sheepshead Bay. He acquired this honor in 1889 and won a purse of \$23,750. The noted Dwyer Brothers of New York offered Winters \$60,000 for the animal, but the offer was refused. El Rio Rey was sired by Norfolk, by Lexington. Marion, a famous brood mare, brought to California by the late Jos. Cairn Simpson, was the dam.

Expedition 2:15¼, generally credited as the foremost speed siring son of Electioneer 125, and now premier at Hopper Farm, should be credited with another new standard record trotter for 1911 that has not been credited in previous unofficial tables and lists of new performers. This is the three-year-old hay colt Sayola 48772, owned at Hopper Farm, that was given a precautionary record of 2:26¼ at the late Galesburg, Ill., breeders' meeting, though he could trot well below 2:20. This youngster is an extraordinarily well bred one, being out of Opalia, by Allerton 2:09¼; next dam the great brood mare Gul Bahur, by Guy Wilkes 2:15¼; third dam the great brood mare Alicia Nutwood, by Nutwood 2:18¼; next the celebrated Alicia, by George Wilkes, and the fifth the famous Alma Mater.

NAPA STOCK FARM THOROUGHBREDS.

There is stopping in this city at present Mr. Matt Byrnes, one of the greatest horsemen in America, who has been closely identified with the thoroughbred interests ever since he rode Klugfisher for August Belmont in 1869. He was with Pierre Lorillard in his palmy days. Phil and Michael Dwyer, who owned Pontiac, Dewdrop, Hanover, Tremont and others, and then went with J. B. Haggin and took a number of his horses east from Sacramento and raced them. He had Fitz James, Firenzi, the greatest race mare ever foaled in America, Ben Ali, Hidalgo, Guarantee, Mercury, Santa Rita and a number of others in this consignment. Then he had Salvador, trained him and raced him in all his races, and Fresno, who was equally as good a two-year-old as Salvador, and all the other great horses Mr. Haggin had up to the time he quit racing. Then Mr. Byrnes was appointed head trainer for Marcus Daly and handled all of this great stud, including the famous stake winner, Montana. He bought for this wealthy breeder the yearlings, Tammany and Senator Grady, the latter was the best two-year-old of his year. He beat all comers. Besides these, Mr. Byrnes selected and purchased all the thoroughbreds for Mr. Daly's big farm in Bitter Root Valley. Mr. Byrnes won the Suburban with the three different owners he worked for: Pierre Lorillard's Pontiac his first start, J. B. Haggin's Salvador, and Marcus Daly's Montana, and the renewal of the Suburban with Ben Ali three days after he had started in the Suburban.

This veteran trainer won the three-mile record with Drake Carter and is the trainer of more winners of classic races than any man in America. He has just returned from the Argentine Republic, where for four years he represented J. B. Haggin and disposed of all of his thoroughbreds, about 400 mares and colts and 25 stallions. He speaks most highly of the Argentine Republic as a racing point.

No place in the world equals it. The purses range from \$1750 to \$25,000 and the game is under the protection of the government. All the betting is carried on under the Pari-Mutuel system. The race tracks and appointments are magnificent and racing is carried on the year round.

Last week Mr. Byrnes visited the Napa Stock Farm through the courtesy of the owner, Mr. A. B. Spreckels, and was highly pleased with the place and delighted to see so many fine-looking classy two-year-olds. They are in excellent shape and ready to be put into active training. Among these fifteen youngsters there are some that cannot be surpassed on any stock farm in America for breeding and looks. Mr. Byrnes says that the sire Voorhees is destined to be one of the greatest, his bloodlines cannot be excelled and as an individual he is one of the finest. His colts and fillies strongly resembled Mr. Spreckels also has one of the best young stallions Mr. Byrnes has ever seen in this or any other country, called Big Chief, by Pontiac. Solitaire II looks well and so does Dr. Lecco. Both these have achieved excellent reputations as sires. There are twenty-odd yearlings, colts and fillies, here, which reflect great credit on the judgment of their owner as a breeder and show that they have had every care. The mares look extremely well, and have been selected with excellent judgment.

The residence is a magnificent one, with flowers, lawns and plants surrounding it, making it a perfect home. No money was spared in its building or appointments. The view from the front of this residence cannot be surpassed. All the buildings are neat and kept in perfect order. The stallion barn is as good as any Mr. Byrnes has seen in America, Europe or the Argentine. He says that if racing ever resumes its place in America there will be great difficulty to get good horses, and Mr. Spreckels, by his gameness in keeping up his interest in it, deserves great credit in being able to supply some, as does Wm. O'B. Macdonough, who has a small but select stud at Menlo Park.

FOWLER PREPARING FOR FAIR.

The Fresno County Fair Association does not intend to wait until the middle of the summer before making active preparations for the fair in the fall, as has been the case in the past, and already plans are being formulated for the district fair, which is to be held in this city, probably the first week in October, says Fresno Republican.

Not only are plans being made, but it developed yesterday at a meeting of the board of directors of the association that much interest in the fair is being taken by outside communities.

In Fowler there is a strong desire to capture all the agricultural prizes at the fair and already a number of people there are beginning planting to secure exhibits. Announcement of the beginning of work for the fair in Fowler, was made by Mrs. A. B. Armstrong, the member of the board of directors from that district.

C. H. Edwards, the director from Merced, reported that a great deal of interest is being taken in the coming district fair up there and that Merced will come to the fair with a big exhibit of all kinds of products. In every district, the directors have been authorized to appoint assistants to gather exhibits and in several places these assistants have already been appointed and are making arrangements for securing first class exhibits.

In order to stimulate the agricultural end of the fair, the directors recently decided to increase the agricultural premiums so as to make it worth while for exhibitors. This will be one of the big changes in the 1912 premium book. The scarcity of agricultural exhibits last fall, led to an effort to stimulate interest in this department and strengthen it.

A meeting of the secretaries of the different fair associations from Vancouver, B. C., to Phoenix, Ariz., will be held at the Palace Hotel on January 18, when a Coast Fair circuit will be organized and dates for the different fairs made. The general plan is to have the circuit of fairs open in Vancouver, early in the summer and close at Phoenix, late in the fall. It is not expected that the date of the Fresno fair will be changed, although nothing definite will be known until after the meeting.

In addition to the secretary, C. G. Eberhart, a number of the other directors of the Fresno Fair Association are planning to attend the San Francisco meeting.

The directors yesterday decided that the 1912 fair will be different from any other fair ever held in Fresno in that there will be just as big entertainments at night as there will be in the daytime. In the past, the fair association has generally had entertainments but two nights in the week, but this year there will be elaborate entertainments every night while the fair is open. It is believed that the increased attendance will offset the additional expenditure necessary for such an undertaking.

In order to facilitate the transaction of business this year, an executive committee has been chosen to act with the president and secretary in outlining plans for the fair. This committee will meet several times a month for the transaction of business, while the general board of directors will meet but once a month. The members of the executive committee are J. E. Dickinson, C. G. Eberhart, L. H. Storgaard, of Kerman; Mrs. A. B. Armstrong, of Fowler; A. S. Kellogg, C. I. Pulliam and George L. Warlow.

Those present at the meeting yesterday were J. E. Dickinson, C. G. Eberhart, George L. Warlow, H. E. Vogel, Al McNeil, Mrs. A. B. Armstrong, of Fowler; L. H. Storgaard, of Kerman, and C. H. Edwards, of Merced.

OIL PAINTING OF GOLDSMITH MAID.

Last week the Hemet Stock Farm, of which Budd Doble, the world's greatest reinsman, is general manager, received a large oil painting of the trotting mare Goldsmith Maid, which is a most excellent likeness of that wonderful race mare, who was forty years ahead of her time. The painting shows the superb beauty of the animal and brings out in perfect detail the physical perfection which made this trotter the greatest of her time, and who is thought by many to be the greatest of all time. Starting the largest part of her racing achievements after she was ten years old and keeping them up until she was twenty-one years, emphasizes more fully what a wonder she was, says Hemet News.

Back in a little New Jersey hamlet where the usual country store was located, many of the farmer boys used to run horses nights on the high roads nearby, and in that community lived a farmer who owned an exceptionally well bred truly that he was unable to break. This one on several occasions kicked to pieces the breaking carts and harness, and acted in such an ungovernable manner that the owner gave up all hope of ever teaching her to drive. So the boys took this filly out of the field at night and raced with her on the country cross-roads or the hamlet, beating every thing that was brought out. About this time she was purchased by a horse trader, who in time sold her to a man named Alden Goldsmith, whose groom was a horseman, and who succeeded in teaching the mare to drive. Immediately she began to show speed, winning a few country races and in the spring she was turned over to Budd Doble, who the next year gave her a trotting mark below thirty at the age of ten years, and bought her for \$20,000. The next year he sold her for \$35,000 with a proviso that \$5000 more should be paid when she beat the world's record. At the age of seventeen years she took her fastest record of 2:14, having beaten the world's record of Dexter at fifteen years. At the age of nineteen she again equaled her own record and won the fastest six-year race ever trotted up to that time. She was wintered that year in Chico, and the following year trotted within a half second of her record in 2:14½ at the age of twenty. During that season she was given exhibition miles only and was retired the following year sound and in excellent condition. At the age of twenty-two years she raised a colt at the Fashion Stock Farm, New York, and became so ugly to her caretakers that no one could go near her, so she was turned into a paddock with a high fence for fear someone would get inside the enclosure and be killed. The report of her viciousness traveled far and wide until it got to the ears of her old groom, Charlie Cochran, then eighty years old, who had slept in her stall for eleven years, and for whom the Maid had always shown great love, standing, it is said with her fore feet against his shoulders at night when he slept and allowing no one to disturb him. Hearing of the mare's conduct since having a foal, the old caretaker journeyed down to where she was kept and hid himself back of a bush and began calling her by her old stable name. It is said that the mare swung about in the field and came running to the fence, whinching and trying to locate the voice. The old groom then stepped out to meet her and such a display of animal affection was never witnessed by any one as the mare showed toward her old friend, and when he entered the field she did her best to call his attention to her foal, acting most proud of the little creature and wanting him to see it. People about wept at this show of affection. And when the old caretaker started to go the mare became crazy, even leaving her colt and trying to get out of the pasture to follow after him.

Had Goldsmith Maid never been the great race mare that she was her demonstration of love and almost human intelligence branded her then as a noble creature. During her racing career she won in purses alone \$364,200 with Mr. Doble.

She died at the age of twenty-six, having raised several colts, and as the result of too good care from which she became too fat. Her old groom, Charlie Cochran died later at Palo Alto Farm at an old age, and, like the mare he loved, was one of the best in his line.

The painting was made by the artist Van Zandt of Albany, New York, an old friend of Mr. Doble's. He is dead now, but his son, William I. Van Zandt, met Mr. Doble at Madison Square Garden during the sale last month and wished to present him with the painting, which is a rare work of art.

STATE FUTURITY STAKE NO. 4.

C. Allison Telfer, of the State Agricultural Society, Sacramento, has sent the following letter circular to horse owners:

"Every nomination in the Pacific Breeders' Futurity Stake No. 12, which closed December 1, 1911, should be nominated as well in the State Futurity Stake No. 4, \$5000 guaranteed, to close February 1, 1912.

The entrance fee is small and the cost of training for two stakes is no more than for one. By entering in this stake you have two chances of winning and your colt will be eligible for four races; two two-year-old and two three-year-old events. To win any one of them means big money for you and an increased value for the colt. The fact that the colt is entered in two big futurity stakes will make it worth more than as though it were entered in but one, or none at all. You can not afford not to enter."

Can any of our readers send us the pedigree of Diahlo H.?

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

TRAP SHOOTING IN MONTANA.

[By C. H. Smith]

While I have been shooting at the traps for the past twenty-six years, I never had any idea of writing about this sport until asked to do so by the Butte Inter Mountain. I gave my consent reluctantly, baving in mind the old adage—to be a good shooter one must have a strong arm and a weak head.

This sport is so common that nearly everyone in this neck of the woods has taken part in it or has at least been a spectator, so any description is quite unnecessary. I think that the Butte Rod and Gun Club is the oldest organization of this kind in Montana. This club was organized in the year 1882 by J. M. Steward and others and included among its members quite a few prominent men of the old pioneers. John Noyes, John Caplice, James Forbis, Frank Corbett, John D. Thomas, J. F. Beck, J. M. Steward and Henry Williams were on the roll of membership. All of the above have passed to the great beyond.

The club became quite active about the year 1885, and has been in a prosperous way ever since.

I can well remember the first territorial trap shooting tournament. It was held in Helena in August, 1886; the weather was awful hot—must have been 100 in the shade.

Some of those present at that time are still in the game, viz: W. H. Young, John F. Cowan, T. M. Lowry, E. S. Paxson, Al Orton and myself. The grand event on this occasion was a team shoot for a silver cup, donated by the citizens of Helena. Three teams contested, one each from Helena, Bozeman and Butte. Butte made a good race, but finished in third place.

The Montana Sportsmen's Association was organized in 1894, and has been holding tournaments yearly in the different towns in the State. These meets are looked forward to with considerable pleasurable anticipation. It is there that we meet the old boys, generally accompanied by their better halves. These occasions are greatly enjoyed, not only for the sport furnished, but for the social features as well. It is getting to be more of a reunion of the shooters and their families from year to year. Long may they continue. About twenty clubs go to make up the membership of the association, and nearly every town in the State is represented. When the State shoots are under way something is doing all the time. The lady members (we have some) help in the fun-making to a very considerable extent. At one of the State shoots held in Missoula many years ago a few of the girl visitors thought to go flower gathering; lilacs were ripe; lilacs were good enough for them. That evening they left the hotel in a bunch (they had spied the garden during the day) in quest of bouquets. They were soon at the grounds, surrounded, however, with a picket fence. This had no terrors for one of the girls, who volunteered to jump the fence. She soon had bunches of lilacs thrown to the others on the outside. About this time the owner came out of the house; something was doing; those on the outside ran to the hotel, but the poor girl in the yard, in trying to get over the fence, forgot about her skirts, and there she hung; the kind hearted owner came to her aid and set her free. In explaining to the other ladies the reason for her delay she said that after her release she was so humiliated she forgot to thank the man. This happened 15 years ago. I am not yet absolved from secrecy; so I am not giving any names.

The highest trap shooting events ever held in Montana were pulled off in Anaconda in 1908 and 1909. These were the Western Boosters' Association tournaments, and each year the citizens of the little town added \$3100 in cash prizes as well as medals and cups. There were present at those shoots the most prominent shooters of the United States and Canada and included both professionals and amateurs. The attendance was something over 175, and some of those traveled over 3000 miles to take part including Clarence A. Haight, of San Francisco, and other Coast sportsmen. It is evident from this that the sport must be very attractive. It is one of the square sports indulged in today. It is no strange thing to see judges and referees picked from the contestants themselves, with not a thought but that they would get a perfectly honest and fair deal, and they do.

The game is very fascinating; it trains the eye, the nerve, the mind and the muscles. Trap shooting may not make a field shot of you, but it teaches you how to handle a gun, and one who has had experience at the traps will much sooner become proficient in game shooting.

The name of clay pigeon is still used here for flying targets. Years ago they were really made of clay, but they are now made of pitch and sand, hardened under great pressure.

In 884 while our club was holding a shoot on the grounds, located at that time about where the Paul Clark home now is; Fred Gilbert, one of our members was at the score, and shooting poorly; he had

missed 11 in succession, he hit the next target and turning around he said, "At last I have broken the monotony."

A boy spectator said to his father, whom he was with, "Papa, Mr. Gilbert calls them monotonies, I thought they were clay pigeons."

I am so firmly impressed with this good, wholesome, manly sport, that I would advise those of you, who have boys, let them join a gun club, the teaching and training they will get will do them no end of good; it is there that they are taught how to handle a gun with safely to themselves and associates.

We read every few days of accidents to boys who take guns and rifles with them into the hills, never having had any previous experience in handling firearms. Accidents of this kind would rarely happen had those same boys had their first lessons with some trap club.

On the other hand, thousands of shooters are taking part in tournaments most every day, all over this country, and it is not once in ten years we hear of an accident. This game is for every one, both women and men, young or old.

Speaking in behalf of the boys, Ernest Klepetko, son of Frank Klepetko, formerly manager of the Anaconda Mining Company, broke 20 clay pigeons straight at a tournament held at Anaconda in 1903. At that time he was only 14 years old.

For the ladies, Mrs. Add Topperwein finished tenth among all the trap shooters in the United States, and for the elderly ones, I give you as an example that old patriarch, Sandy Irvine of Great Falls. He has been shooting so many years that memory is lost, before he can get back to the beginning. Sandy broke 49 targets straight at Billings in 1907, and might have been hitting them all yet, had not a certain young lady spectator blurted out, "Oh, isn't Sandy nice!" He overheard this and missed his fiftieth bird.

You can see from these illustrations that you age or sex does not bar you from trap shooting. The favorable claims I have mentioned are not all of the good things that can be gotten out of trap shooting. Two of my acquaintances, trap shooters, one considerable of a drinker and the other an inveterate smoker, swore off their habits, thinking to steady their nerves, and it did improve their shooting.

At a match shoot for the State live bird medal, back in 1893, only 17 years ago (you know that the years that are gone don't count), one of the contestants took quite a few bracers out of a black bottle. Along about the middle of the match he missed. Turning to his brother, he said, "Jim, give me a drink." He shot and missed again, took another drink and missed the third shot. Dr. Blackburn, who was present as a spectator, made this remark, "That was the shortest and most convincing temperance lecture I ever heard." So you see trap shooting even teaches temperance.

There is one more subject in connection with trap shooting I would like to touch upon, Fraternity. You will wonder where that enters into the shooting game, but it does exist and that, too, in a very marked degree.

When you visit a strange town, it is not a brother of this or that lodge you look up. You first hunt up the shooters, and every town has some, mostly good fellows. I have seen bankers, hardenders, merchants and miners all shooting in the same squad, not one of them giving a thought as to his social position, intent only on making a good score. "Good scores make all men kin."

SHOTGUN BREECH FASTENINGS.

American manufacturers of shotguns make it their practice to adopt modifications of the Westley Richards method of top fastening for securing the barrels of their double guns, it is claimed by a writer in the Country Gentleman. English makers in some cases use both top and bottom fastenings, while in others they rely only on the Purdey snap bolts. It is as exceptional for an English gunmaker to use top fastenings alone as it is for an American gun manufacturer to use anything else.

Three ways of bolting barrels are in common use, and all seem to serve their purpose adequately. To understand why this is so a glance at the process of development is advisable. When first breechloaders with drop-down barrels came into use they were locked by means of a grip operating on the "lump" beneath the barrels. The first notable improvement was the "double grip," a kind of screw, operating on both the lumps and very securely binding down the barrels on the action body. Then Messrs. James Purdey & Sons introduced their double snap bolt. This is a bolt operating on both lumps, bevelled like the latch of a door, so that the gun can be closed without turning the handle, but cannot be opened until the lever is moved. That represents the snap fastening, operating below the barrels, which is now in general use. Meanwhile it had been observed that a tendency existed for guns to open slightly at the top during discharge. To counteract that, Messrs. Westley Richards & Co. designed and produced the first top fastening. The

form it took was the well-known doll's head. The actual invention dealt with the principle, and the doll's head was only one of the ways—the way thought by the makers to be the best—of carrying it into effect. The doll's head, mortised into the solid metal of the breech, prevented gaping, and, being secured by a bolt, it also formed an effective fastening. Later came the Greener and Clabrough cross bolts, securing the extension, the Webley screw grip, and many other forms, all serving the same purpose. English makers at one time went in for multitudes of bolts and grips and snaps, but experience showed that these were not necessary. American makers, with guns characterised by great refinement of workmanship, as the Parker Bros. or L. C. Smith high grade guns beautifully illustrate, have shown that Westley Richards in his original conception was right, and that one good top fastening, if properly fitted, suffices to keep the gun tightly closed. English makers, with guns of the highest grade, a term here implying the closest and most perfect fitting, have shown that Purdey also was right, and that under snap bolts need no reinforcement. Makers who utilize both methods in combination rely upon one to supplement the other, and in so doing are justified by the merits alike of the top and bottom fastening.

It seems a very legitimate point for inquiry why, as American makers insist, and American writers sometimes insist rather aggressively, that one English system is mechanically better than the other, so many English makers persist in using the under snap. Their guns sometimes are used more continuously than any guns can be used elsewhere, but they remain tight and sound year after year. The strains upon the fastenings of a breechloading gun during firing are of a complex nature. The inquiry suggested may be simplified by disregarding these complexities. Accentuation of normal pressures may reach a point where metal breaks. It is enough for the present purpose to assume that the object of the fastenings is fulfilled by keeping the barrels tightly closed during the firing of cartridges. Every double gun is secured on the action body by the lump at the forward end hooking over the rounded front of the hollow into which the lump sinks. Practically this is a pivot pin passing through a loop beneath the barrels, the fore-end, when on, completing the inner side of the loop. Close the barrels, and the back support is seen to be the standing breech, against the face of which the ends of the barrels are supported before ever they are fastened at all. Upward and downward motion is the only motion the fastenings are intended to prevent. Downward movement of the barrels behind the pivot pin is impossible, because the flats of the barrels lie on the corresponding surface of the action body. It is, therefore, upward motion, the tilting up of the breech ends and the tilting down of the muzzle, that has to be prevented. This obviously can be accomplished by fastening the barrels underneath or by fastening them on the top. Either way serves, or both ways combined.

The barrels of a gun might be regarded as a pivoted lever, with one arm short and the other arm long. Playing at see-saw, it may be observed that a small child on the extreme end of a plank will overbalance a larger child sitting further away from the opposite end. To stop the see-saw is easy enough if either end be held, but to stop it by holding near the center is a more difficult matter. The top fastening of a gun sits above and right at the end of the short arm of the lever which represents the gun barrel. It is, therefore, in the best position for resisting any upward motion. It might at this point be objected that the movement of the barrel under the stress of explosion would not necessarily be upwards! Quite so; but movement in other directions is, or should be, already guarded against. The bottom fastenings hang on below, and they are necessarily nearer to the pivot on which the see-saw turns.

At this point, which represents the pivot; at the action face, where the barrels meet the standing breech, and in the fastenings themselves there must necessarily be a certain amount of toleration allowed. Without it the gun would not open. By perfect fitting, easy operation is combined with an adjustment of surfaces so nice that when the gun is closed and the bolts have snapped home the barrels are incapable of motion in which the action body does not participate. It is a thing not wholly unheard for a gun to break across at the angle where the breech face rises from the flats of the action body. By strengthening the body at this point the tendency has been overcome. A top fastening, provided it be tight enough—this is not a question of hair's breadth, for a hair's breadth would put the barrels "off the face"—lessens this strain. The purpose of the actual fastening, whatever form it may take, is to hold the barrels down on the body and up against the action face. These are the surfaces the barrels part from when the gun is opened. Forty years ago it was shown that either underbolts or top connections would serve the purpose equally well, both being more than adequate to resist the strains brought upon in firing sporting charges.

Coyote Pests.—John C. Hayes, federal inspector in charge of the campaign for the extermination of ground squirrels, has received complaints from ranchers, who say that the coyotes, deprived of the squirrels as an article of diet, are raiding the chicken coops and poultry yards. They ask to have a bounty offered by the county for coyote scalps, and Hayes may lay the proposition before the board of supervisors of different counties.

HOW TO BROWN GUN BARRELS.

The hrowning of gun barrels accomplishes a three-fold purpose—first: It subdues the brightness of the metal to increase the facility with which the hunter may hide from the eyes of game. Second: It brings out the fibres of the metal, adding a touch of finished beauty to the arm, at the same time bringing plainly to view any flaws that may lie hidden beneath the polish. And lastly, to a certain extent, browning delays the eating power of rust. The processes for hrowning are varied and the recipes for hrowning compositions are even more varied.

The hrowning should never be done without first seeing that all the vents in the barrel are thoroughly stopped up with wooden pegs or wax. The holes in the breech and muzzle must also be stopped, and it has been found that wooden rods used for this purpose not only prevent the passage of the hrowning fluid to the interior of the barrel, but that they also provide a most convenient pair of handles with which to manipulate the barrel during the application of the fluid. The hrowning process may then be commenced, and with care in the work satisfactory results may be uniformly expected.

The process is as simple as it is useful, and it may be accomplished by any gunsmith. Three steps only are necessary. First the producing of a very thin coat of rust or oxide over the exterior of the barrel, the working of a gloss to the surface of this film by the rubbing on of wax, and finally the covering of the glossed surface with a protecting coat of some kind of varnish.

Before the fluid destined to produce the film of rust is applied the barrel must be thoroughly filed and polished bright, and rubbed with lime in order that all greasy substance may be removed. Sometimes wet lime is used, or lime water, for this purpose. After the wet lime wash, however, the barrel should be dried in powdered lime. Then the solution may be applied, with a rag or sponge, preferably the latter, when the barrel is ready for a drying process of from 12 to 24 hours, according to the variety of fluid used. When the work is dry enough for the next process the application of a card, or steel brush, will cause the rust to fly off easily, while the rust will cling to the metal and leave a strucky appearance if the barrel is not sufficiently dry. This wetting or carding should be repeated until the metal has assumed the desired color. Then a washing in clean water and a thorough drying will leave the barrel ready for the finishing processes, the rubbing with wax and the coating with shellac varnish or simple varnish.

Among some of the solutions which are used in the production of the coat of browning are the following: Enclose the barrel in a chamber, subjecting it to the vapor of muriatic acid. Moistening the surface with diluted muriatic or nitric acid or moistening it with chloride of antimony sometimes called "bronzing" or "browning" salt is also common. In using the last named substance the process is quickened by the rubbing on afterward of a little aquafortis. The browning salt must be used mixed half and half with olive oil. This mixture is rubbed over the barrel which is slightly heated and then exposed in the air until the proper color has been obtained.

Three formulas are recognized as good for making the varnish for browned gun barrels. The first is as follows: Dissolve ten parts of clear grains of mastic, five parts of camphor, fifteen grains of sandaric and five parts of elemi, in sufficient alcohol to effect the solution. Then apply the varnish without heat. This preparation not only protects the barrels from rust, but it also preserves the metallic lustre from even being dimmed by exposure to dampness. Second: Form a solution of one ounce of gum shellac, one ounce of gum sandarac, Venice turpentine, one drachm, and one gallon of 98 per cent alcohol. Third: A solution of one-quarter ounce of dragon's blood, one ounce of shellac and one quart of alcohol. In this varnish a less degree of color will be obtained by the use of a little less dragon's blood.

Of the many ways to finish gun barrels after browning, possibly that most commonly in use by gunsmiths is the following: Warm the barrels and then rub them while almost hot, with a flannel cloth. Then finish with a little bee's wax and turpentine. Some workmen polish the barrel for the finishing touches with a steel burnisher, or rub in white bee's wax. Still others use a thin wash of shellac varnish, carefully placed by means of a camel's hair brush.

Some good gunsmiths finish off with a solution of two ounces of shellac and three drachms of dragon's blood, dissolved in two quarts of first class alcohol. The removal of old browning is an easy matter. After plugging the browned parts, immerse the barrel for an hour in strong lye, or hot lime water. Then wipe the barrel and place it in vinegar in a wooden trough for an hour or less. The browning may then be easily wiped off with a rag.

State Game Association.—Twelve hundred names are now on the rolls of the Fish and Game Protective Association, the organization which State Fish and Game Commissioner Frank Newbert started. New membership cards are coming in by the score. From the office of the Commission at the State capitol last week it was announced that the members include men from almost every walk of life. There are sportsmen interested in fishing and hunting, county and city officials, farmers, lumbermen, miners and many others.

NATIONAL RIFLE ASSOCIATION NOTES.

Arrangements for the Western and Eastern Interclub Indoor Rifle Shooting League for the season of 1912 have been completed. In the Western League there will be twelve teams and the matches began the week ending December 23. In the Eastern League there will be only ten teams and the matches began the week ending December 30.

The result of the vote of the clubs competing on the question of sights resulted in a majority of the clubs voting for no change, consequently, the rule governing sights will remain the same as last year, i. e., any sight in front of the firing pin not containing glass. There were seventeen clubs that voted on the proposition, of which thirteen voted for no change, two for telescopes and two for sights not containing glass mounted anywhere on the rifle.

It is probable that some of those that voted for no change would have voted otherwise if there had been more time in which to change the rifles before the matches began, and two clubs would have withdrawn from the matches entirely if any change had been made, thus breaking up the schedule.

Owing to the absence of President Taft from Washington ever since last spring and his trip through the West, the usual letters of congratulation sent by the President to the winner of the Individual Military Championship of the United States and the President's Match, have been somewhat delayed. Copies of the letters which have been sent to the winners have just been received. They are as follows:

To Sergeant King, the winner of the Military Championship, the President writes:

"My Dear Sergeant King:—I heartily congratulate you on your victory in winning the Individual Military Championship Match for this year. It is a great victory to win such a contest in competition with so many other contestants of high skill and merit. To win it was necessary for you to possess extraordinary skill in the use of the rifle and I am glad that you showed the requisite qualifications to attain this honor.

Skill in the use of the rifle is absolutely necessary to the national guardsman, and he should attain such skill in times of peace, for when war is declared the soldier is called to the front he may not have time to acquire the skill in the use of the rifle which a really good soldier should possess.

Sincerely yours,

(Signed) WM. H. TAFT.

Sergeant Charles M. King, Company I, 53d Infantry, I. N. G., Waukin, Ia."

To Captain Eddy, the winner of the President's Match, the President was specially happy in his felicitations and dwelt on the pride he felt on having the match won by an Ohioan, his native State.

"My Dear Captain Eddy:—I take this opportunity of congratulating you most heartily upon your winning the President's Match of 1911. To win such a match in competition with so many others of great skill in rifle shooting is indeed a high honor and displays a high order of merit in the use of the rifle. I am glad that you have shown yourself possessed of the qualifications necessary to win such a contest, it should be a source of pride to the National Guard that they were successful in winning both the Military Match and the President's Match and it is particularly pleasing to me to note that the latter was won by a member of the Guard from my own State.

Sincerely yours,

WM. H. TAFT.

Captain E. W. Eddy, Eighth Infantry, O. N. G., Shreve, Ohio."

Literature covering the new indoor qualifications of the Association is now being mailed out and the watch fobs will be ready for distribution the first of the year.

LIGHT TACKLE PRIZE WINNERS.

The winners of prizes awarded by the Monterey Bay and San Francisco Light Tackle Club for the season of 1911, were the following:

Paul M. Nippert won the Chas. H. Kewell trophy for the largest salmon taken on a Stewart spoon, a 30 pound salmon.

E. S. Pomeroy won the Ellery Arms Company trophy for the largest salmon taken during the season, 39 pounds, 10 ounces in weight.

Stafford Keesling won the Golcher trophy, for next largest salmon, 33 pounds, 10 ounces.

E. A. Mocker won the J. F. Cooper fly-book trophy, for third largest salmon, 33 pounds in weight.

W. Wilshire Richards won the C. G. Young trophy, with a 32 pound salmon.

Captain Benson of Sausalito was awarded the boatman's prize, \$15 in cash.

The club blue button winners were: Paul H. Nippert, E. S. Pomeroy, S. Keesling, E. A. Mocker and W. W. Richards. A red button was won by O. M. Keesling.

The east side waters of San Pablo bay are populated with myriads of ducks. Rough weather is necessary, however, to enable the gunners to get into action. During the fair weather the birds can keep well out of range.

From Tomales bay along up the coast, including Drake's and Limantour bay, on the Point Reyes peninsula, every lagoon and inlet is now the resort of big flocks of widgeon, with a pleasing sprinkling of canvasback and bluebills, teal and sprig.

GAME WARDEN WELCH WON.

In the case of Walter R. Welch vs. Willett Ware, as auditor, a proceeding brought in the superior court of Santa Cruz county, July 7, 1909, to recover \$100 salary for June, 1909, claimed to be due Welch for his services as fish, fish, and game warden, from which office the Linscott board of supervisors pretended to remove Welch, the supreme court has rendered an opinion and made the following order: "The judgment is therefore modified, with instructions to the superior court to modify its judgment by directing the auditor to draw a warrant on the treasurer in favor of petitioner for \$50 only, for his salary as fish and game warden for the month of June, 1909, and as so modified the judgment is affirmed. The appellant to recover his costs. Lorigan, J. We concur: Shaw, J.; Angelotti, J.; Sloss, J.; Melvin, J.; Henshaw, J."

Although the opinion had not been received in Santa Cruz, it was surmised that the supreme court may have held that Welch is entitled to salary only as fish and game warden in the sum of \$50 and not as fire warden, because by law the appointment as fish and game warden was for a period of two years, with removal only for misconduct, while the appointment as fire warden was for a term at the pleasure of the board of supervisors.

As the same condition of affairs existed during the remainder of the term of Welch, eighteen months, the decision virtually decides the subsequent salary right.

Welch, after being thrown out without a hearing by the board of supervisors, was reinstated by the new or Mattison board of supervisors, and is drawing his old-time salary.

The Santa Cruz News in commenting on the case, says "it must express admiration for the splendid work done in behalf of Walter R. Welch by Attorney Charles B. Younger, of Santa Cruz, a good sportsman and a keen lawyer. When a man is down and out the average man of affairs no longer has any use for him; and Welch was down and out when Mr. Younger took up his case and set about to get him a square deal.

Welch sued for his back salary; Judge Smith allowed it; the appellate court, as usual, reversed Judge Smith; and now the supreme court, which is the highest tribunal, sustains the contention of Judge Smith that Welch is entitled to his salary as game warden—the important point, and the one involving the principle for which Mr. Younger so ably fought."

STEELHEAD ANGLING.

The best steelhead fishing in fifteen years is the verdict of many anglers who have tried the Russian river at Duncan's Mills during the eight days up to last Monday. Last Saturday about two score of rosters made the trip. There was a big representation of fishermen on the job all week long.

Most of the fish have been caught with roe baited hooks. In some favorite pools, the Austin, for instance, so many rods are out that working with a spoon is almost impracticable. The fishing delegation is made up of veteran experts, just ordinary fishermen, novices and amateurs. Some of the less skilled fishermen have been cleaned out of tackle repeatedly when hooked up with a big steelhead—shoestrings and kindling wood will be the lot of your tackle if you do not know how to handle the Russian river racehorse.

More than eighty big trout was the reported catch for Saturday two weeks ago. Sunday and Monday results were about the same. Wednesday's tally is said to have gone over 100—this means about half a ton of big, fresh run steelhead trout.

The bar, at the river's mouth, was opened good and wide, the recent heavy tides have helped the situation. The river water is clear and clean and indications pointed to a week's, if not longer, continuance of the sport.

Among those who have had a cut in on the big fishing spell are: Dr. J. Auhurn Wiborn, Al Wilson, Dave Sachs, Sam Wells, John P. Babcock, A. T. Sullivan, John McLachlan, E. M. Dickens, H. Schmidt, R. N. Root, Bob Sangster, George Roe, Ralph E. Lacombe, Charles F. Breidenstein, Dr. B. F. Alden, Julian Eisenhruck, E. H. Humphreys, Louis Gotthelf, W. H. Hillegass and many others.

The residents of Guerneville and vicinity are also enjoying the sport of catching steelhead these days. The fishing is good at that point on the river, the people there are enthusiastic over the unexpected sport. At Monte Rio and other places good catches have also been made.

It is believed by many anglers that the rains during the past week may have put a ban on the sport.

Phil B. Bekeart was the recipient of three steelhead Friday last week that scaled twenty-six pounds, sent down by Al Schultz.

Floyd Spence and William Eaton, two members of the California Anglers' Association, trolling in Tomales bay, off Inverness, Sunday, hooked a couple of quinnat salmon, weighing eight and six pounds, respectively.

Market fishermen seining in Tomales bay are sending boxes of steelhead trout to this city daily. Anglers who have fished the tide waters of Paper Mill creek, new Point Reyes station, recently had very poor luck.

Reports from Pescadero and San Gregorio lagoons are that steelhead had not come in, up to last Friday.

Drink Jackson's Napa Soda.

AT THE TRAPS.

Five two-men teams of professional trap shooters, representing Portland, Seattle, Spokane, Tacoma and San Francisco will start on a tour of the Northwest next week, inaugurating a novel scheme intended to aid the work of the recently organized American Game Protection and Propagation Association and to stimulate trap shooting throughout the section traversed. Some of the best known shots in the West will make the trip.

The scheme includes the holding of at least twenty-five contests throughout Oregon, Washington, Idaho and Utah during the next two months, starting in Ashland, Ore., and finishing in Salt Lake City. All five teams will compete in each contest and the team having the highest percentage of wins at the close of the schedule, a la baseball, will be awarded the pennant and a handsome cash prize. All shots will be held under the auspices of the Interstate Association.

Peter J. Holohan and W. A. Robertson will compose the Portland team, H. E. Poston and Fred Broger will represent Spokane, L. R. Barkley and E. B. Morris, Seattle; F. C. Riebl and Abner Blair, Tacoma; W. F. Willet and Ike Fisher will represent San Francisco.

The rules governing the contest provide that each contestant shall be allowed 100 targets and that all tie contests shall be shot off on the ground immediately after the match, each man being allowed 25 targets. A percentage of the contests won will be kept and the team scoring the highest number of wins at the end of the twenty-five contests will be awarded a handsome trophy provided by the Interstate Association and the American Game Protection and Propagation Association, besides the pennant and cash prize.

The schedule to date follows: Ashland, Ore., January 15th; Medford, Ore., January 16th; Roseburg, January 17th; Eugene, January 19th; Salem, January 20th, and Portland, January 21st. From Portland the teams will travel north to Tacoma and Seattle and probably will make a side trip into British Columbia, taking in Vancouver and Victoria. Leaving the Coast at Seattle they will work west to Spokane, and the south to Lewiston and Boise, Idaho, and Salt Lake City.

Live bird shooting is a sport that holds strong with the sportsmen of the antipodes. An account of a recent match at Melbourne follows:

A pigeon match at 100 birds, 30 yards rise, for £100 a side, between W. D. Wilkinson and R. Arnst, the champion sculler, decided at Melbourne on Friday, November 17th, was won by the former, who killed 90 birds, while Arnst's score was 85. Almost from the start, says the Melbourne correspondent of the Sydney "Referee," the £200 seemed safe money for the Victorian. Wilkinson, who was the first to shoot, lost his bird, and Arnst, getting a scorcher, failed also. Wilkinson's next loss was made in the twelfth round, and another cypher going against his name in the twenty-fifth, he thus accounted for 22 birds out of his first 25 birds. He used his second barrel seven times—once for safety. Arnst was clean beaten by his third bird. He killed three and missed another, killed two and made another miss. Then he grassed three, and another cleared the fence. Four more birds fell to his gun, and the fifth went out. He scored two kills, and was once more beaten, making a loss of seven birds in his first 25. He only had occasion to use his left barrel on three of the birds he scored, and had he been a smarter and more accurate shot in this department of shooting he may have secured four of the birds that crossed the fence. Thus early the contest was relieved of a good deal of the interest that surrounded it. The competitors scored equally, 22 kills each, in the second stage of 25 birds, and in the third stage Arnst accounted for 23 against 22. This left the scores—Wilkinson 66, Arnst 63. Arnst still had a chance, but a rather remote one, as Wilkinson is a great finisher, and does not know what nerves are. In the last 25 birds he only made one failure, while Arnst made three. Wilkinson therefore won with 90 kills against 85. The birds were a grand even lot, with no wind to assist them, and it says much for their quality that only one of the 200 was barred by the referee, and only one sat on the trap. Arnst made the best break of the match, viz: 18; Wilkinson's best run was 14, which he put together during the run home. The winner used his second barrel 19 times and the loser 16 times. Arnst has expressed his intention of making another match with Wilkinson, as he says he was not at all satisfied with his own shooting, particularly at the first 25 birds.

Leo Weinand and W. J. Street have blinds located in the bay near McNear's Point, where bluebills and "cans" are so susceptible to the attraction of wood-headed ducks that they have had much difficulty in distributing numerous limits shot since the season opened.

About this time of the year the black sea brant should be "working in" to the head of Tomales bay from the ocean on low tides, seeking the eel grass feeding grounds. Late reports this week state that the sea brant were coming in plentifully.

The Alvarado section of the Alameda marsh shooting grounds has been in line recently for fairly good duck shooting. John Ferguson, Chris Wolfen, John Boyd, Fred W. Munday and H. Miller of the Pioneer Gun Club found sprig limits not so difficult to secure as at other resorts on the marsh.

GOSSIP FOR SPORTSMEN.

Striped Bass Notes.—Striped bass are plentiful and big in Russian river. One man on Christmas day fished for the bass, which were visible in a big school in the narrows at the head of Austin pool and landed twenty-two that scaled about 250 pounds, an average of about 10½ pounds each. These fish were taken by the "snagging" process. A line armed with a number of sharp hooks was cast into the water and dragged through and over the fish, which were all hooked foul.

Angling operations for striped bass in the Rodeo waters have been exceedingly unproductive recently for the rod and line men. The fish are in that section, however, for a 45 pounder was caught one day last week.

A workman at the Western Oil Refinery noticed a commotion in the water close to shore. Investigating, he discovered the big bass stranded in a shallow rocky pool. The man procured a hammer and pounded the fish upon the head and killed it.

The San Antone and Wingo pilgrims for several weeks have not returned with enough striped bass to cover an ordinary frying pan.

William West, the Napa angler, in a letter to Charles H. Kewell recently stated that striped bass fishing in Napa creek and its branches is absolutely non-productive of fish at present. That is somewhat of a puzzling condition of affairs, for last year at this time the sport was very good.

Battle With a Tuna.—The Los Angeles Times had a very interesting account concerning a fight with a 170 lb. tuna, and the battle was witnessed by 2000 spectators, and lasted for eighteen hours recently. Among other items the article contains the following: "Immediately daylight broke crowds thronged the beaches armed with field and marine glasses to watch the finish. The shouts which came from the excited spectators resounded miles through the canyons, back at Avalon, as the Tuna Club flag was run to the masthead after the battle. Angler Stockton will become a member of the Tuna Club at its next regular meeting. With his hands torn and bleeding, and every muscle of his body knotted by exertion, excitement, and exposure, the angler was assisted out of the launch Mabel F. when the battle had been won. All on board had been drenched to the skin, and angler and boatman were covered with the vanquished tuna's blood. It is estimated a distance of 30 miles had been covered by the fish and the boat. Circles, angles, and every figure known in Euclid were described. In two places of the line one of the strands had worn itself through against the leather thumb-brake on the reel, and all but the sides of this had been worn down to paper thickness. The stout hickory rod resembled a crooked stick. The angler had worn through the finger ends of two pairs of buckskin mits. The strike was made at 3 o'clock on Wednesday, off Long Point, and the battle closed in Avalon bay, less than one mile from the shore, at 7:57 o'clock on Thursday morning. Three times at night the angler was fed with food-stuffs while he held to his task. He had never before landed any fish larger than a speckled brook trout. "Between reeling and pumping he ate his food. With his feet against the guard rail of the launch, and both hands pressed hard on the brakes, he was fed, masticating as he fought the fish. Human endurance and physical tension were at their height. For two hours no one spoke. Undoubtedly, could the length of line reeled in by Stockton be accurately measured, it would probably cover several miles. A tuna will 'pull back' a line so often that it will wear through and snap with its own weight in water. Many times during the fight boats were sent to enquire. Megaphones were used, and only a small skiff was allowed to approach near the scene of contest. The fish was 2 feet longer than Mr. Stockton."

Woman Slays a Lion.—For the first time in so many years no one in the office of the State Controller remembers when the feat was performed, a woman has slain a California mountain lion, skinned the beast and claimed the bounty. This huntress is Miss Amelia Bussell, and it was near China Flat, Humboldt county, that the ferocious lion bit the dust following her unerring aim. For killing the beast she will receive a bounty of \$20 from the State of California, State Controller Nye having already drawn the warrant for that amount in her favor.

Twenty-two lions were killed in the State during November, and the warrants issued at the office of the State Controller, at the rate of \$20 each, making a total of \$440, show that the animals bit the dust in the mountains of Siskiyou, in the valleys of Tehama, in the foothills of Shasta, in the dry San Joaquin and also on the desert of San Diego and Los Angeles.

Monterey County Trapping.—Bob Neal came in from his camp at the headwaters of the Soquel river a day or two ago and brought a lot of traps. Neal is engaged in catching the festive raccoon and the elusive fox, with an occasional bobcat, all being plentiful in that section. He trapped \$25 worth of animals last month and with an augmented lot of traps expects to break the record between now and the end of the year.

Neal says there is a pesky mountain lion or two in the neighborhood that he expects to get soon. These big cats have a habit of coming down to the camp and singing songs in the moonlight for the edification of himself and dog, the only occupants of the place.

Up to date, however, the lions have not drawn close enough to admit being pecked with a rifle, although Neal has taken several shots.

Doings of the Commission.—The State Fish and Game Commissioners have stationed the launch Shad at Sacramento. The Audubon will be shifted from the Capital City to Stockton, from which point the boat will patrol the San Joaquin River and tributary waters.

The Quinnt, the flagship of the State fleet, will be the principal patrol boat with mooring station at a bay point in close touch with the main office in this city.

A band of 150 wild turkeys at the State Game Farm are now available for general distribution at different points in this State where environment is favorable for stocking with the birds.

With branch offices in Sacramento, Los Angeles and Fresno the work of the Commission will be greatly accelerated. It is the intention to establish eventually branch offices—embracing eight to ten county jurisdictions, with a force of from ten to fifteen deputies attached to each, all over the State.

The Sacramento office of the commission, in the Forum building, will be in full working order about January 15, covering a territory north of San Joaquin county and east of the Coast Range.

The territory immediately under the direction of the San Francisco office takes in the country from San Luis Obispo county north and west of the Coast Range.

South of Tehachapi, including Inyo county in the west, will be under supervision of the Los Angeles branch.

Attached to the Fresno office is the lower San Joaquin Valley and the country east of the Coast Range.

The proposed plan to supply valley quail, 6000 dozen to be procured in Lower California, for restocking depleted sections of this State is temporarily under a handicap. The aftermath of the revolution has prevented getting, for the time being, any birds from across the line.

An effort will be made to partially make up the shortage by getting quail from Coachella and that vicinity. Ranchers have recently complained that the quail are so numerous that crops have been seriously damaged by the birds.

Hunting Notes.—The cold spell during a week ago put a setback on the duck hunters' sport. At many marsh shooting resorts the baited ponds were plated with a thick coating of ice, particularly so on Wednesday morning. Such a state of affairs forced the ducks to take refuge in sloughs and open bodies of water, where if they could not feed they were at least safe from the attentions of the gunners.

The San Pablo Bay birds at Sobrante, Pinole, San Pablo and other shore points have enabled many hunters to enjoy canvasback and bluebill shooting. These deep water ducks have been resorting to the east side shores in flocks of thousands.

Around Mount Eden, Russells and Alvarado but fair shooting has been the rule. Further south, on the Alameda marshes, many limits have been shot on spring and teal ducks. The Suisun marshes have been less prolific in limit bags for the past week than heretofore. Sunday the flight was rather a light one. Good shooting was had, however, at the Sunrise, Seymour and Green Lodge preserves.

The Wednesday visitors at the club houses fared a bit better. Good sport was enjoyed at the Volante, Allegre, Tule Belle and other shooting grounds.

Reports from different valley points state that ducks were plentiful up to Wednesday, when the cold spell, it was believed, drove the birds away. From the sudden appearance of thousands of sprig, widgeon and teal on Suisun and San Pablo bays, it is supposed that the visitors were from the valley regions.

At Newman, on New Year's Day, Otto Feudner, C. C. Huber and other members of the Newman Gun Club had a great shoot on sprig.

News from Firebaugh's is rather assuring for good sport today and tomorrow. Birds are fairly plentiful. The Wednesday shooting was very good.

Arthur Ehrenpford and other members of the Gustine Gun Club found the best shooting in the sloughs, the ducks having temporarily left the ponds.

Joe Harlan, Ned Bosqui and other members of the Field and Tule Club, were at the Los Banos preserve last Sunday.

Lee Harpham tried a change a week ago and devoted his attention to a good quail ground near Halfmoon Bay.

Lincoln Gun Club members have had but slim returns for the past week on bay shore shooting trips near Reclamation. Black Point and Petaluma Creek hunters have had to work hard for the few birds gathered. Rough water on the bay and a norther is needed for good duck shooting in that locality.

Dr. Charles E. Turner, formerly of Vallejo and a well known sportsman, writes from Big Pine, Inyo county, and gives the pleasing information that duck and quail shooting in that part of the State is first class. Mountain sheep are plentiful; also protected by law at present. More of the sheep are to be found in Mono than in Inyo county.

Monterey quail shooters have had good quail shooting recently. Romie Jacks and his guests at the Jacks ranch for several days had fine sport with quail and ducks as well.

AN APPRECIATION OF BUDD DOBLE.

(By John Splan.)

It gives me great pleasure to comply with your request for a story of Mr. Budd Doble, a man whom I have always liked and admired from my boyhood days. I have spent many pleasant hours with him and have had some desperate battles on the turf with him; have learned many things from him regarding horses and horsemanship which have been useful to me in my business, and I am glad to avail myself of this opportunity to sincerely thank him for the pleasure and assistance he has always given me.

I have always believed that successful men and great horses were specially created with the characteristics and instincts which made them successful and famous. I have known many people, during my career, who were very horsey, but have had the pleasure of meeting but few who were real genuine horsemen, and that Mr. Doble was a real horseman goes without saying. He came honestly by it; was bred and born a horseman; his father before him was a grand character and one of the best horsemen of his day. Mr. Doble often told me himself that the training he had early in life from his father and a few other noted men, had greatly to do with his wonderfully successful career. Another positive proof to me that he was born a great horseman was the fact that Hiram Woodruff, the most noted trainer of his day, selected him, who at that time had no special reputation, to take charge of Dexter, a horse looked upon as the coming wonder of the horse world. I remember distinctly that the press advised the public to be careful in betting their money on this horse in his coming races, as he had been transferred from the training and management of the greatest trainer in the world to an inexperienced young man, who only had the endorsement of Mr. Woodruff to recommend him. This proves what expert testimony is worth, and Mr. Woodruff was an expert horseman, as he was also a good judge of men and their ability.

Dexter's career, under Mr. Doble's management, was short but very brilliant, yet long enough to prove to the public that he was the champion of champions and that Mr. Doble was a real horseman. In those days if the owner claimed his horse a champion he had to come out in the open and meet all competitors. They raced horses under many different conditions, and Dexter was no exception to the rule. He went many races in harness hooked to sulky; others under saddle, not only one-mile heats but longer distances. He raced to skeleton wagons, and on several occasions gave his opponents handicaps and other advantages from the fact that he raced hitched to a four-wheel skeleton wagon while they raced hitched to sulky. After beating all opponents in different hitches he was asked to go against a trotter with a running mate, and there was only one horse (Ethan Allen) in the world who could beat him, even after giving them that great advantage. In addition to that, Dexter had, when Mr. Doble parted with him, the world's record, mile heats to saddle, and mile heats to harness also. Most any man can take a gun and hit the target once in a while, but it takes a real expert to make a string of center shots. That holds good in other vocations in life as well as in horsemanship. That Mr. Doble's reputation and success came not only through the handling of Dexter, and was not a chance shot, is amply proven by the many successes he had with other noted horses in after life.

His next charge, Goldsmith Maid, I knew long before she went to his stable, and of all the horses I had ever seen she was the most unpromising prospect for a useful horse, much less a champion, I had ever known. Her career certainly reads like a romance. Mr. Doble took possession of her in 1867; she had a record of 2:32 and the reputation of being one of the worst gaited and most unmanageable trotters that ever wore harness. She raced continuously from that time until 1877, when she was twenty-one years old, all over the country; over all kinds of tracks; was called upon to meet and defend her title against every good horse that was produced. That she did all this and many other impossible feats in turf history, shows that she must have led a very strenuous life. I think one of her most wonderful feats was when she trotted and won the second heat in a winning race in 2:14½ after she was twenty-one years old. At that time 2:14 was the world's record, and she was the only horse that had beaten 2:15.

The financial result of this successful campaign of many years with one horse should prove conclusively that Mr. Doble had a good business strain in his character, and had he taken to finances instead of to horsemanship he would probably have been a J. Pierpont Morgan. When you take into consideration that he deposited to the credit of Goldsmith Maid, out of her earnings, \$355,000 cash, it would be easy to award him the blue ribbon as bolder of the world's record for that financial success, and had Mr. Doble never trained or driven another horse, I, for one, would have taken off my hat to him as a shining star in his profession.

Coming down to the later day connection of the turf, I cannot remember where I ever saw him drive even one bad race. I think he made fewer mistakes and put up a more perfect performance than most any man I ever saw. To my mind one of the best things he ever did was the race he won with Monroe Chief over the Lexington track. The horse came under Mr. Doble's control after he had passed through the hands of two very successful trainers, and at a time of life when he was supposed to be in the discard. I am sure no one ever had the slightest idea that he could be brought back and

make the best performance of his life, but that is just what he did do, but not until after Mr. Doble had trained him for a year. Rosa Wilkes was one of the successful horses of that year, and looked to be unbeatable in her class; these two horses came together at the Lexington fall meeting, and it was a battle of six heats. They had two heats apiece and a dead heat; the horse beat her the deciding heat, and, if I remember rightly, beat his own best record in that race. In weeks afterwards he went out for a purse to try and beat what was then a two-mile record, which he accomplished with something to spare; that is what I call making a center shot.

That the time and years didn't interfere with Mr. Doble's success was proven to me by one horse he trained and raced after he had given up active interest in the business, and, like Monroe Chief, this particular horse had been passed along; was supposed to have gone beyond his days of usefulness. This was the bay gelding called The Roman; he had a record of 2:10¼, had been fairly successful in a way, and when he came to Mr. Doble no one thought of his having a chance to win a race. I was in a position to watch the training of this horse closely, and if ever a horse was scientifically trained this was one. The first time Mr. Doble started him I do not think he had driven a horse in ten years. The Roman had always had the reputation of being a bad scorer, but when he came out for the race he seemed to be the one perfectly mannered horse of the lot. He won the first heat in 2:09¼, second in 2:09½, third in 2:09¾, thereby beating his previous best record in each heat and having to defeat a large field of horses in his own class. It seemed a strange thing to me how few people seemed to have ever heard of the man. If the sharpshooters and rail birds and people in general who were always looking for long-shots around the race track had ever heard of Doble, they must certainly have forgotten all about it, judging from the manner in which they played their money when it came to the betting proposition. He was certainly the long shot of that year. Mr. Doble picked out Kinney Lou in the field, trained and fitted him to such perfect manners and condition that he made himself the champion of his class the first year he raced him.

You ask me how I compare Mr. Doble with the present-day trotting horse trainer and driver. Somebody has said that comparisons are odious, and for that reason I'd like to answer you in some other way. The methods of training and the system of racing of years ago were so entirely different from the present day methods that it would perhaps be unfair to both the trainer and driver of that day and the trainer of today to draw any comparison at all. I have the greatest respect for the ability of the drivers of today, and if I knew of anyone going out to race with them and expecting to hold his own, I would certainly advise that gentleman to get himself fit and ready before he started out.

If I should write of all the great things that this justly famous man has done, it would take all the space of the Christmas number of the Trotter and Pacer, which would be a little selfish on my part, as I know you have many other correspondents who will write more interestingly than I can, but I want to say to the young man who is starting out in life expecting to make a successful trainer and driver of the trotting horse, if he will prove to me that he can ride a trotter under the saddle as well as Mr. Doble could in his time; train and drive a horse in harness; fit him to go one, two or three heats; hitched and-rigged in any way, or if the occasion required could hitch two trotters in double harness and go out and drive either in a race or against the watch, I will be glad to give him my personal endorsement as being qualified to graduate in the up-to-date school of driving and training.—Trotter and Pacer.

IMPROVEMENT AT THE STADIUM.

San Francisco is to have the finest athletic field in the world. Already the park commissioners have appropriated the money for building the great track, and President Elliott of the Pacific Athletic Association has indorsed the plans that have been drawn up to be submitted to Superintendent John McLaren next week.

According to the plans, the track will be the most complete permanent track in regard to details that can be found in any part of the world. Every detail has been taken into consideration. There have been many tracks built in this country that have been pronounced perfect, but these have not been permanent affairs and have only been built for the special occasions. The most notable of these temporary tracks was the one for the Olympic games in St. Louis in 1904. That track was pronounced by experts from all over the world to be superior to anything in any section of the globe.

The new stadium track embodies all the great features that the St. Louis track had, with many added details. The track is at present situated at the east end of the stadium, but the new plans call for its removal to the west end. The concrete grandstand that at present is located at the finishing line of the trotting track, will be continued the entire way around the bend of the stadium and will be capable of seating 30,000 people.

The money for the work has already been appropriated, and as soon as Superintendent McLaren approves of the plans work will be begun. It will be completed in plenty of time for the holding of the Olympic game trials, which are scheduled to take place in this city June 6.

TROTTERS FOR INDIA.

Four typical American trotting horses are now in New York awaiting shipment to Baroda, in India, a trip of 10,000 miles. They are going to the Maharajah, who has lately been so much in the public eye, as the central figure of an international episode in connection with the coronation of the Emperor of India, and who learned to like American trotters by driving a pair of them when in New York a year or two ago. The horses are blood bays, with black legs, manes and tails and without a white hair on one of them. Together, they make a stunning four-in-hand team, and as such they are to be driven by a princess of India, the Maharajah having purchased them as a present for his daughter, who is soon to be married. The leaders are 15.3 hands high and the wheelers are 16 hands. One of the leaders can trot a 2:20 gait, it is said, and another of the four is a capital saddle horse. All are geldings and all have long tails.

A well-known New York dealer selected the horses in the West a few days ago, and their buyer says that one of the animals is by the famous blind horse Rhythmic 2:06¾, that went through the Grand Circuit 10 years ago sweeping everything before him. The horses will be kept in New York until the latter part of this month to condition and school them. They will then be shipped to London, England, and from there to Bombay, India, whence they will go by rail to their new home.

They are said to be the first horses of their breed ever sent to India, and their shipment to that faraway country is a reminder that the hoofbeats of the American trotter have in the last two decades literally circled the globe. Representatives of the breed that originated in New York State not much more than half a century ago have gone to Great Britain and Ireland and every country in Europe, to Siberia, China, Japan, Australia, North and South Africa, Asia Minor and South America.

ANSWERS TO CORRESPONDENTS.

K. L. E.—Greater pains should be taken in compiling catalogues. I see by the one I have of the sale of H. Brace's horses that Banker's Daughter 2:13¾ is by Arthur Wilkes out of Sunflower 2:24 by Elmo; second dam Ella Kellogg by Chieftain. Is this correct?

Ans.—No. Barney Simpson, who is now at Pleasanton, says: "The mare was by Arthur Wilkes, but her dam was a mare called Mayflower." He thinks she was by Chieftain, but Chas. Gilmore, of Red Bluff, who bred Banker's Daughter, has moved to Montana; his brother Frank, who lives there, must know. This mare Sunflower was a beautiful chestnut mare with silver mane and tail, that was sold at the Old Bay District track many years ago. She had a record of 2:28 and was bred to Director 2:17 by Mr. Salisbury and sold to E. J. Travis, his partner, in Chicago, where she dropped a filly that was afterwards known as Director's Flower 2:19½.

How was Kavanaugh's Grey Eagle bred? What did he sire? Ans.—By Grey Eagle out of a mare by Imported Tranby. He sired Lucy Mersbon (dam of Andy Mershon 2:25½), and Gyp (dam of Grafton 2:22¼, a noted trotter who won many races in 1875), one of Kavanaugh's Grey Eagles' daughters produced the sire Edgewater, and another produced the dam of Billy Wilkes 2:29½. The splendid article by Samuel Gamble in our Holiday edition, gives the dam of the great horse Elmo 2:27; as by this horse, out of a mare by Imp. Glencoe. It is not to be wondered at, therefore, that he was a remarkably handsome and game trotting horse, for there was plenty of the best of thoroughbred blood in his veins.

How was the stallion Sample bred? Ans.—Sample was a bay horse foaled 1876 sired by Wayland Forrest dam Tinsley Maid (dam of Buccaneer) by Flaxtail; grandam Fanny Fern by Irwin's Blind Tuckahoe, son of Herod's Tuckahoe; great grandam by Leffler's Consul, son of Shepperd's Consul.

SAN FRANCISCO DRIVING CLUB.

The regular election for officers of this club for the ensuing year took place at Tiv Hall last Friday evening, and a more spirited one never was held. There were two tickets in the field, but the one headed by William J. Kenney was elected. Mr. Kenney has been for five years its president, and under his administration the club has increased its membership from 16 to 168. There was much betting on the result and members from all parts of California were present. To show that they took an interest in it something over \$350 was collected in dues. After a plain statement of incontrovertible facts by the President to the utter discomfiture of those who attempted to discredit his management, the following officers were elected: President, William J. Kenney; vice president, Fred Edwards; secretary, Fred Lauterwasser Jr.; treasurer, Fred Lauterwasser Sr.; sergeant-at-arms, A. Schottler; stewards, John Nowland, James Kramer, J. E. Finch, A. Ottinger, and A. Hoffman. The last named being the only one on the opposition ticket receiving a majority.

Of the new 2:10 performers twenty-three were bred in Kentucky, two is the Hoosier State, twenty in California, eighteen in Illinois, thirteen in Ohio, nine in Tennessee, and the balance scattered throughout eighteen States and Canada. The majority of them were owned and developed a long ways from where they were bred.

VALUE OF THE DAIRY COW.

In estimating profits in dairying it is a common error to credit the cows with the returns for butterfat only and charge them with feed, shelter and the labor in the cost of production. Be it said to the honor of good cows that many are found profitable by this method of estimating their worth, but this is not the whole truth. There are other credits that should be made if the cows are to have a square deal.

Where several cows are kept pigs should also be raised to consume the skimmed milk. It is estimated that the skimmed milk is worth 25 cents a hundred pounds for feeding pigs. If good cows only are kept, the calves will be worth something and if pasture be available the cost of keeping the calves until they are salable will not be large.

It must not be forgotten that the milk, cream and butter used in the home should be carefully considered and may reduce the cost of living one-third or even one-half. The cows should be credited with the products used by the family as well as those marketed.

Another source of profit from the dairy cow that is often treated lightly is the manure. When properly saved and liberally applied the barnyard manure from a well-fed cow will pay for the labor of milking, feeding and handling the milk. Estimated upon the basis of the plant food alone in the manure it is worth from \$20 to \$25 per cow a year. This does not include the value of the manure to improve the physical condition of the soil, which is often equal to the value of the elements of plant food.

The dairy cow is a machine to convert coarse products from the farm into butterfat, thus returning most of the fertility to the farm and affording a market for the products of the farm.

Justice demands that we give the cow credit for her products when we charge her for all she eats and the expense of making her comfortable in winter.

TRIANGLE TRIP OVER THE Northwestern Pacific Railroad

One of the most delightful scenic one-day jaunts in America. 150 miles of Mountain and Redwood Forest Scenery, a Boat Ride on San Francisco Bay and by rail along the Russian River.

Leave San Francisco 7:45 A. M. daily except Sunday, and 3:45 A. M. Sunday only, by boat across the Bay of San Francisco, in full view of the Golden Gate to Sausalito (the Sorrento of America). Thence via picturesque San Rafael and thriving Petaluma (home of the chicken industry), through Sonoma Valley to Santa Rosa and Fulton. From Fulton, through magnificent mountain scenery and redwood forests and along Russian River, to Monte Rio. Return is made along the coast, passing Tomales Bay, Point Reyes, San Anselmo, etc., to Sausalito, arriving at San Francisco 7:35 P. M. daily the same evening.

If preferred, trip can be reversed, leaving San Francisco at 8:15 A. M. via the coast to Monte Rio and returning along the river and through the valleys, arriving at San Francisco 7:30 P. M. daily except Sunday and 7:05 P. M. Sunday the same evening.

Round Trip Fare for Triangle Trip, \$2.80, except on Fridays or Saturdays, it is \$2.50 and on Sundays only \$2.20.

Tickets on sale at 874 Market Street (Flood Bldg.) and Sausalito Ferry Ticket Office.

CARE OF THE CALF.

The only calves to be saved from a dairy herd are the heifers unless the herd is purebred and then only the promising bulls should be saved. When the calf is born and is a day old, it should be taken from its mother and fed milk. A good dairy cow always produces more milk than is necessary for the calf and not knowing any better the little animal will drink it as long as there is a drop in the

CHAS. WHITEHEAD'S Public Training Stable PLEASANTON, CAL.

Horses and colts trained at reasonable rates for next season's campaign. Best of care given. Developed and campaigned successfully the Futurity stake winners North Star 2:11 1/2, Della Derby 2:11 1/2 and many others. Address CHAS. WHITEHEAD, Pleasanton, Cal.

The Finest Winter Training Track in America.

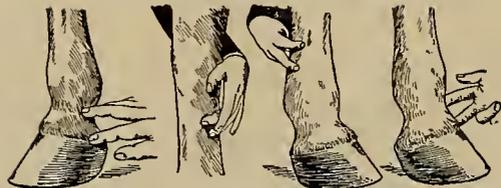

PLEASANTON RACE TRACK, Pleasanton, Cal.

There are about 50 box stalls in first-class shape, newly roofed, and ready for occupancy. Horsemen who intend to campaign their horses next season should not delay too long if they want to prepare them on this track, which is universally acknowledged to be the safest and best in existence. These stalls will not be vacant long. For further particulars apply to

DON'T FAIL TO GET SAVE-THE-HORSE BOOK

Lameness and diseases causing lameness are not such trifling and serious matters since Save-The-Horse was discovered. Our new SAVE-THE-HORSE BOOK is an encyclopedia of practical and complete references. It is the latest, most reliable and highest authority. It is scientific but not technical. Takes in every scope and character of diseases causing lameness.

MAILED WITHOUT CHARGE. Send for copy. EXPERT ADVICE FREE. Describe case, we'll advise frankly and clearly what to do.

Send for copy of contract, Save-The-Horse Book, and letters from Breeders, business men and bankers the world over on every kind of case, 10 years' success. GET A LIFT OUT WITH THE HORSE, and results are absolutely certain and permanent. Note how it is limited, how our illustrations and methods are copied, then you will understand its success.

TROY CHEMICAL CO., BINGHAMTON, N. Y. D. E. NEWELL, 56 Bayo Vista Avenue, Oakland, Cal. 251 Kearny Street, San Francisco, Cal.

or in the Barn Wasting It

Whether your horses work or not, their feed costs you big money. When a horse is laid up you not only lose the cost of feed, but also the profit that the horse would have paid if able to work in the field. Since there is no way to prevent spavin, curb, splint, ringbone, sprains and lameness, your thought should be given to the quickest, surest and most economical cure. And for over 35 years, thousands of horsemen have depended on Kendall's Spavin Cure. It's the old, reliable, safe remedy that has saved thousands of dollars' worth of horse flesh, to say nothing of the worry, time and trouble it has saved horse owners. You should get and keep a bottle of—

Kendall's Spavin Cure

for emergencies. You never can tell when you'll need it, and when the time does come, you'll be mighty glad you had the foresight to prepare. Here are samples of the thousands of letters we receive from grateful horse owners every year. Mr. J. J. Sandlin, New Hope, Ala., writes: "I am a great believer in Kendall's Spavin Cure. A few applications have just taken an unnatural growth off my horse's hock, thereby increasing his value \$25.00 at least." Mr. J. B. McCullors, Halesville, Ala., writes: "Last July I bought a mule for \$65.00. He had a bad spavin and was unable to work but after using three bottles of your Spavin Cure, I cured it and he was sold in March for \$180.00. I advise all horse owners to use Kendall's Spavin Cure." And Mr. Wm. Booth, of Grovett, Ark., writes: "I have cured both Blood and Bone Spavins, taking the hunch all off and leaving the horse as sound as he ever was. The horse does not need entire rest while using Kendall's Spavin Cure. Light work and careful handling are better than standing in the barn. If the horse was in the pasture not many people would take proper care of him. I use the Spavin Cure a week at least, sometimes three, according to the severity of the trouble. There is enough in one bottle to cure three large Spavins if used according to directions. It is excellent for bruises, both for man and beast. Your Spavin Cure will cure Thoropin in a hurry. With over twenty years' experience with this remedy I know what I say to be true. If one doubts my word, let me bring me a horse with a Blood Spavin on one leg. Bone Spavin on the other and Thoropin on both and I can make him a sound horse in six months. What I have done I can do again and what I have done others can do."

Why experiment with other remedies—when you know what Kendall's has done and can do. You can get Kendall's Spavin Cure at any druggist's, \$1.00 per bottle, 6 for \$5.00. Ask for free book, "Treatise on the Horse," or write direct to Dr. B. J. Kendall Company, Enosburg Falls, Vt., U. S. A.

1911 Grand American Handicap

THE GREATEST TRAP-SHOOTING HONOR OF THE YEAR WON WITH

PETERS SHELLS

AT COLUMBUS, OHIO, JUNE 22, 1911

By a Record Score, 99 out of 100 From 20 Yards

Mr. Harvey Dixon of Oronogo, Mo., handicapped on the 20-yard line, and shooting PETERS Factory Loaded Shells, purchased by him out of the regular stock of the Columbus Gun Club, won the most coveted honor in the trap-shooting world, together with the Inter-State Association Trophy and the \$1,000 purse. The score of 99 from 20 yards in the Grand American has never been equaled. It pays to use PETERS Shells---the kind having "Steel where Steel belongs."

 San Francisco: 608-612 Howard St., J. S. French, Mgr.
 New Orleans: 321 Magazine St., E. F. Leckert, Mgr.

udder. It should be allowed to run with the mother the first day so as to get the colostrum which serves to open up the young calf's bowels. After the second day at the longest it should be taken away, for the mother will learn to "hold up" the milk for the calf. When the calf is first young it should be fed the warm milk from the mother's udder. If the milk is very rich, some of the cream should be skimmed off and then the milk should be diluted with water.

This milk should be fed to the calf three times a day. It is a good idea to feed the calf whole milk to skim milk, and it will take about five days to make the change. Feed it about twelve or fifteen pounds of skim milk per day and put before it all the hay the calf will eat. The hay will make the calf have a large belly but that is not objectionable for what is needed is a good development of the digestive organs and well sprung ribs and the hay will surely do that. When the ration is made skim, a little grain, preferably corn meal, should be added to the skim milk to replace the fat that was in the whole milk.

ly do that. When the ration is made skim, a little grain, preferably corn meal, should be added to the skim milk to replace the fat that was in the whole milk.

SPECIAL ADVERTISING.

Wanted, For Sale, and Miscellaneous advertising under this head will be set in nonpareil type (same type below) and will be published at the rate of 2 cents per word each insertion, or 6 cents per word by the month. Count each abbreviation and initial as a word.

STUD BOOK FOR SALE.—Volumes 1, 2, 3, 4, 5 and 6 of Bruce's American Stud Book; handsomely bound; good as new. Will be sold cheap. Address Breeder and Sportsman, San Francisco, Cal.

FOR SALE.—Out of Rand's famous Mile High Kennels; Airedale puppies; Boston, French and English bulldogs; all of the best pedigreed stock in America. For further particulars, call on L. F. RAUS, 676 Monadnock Bldg., San Francisco. Phone Sutter 854.

FOR SALE OR TRADE.—Bay mare by Chas. Derby, first dam Josie D. by Joe Daniel. About 10 years old; very handsome; a good driver; gentle; afraid of nothing; a good roadster. Address C. H. JONES, 713 5th Ave., San Rafael, Cal.

FOR SALE, CHEAP.—The best bred mare in California. Bay filly, 3 years old; sound. With 6 weeks' work paced a mile in 2:20 to a cart and had just 2:00 speed. Sired by Nutwood Wilkes; 1st dam by Bonnie Direct 2:05½; 2nd dam by Searchlight 2:08½; 3rd dam by Director; 4th dam Lida W., dam of Nutwood Wilkes by Nutwood 600. Bred by Martin Carr, Nutwood Stock Farm. Address T. W. BARSTOW, 1042 Alameda Ave., San Jose, Cal.

FOR SALE, CHEAP.—One registered stallion, sired by McKinney 2:14½; 8 years old; sound. Also one imported draft registered stallion; weight 1800 pounds; 7 years old. Would consider trade on heavy mare or standard-bred mares, or fillies. Breeding and pictures sent to interested parties. Address D. A. BAKER, Hill P. O., San Diego, Cal.

FOR SALE.—Standard bred black stallion; 15.3 hands; weighs 1100. Can trot in 2:15; nice mannered; easy to drive or control; good gaited; has trotted quarters in 31½ seconds. Only 5 years old. A grand stock, race or matinee horse; choicely bred; dead game, and handsome enough for a show ring. Address all communications to K. L., Breeder and Sportsman Office.

FOR SALE.—Halley Wilkes, black mare by Count Wilkes 2:21; dam by Orator, grandson of Electioneer. An ideal road mare, trots good road gait; paces when at speed, free legged; uses no boots. With one month's training paced quarter mile in 34½ seconds, half mile in 1:12 on half-mile track. Also three and four-year-old fillies out of the same mare by Dictator 2:17. For price and particulars address W. S. CLARK, Gustine Stock Farm, Gustine, Cal.

CHOICE ONES FOR SALE.—The six-year-old black pacing mare Cella K. (trial 2:10½, at the Stadium); no record; by Arner 2:17½; dam by Direct 2:05½; second dam Carrie S., by Mambri Wilkes. This mare stands 15.2, weighs about 1050; free legged; wears six-ounce shoes all around. Is absolutely sound and guaranteed; not afraid of anything; perfectly gentle, and she will be a 2:05 pacer this year if she goes into capable hands. I will sell her with a proviso that she will pace in 2:05. This is a beautiful mare, one of the handsomest and best prospects in California. I have also a full sister to her, a jet black four-year-old, which I will also sell. She is a strong, rugged mare, and will undoubtedly be fast as her sister. For further particulars, apply to H. OLSEN, 5014 East Fourteenth Street, Oakland, Cal.

TWO GREAT SIRES.

The Bondsman

Reg. No. 37641

SIRE OF

Colorado E. (3) 2:04³/₄ champion 3-year-old of the world. Winner of the Matron, American Horse Breeder and Kentucky Stock Farm Futurities; second in Kentucky Futurity.

The Plunger (4) 2:07¹/₂ second fastest stallion of 1910.

Grace Bond (3) 2:09¹/₄ winner both Kentucky Futurity.

Creighton 2:08¹/₄ record made in 1911.

Half brother to Jay Hawker 2:14³/₄, sire of Country Jay 2:05³/₄, Susie Jay 2:06³/₄, etc.
Half brother to The Tramp, sire of Bervaldo 2:08³/₄, Trampfast (2) 2:12³/₄.
Half brother to Sorrento Todd (4) 2:14³/₄, Belle Sentinel 2:15, etc.

THE BONDSMAN 37641

BARON WILKES 2:18.
Sire of 12 in 2:10, including Bumps 2:03³/₄, Rubenstein 2:05, Baron May 2:07¹/₄; sired dams of 4 in 2:10.
SORRENTO
Dam of Jay Hawker 2:14³/₄, Sorrento Todd (4) 2:14³/₄, Belle Sentinel 2:15, Eola 2:19³/₄, Lazy Bird 2:26³/₄, Teddy Sentinel, 2:29³/₄, The Tramp (sire), etc.
4th dam Virgie—by Abdallah 15.
5th dam Lucy—by Highlander (Veech's).

GEORGE WILKES 2:22
Sire of 83, dams of 204.
BELLE PATCHEN 2:30³/₄
In great brood mare list.
GRAND SENTINEL 2:29³/₄
Sire of 23, including Nettle 2:16¹/₄, Tosca 2:18³/₄.
EMPRESS
Dam of 2 and granddam of 9.
HAMBLETONIAN 10
Sire of 40.
DOLLY SPANKER
Dam of 1.
MAMBRINO PATCHEN 58.
Sire of 25, dams of 162.
SALLY CHORISTER
By Mamb. Chorister, dam of 2 in 2:20, etc.
SENTINEL 250
Sire of 8 in list.
MAID OF LEXINGTON
By Mamb. Pilot 29.
ABDALLAH MAMBRINO
Sire of 15, dams of 42.
BIG ELLEN
By Clark Chief.

THE BONDSMAN is the only stallion that sired three new 2:10 performers with race records in 1910. In spite of the fact that he has no record, The Bondsman was a colt trotter of great merit. He was a contending colt all through the Kentucky Futurity of 1899, getting third money. This was a six-heat race and was won by Boralm. As a four-year-old he was not raced, but trotted a public trial in 2:11. As a sire he is destined to be the leading son of the great Baron Wilkes, founder of the greatest futurity winning family.
He will make the season of 1912 at

Pleasanton Training Park. **\$100** the Season with usual return privilege 1913. Season ends June 1st.
THE PATCHEN BOY 39033

Three-Year-Old Record 2:10³/₄ In a Winning Race.
Sired by the Great WILKES BOY 3803, sire of 107 in standard time.

A Genuine Race Horse and a Sire of Early and Extreme Speed.

The Patchen Boy 39033 is sire of the following:
Francis J. 2:08
Evelyn Patchen... 2:10³/₄
Scott Patchen ... 2:12³/₄
Dessie Patchen ... 2:13
Frank Patchen ... 2:13³/₄
Ruby Patchen ... 2:13³/₄
J. C. Patchen ... 2:14³/₄
Legal Patchen ... 2:15³/₄
Luelle Patchen ... 2:16
Jerry Patchen ... 2:16³/₄
Knightstown Belle 2:16³/₄
Alec Williams ... 2:18³/₄
Lois Patchen ... 2:19³/₄
Auduous the Miller 2:19³/₄
Dorothy C. 2:19³/₄
Louise Patchen ... 2:19³/₄
Dr. Warren ... 2:19³/₄
Roscoe Binning ... 2:20
Mary Patchen ... 2:20³/₄
Black Patchen ... 2:20³/₄
and 11 others in 2:30.

Dam Lady Clay, the dam of The Patchen Boy (3) 2:10³/₄, C. W. M. 2:24³/₄ (trotted to high wheels), Anglin Wilkes 2:16³/₄ over half-mile track, trial 2:09³/₄, by Metropolitan 1872, son of Hambletonian 10; second dam, Haggie Brown, by Ashland Clay; third dam, Pitty Pat, thoroughbred. The Patchen Boy was the greatest three-year-old race colt in the world, winning six straight races in the Grand Circuit the only year he was raced. His produce are good-headed and real race horses. (No tin cups.)

THE PATCHEN BOY is a beautiful black, 16.1 hands and weighs 1290 pounds. His colts are of fine size, great individuals and the kind that sell for the high dollar.

Season of 1912 at Pleasanton Training Park. Fee: **\$50** Return privilege 1913.
Both of the Above Horses Will Remain in California.

Best of care and attention given mares, but no responsibility assumed for accidents. Good pasturage at reasonable rates. For further particulars and full tabulated pedigree, address

WILLIAM J. WILSON, Manager, Pleasanton, Cal.
A Choice Collection of Kentucky Saddle Horses for Sale.

WM. HAROLD 2:13¹/₄ By Sidney 2:19³/₄
Dam Cricket 2:10

Sire of Frank N. 2:07³/₄, Janice 2:08³/₄, The Iceman 2:10, etc.
Season 1912. \$5 at first service; \$20 when mare proves with foal.

(Full brother to Sterling McKinney 2:06³/₄.)
Sired by McKinney 2:11³/₄, dam Twenty-third by Director 2:17; second dam Nettie Nutwood (dam of Hillsdale 2:15) by Nutwood 2:18³/₄; third dam by Ethan Allen Jr. 2:003; fourth dam by Williamson's Belmont.
Unimak is a beautiful seal brown; stands 16.1 hands, and weighs 1250. He is one of the finest-looking, best-bred and best-gaited trotters on this Coast. His disposition is perfect. For terms and other information, apply to this office.

HOMEPHONE PRAISED.

A new subscriber writes the Home Telephone Company under date of October 28, 1911:
"Please install a phone at my home. I did not know anything about the good points of the Homephone and was rather prejudiced against it until I began using it in my office. I use it all the time now, not only in phoning around the building, but getting outside numbers, because it saves me time and trouble. The Homephone delivers the goods."
"You know the burners of candles rited in London about 500 years ago when gas was introduced. Most of us object to changes. Possibly that is the reason why I am so late in ordering a Homephone."

The Man Who has Come Back.

The host of admirers of what the veteran war horse of the shooting game—The **Hon. T. Bill Crosby**—has done lately with his 34-inch harrel Parker gun, will be glad to read the following, viz:

- In the Eastern Handicap . . . 100 out of 100 targets.
- In the Western Handicap . . . 492 out of 500 targets.
- In Evansville, Ind., Tournament . . . 395 out of 400 targets.

Making a continuous run of 987 out of 1000 targets

The only straight score ever recorded in the **Grand American Handicap** event was made with a Parker gun, scoring 100 out of 100 at 19 yards rise. Furthermore the same Old Reliable has won the **National Championship of America** every year it has been shot for.

For information regarding small bore guns, address the pioneer makers of the 20 gauge

Foals of Mares Covered in 1911 to Trot and Pace at Two and Three Years Old.

\$2,850 for Trotting Foals.

TO BE GIVEN BY THE

\$2,150 for Pacing Foals.

California State Agricultural Society, Sacramento, Cal.

ENTRIES TO CLOSE FEBRUARY 1, '12.

MONEY DIVIDED AS FOLLOWS:

\$100 to Owner of Stallion, sire of Winner of Three-Year-Old Trot when mare was bred.

For Two-Year-Olds to Take Place at the California State Fair, 1914.

| | |
|-----------------------|-------|
| Two-Year-Old Trotters | \$600 |
| Two-Year-Old Pacers | 400 |

CONSOLATION, for horses that started in above and won no money.

| | |
|-----------------------|-------|
| Two-Year-Old Trotters | \$350 |
| Two-Year-Old Pacers | 250 |

\$100 to Owner of Stallion, sire of Winner of Three-Year-Old Pace when mare was bred.

For Three-Year-Olds to Take Place at the California State Fair, 1915.

| | |
|-------------------------|--------|
| Three-Year-Old Trotters | \$1400 |
| Three-Year-Old Pacers | 1100 |

CONSOLATION, for horses that started in above and won no money.

| | |
|-------------------------|-------|
| Three-Year-Old Trotters | \$400 |
| Three-Year-Old Pacers | 300 |

ENTRANCE AND PAYMENTS—\$2 to nominate mare on February 1, 1912, when name, color, description of mare and stallion bred to must be given; \$5 July 1, 1912; \$5 December 1, 1912; \$10 on yearlings February 1, 1913; \$10 on two-year-olds February 1, 1914; \$10 on three-year-olds February 1, 1915.

STARTING PAYMENTS—\$15 to start in the two-year-old pace, \$25 to start in the two-year-old trot; \$35 to start in the three-year-old pace; \$50 to start in the three-year-old trot. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

No additional entrance will be charged in the Consolation Stakes.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

CONDITIONS.

The races for two-year-olds will be mile heats 2 in 3, and for three-year-olds, 3 in 5. Distance for two-year-olds, 150 yards; for three-year-olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before February 1, 1913, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1911.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$5000, the amount of the guarantee, only. Hoppies will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Races for Two-Year-Old Stake and Consolation end with the conclusion of the third heat.

Races for Three-Year-Old Stake and Consolation end with the conclusion of the fifth heat.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

All contestants not winning a heat in three or awarded second position twice will be retired from the race, but do not forfeit their winnings as shown by the summary.

Entries open to the world.

A. L. SCOTT, President.

THE Stallion Registration Law which went into effect August 1st, 1911, is published in full in this issue. Its importance as a measure to prevent unscrupulous horse owners from standing stallions under fictitious pedigrees cannot be overestimated. For many years there were men who would "patch up a pedigree" to suit any owner's desires, and, under the false statements made, many owners of good mares were tempted to breed to them. In after years it was learned that the pedigrees as printed on the stallion cards were fraudulent, but there was no legal redress. Of late, however, thanks to the trotting horse publications and the vigilance of the secretaries of the various draft horse organizations, this nefarious work has been checked; but that is no reason why there are not other rascals ready to "manufacture suitable pedigrees." To prevent this class from committing this crime this new registration law to regulate the public service of stallions and jacks in California was passed by the last Legislature.

It is an excellent law for another reason, it sets forth that all horses standing for public service in this State must be licensed, and they must be advertised with their license number affixed to the description. Stallions must also be classified and defined as "pure bred," "standard bred," "grade," "cross-bred," "non-standard," or "mongrel," and it shall be illegal to print or advertise any misleading reference to the breeding of any stallion or jack, his dam or his sire.

Another provision of this law which should meet with the approval of horsemen is, that every stallion or jack, for which an application for a license is made, must pass a most rigid veterinary examination and any diseases, either transmissible or hereditary, as specified in the act, if found to exist in the stallion or jack, will be sufficient for a disqualification and the refusal of a license. The law is very explicit on this point, and, when one stops to consider what a disastrous effect the spread of these diseases (which are too common now) must have upon future generations of horses the wonder is that such a law enacted and enforced many years ago.

There are many of the States in America that have adopted similar registration license laws, and horsemen claim that the majority of colts and fillies in these places are remarkably free from disease and command higher prices than those bred where such laws are not in existence. In France, Germany, Austria, Russia, and Italy, the Government supervises the horse-breeding industry, consequently horses bred in these countries are noted for their soundness and freedom from disease; all unsound ones being destroyed.

The titles "pure bred," "non standard," and "mongrel," which confronts trotting horse breeders in this law may seem very difficult to abide by, and many owners of horses which are "non-standard" will hesitate about advertising them as such. This is not right, they should not look upon it in that way, for evidently the makers of this law did not understand the technical phrases of horse breeding. It is foolish to construe "pure bred" as only meaning a horse that is registered with the American Trotting Register Association, as some of the best and purest bred horses in the world, with the longest pedigrees, and holding some of the fastest records, including Uhlan 1:59½, Charley D. 2:06¼, Aerolite 2:07½, etc., cannot be registered under the present requirements of the Trotting Register Association. The rules have been changed a number of times since the Register was established. It would have been more sensible had they classified trotting and pacing horses as

"standard and registered," "trotting bred" and "non-standard" and not used the words "pure bred" which is misleading to the uninformed public. The words "pure bred" as used by breeders, relates more particularly to cattle, sheep, hogs and other livestock than it does to horses.

The reason why these horses are termed "non-standard" is that their sires were not "standard" and registered horses or that some of their dams were not registered when the laws of registration were more lax than at present. The name "standard" is, in a great measure, losing its significance, because many grandly-bred horses and mares that came under its caption have never earned a 2:30 record, or never sired or produced a 2:30 performer, neither have their progeny been noted as progenitors of standard speed. The sire and dam of any horse with a record, if they have never been registered, prevents their produce from attaining that honor. Some of our campaigners have earned low records in the hardest of turf battles, yet their dams may trace to some thoroughbred mare or some mare whose pedigree is untraced, hence they would be "non-standard." Performers of this kind should be favorably considered by breeders, especially, if the holder of the record has all the other requisites.

Following is a list of stallions that were licensed by the California Stallion Registration Board to and including January 10, 1912:

THE ravages of that destructive insect pest, the Mediterranean fly, wherever it has appeared, are so vast that the United States Government should pass the most drastic laws to prevent consignors of all fruit subject to the attacks of this fly from shipping it to America, and adopt the most stringent measures to prevent passengers from bringing it into any port. In places where this fly is known to exist the newspapers should be subsidized to wage a ceaseless battle against such offending corporations or individuals. On every steamship and sailing vessel placards containing the warnings and penalties for infraction of the law should be displayed in the most conspicuous places, and also be plainly printed in German, French, Italian, and the native language used in the port whence the vessel sails. The transportation companies whose officers and employes are negligent or lax in the handling of the investigation business should be held liable for heavy damages, and all passengers be compelled to sign affidavits that they have no specified "contraband" fruits, if steps cannot be taken immediately to search their baggage at such ports. If a passenger or an employe should make a false report on arrival at any port in the United States he or she should be heavily fined or imprisoned. The dangers resulting from the invasion of this fly into California can never be estimated. If it was a pest that could be annihilated by chemicals, acids, or by the introduction of other insects, the danger would not be so great, but it appears these flies are not affected by climatic changes or the usual insecticides (liquid or dry) but seem to flourish and multiply upon Paris green, sulphur, lime, potash and all other powerful and poisonous preparations. This is a vital question and should

receive the attention of the proper authorities, and every newspaper in the United States must use its influence by giving this subject all the publicity possible.

IT WILL be exceedingly gratifying to everyone interested in the light harness horse industry to learn that there were ninety-eight entries made in the Occident Stake (for foals of 1911) to be decided at the State Fair in 1914. This is just thirty-four more than was sent in last year and is the best evidence in the world that the interest in trotting and pacing in California is on the increase. A careful study of the sires and dams of these foals is an object lesson for progressive breeders, and it is no idle boast to say that in this list there are many that will be 2:10 or better performers, and the majority will get in the standard list.

IN THE State Fair Futurity Stakes No. 4, for foals of mares covered in 1911, the produce to trot and pace at two and three years old, entries will close Thursday, February 1st, with C. Allison Telfer, manager, Sacramento. There is not an owner of a mare bred last year who can afford to leave this stake out of his list of engagements for that prospective foal. The payments are very easy and reasonable and it is for a \$5000 guaranteed stake.

THE dawning of a new era in all that pertains to the trotting horse industry of the whole Pacific Coast was duly celebrated at the meeting held in this city on Thursday; for further particulars read the article, "Pacific Coast Circuit Arranged," as published in this issue. The "Breeder and Sportsman" congratulates everyone connected with it for their enthusiasm and determination to give at least fifteen weeks of racing and perhaps more in 1912.

CHANGES AT THE HOME OF DAN PATCH 1:55.

M. W. Savage, the proprietor of the International Stock Food Farm writes:

"Ned McCarr has been advanced to head trainer. McCarr has been assistant trainer on my farm for about two years and has thoroughly proven his ability by developing the wonderful speed of my sensational two-year-old, Dazzle Patch, and the exceptional speed of Liberty Patch, two-year-old Dan Patch colt,—dam Effie Powers. He has also been very successful in developing many of my other colts, including Princess Patch, winner at Springfield last fall and the three-year-old trotting filly Mary E. Patch, that was second to Jack Swift in 2:10½ at Milwaukee. He also drove my four-year-old, Pearl Patch, a mile in 2:04 last fall. McCarr also trained Hedgewood Boy 2:01 in 1910 and 1911 and George Gano 2:02 last spring and summer, and every horseman knows what Hedgewood Boy did in 1910 and what George Gano did last year and the splendid physical condition of both horses.

"I make the prediction now that McCarr will put George Gano in the 2:00 list before the close of 1912, and that he will also train and drive Minor Heir and George Gano to the world's team record this year; and I would not be surprised if he put the double record right at 2:00. I am basing this only after carefully watching his every day training all last summer. I give you these facts so that you will realize that I am expecting my farm to show still greater results than it has ever done in the past.

"Dr. Jack Seiter will have charge of my shoeing department which will insure first-class work being done in this very important branch of the business. You, of course, known of his ability and wide experience in shoeing the harness horse.

"C. W. Moseley will act as secretary of the farm and his many years' of successful work in this line specially qualify him as a dependable secretary for my farm."

Of Clifton Pilot, sire of Kate Bradley, dam of Charley Wilkes 2:21¾, sire of Carlotta Wilkes (dam of Carolkin 2:07¾, Volita 2:15¼, etc.), Jos. Cairn Simpson wrote in 1895: "I owned Clifton Pilot. I bought him of M. S. Patrick, then living in Chicago, and sold him to C. A. Voght, of Iowa City. Some of the turf papers claim that the dam of Clifton Pilot was untraced, but I feel sure that is an error. He was bred in Kentucky and my impression is that Mr. Patrick bought him of his breeder. At all events, he got the pedigree with the horse which he gave me, and I turned it over to Mr. Voght. According to my recollection, Clifton Pilot was by Pilot Jr. 12, out of a mare by Whip Comet, grandam said to be of Messenger blood. C. S. Dole, of Chicago, had a mare called Bacchante Mambrino, which I think was from the same mare as Clifton Pilot or the sister of Clifton Pilot's dam." [This mare Bacchante Mambrino was the dam of Kitty Lewis (dam of Bob Sprague 2:24¾) and she was out of Grey Bacchante, whose dam was by Whip Comet out of a mare said to be by Messenger, and was owned by R. A. Alexander, who sold her daughter, Bacchante Mambrino, to C. S. Dale of Chicago. The probabilities are that Clifton Pilot and Grey Bacchante were half brother and sister.—Ed.]

THE GOLDEN OPPORTUNITY IS HERE.

If, in May, 1906, one had predicted that in less than six years there would be a greater interest taken in San Francisco than there was then, and that it would be the pivotal point to which the people from all parts of the world would center their thoughts, the prophet would be looked upon as demented. At that time the entire business center and one-half of the residential section were in ashes and the inhabitants were endeavoring to see their way clear to rebuild the city they loved. The spirit of determination and courage which pervaded the entire community was so remarkable for its aggressive strength and undaunted power that even to this day it is a source of wonderment to all who realize what was accomplished by it. The work of tearing down dangerous walls, clearing away debris and hauling the thousands of tons of this waste material to make new land along the shores of the Bay of San Francisco gave employment to thousands of men and horses. These were also employed in bringing in building materials of all kinds from railroads and wharves. The work of rehabilitation continued until rows of modern fireproof buildings and magnificent skyscrapers replaced the old wooden houses which were destroyed. There was much to be accomplished and the wonder of it all is that so much was done so well. Every month since, millions have been spent in buildings of the finest class, until San Francisco is considered to have a greater proportion of absolutely safe structures for the number erected of any city in the civilized world.

Three years ago there were scores of these buildings untenanted and business of all kinds came to a standstill. Even building operations, in a great measure, ceased. San Francisco was struggling with its exposures of boodling Supervisors, graft trials, and bribery cases. Then a new political power came into office and "gloom" settled like a pall upon many capitalists and business men who felt that they were powerless to resist the increased taxation that would follow this new administration; they decided not to build or loan money upon any vacant property, hence dull times followed.

About two years ago the Chamber of Commerce and most of our leading bankers saw this condition of things. They decided, that to revive a greater interest in San Francisco and instill confidence in the minds of all who were struggling against great odds, that something should be done toward holding a world's exposition here at the time of the completion of the Panama Canal. The idea took root like good seed on fertile soil. The daily and weekly press took the work up and immediately enlisted the attention of the general public by paving the way for making a campaign for it. Everybody in America knows how vigorously that battle was fought and won, and that the enormous sum of \$25,000,000 was subscribed to carry this great undertaking on.

In 1911 we had another election, and those who were elected to take charge of the affairs of this municipality then are men noted for their strong business principles, integrity, ability, optimism and "determination to do things." They are working shoulder to shoulder with every organization for the betterment of this city and for its advancement, while helping the Panama-Pacific Exposition Committee to carry out its stupendous task.

Since this election, our architects have been busy planning and designing homes, fine buildings, and hotels and apartment houses on the acres of vacant land in the burnt district. The seventy thousand men with their families who once occupied the most beautiful residences near the center of our city moved shortly after the disaster to Oakland, Berkeley, Alameda, and other bay cities, or down the peninsula as far as Redwood City, or out toward the Golden Gate. They want to "come back," and, as fast as suitable buildings are erected for them, they will. This is only one of the many building operations contemplated, although it means the expenditure of immense sums of money during the next three years.

The United States Government buildings, treasury, and others, will be started in a few months; then there are scores of other large business buildings, the foundations for which will soon be laid. The erection of an immense railroad depot with its miles of track stretching out in all directions will also be finished before 1915. A new City Hall in our civic center, with a great auditorium building, an opera house, library, and other buildings built on a scale of grandeur in keeping with the class of buildings already erected in this city, will soon be started. To get sufficient ground to make this civic center second to no other in America considerable land already covered with buildings will have to be purchased and the buildings thereon razed.

Besides these improvements involving the expenditure of many millions, tunnels are to be made through several of our steepest hills, thus shortening the distance to be traveled by thousands who live in densely populated sections but have business in our city. Many hills are to be graded and leveled, the material from them to be used to fill in part of the seven miles of cemented bulkhead along the shores of our beautiful bay. The ferry depot is to be enlarged and our wharfage facilities increased to afford room for the large number of vessels that will enter this port for all time to come. Nine millions of dollars have been appropriated for harbor work alone.

New streets, railways, sewers, and immense reservoirs are to be built. Our great water supply system is to be purchased and vast sums of money will be used in enlarging it to meet the demands of this city and suburban cities. Schools, churches and lodge buildings are to be erected and new parks laid out; many boulevards will be made and beautified with

ornamental trees; and, in fact, San Francisco from San Mateo to Black Point, and from the Bay to the Pacific Ocean, will be put in perfect order before the Panama-Pacific Exposition throws open its gates to the world.

The \$25,000,000 set aside for this latter undertaking is said by conservative men to be just about one-fourth of the amount that will actually be expended by the time all the buildings and surrounding improvements are finished. Almost every nation and country on the globe will have its building, representative of its architecture, to hold the exhibits sent. The Exposition Committee has commissioned many representatives to go around the world provided with literature to arouse an interest in it. These missionaries report that everywhere they visited their receptions were most cordial and the people have manifested their desire and determination to have exhibits of their best productions shown in buildings they will construct. Some are asking for space. The Chinese Government desires forty acres.

The Exposition fever on this Coast is spreading like an epidemic and its effects are being felt in all our cities, towns and villages. Companies are being incorporated to harness our rivers and mountain streams for the purpose of supplying electricity for the demand they know must come. Interurban electric lines are being built and extended into our remotest valleys; rivers are being widened and dredged; lateral canals built and dams constructed to save the waters for irrigating purposes. Wells are being sunk for oil and many valleys are turned into reservoirs for the precious fluid. Large farms are being surveyed, divided and subdivided to meet the demands of the vast immigration that is pouring in by steamer and railroad, so the citizens in the interior cities and towns are striving, as they never did before, to get people of means and experience to buy up the rich lands surrounding these places and begin farming, dairying or stock raising.

All these great changes and improvements portend a revival in every branch of industry everywhere. In San Francisco, where so much is to be accomplished, it is presumed that there will be more men employed and more horses and wagons and carts used than was ever known before. Laborers and skilled workmen we can get, but horses will be difficult to find, for the constantly growing demand in the interior has been a big drain on the supply. Therefore, when contracts are let for grading and hauling away materials and bringing in the hundreds of thousands of tons of iron, stone, brick, cement, etc., and the millions of feet of lumber, there will be buyers sent to all parts of California, Oregon, Washington, Nevada, Idaho, Wyoming, and Utah for horses for this work. To supply hay and grain for this unprecedented number of horses will be another difficult problem to solve. So farmers and stock breeders have much to anticipate. And the man who has the means to buy some extra horses and mules will have no reason to regret it, for this "boom" will last nearly three years, and the demand for good ones will always be greater everywhere than the supply. While San Francisco must, necessarily, be the principal market for horses, there will be buyers from the interior attending the horse sales to supply the half-million or more newcomers who will settle in California before 1915.

The millions of dollars lying idle in our banks and safe deposit vaults will be drawn upon and put into circulation. Every manufacturer, merchant, property owner, farmer, mechanic, and laborer will feel the effects of this movement to make San Francisco the greatest city outside of New York in America. It will be the well paid work of tens of thousands of energetic men in all walks in life who will strive unceasingly to place it among the greatest commercial cities of the world. Geographically, it has the advantage over all others facing the Pacific Ocean. It has the finest and safest harbor in the world; its climate is the most equable, while topographically it has advantages very few cities possess; and, as the doorway of the Occident and the Orient it has no rival. Now that its citizens have awakened to its many possibilities and realize what they can accomplish by concerted effort, it is for them to bury all past differences, silence the cry of hard times, and push on the great work which calls for the expenditure of almost ninety millions of dollars in three years. The citizens of San Francisco and the country at large have just cause for feeling jubilant and optimistic, for the golden opportunity which Dame Fortune has left at the threshold of this favored city by the sunset sea is ours if we only grasp it.

Charley Dean's string of horses is increasing at a remarkable rate of speed. Frank Perry, p., 1, 2:15; the kindergarten phenom, is at the farm, and is one of the recent noted purchases by Dean for the Canadian magnate, R. J. MacKenzie. He also bought one three-year-old, five two-year-olds, and a yearling. They consist of Burnewin, 1, a trotter, by Ess H. Kay, p., 2:00½, dam by The Beau Ideal 2:15½; the following two-year-olds: Spriggen, by Baron McKinney, 3, 2:10¼, out of Helen Simmons 2:11¼; Zenatello, by Bellini 2:13¼, out of Katherine Hamlin, dam of four, by Mambrino King; Baroness Ceres, by Baron Review 2:21¼, out of Arla Axtell 2:29¼; Baroness Psyche, by the same sire, and out of Durnella 2:18¼, and Red Sheet, by Mainsheet 2:05, dam by Axworthy, 3, 2:15½. The three-year-old is by Bellini 2:13¼, and was consigned to the sale as a pacer, but refused to hit a lick at that way of going. He took a notion to trot before the lead pony at the Old Glory and showed just \$625 worth. His dam was the one-time \$10,300 beauty, Miss Previous, which was sold at the time for that price as a yearling.

SUNFLOWER 2:24, BY ELMO 2:27.

Editor Breeder and Sportsman:

In your "Answer to Correspondents" of your issue of January 13th, attention was called to a mare called Sunflower by Elmo, dam Ella Kellogg by Chieftain. I remember Ella Kellogg well for I passed upon her for the late Calvin Kellogg when he purchased her from the late Frank Chapman, then a stable keeper in Sacramento, and later proprietor of the Norfolk stables on Ellis street, San Francisco. I have driven her, and, in fact, I named her Ella Kellogg merely as a stable name, as she was then kept in my stable, 409-411 Taylor street, "The Club Stable." I named her knowing that Mr. Kellogg's charming daughter's name was Ella, and both she and the mare were handsome blondes. Hence I called the mare Ella Kellogg. She was an elegant roadster, either single or double; if she were not, Mr. Kellogg would never have owned her, as he was an expert behind one, two, three, or four horses. He drove her about two years on the San Francisco driveways. One day while his man was leading her from Martin O'Dea's blacksmith shop, she received an injury, and later, upon my advice, Mr. Kellogg bred her to Elmo and the mare Sunflower was the result.

When Mr. Kellogg purchased the mare from Mr. Chapman the latter gave her breeding in the presence of the late George Condon and myself as by Chieftain, dam by Rifleman, son of Imported Glencoe. I believe that was her true breeding. So if the above is of any value to the horse breeding public all well and good, but I hope my version of this breeding will not lead me into another controversy, or that some individuals will claim I am a "rambler," etc., as I would rather take a scent of Mag-po-tine than to have my Scotch-Irish blood disordered by fighting for my rights when I know I am in the right. Whenever such accusations are made I will not quit as long as money and power lasts. Another thing, I never allow myself to become over-sanguine about any one claim where there is a single doubt in my mind.

The above breeding I have and always will believe to be Ella Kellogg's true breeding. Mr. Kellogg gave the same when he sold her to the late Henry W. Seale, and I worded the same to E. J. Travis and the late Monroe Salishury, and later on, in conversing with the late W. S. Hobart over my choice of the daughters of Director as speed-producing mares, I at all times named this mare, Director's Flower, as she showed me the marks of a great speed-producing mare, for I believe she carried a double cross of the blood of Glencoe, one of my favorites of all the thoroughbred sires, for his blood blended so harmoniously with certain strains found coursing through the veins of many trotting horse families. Director's Flower never joined the late Hobart Farm harem and I believe every one interested knows why she didn't. Her opportunity to fulfill my predictions as a speed-producing mare, I am at a loss this moment to know.

Sincerely yours,

SAMUEL GAMBLE.

NOTES FROM MARYSVILLE.

Attracted by the new track, which horsemen claim is the fastest on the Northern Circuit, more than twenty horses have been stabled at the Marysville grounds and the local stables bid fair to be the Mecca for much racing stock during the winter months. The track is in good condition and the horses are worked out daily.

Among the horses of note stabled here for the winter are the two stallions of J. F. Elwell, Junior Dan Patch and Vareol. The former was sired by the famous Dan Patch and the latter by the well known Nutwood Wilkes. Junior Dan Patch brought in his owner \$2,950 the past season, pacing second in the \$5,000 purse at Portland. Vareol is kept more for breeding purposes.

William Duncan, who earned an enviable reputation as a driver last season, has a string of horses in his care at the local track, among them being Mahel, owned by George Magruder, who won \$1,950 in the past season. Her record is 2:15½. Aeroletta, a two-year-old, owned by William Harkey, of Gridley, has a record of 2:21, having won in the past season the Breeders' Futurity and Oregon Futurities. Sir John S., owned by Willard Vance, with a record of 2:04¼, is stabled in Marysville. Other promising horses at the track are the four-year-old Marline, owned by Dr. Randolph, of Williams; George Woodard 2:07½, belonging to Dr. Merrill, of Colusa, and Diawood, the property of John Hanna, of Colusa.

John Renatti has a string of promising colts in training at the Marysville track, the home of his horse, Monteo.

Following is the schedule for the Grand Circuit adopted at the last meeting of the Board of Stewards in New York City: Grand Rapids, July 8-13; Kalamazoo, July 15-20; Detroit, July 22-27; North Randall, July 29-Aug. 3; Buffalo, Aug. 5-10; Pittsburg, Aug. 12-17; Salem, N. H., Aug. 19-24; Readville, Aug. 26-31; Hartford, Sept. 2-7; Syracuse, Sept. 9-14; Michigan, Sept. 16-21; Columbus, Sept. 23-Oct. 5; Lexington, Oct. 8-19.

James E. Hague, the veteran turfman and driver of harness horses, known all over the United States, died at Los Angeles on Tuesday. Hague, who was 61, formerly lived in Peoria, Ill., and drove many horses to victory on the Eastern tracks. For several years he had lived in retirement in Los Angeles.

STATE AGRICULTURAL SOCIETY.

STATE AGRICULTURAL SOCIETY.

The following entries in Occident Stake of 1914 closed January 1, 1912:

- D. L. Bachant's Athleen, by Athasham-Corrine Neilson.
- J. L. Balkwill's Boulet, by Stamboulet-Estrella B.
- E. M. Barber's foal, by Prince Ansel-Everette.
- Mrs. S. V. Barstow's Ali McKinney, by Nearest McKinney-Mrs. Weller.
- Mrs. S. V. Barstow's Miss Hayes, by Bon McKinney-Maud J. C.
- H. A. Bassford's Helen J., by Palo King-Lulu B.
- Geo. T. Beckers' Zomie, by Zombro-Lady Seretay.
- Geo. T. Beckers' Zomie Beck, by Zombro-Cyrena.
- Geo. T. Beckers' foal, by The Bondsman-Lady Van Zom.
- W. V. Bennett's foal, by Bon Voyage-Clara Collins.
- I. L. Borden's foal, by Barney Barnato-Hester McKinney.
- I. L. Borden's foal, by Barney Barnato - La Belle Altamont.
- Bowman & Maurer's Kinworthy, by Prince Axworthy-Malverna.
- Alex Brown's foal, by Prince Ansel-Nutflower.
- Alex Brown's foal, by Prince Ansel-Arista.
- Alex Brown's foal, by Nuristo-Anselois.
- Alex Brown's foal, by Nuristo-Zanita.
- E. O. Burge's Grace B., by Stam B.-Princess Eulalie.

Occident Stake of 1912.

Following is a list of payments made January 1, 1912:

- Mrs. S. V. Barstow's Belle Ammen, by Nearest McKinney-Aunt Joe.
- W. G. Durfee's Consuelo B., by Del Coronado-Beatrice.
- Alex Brown's foal, by Prince Ansel-Serpolo.
- Alex Brown's foal, by Prince Ansel-Bonnie Derby.
- Alex Brown's foal, by Nushagak-Nosegay.
- Estate of Frank H. Burke's Mabel Claire, by Conductor-Lady Belle Isle.
- A. G. Dahl's Zomjud, by Zombro-Judith.
- E. D. Dudley's Enchalada, by Palite-Paprika.
- W. G. Durfee's foal, by Carloklin-Lady H.
- Robert Garside's Chanate, by Alconda Jay-Dora McKinney.
- J. Arthur Hardy's Miss Helen, by Greco B.-Fannie G.
- D. W. Wallis's Sissy, by Greco B.-Josephine.
- Hemet Stock Farm's Wilbur Lou, by Kinney Louise Carter.
- H. S. Hogoboom's His Highness, by Palo King-Queen Alto.
- S. H. Hoy's Busy Body, by Iran Alto-Diawaldia.
- Jos. D. Cornell's Queen Ansel, by Prince Ansel-Nuvola.
- A. L. Scott's Nutwood Lou, by Nutwood Wilkes-Cora.
- F. E. Ward's El Bell Maden, by Almaden-The Silver Belle.
- I. L. Borden's Albaloma, by Almaden-Loma B.
- J. H. Torrey's Joe Todd, by Baronteer Todd-Bessie T.
- D. L. Bachant's Soison, by Athasham-Soisette.
- J. W. Zibbell's foal, by Tom Smith-Kate Lumry.

Occident Stake of 1911.

Following is a list of payments made January 1, 1912:

- D. L. Bachant's Fresno Maid, by Athasham-Corinne Neilson.
- L. E. Barber's Burke, by Lord Isle-Madge.
- Mrs. S. V. Barstow's Mc McKinney, by Nearest McKinney-Aunt Joe.
- Mrs. S. V. Barstow's Lady Alto, by Alto Express-Mrs. Weller.
- Geo. T. Beckers' Zomie's Secretary, by Zombro-Lady Secretary.
- Geo. T. Beckers' Zomie Gray, by Zombro-Trott McGrath.
- L. G. Bonfilio's foal, by Del Coronado-Atherine.
- I. L. Borden's foal, by Barney Barnato-Hester McKinney.
- I. L. Borden's foal, by Barney Barnato-La Belle Altamont.
- Bowman & Maurer's Peter Huck, by Blue Peter-Malverna.
- Brolliar & Garver's Direct Policy, by Best Policy-Brownie Direct.
- E. M. Barber's Arista Ansel, by Prince Ansel-Arista.
- Alex Brown's foal, by Prince Ansel-Lottie.
- Alex Brown's foal, by Prince Ansel-Lauress.
- L. E. Daniels' The Voyager, by On Voyage-Nocha.
- Dr. M. C. Delano's Elco, by Lijero-Iran Belle.
- J. F. Heenan's Doratine, by Del Oro-Lady Valentine.
- E. D. Dudley's Truthkin, by Carloklin-Truth.
- E. D. Dudley's Hazel Bee, by Palite-Bee Stirling.
- E. D. Dudley's John Rice, by Palite-Paprika.
- W. G. Durfee's foal, by Carloklin-My Irene S.
- W. G. Durfee's foal, by Carloklin-Lady H.
- W. G. Durfee's foal, by Carloklin-Beatrice Zombro.
- W. G. Durfee's foal, by Del Coronado - Roberta Madison.
- W. G. Durfee's foal, by Del Coronado-Iran Belle.
- E. E. Sherwood's Threnzi, by Carloklin-Mowitza.
- L. W. Polson's Zee Todd, by Baronteer Todd-Grace T.
- Hemet Stock Farm's foal, by Geo. W. McKinney-Mamie Redmond.
- Hemet Stock Farm's foal, by Geo. W. McKinney - Lady Zombro.
- Hemet Stock Farm's foal, by Geo. W. McKinney - Louise R.
- W. J. Irvine's California Mc, by McKena-Ever Green.
- E. P. Iverson's Ellen Lou, by Kinney Lou-Queen Karen.
- E. H. Nason's Fowler, by Silente-June.
- J. F. Nichols' Dexter Lou, by Kinney Lou-Alma Dexter.
- A. L. Scott's Bon Prix, by Bon Voyage-Cora.
- C. A. Spencer's Star Ansel, by Prince Ansel-Noraine.
- John Sugllan's Hazel Smith, by Tom Smith-Hazel Mac.
- Jas. Thompson's foal, by Nobage-Zombell.
- Ted Hayes' Zombowage, by Nobage-Zombowette.
- Vendome Farm's B. Rea, by Nearest McKinney-Eva B.
- F. W. Wadhams' Johano, by Carloklin-Johanah Treat.
- Geo. L. Warlow's foal, by Athadon-Cora Wickersham.
- Geo. L. Warlow's foal, by Stamboulet-Soisette.
- F. E. Wright's La Ampola, by Prince Ansel-Idora.
- J. W. Zibbell's foal, by Tom Smith-Kate Lumry.

WHAT TO DO WITH A STALLION.

Parties who own stallions, and contemplate giving them proper opportunities—by this we mean, securing for them a liberal patronage of well-bred mares, and at the same time deriving satisfactory monetary returns—should commence not later than the latter part of this month, to judiciously advertise them. Gentlemen with business acumen have fully learned the salutary lesson, that it does not answer the purpose to keep their property practically hid. Experience has thoroughly demonstrated the fact, that no matter how well bred a stallion is, or how promising his get are showing, it is absolutely necessary to let the public know something about him and his location as well, and furthermore, that of two horses of about equal qualities, the one advertised judiciously and the other not, the former will, in a surprisingly short time, eclipse his competitor and demand a larger fee as well as secure an increased patronage. Never fear that your horse will be too well known. That is a state of affairs as yet unheard of. If your property is practically worthless, it is true that the least said relative to him is really the better but again, if he has quality and is not advertised, nine people out of ten will naturally conclude that he is worthless and the owner tacitly makes an admission of the fact by not advertising him. George Wilkes 2:22, founder of a great tribe, was not extensively advertised until he was about seven years of age, and it can be truthfully said, that his career as a stallion dated from that time. The merits of Electioneer were unrecognized until he had attained almost the same age. Either of these two wonderfully successful sires could have, in all probability, made his owner a snug sum long before that time. The same holds good with many other horses,

which, if properly advertised and thereby furnished the opportunities early in life, would have exceptionally bright chances of becoming popular with the breeding public; otherwise, if their good qualities are not made known, they remain in obscurity.

Our most successful stallion owners contend, that if a horse is worth keeping entire, he is worth the very best opportunities that may possibly be provided him and if the owner does not intend to do this, the animal should be castrated.

Occasionally an advertisement does not appear to pay, but in such isolated cases the owner is invariably to blame, for the simple reason that he overlooks chances to be of assistance to the publication carrying his business by not following up promptly, the inquiries made relative to his property.

Again, your stallion may be a trifle slow in getting expected results, but if properly advertised, the time comes when his reputation receives general acknowledgement, and the public will come your way in numbers.

If you have confidence in him, you will, by advertising him, give others confidence as well. The average individual is naturally of the opinion that an owner has but little respect for his property, if he lacks advertising proclivities and we must admit that we are of the same class.

If a horse is really good, a liberal supply of type matter will advance him in the estimation of the public quicker than any other known way. While some of our readers may think these statements rather far fetched and written solely to advance our own affairs, we but ask them to study the situation and see how many stallions ever became famous without being advertised. While there may be one or two cases, they acquired success when practically too old to be of much service.

This is not what the 1912 individuals desire. They want their property to secure reputations while in the full bloom of youth, and prove remunerative investments.

No one desires a horse, endowed with the true elements of greatness, to pass the period of his youth and vigor in obscurity, and then—figuratively speaking—flame up like a dying candle, at the very end of his career. It is no satisfaction whatever to an owner, to hear remarked, "That he had unquestionably a great sire, if afforded proper opportunities during the useful years of his life," yet it has undoubtedly been the sad fate of many a truly great horse, through the fact that, unfortunately, he was the property of an unenterprising owner.—American Sportsman.

FANELLA 2:13 A WONDERFUL MARE.

Referring to Fanella 2:13, the celebrated daughter of Arion 2:07½ and Directress 2:19, by Director 2:17; second dam Aloha (dam of King Buzz 2:23¼, etc.) by A. W. Richmond 1687, that has made such a marked impression upon the records, an exchange pays her the following deserved tribute: "Fanella had already done much to place her name high on the roll of honor by producing such horses as Sadie Mac 2:06¼, a winner of the Kentucky Futurity and an unbeaten stake winner as an aged mare until she fell dead in a race, and the wonderful sire, Todd 2:14¾, that in a few years has done enough to keep his memory green for many years to come, despite the fact of his untimely death, just when he seemed to be entering on the threshold of one of the most successful stud careers that a stallion ever enjoyed.

"But in 1911 she increased her standard list to five, by the addition of the young stallion, Toddington, that took a record of 2:20, and the yearling colt, John E. Madden, that dropped into the list with a record of 2:27¼. But it does not stop here, for Toddington also obtained a high place as a sire by his first crop of yearlings. But one of them was trained for a record, but that one was Frank Perry (1) 2:15, the world's champion yearling, and the first yearling to reach the 2:15 mark. Another yearling, a trotter, stepped a quarter in 33 seconds, and she most certainly had the capacity to trot a mile in standard time and possibly considerably better than that. Still another yearling was one of the most sensational in Kentucky early in the season, but was not worked later in the year. Todd added further laurels still to his already full crown, for he was represented by four trotters that took records within the 2:10 list, his standard list increased by several new names. Three of the quartette of new 2:10 trotters secured their records in races, Al Stanley 2:08¼, Gordon Todd 2:09¼, Electric Todd 2:09¼, and the fourth, Sue D., time record 2:08½, obtained a race record of 2:11¼. And that he is destined to breed on was proven by his granddaughter, Princess Todd (2) 2:12½, the best two-year-old of the season by far."

The Rural Spirit of recent date, in leaded lines and surrounded by a conspicuous border, publishes a communication which reads as follows: "I am very much pleased to hear that you are going to leave the race-horse business out of your paper. That is something the farmer does not want." Poor, misguided scribbler! He is just one of his class, and probably the sole surviving member. As to the farmer not caring for harness racing, that is all bosh. Racing in the west is practically supported by the farming community.—Horse Review.

Bon Volonte 2:19¼ won a matinee race last Saturday in Los Angeles in 2:20 and 2:20.

NOTES AND NEWS

Chas. Durfee will train his horses at San Jose this year.

Have you been to Studebaker's to see those Toomey carts and Frazier sulkies?

Chas. de Ryder made a flying trip to Portland, Oregon, on Tuesday. He will return in a few days.

Daughters of Diablo 2:09½ produced two new 2:10 performers in 1911—Little Lucille (3) 2:09 and Ginger 2:10.

R. J. MacKenzie and wife visited Pleasanton last Saturday and were well pleased with the way their horses looked.

Some years ago there was an auction sale of horses from the Boord ranch, Orland, Cal. Can any of our readers loan us a copy of the catalogue issued for it?

J. B. Iverson's mare, Mamie Riley 2:16, dropped a fine, lusty little filly by Clear Voyage (son of Bon Voyage 2:08), last Saturday at Salinas. It ought to be a good one.

Elmo Montgomery and Frank Childs are busily engaged driving their strings of trotters and pacers on the Sacramento track. This course has been in perfect order all winter for exercising horses.

William L. Snow has driven seven pacers to records below 2:05. Darkey Hal 2:02½, Fanny Dillard 2:03½, Hal Raven 2:03½, Zombrewer 2:04½, Hal B 2:04½, Star Hal 2:04½, Star Patchen 2:04½.

Thomas W. Murphy put six trotters in the 2:10 list during the season of 1911—Charley Mitchell 2:04½, Belvasia 2:06½, B. T. C. 2:06½, Cascade 2:08½, Vanity Oro 2:09½, and Eva Tanguay 2:09½.

Alcantara, by George Wilkes, is the sire of six pacers in the 2:10 list and the sire of 14 dams of 2:10 pacers. Gambetta Wilkes has 16 pacers in the 2:16 list and is the sire of six dams of 2:10 pacers.

McKinney 2:11½, is now the great grand-sire of a 2:10 performer, Palo King, by the dead Zombro 2:11, sired Little Lucile (3) p. 2:09, a good little winner of the past season.

Noretta by Norris (dam of Lady Maude C. 2:00½, and Hedgewood Boy 2:01), has a weanling colt by General Watts (3) 2:06½, and will be returned to him. J. C. Henry, of Taylorville, Ill., owns the mare and colt.

Absolute dispersal of the entire breeding interests of the Uhlien Farm will take place at the Wisconsin State Fair grounds, Milwaukee, Wis., March 20, at public auction. This includes ten Harvester yearlings.

Fred H. Chase & Co., the well-known auctioneers, will hold their annual Spring Combination Sale on March 18th. The market is good and owners should avail themselves of this opportunity to consign them to this sale.

Wm. J. Wilson, the manager of the Tip Top Ranch stallions at Pleasanton, writes that The Bondsman served his first mare last Friday. Her name is Midget by Carmichael's Prince out of Dewdrop by Norfolk, and belongs to L. C. Gates, of Modesto, Cal.

Wm. J. Kenney has a number of sulkies and road and jogging carts for sale at remarkably low prices. Seekers after these will have rare opportunities to make selections from his stock at 531 Valencia near Sixteenth street.

Mr. A. V. Mendenhall has sent us one of the shoes worn by Prince Alert 1:59½ when he was driven by the late Jack Curry at the Empire City track, New York, in 1904. It will be placed beside another curio in this office, i.e., one of the shoes worn by Lady Moscow, the famous old trotter, in 1850.

Ted Hayes is handling an eight-months-old filly called Bertha E. Brown. She is by Carlok in 2:07¾, out of Belle Pointer (dam of Boton de Oro 2:11½) by Sky Pointer. This filly is a very pretty gaited trotter, worked a quarter in 55 seconds and loves to stick to that way of going.

Bon Voyage's best race last year was not his winning race at Woodland, but at Marysville, the following week against Kingbrook; he trotted the first heat in 2:07¾, second in 2:08¾ and the third in 2:09, coming the last quarter faster than any other in the three heats.

The greatest curse our pure bred live stock breeders has to contend with is the commission men, who do business under their hats and make it a point to pick up ring-tails and rough necks and dump them into the Hawaiian Islands. San Francisco is now, and has been for some time, overrun with these unscrupulous gentry.—Butchers' and Stockpawners' Journal.

Zomboyage, by Nobage, out of Zomboyetta, was worked by his owner, Ted Hayes, over the Los Angeles track last Monday a mile in 2:33¾, and a half in 1:13. He can beat 2:30 any time and will not be a two-year-old for some months.

There seems to be a scarcity of high-class trotting horses for the Midwinter sale in New York next month. Owners realize that, as a money-making proposition, there will be plenty of opportunities this year for their trotters and pacers to engage in.

After C. McCarthy inspected Tom Smith 2:13¾, at San Jose, he declared he was one of the finest made McKinneys he had seen and immediately decided to breed his handsome mare Schoolgirl, by Prudigal 2:16, to him this season.

Our "Breeders' Number" to be issued March 2d will contain many articles of interest, and for owners of stallions that are to stand for the season of 1912, it will be the best medium they can have to let owners of mares know the merits of their horses.

Charles Durfee recently bought a half interest in two Sidney Dillon mares from George Stickles, of Angels Camp; one is out of a mare by Silver Bow 2:16, and the other is Ascania, full sister to Custer 2:05¾.

Maurico, the wonderful three-year-old at Los Angeles, is claimed by competent judges to be the fastest horse of his age in California. He will be prepared by W. G. Durfee for the Eastern stakes. Last summer he trotted eighths in fifteen seconds, and he was only two years old then.

How highly Kentucky Todd (3) 2:08¾, the noted young stallion owned by Miss K. L. Wilks, of Galt, Ont., is thought of, is shown by the fact that three of the best-bred and producing matrons of Patchen Wilkes Farm are booked to this son of Todd.

A number of cases of glanders have recently been discovered in Tulare county by State veterinary officials, and the animals killed. Dr. George Gordon, livestock inspector of Kings county, also discovered several cases of glanders and farcy in his county during December.

Henry Helman, who has charge of the Salinas race-track, has made many improvements there. With his well known reputation for keeping everything neat about his horses, he has thoroughly cleansed the stalls; and the "boys' eating house is as clean as any dining room can be.

Fred Ward has a colt at Los Angeles called Eagle M., by Escobado, out of a mare by Direcho; second dam by James Madison 2:17¾, that worked a quarter in 37 seconds last Monday. He is not two years old, and is a very promising trotter. His dam having died when he was a foal; he was raised on Eagle brand milk, hence his name.

The Pacific Horse and Sportsman's Review a publication which succeeded the Horse Department of the Rural Spirit, published in Portland, Oregon, made its initial bow last week. It is a neatly printed, well edited journal and will doubtless fill a long felt want in horse circles in the northwest. John McClintock is the editor.

From the present outlook the 2:05 pace should be a hummer next year. Such pacers as Don Pronto 2:05½, Teddy Bear 2:05, Adam G. 2:05½, Sir John S. 2:04½, Jim Logan 2:05¼, Blanche 2:06¾, Dr. B. P. 2:06¼, Hal McKinney 2:06¼, Gracie Pointer 2:06¼, Aerolite 2:07¼, Inferlotta 2:04½, and Francis J. 2:08, would surely make some horse race.

Last Saturday, Mr. J. B. Iverson, well known trotting horse enthusiast of Salinas, had the misfortune to lose a fine foal by The Bondsman from his prize-winning mare Ivoneer, the dam of the stake winner North Star 2:11½. Mr. Iverson philosophically writes: "These things occur in the breeding business, so we will have to bear the loss gracefully."

Congressman James B. Cox, of Dayton, O., and representing the Third District, was the chief speaker at the annual meeting of the Springfield Matinee Club and early in his remarks stated that he had always been a great admirer of King Solomon because the record showed that he owned something like 40,000 horses while he had only about 800 wives.

It is with regret trotting horse enthusiasts on this Coast will read of Frank Wright's retirement from the ranks of breeders. In this issue he offers all the well bred horses he owns, including that grand stallion Lijero 2:15½, several broodmares, and some promising "prospects." Whoever buys Lijero will have a horse that will pay for himself the first season, for he is just the type of a stallion to breed to.

Formal acceptance of the invitation to become a member of the Grand Circuit, the changing of the \$21,000 Kentucky Futurity to a two in three instead of three in five heat event; creating a four-year-old division for the futurity to be worth \$5000 and a gold cup, were the features of the session of the stockholders of the Kentucky Trotting Horse Breeders' Association at Lexington last Tuesday. President Ed Tipton and other prominent harness turfmen were present and the session lasted throughout the afternoon. The directors will change the class of the Transylvania stake at the April meeting.

It is time that the horsemen of the valley were considering the proposition of a horse show. If it is intended to hold one it is high time that a start was made in the matter. In recent years the committee in charge has always been hampered by starting too late. The matter can easily be decided by calling the principal horse owners together for a discussion.—Livermore Herald.

Grand Circuit harness racing will undergo important changes next summer as the result of action taken at the annual meeting of stewards last week. In the allotment of dates New York City and Pittsburg are admitted to the circuit, Lexington, Kentucky, is invited to join, Columbus is reinstated, while Indianapolis is withdrawn and is out for the coming year at least.

There is a well-founded report from Lexington that a syndicate of Minnesota horsemen and breeders recently offered W. E. D. Stokes, owner of Peter the Great 2:07¾, the sum of \$100,000 for the noted sire, and the report further states that "the offer was promptly declined." With the above also comes the report that a group of wealthy horsemen have made an offer for the entire farm and the stock thereon.

Haggie Brown, the grandam of The Patchen Boy (3) 2:10¾ was by a non-standard stallion called Ashland Clay, a son of Curtis' Clay. Ashland Clay sired Geogie M. 2:15¼ and Little Frank 2:19¾, and the dams of Don S. 2:04¼, Martha Marshall 2:06¼, Gordon Prince Jr. 2:07¼ and many others. This makes Patchen Boy's pedigree much stronger than it appears in the advertisement.

T. J. Crowley, one of the directors of the P. C. T. H. B. Association, was a visitor at the new Los Angeles race track last week, and reports it to be one of the best he has ever seen. Nearly 300 horses are in training there and box stalls are at a premium. The greatest enthusiasm prevails among the members of the Los Angeles Driving Club and some remarkably good reinmen, as well as fast horses, are being developed there.

W. T. McBride, proprietor of the Rose Hotel, Pleasanton, is also the owner of that great broodmare La Moscovita, dam of Bon Guy 2:11¾, Yolanda 2:14¾, Tina 2:20½, and the dam of Bon McKinney 2:28 and Frank W. 2:07¾. He bred her to The Bondsman last spring and is waiting anxiously for the appearance of the foal. It will be worth a lot of money, for there will be few better bred ones in California.

Jake Broliar, the well-known horseman of Visalia, is handling one of the fastest trotters he ever broke, in fact, it is one of the best ever seen in Tulare county. It is a yearling colt called Direct Policy, by Best Policy, and unless something happens to him he will be a hard one to beat as a two and three-year-old. Mr. Broliar only owns a half interest in him. Mr. J. A. Garner, of Ducor, owns the mare and sold a half interest in the colt to this enthusiastic trainer.

From the fact that at the recent Kentucky sale of thoroughbreds nearly 200 head, most of which were among the best-bred animals in the country, only sold for an average of \$111, it would not appear that breeders take much stock in the widely published scare that without the aid of thoroughbred blood we shall soon be without suitable material for the cavalry service, or that the blood of the running horse is absolutely necessary for the production of any type of horse whether for business or pleasure.

Edmond Blanc, one of the foremost breeders and turfmen of France, has purchased the American sire Hermis from Henry M. Ziegler. The terms of the sale have not been made public, but the son of Hermance and Katy-of-the-West was purchased to succeed Flying Fox at the head of the big French stud, and it is known that a large sum was paid, probably nearly as much as the \$197,000 which M. Blanc gave for Flying Fox. We had always regarded Hermis as a gold brick, as indeed he was in his racing, but he may be all right as a breeder.

Mrs. F. H. Burke's handsome bay mare Tina 2:20½ (sister to Yolanda 2:14¾), by McKinney 2:11¾, while being driven on one of the principal streets of San Jose last Saturday, was almost run into by a little girl who was cutting "figure 8's" on a bicycle. So close did this rider come to the mare that the latter was pulled back on her haunches. The following morning her caretaker, Patsy Davey, was shocked to see she had slipped a fine filly whose sire was Tom Smith 2:13¾. The police should put a stop to children on the highways imitating circus performers who do hair-raising stunts on bicycles.

At the annual meeting Monday evening of the Riverside Driving Club directors were elected to serve the organization for the present year. The reports indicate that the club is in a healthy condition financially, with a number of improved facilities for good, clean sport in this city. A meeting of the newly chosen directors will be held on the call of President Hammond when the officers for the year will then be named. The directors selected at the meeting were the following: H. A. Hammond, J. P. Beckstrand, H. P. Zimmerman, Henry Engenbrod, H. G. Stanley, G. H. Judd, Dr. J. W. Arnold, O. E. Holland, W. L. Scott, M. J. Wheeler and Axel Nelson.—Riverside Enterprise.

PACIFIC COAST CIRCUIT ARRANGED.

Pursuant to the call issued by Mr. Shirley Christy, secretary of the Territorial Fair Association, Phoenix, Arizona, a large number of prominent horse owners, breeders and members of the various agricultural fair associations assembled in Parlor "A" of the Palace Hotel, on Thursday afternoon, with a view of forming a Pacific Coast Fair and Racing Association.

The meeting was called to order and Senator Ben F. Rush was elected temporary chairman, Shirley Christy secretary. Remarks were then made upon the object of and necessity for calling this meeting and forming a Pacific Coast association. W. A. Clark, Jr., set forth his views in an able manner; H. S. Ensign, of Salt Lake, Charles Durfee, Frank E. Alley, of Roseburg, Oregon, Prof. E. P. Heald, T. J. Crowley, A. L. Scott, George L. Warlow, S. Christenson, H. S. Rolston, of Vancouver, I. L. Borden and others followed. A committee was appointed consisting of the following to draft resolutions to be presented at the evening session: W. A. Clark, Jr., F. E. Alley, I. L. Borden, H. S. Ensign, M. C. Keefer and S. Christy. W. A. Clark, Jr., was appointed chairman.

At 8 o'clock the list of those present was much larger than in the afternoon, and the enthusiasm displayed showed that a deep interest this meeting had for everyone.

The reading of the following report was the first order of business and every resolution thereon was unanimously adopted. The question of final selection of dates, however, was settled after the formation of the association.

Whereas, This committee has met in executive session and considered briefly the best means of effecting an association or incorporation for the purposes and objects outlined in the motion authorizing the appointment of such committee; and

Whereas, This committee believes it is for the best interests of the harness-horse owners and lovers, as well as for the best interests of the various fair and racing associations, that a united effort be made to organize and perpetuate a Pacific Coast Fair and Racing Association;

Therefore, we, your committee, do hereby recommend that an association be formed, to be known as the Pacific Coast Fair and Racing Association;

We further recommend that such association have for its object and aim the arrangement of one principal or "grand" circuit of fairs and race meetings, together with as many smaller or secondary circuits as may be found advisable, to the end that better fields of horses may be provided at the various meetings, and that the owners of racing stables and the many breeders who exhibit livestock may be able to race and exhibit their stock with as little expense as possible;

We further recommend that a committee of three be appointed by the temporary chairman and authorized to prepare suitable rules and by-laws for the regulation of such association, and that the committee shall report at such time as may be designated by the chairman;

We further recommend that, until such time as the association shall adopt its by-laws, any fair or racing association may become a member by making application for racing dates upon the circuit to be arranged for the season of 1912 and agreeing to abide by the decision of this association with respect to such dates;

We further recommend that an organization be effected at this time by the election of the following officers, to-wit: a president, vice-president, secretary, treasurer, and seven directors, constituting a governing board of eleven members, who shall hold office until the next regular election to be provided for by the by-laws;

We further recommend that a committee of three be appointed for the purpose of conferring with the horse owners and trainers present and making suggestions to the president of the association concerning the proposed classes for the various races to be given upon the circuit; and concerning such other matters as may be of interest to the horse owners and trainers; and we further recommend that a committee of three be appointed and authorized to meet with the North Pacific Fair Association at their next regular meeting for the purpose of securing the endorsement and cooperation of the North Pacific Fair Association, and that such committee be furnished with a list of the various fair and racing associations and horse owners who have agreed to affiliate with and support this association.

W. A. CLARK, JR., Chairman.

The following officers were elected:

I. L. Borden, of San Francisco, was chosen president of the association, and Shirley Christy, of Phoenix, Arizona, the man who is responsible for the movement which resulted in the formation of the association, was made secretary. Frank J. Alley, of Roseburg, Oregon, was named vice-president, and F. J. Crowley, of this city, was elected treasurer. The board of directors follows: James A. McKerron, San Francisco; W. F. Whittier, Hemet Stock Farm; H. S. Rolston, Vancouver; W. A. Clark, Jr., Los Angeles; J. H. Booth, Roseburg, Oregon; S. Christenson, San Francisco; and G. Westgate, of Salem, Oregon.

The discussions on all points vital to the interests of the trotting horse industry on this Coast was spirited, and the task of arranging dates for the fairs and race meetings of 1912 was a most difficult one. President Scott, of the California State Fair, and George L. Warlow, vice-president, spoke in behalf of that great institution and pointed out the value of holding fairs at certain places in conjunction with the State Fair, and, in order to give the people of the North an opportunity to bring their horses and livestock to California, the dates of the State Fair were set back. This opened the way for action. Frank E. Alley most eloquently championed the cause of the great Northwest and was followed by S. Rolston, who represented Vancouver, B. C. The latter spoke of the dates claimed in the Canadian Circuit and how anxious many who participated in the races in the following places were to come to California, and this is the schedule of dates claimed for their meetings: Calgary, July 1st; Winnipeg, July 15th; Brandon, July 22d; Regina, July 29th; Edmonton, August 5th. H. S. Rolston, of Vancouver being the starting place on the circuit, whence the horsemen could proceed through Washington, Oregon, California and Arizona, it claimed the date August 12th to 19th; after much discussion the following dates were also claimed. C. L. Allen, making a strong plea for San Jose, while I. L. Borden, in reply to an insinuation recently made, championed the cause of the P. C. T. H. E. Association, stating in a few words how much this sterling organization for over twenty-two years has upheld the trotting horse industry of this Coast; had been, in fact, its backbone.

The place where the meeting of the Breeders will be held had not been decided upon, but it was stated that it would undoubtedly take place either in Santa Rosa, Stockton or Chico. The Salt Lake City and Fresno dates are the same, the horsemen being given their choice of these cities.

Following is the schedule of dates now claimed:

- Vancouver, B. C., August 12th to August 19th.
- Seattle, Wash., August 19th to August 25th.
- Portland, Oregon, August 26th to September 2d.
- Salem, Oregon, September 2d to September 9th.
- San Jose, September 9th to September 14th.
- Sacramento, September 14th to September 21st.
- Breeders' Association of California (place not fixed), September 23d to September 30th.
- Fresno, September 30th to October 6th.
- Salt Lake City, September 30th to October 6th.
- Hanford, October 7th to October 14th.
- Los Angeles, October 14th to October 21st.
- San Diego, October 21st to October 28th.
- Phoenix, Arizona, November 4th to November 12th.

Besides the Canadian Circuit, it was pointed out in the meeting that horsemen could send their horses to the circuit of the Pacific Northwest Fair Association, which includes North Yakima, Spokane, Centralia, Walla Walla; Lewiston, Idaho, and Boise, Idaho, and to the Willamette Valley Circuit in Oregon.

A fourth secondary circuit which includes a chain of towns in Northern California and Southern Oregon, including Marysville, Chico, Roseburg, Oregon, and others, also is under the control of the Association just formed, the following dates being allotted:

- Marysville, July 17th to 20th.
- Chico, July 24th to 27th.
- Roseburg, Oregon, July 30th to August 3d.

S. S. Bailey, of Pleasanton, made a stirring address upon the necessity of appointing a competent presiding judge for the circuit and also a first-class starter. He spoke from a long experience, and strongly advocated the appointment of a committee to interview the railroad officials regarding rates of transportation for men and horses on this circuit.

There were some remarks concerning the absence of delegates from many cities in California where race meetings have been held in the past, but it was explained that as they had made no efforts to be there, it was apparent that they did not care to come in under this schedule of fairs.

A committee composed of A. V. Mendenhall, W. G. Layng and D. L. Hackett, all of this city, was named to draft a constitution and by-laws, and Secretary Christy was instructed to confer with all of the fair associations in the towns of the Grand and California circuits, regarding their sanction of the association. Also a committee of three, consisting of F. E. Alley, H. S. Rolston and Shirley Christy, was appointed to confer with the North Pacific Fair Association in arranging the matter of dates to conform to those of the Grand Circuit.

After some discussion regarding the giving of big purses and thoroughly advertising this circuit, it was also resolved that the closing of entries in all early closing events be not more than ten nor less than eight weeks prior to each meeting. The matter of electing a committee to handle the affairs governing the same was left to the secretaries of the various associations comprising this organization.

Some one facetiously remarked that an organization had been formed and a treasurer elected, but there was nothing for that official to do, as he had no money to carry on the work. President I. L. Borden started the fund by paying \$100. W. A. Clark, Jr., the Los Angeles representative, followed with \$500. S. S. Bailey, \$50; Mrs. F. H. Burke, \$25; Senator Ben F. Rush, \$20; Keefer & Spencer, of Woodland, \$20; then a number present subscribed other sums, none less than \$5, and the meeting adjourned after tendering thanks to Senator Ben F. Rush, Shirley Christy, W. A. Clark, Jr. and others who worked so hard for the success of the organization.

Following is a list of those present: Senator Ben F. Rush, Suisun; W. A. Clark, Jr., Los Angeles; Shirley Christy, Phoenix, Arizona; Frank E. Alley and J. H. Booth, Roseburg, Oregon; H. S. Rolston, Vancouver, B. C.; E. J. Ensign, Salt Lake City; C. Allison Telfer, F. E. Wright, F. Rubstaller, J. Silva, C. Silva and Ben Walker, Saker, Mrs. F. H. Burke, Roy Mead, C. A. Durfee, C. L. Allen and J. Twohig, San Jose; George Warlow, Dickenson; Mrs. Leoto Zapp, Fresno; Robert S. Brown, Petaluma; J. H. Burns, Santa Rosa; Lon Daniels, Chico; W. Duncan, Marysville; R. O. Newman, S. Gallup and T. Dobrensky, Newman; James W. Marshall, Dixon; Elmo Montgomery, Davis; M. C. Keefer and C. Spencer, Woodland; A. V. Mendenhall, Oakland; S. S. Bailey, Dick Wilson, W. J. Wilson, W. J. McBride and Fred Chadbourne, Pleasanton; Ted Hayes, Los Angeles; I. L. Borden, A. L. Scott, J. A. McKerron, Prof. E. P. Heald, T. J. Crowley, F. W. Kelley, S. Christenson, W. G. Layng, D. E. Hoffman, W. Kramer, D. L. Hackett, Ira B. Dalziel, William J. Kramery and H. H. Holtton, A. Schwartz, T. F. Bannan, F. Lauterwasser and D. West, San Francisco.

The books are open with Secretary Shirley Christy for further enrollments.

Fred H. Chase & Co. will hold one of the best sales of trotting stock ever seen in California at the Pavilion, 478 Valencia street, on Monday evening, February 12th. It will consist of all the trotting stock belonging to George E. Stickle of Lockeford, headed by an untried four-year-old stallion by Bon Voyage 2:08, out of the dam of Helen Stiles 2:08½. There are some of the grandest broodmares in the country in this consignment, and as this is a complete dispersal sale, every one will be sold without reserve.

McKinney 2:11½ should be credited with another 2:30 performer, his daughter Fuschia Mack, out of a mare by Gossip, second dam by Echo, obtaining a record of 2:27½ trotting in a race at Roseburg, Oregon, July 4th. She belongs to the Brnaday Stock Farm.

J. Twohig has made arrangements to stand that grandly bred Bon Voyage stallion, Bon McKinney (3) 2:24½, three-year-old trial in 2:15, half in 1:05, at the San Jose race track this season. He should get his book filled in a little while.

Colonel Luke Emerson, of Bowling Green, Pike County, Mo., has at that place the largest breeding establishment for jacks, jennets and mules in the world. He has invested \$300,000 in the business and has ten barns that will accommodate 1500 head.

Logan Pointer, by Star Pointer 1:59¼, out of Effie Logan, will make the season of 1912 at Davis. Logan Pointer is a half-brother to Jim Logan 2:05½ and Sir Albert S. 2:03¾, and is a splendid individual. Carey Montgomery will have him in charge.

HORSES INCREASE IN VALUE.

E. Stewart, head of the E. Stewart Automobile Company of this city, distributors of the S. G. V. and Crawford cars, in a recent discussion regarding the "passing" of the horse, went into a lengthy review, in which he showed that the liberal introduction of the motor car is not responsible for the higher price for horseflesh because of the falling off in breeding. Stewart said in part:

"The horse has been to the American continent what the camel has been to the African desert. Without him, the United States would be 50 per cent less developed. He has carried the weary wanderers over the desert in search of gold, has helped to make homes out of the vast era of desert unturned soil, has carried the American soldier to victorious battle, has held the world's record for time and speed, and has saved many a life by virtue of his almost human intelligence, yet I venture to say that he is abused and overworked by 50 per cent of his masters.

"In the early days the ox team was the favorite, when the horse was more or less untamed. To-day America boasts of \$3,000,000,000 value of these faithful beasts, costing perhaps \$600,000,000 to feed annually.

"Where the great percentage of horses are raised, throughout the East and Middle West, the farmer usually raises enough for his own use and may have a few each year to sell to buyers from the large cities. These are mostly of the draft horse style. A large percentage of the light wagon and livery horses are raised on the mountain ranges running from Wyoming to the Pacific Slope. The Eastern-raised horses have made a steady increase in value during the last fifty years, owing to the wonderful development of the country and the great demand in the recent foreign wars. The demand for the light Western horses was created mainly through the development of the Pacific Coast and the demand for government horses. The government to-day is contemplating raising its own horses owing to the scarcity of the right kind.

"The prices have risen during the past eight years from \$5 to \$10 per head to \$60 to \$100 per head, the supply being diminished through the taking up of the government lands and the supplanting of sheep and cattle. Had it not been for the advent of steam and gasoline engines, there would have been a horse famine, since the country has developed faster than the animal has grown. But to-day the horse is at the height of his career; another decade may see his general usefulness greatly diminished. And we welcome it. First, because we love the horse and dislike to see him abused; second, the advent of electric and gasoline power will supplant his usefulness to a great extent; third, we need his food to assist in feeding the human race.

"However, contrary to the popular notion, the spread of the automobile through the country has not diminished either the number or the value of horses here. Figures on both these points have come out in bulletins which have just been issued by the census bureau at Washington. The advent of the power car has been coincident with the present decade. Although some of these vehicles were made as early as 1898, the year of the Spanish war, the industry was not important enough in 1900 to get separate mention in the census returns that year. The government figures show that the total number of automobiles built in the United States in 1904 was 22,830, which has increased to 127,289 in 1909. These are the years covered in the government inquiry so far as the information has been given out. The figures for 1910 and 1911, though not here furnished, would undoubtedly show a gain over those of 1909.

"Yet in these years the auto's old time forerunner was making large gains. The 21,625,800 horses, mules, asses and burros which were in the United States in 1900 had increased to 24,016,024, or a gain of 115 per cent. This was far from being as large as the increase of population in the decade, which was 21 per cent, but the fact that there was any gain at all will surprise many people. The value of these animals increased in a far greater ratio, however, jumping from \$1,099,000,000 in 1900 to \$2,613,000,000 in 1910, an expansion of 137.7 per cent. Part of this gain in value, of course, is due to the increase which has taken place in prices of nearly every product during the decade. The average value per head of horses in 1900 was \$53.03 and \$112.53 in 1910, an increase of 112.2 per cent. Nor, so far as detailed statements have been received, have horses and mules decreased in numbers in the last three or four years, the period of greatest expansion for the automobile."

The Kentucky Trotting Horse Breeders' Association, through the action of its stockholders at the annual session, accepted a membership in the Grand Circuit, and the next trotting horse race meeting, which will be from October 8th to 19th, will mark the close of the 1912 season on the "big ring." It was also slated to change the Kentucky Futurity so that it will have three instead of two divisions for trotting, and so that three-year-olds will race under the two-in-three instead of the three-in-five plan. The condition of the Kentucky Futurity of the future will provide \$5000 for two-year-old trotters, \$14,000 for three-year-olds, \$2000 for three-year-old pacers, and \$5000 and a gold cup for four-year-old trotters, making a total money offer of \$26,000.

Second payments on seventy-nine colts and fillies were made in the Arizona Futurity purse for foals of 1911. The list will appear in our next issue.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

THE INTERSTATE ASSOCIATION.

The circular given below issued by Secretary Elmer E. Shaner will meet with the approval of every trapshooter. The bane of the sport has been the "promoter"—whether a single individual or the gun club running a shoot.

The Interstate Association proposes to eradicate some of the nondesirable features in the way of advertising and other things that are of no really practical benefit to anyone but the grabber.

Under the registered tournament system club shoots are placed on an even business basis that will no doubt be appreciated not only by the shooters themselves but some merchants who have been held up in the past.

At the Interstate Association's annual meeting some weeks since, it was unanimously decided that as the registered tournament plan of 1911 was so successful and satisfactory, this course would be continued during the year 1912. In a circular issued by the Interstate Association, which is being mailed to all the more prominent gun clubs of the country, the association says:

"The Interstate Association's primary object in the encouragement of trap shooting is to encourage state associations, leagues of gun clubs and special organizations; therefore, it is the association's present intention to do all in its power to urge and foster the formation of State associations and leagues of gun clubs in those States where none now exist. The Association anticipates that in 1913 or 1914 it shall probably be in a position to contribute more generously to State and similar organizations.

"A broad experience has demonstrated that the registration of tournaments confers many important advantages to trap shooting activities, but that, if not safeguarded and controlled by proper restrictions, it is subject to many abuses, petty and serious. The promoter, actuated by purely business reasons, is the chief offender. For the sport or its advancement he cares nothing; for the profits, he hungers greatly. Under the old conditions, each succeeding year the mushroom club and the hungry promoter were becoming more numerous, and, accordingly, the Interstate Association was expending money for which no return was given in the way of promoting legitimate trap shooting. Yet many legitimate attempts at holding tournaments resulted in failure, because the sum total of so much gun club effort exceeded the demand for competition. The majority of shooters have limitations to their purses besides having a limit to their craving for competition. There is such a thing as too much shooting with its harmful reactions.

"Again, under the old conditions, a strong club holding a successful tournament often made excessive profits, which were out of all proportion as compared to the effort and expense of holding the tournament. Of course, the excessive profits came out of the shooters' pockets.

"The new conditions eliminate the undesirable features while developing the sport on lines that are broad, wholesome and permanent. The matter of good sportsmanship is given full consideration.

"Referring more in detail to the changes made at the annual meeting in 1910, the Interstate Association decided that gun club program advertising by its members shall cease from January 1, 1911.

"In place of program advertising, the Interstate Association has substituted a yearly contribution of \$20,000.

"In the apportionment of the \$20,000 contributed by the Interstate Association, the States are divided into three classes—A, B and C. Class A includes States with a population of 3,000,000 or over. To each State Association Tournament of this class the Interstate Association will contribute \$300, to be applied to the Squier money-back system. Class B includes States with a population of under 3,000,000 to over 1,000,000. To each State Association Tournament of this class the Interstate Association will contribute \$200, to be applied to the Squier money-back systems. Class C includes States with a population of under 1,000,000. To each State Association Tournament of this class the Interstate Association will contribute \$100, to be applied to the Squier money-back system. The matter of population will be determined by the census of 1910.

"A State Association in a Class A or Class B State must have a membership of ten or more bona fide gun clubs located in ten or more different cities or towns. A State Association in a Class C State must have a membership of five or more bona fide gun clubs located in five or more different cities or towns.

"The Interstate Association, at its discretion, may exact proof of the proper organization of any State Association which applies for a Registered Tournament. The foregoing applies to State Associations, or to a league of gun clubs in a State which has no State Association.

"The following applies to individual gun clubs: "Any gun club, a member in good standing of a State Association or of a league of gun clubs, may apply for registration. Applications from gun clubs not members of a State Association or of a league of gun clubs will not be considered.

"To each two days approved tournament, the Interstate Association will contribute \$100, to be ap-

plied to the Squier money-back system. To each one day approved tournament, the Interstate Association will contribute \$50, to be applied to the Squier money-back system.

"When a gun club applies for a two days tournament, the granting of such application shall depend on the attendance at, and success of, previous registered tournaments of said club, if any were held. The determination of whether it shall be a one day or two days tournament is at the discretion of the Interstate Association.

"The records of the Interstate Association show that the most successful tournaments held during the past few years were those of one day duration, and that many two days tournaments which had a good attendance the first day were failures in point of attendance the second day. Therefore, applications for one day registered tournaments will be given the preference in 1912.

"Any application for a registered tournament must be made not less than ninety (90) days in advance of the tournament opening date.

"The Interstate Association suggests that when the percentage system, class shooting, is used, two moneys be made for ten entries and under, and that when the high gun system is used, three high guns win the money for ten entries and under.

"Gun clubs located in sections where freight rates are excessively high, thus making targets cost considerable more than they do in the East, may charge 2½ cents or 3 cents per target, if it is customary to make such charge at tournaments. The Interstate Association suggests, however, that, when more than 2 cents per target is charged, the entrance in the regular program events be increased to \$1.50 per event.

"The Interstate Association's contribution will not be paid to any club until such time as such club, holding a registered tournament, and have sent in the requisite report of the tournament to the Interstate Association."

All communications or applications for registered tournaments should be made to Elmer E. Shaner, secretary-manager of the Association, 219 Coltart avenue, Pittsburgh, Pa.

STRIPED BASS CLUB PRIZE WINNERS.

The San Francisco Striped Bass Club trophy winners for the past season announced by Chairman James Lynch at the club's annual banquet Saturday evening were: J. C. Wallace, first prize, club gold high hook medal for landing the largest striped bass, a 32 pound fish; Chris Johnson, second prize, for a 17 pounder; W. D. Smith and "Doc" Wilson, third and fourth prizes, for 16 pound fish; fifth prize, Charles E. Urfer, 12½ pound bass; seventh and eighth prizes, Fred Franzen Emil Accret, respectively, 10 pound fish; ninth prize, H. Von Dohlen, 9 pound fish; tenth and eleventh awards, A. W. Thornton, 7 pound fish, and James S. Turner, 4 pound fish.

The prizes were rods, reels and other fishing tackle favored by the festive clam tossers. The mysterious prize donated by Charles H. Kewell was drawn by lot, Charles P. Landresse was the winner, with tag No. 13.

Many speeches were made by different anglers present. The evening was enlivened with song and story by Bob Clark, Spec Smith, H. Healey, E. Accret, Jim Turner, C. P. Landresse and others.

Among those present were: President Joe Gabarino, James Sinclair Turner, Fred Franzen, Dr. F. N. Madden, Charles P. Landresse, J. X. De Witt, Frank O'Donnell A. W. Thornton, Chris Johnson, H. P. Davis, J. C. Wallace, Doc Wilson, Hugh Draper, Tim Lynch, Will Lynch, Joe C. Meyer, Terry Evans, Thomas Goldsmith, Jack Duckell, Emil Accret, C. G. Geiffuss, G. H. Sangstack, Bob Clark, F. Messner, Spec Smith, H. Healey, Ed Conlin, L. P. Meaney, H. Von Dohlen, James Lynch, Chas. H. Kewell and others.

RECORD PISTOL SCORES.

James E. Gorman of this city beat the 100 shot record by 13 points in Golden Gate Rifle and Pistol Club shoot at Shell mound Sunday, January 14. Gorman made 956, while the former record was 943.

Pistol scores, 50 yards, standard American target—Dr. R. A. Summers, 89, 87, 89, 90; C. W. Seely, 84, 82, 86, 87, 86, 89, 89; W. G. Williamson 89; C. W. Randall, 92; C. W. Linder, 90, 86, 91; J. E. Gorman, 98, 92, 94, 95, 95, 96, 98, 96, 98, 96, 97, 95; J. Apl pleyard 82, 72, 90, 86, 80, 77, 76, 81, 85, 79, 81; R. Mills, 89, 88, 94, 90, 88, 97, 96; W. C. Pritchard, 89, 98, 88, 90, 93, 91.

An immense horned owl was a victim of a coyote trap recently. The trap had been set by Sam Littlefield, of Pleasant Valley, Wash., and when he discovered the intruder he was astonished at its size. The bird measured nearly six feet from tip to tip. Littlefield has decided to send the hind to the Lincoln Park zoo in Chicago.

INTERSTATE ASSOCIATION AVERAGES FOR 1911.

Secretary Elmer E. Shaner announces as the official Interstate Association list of amateur averages for 1911, with names of contestants, total number of targets shot at in Registered Tournaments, total number of targets scored and percentages.

The averages for single targets are based on a minimum of 2,000 targets, as per the Interstate Association ruling to that effect. The records of the tournaments held at Detroit, Mich., April 26-28, Calgary, Alberta, Canada, July 4-5, and Portland, Maine, August 15-16, were not received, and, of course, are not included in the list.

The averages for double targets are computed on the Interstate Association Tournaments only, and they are based on taking part in two tournaments as a minimum, as per the Interstate Association ruling to that effect.

Averages for Single Targets—Amateurs.

Bounties were paid on 1597 coyotes, 14 Lynxes, 116 wildcats and one cougar to hunters in the Yakima valley during 1911, according to the report of bounties by the county auditor.

PACIFIC COAST FIELD TRIALS.

Judge C. N. Post, president of the Pacific Coast Field Trials Club, Tuesday announced the entries for the derby and the all-age stake of the club's field trials to be held on the Tevis ranch, near Bakersfield. The trials are to begin January 22d and continue four days. Entries for the champion and members' stakes will close the night before the events.

Interest in the field trials has been increasing each year, and there are now many owners of fine hunting dogs who look forward to the annual event with great interest. Judge Post was the founder of the organization, and has always been very prominent in its activities.

Judges for the coming trials have been named as follows: Henry L. Betten of Pomona, T. J. A. Tiedemann of San Francisco and William Dormer of Oakland.

The entries for the derby and the all-age stake are:
Derby.

Buddie, setter dog; owner, F. C. Berry.
Kildonan, setter dog; owner, F. J. Ruhstaller.
Babe, setter bitch; owner, George B. M. Gray.
Judge Post, setter dog; owner, Carroll Cook.
Diamond King, setter dog; owner, C. D. Lutz.
Bobs, setter dog; owner, J. W. McKenzie.
Jeff, setter dog; owner, J. H. Schumacher.
Joconde, setter bitch; owner, C. N. Post.
Lena B., setter bitch; owner, S. Christenson.
Shasta Frank, setter dog; owner, J. E. Terry.
Agua Caliente, setter dog; owner, W. B. Coutts.
Bohemian Prince, setter dog; owner, E. C. Ford.
Melrose Danstone, setter dog; owner, J. W. Considine.
Doctor Duel, pointer dog; owner, J. W. Flynn.
Brown Betty, pointer bitch; owner, J. W. Flynn.
Three, painter bitch; owner, Stockdale Kennels.
Stix Jr., pointer dog; owner, Gordon Tevis.
Hardtack, pointer dog; owner, Lansing Tevis.

All-Age.

Light, setter dog; owner, F. J. Ruhstaller.
St. Lamberts Doris, red Irish setter; George B. M. Gray.
Merry Buck, setter dog; owner, William Dormer.
Rex of Salem, setter dog; owner, ———.
Melrose Mac, setter dog; owner, J. W. Considine.
Melrose Bill, setter dog; owner, J. W. Considine.
Benvenuto, setter dog; owner, T. J. A. Tiedemann.
Kent's Hal, pointer dog; owner, T. C. Dodge.
Lad of Kent Jr., pointer dog; owner, Lansing Tevis.
Chula, pointer bitch; owner, Lloyd Tevis.
Alford's Blue Ribbon, pointer bitch; owner, Gordon Tevis.
Shasta Queen, setter bitch; owner, J. E. Terry.
Old Forrester, setter dog; owner, Joseph Cbanslor.

Ten cups have been secured by the cup committee. These trophies will be awarded to the three placed dogs in the derby, all-age and members' stake and to the winner of the champion stake.

A nine months' Momoney-Becky Sharp puppy, which S. Christenson recently received from Louis McGrew, secretary of the All-American Field Trial Club, died of distemper along with two other setter puppies at W. B. Coutt's training quarters near Bakersfield two weeks ago.

A pocket edition de luxe of setterdom is the 25-pound setter bitch by Count Whitestone-Peach Blossom, owned by S. Christenson.

NATIONAL DOG BREEDERS' ASSOCIATION.

The members of the National Dog Breeders' Association, in a meeting held this week, elected the following officers to serve for the ensuing year: J. Hervey Jones, president; William Blackwell, first vice-president; Phil M. Wand, second vice-president; W. V. N. Bay, secretary; George W. Ellery, treasurer; J. Leo Parks, registrar.

The Nationals—or "insurgents," as they have been dubbed—propose to conduct a big circuit of bench shows on the Coast and in the Middle West during the coming bench show season.

SAN FRANCISCO SHOW.

Officers of the San Francisco Kennel Club have announced that the fourteenth annual bench show of the club will be held in Dreamland Rink on February 29th to March 2d inclusive. Premium lists will be mailed to the dog fanciers within the next few days. The judges have not been chosen, but probably will be named at the next meeting of the club.

The show will be held under the rules of the National Dog Breeders' Association.

The shipping of carp from eastern Washington lake points to the Eastern markets promises to become a good sized commercial adventure as well as a boon to fishermen and hunters during the next few years. It is estimated that 50 carloads are available in Colville lake near Sprague. Secretary Al Weiseman of the Spokane Fish Protective Association, who has been working hard to rid the nearby lakes of the carp, which is driving game fish from the waters and causing a duck famine by eating the fowl food, states that estimates place the carp in Moses lake at 100 carloads, with others comparatively large.

Drink Jackson's Napa Soda.

THE BRITISH POINTER.

As a matter of fact we are generally constrained to think there is only one pointer in the world, since the British pointer is in such great use the world over. But if we look over the sporting or gun dogs of Europe we will find there are many other kinds of pointers; and that they have excellent noses, are very staunch, and altogether useful dogs in their way, writes F. Freeman Lloyd in Recreation. The present day pointer—the one spot over everywhere in America—is purely a creature of circumstances; and he has been evolved to keep up to or alongside of the various changes of sport and the improvements in firearms and ammunition.

For the purposes of this sketch I will simply use the term "pointer," and it must be regarded as applying to the British pointer only, excepting where some other of the heavy, houndy-headed and generally slow pointers of the continent of Europe are brought under notice. The root from which the pointer was obtained is the Spanish pointer. From that sunny country we have obtained many of the best dogs, or at least the stock that has been exploited by generations of sportsmen and dog-lovers, and brought to its present day state of "fancy" perfection. The Spanish pointer was and generally is a heavy, loose-made dog, standing about 22 inches at the shoulder. His head is large and his lips big and pendulous. In these characteristics we recognize his great scenting powers. The coat is short, and the colors may be liver color, liver and white, red and white, black, black and white, sometimes tanned about the face and eyes, often speckled with small spots on a white ground, the tail thin and smooth; frequently dewclaws on the hind legs; the feet sometimes turning a little outwards. This was the dog that was crossed with the English foxhound, the southern hound and harrier, and even the greyhound. The pointer of today is a dog made up of all these crosses, all introduced to give the desired result—an unerring nose, staunchness on scenting, and, of course, plenty of speed.

Setters are older than pointers so far as regards the tastes of the English speaking peoples. A known Spanish pointer to arrive in England was a dog the property of a Portuguese wine merchant. He was a nobleman—a Baron Bichell, and had considerable sporting opportunities in the county of Norfolk, a part of the country always noted for its partridges and other game, including hares. Baron Bichell could kill a bird on the wing. "Shooting flying" came into vogue about 1730, when small pellets were introduced. The Baron was in Norfolk early in 1800. It can be well understood that before the shotgun the net and hawk were in use for taking winged game. Greyhounds could look after the hares and other flet ground game; or the goshawk flown at the smaller furred animals. It will be understood that the Spanish pointer was slow but sure. He was given to pottering and laziness, and more steam and dash had to be put into him. Still, it is thought, such a dog would be of a great deal of service in this country in such thick cover, where we find ruffed grouse and woodcock. Again as a snipe dog there surely could be worse gun dogs than the Spanish pointer.

Suydenham Edwards, writing over a hundred years ago, tells us that the lightest and gayest of the Spanish dogs were judiciously crossed with the foxhound, the object being to gain courage and fleetness. The progeny with thin or whiptails were preferred, the coarse stems demonstrating the cross. The cross resulted in dogs of considerable courage, and then commenced the trouble. Try, today, to get a foxhound on scent to stop and stand, and then we recognize the difficulty the sportsmen of a century ago had to stop the cross-bred Spanish pointer and hound in its enthusiasm to chase. The cross, therefore, had its serious disadvantages, for the young ones were very hard to break or train. Good pointers were at that time quite expensive.

There are some who think that the first Spanish pointers were introduced into England about the years 1600. Col. Thornton, a great sportsman, used the foxhound cross late in the eighteenth century. A writer in 1803 tells us that pointers "on account for their universality and general utility, have been so incredibly crossed, recrossed, bred in and bred out, to gratify the various opinions (as prompted by fancy, caprice, or speculation), that they are now to be found of all sires and all qualifications, from the slow, short-head, heavy-shouldered remains of the original Spanish pointer (who will tire in half a day's work) to the cross of in and in with a foxhound, of which none are ever known to tire; many of them having speed enough to catch a leveret three parts grown, when they jump up before them." Pointers forty or fifty years before 1800 were hardly ever seen, but entirely white or variegated with liver-colored spots, except the then Duke of Kingston's black and white pointers, which were considered superior to every breed in the kingdom, and sold for most extravagant sums after his death. In 1800, with the constantly increasing attachments to field sports, they were to be seen of every description in color, from the pure white and a flea-bitten blue or grey, to the universal liver color, and a perfect black.

Of the early pointer foxhound dogs one stands out in history as of great prominence and interest. This was Dash, the property of the aforesaid Col. Thornton. He was styled in reputable print of the period as the most remarkable pointer ever known up to that time. He was produced by a cross of a foxhound with a high-bred pointer bitch; he was famous for his style of ranging upon the moors on grouse, as well for his superior method of finding,

which demonstrated a good nose and "bird sense"; and when hunting in inclosures for partridges he showed an instinct or sagacity that was almost incredible, by constantly going up to the birds without previous quartering of the ground. All this added to his steadiness in backing other dogs, rendered him, it was supposed, the best pointer up till then produced. Dash was traded to Sir Richard Symons for eight hundred dollars' worth of champagne and Burgundy (which had been bought at the French Ambassador's sale at the Court of St. James), a bog-head of claret, an elegant gun, and a pointer, with a stipulation that, if any accident befell the dog that might render him unfit to hunt, he was to be returned to the colonel at the price of fifty guineas (\$260). The dog had the misfortune to break his leg, and was sent to Col. Thornton, who paid the fifty guineas according to agreement, and he was afterwards kept as a stallion—with little success, however.

From time to time pointers have improved, and now we see the very excellent dogs of the day, some of the choicest of the exhibition stock being owned by George Bleistein, of Buffalo, N.Y., that gentleman possessing a magnificent lot of American and foreign bred dogs, the best of which are Champion Mark's Rush, Champion Coronation, and Mallwyd Glory, the last mentioned being an exceedingly beautiful bitch out of the international champion, Coronation. All are capital workers, so in them we see that which is required in pointers in the way of being useful as well as ornamental.

Pointers have wonderful pointing instinct, and are easily trained. Standing or pointing game is second nature to them, and there surely cannot be a more glorious sight than to observe a dog of this breed cataleptic on the feather or fur which his olfactory organs acquaint him is not far ahead of his nose. The young dog will soon range if given his liberty. It is unwise to check him at first. So leave him alone, or encourage him to go on. Then he may be taken in hand and taught the rudiments of his stopping and standing in some smaller enclosed space, even if it be under a roof. But let him have confidence. In training him do not break his heart and smash his spirits. In teaching him to retrieve a soft yarn ball may be used, throwing it short distances indoors at first. Or better still is a stuffed rabbit-skin. By pressing the underjaw from underneath with the right hand forefinger and thumb, the dummy game will be released without any trouble. Make a kindly fuss over the dog, and he will enjoy the lesson as much as you do the teaching. But a few minutes at a time is plenty. If this cold-blooded lesson be persisted in for a lengthy period he will become tired and nauseated.

It is not too much to say that the best show pointers in the world are in America today. The thousands of field dogs are evidence of the excellence of the stock, which, of course, originally came from the other side. The "natives" of the south, as they were called, were the early pointers, and good, steady and staunch dogs they were. They were slower hunters than the field trial dogs of this moment, in which competitions "pace" is worshipped at its utmost. In fact, a trial between two dogs is styled "a race," a misnomer we are bound to remark. "The race is to the swift," and such a term must be applied to long dogs—greyhounds, or their like, that use their eyes and legs and not their noses. Great speed does not always mean a faithful unerring quest.

Pointers have flourished in every way that can be desired in the United States and Canada, and they prove to be of more than ordinary interest at shows and trials. They are possessed by rich and those of moderate means. They are the gun dogs of all gun dogs to some. Both the Westminster Kennel Club (which then went in for dogs and kept up a kennel) and the St. Louis Kennel Club were great importers of pointers in the seventies. Both, as dog owners, have declined in their fancies. In the eighties the great Graphic kennels became famous, called after the English champion of that name. The best dogs in good looks and work were from time to time acquired, and sportsmen all over the union today have to thank the early importers of the leading quality for what they at present own. From '76 to '86 are records of the arrival of such pointers as Sensation (thought not to be the real Sensation, prominent on the other side), Sleaford, Pride, Rock, Beau, Faust, Jaunty, Zeal, Lassie, Regent, Irme, Keswick, Jessamine, Lady Rapid, Stella, Countess Lena, Donald, Maxim, Meteor, Mita, Christmas Belle, Luck, Don, Burstone, Graphic, Nell of Elford, Jetsam, Bloomo, Bracket, Meally, Revel III, Lad of Bow, Beppo III, Lass of Bow, Naso of Knppen, Glauca.

Champion Marks Rush was bred by F. E. Conlon. He is by Mark C., from Bessie C., and was whelped in 1900. Many hundreds of pointers are exhibited throughout the country, from east to west every year. Almost without exception they are of sterling merit.

The colors of pointers are various. The most popular as show dogs are liver and white and lemon and white. They can be seen in the field, and some say that game will lie better to them than to a self-colored dog. There are a few good blacks in America, a brace that are doing very well being recently imported by Mr. Burrell. Geo. J. Gould is a fast adherent to the merits of the pointer, and of the breed keeps up a large kennel. Clarence Mackey sustains quite an establishment of them in America and Scotland. Ancell Ball is a large owner.

Coming to the show points of a British pointer we like to see him with a head that is long rather than short, with a skull that is decently wide between

the ears. Here is the brain box, and the long greyhound head is not desired. Because of the "stop" the brows are well developed, and the same may be said of the back of the head, although the more than prominent occipital bone is not required. The muzzle must necessarily be long and the nostrils large. The ears are always very beautiful, being so delicate in leather, set on low, and hanging flat to the sides of the head. The neck ought to be free from throatiness, although some of the best field dogs known have owned such points that denote the old hound relationship. The sloping shoulders demonstrate freedom of action and good pace. The well-made body of the pointer is an ideal one. Its strength and formation of ribs are pronounced. The forelegs are well set under him, and they are round, straight and well boned. The feet are compact and strong. These may be either of the cat-foot or bare-foot description. But the majority of people are in favor of the cat-foot, so called, because of its round formation. The hind quarters are deep, well muscled, and full of strength, as are his short loins. His hocks are well let down, and the stifles round and strong. The tail, for choice, is a three-quarter one, tapering from butt to tip. The true carriage of the British pointer is straight out or with an inclination to be slightly below the level of the rump. The general classification at shows is for dogs 55 lb. weight and over, and bitches 50 lb. weight and over. These are known as the "large-sized," the "small-sized" being dogs under 55 lb. weight and bitches under 50 lb. weight.

GOSSIP FOR SPORTSMEN.

Last Sunday was a big day on the Austin pool near Duncan's Mills. At least 30 boats carrying one to three anglers were in the pool. Nearly twice that number of small craft were operating up and down Russian river nearby. It was a day's steelhead fishing, that will be remembered for years. Many fish were taken, nearly everybody caught one or more. Some anglers, however, did not get even a nibble all day long, whilst others in the same boat would catch one or more big steelheads. The river was clear up to last Monday, when the anticipated roily water caused by the rainfall began to show up. The rains this week will probably end the great sport. At all events, for the past three weeks the steelhead anglers have enjoyed the best fishing Russian river has offered for fifteen years past.

The week-end rosters last Saturday were off in force on the train to Duncan's Mills. Having kept tab on the game during the week, the possibility of rain last week, as the weather clerk intimated, was not a deterrent agent.

Among the lucky anglers Tuesday and Wednesday last week was Manuel Cross, four fish one day and five the next morning. Emil Medau and Harry Bebr's Wednesday and Thursday angling resulted in four and one fish respectively. Medau's largest trout scaled eighteen pounds. The anglers find salmon roe bait on their hooks the best lure. Last Saturday's roster—and the following day and during the past week—included Dr. J. Auhurn Wiborn, Hugh Copeland, Louis Gettelf, J. Eisenbruck, W. D. Burlingame, Al Wilson, Bob Sangster, Dr. Raynes, Dr. E. F. Alden, J. P. Babcock, L. Gould, Captain Watts, J. Parmeter, Fred Schmidt, P. McCluir, J. McLachlan, R. Patterson, Louis Boutellier, Ralph Lacoste, Fred D. Sanborn, W. H. Hillegass, E. Medau, H. Behr, M. Cross and others.

Anglers have recently made the comparison that the large run of steelhead in Russian river has not been interfered with by net fishing. Nets and seines can not be used in any of the creeks or streams of Sonoma county. Paper Mill creek, in Marin county, has been almost barren of steelhead, which fish, it is claimed, should now be numerous in the creek. Seining steelhead in Tomales bay is regarded as the principal reason for the absence of the coast trout in the creek.

Paper Mill creek is reported to have plenty of water since the rains. Salmon have been seen working up as far as Lagunitas creek. These fish will struggle up stream in comparatively little water. Steelhead trout, on the contrary, will wait in the tide waters until they can get enough water to run upstream to spawning ground comfortably.

Salmon, with the exception of a male fish now and then, perish after spawning. These fish are often seen on or near the spawning beds so battered and worn from the upriver struggle as to be scarcely able to perform the natural spawning functions. The kelt gradually works down stream to salt water again. The steelhead, on the contrary, is a game and fastidious fish, it journeys upstream when conditions are right, spawns and returns to salt water none the worse for wear.

The Paper Mill creek waters offer inducement now for the steelhead angler, it is claimed. A week ago E. H. Humphreys, Frank Bollivar, George Uri, Floyd Spence, F. Smith, Joe Uri and other anglers found a number of one and two pound fish in the creek. Charles Isaacs and others fishing on Thursday, when the sun was shining brightly on the banks of the "white house" pool also discovered the presence of the steelhead. Several salmon have been taken in the creek within the past week.

J. Boshoff, writing from Pescadero Friday last, reported a run of grise in the Pescadero lagoon. These fish range from one up to three and a half pound in weight. Clarence Haywood of San Mateo and other anglers have been getting nice catches.

A catch of twelve last Wednesday was one angler's luck.

Steelhead are reported plentiful off the mouth of the Soquel, near Capitola.

Striped bass activities seem to be confined, at present, to Russian river, in the vicinity of Duncan's Mills. Since the steelhead anglers have been operating in the Austin pool striped bass have been frequently seen, many of these being very large fish.

Last Wednesday about fifteen big bass were caught while the fish were trying to work up stream over the Austin pool riffle. The two heaviest fish scaled fifty and thirty pounds respectively. One day last week a forty-five pounder was sent to this city.

The method in vogue for taking these practically impounded fish is by using a heavy hand line rigged with numerous triple hooks and a sinker. The deadly contrivance is thrown out and dragged through the water over the fish, which are "snagged" the bass being hooked any old way and yanked to shore. This system is in use with market fishermen only.

San Antonio slough, unproductive for many weeks, threw off the incubus Wednesday, when Gus Christianson and M. Miller were trolling, and produced two fine bass, twenty and thirty pound fish.

With favorable weather ensuing the sport in both San Antonio and Wingo resorts should improve, that is, if the January results of different past season are any guide.

THE PASSING OF A PIONEER SPORTSMAN.

Robert Liddle, one of the pioneer gunsmiths in this city, passed away in Oakland last Sunday. "Bob" Liddle was a prominent figure among the sportsmen of two generations ago who would not put the mark of approval on any sporting goods that did not come from the gun store of Liddle & Kaeding, which was located, from about 1860 to the early '80's, on Washington street, below Montgomery, that part of the city then being the center of retail business in San Francisco.

Liddle was a skilled expert in gunsmithing. At the age of 88 he survived all of his family in this city except a grandson, Bob Liddle.

AT THE TRAPS.

The two-man team bluerock Northwest tournament, between trade representatives, started auspiciously at Ashland last Tuesday. The progress of the shoot is given below in press dispatches received daily:

Ashland, Ore., Jan. 15.—Cold weather and newly erected traps interfered with the first day's shoot of the Northern tournament at the trap shooting which, under the auspices of the Ashland Gun Club, commenced at Ashland today. The Seattle and Tacoma representatives failed to appear, leaving the competition to San Francisco, Portland and Spokane. Scores were:

San Francisco—Fred Willet 91, Ike Fisher 77. Total 168.

Portland—Jim Reid 75, H. E. Poston 74. Total 149. Medford, Ore., Jan. 16.—All the teams shot better in the American Sportsmen Association's tournament, held here under the auspices of the Medford Gun Club, today. The scores were as follows:

San Francisco—Willet 93, Fisher 96. Total 189. Portland—Holohan 92, Robertson 91. Total 183. Spokane—Poston 95, Reid 77. Total 162.

Roseburg, Ore., Jan. 17.—By the narrow margin of four points the San Francisco team of trapshooters won out again on the third day of the Northwestern tournament, which was held here under the auspices of the Roseburg Gun Club today.

Fred Willet's remarkable shooting gave San Francisco the advantage, for he broke 55 consecutive targets and scoring 95 breaks for his string of 100. The scores today were:

San Francisco—Willet 95, Fisher 89. Total 184. Portland—Holohan 88, Robertson 92. Total 180. Spokane—Poston 76, Reid 78. Total 154.

San Francisco now leads the tourney by twenty-three breaks. The next shoot was billed for yesterday at Eugene.

President E. J. Chingren and Secretary Frank C. Riehl of the Pacific Indians have set July 8th to 12th as the date, for the organization's next shoot, which will be held at Eugene, Ore, this year. There will be \$2000 added money offered at the tournament and the crack trap shooters of the West are expected to participate in force.

Good Ammunition.—J. E. Gorman's great pistol record—the top notch score in the United States to date—was made with long rifle .22 Stevens-Pope semi smokeless cartridges.

According to reports received and compiled by Elers Koch, supervisor of the Lolo national forest, 513 deer and 15 bears were killed by hunters on the National reserve during the last hunting season. These figures represent information gathered by the rangers and are reliable. The rangers reported only such numbers killed as they personally knew about. This is the largest number of deer slain in the Lolo reserve in years. In fact, the records show no year which approaches the figures of the slain for this year. This year's total is greater than the totals of the last three years combined.

FISH AND GAME COMMISSION SEIZURES.

Alas for the St. Francis Sunday dinners of rare game which were to be, but were not. Also pity the rare diners who were to have ordered "Owl" with a sly wink to the waiter, but did not.

For the St. Francis kitchen was raided last Saturday night by deputies of the Fish and Game Commissioners. Into the kitchen of the newly made Commissioner of Police they walked proudly and opened the door of the cold storage room to the dismay of the chef.

What did they find?

Here is the list: Twenty-three curlew and twenty-one English snipe which were to have been cooked for gourmets Sunday who had to satisfy their appetite with Petaluma pullets.

Such a bunch of illegal dead birds has not fallen into the clutches of the law for many a day. But be it remembered that Manager James Woods, who was only the other day selected as a guardian of the law on the Board of Police Commissioners, was away in Los Angeles. If he had been here of course it never would have happened. Still, it is an unusual thing to raid the kitchen of a Police Commissioner and contrary to all the customs of official good form.

It was 3:30 Saturday afternoon when two innocent looking persons presented themselves at the desk of the St. Francis and stated that they were hotel men from the country anxious to see how a metropolitan hotel was conducted in its different departments. The idea was a good one. The country hotel proprietors were soon being shown the different departments of the house, and among them the kitchen.

Once in the kitchen they dropped their rural disguise and walked straight to the cold storage room. The personally conducted tour turned in a jiffy into a full sized raid. At the same moment four other fish and game deputies walked into the kitchen from the Geary street entrance, and the six of them showed the urbane assistant manager an unexpected particular in the way a metropolitan hotel is sometimes conducted.

The evidence could not get away. Unlike the four and twenty blackbirds baked in a pie, the dead curlew and snipe did not fly away, although the chef and the assistant manager wished they would.

Seldom has a hunt resulted in such a fine bag of game. What need to have got up early and gone afield with shotgun and dogs, when all the while right here in the cold storage room in the St. Francis was game to satisfy an epicure, even with the most illicit taste.

But really one never knows where to hunt for game, and the management of the St. Francis expresses surprise that the spot has been discovered in the St. Francis kitchen.

With due regard to Manager Woods' alibi the law will insist on its satisfaction, and the penalty set down in the statute book is a fine of from \$20 to \$500 and imprisonment. Anyone with mathematical tastes can figure how much that comes to for twenty-three curlew and twenty-one snipe, or if there is any difficulty the question could be settled by the judge.

John Tait's kitchen next came in for inspection, with the result that twenty-seven pounds of undersized crawfish were discovered and seized by the deputies.

A careful search of nineteen different cold storage nooks in the Palace Hotel kitchen followed, but if they had been the place of captivity of any rare birds the deputies did not find them.

At Jules' restaurant fifty-seven ducks, more than the law allows, and six quail, ostensibly to be served to guests which is quite illegal, were discovered.

Michael Debret had fifty-four ducks and sixteen quail ready for Sunday's feasts, and Techau Tavern was supplied with thirty-five ducks, when the law allows but twenty-five.

"The eating public of San Francisco demands too much from the restaurant men," was the comment of Ernest Schaeffle, secretary of the Fish and Game Commission. But the eating public ate more wisely if not so well Sunday.

It was a great hunt.

There are over 200 residents of Spokane making a good living catching whitefish in the lakes in the Inland Empire according to Secretary Al Wieseman of the Spokane Fish Protective Association. He added: "For men who are out of work I do not know of a better chance to make a good living than catching whitefish for the market. There is a big demand for the fish and with prices the same as they are now any person can make good wages angling through the ice. Loon and Deer lakes are full of the fish and with the expenditure of less than \$2 any person can go into the business. At Sandpoint there are at least 100 Spokane fishermen making good money. The whitefish are fine for the table, and as they are easily caught it is no trick to make \$5 a day.

Trap, gun and strychnine lowered the coyote population of Spokane county by 143 members during 1911, according to records prepared by J. S. Bishop, deputy county auditor. At least the State paid \$1 a head for the scalps of that many prairie wolves and, in addition, paid \$5 apiece for relics of seven lynx, all killed within the district. The figures compare well with those of 1910, when about 450 coyote hides were displayed in the office. The lynx crop fell off somewhat, for 12 of the animals were killed during that period, and one mountain lion.

THE NEW STALLION REGISTRATION LAW.

An Act to regulate the public service of stallions and jacks in the State of California.—[Approved May 1, 1911.]

The attention of all horsemen is called to the following. It is in force and must be complied with:

The People of the State of California, represented in Senate and Assembly, do enact as follows:

Section 1. Every association, person, firm or corporation standing or offering any stallion or jack for public service in this State shall cause the name, description, and pedigree of such stallion or jack to be enrolled by a stallion registration board hereinafter provided for, and secure a license from said board, as provided in section 3 of this act. All enrollments and verifications of pedigree shall be done in the office of the secretary of the California State Board of Agriculture. All license certificates for stallions or jacks issued under this act shall thereupon be presented to and recorded by the county recorder of the county or counties in which said stallion or jack is used for public service.

Sec. 2. In order to carry out the provisions of this act, there shall be constituted a stallion registration board, whose duty it shall be to verify and register pedigrees; to pass upon certificates of veterinary examination; to issue stallion or jack license certificates; to make all necessary rules and regulations; and to perform such other duties as may be necessary to carry out and enforce the provisions of this act. Said board shall hold meetings at the office of the Secretary of the California State Board of Agriculture, the first Tuesday and third day of February, May, August, and November of each year, and such other meetings as may be necessary.

Said stallion registration board shall be composed of three members, consisting of the president and secretary of the California State Board of Agriculture, and the State Veterinarian.

Sec. 3. In order to obtain the license certificate herein provided for, the owner of each stallion or jack shall forward an affidavit signed by a licensed veterinarian to the effect that he has personally examined such stallion or jack, and that, to the best of his knowledge and belief, said stallion or jack, is free from hereditary, infectious, contagious, or transmissible disease or unsoundness. The owner of said stallion, or jack shall also furnish to the stallion registration board the stud book certificate of registry of the pedigree of the said stallion or jack when said stallion or jack is registered, and all other necessary papers relative to his breeding and ownership. Upon verification of pedigree and certificate of breeding (in case of pure-bred stallions and jacks), and receipt of veterinarian's affidavit, as provided for in this act, a license certificate shall be issued to the owner.

Sec. 4. The presence of any one of the following named diseases shall disqualify a stallion or jack for public service, and the examining or inspecting veterinarian is hereby duly authorized to refuse to give an affidavit of soundness to the owner of such stallions or jacks affected with any one or more of the diseases herein specified in a transmissible or hereditary form, and the examining or inspecting veterinarian shall so report the same to the secretary of the stallion registration board:

Laryngeal hemiplegia, (roaring or whistling); pulmonary emphysema, (heaves, broken wind); chorea, (St. Vitus' dance, crampings, shivering, stringhalt); bone spavin; ringbone; sidebone; navicular disease; osteoporosis; curb, when accompanied with faulty conformation of hock; glanders, farcy; maladie du coit; urethral gleet; mange, or any contagious or infectious disease, and the said board is hereby authorized to refuse its certificate of registration to any stallion or jack affected with any one of the diseases herein above mentioned and to revoke the previously issued enrollment certificate of any stallion or jack found on subsequent examination and investigation to be so affected.

Sec. 5. The stallion registration board shall make and keep records of all stallions and jacks enrolled in the State of California; said stallions or jacks to be enrolled as "pure-bred," "cross-bred," "non-standard bred," "grade," or "mongrel," according as the facts may have been determined.

Upon making the enrollment of said stallion or jack, said stallion registration board shall issue the above said license.

The stallion registration board is authorized, in cases of emergency, to grant temporary license certificates without veterinary examination, upon receipt of an affidavit of the owner to the effect that, to the best of his knowledge and belief said stallion or jack is free from infectious, contagious, or transmissible disease or unsoundness. Temporary license certificates shall be valid only until veterinary examination can reasonably be made.

Sec. 6. The owner of any stallion or jack used for public service in this State shall post and keep affixed, during the entire breeding season, copies of the license certificate of such stallion or jack, issued under the provisions of this act, in a conspicuous place, both within and upon the outside of the main door leading to every stable or building where the said stallion or jack is used for public service.

Each bill and poster and each newspaper advertisement shall show the enrollment certificate number, and state whether it reads "pure-bred," "grade," "cross-bred," "non-standard bred" or "mongrel" and it shall be illegal to print or advertise any misleading reference to the breeding of said stallion or jack, his dam or his sire.

Sec. 7. The license certificate issued for a stallion or jack whose sire and dam are of pure breeding, and the pedigree of which is registered in a stud book recognized by the United States Department of Agriculture, Washington, D. C., an act regulating the importation of breeding animals, approved March 3, 1903, shall be in the following form:

California Stallion Registration Board.
 Certificate of pure-bred stallion or jack No.
 The pedigree of the stallion or jack (Name)
 Owned by
 Bred by
 Described as follows:
 Color Breed
 Foaled in the year has been duly examined, and it is hereby certified that the said stallion or jack is registered as number in the stud book, said stud book being recognized and certified to by the Secretary of the Department of Agriculture, Washington, D. C., and is of pure breeding. The above named stallion or jack has been examined by veterinarian, and is reported as free from infectious, contagious or transmissible disease or unsoundness and is licensed to stand for public service in the State of California.
 This license expires on 19....
 (Signed)
 Secretary California Stallion Registration Board.
 Dated this 19... at Sacramento, Cal.

The license certificate issued for a grade stallion or jack, whose sire or dam is not pure-bred, shall be in the following form:

California Stallion Registration Board.
 Certificate of grade stallion or jack, No.
 The pedigree of the stallion or jack (name)
 Owned by
 Bred by
 Described as follows:
 Color
 Foaled in the year has been duly examined, and it is hereby certified that the said stallion or jack is not of pure breeding and is therefore, not eligible for registration in any stud book recognized and certified to by the Secretary of the Department of Agriculture, Washington, D. C. The above named stallion has been examined by veterinarian, and is reported as free from infectious, contagious, or transmissible disease or unsoundness and is licensed to stand for public service in the State of California.
 This license expires on 19....
 (Signed)
 Secretary California Stallion Registration Board.
 Dated this 19.... at Sacramento, Cal.

The license certificate issued for a stallion whose sire and dam are pure-bred, but not of the same breed, shall be in the following form:

California Stallion Registration Board.
 Certificate of cross-bred stallion No.
 The pedigree of the stallion (name)
 Owned by
 Bred by
 Described as follows:
 Color
 Foaled in the year has been duly examined, and it is found that his sire is registered in the volume stud book as number and his dam in the volume and page
 Such being the case, the said stallion is not eligible for registration in any stud book recognized and certified to by the Secretary of the Department of Agriculture, Washington, D. C. The above named stallion has been examined by veterinarian, and is reported as free from infectious, contagious or transmissible disease or unsoundness, and is licensed to stand for public service in the State of California.
 This license expires on 19....
 (Signed)
 Secretary California Stallion Registration Board.
 Dated this 19.... at Sacramento, Cal.

The license certificate issued for a non-standard bred stallion shall be in the following form:

California Stallion Registration Board.
 Certificate of non-standard bred stallion, No.
 The pedigree of the stallion (name)
 Owned by
 Bred by
 Described as follows:
 Color
 Foaled in the year has been duly examined and it is hereby certified and found that said stallion is not eligible to registration as standard-bred, and for the purpose of this license is not pure-bred, although recorded in the non-standard department of the American trotting register.
 The above stallion has been examined by veterinarian, and is reported as free from infectious, contagious or transmissible disease or unsoundness and is licensed to stand for public service in the State of California.
 This license expires on 19....
 (Signed)
 Secretary California Stallion Registration Board.
 Dated this 19.... at Sacramento, Cal.

California Stallion Registration Board.
 Certificate of "mongrel" stallion or jack No.
 The pedigree, as far as known or traced, of the stallion or jack (name)
 Owned by
 Bred by
 Described as follows:
 Color
 Foaled in the year has been duly examined, and it is hereby certified that the said stallion or jack is of mongrel breeding, and is not eligible for registration in any stud book recognized and certified to by the Secretary of the Department of Agriculture, Washington, D. C. The above named stallion has been examined by veterinarian, and is reported as free from infectious, contagious, or transmissible disease or unsoundness and is licensed to stand for public service in the State of California.
 This license expires on 19....
 (Signed)
 Secretary California Stallion Registration Board.
 Dated this 19.... at Sacramento, Cal.

Sec. 8. A fee of \$2.50 shall be paid to the secretary of the California stallion registration board for the examination and enrollment of each stallion or jack pedigree, and for issuance of a license certificate in accordance with the breeding of the stallion or jack as above provided, which shall be in force and effect for a period of one year, from its date, and for the purpose of carrying out the provisions of this act. The fee shall be paid to the secretary of the California stallion registration board at the time the application is made for enrollment.

Upon a transfer of the ownership of any stallion or jack enrolled under the provisions of this act, the certificate of enrollment may be transferred to the transferee by the secretary of the California stallion registration board, upon submittal of satisfactory proof of such transfer of ownership, and upon payment of a fee of \$1.00. A fee of \$1.00 shall be paid annually for the renewal of a license certificate. A fee of \$1.00 shall be paid for a duplicate license certificate, upon proof of the loss or destruction of the original certificate.

Sec. 9. Every stallion or jack for which a license has been issued shall be exempt from further examination, unless from later developments it becomes known, and a complaint is filed, certified to by three men, one of whom shall be a licensed veterinarian; that said stallion or jack has some hereditary, contagious, or infectious disease, which was not evident at the time of previous examination. When such complaint is made, and a request for examination is asked, such complaint shall be filed with the secretary of the California stallion registration board, who shall have another examination made, but

the owner of the stallion or jack shall have the right to select a veterinarian legally qualified to practice as such in this State, to act with such examining veterinarian, and in case these two shall fail to agree upon a verdict or decision these two veterinarians shall appoint a third qualified veterinarian, with the consent and approval of said board and owner, who shall act as referee thereon, and the decision of said referee shall be final. If such complaint is found to be correct it shall be so reported to the secretary, who shall revoke the license in force; provided, that the owner of any stallion used for public service in this State shall have a lien on all colts sired by said stallion for the service fee for a period of one year from the date of the foaling of said colt, as now provided by law.

Sec. 10. Every association, person, firm or corporation violating any of the provisions of this act, shall be guilty of a misdemeanor, and shall be punished by a fine not exceeding one hundred dollars (\$100) for each offense; or by imprisonment in the county jail not exceeding fifty days, or by both such fine and imprisonment.

Sec. 11. The funds accruing from the above named fees shall be used by the said stallion registration board to defray the expenses of enrollment of pedigrees and issuance of licenses; to provide for the examination of stallions and jacks, when necessary; to publish reports or bulletins containing lists of stallions and jacks examined, which shall be not less than one in each year; to encourage the horse-breeding interests in this State; to disseminate information pertaining to horse breeding, and for any other purposes as may be necessary to carry out the purposes and enforce the provisions of this act. Each member of the above committee shall receive his actual expenses incurred while in the performance of any duty imposed under the provisions of this act; the secretary of said board shall receive for his services an amount to be fixed and agreed upon by said board.

It shall be the duty of the said stallion registration board to enforce the provisions of this act, and to make an annual report, including financial statement, to the governor of the State, on September 15th of each year.

Sec. 12. This act shall take effect and be in force on August 1st, 1911.

TRACING TO IMPORTED MESSENGER.

Captain Tom Merry (Hidalgo) has written a very interesting article for the Pacific Horse and Horseman's Review on Imported Messenger which contains the following:

"This article is written by a man who has devoted more time and study to thoroughbreds than to light-harness horses. It is not written, however, to show the value of thoroughbred blood in the trotter so much as to show the real value of Messenger as a sire of horses, both at the galloping game and in light harness. The following great racers and stallions on the running turf since 1870, have the number of crosses of Imported Messenger set opposite their names, to-wit:

| | | | |
|-------------|---|----------------|---|
| Longfellow | 2 | Borghesi | 2 |
| Enquirer | 1 | Billy Cheatham | 2 |
| Falsetto | 2 | Carmago | 2 |
| Fellowcraft | 1 | Gallatin | 2 |
| Spendthrift | 1 | Con Cregan | 2 |
| Artidille | 1 | Fortuna | 2 |
| Muggins | 2 | Grace Murray | 2 |
| Modesty | 2 | Spokane | 2 |
| Virgil | 1 | Inauguration | 2 |

Now, this list of eighteen horses does not at first look so formidable, but there are in it some things worthy of consideration. To begin with, Longfellow and Enquirer were two out of the five best sons of Leamington, considered as sires, the former being premier sire of America in 1891, while the latter, though never at the head of the list, got a greater number of winners than any other stallion in American history. Virgil was also a premier sire and he and Falsetto are the only two stallions to get three winners of the Kentucky Derby. Spokane won three Derbys in 1889, being second once to Proctor Knott and once to Salvator in that year and winning nine races out of eleven. Falsetto, a great performer and brother to Fortuna, the only mare to heat Bramble at cup distances, was by long odds the best male line grandson of Leamington. Spendthrift was never first on the list but got two stallions—Hastings and Kingston—that were each premiers for two seasons. Billy Cheatham won a two-mile heat race at Sacramento in 1860 and challenged the whole Pacific Coast, a hanter that met with no response. Borghesi holds the Pacific Coast record, 3:27½, for two miles, and Modesty is the only mare ever to win the American Derby at Chicago.

ABSORBINE FOR WEAK ANKLES.

ABSORBINE is an excellent preparation to strengthen weak ankles, take out soreness and lameness, overcome inflammation. The report received from Robert A. Fulton, Tionesta, Pa., June 12, 1911, was as follows: "I have used your Absorbine for years and find it excellent. Used it on a horse with a weak ankle and got fine results and am never without it."

Absorbine is a soothing liniment, only a little required at each application. Use it for Bog Spavin, Thoroughpin, Shoe Boils, Capped Hocks, Inflammation and soreness anywhere. At druggists, \$2.00 a bottle or sent direct, charges prepaid, upon receipt of price. Write for descriptive pamphlet, sent free upon request. W. F. YOUNG, P. D. F., 54 Temple Street, Springfield, Mass.

GOOD FOR A CURE.

There is no point in advertising a remedy unless it is worth something. There is no use in charging a dollar a bottle for a remedy unless the remedy is good for a cure. We are both advertising Quinn's Ointment and charging a dollar a bottle for it because we know it will cure a curb, splint, spavin, windpuff, or any other enlargement. Mr. W. W. Bird, Leadmine, Wis., writes: "Enclosed please find a dollar for a bottle of Quinn's Ointment. Please send as soon as possible, as I have none at present and would not be without it. It is the best Ointment on the market and I have been using it for twelve years. It has saved me hundreds of dollars in horse-flesh." Such a testimonial proves the value of our remedy. Address W. B. EDDY & CO., Whitehall, N. Y.

Drink Jackson's Napa Soda.

DID YOU EVER?

Did you ever figure up the number of acres in your farm devoted to pasture, then the number of cows and young stock it supports? Then, did you figure what that pasture land is worth as a part of your farm at going prices of land? Then, when this was done, did you figure from all those figures just what it is costing you to pasture your cows? In this section, where land is worth over \$100 per acre, we know of plenty of pastures that require five acres to the cow. That is the interest at 5 per cent or \$25 per cow for pasture. Take up your own farm, where you know just what are the facts, and figure it out.

A small investment will fix up almost any stable with a few more windows, a coat of whitewash and ventilating-shafts, which will add greatly to the pleasure and profit of the dairy work.

Wheat-bran is a good dairy-feed, and generally speaking, it is a good supplement to other grain-feeds.

Show Horse! Race Horse!! Sire!!!

The Standard Trotting Stallion LIJERO 2:15 1/2 (Reg. No. 45923)

Sired by James Madison 2:17 3/4 (son of Anteo 2:16 1/2), sire of 18 in 2:30 list, including Brilliant 2:08 1/4, Tuna 2:08 1/2, Emily W. 2:10; dam Hilda (dam of William Albert 2:16 1/2, a sire, Saint Ambrose 2:25, and Lijero 2:15 1/2, a sire), by Nutwood 2:18 3/4, the world's champion broodmare sire; second dam Eudora by Volunteer, the greatest sire of race horses that ever lived; third dam by American Star 14, the sire whose daughters have produced 43 trotters and among them some of our greatest sires.

Lijero is a brown stallion foaled in 1902, stands 16.1, and weighs 1200 pounds. He sired Expedito (3) 2:14 1/4. Public trial at Chico as a four-year-old in 2:08 3/4. Lijero forced Prince Lot 2:09 1/4 to trot in 2:10 1/4 at Woodland in 1910 and was only beaten a head. He started in five races, won three and was second in the other two, and it gave Helen Stiles 2:08 1/4 and Prince Lot 2:09 1/4 all they could do to beat him in those two races. Very few horses have ever trotted in 2:10 with less work than Lijero. He should race in 2:08 this year. He has everything to recommend him as a game racehorse and as a sire he will undoubtedly be one of the best. He has size, style, color, conformation, disposition, the best of feet and legs, an iron constitution, and the purest of trotting action. His gameness is unquestioned. He is a perfect show horse and sires show horses. He and his daughter Expedito have won first prizes in the standard class at the California State Fair.

IDORA W., registered in Vol. XIX. Brown mare, 15.2 hands; foaled 1901. Sired by James Madison 2:17 3/4, dam Swift Tide by Albert W. 2:20; second dam Uarda (dam of Flowing Tide 2:14 1/4), by Echo; third dam Dewdrop. A sure breeder, due to foal to Lijero 1912. Entered in State Futurity and Breeders' Futurity Stakes.

TOOTS W., registered, Vol. XIX. Bay mare, 15.2 hands; foaled 1907 by Stam E. 2:11 1/4, dam Idora W. Due to foal to Lijero 1912. This mare is very fast, having worked quarters in 35 seconds as a two-year-old. Entered in State Fair Futurity and Breeders' Futurity Stakes.

JAMES H. DONNELLEY, b. g., 15.3 hands; foaled 1909. Sired by Lijero 2:15 1/2, dam by Hanford Medium; second dam Algerine (dam of Kelly Briggs 2:08), by Algona, etc. Entered in Breeders' Futurity and State Fair Futurity. With little work this one showed a mile in 1911 in 2:28, half in 1:10 and a quarter in 33 1/2 seconds. He will make a 2:12 or better pacer this year.

IVA W., b. f., foaled 1910; sired by Prince Ansel 2:20 1/2; dam Idora W. (which see). Entered in Breeders' Futurity, State Fair Futurity and Occident Stake. She is just broken to drive and will undoubtedly make a very fast mare. She is eligible for registration.

DR. JOHN, b. c. (1), by Palite (son of Nutwood Wilkes 2:16 1/2 and Falita, 2:16); dam Toots W. (which see). Entered in State Fair Futurity, Breeders' Futurity and Occident Stake. A fine large perfectly formed individual, nicely halter broken.

These horses are all sound and in good condition, ready for anything that horses can be used for. The mare Toots W., if worked, will make a 2:12 trotter, or even a lower record than this.

On account of the many demands upon my time in my business, I find I cannot devote any to the development or care of these, therefore I have decided to sell them.

Any further information regarding prices etc., will be given by addressing

F. E. WRIGHT, 318 K. St., Sacramento, Cal.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

KENDALL'S SPAVIN CURE - has saved thousands of dollars and thousands of horses. The old reliable cure for Spavin, Ringbone, Splint or lameness. For sale at all druggists. Price \$1 per bottle, 6 for \$5. "Treatise on the Horse" free at druggists or write to Dr. E. J. KENDALL COMPANY, Enosburg Falls, Vt., U. S. A.

Don't Take a Chance on Weak or Sore Tendons—

They Mean Sprains and Ruptures

If Not Cured Now

Every Owner, Trainer, or Caretaker should keep this remedy constantly at hand and use it freely whenever there is any sign or indication of lameness. Mack's \$1,000 Spavin Remedy Will Quickly Cure Spavin, Ringbone, Thoroughpin, Curb, Capped Hock, Shoeboil, Sprung Knee, Ruptured Tendons, Sweeney, or any one of a hundred different causes of lameness from which your horse may be suffering.

MACK'S \$1,000 SPAVIN CURE Relieves Cases Formerly Considered Incurable

We know of many cases where horse owners have paid out big fees and had valuable horses tortured with "brine," "blistering," and other good-for-nothing methods, and as a last resort tried Mack's \$1,000 Spavin Remedy, and were amazed at the painless, positive, quick and permanent cure. It does not leave any scar, bluish or loss of hair—absolutely no mark to show that the animal has ever been lame. Safe to use on any horse, old or young. It's the surest remedy money can buy, and it's the only spavin remedy in the world that is absolutely guaranteed by a

\$1,000 WARRANTY BOND

This is a straightforward business proposition that you can not overlook if you have a lame horse. Not only for the sake of the horse, but for your pocket-book as well, you should read every word of this advertisement and then send the coupon without the loss of an hour. Don't let your horse suffer, don't sell him for a few dollars; ask us to tell you how to remove the lameness safely, surely and quickly.

We will send you THE BEST AND MOST RELIABLE DIAGNOSIS ABSOLUTELY FREE.

All you have to do is to fill out the "Free Diagnosis Coupon," mark just where your horse has a swelling, sore or any one of the big number of possible causes for lameness, and send it to us. We will then give the coupon to our practicing Veterinary Specialist for his expert diagnosis. This diagnosis is invariably correct. We then inform you of the cause of your horse's lameness and the remedy that will absolutely cure him. We do all this for nothing.

Be Positive, Know What You Are Doing and know that you are treating the right spot in the right way. Don't disfigure your horse and reduce his market value. Write to us.

Your Druggist Will Obtain Mack's \$1,000 Spavin Remedy for You

If you ask him. Price \$5.00 per bottle. If he refuses, remit \$5.00 to us and we will see that your order is filled without delay.

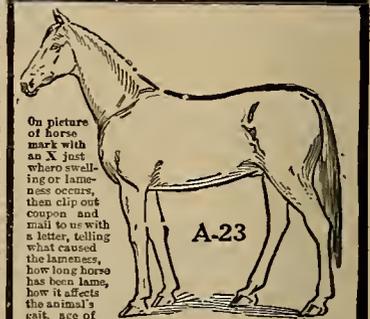

No matter where, when or from whom you buy Mack's \$1,000 Spavin Remedy, the price is the same. Every bottle is guaranteed, and is accompanied by our \$1,000 Warranty Bond, which insures you that your money will be refunded if the remedy fails to do all we claim for it, as stated in our warranty.

Do not accept a substitute, for there is no other remedy like Mack's \$1,000 Spavin Remedy—nothing so powerful and sure to cure. It is as supreme as a remedy in all forms of lameness.

MCKALLOR DRUG CO. Binghamton, N. Y.

No matter how long your horse has been lame, or what the nature of his lameness, you can cure him if you use Mack's \$1,000 Spavin Remedy.

FREE DIAGNOSIS COUPON

On picture of horse mark with an X just where swelling or lameness occurs, then clip out coupon and mail to us with a letter, telling what caused the lameness, how long horse has been lame, how it affects the animal's gait, age of horse, etc.

We will tell you just what the lameness is, and how to relieve it quickly. Absolutely no charge. Write today.

Free Book—"Horse Sense"

Send us the Free Diagnosis Coupon, get absolutely free a copy of our book "Horse Sense." Describes and illustrates diseases of horses' limbs, shows correct name for every part of horse and tells valuable facts every horse owner ought to know.

SPECIAL ADVERTISING.

Wanted, For Sale, and Miscellaneous advertising under this head will be set in nonpareil type (same type below) and will be published at the rate of 2 cents per word each insertion, or 6 cents per word by the month. Count each abbreviation and initial as a word.

FOR SALE.—The trotting stallion Altitude 2:22; seal brown; fine individual; sound and gentle. For terms, etc., address CHAS. THOMPSON, R. F. R. D. No. 3, Bakersfield, Cal.

STUD BOOK FOR SALE.—Volumes 1, 2, 3, 4, 5 and 6 of Bruce's American Stud Book; handsomely bound; good as new. Will be sold cheap. Address Breeder and Sportsman, San Francisco, Cal.

FOR SALE.—Out of Rand's famous Mile High Kennels: Alredale puppies; Boston, French and English bulldogs; all of the best pedigreed stock in America. For further particulars, call on L. F. Rains, 676 Monadnock Bldg., San Francisco. Phone Satter 854.

FOR SALE OR TRADE.—Bay mare by Chas. Derby, first dam Josie D. by Joe Daniel. About 10 years old; very handsome; a good driver; gentle; afraid of nothing; a good roadster. Address C. H. JONES, 713 5th Ave., San Rafael, Cal.

FOR SALE, CHEAP.—The best bred mare in California. Bay filly, 3 years old, sound. With 6 weeks' work paced a mile in 2:20 to a cart and had just 2:00 speed. Sired by Nutwood Wilkes; 1st dam by Bonnie Direct 2:05¼; 2nd dam by Searchlight 2:03¼; 3rd dam by Director; 4th dam Lida W., dam of Nutwood Wilkes by Nutwood 600. Bred by Martin Carter, Nutwood Stock Farm. Address T. W. BARSTOW, 1042 Alameda Ave., San Jose, Cal.

FOR SALE, CHEAP.—One registered stallion, sired by McKinney 2:11¼; 8 years old; sound. Also one imported draft registered stallion; weight 1800 pounds; 7 years old. Would consider trade on heavy mare or standard-bred mares, or fillies. Breeding and pictures sent to interested parties. Address D. A. BAKER, Hill P. O., San Diego, Cal.

FOR SALE.—Standard bred black stallion; 15.3 hands; weighs 1100. Can trot in 2:15; nice mannered; easy to drive or control; good gaited; has trotted quarters in 31¼ seconds. Is only 5 years old. A grand stock, race or matinee horse; choicely bred; dead game, and handsome enough for a show horse. Address all communications to K. L., Breeder and Sportsman Office.

FOR SALE.—Halley Wilkes, black mare by Count Wilkes 2:21; dam by Orator, gran. of Electioneer. An ideal road mare, trots good road gait; paces when at speed, free legged; uses no boots. With one month's training paced quarter mile in 34¼ seconds, half mile in 1:12 on half-mile track. Also three and four-year-old fillies out of the same mare by Dictatus 2:17. For price and particulars address W. S. CLARK, Gustine Stock Farm, Gustine, Cal.

FOR SALE.—A jet black stallion; was three years old December 20, 1911. A tippy, handsome pacer, nicely gaited, good size, and the making of a race horse. Has had so little training that it is almost none and stepped a quarter in 34 seconds. Being as two of us own him, must be sold. He is by Zolock 2:05¼; first dam, Angie Duryea (p.) 2:17¼, by Patchen Wilkes (the sire of Joe Patchen and others); second dam, Angie D. (p.) 2:07. (The first mare to pace in 2:07), by Mikaban 2:19, the sire of Frank Agan 2:03¼. If you desire such a horse, write to DR. A. C. HUNTER-ELBAUGH, 305½ South Spring Street, Los Angeles, Cal.

AN AMERICAN BREED.

There are other breeds that lay claim to American origin, but Secretary Wm. McFadyen believes that the Poland-China is the only strictly American breed of swine. The breed originated in southwestern Ohio, where it was brought to a high degree of perfection by judicious mingling of the blood lines, by the hog men of that section. Those old-timers back there in the forties to seventies did a world of good for themselves and the country at large in developing a breed of hogs peculiarly adapted to the needs of American breeders, packers and consumers. Indeed it was the activity of these people that helped more than anything else to give to Cincinnati the name of

"Porkopolis," the proud title held by the Queen City till the young giant Chicago arose and wrested it from her. The Poland-China has been developed to show quick maturity and easy feeding qualities. It has also been demonstrated that no breed will develop more size if bred in that line. It is the standard of all breeds for the so-called lard type.

The breed has been developed in the corn belt, and it is the accepted type to go with this cereal. The distribution of the breed in the United States is greater than any other, and the majority in the country are more largely of Poland-China type and form than of any other. It is a breed that seems to suit the needs of the country very generally, being in favor in the South and

TWO GREAT SIRES.

The Bondsman

Reg. No. 37641

SIRE OF

Colorado E. (3) 2:04 3/4 champion 3-year-old of the world. Winner of the Matron, American Horse Breeder and Kentucky Stock Farm Futurities; second in Kentucky Futurity.

The Plunger (4) 2:07 1/2, second fast-old stallion of 1910.

Grace Bond (3) 2:09 1/4 winner both Kentucky Futurity.

Creighton 2:08 1/4, record made in 1911.

Half brother to Jay Hawker 2:14 3/4, sire of Country Jay 2:05 3/4, Susie Jay 2:06 1/4, etc.

Half brother to The Tramp, sire of Bervaldo 2:08 1/4, Trampfast (2) 2:12 1/4. Half brother to Sorrento Todd (4) 2:14 3/4, Belle Sentinel 2:15, etc.

|--|---|---|

THE BONDSMAN is the only stallion that sired three new 2:10 performers with race records in 1910. In spite of the fact that he has no record, The Bondsman was a colt trotter of great merit. He was a contending colt all through the Kentucky Futurity of 1899, getting third money. This was a six-heat race and was won by Boralma. As a four-year-old he was not raced, but trotted a public trial in 2:11. As a sire he is destined to be the leading son of the great Baron Wilkes, founder of the greatest futurity winning family.

He will make the season of 1912 ut

Pleasanton Training Park. **\$100** the Season with usual return privilege 1913. Season ends June 1st.

THE PATCHEN BOY 39033

Three-Year-Old Record 2:10 3/4 in a Winning Race.

Sired by the Great WILKES BOY 3603, sire of 107 in standard time.

A Genuine Race Horse and a Sire of Early and Extreme Speed.

The Patchen Boy 39033 is sire of the following:

| | | |
|------------------------------|------------------------------|-----------------------------|
| Francis J. 2:08 | Legal Patchen ... 2:15 1/4 | Dorothy C. 2:19 1/4 |
| Evelyn Patchen. 2:10 1/4 | Lucile Patchen . . 2:16 | Louise Patchen . . 2:19 1/4 |
| Scott Patchen . . 2:12 1/4 | Jerry Patchen . . 2:16 1/4 | Dr. Warren 2:19 1/4 |
| Dessie Patchen . . 2:13 | Knightstown Belle 2:16 1/4 | Roscoe Binning . . 2:20 |
| Frank Patchen . . 2:13 1/4 | Alec Williams . . . 2:18 1/4 | Mary Patchen . . . 2:20 1/4 |
| Ruby Patchen . . . 2:13 1/4 | Lois Patchen . . . 2:19 1/4 | Black Patchen . . 2:20 1/4 |
| J. C. Patchen . . . 2:14 1/4 | Auduous the Miller 2:19 1/4 | and 11 others in 2:20. |

Dam Lady Ciny, the dam of The Patchen Boy (3) 2:10 3/4, C. W. M. 2:24 1/4 (trotted to high wheels), Anglin Wilkes 2:16 1/4 over half-mile track, trial 2:09 3/4, by Metropolitan 1872, son of Hambletonian 10; second dam, Haggie Brown, by Ashland Clay; third dam, Pitty Pat, thoroughbred. The Patchen Boy was the greatest three-year-old race colt in the world, winning six straight races in the Grand Circuit the only year he was raced. His produce are good-headed and real race horses. (No tin cups.)

THE PATCHEN BOY is a beautiful black, 16.1 hands and weighs 1290 pounds. His colts are of fine size, great individuals and the kind that sell for the high dollar.

Season of 1912 at Pleasanton Training Park. Fee: **\$50** Return privilege 1913.

Both of the Above Horses Will Remain in California.

HOMEPHONE PRAISED.

A new subscriber writes the Home Telephone Company under date of October 28, 1911:

"Please install a phone at my home. I did not know anything about the good points of the Homephone and was rather prejudiced against it until I began using it in my office. I use it all the time now, not only in phoning around the building, but getting outside numbers, because it saves me time and trouble. The Homephone delivers the goods."

"You know the burners of candles rioted in London about 500 years ago when gas was introduced. Most of us object to changes. Possibly that is the reason why I am so late in ordering a Homephone."

The Man Who has Come Back.

The host of admirers of what the veteran war horse of the shooting game—**The Hon. T. Bill Crosby**—has done lately with his 34-inch harrel Parker gun, will be glad to read the following, viz:

- In the Eastern Handicap . . . 100 out of 100 targets.
- In the Western Handicap . . . 492 out of 500 targets.
- In Evansville, Ind., Tournament . . . 395 out of 400 targets.

Making a continuous run of 987 out of 1000 targets

The only straight score ever recorded in the **Grand American Handicap** event was made with a Parker gun, scoring 100 out of 100 at 19 yards rise. Furthermore the same Old Reliable has won the **National Championship of America** every year it has been shot for.

For information regarding small bore guns, address the pioneer makers of the 20 gauge

REMINGTON-ARMS UNION METALLIC CARTRIDGE COMPANY, 299 BROADWAY, NEW YORK CITY.

WINCHESTER
Rifle, Revolver and Pistol Cartridges.

When you buy cartridges, always insist upon getting Winchester make—the Red W Brand. Then you will have as good cartridges as it is possible to produce. No matter how good your rifle, revolver or pistol may be in itself, unless you use good cartridges in it, you will not get good results. Winchester cartridges are made for all makes of rifles, revolvers and pistols, and, while they do not cost any more than many inferior brands, they are superior to all others in strength, accuracy and uniformity. Being manu-

facturers of both arms and ammunition, we are able to approach the subject of ammunition making from both sides, the result being the manufacture of practical ammunition that gives the best results in all firearms. Remember to ask for the Red W Brand.

\$100 to Owner of Stallion, sire of Winner of Three-Year-Old Trot when mare was bred.

For Two-Year-Olds to Take Place at the California State Fair, 1914.

| | |
|-----------------------|-------|
| Two-Year-Old Trotters | \$600 |
| Two-Year-Old Pacers | 400 |

CONSOLATION, for horses that started in above and won no money.

ENTRANCE FREE—Otherwise same conditions to govern as in the main events.

| | |
|-----------------------|-------|
| Two-Year-Old Trotters | \$350 |
| Two-Year-Old Pacers | 250 |

\$100 to Owner of Stallion, sire of Winner of Three-Year-Old Pace when mare was bred.

For Three-Year-Olds to Take Place at the California State Fair, 1915.

| | |
|-------------------------|--------|
| Three-Year-Old Trotters | \$1400 |
| Three-Year-Old Pacers | 1100 |

CONSOLATION, for horses that started in above and won no money.

| | |
|-------------------------|-------|
| Three-Year-Old Trotters | \$400 |
| Three-Year-Old Pacers | 300 |

ENTRANCE AND PAYMENTS—\$2 to nominate mare on February 1, 1912, when name, color, description of mare and stallion bred to must be given; \$5 July 1, 1912; \$5 December 1, 1912; \$10 on yearlings February 1, 1913; \$10 on two-year-olds February 1, 1914; \$10 on three-year-olds February 1, 1915.

STARTING PAYMENTS—\$15 to start in the two-year-old pace, \$25 to start in the two-year-old trot; \$35 to start in the three-year-old pace; \$50 to start in the three-year-old trot. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

No additional entrance will be charged in the Consolation Stakes.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

CONDITIONS.

The races for two-year-olds will be mile heats 2 in 3, and for three-year-olds, 3 in 5. Distance for two-year-olds, 150 yards; for three-year-olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before February 1, 1913, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1911.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$5000, the amount of the guarantee, only. Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Races for Two-Year-Old Stake and Consolation end with the conclusion of the third heat.

Races for Three-Year-Old Stake and Consolation end with the conclusion of the fifth heat.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

All contestants not winning a heat in three or awarded second position twice will be retired from the race, but do not forfeit their winnings as shown by the summary.

Entries open to the world.

A. L. SCOTT, President.

THE PAST ten days have been history-making ones in the trotting horse industry of the Pacific Coast, and a general awakening in all that pertains to it is noticeable everywhere. On Thursday night, January 18th, one of the largest and most enthusiastic assemblages of leading trotting horse breeders, owners and officials of racing associations ever gathered, was in session at the Palace Hotel, pursuant to a call for such a convention, issued by Mr. Shirley Christy, secretary of the Arizona Territorial Fair Association.

Those who attended were delighted to observe an unanimous desire to hold a Pacific Coast Circuit worthy of the name, and, as stated in our last issue, the people in the north who are engaged in the trotting horse industry in British Columbia, Washington and Oregon came fully prepared to advocate the cause of their splendid racing and fair associations. Their sentiments regarding the absolute necessity for a continuous racing circuit met with a hearty response from the leading horsemen of California, who joined with them in expressing the wish that there would hereafter be no "lay over" weeks from the time the hell called the horses to the post in Victoria, B. C., until the last race was decided at Phoenix, Arizona. A committee was appointed to confer with the officials of the North Pacific Circuit, who will meet at Walla Walla, next Thursday, February 1st. After adjournment Mr. Christy will return to this city and file his report. This committee will find that it has much to contend with, but three better qualified men than Messrs. Christy, Alley and Rolston could not be found. They are wide-awake, active and enthusiastic, but their enthusiasm does not overbalance their judgment, and, as they have given this subject much study, it is believed they will be able to present it in the most comprehensive manner possible, and strive to get those present to consider it as carefully as their hearers did last Thursday afternoon and evening.

The magnitude of this project can hardly be realized by horsemen, and the generous spirit which prompted so many to come forward with funds to help it along proved that they want to see it succeed. The formation of such a circuit will be of inestimable value to every farmer, horse breeder and livestock owner in California, for, if these fairs and meetings are carried on successfully, there will be little or no trouble to procure State aid for their maintenance hereafter. There may be about eight fairs, besides the State Fairs at Sacramento and Los Angeles, to apply for appropriations and these applications will not be denied. All talk of getting more than this number should be stilled. These fairs will lead up to the great fair in 1915 and, with the premiums to be given there for exhibits of livestock, there is another incentive for our people to buy heter stock, breed more intelligently and strive harder to have all their stock in "show condition" at every one of these places as well as at the big one to be held in San Francisco in our Exposition year.

There is another object in having this continuous circuit of fairs wherein race horses, draft horses and livestock may be carried directly from one fair to the other, and that is the regulation of steamship and railroad rates. A committee duly authorized by this Pacific Coast Fair and Racing Association will confer with the proper officials of the transportation companies regarding rates and fares, and arrangements will be made to have a material reduction in these, so that instead of compelling all stable employees to pay first class passenger rates from point to point these men (from the nature of their calling must ride in haggard and livestock cars), should only pay reduced rates.

The question of extensively advertising a circuit of these dimensions is another important as well as very essential one to be decided. If, when the circuit dates are finally settled, steps are taken to properly set forth the total amounts to be raced for on this coast, the classes to be decided and the conditions under which these events are to be held, there is no doubt there will be many in Canada, Idaho, Montana and Wyoming who will fall in line and bring their horses all the way through the circuit. Not only this, but there may be many Eastern horsemen and trainers who will be attracted here by the size of the purses and our genial climate, wherein no rain falls for nearly eight months of the year to render their horses unfitted for the task of lowering records and winning a share of the stakes and purses offered, and they will bring consignments of colts and fillies with them which will represent the most fashionable trotting futurity families. Many of these will be purchased by enthusiastic horsemen on this Coast in order that they may improve the trotting families they have been so long interested in.

IN THE issue of the "Breeder and Sportsman," September 30th of last year, the attention of its readers was called to the holding of a race meeting, horse show, livestock exhibition, a trap-shooting contest and a rifle and pistol tournament at the Stadium, in Golden Gate Park, during the Panama-Pacific Exhibition in 1915. The great advantages these various exhibits would have as "magnets" to draw crowds of people were fully set forth, and, like good seed that fell upon fertile soil it germinated immediately, for in a few weeks thereafter we were delighted to note that the Park Amateur Driving Club directors saw the feasibility of holding a big race meeting at that time, and every week since some work has quietly been accomplished with that end in view. In subsequent issues we spoke of the absolute necessity of lengthening the track and widening the homestretch, offering big purses and giving the greatest light harness horse meeting ever held in the United States. Eastern turf journals have copied these articles and commented most favorably upon them, and when on Monday night, the committee of five appointed by the Pacific Coast Trotting Horse Breeders' Association and the Park Amateur Club to confer with the Panama Pacific Commissioners was increased to eleven by the addition of seven of the most active and best qualified horsemen and racetrack managers on this coast, there was considerable pride felt in our inception of such an idea.

The gentlemen who are to act as a board of directors are very enthusiastic as to its ultimate success, and a glance at their names shows that when it comes to accomplishing great things they stand in a class by themselves. It is incumbent, therefore, upon all horsebreeders, owners and trainers to uphold them in their efforts to make this the greatest and most successful feature of the exposition: Captain Wm. Matson, former president of the Chamber of Commerce, and at present the president of the Matson Steamship Company; Ivey L. Borden, capitalist and director of the Pacific Coast Trotting Horse Breeders' Association; S. Christenson, director of the Park Amateur Club; A. L. Scott, hardware merchant and president State Agricultural Society; Colonel J. C. Kirkpatrick president of the Palace and Fairmont Hotels Company and vice-president of the P. C. T. H. B. Association; T. J. Crowley, owner of oil wells, president of State Agricultural Society; Colonel J. C. and also one of the directors of the P. C. T. H. B. A.; John A. McKerron, horse hoot manufacturer, president of the Park Amateur Driving Club and director in the P. C. T. H. B. A.; Fred W. Kelley, owner of the "Breeder and Sportsman," and secretary of the P. C. T. H. B. A.; Senator Ben F. Rush, large land owner and former president of the State Agricultural Society and at present one of its ablest directors; Charles W. Paine, capitalist and director of the State Agricultural Society and P. C. T. H. B. A.; Fred W. Thompson, secretary of the Park Amateur Driving Club; Chas. Durfee, former owner and trainer of McKinney 2:11¼, and director of the P. C. T. H. B. A.; Thomas Bannan, capitalist and director of the Park Amateur Club; Dr. Ira B. Dalziel, veterinary dentist and director of the Park Amateur Driving Club. Every one of these is a well-posted horseman and all have the time to devote to this cause which they have most cheerfully and willingly espoused.

Full particulars of this meeting appears in another column of this issue and will furnish cheerful reading for every owner of a well-bred trotting and pacing colt filly on this Coast, and now is the time when

every stallion owner should strive to get the best mares possible for his horse, so that there will be some good two-year-olds ready to compete for the rich Futurity Stakes to be decided in 1915 at the big meeting.

AT THE large and enthusiastic meeting of horsemen who gathered to organize the Pacific Coast Fair and Racing Association, some one declared that the P. C. T. H. B. Association should not claim any dates for the fair, because they had neither town nor place where racing could be held. For the information of that one and all others who have the same erroneous idea, it may be stated that the Pacific Coast Trotting Horse Breeders' Association was organized to hold meetings at no particular place on the Pacific Coast. It was formed for the purpose of giving races wherever it was deemed proper and wherever the people who were most deeply interested made it an object for this association to hold meetings. Consequently, meetings have been given during the twenty-two years of its existence in Chico, Fresno, San Jose, Salinas, Petaluma, Santa Rosa, Oakland, and Los Angeles, and when the industry was almost "all in, down and out," when there were very few race meetings held by other associations, it gave two, and sometimes three meetings a year during that "dark period." It has disbursed more money to the horsemen than any other organization devoted to the trotting horse industry in the world. Over \$500,000 have been distributed to the horsemen on the Pacific Coast and its fame as a sterling organization extends wherever trotting is known. Its history is recognized throughout the East as well as here and its credit is unquestioned. As President Borden of the Pacific Coast Fair Association in his reply to the insinuating person truly said, "It is the backbone of the trotting horse industry on this coast."

THE LAST CALL! When this issue is printed it will contain the last call to broodmare owners about the date of closing of entries for the State Fair Futurity Stake No. 4, value \$5000, which is next Thursday, February 1st. It takes but \$2 to nominate a mare in it at that time; the produce to trot or pace when two and three years old. The owner of the stallions which sired the winners of these three-year-old trotting and three-year-old pacing races are each entitled to \$100, and they should strive to induce broodmare owners to make entries in this stake. The conditions are most liberal and every broodmare owner should read them and act accordingly. It is not only a matter of pride to have a foal's name appear in the list of those which are entered, but if enhances its value as a selling proposition. If one reads the returns from the big Eastern sales it will be noticed that those colts and fillies which are heavily engaged in futurity stakes bring the very highest prices. And the same rule applies to those foaled here. So do not forget to heed this last call for entries for this rich stake.

DEATH OF JOHN FLOURNOY.

Last Saturday afternoon this estimable gentleman, who was well known to thousands of people in all walks in life in this city, passed away after a long illness, Bright's disease being assigned as the immediate cause of death. Although he had been failing for several years, he visited his law offices daily until a fortnight ago, when he suffered a nervous collapse.

Mr. Flournoy conducted some of the most important cases to come before the California courts, and was for more than twenty years the legal representative in the West of the late D. O. Mills. He was born at Danville, Contra Costa county, in 1856, and was a graduate of the University of the Pacific. He was part owner of the Riding and Driving Club building at Seventh avenue and C street, the finest establishment of its kind west of New York City. Deceased was one of the most enthusiastic of horsemen, and was very quiet and gentlemanly, and one of the kindest and most generous of men. He is survived by his wife, his mother, two sisters and a brother.

Two weeks of zero weather and icy streets have imposed great hardship on horses in eastern cities. The checking list of the Illinois Humane Society shows that in Chicago an average of a thousand horses have fallen on the streets daily, and 4 per cent, or forty horses daily, have died of the injuries thus sustained. Sharp shoes get dull so quickly that it is impossible to keep teams up to their maximum pulling power. With loads reduced 25 per cent and more, and every horse and wagon pressed into service, many firms, particularly the coal companies, have fallen far behind with their traffic.—Breeders' Gazette.

WHAT WILL IMPROVE RACING CONDITIONS?

[By W. P. McNair]

What can be done to improve the racing conditions is a subject receiving much attention at the present time. The articles by George Starr and W. I. Higgins have been read with much concern by everyone interested in the subject and there is much in both articles calculated to make for improvement from the standpoint of the owner, the driver, the association manager and the patrons of our race tracks.

In Mr. Starr's articles I notice some things which do not appeal to me as tending to that elevation of harness racing we have hoped for so long, and the thought occurs that whilst his discussion is yet in its infancy, we might do well to look some things squarely in the face and apply such remedies as may seem best.

First of all, Mr. Starr says "try open booking instead of associations selling the privilege which permits a combination book." With an anti-betting law in so many States, why not do away with the books entirely? In the early days book-making was unknown and at each meeting many thousands of dollars changed hands on every race through the medium of the auction pools. Take our running races of that day for an example. The races were for a distance and almost every meeting of any consequence had one four-mile dash and frequently a race of four miles and repeat. Those were the days when the United States seemed to divide itself, and as in the Longfellow-Harry Bassett race at Long Branch, N. J., seem to array the North and East against the South and West in the matter of supporting a choice in the auction pools. The advent of the bookmaker brought a reduction of distance for the runners, in order that "the sure thing boys" might get a "quicker action" for their money and the inordinate desire to "get something for nothing" brought to us the "tout," and with him began the series of thefts which eventually led to legislation of the most drastic sort against all classes of horse racing, and indirectly has had its effect upon the harness industry. The enactment of anti-racing laws was brought about and is entirely chargeable to the horsemen themselves because of the encouragement given to the bookmaker.

Eliminate the book-maker entirely. Make it impossible for him to do business upon any association track where harness racing in particular is being conducted, and the one great evil will be eradicated and an excuse for being dishonest on the part of some driver "needing the money" will be removed. If betting must be indulged in, and it seems almost essential, use the Pari-mutuel system with a totalizer attachment and we will have the betting public making their own odds instead of some rascally hook-maker who must depend upon his ability to "fix" a driver in the race.

The inauguration of dash races as proposed by Mr. Starr, it appears to me, will have a tendency to change very materially our system of breeding. Instead of breeding a colt to "go the route" we will be breeding a class of horses fitted to be classed with the running "quarter-horse." Instead of horses fitted for "all purposes," we will have an apology for one, the form and hair hut with no stamina "to go for a doctor" should he live more than a mile from our home.

It may be that our system of racing colts is wrong and some change should be made in that respect either by reducing the distance or the number of heats required for a race, but why make a system of dash races simply to care for a class of horses which should have been kept at home in the first place. It is an unfortunate circumstance that an owner or driver may start from home with a good prospect entered in a full line of stakes or purses, win a heat or race and because of a sickness or lameness have to withdraw from racing during the current season, possibly for all time; but is it a fair proposition that the horses which are in shape to race through the circuit should be punished because of the other's unfortunate condition? All owners and trainers take such a chance when they make early closing entries and expect to send the horse home if he is not in condition to race further. It might be a good thing for some horses and owners if associations could afford to care for all their friends and give special or even dash races to cover the need of the unfortunates, but where would an association come out at the financial end? Would a special race made for unconditioned or crippled horses cover the point and enable all horses to win money? I do not believe it would, and a number of such races would soon pall upon the good nature of the track patrons who had paid their money to see actual contests of speed.

The idea of classing horses according to their winnings might have a tendency to give the earning capacity of some horses a much greater limit than now exists, classed as they are by the record, and the suggestion, should, in my judgment, receive the most careful consideration at the hands of our governing bodies. At the same time, the suggestion offered by Mr. Higgins seems to me to be the one most adaptable to our present system of racing. Re-classify the horses at the end of each three weeks of the campaign and thus take away the one that out-classes his fields, giving the horses at the end of each re-classifying period a better chance to win and by so doing carrying a full field all "down the line." The most discouraging thing facing an owner or driver is the fact that some horses able to distance his field will contend, sometimes as a good

work-out, from the opening of the circuit until its close for the big stakes or purses. This too, when the entrance fees of the slower horses are paid up and go to help pay the earnings of the phenomenal one.

The division of the monies as suggested by Mr. Higgins will give each horse something more than the amount paid out for entrance and in many instances such a sum, be it ever so small, is very acceptable.

Whatever is done must be along lines that will increase the earning capacity of the fast horse. What inducement is there for a man to give his horse a fast record when he knows that the faster he goes the smaller future purses and stakes will be for him to contend for? Make every class faster than the 2:10 for the greater amount. Seek to secure the entries of the fast ones Mr. Secretary and you will have something for your publicity agent to talk about before your meeting, and your patrons will do the talking after the meeting has closed. It is the fast horses the general public wish to see perform. It is the fast horse the driver likes to win with, and when the money in sight is sufficient to induce a real contest, each heat will be a "race from wire to wire" and the pleasure of all parties enhanced.

Mr. Higgins offers another suggestion which seems of paramount importance and that is the requiring of a guarantee that associations are not depending upon the entrance fees and gate receipts for payment of the purses or stakes. The expense of shipping from place to place is not the least for the campaigner to provide and when he has made a shipment covering hundreds of miles in order to get into territory, which early in the year had offered good purses, only to find that one or more of the towns in the circuit had declared off the "big money" stakes or purses and he might be given an opportunity to compete in a "special," how can he help feeling that he has "gotten the worst of it" and go away pledging himself to not only keep away from that town himself, but to keep others from getting the same treatment another year. Nearly every association of any standing can give such a guarantee without working a hardship and with it in sight, the horseman will feel a greater degree of security and will "take a chance."

There is another matter which might be considered at this time with propriety, and that is the practice by some of taking and making conditional entries. There is a rule forbidding such, and yet, there is hardly a meeting given that does not carry almost a direct evidence of some concession having been granted to a favored horseman that was not accorded to all. What is given to one is the right of every other man who makes an entry, and when horsemen and association managers realize that the rule will be applied in every case disclosed, there will be less of this sort of work. During the past year several parties felt the weight of the rule and it is safe to say that the future will find them among the "good boys" simply getting what they are entitled to. Adhere to the published rules of the parent association and if there are any bad rules the necessity for their abrogation will become manifest the quicker and the good rules will be the better appreciated.

So much has been said from time to time about the judge's stand that one might naturally think that subject had become exhausted, and yet, year after year, we find meeting after meeting with the "prominent citizen" acting as a judge of racing, even after he has admitted to his friends that he "knew little or nothing about the rules." While I am agreeable to give the "prominent" one every consideration, I do not think it right to jeopardize the chances of man or animal to earn money, because of ignorance of established racing rules. My idea is there should be a rule requiring a licensed presiding judge in every association stand with the licensed starter. That the presiding judge should make all decisions and covering the racing, and then the prominent citizen could occupy a seat where all in the grandstand can see him, but he, doing no harm. Make it obligatory upon the starting and presiding judges to know that the timer's stand is occupied by men who are competent, and by a frequent checking of their work during a meeting, know that the time which is being hung out is absolutely correct. This would, in my opinion, have an effect to get capable men in the timer's stand at each meeting and remove to a great extent the pernicious practice of suppressing time. When a driver is sure he is going to get "all that is coming to him," he is ready to do his best, but let him become suspicious of either the judges or the timers, and he will manifest a disposition to "protect himself" in some way or another.

Now just a word regarding the starting judge. There is no official on a race track that comes in for so much unjust criticism as that officer, nor does any one carry so much weight of responsibility—hence, it is of the utmost importance that a starter be a man of experience, of firm executive ability, and gifted with a marked degree of patience. Did some one lose a dollar, it was the starter robbed him out of it. Did some horse that had been chosen by the "rube" come in first, and because of a foul drive or other cause get set back, it was the starter who is to blame, although he had absolutely nothing to do with the decision, and in some way or another that official is given to understand the opinion of the "rube" and his friends. Some one writing in a recent number suggested that the horses be given the word on the fourth score, regardless of the positions or gaits. The writer has not had occasion to give

the horses a "sponge" in so long that the appearance of a water bucket in the hands of an attendant would seem to be a curiosity, and yet, I would submit, a grievous injustice might be done man and horse by establishing such a rule. Why not make such a rule applicable after the second score or even after the first score? It would be as just as after the fourth. Every horse entered in a race is entitled to consideration, and it is the duty of a starter to exercise patience with the had actor, but not to the extent of jeopardizing the chances of the other horses in the race. There is an old adage, "the race track is a poor place to break a horse," and it is true, and, while some horses that may come to a starter may carry the appearance of being badly broken, it is not always that class of horse that creates the trouble. Sometimes the driver seems to act as if unable to hold his horse, sometimes they seem to have too much strength, and there is a remedy for such. It is not always the same horse that spoils the score, with a large field, there may be various causes for the scoring. But to get to the bad actor. At almost every meeting we see a horse in the hands of an experienced driver that has taken a fit of sulks and will not attempt to come down for the word. The use of a little judgment on the part of the starter may get that horse away, and the result of the heat be an ample reward. Assume for an argument that a bad actor has drawn or earned the pole. He has the worst position possible for a horse to have, except he may be given the protection the position demands. If the rule suggested should be inaugurated and the word be given on the fourth score regardless of position or gait, the pole horse would be "out of it" before the word could be given. The horse that has the pole has earned a position demanding protection from the starter, and when the word is given with the pole horse not fully up in his position and on his stride, the chances are he will not be the pole horse going around the first turn, and if the field should be a full one, he will probably have to out-trot it in order to get any kind of position for the next heat. Protect the pole horse, give every driver to understand, by your work, that he and his horse will receive the same consideration at your hands that every other horse in the race receives and there will be no occasion for such a rule.

The writer had a personal acquaintance with "Earlville" Smith, the recognized dean of all starters, and upon one occasion was told by Mr. Smith, "Son, remember when you are starting horses to see that the pole horse receives your protection and he will protect your field." I have always found this advice to be sound, and it is one of the fundamental rules of my practice to know that the pole horse is in his place and on his stride. When it was my privilege to sit in a sulky, I always had a suspicion of a new starter, and when once my horse had earned the pole and the word had been given with me trying to bring down the field, with my horse doubled up and not up with the leaders, I always tried to protect myself, and usually did it to the discomfiture of the starter.

Upon the occasion of my first visit to the California circuit I worked for the Breeders' Association at Los Angeles. The very first race on the programme showed a fast class with a large field of two tiers. One of the drivers, Tom Snider, had an entry and drew the pole. He came down twice without his field, seemingly under the impression that the first money was his by right and he had no interest in the other contestants. I cautioned him and his reply was, "That's all right, judge, I'll protect myself." He did so the next score and I imposed a fine at once. He appeared to be surprised, but seemed to gather himself, and looking up at the stand said, "Thank you, sir. What may I expect for myself?" I assured him of my protection and expected him to bring the field down to me. He did so, got away, much to the pleasure of the crowd, and a great heat was the result. From that time on, I have never started a race in California or the Pacific circuit that every driver has not given me his assistance, because he knows I will protect him. Whatever is done, inspire the horsemen with confidence in the judge's and timer's stands, and they will do everything in their power to make the meeting a success by good racing and the elimination of the tedious scoring our friend seeks to obviate.

In reply to Mr. Starr. It has been my observation extending over a period of years that the horses which were being raced during the elder Doble's time, and even in the time of Budd Dohle, the two Maces, "Jock" Turner, "Red John" Murphy, and others in the early months of the year around New York and vicinity, when Prospect Park, Fleetwood, Saugus, Beacon Park, Albany, Utica, Rochester, and Buffalo constituted practically the Grand Circuit, were not to be compared with the horses of our day and generation from a racing standpoint. While there was some great racing then, the manner of training and equipment was not so conducive of extreme speed, and we would oftener see a free-for-all won in slower time than 2:20, than we would in faster or even in 2:20. In those days an average speed of a given meeting would not exceed 2:30, and the horses were "up to the starter" practically all the year round. In those days a meeting would be given calling for as much as \$300 for the free-for-all class, and the programme would include everything from the 3:30 class down to the free-for-all. I have attended meetings in early June in New York, New Jersey, and Pennsylvania at which a strong horse would start every other day and once in a while find a good horse in charge of a "bonehead" that would be raced every day and in as many classes as the owner or driver thought there was "a chance" to win. I don't believe that any number of dash races would have excited

the people of that time, nor do I think they can be made popular just now.

To sum up, I would suggest as follows: Keep harness racing as clean as possible; give the fast horse a chance to make an earning in keeping with his speed; eliminate the bookmaker; condemn every chance for granting or receiving "special" privileges; give the meetings just as advertised, and, above all, keep your judge's stand as well as the timer's stand above reproach, and we will have gone a long way toward solving the "what is the matter" of the present day.

THE ARIZONA FUTURITY.

The following is a list of those who made the second payment in the Arizona Futurity Purse No. 1 for foals of 1911:

- Geo. T. Becker's foal, by Zombro-Lady Secretary; foal by Zombro-Cymara; foal by Zombro-Lady Van Nuys; foal by The Bondsman-Lady Van Zom, and foal by High Pride-Helen Dare.
W. V. Bennett's br. c. by Bon Voyage-Clara Collins.
I. L. Borden's b. c. by Barney Barnato-La Belle Altamont; br. c. by Barney Barnato-Hester McKinney; b. f. by Barney Barnato-Kate Lomax; rn. f. by Charles D. Director.
W. M. Breckenridge's foal by Col. Greene-Nana Lea.
T. W. Brodnax's br. c. by Kenneth C.-Mary Chimes.
C. H. Butts' b. c. by Lou Kinney-Hermiona.
C. A. Canfield's foal by Carlok-in-Mamie Elizabeth; foal by Walter Barker-Redina; foal by Carlok-in-Eileen; foal by Don Reginaldo-Lillian Welborn, and foal by El Volante-Chloe.
H. W. Chamber's foal by Monnet-Nellie.
J. T. Clark's foal by Dr. Clark-Daisy Lee, and Little J. Johnnie by Palo King-Mattie J.
W. W. Cook's foal by Mark-Surprise.
A. H. Davison's foal by Milo McKinney-Dellnette.
Henry Delaney's br. f. by Joe Locke-Ella Mac.
Wm. E. Detel's foal by Bon Guy-Melba T.
F. E. Emlay's blk. f. by Washington McKinney Jr.-Bird W.
Geo. H. Estabrook's Estarado by Colorado E.-Dorothy Axworthy.
Ted Hayes' blk. c. by Bon Voyage-Cecille M.; b. f. by Carlok-in-Belle Pointer, and ch. c. by Bon McKinney-Helen Keyes.
Hemet Stock Farm's ch. c. by Geo. W. McKinney-Louise Carter; br. f. by Geo. W. McKinney-Mamie Redmond; b. f. by Geo. W. McKinney-Hemet Light; b. c. by Geo. W. McKinney-Louise R.; br. c. by Geo. W. McKinney-Muriel C.; b. c. by Geo. W. McKinney-Stambia; ch. c. by Geo. W. McKinney-Lady Zombro; b. c. by Worth White-Nealy W.
J. M. Hughes' blk. f. by Lou Kinney-Bird.
F. A. Haradon's foal by Carlok-in-Carrucua.
C. A. Iekel's blk. c. by Lou Kinney-Maydello.
Geo. W. Kanoff's b. c. by Lou Kinney-Juego de Azer.
H. M. Kennedy's foal by Dr. Clark-Gypsey.
H. C. Lockett's foal by Nyreal-Nettie Oh So.
John S. Ludt's blk. f. by Lou Kinney-Peggy Arnett; b. c. by Lou Kinney-Bostonia, and b. f. by Lou Kinney-Hallie Oh So.
F. C. Mosser's foal by Lou Kinney-Mollie M.
E. E. Marks' ch. f. by Peter Wood-Lady Belle Onward.
F. H. Metz's Bon Fire by Bon Voyage-Queen Abdallah.
Lafe Myer's b. f. by Arizona McKinney-Goldie Marc; br. f. by Col. Green-Dolly M., and b. f. by Lou Kinney-Dixie.
Wm. McEride's foal by Alconda Jay-La Moscovita.
M. B. McGowan's foal by Zolock-Queen Derby.
J. L. Ober's foal by Shirley-Lady.
Ed. L. Peckham's b. f. by Symboler-Little Lovejoy; br. c. by Symboler-Erinness Ruth; b. f. by Symboler-Mazette; b. c. by Symboler-Jessie Nutwood; b. f. by Symboler-McHenry mare; h. f. by Symboler-Linen, and br. f. by Oklahoma Allerton-Babe Cups.
W. J. Porter's b. f. by Bon McKinney-Golden Bliss.
R. G. Shawver's blk. c. by Leland D.-Oh So Mare.
A. L. Scott's Bonnie Rose by Le Voyage-Rosie Woodburn.
Jas. Stewart's b. c. by Copa de Oro-Easter D., and b. c. by Zombro-Silkwood Mare.
W. N. Tiffany's foal by Carlok-in-Lady Vasto.
C. H. Thompson's b. f. by Baffin-Daisy Sprite.
Valencia Stock Farm's blk. f. by Zombro Heir-Isabella, and br. c. by Zombro Heir-La Belle H.
Frank Wood's b. f. by Boydello-Binona.

WORK HORSE PARADE.

At the regular monthly meeting of the board of trustees of the San Francisco Society for the Prevention of Cruelty to Animals, held in the assembly room of the Mills building last Monday afternoon, at which Messrs. John Partridge, A. H. Lissak, E. P. Heald, I. B. Datzel, John McGaw, A. Van der Nallen Jr., Theodore Kytka, W. K. Gutzkow and John M. Ratto were present, a committee was appointed to confer with the directors of the Work Horse Parade Association with a view of organizing a parade to be held on July 4th, next.

There has been no parade since the one held September 9, 1909, which was the first one in the West. Over two thousand horses participated and it was the largest parade of horses on record up to that time, but larger ones have since been held in Chicago and London. At that time the parade was intended as an annual feature, but its postponement was deemed advisable last year, and it is now proposed to repeat it, if the directors of the Work Horse Parade Association desire to do so.

Other business consisted of routine matters and Secretary Matthew McCurrie read a report of the society's work for the month, showing 609 cases investigated, involving 1,029 horses and mules, 539 dogs, and 151 cats. Officers examined 1,008 horses, relieving 225, and ordering from work 147. Thirteen offenders were prosecuted and 225 warned. Twenty-seven horses were moved in ambulances, and four horses, 490 dogs, and 138 cats were humanely killed.

JERALD'S LAST CALL FOR JANUARY.

The Jerald Sulky Co., of Waterloo, Iowa, offer their latest improved sulky any size and color for \$54.15 cash with order, or \$57.00, \$10.00 to accompany order, balance when sulky is delivered, which may be any time before May 1st.

They do this to get your order before the rush, and also to get an idea of the sizes and colors that will be the most in demand in the coming season. SEND IN YOUR ORDER AT ONCE, and assist them in building a first class sulky at a moderate price. Their prices will be \$3.00 higher for the month of February.

SIRE OF FIVE 2:10 PERFORMERS.

There are sixty-three stallions that have each sired five or more 2:10 performers, and fifty-six of these sixty-three sires have records. Moko, Mambrino King and Sidney Dillon were trained enough so they showed fast miles. The Director General was one of the fastest colts of his time. Pilot Medium was a cripple and could not be trained, but his sire and his dam each had a record. Whether the remaining two—Bourbon Wilkes and Greystone—were trained is not known.

In looking over the blood lines of these sixty-three stallions, one will be impressed with the fact that—leaving out those bred in pacing lines—they are universally bred in trotting lines, the younger ones being more noticeable in this respect than the older ones, and with a larger number of performers—age considered—and a higher speed rate to their credit.

To those who note closely the efforts of development as an adjunct to breeding, the following table of these sixty-three sires will afford an interesting study. Those marked with a (*) are California sires:

Table listing 63 stallions with their sire, dam, and performance records. Includes names like Alcantara, Cleopatra, Alcantara Prince, Alma Mater, etc.

Table listing dam sweepstakes and other records. Includes names like Snow Heels, Steinway, Albion, Director General, etc.

THE BREEDING OF YOUNG BASSINGER.

A Missouri subscriber asks for the correct breeding of the dam of Young Bassinger, sire of Belle of Wabash. This horse is registered in volume II, page 88, of Bruce's American Stud Book. His dam is there given as Mischief, by American Eclipse; second dam by Sir Harry Hotspur (son of Sir Archy); third dam by Davis' Hambletonian (a son of Tayloe's Hambletonian by imported Diomed); fourth dam by Peacemaker, etc. There is no horse registered in Bruce's American Stud Book by the name of Sir Harry Hotspur, or Harry Hotspur.

Among the writings of Dr. W. H. Marrett (better known as Vision), I find a published tabulated pedigree of Belle of Wabash. Mr. Marrett gives the dam of Bassinger (the horse registered as Young Bassinger, and sire of Belle of Wabash) as Mischief, by American Eclipse; second dam a daughter of Hotspur; third dam by a grandson of imported Diomed, and fourth dam by Peacemaker. Dr. Marrett was one of the best posted horsemen on pedigrees that the writer ever met. He was a graduate of Bowdoin College, studied medicine, received a diploma with the degree of M. D., but his love for good horses and his interest in the trotting breeding problem created in him so strong a desire to visit the extensive breeding establishments in all sections of the country, that he engaged in the sale of books, chiefly standard medical works, and traveled with his own team through the New England, Middle, Western and Southern States, including Kentucky and Texas. While in Kansas he obtained permission to exhume the skeleton of Ethan Allen 2:25 1/2, which he did for the purpose of determining whether or not the son of Vt. Black Hawk 5 had a bone spavin as some had claimed. He found a slight protuberance just below one hock joint, but it was not of the nature of exostosis.

We are unable to state from what source Dr. Marrett obtained his information concerning the breeding of the dam of Bassinger (Young Bassinger), but know well that he considered it trustworthy, for he had no theories to support, and his investigations were made for the sole purpose of learning the truth. He learned that the dam of the noted brood mare Nell was by Embry Horse, a son of Embry's Lexington, instead of by Embry's Lexington, as was generally supposed. As there is no Sir Harry Hotspur registered in Bruce's American Stud Book, and knowing from an intimate acquaintance with him that Dr. Marrett was a thoroughly competent and careful investigator of pedigrees, and further, that his facts were obtained after volume I of the Stud Book was published, the writer is inclined to believe that Dr. Marrett's version of the pedigree is correct. Hotspur is registered in volume I of Bruce's Stud Book. His sire was Timoleon by Sir Archy and his dam was a daughter of Sir Archy.—Horse Breeder.

PLEASANTON RACE TRACK NOT SOLD.

The Pleasanton race track is still the property of H. E. Armstrong, and as far as is known by anybody concerned will continue to remain as such. A rumor gained credence this week that the present owner had transferred his holdings to the Spring Valley Water Company and spread like wildfire throughout the district. It is authoritatively stated that not an iota of truth is in the matter and Mr. Armstrong was not even approached by the company or any of its representatives concerning a sale.

There have been persistent rumors, however, within the past few months, that several parties, all horsemen, have been contemplating the purchase of this valuable piece of training ground, and, like any other good business man, probably Mr. Armstrong would sell if given his price. The present condition of the property is much better than for many former years, many thousands of dollars having been spent within the last two seasons by the owner, in improvements.

These rumors, Mr. Armstrong says, have never materialized, and at this writing he does not know of anyone who is seriously considering even making him an offer.—Pleasanton Times.

All the different lines of horse breeding are flourishing as is indicated by the auction in Paris, France, recently of a Clydesdale stallion for the record price of \$47,500, the largest price ever received for a draft horse. This is the more striking from the fact that the horse was twelve years old and the best previous price ever received for a Clydesdale stallion was for a two-year-old at \$15,000, a record that has stood for twenty years. Trotters are selling in Europe and Australasia for more money than ever before, besides the Europeans are also expending hundreds of thousands of dollars in the United States for high class horses, showing that the industry was never in a more prosperous condition. This showing is the more remarkable in France from the fact that the automobile has an exceedingly strong hold in that country, but notwithstanding that the gasoline wagons are in great demand because of the spleudid condition in which the roads are kept, still the fact remains that horses are bringing more money than ever before.

NOTES AND NEWS

Kinney Lou 2:07½ has arrived safely in Russia, his future home.

There are some splendid bargains offered in our For Sale columns.

Walnut Hall Farm is going to still further reduce its broodmare contingent.

Dick McMahan is wintering twenty-three horses at the Libertyville (Ill.) mile track.

Daughters of Baron Wilkes produced twenty of the new standard performers of 1911.

Doesn't the trotting horse industry begin to look real good to every one this year!

Axtell, by William L., son of George Wilkes, is the sire of 124 trotting and twenty-two pacing standard performers.

Send in your items. We know there is a revival in the trotting horse industry in your vicinity, so let us hear the very latest news.

It will be a great loss to the California horse industry if Lijero 2:15½ is sold to some Eastern or foreign horseman. Horses of his class are extremely rare.

Coralene 2:23¾, by Del Coronado 2:09¼, dam Ethaline (p.) 2:19¼, by Coeur de Leon, is a new performer.

H. K. Devereaux was re-elected unanimously as president of the Grand Circuit at the annual meeting held January 9th, in New York.

W. E. D. Stokes, of New York, has given a valuable trotting stallion to the breeding plant of Booker T. Washington's Tuskegee Institute. Other millionaire horsemen will give mares.

El Angelo 57039 is the name given to the handsome trotting stallion belonging to D. W. Wallis, of Los Banos, that was sired by The Angelus 2:10¼, out of Maud J. C. (dam of Nearest McKinney 2:13¼), by Nearest 2:22½, etc.

It looks very favorable for that big meeting in 1915 at the Stadium. A good live committee is working on it and if there is a body of men who can accomplish anything in that line this is just the one to do it.

C. A. Purcell, one of the owners of The Meadows tracks at Seattle, has a bunch of mighty good looking youngsters by Carlokin 2:07½ and Del Coronado 2:09½, out of high-class mares.—Pacific Horse and Sportsman's Review.

It is reported that King Brook 2:07½ will not be raced in 1912. Business arrangements may keep Mr. Higgins from getting to the races, in which event he will spend his leisure time improving King Brook's gait.

Budd Doble writes from Hemet as follows: "The Hemet Stock Farm recently purchased Louise A. 2:17 by Boodle 2:12½, dam Azrose by Azmoor 2:20½, for the purpose of breeding her to the champion Wilbur Lou."

Absolute dispersal of the entire breeding interests of the late Uhlein Farm will take place at the Wisconsin State Fair Grounds, Milwaukee, Wis., at public auction. This includes ten yearlings by The Harvester 2:01.

Walter W. 2:04¼, by Little Frank (p.) 2:09, dropped dead at Memphis, Tenn., on the evening of January 15th. He was owned by W. R. Neill and Walter McLain, of Memphis, and was for three seasons past a good winner for Mr. Geers.

Attention is called to the advertisement of the grandly bred Percheron stallion Electeur Jr. He is one of the largest, most compactly made, gentlest and surest foal getters in California. He should pay for himself this season in any farming country.

Some of the leading trotting horse journals are getting badly tangled up on the huddle question. It would be a good idea if they dismounted and let this "question" out a hole—yes, several holes—just for the benefit of the long-suffering public.

The famous Point Breeze race track, Philadelphia, which was constructed in 1855, was sold last week and is to be cut up into building lots. It was over this course that Dexter, Goldsmith Maid, Lady Thorn, Harry Wilkes, and many other celebrities raced.

Mr. T. J. Crowley, treasurer of the Pacific Coast Fair and Racing Association gave \$100 to the fund to carry the work on. There are scores of others to be heard from, and when everything is finally settled it will be found that the trotting horse breeders and owners will all be represented on the book, by substantial sums.

Mr. I. L. Borden's beautiful undefeated black mare Cleopatra 2:11, is running out in a paddock in Alameda and has gained over 100 pounds in weight since her return from the meeting in Southern California. She will be a 2:05 pacer this year, if no accident happens her.

Vallejo Girl 2:10¼ Mrs. F. H. Burke's fine trotting mare, is the first one to be booked to Bon McKinney (3) 2:24¼, at San Jose. Mr. T. D. Witherley has booked his good mare Jetta Richmond (dam of Diablo 2:08 and Valentine, two-year-old trial of 2:20) to this grandly bred son of Bon Voyage 2:08.

Mr. McPherson, of Vancouver, B. C., is expecting his twelve trotters and pacers any day at the Pleasanton track. He engaged his stalls for them last week. It looks as though there will be at least 200 horses working at the "Historic Track" before spring.

Dr. Hartnagle, Seattle, has taken up Henry 2:13¼. He was fired last year, is now sound, and looks like he will get to the races again this year. Hartnagle is also jogging a good looking three-year-old by Diablo 2:07¼, dam Red Girl, dam of Panama Maid 2:20.

There are thirteen weeks of good racing on the grand circuit this year and twelve weeks on the Pacific Coast Fair and Racing Circuit, if the latter commences at Vancouver, B. C., as outlined. There may be a few "feeders" to it from Marysville, Chico, Roseburg and the Prairie Provinces Circuit.

Remember there will be some grandly-bred racing material in the shape of promising colts and fillies sold at the Chase sale in this city, February 12th. Some of our best and purest-gaited game trotters will be well represented, viz: Bon Voyage 2:08, and Silver Bow 2:16.

Mr. Sbirley Obristy, of Phoenix, Arizona, left this city for Walla Walla last Monday, where he is to confer with the delegates of the North Pacific Circuit relative to the new Pacific Coast Fair and Racing Association which was formed last week. Mr. Christy expects to return about February 5th.

B. O. Shank, of North Randall, O., will race over the Grand Circuit tracks this season for H. C. Chambers, of Long Island, N. Y., Evelyn M. 2:01¼, pacer, by The Spy; J. D. Mac. 2:13¼, pacer, by J. H. L. 2:08½, and the trotter Four Stockings, by Kinney Lou 2:07¾. This last named once belonged to the late F. J. Kilpatrick.

An Eastern horseman who has seen Lijero 2:15½, says: "If he was in the Middle West or East he would be sold within a week." He has grand size, style, and breeding. He can beat 2:20 barefooted, without wearing a boot and with only one bit in his mouth. Take him for all in all he is one stallion out of ten thousand.

A subscriber would like to know how Jennie S. 2:20, a pacer by Directum 2:05¼ that got her record at Colusa, August 14, 1902, is bred. Her pedigree on the dam's side is given as "untraced," but we believe a mare of her caliber must have some breeding on the maternal side.

The idea of extending the stadium in Golden Gate Park to one mile meets with the approval of all horsemen. The centerfield will then be long enough to make all kinds of straightaway tracks for the athletes who will compete in the Olympic games to be held there in 1915.

R. O. Newman, of Visalia, could not resist the temptation to visit Studebakers' and buy one of those nobby driving carts all complete for \$60; the usual price being \$125. The prices of all others advertised in our Holiday number are fifty per cent less than they were originally.

There never were two more enthusiastic meetings of trotting horsemen held in California than those at the Palace Hotel Thursday, January 18th and Monday, January 22d; and great progress was made at both meetings for the betterment of the interests in which they, as well as all horse owners, breeders and trainers on the Pacific Coast, are concerned.

The seven-year-old bay trotting mare Marigold 2:12¼ has been sold by John W. Hoyle, of Illinois, to Thomas Murphy, of New York, for a long price, announced as \$10,000. Marigold holds the world's record for mares for five consecutive heats over a half-mile track, and has done a trial mile better than 2:10, so great things are expected of her in the hands of the famous trainer.

"The best looking lot of trotting stock I ever saw," was the comment of a prominent horseman who visited George Stickle's place with a view of selecting some good colts and fillies. As these are all listed in the catalogue this gentleman will have to take his chance of getting them at the auction sale to be held at Fred Chase's Pavilion, February 12th. There are youngsters here by Stam B. 2:11¼, Bon Voyage 2:08, Silver Bow 2:16, Daedalion 2:08½, and Stickle out of some of the handsomest mares ever seen in a pasture. In next week's issue we will publish a more extended notice of those to be sold. It promises to be one of the best sales ever held at this place.

There are many owners of broodmares who would like to own, race and breed them to a first-class stallion. Jas. W. Marshall, of Dixon, has just the horse they are seeking. His advertisement appears in this issue. He is also offering some very choicely bred mares and fillies. These will be sold at a sacrifice for the reasons he states, and it will pay anyone to go and look them over, and get his prices.

Mr. G. Cuneo, of Oakland, owner of Gracie Pointer 2:07¼, in company with Thomas J. Kelly, of Louis Taussig & Co., and the popular "Jimmy" McVeigh, a well-known business man of Oakland, visited the Pleasanton track last Monday. Mr. Cuneo spent a portion of the time with his valuable pacer and also looked at her mother, in the Deftyder pasture. She is in foal to Aerolite.

The Sacramento Driving Club has elected officers for the year as follows: Thomas Coulter, president; George Vice, vice-president; M. J. Murray, secretary; Sam Smith, treasurer. The secretary's annual report showed receipts for the year of \$1,608.42. At a meeting to be held early in March the programme for the season of 1912 will be mapped out. It is planned to increase the membership to 200.

Mr. E. D. Diggs, of Stockton, has taken his grandly bred stallion McAdrian, by Guy McKinney, to Pleasanton, and intends to make a season with him there, and then put him in training. McAdrian is the sire of Bert Kelly that trialed in 2:11 last season at Pleasanton, and will be a candidate for Grand Circuit honors this season. McAdrian also sired Grace McAdrian 2:13¾, and Grace Chalmers (trial) 2:18.

J. L. Tarlton has sold to G. E. Tulpin, of Pawnee, Ill., the black yearling filly by Prince McKinney, dam Serpolita (3) 2:25¼ by Mendocino, grandam Sally Benton 2:17¼ (dam of Serpol 2:10 and three others), by General Benton, the third dam is Sontag Mohawk, dam of nine with records of 2:30 or better. This filly is individually in keeping with her rich pedigree, and as she is entered in all the futurities is likely to be heard from later on.

Since the schedule of places and dates claimed by the Pacific Coast Fair and Racing Association has been announced many owners of promising trotters and pacers have been solicited by trainers to have them put in training immediately. There are owners of other good ones which will find ready sale if their merits are properly set forth. It looks as if a "boom" has at last been started in the trotting horse industry on this coast and everybody engaged in it will share in the profits.

The State Fair Futurity Stake No. 4, valued at \$5000 is one of the best events in which trotters and pacers can be entered, for, besides the honor of having a colt or filly named in it, there is this additional advantage, it enhances the value as a selling proposition. Entries for this stake will close next Thursday, February 1st, with C. Allison Telfer, manager of the State Agricultural Society, Sacramento, Cal., and this is the last notification. For conditions see advertisement.

How about that stallion advertisement? Owners should get busy. Another vital requisite, and one which every broodmare owner wants, is a card containing a full description and tabulated pedigree of the stallion he breeds his mare to. The "Breeder and Sportsman" has unsurpassed facilities for doing this work promptly, neatly, and absolutely correct, giving due credit to every one of the progenitors of every stallion and mare up to 1912. This has been made a specialty with this journal this season.

Stallion owners should endeavor to get all the good mares they can for their horses, for the produce in 1913 will have some of the grandest opportunities for making money as two-year-olds ever offered colts and fillies of that age. The only way to get these mares is to place an advertisement of the stallion in the Breeder and Sportsman at once. The cost of one service fee will pay this, and in no other class of advertising can a man get greater financial as well as wider publicity, and publicity brings business.

In the article about Andy McDowell which appeared in our issue of January 13th it was stated that Charles Jones drove the pacemaker when Alix trotted in 2:03¾ and Directly as a two-year-old paced in 2:07¼. This was an error. It was Charles James, now at Pleasanton, who drove the pacemaker in these events. Charley stands in the very front rank when it comes to this kind of work. His first lessons in it were taken on the San Mateo Stock Farm when the late John A. Goldsmith was "teaming" the colts and fillies there.

H. Henry, of Stockton, has three horses at Pleasanton, consisting of the eight-year-old pacer Will Guthrie, that has already paced a mile in 2:10¼; he goes free-legged and looks, acts, and paces like the "real thing." Mr. Henry also has a two-year-old filly sired by Alconda Jay, out of La Moscovita; she is just a beginner but is nicely gaited and acts like the "making" of a good one. Beretta D., is the name of a very nice filly he has, she is by Charley D. 2:06¼, out of Beretta 2:22½ (sister to C. The Limit 2:04¼) by Searchlight 2:03¼, out of Bertha, "the greatest of all brood mares." This last named represents the "acme of breeding."

Nine horses from the Sacramento Valley Stock Farm, the property of Dr. C. S. Farnum, of San Francisco, arrived at the Pleasanton race track last Monday. They consist of the grand-looking, beautifully-bred Sidney Dillon stallion, Dillcara; Flosnut by Nutwood Wilkes 2:16½, and seven of the progeny of Disscara, one three-year-old stallion and six yearlings. These are in charge of trained Ed. Rail.

The Prairie Provinces Circuit claims the following dates: Calgary, July 1st; Winnipeg, July 15th, Brandon, July 22d; Regina, July 29th; Saskatoon, August 5th; Edmonton, August 12th, and Vancouver, August 12th. Many horses that participate on this Canadian circuit will undoubtedly be entered all the way down through Washington, Oregon and California, and finish up at Phoenix, Arizona. It will be a money-winning journey if "they have the goods" from July 1st until the middle of November.

Onward 2:25¼ is the leading brood mare sire of 1911. His daughters produced 22 of the new standard performers, 16 trotters and six pacers. Baron Wilkes is third in rank, with ten trotters and nine pacers. Nutwood 2:18¾, the leading sire of brood mares, with a total of 380 standard performers to the credit of his daughters, is fourth, his daughters having produced 17 of the new standard performers of 1911.

The death of the two-year-old filly Harvest Girl, by The Harvester 2:01, at Memphis, which occurred unexpectedly but a few days ago, has been a blow to Mr. Geers. Last season, as a yearling, with only a little work, she showed what was considered astonishing speed, and it was confidently believed that she would be a crack two-year-old, and thus start the career of The Harvester as a sire with a flourish, and very early. As she was Mr. Geers' own property, the loss to him is a double one.

Parker Adams, of Vancouver, Wash., expects this season to race his five-year-old stallion, Buford Boy by Zombro, dam Alta by Altamont, second dam by Hambletonian Mambrino. Buford Boy was worked just a little by Mr. Davis last year, who started him in a pacing race the first day of The Dalles fair, winning second money in 2:27, and the next day starting him again in a trotting race and again winning second money, and this without changing a shoe, though he did wear hoppers.

The government recently purchased in Meade county, Kansas, a lot of Morgan colts sired by Headlight 4683, weight 1,150 pounds in working condition. This stallion was foaled on the open range among the bronchos, where his dam, a pure-bred Morgan from Vermont, had been running for a year. This occurred on March 4, 1893. Summer and winter he ran on the range with nothing but the native grasses for feed, except during the blizzards, until three years old, when he was put under a cowboy saddle and ridden to the annual roundup. The next few years he was the crack cow horse of the Southwest, both as a cutting horse and roper. He also won many cowboy races with a rider and seventy-five pound saddle.

Vancouver, B. C., will end the so-called Prairie Circuit in Canada and begin the North Pacific Circuit. Manager H. S. Rolston, of Vancouver, looks for a big year. A beautiful plant is being built and the city of Vancouver is standing squarely behind the institution. They have put nearly \$200,000 into the plant and are planning still greater improvements. They have a horse show building with an arena 85x225 feet, and it is a beautiful structure. Everything in the plant is along these lines, and the city has placed \$140,000 in the budget for the Vancouver exhibition of 1912. Last season Vancouver opened the North Pacific Circuit with four \$5,000 stakes, given by the business men of the city, and with other purses and stakes in proportion. The consensus of opinion is that the association did not get the worth of their money in the contests offered. Just what the policy of 1912 will be in the harness division has not been announced, but will be known definitely after February 2d.

There is a stallion in California that has been overlooked by our horse breeders because he has been so far away from where the best mares are, and this is the beautiful bay stallion Best Policy 42378. He is owned by R. O. Newman, of Visalia, Tulare county. It is this owner's intention, however, to send him to some good track to make the season of 1912, and then give him a record, as he has trotted halves without any work (except being driven on the road) in 1:10. He was sired by Allerton 2:09½, the greatest of Jay Bird's speed producing sons, and his dam is Exine 2:18¼ (dam of Riverside (3) 2:30, and sister to Exine dam of Bessie Maurine 2:15½ and Samuel Lee 2:17½), by Expedition 2:15¼ (sire of Bon Voyage 2:08, etc.); second dam Euxine (dam of Euxenite 2:11¼, and 5 others in 2:30), by Axtell 2:12; third dam Russia 2:28 (dam of 1, and sister to Lord Russell, sire of Kremlin 2:07½, etc.), by Harold; fourth dam Miss Russell (dam of Maud S. 2:08½, Sclavonic 2:09¾, Nutwood 2:18¾, and 4 others in 2:30), by Pilot Jr., etc. His colts and fillies in Visalia are perfect in conformation and are the greatest field trotters a man ever saw. He was foaled in 1905 and his oldest is only three. He will make a splendid name as a race horse and sire, and cannot help it, judging by his pure gait and rich speed inheritance. His four dams are all in the great broodmare table.

Snow six to eight inches deep on the level. Weather for the last two weeks zero and below nearly every morning. Fourteen below on Tuesday of this week. Not much doing among the trotters, but the trainers are very busy with the hot stove circuit meetings. Such are the present conditions in the Blue Grass country.

George H. Estabrook, of Denver, has made his regular annual purchase of a Grand Circuit performer by sending to Indiana for Hal Wise, a fast sidewheeler who was campaigned over the half-mile rings last season very successfully. Estabrook paid \$5,000 for this pacer, but thinks he got a bargain and predicts that he will prove just as a consistent performer on the big rings as he has at former meetings.

John F. Madden has claimed the name Wefers for the yearling half-brother of Colorado E. (3) 2:04¾, which he bought from W. L. Spears last fall. This son of General Watts and Flossie McGregor is named for Barney Wefers, the famous sprinter among the American foot runners. George B. Hayes, who, it is understood, will train exclusively for the master of Hamburg Place and his soas in the future, will have the pleasure of giving Wefers his first lessons.

Right now it looks as if Colorado E. (3) 2:04¾ had as good a chance of heating The Harvester's record as any stallion living, says the Denver Post. Billy Burk 2:03¾, Willy 2:05, and Gay Audubon record. But of this quartet Colorado E. is thought of coming within hailing distance of the present record. But of this quartet Colorado E. is thought to possess by far the most speed. When placed in training last fall, Colorado E. worked halves in 1:00 at Lexington, showing that he had not lost his great speed exhibited as a three-year-old. Judging from this, it would seem as if the great colt owned by George E. Estabrook, Denver, Colo., had a chance of wresting the crown from The Harvester.

A new trotting circuit is to be organized in Western Canada. It is being planned by the racing committees in connection with the various fall fairs and will include meets at Calgary, Regina, Brandon, Winnipeg, Prince Albert, Battleford, Edmonton, and Lethbridge. Each racing program will offer \$10,500 for harness races and \$8,500 for running events. A meeting for the organization was held at Saskatoon, January 10th. The first race meeting will be held in June, and the chain will extend until just previous to the harvesting season. Purses will be hung up for trotters and pacers, and it is intended to attract horses from all parts of Canada and the States. Good tracks are already in operation at each of the towns and the new circuit, accordingly, will entail comparatively little expense.

William Hendrickson's brown gelding Tom Hendricks and the bay gelding Jim Hendricks, that are now being worked at Pleasanton by Farmer Bunch, were by McKena (son of McKinney 2:11¼, out of Helena 2:11¼, by Electioneer 125), and out of Mowat by Owyhee 2:11, grandam Pippa (dam of Frank Dale 2:23½) by Stilleco 1436; third dam Lucy E. (dam of Azalea 2:15 and Joe Scott 2:18) by Black Walnut 17361; fourth dam Ethel by Eufield 128; fifth dam Betsie Trotwood by Peck's Idol; sixth dam Pilotta by Little John, and seventh dam Dalrymaid by Tennessee. These geldings will be seen at the races this year. Mr. Hendrickson has a mare called Stanford Girl (in foal to The Bondsman) and Mary Hendricks, five-year-old, both are by McKena, out of Ohio by Peveril 2:14 (son of Elyria and Jenny D., dam of Gertrude 2:12 by Tom Hunter 935; second dam by Whiteline Jr., son of Whiteline 2144. And from what Farmer Bunch says this horse McKena will be the greatest sire of pure-gaited trotters ever bred in California, and if anybody doubts it let them come to Pleasanton and see these of Mr. Hendrickson's.

INFLUENCE OF INHERITANCE.

Todd 2:14¾ now is credited with four sons that have sired standard performers, viz: Cochato (3) 2:11½, sire of 16, and 14 of them trotters; Kentucky Todd (3), sire of five, all trotters; Sorrento Todd 2:11, sire of one trotter, and Teddy Sentinel 2:26½, sire of one trotter. Cochato (3) 2:11½, Kentucky Todd (3) 2:08¾, and Teddy Sentinel 2:26½ were begotten before Todd 2:14¾ trotted to a record, and so was Bob Douglas 2:04¾, the fastest of Todd's 2:14¾ get. The dam of Cochato (3) 2:11½ is Castanea 2:19¾, a mare of superior breeding and extreme natural speed, whose record, when she produced Cochato (3) 2:11½, was 2:29½. She is also the dam of Bosun (p) 2:05¼. The dam of Kentucky Todd (3) 2:08¾ was the great brood mare Paronella, no record, but she is the dam of eight standard performers, all trotters, including Country Jay 2:05¼, Kentucky Todd (3) 2:08¾, and Ormonde 2:08¾.

The dam of Sorrento Todd 2:26½ and Teddy Sentinel 2:11 was the great brood mare Sorrento (no record), but she is the dam of seven trotters with standard records. Four of the sons of Sorrento have sired standard record trotters. The two most noted of these sons are The Bondsman 37641, sire of the champion three-year-old trotter Colorado E. (3) 2:04¾, etc.; and Jay Hawker (3) 2:14¾, sire of Country Jay 2:05¼, etc. The dam of Bob Douglas 2:04¾, the fastest of the get of Todd 2:14¾, is the noted brood mare Glycezone, that had no record, but she also produced the trotter Poindexter 2:09.—Horse Review.

THE BIG MEETING IN 1915.

Great Enthusiasm Shown by the Horsemen Appointed to Arrange for It.

At a meeting of the directors of the Pacific Coast Trotting Horse Breeders' Association and the Park Amateur Driving Club, held at the Palace Hotel, Monday evening steps were taken toward giving the largest harness race meeting ever held in the United States. This is to take place at the Stadium, Golden Gate Park, in conjunction with a horse show and livestock exhibition.

The meeting was called to order by John A. McKerron, president of the Driving Club, and the following committee, representing the two organizations, was appointed to confer with the Park Commissioners and the Fair Commissioners regarding the project: Captain William Matson, I. L. Borden, S. Christenson, A. L. Scott, Colonel J. C. Kirkpatrick, T. J. Crowley, Fred W. Kelley, Charles Paine, Senator Ben F. Rush, Fred W. Thompson, Charles A. Durfee, Thomas Bannan, Dr. Ira B. Dalziel and John A. McKerron.

An important preliminary to be arranged will be to extend the Stadium track from its present length, three-quarters of a mile, to a mile. It will have to be widened on the homestretch so as to accommodate the large fields of horses which will undoubtedly start in the extensively advertised stake and purse races to be given. As outlined, the proposition is to give a "big" meeting, open to horses from all parts of the world, the amounts to be raced for being from \$2,000 to \$25,000, and at least three at this last named figure will be given. The conditions of entry will be made so easy that every horse owner, breeder and trainer who has a likely looking "prospect" will make an entry.

The leading Eastern reinsmen, such as Ed Geers, Thomas W. Murphy, William L. Snow, Walter H. Cox, Joe Serrill, A. S. Rodney, Clem Beachey Jr., Curt Gosnell, Harry Stinson, Lon McDonald, W. L. Rhodes, A. L. Case, D. McMahan, J. Dickerson, Billy Andrews, D. A. McEwen, Gus Macey and others, besides our home corps of efficient knights of the sulky, such as Charles Durfee, William Higgins, Will Durfee, Charles De Ryder, Elmo Montgomery, Charles James, Lon Daniels, Charles Spencer, Fred Chadbourne, Frank Childs, Thomas Murphy, Charles Whitehead, Henry Helman, Walter Mahen, Dick Wilson, Fred Ward, James Sutherland, W. Liggitt, Al Schwartz, Joe Twohig, P. F. Davey, John Shippen, Samuel Hoy, J. Miller, Det Bigelow, H. S. Hogboom, W. Hogboom, Lute Lindsey, Ben Walker, John Quinn and several from Australasia. These men will have the very best bred and fastest trotters and pacers—the cream of all stock farms.

Many of these Eastern horsemen will bring their horses to the Phoenix and Los Angeles meetings of 1914 and winter them on the famous tracks at this last named city, San Diego, Fresno, Salinas, San Jose, Pleasanton, Santa Rosa, Sacramento, Woodland, Marysville and Chico, and after this big meeting, which will doubtless take place during the latter part of July, they will be taken east to participate in the meetings on the Grand and Western Circuits. Some will remain to race on the Pacific Coast Circuit. Dates will be arranged for the best interests of all concerned. The arrival of so many famous horses will stimulate all interested in the trotting horse industry here and no doubt many of our visitors will buy stock farms and start in breeding horses on a large scale for they can be raised and developed quicker and cheaper than in any other part of the world.

The attendance at this meeting each day should be over 30,000, while on days when the three big events are to take place there will probably be at least 100,000 people present. Excursions from all parts of the Pacific Coast and as far east as Chicago will be arranged for those who desire to attend this meeting, and at the same time see the greatest of all exhibitions.

There will be no limit to the enthusiasm aroused by the announcement that such a meeting is to be held, and as most of the men appointed have had years of the most successful experience in conducting fairs and race meetings, there can be no doubt of its ultimate success financially as well as for the best interests of the horsemen, farmers and breeders.

The horse show in connection therewith will attract the best specimens of the equine family in the United States, Europe, Canada and Mexico. The sum of \$6000 has been set aside for premiums in the saddle horse class and some claim that \$20,000 will be awarded for premiums in carriage horses.

The livestock exhibit in this fine climate will surpass any ever given in Chicago or St. Louis, and arrangements will be made with the railroads and steamship companies regarding transportation rates that will be conducive to attracting a large entry list in every class.

California will be more directly benefited by this portion of the exposition than any other, for, as a livestock growing State, it is rapidly forging to the front.

The breeders here are paying high prices for the best cattle, sheep, and hogs. The dairying industry is increasing far more rapidly in proportion to the population than in any other State in the Union, and everyone engaged in it finds it one of the best of paying industries. Buyers from all parts of the world will attend this big exhibit and many sales will take place. Steps are being taken to engage the services of the most competent and best qualified superintendent of livestock exhibits in America in order that all the details of this great department will be satisfactory to exhibitors.

Drink Jackson's Napa Soda.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

ANOTHER CONTRABAND GAME SEIZURE.

Why go to the Suisun marsh or any other shooting grounds to hunt ducks? Wild ducks are plentiful in this city enough so to enable a score of hunters to bag, last Saturday morning, 609 ducks—cans, sprigs, teal, spoonies, mallards, in fact as good a variety of prime, fat birds as our best shooting grounds produce.

This wild game coup was arranged by the Fish and Game Commission and carried out by Desk Deputy J. S. Hunter and a score of deputies called in from Marin, Sonoma, Napa, Sacramento, Contra Costa, San Mateo, Santa Clara and Alameda counties, to aid the squad of local deputies.

Twenty-one search warrants issued Friday was the "open sesame" sign hung on every cold storage, dry storage or old horse bin under the control of each and every dealer doing business in the California Market.

Six hundred and nine ducks confiscated meant duckless dinners for at least 300 gourmets last Sunday. One hundred and fifty cottontails argued a famine in the line of broiled game delicacies. All this through the carelessness of the dealers in being caught napping.

So sanguine was the Board in its desire to make a successful raid that Commodore Nidever and Chief Engineer Christianson of the Quinnat were requisitioned to active shore duty.

Unless the commission houses, agents of the Hunters' Express Company, supplied the dealers later in the day, ducks were at a premium in many hotels, restaurants, clubs and private residences for the Sunday diners.

Lucky immunity from seizure was the lot of different bunches of ducks, left in cold storage or for picking, properly tagged and accounted for as the legitimate property of private citizens.

Deputy Commissioners were on guard at every point of ingress or egress of the market at 8 a. m. These sentinels were instructed to examine everything coming in or going out that savored of ducks, quail, snipe or fish infractions of the law.

When the outside chain of cynosure was fastened, two searching squads under Deputies Clark and Fairfield, fortified with search warrants for every receptacle of game, poultry, fish, meats, etc.—cold-storage apartments and provision lockers—in the high food emporium, immediately got busy.

The California Poultry Company and O'Brien, Spotorno & Mitchell stalls received initial attention. First blood was drawn by Deputy Meissner, who grabbed a sack of ducks sent up through the California-street elevator.

The search of the latter named establishment resulted in the seizure of 580 ducks and 150 cottontail rabbits, their totals being grossly in excess of the legal allowance.

The dragnet thrown over the California Poultry Company's stalls drew but twenty-nine ducks, all mallards.

While the officers were busy here, a driver for the Hunters' Express Company arrived with bags of geese and ducks. One bag of ducks was offered, and when the bearer spotted the deputies, an attempt was made to run the blockade through Summer street. Deputy Armstrong stopped the sprint, and gathered in the ducks. This lot was the subject of a spirited argument by the poultry men, responsibility and custody being declined. The sack was assigned to the general junk pile, awaiting a claimant.

The sudden appearance of the land and naval forces of the Fish and Game Commission temporarily paralyzed the routine of the market. Efforts on the part of interested employes to sequester contraband stock were ineffective.

In one cellar a dozen Italian duck pickers were thrown into a panic by the invading forces. The suggestion by the boss picker to pick geese and drop the ducks was followed quickly. The wise deputies, however, found in several boxes limit numbers of ducks under the mantle of feathers.

An alleged practice by one firm in keeping within the letter of the law so far as possession of the legal quota of ducks or other game is concerned caused an almost non-productive search in one instance. Game orders of this firm, it is claimed, are usually filled as required by telephone requisition on outside commission house depots.

Six sacks of ducks, shipped from different points by market hunters in care of the Hunters' Express Company, consigned to different individuals, were not taken from O'Brien, Spotorno & Mitchell's stand. The contention was that these birds were private property, legitimately shipped, and not held in violation of the law and the bags were not in excess of the legal limit.

The searching squads were equipped with electric lamps, also rods and hooks, that enabled a thorough search and overhauling of every nook and cranny on the main floor and in the dark and labyrinthine cellar of the big market. As an instance of the thoroughness of the search, a huge waste and garbage pile in the cellar was shoveled over to disclose if any attempt had been made to plant in an unsuspected spot contraband game.

The rakeover of the fish stalls drew blank. In one of the market restaurant lockers, however, several pounds of undersized trout were discovered. This find was declared immune from seizure when the restaurant man produced a properly receipted bill for the fish, which had been raised in private ponds and sold by the California Trout Farm Company.

During the winnowing of the cold-storage boxes in the market cellar the searchers found intact and properly sealed a large assortment of Japanese woodcock, Chinese ducks and pheasants, Asiatic quail and other table delicacies belonging to the commissary department of the steamer Manchuria. This game consignment was held in escrow until the Oriental liner departs from this port on a return voyage, the tolerated custom being to allow these adjuncts of the steamship larders to be properly taken care of while in port for use on the return voyage.

The rank and file of Deputy Hunter's forces were: Deputies R. B. Heacock, M. S. Clark, Carl Meissner, J. L. Bundock, A. M. Fairfield and Ernest Bouchard of San Francisco; George Neale of Sacramento; F. H. Smith of San Mateo, W. J. Sedgely of Oakland, Earle Downing of Pleasanton, I. L. Koppel and F. W. Robbins of San Jose, W. H. Armstrong of Vallejo, O. M. Emerald and Sid Cavil from Marin county, W. H. Moore of Napa, F. Thomas, Captain W. B. Nidever and Engineer Jake Christianson.

The ducks and rabbits seized were distributed among different charitable institutions this week.

FISH AND GAME COMMISSION WORK.

In pursuance of its policy to take the people of the State into its confidence in regard to all fish and game problems the State Fish and Game Commission has indited a letter to the press of the State, through which it hopes to get the co-operation of all who are interested in game protection, game propagation and the enforcement of the game laws.

The Commission wants the fact thoroughly advertised that the fish and game of the State belong to The People as a whole and that each one of them ought to take an individual interest in preserving it against the aggressions of pot hunters, lawbreakers and monopolies. The State goes on the basis that every person, whether he is a sportsman or not, is vitally concerned in the question of whether the game supply is kept up and available so that it can be purchased or hunted by the fairly well-to-do as well as the very well-to-do.

Therefore, the Commission is inviting "all hands and the cook" to join the Fish and Game Protective Association, which is to co-operate and advise with the Commission as to game laws and any other matter touching the public's welfare. It only costs 25 cents to become a member of the association. The 25 cents is initiation fee and dues for a year all in one. Sending the money to State Treasurer E. D. Roberts is the only formality connected with the enterprise.

The membership of the Association now foots up 3,000 in round numbers. They include men in all walks of life, hunters, fishers and men and women who never hunted or fished in their lives, yet take an interest. Senators George C. Perkins and John D. Works, and Congressmen John E. Raker, William Kent, S. C. Smith and E. A. Hayes are some of the members who, besides paying their twenty-five cents, have promised their support in anything either the Association or the Commission want.

One of the first things the Commission will ask the Association to do will be to help to put into effect a law that will insure to The People the right to fish in any mountain stream running through uncultivated lands that have been stocked with fish by the State. The accomplishment of that end alone is worth ten times twenty-five cents the Commission says.

The Commission also wishes to emphasize the fact that this is the first time The People of California have ever been asked to advise with the Fish and Game Commission in any matter. Previous Commissions have regarded it as a divine right for them to regulate game questions to suit themselves and to make the most of it in the convention. There will be no graft here—only straight goods and value for the money, every cent of which will be used for a legitimate purpose and accounted for.

Information circulars and membership blanks can be obtained at the office of the Breeder and Sportsman, 366 Pacific Building, San Francisco.

George and Thomas Steel, for 40 years residents of Spokane county, most of the time ranchers at Spangle, have gone to the Olympic mountains on a three years' hunting and trapping trip. They have with them a pack of Airedale bear dogs, guns and ammunition of the finest, and to make sure that nothing is overlooked, they have arranged with a St. Louis firm to handle the furs that they expect to collect in their winter camps. E. N. Woydt, former chief of police for Spokane, and the Steels organized the Spangle Rod and Gun Club in territorial days.

HUNGARIAN PARTRIDGES IN CALIFORNIA.

The introduction of Hungarian partridges into this State has developed the fact that in some favorable localities they thrive and in other sections they are seen but few times after liberation. The favorable habitats for this hardy game bird are in rough country and high altitudes, up to the timber line. In this respect the bird is only following natural instincts, for in Europe the haunts of the bird are of the same comparative topographical and climatic similarity as are the districts in this State that have proved congenial to its existence.

In the lower altitudes, where plowed lands and pasture fields offer exposure in open ground, the experiment of transplanting has been, with but few exceptions, unsatisfactory. Hawks and ground vermin are given credit for destroying the immigrants in rather short order.

The pot hunter has also been, it is claimed by interested observers, no small factor in local extermination of the foreign partridges.

That the sturdy birds have made a brave fight for existence in unsuitable territory is evinced in numerous instances. These partridges have been found many miles from where they were first turned loose, seemingly traveling to the more natural environment of a mountainous country, where they could find food, shelter and safety from biped, quadruped and winged enemies.

One trait of these partridges, wherein they are like our valley quail, is the disposition to remain in proximity to ranches—provided they are unmolested by the people of the vicinity.

The Fish and Game Commission has distributed about 1500 pairs of Hungarian partridges during the last three or four years. Most of these birds were imported. What birds in the future will be liberated will be stock raised at the State game farms, the expense of further importing the partridges not being warranted, and enough birds can be raised for stocking favorable districts. Provided the birds are not decimated by unscrupulous hunters, there is no doubt but what they will increase, and this in territory that is rejected by the valley quail and by the mountain quail in winter, but is satisfactory to the pine grouse. Both the latter bird and its foreign cousin are hardy, and find existence agreeable in a rigorous winter country, where other varieties of game birds would perish.

Recent inquiry concerning results in putting out Hungarian partridges in many localities has developed information that no doubt will lead to the ultimate success of the experiment of introducing into this State the foreign game bird.

Excerpts from letters received by the Fish and Game Commission are interesting. They follow:

Ernest Butter of French Creek, near Shingle, El Dorado county, received several pairs of young partridges a year ago. These birds were penned up and taken care of until well grown. After liberation, for several weeks the birds would come back to the cages, where feed was placed for them. Last spring, when natural food was abundant in the foothills, the partridges left and were seen no more. Young partridges were reported as having been seen on Butter's ranch last summer.

Harry Cash of Shasta valley, near Sisson, states that he liberated birds three years ago near his ranch on the east side of the valley, at the base of the Goose Nest mountain. These birds left the lower levels the following spring and were afterward seen at an elevation of 6000 feet in the pine timber and bluff, rocky region. They were wary, quick and fleet of wing.

This report followed a statement made two years ago to Cash by A. Berry of Gazelle that birds the latter turned out there were afterwards seen in the pine timber altitudes and apparently thriving.

Assemblyman D. E. Williams of Fresno liberated six pairs of Hungarian partridges in the Red hills, about three miles below Chinese Camp. Red hills has the reputation of being the most barren stretch of country in the county, interspersed with heavy growths of chaparral.

Last November W. G. Scott and Henry Menke of Soulsbyville, while quail hunting, saw a covey of sixty partridges, by actual count, near where the original birds were put out. The birds were apparently feeding on and about anthills. Numerous anthills gave evidence of the presence of feeding birds. These partridges are decidedly insectivorous at certain seasons. Other parties have also seen this covey, the increase being estimated at fifty birds.

Deputy Andy Ferguson of Fresno offers the suggestion that Hungarian partridges are better adapted to a mountainous district than foothill regions or valley sections.

A liberal consignment of birds was turned out in the Rhoeing vineyard, six miles west of Fresno, in the heart of the vineyard section of the valley. Water, cover, wild grasses, etc., were abundant. These birds were seen occasionally at intervals during eight months, after which they apparently disappeared.

Ferguson made a second plant of two dozen birds in the first foothills east of Fresno, where water, feed and cover were plentiful. The batch was never afterward heard of nor accounted for. His third plant was at Traweck's place, on the Millwood road, at an elevation of 3500 feet, just where the oaks and pines mingle. Here three dozen partridges were liberated. Traweck reported subsequently that several coveys of young partridges were observed the following year. Other reliable reports were that scattered coveys were seen within a radius of five miles of the place of original planting.

Residents of that section state that the partridges are in that country now in considerable numbers. The only menace to their increase is the possibility of their being shot through ignorance by visiting hunters. The ranchers thereabouts give the birds all the protection possible. Ferguson further states that three covets of Mongolian or ringneck pheasants were seen last year in the mountains of that district at an elevation of 8000 feet and fully twenty miles from any habitation.

Last year partridges were released on the Chow Chilla ranch, in the country lying along the San Joaquin river. These birds are reported to have increased to a very satisfactory extent.

Hungarian partridges released in Kings county are still found on the ranches where first put out. These grounds, however, come under the general head of bottom lands.

STYLE IN SHOOTING.

Of all the tantalizing things that one experiences when shooting, there are few more irritating than to be out with a man who is a muddling, hesitating shot—the man who is most anxious to kill with every cartridge, and lets half the game escape without being shot at, states a writer in the English Shooting Times. He is a fairly certain shot when game gets up at his feet and gives him plenty of time for aiming, but after dropping one bird out of a covey he never attempts to fire his second barrel. Take him into cover. A rabbit crosses the ride; up goes his gun, and after vainly trying to aim, down it comes again. A pheasant rises at thirty yards, offering an easy chance, but soon puts a tree between itself and the breechloader. Our muddler again puts up his gun, half takes it down, then tries to align it through the branches of the tree, and finally gives it up. This kind of thing is most irritating to us, and especially so when we have refrained from taking the shots ourself. After a good deal of repetition of this performance we cannot hold our tongue, so we ask why he didn't fire, or if he had his gun on "safe."

We would not mind if the man would but shoot, but this pottering hesitation is most provoking, and no doubt many a man has lost not a few invitations to shoot on account of it. There is no style about it, and one would far sooner see a man miss right and left in good style than to kill in a clumsy, unworkmanlike kind of way.

The advice one would like to give to such sportsmen is—adopt a good quick style of shooting, and stick to it.

There appear to be but four definite styles of shooting, and all deviation from these is only a modification of one of them. The distinctness of each style and the difference of one from another is most noticeable when those who adopt different styles are performing together at driven game.

Style 1.—The gun is swung on to the game and ahead of it all in one motion.

Style 2.—The gun is aligned on the game and then jerked forward.

Style 3.—The aim is taken without swing or jerk at a spot ahead of the game, and the shot so timed that pellets and game arrive there simultaneously.

Style 4.—The gun is aligned dead on the game, which is followed up, and the trigger is pulled whilst the gun is pointing "dead on" and moving the same pace as the object.

Those who adopt this last style are, as a rule, but poor shots at driven winged game. For one reason, it is a slow style, and by the time one barrel has been fired, he who adopts either of the styles 1, 2 and 3, will have emptied his first gun.

At rabbits in the open, or pigeons from a trap, the adopter of No. 4 sometimes does exceedingly well. I knew a young farmer who shot in this way, and he could kill from twenty to thirty rabbits or pigeons without a miss. He was an almost certain shot with his first barrel at any game in the open. But this style, besides being too slow, is also dangerous, because a man who holds on to his game sees nothing beyond it, and he has been known to cover, one after the other, a whole row of heaters and keepers whilst holding on to a low-flying bird.

Styles Nos. 1 and 2 are, I think, those mostly adopted by the best shots. Of the two, perhaps No. 1 is the prettier, and to shoot in this style with the best effect the gun is not first placed to the shoulder and then moved on to the game, but the muzzle is swung in the direction the game is moving as the gun is being brought to the shoulder, and the quicker the swing is made the further is the shot, charge thrown in front of the game, and if the trigger should be pulled when the muzzles are actually pointing a foot or so behind the game, the latter will often be killed, because the shot is carried in the direction in which the game is moving—beyond the spot at which the gun was actually pointing when it exploded—by the impetus of the swing.

I have on several occasions swung very quickly after rabbits, and unintentionally pulled the trigger when my gun was pointing a good foot to the rear, but have nevertheless bagged my rabbit. I well remember the first time I had a good opportunity of watching a practical exponent of this style. He was using three guns, and I counted for him. Although not ranked amongst the first class pheasant shots, in half an hour he killed a hundred and nineteen pheasants at the expense of a hundred and fifty cartridges—not at all a had exhibition, especially when we take into account that all the birds were going fast. Several were "tall" ones, and some were

almost hidden by the tree, through the branches of which they had to be shot.

Style No. 2 is that in which many sportsmen shoot, and perhaps lends itself to greater rapidity of firing than No. 1. The muzzles of the gun are got on to the game, quickly jerked ahead of it, and the trigger is pulled as the end of the jerk is reached. This style is quite different from No. 1—a conclusion any observant person would immediately come to on watching these two styles at the same time. Some years ago I watched a gentleman who was then considered the best pheasant shot in England performing in Style 2, and the rapidity with which he killed his birds was wonderful. I have seen him kill four birds so quickly that they were all dead in the air at the same time.

Style 3 is the quickest of all, because there is no time spent on either swing or jerk. The gun is fired at a spot where it is calculated the game will be by the time the shot gets there. I have seen very few men adopt this plan, and could never succeed with it myself, but those coming under my notice have certainly shot well.

One is sometimes asked the question, "Is it best to shoot with both eyes open, or to shut the one that is not directly over the rib?" The right eye would, of course he over the rib when shooting from the right shoulder, and the left eye when shooting from the left shoulder. Most decidedly, shoot with both open; and I think this will be the advice of nearly everyone who has had much experience. For one reason, it is much quicker. Also, if the eye not aligning the gun be closed, the area of vision is much contracted, and when snipe hunting, if a bird flying straightaway should suddenly dip when only the eye looking over the rib of the gun is open, the shooter loses sight of the bird; he likewise loses sight of a bird flying overhead straight towards him, when he has got in front of it. Moreover, should the stronger eye be closed, as is generally the case with the one-eyed system, a bird will often look ten yards further away when seen only by the weaker eye than it does a fraction of a second before—when both eyes are open.

But although the two-eyed system would be recommended by a large majority of the experienced game-shots, it is nevertheless a fact that one of the finest wing shots ever known, who was also a wonderful performer at glass halls, advises shooters to shut one eye and glance along the rib with the other. He is the only noted shot that I know of who advises this method.

Whichever method be adopted, let the shooter avoid anything of a poking style, or that induces to exceptional slowness. This kind of thing exasperates both keepers and hosts; the one mutters under his breath and the other makes resolutions for the future.

ANOTHER OLD TIME SPORTSMAN GONE.

Crittenden Robinson, a charter member of the California Wing Club and a prominent trap shooter here forty years ago, died in this city last week.

For the past fifteen years he had made his home in Paris. Several months ago he returned to San Francisco to visit relatives. Two weeks ago he was taken suddenly ill but never rallied.

Crit. Robinson was noted here as a game and expert shot, particularly in live bird matches.

During his residence abroad he was a frequent contender at all of the trap shooting centers from Monte Carlo down and he was generally in the money. His last appearance at a live bird shoot was at the California Wing Club grounds at Stege about two months ago at an impromptu shoot.

Several weeks ago he was the guest of Frank Maskey and also of Achille Roos at the Suisun marsh preserves of these two sportsmen. Needless to say "Crit" did limit work. He was over 70 years of age when the end came.

Protect the Doves.—Dove shooting last season was the most uncertain of sports. One party would go to the same localit and never see a feather, states an Oroville sportsman.

The best shooting in this section is now found in the stubble fields south and west of Oroville. It is almost an impossibility however to secure a limit sized bag.

It is more than probable that it will be but a few years before dove shooting will become a thing of the past. Agriculturists are beginning to learn that the dove is one of their best friends as it is a persistent weed killer and already the demand has gone out not only in California, but over the entire country for a total protection of this valuable bird. The matter has been brought to the attention of the authorities a Washington and investigations on full grown birds have demonstrated that often a bird will destroy 10,000 seeds of weed.

Over on the west side of the Sacramento Valley many large landowners have prohibited the shooting of doves on their holdings on this ground, and several States in the East have passed a stringent law protecting the dove and are now endeavoring to interest the authorities at Washington in a law that will protect them in their migration to the Southland in winter.

California agriculturists point out the inconsistency of the game laws of the State. They protect the meadow lark, a bird that pulls up the early wheat to get at the root, and no he dove, a bird that is the greatest aid to the farmer.

Drink Jackson's Napa Soda.

BENCH SHOW NOTES.

The premium list of the fourteenth annual bench show of the San Francisco Kennel Club will be printed about the end of this week and mailed to the dog fanciers of this city and other centers of dogdom. The classification this year will be a liberal one with the pleasing addenda of many valuable trophies and cups for the exhibitors of winning dogs.

The show will be on record as a patron of utility breeds of dogs. While the pet varieties will be amply provided for in the way of medals and prizes, the bent of the times leads to a greater recognition of dogs that are favored by the sportsman and the breeder of dogs that are built on the lines of useful appearance.

Advices from interior points of this State, from Oregon, Washington and British Columbia, as well as from Colorado and Utah, supplemented by a signal of staunch support from Chicago, St. Louis and Kansas City, leads to the belief that the coming bench show of the club, under the rules of the National Dog Breeders' Association, will be one of the best exhibitions of dog breeders yet given in this city.

An abortive attempt at disruption is intimated in the following account of a meeting in San Jose.

Disagreements which arose over the "outlawry" of the San Jose Kennel Club shook the union of that organization and the Santa Clara County Poultry Association to its foundations last Saturday night, but union came out triumphant in the end, with the loss of but one of its officers nominated to serve the joint association. The societies have been giving an annual poultry, dog and pet stock show in San Jose which has attracted statewide attention.

The annual meeting was scheduled Saturday night, and when the nominating committee made its report James B. Bullitt, a poultry fancier, objected to serving for the reason that he would be "blacklisted" by the American Kennel Club for serving as an officer of an "insurgent" kennel club. He had been nominated for first vice-president. It was agreed to leave the names of the officers out of the annual show catalogue and he was persuaded to serve James C. Rea, named for third vice-president, would serve under no regime which "compromised with evil," and his name was withdrawn. It was then show catalogue and he was persuaded to serve. The Kennel Club exclusively, the other officers serving both. The first vice-president is Roy E. Parks and the third vice-president is C. H. Freeman.

The joint officers are: President, E. R. Everitt; first vice-president, James B. Bullitt; second vice-president, F. E. Baldwin; third vice-president, C. H. Freeman; fourth vice-president, E. B. Smith; fifth vice-president, Charles Emery; association secretary, George B. Greenleaf; show secretary, Charles R. Harker; auditors, George Leaman, M. E. Goss; treasurer, H. M. Billings; executive committee, V. J. Ruh, A. B. McKean, J. D. Bennett, W. E. Lewis, W. S. Sullivan, Henry Berrar, Charles R. Harker.

The Golden Gate Kennel Club show will come off in March at Dreamland Rink.

AIREDALES AS DOGS OF WAR.

Britain has a little account to settle with the Abors of Assam, in which a team of Airedales will assist. Last spring the Abor tribe which inhabits a wild and mountainous tract of land between China and India, one of the very few unexplored lands, murdered Mr. N. Williamson, a British officer, and his party.

Lord Crewe sanctioned a punitive expedition to proceed against them, and a Goorkha regiment has marched into the unknown Oriental territory, taking with them the Airedale dogs, specially ordered from Major Richardson by the India Office, to act as sentries and scouts in the dense jungle.

"This is the first time in the military history of the British Empire that the employment of war dogs has been officially recognized," states Major Richardson. "The India Office gave me an order to supply scouting and sentry dogs to the Goorkhas for the forthcoming expedition, and I sent out about half a dozen trained Airedales. The Airedale is as near the ideal war dog as it is possible to get. They are hardy and strong and possess good noses and very keen ears. One of the dogs that has been chosen to go, named Loch, whilst training in the county 'winded'—that is, scented—a tramp at a distance of 250 yards. Every foreign army has its own way of training war dogs, which varies according to the work they have to do. Some are trained to bark as a warning, others to work silently. These dogs, for the Abor expedition, will give a quiet growl as a warning of danger, or signal of discovery.

"In the descriptions of the massacre of Mr. Noel Williamson's party, published last April, it was stated that the Abors themselves used dogs when hunting the coolies who were endeavoring to make their escape, and the fact that the Abors have dogs makes it more necessary that the British force should employ them, too. Our scouting dogs, with the attacking force, will be able to give warning of the presence of the enemy before their dogs on the defensive know of our approach. In a battle between dogs I should be sorry for the Abor dog in the grip of one of our Airedales."

Frank Swanson, a rancher near Troy, Mont., had a narrow escape from death on January 18 while working in the woods on his ranch. He was surprised by three mountain lions, and after a desperate battle succeeded in killing two. The third escaped.

PACIFIC COAST FIELD TRIALS.

With clear and pleasant weather as the only favorable condition, the twenty-ninth annual trials of the Pacific Coast Field Trials Club, was begun at Gosford, near Bakersfield, Moaday, January 22, with the Derby stake, the first, second and third honors of which were captured in the order named by the following English setters: Agua Caliente, a game, fine going puppy of great speed and range, owned by F. J. Ruhstaller of Sacramento; Melrose Danstone, a stylish, consistently working little dog with a merry tail, owned by John W. Considine of Seattle, and Judge Post, a puppy of fair range and exceptional speed, that is owned by Judge Carroll Cook of San Francisco.

In the opinion of the members of the club, conditions for a successful meeting on the grounds used have never been more unfavorable than at that time. There was a marked scarcity of birds, due principally to the constant and out-of-season shooting by trespassers, it was claimed, and the fact that the birds were also believed to have been killed off by catlag poisoned barley, designed to exterminate ground squirrels. Lack of cover was another unfavorable condition, the grass of the preserve having been eaten off by stock. The fact that no rain had fallen lately, thereby making scenting of the comparatively few birds difficult, is further cited as a handicap.

Although twenty dogs were entered for the Derby stake, only four braces and one bye, nine dogs in all started. These were put down in the first series in the order named: Melrose Danstone and Babe, Agua Caliente and Mackenzie's Bobs, Judge Post and Budd, Joconde and Master Rhoderick, Bohemian Prince, a bye.

The first series of the All-Age started Tuesday morning. Bird conditions were then more to the liking of those present than prevailed Monday, a large number of singles and coveys being found.

T. C. Dodge's Kent's Hal was put down with J. E. Terry's Shasta Queen. The pointer displayed good style, pace and range, while Shasta Queen showed wonderfully fast pace and wide range, and an intelligent quartering of ground. After being out of sight for a period of fifteen minutes she was found staunchly pointing a big covey of birds. St. Lambert's Doris, owned by George B. M. Gray, made an unfavorable showing against William Dormer's Maggie Lauder. The latter was much the better of the two in pace, range and style. Both, however, failed to find any birds.

Gordon Tevis' Alford's Blue Ribbon, a handsome, nicely going pointer, braced with Melrose Mac, made two singles, while her competitor ranged well at a good pace and made one single.

Old Forester, owned by J. E. Chanslor, and Chula, Lloyd Tevis' pointer, were next cast off. Forester did some exceptional work and was easily the best of the two in style, bird work, range and pace. Considering the fact that Chula was not yet fully recovered from an attack of distemper, she did well, making a fine bevy point.

When put down, Benvenuto and Light, two English setters owned by T. J. A. Tiedemann and F. J. Ruhstaller, respectively, went off in beautiful style, the latter being a little the faster. Benvenuto located a covey, which he roaded quite a long distance, finally establishing his point staunchly. Light displayed style and made two nice single points.

Lad of Kent Jr., Lansing Tevis' pointer, ran his bye with J. W. Flynn's old reliable pointer, Senators Don, and he proved a fine, strong-going dog of good range and under perfect control. He found a covey, which he roaded and then made several singles in good style. Senators Don also worked well, making four single-bird points.

The Championship stake having been called off by unanimous vote of the members in attendance, the trials came to a close late Wednesday afternoon with the conclusion of the Members stake.

The honors of the Members stake were decided by Messrs. Betten, Tiedemann and Schumacher, officiating as judges, in the following order: First, Peach Nugget, an English setter bitch owned by S. Christenson; second, Trap, a pointer, Gordon Tevis, and third, Sister, pointer bitch, Lansing Tevis. No cash prizes, in addition to the cups, were awarded in this stake.

Bakersfield, Cal., January 22, 1911.—Pacific Coast Field Trials Club's twenty-ninth annual Derby. Purse \$300—50, 30 and 20 per cent. Cups also to placed dogs. Twenty nominations, 9 starters, all English setters. Judges, H. L. Betten and T. J. A. Tiedemann.

Melrose Danstone, black, white and tan English setter dog (Scott's Count Danstone); J. W. Considine, owner.

with

Babe, black, white and tan English setter bitch (); Geo. B. M. Gray, owner.

Agua Caliente, black, white and tan English setter dog (Sensation—Kills Moxie); W. B. Coutts, owner.

with

Mackenzie's Bobs, English setter dog (); J. W. McKeuzie, owner.

Judge Post, blue and tan belton English setter dog (Master Courtney—Lightheart); Carroll Cook, owner.

with

Budd's, English setter dog (breeding not given); F. C. Berry, owner.

Joconde, blue and tan belton English setter bitch (Master Courtney—Lightheart); C. N. Post, owner.

with

Master Rhoderick.
Bohemian Prince, black white and tan English setter dog (Sensation—Kills Moxie); E. C. Ford, owner; a bye.

II.

Agua Caliente with Melrose Danstone.
Judge Post with Bohemian Prince.

Result.

First, Agua Caliente; second, Melrose Danstone; third, Judge Post.

Bakersfield, Cal., January 23, 1911.—Pacific Coast Field Trials Club's twenty-ninth annual All-Age. Purse \$300—50, 30 and 20 per cent, also cups to placed dogs. Fifteen nominations, 11 starters. Judges, J. H. Schumacher, J. W. Flynn and H. L. Betten.

I.

Kent's Hal, liver and white pointer dog (); T. C. Dodge, owner.

with

Shasta Queen, white and orange English Setter bitch (Count Whitestone—Glimmer); J. E. Terry, owner.

St. Lambert's Doris, red Irish setter (); Geo. B. M. Gray, owner.

with

Maggie Lauder, white, black and tan English setter bitch (El Ciervo—Kills May); Wm. Dormer, owner.

Alford's Blue Ribbon, liver and white pointer bitch (); Gordon Tevis, owner.

with

Old Forester, blue belton English setter dog (Connt Whitestone—Harter's Cleopatra); Jos. E. Chanslor, owner.

Chula, liver and white pointer bitch (); Lloyd Tevis, owner.

with

Melrose Mac, white, black and tan English setter dog (McCloud Boy); J. W. Considine, owner.

Benvenuto, white, black and tan English setter dog (Lemon's Rodfield); T. J. A. Tiedemann, owner.

with

Light, white, black and tan English setter dog (Glow—Lightstone); F. J. Ruhstaller, owner.

Lad of Kent Jr., black and white pointer dog (); Lansing Tevis, owner; a bye.

Results.

First, Shasta Queen; second, Melrose Mac; third, Lad of Kent.

NORTHWEST TOURNAMENT.

The course of the northern team shoots is traced from day to day by the press dispatches as follows:

Eugene, Ore., Jan. 19.—Fred Willet, the crack trap shooter of the San Francisco team touring the northwest in the American Game Protective and Propagation Association's tourney, broke all records in the competition so far by smashing 100 consecutive clay pigeons at the traps of the Eugene Gun Club this afternoon.

Willet was in great form and every target he registered was a clean break. He was given a close race by Walter W. McCormack of the Eugene Club, who made a run of 95 consecutive breaks, but missed his ninety-sixth bird and finished with a score of 99.

McCormack was heartily congratulated by Willet and the balance of the professional shooters. As Ike Fisher broke 95 the San Francisco team increased its lead, despite the fine work of the Portland pair, Holohan and Robertson, who broke 189 of their 200 targets. The Spokane team broke 168 targets.

All the teams have now shot at 800 targets and the scores to date are:

San Francisco—Willet 379, Fisher 357, total 736.
Portland—Holohan 358, Robertson 351, total 707.
Spokane—Poston 333, Reid 310, total 643.

The individual scores today were: Willet 100, Fisher 95, Holohan 96, Robertson 93, Poston 88, Reid 80.

Salem, Ore., Jan. 20.—The San Francisco team of trap shooters made it five straight wins by scoring a victory here this afternoon. Pete Holohan of the Portland team was high man for the day. He broke 94 birds, while Fred Willet, hitherto star man of the aggregation, was 89, his lowest mark of the tour. The teams shoot at Portland tomorrow. Today's scores:

San Francisco—Willet 89, Fisher 89, total 178.
Portland—Holohan 94, Robertson 86, total 172.
Spokane—Poston 89, Reid 70, total 159.

Portland, Ore., Jan. 21.—For the first time since the northwestern trapshooting tournament started at Ashland Monday last, the team representing San Francisco in the touring contest at clay pigeon shooting lost an event, for the Portland team, Holohan and Robertson, today defeated Willet and Fisher.

At the end of the century run Portland was tied with the San Francisco shooters with 180 breaks and in the shoot off Holohan defeated Willet. Portland is now credited with one win against five for San Francisco, while the Spokane gunners have yet to win a match. The scores today:

San Francisco—Willet 92, Fisher 88, total 180.
Portland—Holohan 94, Robertson 86, total 180.
Spokane—Poston 86, Reid 80, total 166.

The team totals to date are: San Francisco 1094, Portland 1059, and Spokane 969.

The teams shoot at Seattle tomorrow, Bellingham Tuesday, Snohomish Wednesday, Tacoma Thursday and Aberdeen Friday.

Seattle, Wash., Jan. 22.—By the narrow margin of one bird the San Francisco team of trap shooters

won out in the competition held under the auspices of the Seattle Gun Club today. The bay city team scored 187 breaks to 186 scored by the Portland representatives. Fred Willet of the winning team, which has now won six of the seven matches, was high man today, with a score of 97. Pete Holohan of the Portland team scored 94 for the third successive time, and was second to Willet. Lester Reid formed a partnership with Hugh Poston as the representatives of Spokane, and broke in with a score of 89. The scores today:

San Francisco, 187—Willet 97, Fisher 90.
Portland 186—Holohan 94, Robertson 92.
Spokane 177—Poston 88, Reid 89.

Bellingham, Wash., Jan. 23.—For the first time since the trap shooting tournament started at Ashland last week all three of the competing teams broke better than 90 per cent of their targets, which occurred here this afternoon under the auspices of the Bellingham Gun Club.

In spite of the good work of the other teams, the San Francisco pair, Willet and Fisher, won out again, and, as in the Seattle shoot, one target gave them the decision. The score was: San Francisco 190, against 189 for the Spokane duo, Poston and Less Reid, who were the runners up for the first time today.

Hugh Poston of the Spokane team was high man for the day, with 96 breaks in his string of 100. He missed one target in each of his four strings of 25 birds. Fred Willet, high man among the tourists, again scored a fine average, for he smashed 95 of the string, as did his teammate, Ike Fisher. Willet missed but two targets in his first 75 birds and lost three in his last string.

San Francisco has now won seven of the eight events shot off for the American Game Protective and Propagation Association's trophy but the good work being done by the other teams at present means that Willet and Fisher will have to keep up their high averages to retain the lead. The tourists shoot at Snohomish tomorrow.

Snohomish, Wash., Jan. 24.—By a score of 182 for the Portland gunners against 179 for the San Francisco team the former team of trap shooters, now competing in the touring tournament in the Northwest, was victorious for the second time since the tour started in the shoot held under the auspices of the Snohomish Rod and Gun Club today.

The fine work of "Robbie" Robertson in the final string of 25 targets, which were shot at during a gale of wind and a blinding rainstorm, was the feature. Robertson maintained his average score for the day, while one man on each of the other teams fell down at the finish. The scores were:

Portland—Holohan 93, Robertson 89, total 182.
San Francisco—Willet 94, Fisher 85, total 179.
Spokane—Poston 94, Reid 83, total 177.

The teams shoot at Tacoma tomorrow and at Aberdeen Sunday.

One of the fastest fields ever gathered in the south lined up for Wednesday's opening events in the fifth annual midwinter handicap trap shooting tournament of the Pinehurst, N. C., Country Club, seventeen of the contestants making better than 94 per cent and fifteen making straight runs better than 50.

The sensational feature of the day was a score of 198, which placed G. S. McCarty of Philadelphia at the head of the field with a margin of 6 targets. Charles N. Newcomb of Philadelphia finished in second place at 192, bunched in a quadruple tie with F. S. Wright of South Wales, N. Y.; F. A. Hodgman of Tyckahoe, N. Y., and W. Y. Laslie of Tuskegee, winner of the 1911 southern handicap.

Lester German of Aberdeen, Md., challenger for the world's championship, held by Tex G. L. Lyon of Durham, N. C., also a contestant in this tournament, headed the professionals, with 195 and a straight run of 105.

"Howdeyde" Rice breezed into town last Tuesday chipper and jovial as ever. A five weeks' visit to Eastern points equipped him with conversational ammunition—smokeless or black—to keep the Copper Kettle Club in good humor for a month of Sundays.

Bob Bungay, a prominent Southern California trapshot, ended a two weeks' sojourn in this city Tuesday evening when he left on "The Lark" for Ocean Park.

IN NEW QUARTERS.

The Ellery Arms Company will next week occupy new and commodious quarters at Nos. 583-585 Market street—where more than twice the main floor space and three times the upper stories room of the location at Nos. 48-50 Geary street will be available.

This change of location, it is announced, has been necessitated by want of room to properly care for a constantly increasing business.

"The new quarters give us five times as much space, and it will all be needed to display what is admitted to be the most complete line of sporting goods in America."

Shoshone Rod and Gun Club planted 235,000 black spotted trout in northern Idaho last year, and it is expected to place as many more in 1912. Early last spring the officers placed their mark at 300,000. It had been the hope of C. E. Clark, secretary of the club, and other members, that they might secure at least 150,000 trout fry from the national government but only 50,000 were received.

Drink Jackson's Napa Soda.

TWO COMMON FORMS OF COLIC.

Probably the most common form of colic in horses is that which is termed spasmodic, or cramp, colic. In this form of colic the pain is produced by contraction, or spasm of a portion of the small intestines. This action may be incited by the ingestion of a large amount of cold water when the animal is hot or fatigued, by exposure to cold when in the same condition, by the presence of indigestible food in the intestines, by sudden changes in the diet, or even by exhaustion.

The symptoms diagnostic of this sort of colic are suddenness of attack, severity of abdominal pains, which are apt to be remittent with intervals of freedom from colic, loudness of intestinal sounds, which may be plainly heard by applying the ear over the flank, and violence of action, such as throwing themselves down, jumping up, whirling about and striking. In addition, the history of the case, in many instances, will assist in a diagnosis.

Practical treatment for a case of this kind consists in administering some anti-spasmodic, in keeping the body warmly clothed, and in walking the animal gently about. Sometimes in mild cases whisky, given four ounces in a pint of hot water, will suffice as the anti-spasmodic. In more severe cases two ounces of laudanum in a pint of water should be given. When convenient, relief may be secured by injecting under the skin from two to five ounces of morphine, depending upon the severity of the case. One grain of atropine is also given. Rectal injections of warm water will also aid in giving relief. If the cramp is due to the food in the bowels, a physic of one ounce of olive or one pint of linseed oil is also indicated.

A second very common form of colic in the horse is that which is known as wind colic or bloat. In this form the pain caused by accumulation in the stomach and intestines is due to resulting from the fermentation of food. Ordinarily, this fermentation of food in the stomach and intestines is due to delayed digestion from such causes as sudden changes in diet, food given while the animal is exhausted, ingestion of large quantities of green food or food actually indigestible.

The symptoms diagnostic of this form are gradually of attack, beginning with dullness and being followed by uneasiness, distension of the abdomen by the accumulating gases, particularly in the large intestine, continuous pain, with perhaps a partial relief by occasional passing of gas from the bowels, and, in severe cases, if relief is not obtained, difficult breathing, staggering from side to side, and, finally, plunging forward dead.

Treatment for this form of colic depends materially upon the severity of the case at hand. In mild cases the administering of intestinal antiseptics and absorbents, together with a physic, will, in all probability, suffice for complete relief. A good combination of these three agents is turpentine one ounce, and linseed oil one pint. In very severe cases, however, in addition to the above treatment and perhaps the use of an anti-spasmodic, the one essential consists in puncturing the bowel to allow the escape of gases. The point of puncture, ordinarily, should be made on the right side in the hollow made by the last rib, back bone, and hip joint, but in case the seat of greatest distension is on the left side, or if that side is uppermost with the patient lying down, the puncture may be made on that side at the point of greatest distension.

Too much cannot be said in regard to the importance of using careful asepsis in making the puncture. If the pressing need of relief will at all permit, time should be taken for clipping the hair from the point of puncture, for painting the skin about it with tincture of iodine, and for boiling the instruments to be used or cleansing them with some good antiseptic. The skin should then be incised with a knife and the puncture made with a trocar and canula. For the best of asepsis the wound should be sealed with collodion just as soon as the gas has escaped.—G. T. Lipp.

It seems strange after all which has been written during the past thirty-six years on the subject of breeding fast trotters, that Sidney Dillon 23157 is the only stallion that has yet begotten, in one season, two trotters with race records so fast as 2:06 3/4 to wagon and 2:07 3/4 to harness made in races that they won. These trotters were Dolly Dillon (w) 2:06 3/4, and Stanley Dillon 2:07 3/4. It is a singular fact that Sidney Dillon 23157 got these two noted trotters when he was but two years old, and it is still more remarkable that he has not begotten two so fast trotters in any one season since he was two years old. Another curious fact is that both Dolly Dillon (w) 2:06 3/4 and Stanley Dillon 2:07 3/4 were from mares that had never been raced to standard records. These facts furnish food for thought.—Horse Breeder.

Thos. W. Lawson speaking as an enthusiastic breeder of both, the auto and the nag, and as one who, in quest of the ideal nick, has crossed the limousine with Dobbin, and Dobbin's sister with the long hung racer, and who has in the paddock many quarter, half and three-quarter breeds; and speaking as one who appreciates all the good points of each and knows all the mean ones, said I would say straight from the heart, I'd rather own a couple of shares of non-dividend-paying Hackney Common, or a share of ex-dividend Kentucky Preferred, or even a passed-coupon Irish Timber Topper Debenture than a garage of 1912 sixes. 'Pon my soul, I would. Experience has taught me that while the auto is a bully good chum for one's get-there moods, the pal for a man to throb to and sob to, laugh to and quaff to, is his horse—of course, I mean next to his wife, sweet-heart or—dog.

CARE OF BROOD MARES.

Brood mares should have extra care from now until the time of foaling. Moderate exercise upon the road will be much better for them than standing in a stall. Feed upon the best of hay and sound, clean sweet oats. Musty hay and injured oats are liable to cause slipping of foals. It is better for both mare and foal that the former does not take on too much flesh. As a rule foals from very fat mares are much more puny at birth than those from strong, healthy ones in only fair condition.

Moderate exercise upon the road or farm is much better for brood mares than standing in stalls day after day. Such as are not exercised by work of some kind should have a few hours' run in an open yard when the weather is suitable. It will be necessary to look after them some then, for many pregnant mares are inclined to stand still when out of doors.

There are a few things which those who have the care of brood mares should be careful to avoid. One is permitting them to drink too heartily of cold water. When salt is kept constantly in their mangers, and they are watered three times a day, there is not much danger. When they are salted only once a week, and perhaps not so often, the danger is increased. Probably there are more foals killed prematurely in the north during the winter months from this than from any other single cause. Very few farmers are aware of this fact, however.

Another frequent case is turning the mare short about, either in or out of harness. Do not allow any one, especially a heavy man, on the back of a mare which is carrying a foal.

In some localities, mares are compelled to drink from brooks or springs, and when the snow is deep it is very difficult for them to reach the water. Under these conditions, mares are liable to become strained to such an extent as to cause abortion. Keep the mares away from fresh blood. Do not allow them to come near fresh pelts of sheep or hides that have been taken from cattle. Some object to having brood mares groomed. If the man who handles the comb and brush is careful, there is little danger of injury from grooming. Animals which are not groomed are more liable to roll in the yard than those which are carefully brushed every day.

There is generally more danger from rolling than from grooming. If there are no stones or other hard substances on the ground for the animal to roll upon there is not much to be feared from rolling. There may be some danger of displacement of foal, however, which will be apt to result in unnatural presentation at birth. Some mares, even when heavy in foal, will roll every day if they can get a chance, yet never slip their foals prematurely and never have any difficulty in delivering them.

TO GET RID OF WARTS.

Warts on horses may be removed in various ways, the method chosen depending upon the size, form and situation of the wart. Small warts or those with a well marked neck are most easily removed with the scissors, and the cut surface should be thoroughly cauterized with lunar caustic, sulphate of copper or zinc (one part of the sulphate to four parts of lard) or other caustic. In some cases considerable bleeding may follow the cutting, but the caustic may soon check the flow of blood. Another method is to tie a strong linen thread or small cord tightly around the neck of the wart, close to the skin, and tighten the cord daily until the wart drops off. Burning off with the hot iron is also very effectual. Flat warts or those that cannot be easily removed by a simpler method may be gradually eaten out or killed with strong caustics. If near the eyes use nitrate of silver or other stick caustics. In other situations a more powerful caustic may be used, as nitric or nitro-muriatic acid, applied with a small swab or the bruised end of a soft wood stick, and well rubbed into the wart two or three times a week until killed. In using these powerful liquid caustics care must be taken that the caustic does not spread to the adjacent skin and produce an unnecessary sore.

TRANSFERRED TO JOHN F. BOYD.

Deeds were placed on record last Monday at Martinez transferring the Oakwood Park Stock Farm, near Danville, one of the most famous properties in Contra Costa county, from Lena Humphrey and her husband, William Humphrey, to John F. Boyd. The Oakwood farm is one of the few big ranches remaining in the San Ramon valley. Boyd bid in the property more than a year ago at a foreclosure sale under his mortgage for \$175,000. The owners having failed to redeem, Boyd came into possession of the property. The tract comprises nearly 5,000 acres. At one time it was improved with fine barns, club houses, a race track.

LEADING BROODMARE SIRES.

Following is a list of sires whose daughters have produced 100 or more standard performers:

CARING FOR HORSES' FEET.

Although the feet form only a small portion of the horse's anatomy, no other part will respond more readily and profitably to care and attention, or be more liable to suffer serious injury or derangement without proper care, says an exchange. If, under natural conditions, we might assume that the feet would need no care, but generally conditions are so far from natural that any such assumption would be foolish and costly. A horse's feet and legs determine to a large extent his value, and since they are more liable to unsoundness, due to injury or disease, than any other part of the body, it is doubly important that special attention be given them. The serious result of uneven growth of the hoof lies in the fact that undue strain is placed on certain parts of the legs, which in turn may lead to some common malformations, such as knock-kneed, bow-legged and pigeon-toed.

In order to properly judge the condition of a horse's foot, the appearance of a sound and healthy foot should be kept in mind. The wall of the hoof should be of dense, heavy fibres, straight from the coronet to the ground, and the surface with a fine, oily or polished appearance, with no cracks, cliffs, or appreciable ridges; frog well developed and of a compact, springy texture, with the middle cleft broad and shallow, buttresses wide apart, not touching the frog, with the bars strong and extending straight toward the point of the frog; the space between the bars and the frog wide and shallow; the heel bulbs full, round and of equal size. Viewing from the side, the front wall should be a prolongation of the line of the front of the pastern; the ideal slant is one forming an angle of 48 degrees with the ground. Looking from in front, the hoof should set squarely on the ground, and a line through the center of the hoof be a continuation of a line through the center of the knee and the pastern joint.

Since we are dealing with the horse's feet on the farm, the care of the colt's feet will naturally be the first consideration. The wall of the foot grows at the rate of about one-third of an inch per month. When the colt is on pasture where there is stone or gravel in the soil, the horn will wear off as fast as is necessary, but unless judiciously directed the wearing will be uneven. On fine soils the growth exceeds the wearing. Under such conditions, without proper care the hoof grows out, loses its shape and the horn splits, cracks or breaks off, leaving the foot unbalanced and possibly in such shape as to throw the entire bony column of the leg out of line and lead to a permanent alteration in the form of the limb. The best plan to follow is to examine the colt's feet once every four to six weeks. Usually, if the toe is shortened and the sides rounded off to prevent clipping, the rest of the foot will take care of itself. The frog and sole should be let absolutely alone; nature will take ample care of them in so far as getting rid of excessive growth is concerned, when on pasture.

VETERINARY.

F. W. P.—(1) I have a mare that has a bunch on the offside of jaw, like an egg, and at the underside of jaw there is a small opening which drips, not matter, but more like water. The veterinary says the gland that empties into the mouth at the molars is stopped, but he does not know what to do. Now, if you know, let me hear through your Breeder and Sportsman. She has not been out of pasture before for three years. (2) What is good to give colts for worms.

Answer—(1) The lump is probably a calculus, which has formed in the duct or passage from the gland, and the fluid is the saliva coming from same gland, and which should enter the mouth. Get a veterinarian to cut down on, and remove the calculus or lump. Also to cut the edges of the opening from which the fluid drips; then let him make an opening from the same duct, into the mouth, and after completing the operation, to stitch up the whole outside wound, and cover with an antiseptic dressing. (2) There are many preparations for worms in horses, sold by veterinarians, and without knowing age, and constitution of the colt, we would not like to advise any special one. The veterinarian who operates on the mare can advise you when he sees the condition of the colt.

Although they are generally considered an undesirable feature, there is not much to object to in coarse hocks, for hock joints of this kind are usually of large size, and that is a valuable attribute. The term "curby hocks," which is frequently used, has a rather indefinite meaning, though it is mostly applied to hocks in which the rear outline is not quite straight (viewing the joint in profile), but somewhat curved outward, giving the idea of the curb. It is often said that curby hocks are more than ordinarily liable to spring a curb, and they are objected to for that reason, but as often one finds such hock joints to be quite as strong as, and no more predisposed to contract unsoundness, than more normally shaped ones. Still, the fact of a horse being curby-hocked must be looked upon as a disadvantage. Sometimes the opposite kind of formation is seen—the hock, looked at sideways, showing a more or less concave outline behind. That is practically always an indication that the joint is weak, and this feature is to be strongly objected to.

A large force of men are fencing the new race track at Los Angeles and, judging by the rapidity they are working, it will not be long before the work will be accomplished.

"THE BEST WAY TO CURE PORK."

Professor H. S. Mobley, Fayetteville, Ark., has used for years a system of curing meat that has been followed with success in his family in Virginia from generation to generation since colonial days. It has been tested by hundreds of people in many Southern states and every one has found it more reliable for home curing than any other method. Professor Mobley furnished his method to the agricultural department of the Rock Island lines for distribution.

A day should be selected for killing when the temperature is low enough to insure a thorough cooling by the following morning, the hogs being dressed and hung over night.

On the morning of the day the hogs are killed, for each 400 pounds of meat make a brine, as follows: 20 gallons of rain water, 30 pounds of salt, 3 ounces of baking soda, 10 pounds of brown sugar, 1 gallon of molasses (use good molasses, not the adulterated kind.) This fluid should be hoiled and skimmed in the morning and left to cool in a shady place. When cool

Show Horse!
Race Horse!!
Sire!!!

The Standard Trotting Stallion
LIJERO 2:15 1/2 (Reg. No. 45923)

Sired by James Madison 2:17 3/4 (son of Anteeo 2:16 1/2), sire of 18 in 2:30 list, including Brilliant 2:08 1/4, Tuna 2:08 1/2, Emily W. 2:10; dam Hilda (dam of William Albert 2:16 1/4, a sire, Saint Ambrose 2:25, and Lijero 2:15 1/2, a sire), by Nutwood 2:18 3/4, the world's champion broodmare sire; second dam Eudora by Volunteer, the greatest sire of race horses that ever lived; third dam by American Star 14, the sire whose daughters have produced 43 trotters and among them some of our greatest sires.

Lijero is a brown stallion foaled in 1902, stands 16.1, and weighs 1200 pounds. He sired Expedito (3) 2:14 1/4. Public trial at Chico as a four-year-old in 2:08 3/4. Lijero forced Prince Lot 2:09 1/4 to trot in 2:10 1/4 at Woodland in 1910 and was only beaten a head. He started in five races, won three and was second in the other two, and it gave Helen Stiles 2:08 1/4 and Prince Lot 2:09 1/4 all they could do to beat him in those two races. Very few horses have ever trotted in 2:10 with less work than Lijero. He should race in 2:08 this year. He has everything to recommend him as a game racehorse and as a sire he will undoubtedly be one of the best. He has size, style, color, conformation, disposition, the best of feet and legs, an iron constitution, and the purest of trotting action. His gameness is unquestioned. He is a perfect show horse and sires show horses. He and his daughter Expedito have won first prizes in the standard class at the California State Fair.

IDORA W., registered in Vol. XIX. Brown mare, 15.2 hands; foaled 1901. Sired by James Madison 2:17 3/4, dam Swift Tide by Albert W. 2:20; second dam Uarda (dam of Flowing Tide 2:14 1/4), by Echo; third dam Dewdrop. A sure breeder, due to foal to Lijero 1912. Entered in State Futurity and Breeders' Futurity Stakes.

TOOTS W., registered, Vol. XIX. Bay mare, 15.2 hands; foaled 1907 by Stam B. 2:11 1/4, dam Idora W. Due to foal to Lijero 1912. This mare is very fast, having worked quarters in 37 seconds as a two-year-old. Entered in State Fair Futurity and Breeders' Futurity Stakes.

JAMES H. DONNELLEY, b. g., 15.3 hands; foaled 1909. Sired by Lijero 2:15 1/2, dam by Hanford Medium; second dam Algerine (dam of Kelly Briggs 2:08), by Algona, etc. Entered in Breeders' Futurity and State Fair Futurity. With little work this one showed a mile in 1911 in 2:28, half in 1:10 and a quarter in 33 1/2 seconds. He will make a 2:12 or better pacer this year.

IYA W., b. f., foaled 1910; sired by Prince Ansel 2:20 1/4; dam Idora W. (which see). Entered in Breeders' Futurity, State Fair Futurity and Occident Stake. She is just broken to drive and will undoubtedly make a very fast mare. She is eligible for registration.

DR. JOHN, h. c. (1), by Palite (son of Nutwood Wilkes 2:16 1/2 and Palita, 2. 2:18); dam Toots W. (which see). Entered in State Fair Futurity, Breeders' Futurity and Occident Stake. A fine large perfectly formed individual, nicely halter broken.

These horses are all sound and in good condition, ready for anything that horses can be used for. The mare Toots W., if worked, will make a 2:12 trotter, or even a lower record than this.

On account of the many demands upon my time in my business, I find I cannot devote any to the development or care of these, therefore I have decided to sell them.

Any further information regarding prices, etc., will be given by addressing
F. E. WRIGHT,
318 K. St., Sacramento, Cal.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of **Caustic Balsam** sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address
THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

add 5 ounces of saltpeter. Dissolve the saltpeter in warm water and stir thoroughly.

The following morning cut up the hogs, as usual, and pack in barrels. Put the sides of the meat or middlings in the bottom and the shoulders next, and the hams on top of these, all with the skin side down.

Weight the meat down well and pour the brine over until the meat is completely covered. Then cover the top of the barrel with some good, thick covering that will prevent evaporation.

Look at the meat often enough to see that the brine has not evaporated so as to leave any meat exposed. If it should become exposed more brine should be added. The meat can be left in the brine indefinitely, but if it is desired to smoke the meat, it should be taken out in about six weeks.

If our Southern farmers will use this method and cure their own meat at home they will save a neat sum each year.

If it has been your custom to put up the supply of family meat by curing with dry salt, and do not care to risk all of it by another method, then try a barrel or two, using the above plan, and compare the results.

KEEP THEM WORKING

Kendall's Spavin Cure is the old reliable, safe remedy for all cases of spavin, splint, curb, ringbone, boggy growth and lameness from other causes. It keeps the horses working—not loafing. What it has done for others it will do for you. Keep a bottle of **Kendall's Spavin Cure** handy so you can use it quickly when the need arises. A one dollar bottle may save a horse for you. It's worth while to be ready. Ask your druggist the next time you are in town. Tear this advertisement out to remind you.

Sold by druggists everywhere, \$1.00 a bottle; 6 for \$5.00. Keep it to the house for family use, as well as in the stable. Get a copy of "A Treatise on the Horse" at your druggist or write to
DR. B. J. KENDALL COMPANY,
Enosburg Falls, Vt. 14

THE 20TH CENTURY GUN OIL

3-in-One is the only perfect gun oil you can buy. Cleans out the barrel. Especially good when smokeless powder is used. Oils the mechanisms, polishes the stock, and positively prevents rust on the metal in any climate and any kind of weather. Use before and after shooting.

102 New St., New York City

Don't Take a Chance on Weak or Sore Tendons—

They Mean Sprains and Ruptures If Not Cured Now

Mack's \$1,000 Spavin Remedy Will Quickly Cure Spavin, Ringbone, Thoroughpin, Curb, Capped Hock, Shoeboil, Sprung Knee, Ruptured Tendons, Sweeney, or any one of a hundred different causes of lameness from which your horse may be suffering.

MACK'S \$1,000 SPAVIN CURE Relieves Cases Formerly Considered Incurable

Every Owner, Trainer, or Caretaker should keep this remedy constantly at hand and use it freely whenever there is any sign or indication of lameness.

We know of many cases where horse owners have paid out big fees and had valuable horses tortured with "ringing," "blistering," and other good-for-nothing methods, and as a last resort tried Mack's \$1,000 Spavin Remedy, and were amazed at the painless, positive, quick and permanent cure. It does not leave any scar, bluish or loss of hair—absolutely no mark to show that the animal has ever been lame. Safe to use on any horse, old or young. It's the surest remedy money can buy, and it's the only Spavin remedy in the world that is absolutely guaranteed by a

\$1,000 WARRANTY BOND

This is a straightforward business proposition that you can overlook if you have a lame horse. Not only for the sake of the horse, but for your pocket-book as well, you should read every word of this advertisement and then send the coupon without the loss of an hour. Don't let your horse suffer, don't sell him for a few dollars; ask us to tell you how to remove the lameness safely, surely and quickly.

We will send you **THE BEST AND MOST RELIABLE DIAGNOSIS ABSOLUTELY FREE**

All you have to do is to fill out the "Free Diagnosis Coupon," mark just where your horse has a swelling, sore or any one of the big number of possible causes for lameness, and send it to us. We will then give the coupon to our practicing Veterinary Specialist for his expert diagnosis. This diagnosis is invariably correct. We then inform you of the cause of your horse's lameness and the remedy that will absolutely cure him. We do all this for nothing.

Be Positive, Know What You Are Doing and know that you are treating the right spot in the right way. Don't disfigure your horse and reduce his market value. Write to us.

Your Druggist Will Obtain Mack's \$1,000 Spavin Remedy for You

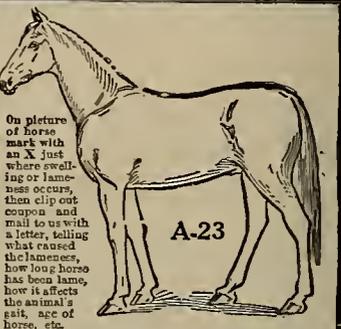

If you ask him. Price \$3.00 per bottle. If he refuses, remit \$5.00 to us and we will see that your order is filled without delay.

No matter where, when or from whom you buy Mack's \$1,000 Spavin Remedy, the price is the same. Every bottle is guaranteed, and is accompanied by our \$1,000 Warranty Bond, which insures you that your money will be refunded if the remedy fails to do all we claim for it, as stated in our guaranty.

Do not accept a substitute, for there is no other remedy like Mack's \$1,000 Spavin Remedy—nothing so powerful and sure to cure. It is the best and most reliable in all forms of lameness.

McKALLOR DRUG CO.
Binghamton, N. Y.

FREE DIAGNOSIS COUPON

On picture of horse mark with an X just where swelling or lameness occurs, then clip out coupon and mail to us with a letter, telling what caused the lameness, how long horse has been lame, how it affects the animal's gait, age of horse, etc.

We will tell you just what the lameness is, and how to relieve it quickly. Absolutely no charge. Write today.

Free Book—"Horse Sense"

Send us the Free Diagnosis Coupon, get absolutely free a copy of our book "Horse Sense." Describes and illustrates diseases of horses' limbs, shows correct name for every part of horse and tells valuable facts every horse owner ought to know.

FOR SALE—Electeur Jr.

A fine young Percheron Stallion, six years old next April. Weighs 2400 pounds. He was sired by Electeur, imported from France in 1904, sired by Valtaique 25159; dam, Sultane 43394; second dam, Biche 17831; third dam, Pelotte 1850. Electeur Jr. is solid black in color, well formed in every respect and is a sure foal getter. His dam is by Uptumus, he by Duke of de Charters, the most celebrated horse in the United States. No finer Percheron Stallion is in the State. Can be seen at the McCarty Ranch, 4½ miles northeast of Suisun. Price very reasonable. **ED. McCARTY, Owner, Suisun, Cal.**

RED COCKERS FOR SALE—Handsome pedigree bitch, 3 years old, and a 5 months' old puppy. A bargain. For particulars address George Van Horn, Redwood City. Phone, 285 Y.

STUD BOOK FOR SALE—Volumes 1, 2, 3, 4, 5 and 6 of Bruce's American Stud Book; handsomely bound; good as new. Will be sold cheap. Address **Breeder and Sportsman, San Francisco, Cal.**

FOR SALE—Percheron Stallion (grade, 4 years old, bay, absolutely sound, good disposition, and sure foal getter; weighs 1800 pounds. I have seven of his weanlings to show how he breeds. Price \$1000. For further particulars address **J. E. MONTGOMERY, Davis, Cal.**

FOR SALE—Handsome seal brown stallion, 6 years old, weighs 1200 pounds. Has paced a quarter in 30 seconds. He is an inbred Electioneer and is a sure foal getter. Purchaser can see his colts. Also black Percheron stallion, 9 years old, weighs 1700 pounds. Handsome and sure foal getter. The above horses will be sold cheap. For price and particulars, apply to **Conlon Bros. Ranch, San Pablo Ave., near County Line, Postoffice address, R. F. D. 1, Berkeley, Cal.**

FOR SALE—Halley Wilkes, black mare by Count Wilkes 2:21; dam by Orator, grandson of Electioneer. An ideal road mare, trots good road gait; paces when at speed, free legged; uses no boots. With one month's training paced quarter mile in 34½ seconds, half mile in 1:12 on half-mile track. Also three and four-year-old fillies out of the same mare by Dictatus 2:17. For price and particulars address **W. S. CLARK, Gustine Stock Farm, Gustine, Cal.**

FOR SALE—A jet black stallion; was three years old December 20, 1911. A toppy, handsome pacer, nicely gaited, good size, and the making of a race horse. Has had so little training that it is almost none and stepped a quarter in 34 seconds. Being as two of us own him, must be sold. He is by Zolock 2:05½; first dam, Angie Duryea (p.) 2:17½, by Patchen Wilkes (the sire of Joe Patchen and others); second dam, Angie D. (p.) 2:07 (the first mare to pace in 2:07); by Mikaban 2:19, the sire of Frank Agan 2:03½. If you desire such a horse, write to **DR. A. C. HUMELBAUGH, 305½ South Spring Street, Los Angeles, Cal.**

FOR SALE OR LEASE

The Standard-Bred Trotting Stallion

UNIMAK 40936

(Full brother to Sterling McKinney 2:06¼.)

Sired by McKinney 2:11¼, dam Twenty-third by Director 2:17; second dam Nettie Nutwood (dam of Hillsdale 2:15) by Nutwood 2:18¾; third dam by Ethan Allen Jr. 2:03; fourth dam by Williamson's Belmont. Unimak is a beautiful seal brown; stands 16.1 hands, and weighs 1250. He is one of the finest-looking, best-bred and best-gaited trotters on this Coast. His disposition is perfect. For terms and other information, apply to this office.

BOARDING AND TRAINING STABLE

J. S. PHIPPEN

Is now located on the A. J. Clunne farm, adjacent to the celebrated Palo Alto Farm, at Mayfield, where he is prepared to keep a few horses through the winter. He has fine box stalls and paddocks and can take the best of care of all sent him. He is also prepared to break colts either for city use or racetrack. His lifelong experience in this branch of the business has fitted him to do this work carefully and well. He takes pleasure in referring to all for whom he has ever worked. Address **J. S. PHIPPEN, Mayfield, Cal.**

SPECIAL ADVERTISING.

Wanted, For Sale, and Miscellaneous advertising under this head will be set in nonpareil type (same type below) and will be published at the rate of 2 cents per word each insertion, or 6 cents per word by the month. Count each abbreviation and initial as a word.

FOR SALE—The trotting stallion Altitude 2:22; seal brown; fine individual; sound and gentle. For terms, etc., address **CHAS. THOMPSON, R. F. R. D. No. 3, Enkersfield, Cal.**

FOR SALE—Out of Rand's famous Mile High Kennels; Alredale puppies; Boston, French and English bulldogs; all of the best pedigreed stock in America. For further particulars, call on **L. F. RALAS, 676 Moanndnock Bldg., San Francisco, Phone Sutter 854.**

FOR SALE, CHEAP—The best bred mare in California. Bay filly, 3 years old; sound. With 6 weeks' work paced a mile in 2:20 to a cart and had just 2:00 speed. Sired by Nutwood Wilkes; 1st dam by Bonnie Direct 2:05½; 2nd dam by Searchlight 2:08½; 3rd dam by Director; 4th dam Lida W. dam of Nutwood Wilkes by Nutwood 600. Bred by Martin Carner, Nutwood Stock Farm. Address **T. W. BARSTOW, 1042 Alameda Ave., San Jose, Cal.**

FOR SALE, CHEAP—One registered stallion, sired by McKinney 2:11¼; 3 years old; sound. Also one imported draft registered stallion; weighs 1800 pounds; 7 years old. Would consider trade on heavy mare or standard-bred mares, or fillies. Breeding and pictures sent to interested parties. Address **D. A. BAKER, Hill P. O., San Diego, Cal.**

FOR SALE—ZOLBACK 2:18, pacing as a two-year-old; trotting 2:24½ as a three-year-old; trial 2:19. He is a coal black stallion, five years old, stands 15.3 hands, weighs 1200, and one of the best made stallions in California. He should get a record of 2:12 or better this year. Is kind and gentle and is a half brother to the great trotter Zomback 2:26½, that worked last fall in 2:08¾ for his owner, R. J. MacKenzie, and will be on the circuit this season. Zolback is a standard and registered horse, his papers having just been sent. He was sired by Zolock 2:05½ (one of the best speed producing sons of McKinney 2:11¼) and his dam is Madeleine Marshall by Demonio 2:11, second dam that great broodmare Mamie Comet 2:23¼ by Nutwood 2:18¾. He will be sold at a reasonable figure as the farm I have leased has been sold and I am compelled to get a new place. This is my only reason for selling Zolback and the following:

TWENTY-THREE SKIDDOW, standard and registered black mare, foaled 1906, sired by Nutwood Wilkes 2:16½, dam Twenty-third (dam of Sterling McKinney 2:06¼) by Director 2:17, second dam Nettie Nutwood (dam of Hillsdale 2:15) by Nutwood 2:18¾, third dam by Vick's Ethan Allen Jr. fourth dam by Williamson's Belmont. This mare is a fine sized, well made trotter, gentle, but has never been worked for speed. She is bred to be as fast as any.

STAR POINTER, filly (4), out of Trlx (dam of Aerolite 2:07½, Mona Wilkes 2:02½ and four others) by Nutwood Wilkes 2:16½, etc. This is a nice big mare, stands 15.3 hands and is a free-legged pacer, was handled a little as a two and three-year-old. She was bothered with splints, so I did not work her. They have disappeared, and, as she never gave a lame step, they must never have been near a cord or tendon. From her breeding she should make one of the greatest of broodmares.

Dan Logan filly (3) out of the standard and registered mare Sophia (dam of Sophia Direct, p. 2:23¾, and Corona 2:27) by Robt. McGregor 2:17¼; second dam Oradow by Wildwood 144, third dam Lady Utterback by Mambrino Patchen Jr. Dan Logan, her sire, had a trial of 2:12 and is a full brother to the champion Jim Logan 2:05¼. This filly is a pure-gaited trotter, just been broken and will undoubtedly be a fast mare. Her breeding can hardly be excelled. For prices and further particulars address **J. W. MARSHALL, Dixon, Cal.**

|---|--|--|

THE BONDSMAN is the only stallion that sired three new 2:10 performers with race records in 1910. In spite of the fact that he has no record, The Bondsman was a colt trotter of great merit. He was a contending colt all through the Kentucky Futurity of 1899, getting third money. This was a six-heat race and was won by Boralma. As a four-year-old he was not raced, but trotted a public trial in 2:11. As a sire he is destined to be the leading son of the great Baron Wilkes, founder of the greatest futurity winning family.

Pleasanton Training Park. \$100 THE PATCHEN BOY 39033

the Season with usual return privilege 1913. Season ends June 1st.

| J. C. Patchen ... 2:14 ³ / ₄ | Auduou the Miller 2:19 ³ / ₄ | and 11 others in 2:30. |

Dam Lady Clay, the dam of The Patchen Boy (3) 2:10³/₄, C. W. M. 2:24³/₄ (trotted to high wheels), Anglin Wilkes 2:16³/₄ over half-mile track, trial 2:09³/₄, by Metropolitan 1372, son of Hambletonian 10; second dam, Haggie Brown, by Ashland Clay; third dam, Pitty Pat, thoroughbred. The Patchen Boy was the greatest three-year-old race colt in the world, winning six straight races in the Grand Circuit the only year he was raced. His produce are good-headed and real race horses. (No tin cups.)

THE PATCHEN BOY is a beautiful black, 16.1 hands and weighs 1290 pounds. His colts are of fine size, great individuals and the kind that sell for the high dollar.

Season of 1912 at Pleasanton Training Park. Fee: \$50 Return privilege 1913

Both of the Above Horses Will Remain in California.

Best of care and attention given mares, but no responsibility assumed for accidents. Good pasturage at reasonable rates. For further particulars and full tabulated pedigree, address

The Finest Winter Training Track in America.

—THE—
PLEASANTON RACE TRACK,
Pleasanton, Cal.

There are about 50 box stalls in first-class shape, newly roofed, and ready for occupancy. Horsemen who intend to campaign their horses next season should not delay too long if they want to prepare them on this track, which is universally acknowledged to be the safest and best in existence. These stalls will not be vacant long. For further particulars apply to

H. E. ARMSTRONG,
Proprietor.

HOMEPHONE PRAISED.

A new subscriber writes the Home Telephone Company under date of October 28, 1911:
"Please install a phone at my home. I did not know anything about the good points of the Homephone and was rather prejudiced against it until I began using it in my office. I use it all the time now, not only in phoning around the building, but getting outside numbers, because it saves me time and trouble. The Homephone delivers the goods."
"You know the burners of candles rioted in London about 500 years ago when gas was introduced. Most of us object to changes. Possibly that is the reason why I am so late in ordering a Homephone."

The Man Who has Come Back.

The host of admirers of what the veteran war horse of the shooting game—**The Hon. T. Bill Crosby**—has done lately with his 34-inch harrel Parker gun, will be glad to read the following, viz:

- In the Eastern Handicap . . . 100 out of 100 targets.
- In the Western Handicap . . . 492 out of 500 targets.
- In Evansville, Ind., Tournament . . . 395 out of 400 targets.

Making a continuous run of 987 out of 1000 targets

The only straight score ever recorded in the **Grand American Handicap** event was made with a Parker gun, scoring 100 out of 100 at 19 yards rise. Furthermore the same Old Reliable has won the **National Championship of America** every year it has been shot for.

For information regarding small bore guns, address the pioneer makers of the 20 gauge

Remington-UMC ---the perfect shooting combination.

REMINGTON-ARMS UNION METALLIC CARTRIDGE COMPANY, 299 BROADWAY, NEW YORK CITY.

WINCHESTER
Rifle, Revolver and Pistol Cartridges.

When you buy cartridges, always insist upon getting Winchester make—the Red W Brand. Then you will have as good cartridges as it is possible to produce. No matter how good your rifle, revolver or pistol may be in itself, unless you use good cartridges in it, you will not get good results. Winchester cartridges are made for all makes of rifles, revolvers and pistols, and, while they do not cost any more than many inferior brands, they are superior to all others in strength, accuracy and uniformity. Being manufacturers of both arms and ammunition, we are able to approach the subject of ammunition making from both sides, the result being the manufacture of practical ammunition that gives the best results in all firearms. Remember to ask for the Red W Brand.

SINCE THE announcement that measures would be taken toward holding the biggest light harness race meeting ever held in America at the enlarged Stadium, Golden Gate Park, San Francisco, many suggestions have been offered that a horse show and livestock exhibition be held in conjunction with it, and, with a few preliminaries arranged, there is no reason why they should not. These are separate institutions, however, and do not come within the scope of those most deeply interested in light harness horses. Those who manage the horse shows and all who are interested in the breeding of choice cattle, sheep and hogs, are men who have devoted the better portion of their lives to these industries. Hence, each should be controlled by those who are best qualified to carry out the ideas of the organizations they represent, yet all can work harmoniously together. The trotting horse men will have all they can attend to properly in formulating plans, arranging classes, and deciding upon purses and stakes and also in placing the track and all its appointments in first-class order. The stabling for a large number of horses must also be attended to, and these stables can be utilized by those who are to give the horse show and the great livestock exhibitions,—three of the most lucrative attractions of the Panama-Pacific Exposition. There is plenty of land available for the erection of these stables and all that will be needed close to the Stadium will be cooling-out sheds to accommodate the horses which are to appear each day.

Horse shows,—those that have been the most successful,—are always held in some large pavilion at night, where, under the glare of thousands of electric lights, the fashionable world gathers to watch the splendidly trained carriage, road and saddle horses perform on the tanbark. It is a society event whether held in St. Petersburg, Vienna, Paris, London, New York, or Chicago. There are outdoor horse shows, but they are generally held on some landed estate where the equipages of the rich may be shown to advantage; but these are not remunerative to their promoters and neither are they given for that purpose. Here, in California, where the people can depend upon pleasant weather all summer, it may be that the promoters will hold their show in the open air; but that is an after consideration and will depend upon the judgment of those having this feature in charge.

The livestock exhibition can be held in the open, too, and when the Stadium is fenced and an admission fee charged the attendance will be large, for there is no doubt the public will receive the full value of their money in seeing the finest specimens of the various breeds of cattle, sheep and hogs ever gathered at one place in America. There will be prize winners from England, Scotland, France, Holland, Australia, New Zealand, the Argentine Republic, Canada, as well as from the United States, all competing for such valuable prizes as will be offered, and that sterling organization, the Livestock Breeders' Association of California, is energetically working to have this attraction meet all their expectations.

As stated above, these three "specialties" will be

governed by their respective organizations, but all will be subservient to a committee appointed by the Panama-Pacific Exposition. That these exhibits will attract thousands of people and prove of inestimable value to all who are living on this Coast no thoughtful person can deny. Many of those who come and see what this Coast is capable of producing in comparison with all other countries in the way of fast trotting horses, coach, harness and saddle horses, sleek looking cattle, fine sheep and goats, and prize-winning hogs, at a less cost than anywhere else in the world, will, no doubt, strive to buy land and engage in some particular branch which suits them best. This is the class of newcomers we want, and these are the exhibitions that will bring them here.

Referring to the enlargement of the Stadium, it will not be for these specific purposes. The Olympic Games of 1915 will doubtless be held during the Exposition upon these grounds, and by placing a fence around this splendid mile track a revenue will be obtained on this occasion which will go far toward defraying all expenses incurred. The infield will then be large enough for sports of every kind,—baseball games, football games, trap-shooting tournaments, polo tournaments, and rifle-shooting contests between the various militia companies; while the outer or main track can be used for processions of people of all nations, drilling contests between civic and military organizations, chariot racing, and countless other attractions. The fencing, therefore, of this track will be imperative. Hence, this work will not necessarily be done exclusively for the benefit of the light harness horse men; it will be in the nature of a permanent and indispensable improvement.

ALL who are interested in the light harness horse industry are waiting patiently to learn the result of the conference between the committee appointed by the Pacific Coast Racing and Fair Association and the delegates from the North Pacific Circuit, which was held last Thursday at Walla Walla. Upon the outcome of this discussion much depends. If the dates set at the meeting held in this city two weeks ago are satisfactory to our northern neighbors there will be another meeting called in this city to perfect arrangements for the fulfillment of the desires of the majority of trotting horse men in California and Arizona. Since the announcement that a continuous circuit is contemplated there has been quite a revival among all who have a love for fast trotters and pacers, and many of the owners have been quietly considering who would be the very best men and where would be the best and most accessible race tracks for them to send their well-bred colts and fillies to. At Los Angeles it is estimated that there are over 300 horses in training—more than at any other race track in the United States; at Pleasanton there are over 200; at San Jose there must be over 100; at Sacramento there are at least sixty; Marysville, forty; Fresno, thirty-five; Salinas, thirty-five; Woodland, thirty; Alameda, about thirty, while at other places there must be on an average twenty. Some of these are just being handled—not developed—but it shows that the interest in them is being aroused, and with the promise of big stakes and purses and no delays between the cities on the Pacific Coast Circuit from Vancouver, B. C., to Phoenix, Arizona, there will be more and better opportunities for winning money than ever and the prospect of selling a really high-class trotter or pacer for a good figure is much brighter. Some that will score for the word this year as two and three year olds will be seen at the big meeting in 1915 at the Stadium. There is no reason why they should not, if they are not "killed off." Horses at five and six years of age, if developed and not injured, will train on and develop more speed. There will be races for all classes at that race meeting and present indications are most favorable for its becoming a reality. The light harness horse industry, therefore, never looked brighter or more inviting, and everything connected with it has a tendency to make it better every year.

THE BREEDER AND SPORTSMAN will issue a Breeders' Number on March 9th which will be specially devoted to stallion owners and their horses. It will not only serve to give stallion owners an opportunity to start their campaign for patronage in the right way, but it will also aim to present to them many features that will prove interesting and valuable. There will be able and exhaustive articles on some of the sires that have made our California-bred

trotters famous, and their histories will be graphically described. There will be statistical tables and data which will prove valuable to our readers. It will be a number worth keeping. As an advertising medium to confer the maximum amount of value on its patrons it will possess features which will make it interesting in its particular field and every owner of a good mare will receive a copy. Owners of stallions cannot invest a small amount of money to a greater advantage than in claiming space in its columns. The circulation of this journal is world-wide, and is increasing with great rapidity. Only a few weeks remain for advertisers to prepare copy for this Breeders' Number. Heretofore, we have received most encouraging news from owners of stallions and advertisers who have patronized these "special numbers" and this one for 1912 will be no exception.

HORSEMEN AND THE HOPPLE RULE.

County fair managers in Ohio and Indiana have within a few days passed resolutions which will be presented at the approaching biennial meetings of the National Trotting Association and the American Trotting Association urging those organizations to repeal the present rule of harness racing which provides for the gradual abolition of hoppers on all trotting tracks in the United States and Canada. Managers of many other minor half-mile tracks have lately gone on record in favor of repealing the rule, and it is said that an effort to accomplish this purpose will be made in February, notwithstanding the fact that the rule is only just beginning to affect a few of the younger pacers and will not be in full operation until 1914.

Most of the opposition to the rule comes from those fair and country half-mile rings whose managers generally have no particular interest in improving the breed of trotting horses. The main thing with most of them is to get as many entries as possible for their races, and when convinced that more entries will be forthcoming with the hoppers than without the hoppers, they are in favor of repealing the rule. The vote was unanimous at the annual meeting of the "Ohio Fair Boys," and substantially so among the Indiana secretaries.

Practically every representative horse breeder in the country, on the other hand, is strongly in favor of standing by the present rule and abolishing the hoppers. With the breeders are allied the majority of the mile tracks and a few of the half-mile rings. Numerically the opponents of hoppers are probably in a majority among all the track managers who will be represented at the February meetings of the N. T. A. and the A. T. A., since the county fairs and country half-mile tracks far outnumber the mile courses, and each track, whether big or little, has one vote and no more in the congress.

If the proposition to repeal the rule and permit pacers to race with their legs tied together were submitted direct to all members of the National Trotting Association and the American Trotting Association, few horsemen would expect to see the present rule saved from repeal, but with nine out of ten members represented by proxy at the biennial congress, and with most of the proxies and all the machinery in the hands of breeders and others who are personally opposed, to repeal it is another story. That the Ohio Fair and others will try to repeal the rule before it has gone into full operation is not believed by well-informed horsemen, while a good many are confident that those who control the National Trotting Association and the American Trotting Association will stand their ground to the end and sweep the hopped pacers off the turf.

Apparently expecting such an outcome, the fair managers are already talking about a new organization similar to the National Trotting Association and the American Trotting Association, but made up of tracks which favor the hoppers. The plan would be to draw away from the older organizations such of their members as favored the retention of the hopped pacer, and this would mean practically all half-mile tracks, as well as some of the Western mile tracks, making perhaps 75 per cent of all the tracks in the country. That the leaders of old associations would never let their members go without a fight is regarded as a foregone conclusion. Their probable course would be to borrow the big stick of the Jockey Club and "outlaw" all horses and horsemen racing at meetings not "sanctioned" by the National Trotting Association or the American Trotting Association, and thus control the situation.

THE DALLAS (TEXAS) FAIR.

Secretary Sydney Smith, of the State Fair, of Texas, writes as follows:

At a meeting of the board of directors of the State Fair, of Texas, held January 5th, it was unanimously voted to lend every additional encouragement to racing at their 1912 meeting by offering two stakes of \$5,000 each and four stakes of \$2,500 each, all in addition to the regular program of twenty-one purse races.

As this is quite a material increase in the earning capacity over the programs given in former years, we trust that this will meet with the approval of the Eastern and Western horsemen.

Mr. W. A. Clark Jr. has selected the name Bon Courage for his Bon McKinney-Helen Keyes colt. This colt is entered in all the futurities on the Coast.

AT THE "HISTORIC TRACK," PLEASANTON.

List of Trotters and Pacers in Training There, and Who Is Handling Them.

"What a blessing this rain is!" was the remark an old horseman made last Friday as he gazed on the low lying hills surrounding the Livermore Valley. The mantle of green with which they are covered gives promise of bountiful crops of hay and grain, and at this season of the year the view is magnificent. "The reason I say this," added the speaker, "is, that the farmers, stockmen, and everyone dependent upon them in this choice, agricultural region, can rejoice while they are resting, and the horses that were beginning to trot and pace phenomenally fast quarters and halves at this track will have a chance to recuperate from the severe work they have been doing, and which they should not do for at least another month."

The following day (Saturday) the sun came out in all his glory, his warm rays causing clouds of vapor to rise from the moisture-laden fields and meadows in the valley and trees and scrubbery on the hills and mountain sides. At 10 o'clock the track was drying fast, but horsemen were not allowed to drive over it until some time after noon. They contented themselves, however, by having the shoers attend to the shoeing of their horses, so these "knights of the anvil" were kept busily engaged all day. The grooms were busy washing and overhauling their assortments of boots, oiling harness, and adjusting their bikes; because in Pleasanton they know that in forty-eight hours after the heaviest rainstorm these will be required, for horses can be jogged then and carefully exercised.

What a busy place it was when I arrived at the track. Havis James was superintending the unloading of some splendid red oat hay which had just arrived from Livermore, and everybody seemed to be working with a will to clean away all the mud, dirt, and debris which accumulated during the protracted storm. A walk by the long rows of stalls revealed the fact that, with the exception of about twenty, every one was occupied. It recalled memories of the past and the men who became noted as famous reinsmen. At every turn something familiar reminded me of those men who were in their prime twenty years ago. Many of them are resting from their labors in their last long sleep, while others are living where they can be near some race track, and once in a while we hear of them driving in some good race. Those who have passed away include John A. Goldsmith, "Directum" Kelly, Jim Dustin, Jimmy Sullivan, Lee Shaver, Geo. Bayless, Johnny McConnell, Tommy Keating, John Blue, and the man that some of these men worked for, Monroe Salisbury. Those that are still able to come up for the word are Geo. Starr, Millard Sanders, Andy McDowell, Johnny Dickerson, "Sandy" Smith, Ben Walker, besides those who are still to be seen at this track, the members of the "Old Guard." This was the track upon which many world's champions learned their first lessons in the way to go, and from the little depot at Pleasanton they quietly slipped away every spring to thrill thousands of admirers wherever they raced, and on their return were received by the entire populace of this pretty place, while the band led the procession to this track playing "Behold the Conquering Hero Comes," and "Home, Sweet Home."

But these are merely reveries. I must return to the all-absorbing work of getting information for our readers. Charles L. De Ryder, having just leased all of Capt. McCan's trotting, draft, and saddle stallions, as well as his collection of young mares, was very busy, but graciously accompanied me around to where his horses were standing knee-deep in straw. He gave me an outline of their breeding as follows:

The first one looked at is his nice, upstanding yearling by Charley D. 2:06½, out of Gertie A., by Diablo 2:09½; this pacer is entered in all the stakes and promises to be larger than his brother, Victor Pointer.

The next one is Direct Pointer, a two-year-old by Star Pointer 1:59¼, out of Directola, by Direct 2:05½, dam Steinola, by Steinway 2:25¾, and then back to old Minnehaha (dam of 8, including Beautiful Bells 2:29½). This is a good one. His dam, Directola, was recently purchased by Mr. I. L. Borden, of San Francisco, and is heavy with foal to the great Aerolite 2:07½.

In an adjoining stall is a stout, substantially made five-year-old pacing gelding called Nutcome, by Nutwood Wilkes 2:16½, out of a mare by Welcome 2:10½. He is a pacer.

Vela Alta, a very fast pacing mare, although on the small order, is another belonging to A. V. Mendenhall, a prominent Oakland attorney, who is also an enthusiastic horseman.

June Pointer, another "Pointah boss," as Old Wash affectionately termed this breed of pacers, is looking strong and rugged and will be a factor in the races of 1912. He is out of Perza, by Allie Wilkes 2:15, and belongs to S. Christenson. June Pointer has paced better than 2:09, and, at present, is the sole occupant of the paddock in which Direct 2:05½ once cavorted around to Monroe Salishury's amusement.

Mr. De Ryder pointed with pride to a lusty looking yearling which belongs to Col. J. C. Kirkpatrick, manager of the Palace and Fairmont Hotels. This colt is by Charley D. 2:06¼, out of Elsie, by Silver Bow 2:16; second dam Addie S. (dam of Sidne 2:23¾, and dams of Meridian 2:12¾ and Imp 2:19¼), by Steinway 2:25¾; third dam Aldane, by Wissahickon 947 (son of Wm. Welch, by Hambletonian 10, and Lady Montague, by Mambrino Chief 11, etc.); fourth dam Whthrop Girl, by Winthrop 505; fifth dam by

Chieftain, etc. He is a pacer and should be one of the do-or-die kind.

The next one looked at is a compactly built, round-barreled three-year-old light roan filly by Bodaker 2:13, the crippled stallion that raced so well in Charley James' string last season. The dam of this one is Tannahika, by Athadon 2:27.

P. H. Smith's little string of choice trotters is here, and doing well; Seville S., by Strathway 2:19, out of Simmone by Simmons 2:28; Katherine 2:19, by Diablo 2:09¼, and Rosemary, by Raymon,—these are square trotters; then there is a very smooth going pacer, Santa Rita Girl, by Zolock 2:05¼, out of Marguerite 2:16¾, that will keep her company busy to pass her this season. The yearling colts and fillies by El Volante 2:13¼, and Zombro 2:11 are taking on flesh and getting over their nervousness. The dark chestnut filly Blanka S., by Red McK., out of Katharine 2:19, is being exercised and strengthened. She is a credit to any owner.

D. L. Bachant's hay filly by Athasham 2:09¼, out of Corinne Neilson, by Clarence Wilkes, is doing well. This mare Corinne Neilson was the dam of that wonderful trotter Perfection, trial 2:06¼, that was sold for \$10,000, but died before she could be raced.

A. L. Scott, President of the State Agricultural Society, has three here that will soon be fit for hard work. They are Weatewater, a beautifully gaited trotter by Sidney Dillon; Ben Prix, a two-year-old by Bon Voyage 2:08, and Le Voyage 2:25¾, by Bon Voyage 2:08, out of Missie Medium (also dam of Bon Volonte 2:25¾), by Rampart 2930; grandam Belle Medium 2:20 (great broodmare), by Happy Medium 400, etc. These three will get low records this year, for their improvement since Mr. De Ryder has had them is most marked.

W. T. Sesnon's San Felipe, by Zombro 2:11, is enjoying himself by trotting miles in 2:45, but that is no measure of his speed. It is predicted he will lower all records made by the Zombro tribe this year.

John Haven is the name of a three-year-old pacer owned by Messrs. Mendenhall & Haven. John is by Star Pointer, out of a mare by Washington McKinney 2:17½.

Pen Wright, by Chas. Derby 2:20, is a six-year-old green trotter whose dam was Inex (dam of 3 in 2:30), by Sweepstakes 298. Mr. A. V. Mendenhall, his owner, just brought him in; he was never on a race track before. Maybe that's the reason he has always been right.

The flaxen-maned Sidney Dillon mare, Martina Dillon, whose dam was by the Electioneer horse Mortimer, once owned by the late Wilfred Page, of Cotati, "is the goods," as the boys say. She is a very promising "prospect" for the green class of trotters.

There is another of the Star Pointer family in an adjoining stall. He is called Star Tilden, and belongs to Geo. W. Putnam, who resides in Salt Lake. This likely pacer will be in the 2:10 list; his dam was by Roy Wilkes 2:06¼.

C. Lee Jones, of Modesto, who owned Carlok in 2:07½, during his Eastern racing career, has Jones Mc, a counterpart of his sire, Carlok in, out of a mare by Waldstein 2:22½. He is only a four-year-old, but is the making of a very fast horse. There is a sister of his here, a year older, that is also a perfect-gaited trotter.

Frank Malcolm, of Fresno, has sent Eddie Mc 2:29¼ here, and a two-year-old filly by the stoutly bred stallion Expressive Mac 2:25¼. The former is a pacer and the latter a pure trotter.

Able Direct (full brother to that remarkably fast filly Irma Direct), by Robert Direct, is also looked at. He belongs to Mr. Bachant, of Fresno.

Mr. De Ryder will have in his string, besides The Bondsman and The Patchen Boy (3) 2:10¾, Orlena 2:11, by Ormonde 2:08¾, out of Helena 2:11¼, by Electioneer; the great two-year-old Ethel Tddington, by Toddington 2:20; Hazel Patchen 2:13½, by The Patchen Boy, and Lucille Patchen 2:16, by the same sire. Besides these, he will have Ouragon, the champion three-year-old Belgian stallion in California. He intends to have this horse go to Livermore, where he will be bred to some of the big draft mares there. He also has the Kentucky saddle horse which Capt. McCan bought last year.

Mr. S. S. Bailey, who for many years was one of Seattle's foremost citizens and later was one of Salem's representative men, has quite a string of fine horses and takes a personal interest in their welfare. If kindness, good care and a thorough knowledge of the business will insure success in this calling, Mr. Bailey should meet with no failures.

In the first stall is a big fine bay gelding called Moses, by Tidal Wave 2:06¾, out of a Bessie L. (dam of Waverly B. (p) 2:23½), by Montana Director. He is only three years old, and Mr. Bailey says that when he first saw him he was lying in the bullrushes with his mother looking curiously at him, so he thought of a Biblical name and called him Moses.

He has another brother to Moses he calls Job, which he named because he stood so patiently while a badly injured hind leg was being treated when the youngster was a foal. He is also one of his best horses.

Holly Brand, by Tidal Wave 2:06¾, is a pacer out of a mare by Coeur d'Alene, second dam by Alexis, that Mr. Bailey esteems very highly.

Tom Seattle is a bay pacing gelding, two years old, by Prince Seattle 2:25¼, dam Orma A. 2:10¼.

Geo. Seattle (2) is a brown gelding by Prince Seattle, out of Bessie L., by Montana Director.

Lucy Seattle (2) is a bay filly by Prince Seattle, out of Altamont Maid, by Altamont 2:26.

Bertie Seattle is a handsome bay two-year-old filly by Prince Seattle 2:25¼, out of Zometta, by Zombro 2:11; second dam Bessie, by Blackwood Mambrino.

A bay gelding trotter by Bonnie McK. (sire of Bonnie Antrim 2:12), is in the adjoining stall.

Billiken (3), by Prince Seattle 2:25¼, out of Zometta, by Zombro 2:11, is in another.

Prince Seattle 2:25¼, by Stam B. 2:11¼, dam Bertie (dam of Bertina 2:16¼), by Piedmont 2:17¾; second dam Bijou, by Electioneer. He is a fine looking stallion, and from the appearance and speed of his progeny will achieve quite a reputation as a sire.

Mr. Bailey has Dr. Monday (trial) 2:27¾, by Zombro 2:11, out of a mare by Altamont 2:26, that will get a low record under Mr. Bryant's tutelage this year.

In the next stall is Waverly B. 2:23½, by Tidal Wave 2:06¾, out of Bessie L. He is a slick going pacer, but this is no record for him; he will be in the 2:10 class before 1913.

Irma Direct is a six-year-old brown mare which Mr. Bailey recently purchased. She is by Robert Direct, and has a world of speed. For a time after being brought to this track she did not do well, but is now "rounding to," and will be ready to score for the world when the bell rings.

Bon Guy 2:11¾, the wonderful three-year-old that electrified horsemen in 1910, is here, and his trainer, Mr. Bryant, is quite proud of him. This son of Bon Voyage 2:08 and Daphne McKinney (dam of Frank N. 2:07½), by McKinney 2:11¾, is not to be bred this season, but will receive a thorough training and be a factor in the 2:10 class races.

Thomas Ronan is one of the most remarkable men of his age on the Pacific Coast. He is approaching the allotted four-score years, but age does not affect his love for a good horse. He came to Washington Territory from his birthplace in Canada when a comparatively young man, and braved all the perils of frontier life. Possessing a strong constitution and being enterprising and very industrious, he carved a fortune out of the wilderness, and when the opportunity presented itself to gratify his love for horses, he visited Kentucky and purchased a number of grandly bred stallions and mares to stock a farm he had selected near Dayton, Washington. Some years ago he decided to come to Pleasanton, where the climate was more genial and where he could drive his horses throughout the long winter months. He bought this track, and after making many improvements thereon sold it to Mr. H. E. Armstrong, the present owner.

Mr. Ronan is remarkably well versed in the pedigrees of our leading trotting horse families, and was one of the first men to champion the now famous Jay Bird, and purchase some of the descendants of this horse. He has gradually disposed of all but these, and every clear day he may be seen driving them on this track. He has a nice, compactly-made four-year-old filly called Emily, by Birdman (son of Antrim 5918), dam Myrtle, by Arronax, he by William L., out of Stokesie, by Geo. Wilkes 2:22.

Blushing Maid is the pretty name of a sweet-gaited three-year-old roan filly by San Francisco 2:07¾, out of Birdie (dam of Bodaker 2:13, Birdman, etc.), by Jay Bird.

Galileo is a three-year-old gelding by Birdman, out of Myrtle, by Arronax; he is a full brother to Emily.

Joy Bird is another two-year-old which, like all of Mr. Ronan's horses, is a remarkably pure-gaited trotter; he is by Birdman (brother to Bodaker 2:13), out of Joyful, by Alexis; second dam Gillia, by Meredith 1368.

Soreta is, without doubt, the best bred one he has; she is by San Francisco 2:07¾, out of Burned Side, by Arronax; second dam Birdie, by Jay Bird, and if ever there was the "makings" of a 2:15 trotter, Soreta is the one.

He has a five-year-old bay mare called Matilda, by Birdman, dam Myrtle, by Arronax, that can step as fast as any green mare at Pleasanton. This horse Birdman was sired by Antrim (son of Aberdeen 27, and Hyanna, by Hylas 831), and his dam was Birdie, by Jay Bird; second dam Lady Lyle (dam of 1 trotter and 1 pacer), by George Wilkes; third dam Dame Tansy (dam of 3 and grandam of Butterfly 2:19¾, Eagle Bird 2:21, and 2 others in 2:30), by Daniel Lambert; fourth dam Quarter (dam of Bay Star 11267). There are very few stouter trotting bred stallions in California than this horse and his brother, Bodaker 2:13, and both should prove to be sires of good game trotters.

H. Busing is driving a very handsome bay two-year-old pacing stallion called West Pointer, by Star Pointer 1:59¼, out of Sweet Hallie, by American Hal. This was the last colt the champion sired before leaving California, and many who have watched him pace claim he will be the best. Mr. Busing has made arrangements to breed the dam of this colt to that remarkably fast and game performer, Vernon McKinney 2:02, this spring.

Fred Chabourne has only a few so far this season, but in about two weeks he and his father-in-law, James Sutherland, will have all their box stalls filled. Aerolite 2:07¾ never looked, felt, or acted better than he does to-day, and it would not surprise his most ardent admirers—and they are legion—to see him get a record of 2:03 or better this year.

Frank N. 2:07¾, the fine big Wm. Harold pacer, is taking life easy, but will soon be seen in the shafts jogging in his work preparatory to the racing season. He is sound as a new milled dollar and has a "world of speed."

Fred is handling a three-year-old gelding by C. The Limit 2:04¼, out of Rosie Woodhurn, for C. L. Crelin, and is more than pleased with his progress.

He has a very nice mare called Roseline 2:24¾, by Packline, which belongs to Z. T. Stahl, of Lewiston, Idaho.

As usual, this trainer always has a few "babies" to break in, and this year he has a trio of extra good

ones. The first is by Alconda Jay, out of La Moscovita (dam of Bon Guy 2:11½ and Frank N. 2:07½). This belongs to Wm. T. McBride, proprietor of Pleasanton's leading hotel, "The Rose." The others belong to a Mr. Campbell, of Vancouver, B. C. One is Bon Cress, by Bon Voyage 2:08, out of a mare by Crescens 2:02½, grandam Silpan, by Silver Bow 2:16. There's a double Robt. McGregor cross in this one. The other is an Alconda Jay, out of a Silver Bow mare.

H. E. Armstrong, owner of this track, has decided to fit his small but select string of horses for the big Pacific Coast Circuit this year. It is headed by Kid Wilkes 2:09½, that remarkably game trotter by Stanton Wilkes 2:10½, son of Guy Wilkes 2:15¼. In the next stall is Cora 2:08½, by Del Coronado 2:09½. She is looking fat and fit for conditioning for the races.

Hal J. is a five-year-old pacing gelding by Hal B. 2:04½, out of a mare by Del Norte 2:08, that is doing nicely.

Golden Mane is a handsome trotting gelding that was timed a mile in 2:16 last season. He is by Kinney Lou 2:07½, out of Floradora, by a son of Steinway 2:25¾.

"Farmer" Bunch is also here, and, as usual, has all he can do. He has been at the Stockton track all summer, but thinks Pleasanton is a good place to "hibernate" through the winter.

He has that good free-legged pacer T. D. W. 2:13½, trial 2:07½. He is only six years old and one of the sweetest pacers one could wish to see. Needs neither boots nor straps.

In the next stall he has an unnamed trotting five-year-old gelding by Strathway 2:19, out of Elsie Downs, by Boodle 2:12. This old mare (the dam of this one) won a race under saddle a few months ago in Auckland, New Zealand.

Jim Rea III is the name of one of the best formed two-year-old pacing colts seen at Pleasanton. He belongs to Jim Rea III, of San Jose, and is bred to go all day. He was sired by Nearest McKinney 2:13¼, out of Much Better 2:07¼, by Chas. Derby 2:20, and is entered in all the Futurities on the Pacific Coast. If he does not win there will be a number of hadly disappointed admirers wondering what happened him. He is a far better made colt than his full brother, One Better (2) 2:24½, now in the R. J. MacKenzie stable.

Star Searcher is the appropriate name for a good-looking two-year-old pacer that "Farmer" Bunch is developing for his owner, Louis Wagner, of Stockton. Star Searcher was sired by Star Pointer 1:59¼, out of a mare by Searchlight 2:03¾.

This trainer also has Wm. Hendrickson's three trotters, Tom Hendricks, Jim Hendricks, and Mary Hendricks, that were described in our last week's issue.

Louis Joseph is a new man here. He hails from Stockton and has some cracking good ones in his string; so good, in fact, it is difficult to say which is the best. One is a coal black colt, full brother to Vernon McKinney 2:02, the star of the MacKenzie stable in 1911, and he is a pure, resolute-going pacer. In the adjoining stall is another full brother, a chestnut in color, three years old, that is one of the finest gaited trotters on the track; he never paced a step in his life.

Gilbert B. is the name of a big, ragged-hipped, strong-made pacer by Slippery Jim (a son of Guy Wilkes 2:15¼), out of a mare by Nutwood Wilkes 2:16½. Gilbert B. wears the hoppers, but he can move like a steam engine. He will be raced this year. These belong to Mr. Gilbert Baker, of Oakdale, the breeder of Vernon McKinney 2:02.

Mr. Joseph is also handling a good-looking four-year-old dark bay trotter by Educator, out of Miss Joseph, by Derby Ash, and when the bell rings he will be ready for the word. He is a good one.

E. Rail has the Sacramento Valley Stock Farm trotters here, headed by Dillcara, the choicest bred Sidney Dillon in California. This horse has grown and filled out wonderfully. When in shape there is no doubt he is entitled to be called one of the hand-somest horses in this State. Mr. Rail has several colts by him, and, when the track becomes dry, many will be astonished by the natural speed they can show. Dillcara should be patronized by owners of good mares, for there is no doubt he will sire speed. His full brother, Harold Dillon, that is fully a hand smaller, is conceded to be one of the best sires for his opportunities ever landed in New Zealand, but, as an individual, he does not class with this one.

Chas. Whitehead, the quiet, genial trainer who met with such marked success at Salinas, has a three-year-old gelding by Oro Guy that acts as though he will be fit to take to the races this season.

In the next stall is a well-made, nicely-proportioned son of Bon Voyage 2:08 and that great broodmare Carrie Malone, full sister to Chas. Derby 2:20. He was bred to a few mares in Salinas and the owners claim the colts are better looking than any they have seen by other sires. When it comes to blood-lines, Clear Voyage compares very favorably with any son of the great Bon Voyage. He has trotted eighths in 16 seconds with very little work and will be given a record this season.

Snisky is the peculiar name of a very toppy, stylish, pure-gaited trotting mare by Delphi 2:12¼, out of Nina B. (full sister to Helena 2:11¼, etc.), by Electioneer. What a roadster she will make even if she is never raced! No boots nor toe weights, has a fine, clean, open gait, and trots apparently without any undue effort.

There is another here, a colt called California Mack. He was sired by McKena, out of a McKinney mare, a little inbred, but very promising, and belongs to Wm. Irvine, of Sacramento.

H. G. Smith is another of our reinsmen who likes Pleasanton. He also has his horses looking well. Col. Kilmonio is the first one I saw. He is owned by Col. Killingsworth, of Vacaville, and was sired by Demonio 2:11¼, out of Sister, by Nutwood Wilkes 2:16½. He is seven years old and a pacer.

In the next stall was a speedy bred three-year-old filly by Star Pointer 1:59¼, dam by Bonnie Direct 2:05¼; second dam by Searchlight 2:03¼; third dam Zeta Carter, by Director 2:17; fourth dam Lida W. 2:18 (dam of Nutwood Wilkes 2:16½, etc.). She belongs to H. Buchenau, of Berenda, Madera county, and, as one would surmise from reading her pedigree, she is a pacer and a very promising one.

Mr. Smith has a filly called Dramonia, by Demonio 2:11¼, out of Olita, by Bratmoor, and a very handsome chestnut colt by Demonio 2:11¼, out of Nettie T., by Dawn 2:18¾; second dam Mercedes (thoroughbred), by Imported Young Prince, then this pedigree runs back twenty-two dams and includes some of the greatest sires and dams in the American and English stud books. This colt is a pacer, and, if there is any virtue in "thoroughbred in the pacer," he should be as good as any ever foaled.

In the adjoining stall is a four-year-old trotter by that grandly bred trotting stallion Palite, out of a mare by Don Marvin.

Messrs. Hazzard and Silva have that phenomenally fast pacer Del Rey at this track and will undoubtedly start him in the races this year. He will be a money-winner in all the events he is eligible for, and that is from the green class down to 2:05. This horse is to receive a thorough preparation for the campaign.

Charles James, the trainer who made such a splendid record last season, is not working his horses much. He is one of those trainers who can curb his impatience and wait. His long experience in this game has enabled him to have his horses "just on edge" when the bell rings, and not have them trotting and pacing for imaginary purses during the months of May and June. He will have a nice string of money-winners out this season. Dicto, the latest addition to his stable, is one that makes him feel that there will be few races advertised in which Dicto will not be the first name to be seen in the summaries. Mr. James is a very kind, careful, sober, industrious trainer, and a man with these qualifications, combined with a thorough knowledge of the business, is sure to succeed.

Mr. Henry, formerly of Stockton, has a filly by Charley D. 2:06¼, out of Beretta 2:22¾ (full sister to C. The Limit 2:04¼), that will make her sire more famous still, for she is a good one in every sense of the word.

He also has for the same owner, R. S. Irvine, of Stockton, a handsome Alconda Jay filly out of La Moscovita (dam of Bon Guy 2:11¼ and Frank N. 2:07½), that is the best Alconda Jay filly I have seen. She ought to be, for her dam is one of the best bred mares in the country.

Will Guthrie is the name of the fastest in Mr. Henry's string. He is a big, strong, rugged-made pacer that has no mark, yet he has paced miles in 2:10¾. He is a free-legged, smooth-gaited side-wheeler.

Dick Wilson was away from Pleasanton last Saturday. He left on the Friday night train for Salinas, where he was to get two good trotters to add to his string, which consists of Lucille Wilson, a green trotter. She was sired by The Patchen Boy (3) 2:10¾, and is very promising.

Youllyn, in the next stall, was all that was said of him in our Holiday Number, and more. He is one of the most perfect-made trotters I have seen in a long time, and if he does not get a low record I will be as much disappointed as the owner. He is by G. Albert Mac, out of Belle Lynn, by Diablo 2:09¼. Just watch and see what speedy and game youngsters will come from these Diablo mares hereafter.

Rubylight 2:11½, the good money-winning two and three-year-old pacer, has grown and filled out well since her last arduous campaign, and is as sound as when she was foaled. This shows that Dick Wilson knows his business.

In the next stall is one of the handsomest two-year-old stallions on this track. He is a pacer, and his sire was Hedgwood Boy 2:01 and his dam was Lady Patchen 2:29¼, by The Patchen Boy (3) 2:10¾; second dam Von Posey (dam of The Beauty Patchen 2:24¾, Western Horseman 2:24¾, sire of 5, and Lady Patchen 2:29¼), by Russia 3:675; third dam Molly Friel, by Jim Monroe 835. This is one of the best limbed colts of his age here and promises to be very fast. How fast he has shown, only his famous owner and trainer knows.

Next week I will give the list of the balances of the horses here, as space forbids in this issue.

A movement has been started in Kentucky to have a bill introduced in the General Assembly delegating to the State Racing Commission the right to appoint inspectors of the mutual machines at the various race tracks operating under license from the commission, the inspectors to be paid from a small assessment upon the tracks. The commission was created under an act passed by the Legislature of 1906 and approved by Governor Beckham on March 23, 1906, which since that time has not been amended. However, the mutuels have replaced the bookmakers since the law was enacted, and it is said several features of the statute could be strengthened by a comprehensive amendment.

Last Monday Ted Hayes worked his two-year-old Zombowage a mile in 2:31½, last half in 1:13½, last eighth in 17½ seconds, over the Los Angeles track.

PLAN HORSE SHOW IN 1915.

Tbanks to the genial California weather, equestrian sports have been just as popular this winter as at other seasons of the year, and last Sunday there were scores of riders out on their mounts, wending their way in among the hundreds of automobiles and adding to the picturesque effect of the holiday pleasure-seekers. Every horse at the Riding Club was out, considerable over a hundred, and merry little groups of riders were to be seen, attesting to the striking revival of the sport this winter, says the Examiner.

The Pacific Coast Gaited Saddle Horse Association is doing much to further this sport through its efforts to promote the horse show that is to be one of the big features of the Panama-Pacific Fair in 1915. Naturally, to get up such an event and make it worthy of the country to be represented, the time intervening before the exposition is not a day too much for preparation. This is one of the reasons for the pronounced popularity of the saddle horse in and about San Francisco this winter.

This organization announces a sweepstake prize of \$6,000 with entries to close on April 1, 1912. The contest is to be between four and five-year-olds. It is expected that this number alone will have fifty or more entries, judging by the number that have already been placed. Entries are expected to come not only from the Coast States, but from Kentucky, Tennessee, Missouri, and the other States famous for blue-blood stock, as well as from the Coast and Rocky Mountain States.

Owners of gaited saddle horses in California are manifesting a spirited liveliness in this number, as is shown by the demand for the services of the old-time trainers as well as for the high prices being paid for saddle horses of this type. William T. Session, of this city, is having his registered gaited saddle horse Moreno trained by W. A. Hunter at Woodland. Walter E. Buck recently acquired a stylish three-year-old black mare which is being trained at Golden Gate Park. "Queen Louise" is her registered name. She shows fine style and although trained for less than four months, can acquit herself in seven gaits bandsomely. J. J. Gethin recently sold a handsome saddle mare to Miss Burke, of New York. The mare is trotting bred, able to do a mile in 2:30, but is tame and gentle enough for any woman to manage easily. Miss Dahl, one of the riders well known at the Riding Club, where she usually leads in the Wednesday night ring exhibitions, also bought a good-looking black mare of the full-gaited type which she rides every Sunday through the park and along the boulevards.

It is most encouraging to lovers of the sport that such interest is being taken in the saddle horse, for it all indicates that California is coming right to the front, taking its grand old place in the lead, where it used to be in the days of Senator Stanford, the Haggins, and others of that school who took pride in developing equestrian sports to the highest degree back in the seventies.

A PRODUCING TROTTING MATRON.

Young Miss, dam of the famous Bingen 2:06¼, that was recently sold by A. W. Smith, of New York, to J. L. Smyser, of Louisville, Ky., has had thirteen foals, as follows:

- 1892—B. f. Miss Lizzie S. (dam of Gracino 2:13 and George Brill 2:23¾) by Bow Bells 2:19¼.
- 1893—E. c. Bingen 2:06¼ (sire of Ulian 1:58¾) by May King 2:20.
- 1894—B. f. Mrs. Young (dam of Kingsflower 2:22¼ and the pacers Our King 2:15¼ and King's Mantle 2:19¼), by Wilkes Boy 2:24¼.
- 1897—B. c. Young King (sire of the pacer King's Idyl 2:15¼) by May King 2:20.
- 1900—B. f. Kinglyne (dam of Morgan Axworthy, sold for \$4000) by May King 2:20.
- 1901—B. f. Lookout Queen by Lookout 2:22¼.
- 1903—B. c. The Lookout 2:17¼, by May King 2:20.
- 1904—B. c. Golden Result by May King 2:20.
- 1905—B. f. Mistress Young by May King 2:20.
- 1907—B. c. Master Jim by Electioneer 2:20¾.
- 1908—B. c. Jim Walnut (Bingen Hall 2:27¼) by Walnut Hall 2:08¼.
- 1909—B. c. Master Walnut (deformed) by Walnut Hall 2:08¼.
- 1910—B. f. Petrovnia by Peter the Great 2:07¼.

Young Miss was bred by A. Smith McCann, of Lexington, Ky., and was foaled in 1889. Her sire was Young Jim, by George Wilkes 2:22, and her dam, Miss Mambrino, was by Red Wilkes, another son of the head of the Wilkes family. Miss Mambrino was out of Miss Clark, by Arlic, son of Almont 33, and she out of Kate, by Clark Chief. Mr. McCann sold Young Miss in 1892 to David Bennett, of Lexington. She was then in foal to May King 2:20, a son of Electioneer, and Bingen was foaled the property of Mr. Bennett, who is often, though mistakenly, referred to as the breeder of this noted sire. Geo. W. Leavitt, of Boston, Mass., who purchased Bingen as a yearling and sold him to E. H. Greeley, of Ellsworth, Me., bought Young Miss when she began to show great promise and shortly afterward sold her to Charles Whittemore, of Boston. He, in turn, sold her about 1904 to D. Comyn Moran, of New York, from whom Mr. Smith purchased her in 1909. At 22 years of age, the producer of seven foals since 1903, and still productive, having one of the greatest of breeding sires to her credit, Young Miss will ever occupy a prominent place in breeding history.—Horse World

GOOD FOR ANYTHING THAT NEEDS A BLISTER.

Gombault's Cautic Balsam is all right for anything that needs blistering. I used it on spavins with success.—H. P. SHERMAN, Toledo, Wash.

Drink Jackson's Napa Soda.

NOTES AND NEWS

Send in your stallion advertisements.

Our Breeders' Number will be issued March 9th.

Columbus, Ohio, will give two weeks racing and \$90,000 for purses.

Guy Axworthy 2:08½ will head the stud at Senator Bailey's Lexington (Ky.), stock farm.

Quite a number of mares in Los Angeles have already been booked to Bon Voyage 2:08.

A \$10,000 trot and a \$5,000 pace are proposed for Dallas, Tex., in connection with the State Fair.

W. L. Snow expects Zomhrewer 2:04¼, by Zombro, to pace close to the two-minute mark this season.

A number of stallion advertisements were received just as we were going to press. They will be referred to in our next issue.

Gallinule, by Isonomy-Moorben, sire of Pretty Polly, Wildflower, Lesterlin, and several other famous English turf race-winners, is dead.

W. A. Clark Jr. spends two days a week helping his trainer work his horses at Exposition Park, Los Angeles, and enjoys this sport very much.

Directome, a green six-year-old trotter, by Moorment, was recently purchased by Wm. Higginbottom, and will be put in training this season.

Wm. Higginbottom, the well-known livestock auctioneer, has just purchased the bay gelding Chiquita 2:10, by Diablo 2:09¼, from Lon Daniels of Chico.

T. L. Freeland, a Kansas horseman, has a fast prospect in the two-year-old by Zombro 2:11, dam Mineola Cbimes, dam of Prelatic 2:08¼, by Chimes.

Smiley Corbitt is the name of a very handsome Bon Voyage four-year-old gelding which his owner, S. Christenson, of this city, drives through Golden Gate Park whenever the weather permits.

Colorado E. (3) 2:04¾ by The Bondsman will be pointed for the world's stallion trotting record and there are a few good judges that believe he will wrest the honors from The Harvester 2:01.

Everybody in San Jose who has a Bon McKinney colt, thinks he has the best colt in the world. This young stallion is very popular in San Jose and should have his book filled in a little while.

Ted Hayes is breaking a seven-months-old colt in Los Angeles by Bon Voyage, out of Cecile M. by Robin, that the railbirds all say has more natural speed than any colt they ever saw.

Will G. Durfee contemplates taking a string of horses East this year. It has been two years since he appeared on the Grand Circuit and, as he has some fine "prospects," no doubt he will do well with them.

Madison Square Garden may not be torn down as originally intended. The Fasig-Tipton interests and others are preparing an offer that may give the historic building a new lease of life.

Under Wm. J. Wilson's care the stallion The Bondsman served sixty-nine mares in 1911 and only seven have been reported as "missed." This is a splendid showing and reflects credit upon this young man as a stud master.

The annual meeting of stockholders of the American Trotting Register Association will be held on February 7th at the Register office in Chicago. Ten directors, to serve three years, will be elected at this meeting.

It is the duty of every stallion owner, standing a good light barnes horse for public service, to make it a point to see that each of his patrons, nominates the foal in the local futurities. It is not only to his own advantage but to the mare owner and the business in general.

Dan Hoffman bought the handsome trotting four-year-old Buster, by Tom Smith 2:13¼, dam by Valentine Boodle, and has every reason to be proud of him. Dan will have him ready when the racing season at the Stadium commences and will undoubtedly make some of his rivals hustle to pass him.

A meeting was held at San Jose last week at which officers were elected for a permanent organization of a Fair Association. The meeting was large and enthusiastic over the proposition of holding a county fair the coming season. Efforts will be made to have the annual pure food show, as well as the poultry and kennel associations, hold their exhibitions at the same time as the county fair. The following officers were elected: President, Henry W. Hoff; vice-president, E. W. Allen, and secretary, E. G. Jones.

F. Gomett, of San ose, intends to sell all his trotting steck this spring with the exception of his handsome stallion Prince McKinney. Mr. Gomett has not been enjoying good health for the past year and finds that keeping a string of horses involves too much care and anxiety.

John A. McKerron has been filling a large order for horse hots for the MacKenzie borses, and Messrs. James and Spencer are delighted with the way every boot is made and fits. "There is no one in the East can come near Mr. McKerron in his line," is their opinion.

The Tulare Board of Trade, together with the old agricultural association, has closed a deal for an aviation meet in Tulare, next month. The promoters hope to awaken sufficient interest in the fair grounds to rehabilitate the agricultural association and make it possible to hold again the county fairs for which Tulare was known for many years.

Tbat 1915 meeting will be a "bummer!" All the preliminaries are being arranged for the consideration of the Park Commissioners and the Panama-Pacific Exposition Commissioners. As a "drawing feature" it will be one of the greatest to be seen in 1915.

Gus Lindauer, of 122 Clara street, has just received three carloads of fine, large work horses for sale. He has recently added an addition to his building and has divided it into 125 stalls. This makes his place the largest and best ventilated in this city.

It is announced that the managers of the New York State Fair Association have paid to the New York State Comptroller \$53,739, which represents the profits of the Syracuse State Fair. The gross expenses of the fair were \$88,325 and the gross receipts \$142,064.

The stallion Tidal Wave 2:06¾, by Nutwood Wilkes 2:16½, out of My Miracle (sister to Coney 2:02, etc.), by McKinney 2:11¼. Mr. Bailey intends shipping to Oregon to make the season of 1912, as his progeny is so well thought of there and many horse breeders have requested that he be sent there.

McAdrian 2:24, the grand-looking, heavily-muscled son of Guy McKinney, has never been bred to a standard and registered trotting mare. He will have some sent to him this year, for any horseman who sees him will prefer him to many that have had far better opportunities and have yet to get a horse of the caliber of Bert Kelly.

Attention is called to the advertisements in our business columns of some grandly-bred trotters and pacers, stallions, broodmares, colts and fillies. Seekers after the very best cannot do better than correspond with these advertisers. Every animal offered is as represented and the owners will be pleased to answer any questions regarding them.

C. L. Gifford, owner of the great stallion Aerolite 2:07½, says there were 36 mares bred to him last year at Moscow, Idaho. One is owned by Cbas. W. Shields and her foal by this stallion is a beauty. This mare is called Louladi. She was sired by Antelope 16323 (son of Nutwood 2:18¾), dam Lou by Del Norte 2:08, son of Altamont 2:26.

Eighty polo ponies, valued at approximately \$25,000, were shipped from Coronado in special cars to Pasadena last Wednesday. Two carloads of special equipment to be used by the titled English players and the Coronado team at the coming tournament were included in the shipment. This is the most valuable shipment of polo ponies ever carried by the Santa Fe in California.

Symbernal (1), by Symbolcer (p) 2:09½, dam Fancy P. 2:22¼, own sister to Charm P. 2:10, has arrived in the hands of E. S. Knowlton, of Vancouver, B. C., who purchased him from the Chicaskia Stock Farm, Blackwell, Okla., last August at a fairly long price. He arrived in Vancouver January 6th and is a much admired youngster.

Katalina 2:11¼, by Tom Smith 2:13¼, has the handsomest colt ever seen in Butte county; it came January 24th at Chico, and is the first one of The Bondsman's progeny in California. "If all The Bondsman's are like this one he ought to have his book filled in thirty days," was the remark of a well-known horseman. She belongs to Wendell Miller, of Chico.

Chas. L. De Ryder is negotiating for a piece of pasture land (over ninety acres) about a mile from Pleasanton, where he can care for the mares sent him to be bred to The Bondsman and The Patchen Boy 2:10¾ this season. He is noted for the excellent care he takes of all mares, as everyone who bred to Star Pointer 1:59¼, when he had him, can affirm.

Mr. Stallion Owner, place yourself in the position of the owner of a well bred mare; one that should produce a good speed prospect. Would you want to breed to some unknown stallion that had never been advertised and was not known outside of the county in which he was owned? No, you would go to the horse that was well known by advertising, so that the colt would be more valuable. Some mare owners are thinking the same way about your stallion standing for public service.

John Sawyer is in charge of Hal B. 2:04½ and all the other horses that G. A. Westgate bought from Paul Wessinger. The borses are quartered at the Portland track, and are being put in sale condition. Hal B. never looked better in his life. He and all the others, except the mares and young colts, are being jugged every day. All of them will be sold under the hammer at the spring sale.

The following mares have already been booked to The Bondsman: Simmone by Simmons 2:28; Perza (dam of Enchantress 2:29¾), by Allie Wilkes 2:15; Seville S., by Stratway 2:19; Rosemary, by Raymon, and Reina Directum, trial 2:10½, by Rey Direct 2:10. Since Mr. De Ryder has had this horse he has had inquiries from several owners. Out of sixty-nine mares bred to The Bondsman in 1911 only seven missed. This is a splendid percentage.

Information has just been received of the death of George Campbell Brown by suicide, which occurred at Nashville, Tenn., on Tuesday. Mr. Brown was one of the best-known breeders and horsemen in America, and was widely respected for his ability and character. He was the proprietor of Ewell Farm, home of John R. Gentry 2:00½, a noted breeding establishment, and a former member of the Board of Review of the National Trotting Association. Ill health is assigned as the cause of the rash act.

Charley Marley, of Woodland, has sold his fine-bred stallion, Sir Poleon, registered No. 52,065, to H. B. Smith, of Ukiah, Mendocino county. Marley started Sir Poleon in five matinee races and won four, giving him a matinee record of 2:23 as a two-year-old. Sir Poleon was sired by Nushagak, sire of Aristo 2:08¼, Nada 2:09¼, dam Anselios, dam of Nusta 2:23½, by Prince Ansel, record 2:20. Smith intends to head his stock farm with Sir Poleon this year and then race him.

John E. Madden, the noted Kentucky breeder and master of Hamburg Place, warmed the feet and gladdened the hearts of a number of the poor of Lexington, Ky., a few days ago. In driving past the headquarters of the Associated Charities, he observed a throng of the poor waiting for food and raiment. He was impressed with the wretchedness of their foot covering and forthwith went to a store and bought 200 pairs of shoes and stockings, which were distributed among the needy.

Wm. G. Durfee is going to sell twenty-four head of trotting stock at Los Angeles soon. There are among these some of the finest bred stallions, broodmares, colts and fillies ever gathered in Southern California. They are all sound and good looking, and will be valuable acquisitions for anyone. Mr. Durfee is not only an excellent practical horseman, but is also one of the best students of the horse-breeding problem in the United States.

Mr. R. J. MacKenzie has added another good trotter to his string of fast ones at Pleasanton by purchasing the handsome black stallion El Zombro, by Zombro 2:11, out of The Bouquet, by Nushagak 2:5939 (son of Sable Wilkes 2:18 and Fidelia, dam of two, by Director 2:17), dam Woodflower (dam of Seylex 2:15¾ and Prince Ansel (2) 2:20½), by Ansel 2:20, son of Electioneer 125; second dam the great broodmare Mayflower 2:30½ (dam of 2 and 6 speed-producing daughters), by St. Clair 16675. Alex. Brown, of Woodland bred this one and sold him to Mr. MacKenzie last week.

Those Toomey carts for \$60 and racing sulkies for \$80 (Toomey and Frazier makes) at Studebaker's, are the best value for the money ever offered in California. An immense assortment to select from, and no better ones were ever made. They are selling for just 40 per cent lower than they were a year ago. The season is approaching when these must be in demand and horsemen should take no chances of being killed in old sulkies when they can purchase these for that low figure while they last. Studebaker's is at the corner of Fremont and Mission streets, San Francisco.

Geo. D. Hagg, of Burns, Ore., is much pleased with the manner in which the colts by his stallion Progress by Diablo 2:09¼, are coming on. They are showing lots of natural speed. Sidney Wilkes 2:24½, by Marvin Wilkes, now in Australia, owned by Claude McGhee, is wintering well and will be out for the money next year. Trainer Johnson is located at the track with five head. Of these he is particularly pleased with the bay gelding called Bill Hanly, which showed him miles in 2:12 last year.

Alexander B. Coxe, of Paoli, Pa., has named eighteen mares in foal to Colorado E., Del Coronado, Montalvo, Prince McKinney, and Toddles, in the Horseman and Spirit of Times' \$20,000 futurity for foals of 1912. There are some California mares among them. The list includes A Leading Lady 2:07, Bertha C. 2:10¼, Bisa 2:10¼, Czarevna 2:07¼, Errange 2:21, Jane Jones 2:14¼, Lady Brussels, Little Sweetheart 2:12¼, Muda Guy 2:09, Ruth Mary, Sally Lunn 2:15½, The American Bell 2:12¼, and Twenty-Third, by Director, all bred to Colorado E. Those in foal to Del Coronado 2:09½ are Ettie L. 2:12¼ and Rena del Diablo, by Diablo; to Montalvo 2:25¼, Tuna 2:08½, by Jas. Madison; to Prince McKinney, Nelda Worty 2:22, by Axworthy 2:15½, and to Toddles (3) 2:18¼, Hazel Kinney 2:09¼, by McKinney, and Miss Griffith 2:14¼, by Bonnie Direct.

The grand stand and paddock of the Santa Anita race track, near Arcadia, was totally destroyed by fire which started at 9:30 o'clock Wednesday night, presumably caused by tramps. The cost of the two structures when built five years ago was \$75,000. There is said to be \$25,000 insurance. The plant is owned by the racing association of which "Lucky" Baldwin, before his death, was the moving spirit, and it was largely through his efforts that it was built. Other stockholders are George Rose, of San Francisco, John Brink, of Los Angeles, and H. A. Unruh, manager of the Baldwin estate, who recently purchased the interests of C. M. Holland, of New York, and Barney Schreiber, of St. Louis.

There is a stallion in Los Angeles which Will Durfee has that for breeding and individuality would be hard to equal in any country. He is called Wilkes Boy Jr. 38958, and was sired by Wilkes Boy 2:24½, out of Carna Belle (by Liberty Bell (he by Bell Boy 2:19½, out of Prefix by Pancoast, etc.), dam Carna (dam of Aurita 2:25½, Carnation 2:26½ and Axewood, sire of 3 in the list), by Nutwood 2:18¾; third dam Candace (dam of Albert Lee 2:26, a sire), by Harold; fourth dam Fairy Belle (dam of Nymphia 2:26¼, Fairy Gift 2:30 and 3 sires), by Belmont 64; fifth dam Waterwitch, one of Pilot Jr.'s greatest speed producing daughters, dam of 6 and the dams of 20 in 2:30 list. He can show 2:10 speed. Mr. Durfee says he is for sale, as he has so many others he must sell some, even at a sacrifice.

Bert Kelly, the big, fine-looking trotting gelding in R. J. MacKenzie's string, is bred to "go the route." He has a public trial of 2:11½, but has shown much greater speed. His sire was the well-bred horse McAdrian 2:24, son of Guy McKinney (he by McKinney 2:11¼, out of Flossie D., by Guy Wilkes 2:15¼; grandam Blanche Ward, dam of China Maid 2:05¼, by Onward 2:25½) and Maple Leaf, by Adrian 2:26½; second dam Ollie Ray 2:39¾, dam Acclamation 2:24¾, by Reliance 2:22½; third dam Mary Blaine, by Signal 3327. Bert Kelly's dam was by Mountain Boy 4841, son of Kentucky Prince and Elise (sister to Elaine 2:20, etc.), by Messenger Ducroc; grandam Green Mountain Maid (dam of Electioneer 125, etc.), by Harry Clay 45. Bert Kelly's grandam was the great four-mile race horse Joe Daniels. He was the first colt McAdrian sired. The latter was twenty-two months old at the time he was bred to the Mountain Boy mare.

A French writer on turf topics in a recent review of the racing situation states: "Notwithstanding all the efforts that have been made to encourage horse-breeding in France, it is surprising to learn that there is still the prospect of a shortage of horses for military purposes. Thirteen years ago an annual credit of \$5,240,000 was considered sufficient for remounts; but this has since been considerably increased, and the government is to be asked next year to provide \$9,000,000 for the purpose of improving the quality and quantity of cavalry mounts. Horses are still being brought from Ireland and other countries, as many of the French farmers do not find it sufficiently profitable to keep mares and maintain their produce for four years, notwithstanding the advantages offered to them by the government in the matter of stallions. It is the aim of the minister of agriculture to have all horses for the French Army bred in France, and so make the army independent of outside assistance in case of war.

Kentucky horsemen have evolved a plan whereby the fair associations of that State may benefit from the license fee charged for using a stallion in the stud within the State limits. In that State the owner of any stallion standing for service is required to pay in addition to taxes on the animal the amount of one service fee as an annual license. A committee of horsemen, of which Mat. S. Cohen, of Lexington, is chairman, has drafted a bill that is intended to put this money back into the hands of horsemen and farmers, and it will be presented soon to the Legislature for enactment. The bill stipulates that all such money collected by the county clerks shall be paid over annually to the county fair associations, to be distributed as premiums for horses of the various breeds. In the event of there being no county fair, the money collected in such counties shall be paid to the State fair association. The license fees in Fayette county alone, it is said, will run into the thousands of dollars annually.

Old Messenger was an English blood-horse, a son of Mambrino, a direct descendant of Flying Childers—the swiftest horse ever known—and his mother was a transplanted child of the desert through the Darley Arabian. He was a gray, 15.3 hands high, and won many running races when a colt. But his color was not popular among thoroughbreds. His natural gait was not a lope, but a trot. Led behind a gig, he could trot faster than any harness horse in England could run. He was imported to America and became the founder of the Hambletonian strain of horses. There had been the Narragansett pacers and some fair trotting horses before him, but all the steppers, while having the natural trotting stride, lacked the endurance, the level head and the irrepresible courage necessary for a race to the extreme limit of endurance, until the needed attributes were supplied by the indomitable Messenger blood. He left a progeny that carried on the race he founded, for nine generations until his name and race became the most famous among horses.

A meeting of the committee appointed from the board of directors of the Pacific Coast Trotting Horse Breeders' Association and the Park Amateur Driving Club was held at the office of the P. C. T. H. B. A., Monday evening to discuss plans for the big race meeting to be held on the Stadium track in 1915 during the Panama-Pacific Exposition. The project has been enthusiastically received wherever it has been broached, and it is expected that the big purses which will be offered will bring to California that year horses not only from all over the United States, but foreign countries as well, and that the meeting will be the biggest light harness horse race meeting ever held.

The sensational horse of 1883 was Director, who went through the campaign unbeaten, earning a record of 2:17, and winding up his season's frolic by winning the Charter Oak \$10,000 stake the year that famous stake was opened. Early in the spring when the horses were in training in California, Director looked very cheap in comparison with the stallion Romero. At that time the world's record for trotting stallions was 2:15¼, made by Smuggler over the Glenville track. Romero had shown a mile in 2:16, last half in 1:03, to high wheels that spring, and Monroe Salisbury thought him the greatest stallion that ever lived. When it came to make the stake entries Johnny Goldsmith insisted upon coupling Director's name with that of Romero. Goldsmith had confidence in Director and it was well that he did, as Romero went wrong and the victories without interruption of Director out only established a family of horses, Direct and Directum, but it made Monroe Salisbury a great owner and Johnny Goldsmith a great driver. Since that time there have been many cases very similar to that of Romero. The one that is freshest in the minds of horsemen is that of Joe Patchen II, the fleet pacer owned by R. J. McKenzie, and which worked a mile in 2:02¾ over the Indianapolis track early last summer. Joe Patchen II met with an accident shortly afterward and did not get to the races. The year that C. K. G. Billings bought Blacklock 2:04¼, the black horse had created a furore by working a mile at Libertyville, of 2:04¾, late in June. Blacklock got to the races, but was a failure.—Cleveland Leader.

BON VOYAGE 2:08 AND HIS SON.

When Palo Alto, the home of sires of early and extreme speed, closed its gates, many predicted there would never be any more stallions that would create such a furore in the light harness world as those which made this great farm and its greater owner famous. That was a mistake. There came to this Coast a stallion selected and raced by Charles Marvin, "the speedmaker of Palo Alto," which if he had the opportunities many of those Palo Alto stallions had, would have surpassed them. Mr. Marvin claimed he was the best going, most level headed, best limbed, and most promising two-year-old he ever drove, and that in itself was a great recommendation. To prove his assertions true, he gave him a mark of 2:15 at that age, and the following year lowered it to 2:12¾, gaining the champion records in 1904 and 1905, and making him the largest money winner of those years. He sold him to W. A. Clark Jr., a keen judge of trotters, for \$10,000, and the stallion was sent to California, where he has transmitted his qualities to his progeny with a uniformity that is unparalleled. His advertisement appears in this issue, and, "as facts and figures talk," nothing more may be said. There might have been added to this advertisement, however, that Bon Voyage colts are deemed invaluable by their owners and are not for sale.

Mr. Ted Hayes, who has him in charge at Los Angeles, is also the trainer who so successfully prepared and trained him for his campaign in 1911 and drove him the fastest heat by a trotting stallion ever made in a race in California, and believes that in 1912 he can even lower that record. He has also a son of his, worthy of that honor, which he will also make a season with, and that one is Bon Volonte (3) 2:19¼, out of Missie Medium, a great broodmare; second dam Belle Medium 2:20 (dam of Stam B. 2:11¼, etc.), by Happy Medium (dam of Nancy Hanks 2:04, etc.).

DE RYDER LEASES CAPT. MCCAN'S HORSES.

Last week, Captain C. P. McCan transferred the horses he has at Pleasanton from the care of Wm. J. Wilson to Chas. L. De Ryder, the latter taking them on a lease. In this transaction the great stallions, The Bondsman and The Director General, are included, besides the Belgian prize-winning stallion, Ouragon, the champion saddle stallion, and all the mares in training. Mr. De Ryder has had a long experience in the handling and care of stallions and broodmares and will use every effort to get mares consigned to the horses in his charge in foal. He is a liberal feeder and will see that they will want for nothing, not only giving them plenty of hay, but also a run on a ninety-acre pasture field he has leased. This is the field in which Lou Dillon 1:58½ was kept and it is also the one in which all mares that were bred to Star Pointer 1:59¾, the other champion were pastured for three years. It lies about a mile and a quarter from Pleasanton on the Santa Rita road and is a well-sheltered place, with plenty of rich food throughout the summer. Mr. De Ryder intends to exploit the merits of these two stallions extensively and strive to get the best lot of mares possible for them, believing they are just the sires necessary to cross on those bred in California.

THE FRED H. CHASE SALE.

Mr. Geo. E. Stickle, of Lockeford, Cal., has been a buyer and breeder of high class trotting stock for years. He intended to have a string of horses trained and raced but his mining interests have assumed such large proportions he has been compelled to abandon his ideas about the light harness horse industry and on Monday evening, February 12th, he will sell without reserve all of his trotters, including one of the handsomest four-year-old Bon Voyage stallions on this coast. He is out of the dam of Helen Stiles 2:08¼. With this horse he will sell over forty choice broodmares by Stam B. 2:11¼, Daedalion 2:08½, Luailo 2:09¼, Mount Vernon 2:15¼, Silver Bow 2:16, Stickle and other standard sires, as well as three, four, and five-year-old geldings and fillies. They will be in perfect condition and seekers after the very choicest bred trotters and pacers will find just what they want at this sale. Among them is Angeline by Stickle (son of Silver Bow 2:16 and Grace, dam of Daedalion 2:08½, Creole 2:15, etc., by Buccaneer. Stickle is the sire of Blanche T. 2:19) out of a mare by Orator. Picture a black filly by Eblis (brother to Daedalion 2:08½) out of mare by Silver Bow 2:16. A bay mare called Mary S. by the same sire out of mare by Silver Bow 2:16; second dam Alaska. Lulu, a bay mare by Stickle, out of a mare by Diablo 2:09¼; second dam Queenie, a producing mare by Dexter Bradford. Tessie W. by Silver Bow 2:16, out of Vesper, by Prompter; Savannah by Silver Bow 2:16, out of Grandma by Orphan, that famous mare which the late Geo. H. Fox used to tell about. Edith, by Stickle, out of Savannah. Kate, by Jim Mulvenna, out of a mare by Ross S. 2:19½. Mamie S. by Eblis, out of Tessie W., by Silver Bow 2:16. Queen, by Diablo 2:09¼, out of Queen (dam of Silver Light 2:18½), by Dexter Bradford. Fanny, by Stickle, out of a mare by Corhitt's Fair Boy; second dam by Apex 2:26. Susie H., by Eblis, out of a mare by Silver Bow 2:16; second dam Alaska. San Toy by Stam B. 2:11¼, out of Tessie W., by Silver Bow 2:16. Grace S. by Daedalion 2:08½, out of Savannah, by Silver Bow 2:16. Gracie S. by Eblis, out of a mare by Silver Bow 2:16, and several other splendid mares. Besides these there are some very fine looking geldings fit for road or business purposes. Some excellent work and driving stock will also be sold.

OFF TO LOS ANGELES.

John McLeod, of Vancouver, B. C., will ship the following horses to Los Angeles: Belmar, a handsome, young pacing stallion, by Moko, he is a full brother to Mabel 2:10¼; Red McKinney, a three-year-old colt by Red Seal 2:10, dam by McKinney, second dam Wild May, by Electioneer; Rose Lecco, tria 2:16, by Lecco 2:09¾, dam by McKinney; Albert D., a three-year-old pacing filly by C. The Limit 2:04¼, dam Bonner Belle 2:17, by Bonner N. B.; and Belle Wilkin 2:25½, by Zombro 2:11, dam Red Girl, dam of Panama Maid 2:14.

In the same car goes the following horses owned by J. T. Wilkinson, Vancouver, B. C.: A three-year-old pacing stallion by Kinney Lou 2:07¾, this is a very promising colt; Hazel Wilkin, a brown pacing mare by Zombro 2:11, dam Hazel Kirke, by Altamont; Carlea, a six-year-old pacing stallion by Carlokin 2:07½. There are also four grand-looking two-year-olds by Mr. Wilkinson's stallion Oro Wilkes Jr. 2:12¼. All these horses will be trained at Los Angeles by Geo. McPherson, the man who developed Angus Pointer 2:01¼, and other good campaigners. Mr. McPherson is now at Los Angeles, preparing quarters for his horses.

LIVERMORE HORSE SHOW.

All arrangements for the horse show, to be held at Livermore, Saturday, February 17, have been completed, and the various officers and committees have been named. The posters for the show are being sent out and distributed throughout the country. Every effort will be made to advertise the affair thoroughly.

The following is the list of officers and committees:

H. M. Christenson, president; Max Berlin, vice-president; William McDonald, secretary; John Sweeney, treasurer; David McDonald, grand marshal.

Committee on subscriptions—Max Berlin, D. McDonald, Jesse Young, H. M. Christenson and John Meyn.

Committee on music—Max Berlin, D. McDonald and D. McNally.

Committee on printing—William McDonald.

Reception committee—A. L. Henry, M. G. Callaghan, D. McNally, L. Schenone, Fred Werner and Peter Christenson.

NORTH PACIFIC CIRCUIT DATES.

At a meeting of the secretaries of the North Pacific Fair Association's circuit held last Thursday, dates for 1912 fairs were claimed as follows:

Vancouver, B. C., August 1-17; Seattle, August 19-24, Portland, August 26-31; Salem, September 2-7; Vancouver, Wash., September 9-14; Walla Walla, September 16-21; North Yakima, September 23-28; Spokane, September 30-October 5; Boise, October 7-12. A two-nation association was arranged, Manitoba, Saskatchewan, Alberta, Montana, Utah and Idaho being included.

The purses will aggregate \$200,000 and the program provides for racing events for fifteen weeks. The board of stewards is to be composed of three members of the Canadian circuit, one from Manitoba and one from Idaho.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

BLACK TONGUE IN DOGS.

A disease which is rather prevalent and often fatal in some sections, particularly the southern states, is given some attention in the American Journal of Veterinary Medicine by Edgar Heiny, of Hattiesburg, Miss.:

Since coming to Mississippi I have met with a disease among dogs, known here as "sore mouth," or "black tongue," which has proven to be very fatal to dogs. Why it is called black tongue I have been unable to learn, as there is nothing in the symptoms of the disease that would induce one to call it that. The disease is very prevalent among dogs of Mississippi, Louisiana, Alabama and Georgia, and is very fatal if not treated in its incipency.

Symptoms—The disease takes on the form of a stomatitis and seems to come on more often just after the dog has had a hard run and become heated. It begins with a loss of appetite, weakness and slobbering. The buccal membrane and gums become inflamed. Throat also becomes inflamed and is sore. There is no papular or vesicular formation, the mucous membrane of gums and cheeks slough off without any ulcerative formation. The tongue does not become affected, or at least I have never seen it affected. The animal is usually more or less constipated. The eyes also become inflamed and discharge a great deal of muco-purulent material.

Treatment—The treatment that has proven most successful with me is to first administer a purgative, and cleanse the mouth thoroughly with a solution of copper sulphate and silver nitrate, also paint the nose and lips with a solution of silver nitrate. Apply this treatment about every four hours. Place animal in a dark, quiet place and withhold all food and water for at least five or six days. This treatment has proven fairly successful with me where I receive the patient within twenty-four hours after the first symptoms have shown up.

The disease seems to be infectious and yet I have seen dogs drink and eat with dogs affected with sore-mouth and not contract the disease. I can find nothing in textbooks concerning this disease and any information anyone can give me will be highly appreciated.

The editor of the above named magazine states: Black-tongue or sore-mouth in dogs is quite prevalent in most of the southern states, from Virginia to Texas. Dr. John R. Mohler, chief of Division of Animal Industry, replying to an inquiry concerning this disease, says:

"In the south the term 'black-tongue' is generally applied to cases of dumb rabies, but in certain localities the term is also used to designate a malignant form of necrotic stomatitis which is usually accompanied by extensive bacterial intoxication. In several outbreaks of so-called 'black tongue' of the dog exhibiting severe necrotic stomatitis, we have succeeded in incriminating the bacillus necrophorus as the causative agent. The description of the malady as noted in your letter resembles considerably that of 'canine typhus' or 'Stuttgart disease,' but since no definite causative agent or specific lesions have yet been observed, any infectious disease of the dog which is more or less fatal and presents all or most of the various manifestations present in the Stuttgart disease may be considered as simulating that disease. In fact, the intestinal form of canine distemper plus stomatitis gives a clinical picture that resembles markedly the manifestation of the Stuttgart disease."

John F. Draughon of Nashville, Tenn., makes the following report, by request, to White & Plaskett, D. D. V. S., of his city:

At the request of your Dr. Plaskett, I am sending you a written statement in regard to how I handle the disease commonly known by fox hunters in the south as "black tongue."

It is my understanding that many packs of hounds have been wiped out of existence in one season by this dreadful disease. Only a few days ago a friend of mine, from another county, was in Nashville, and told me he had lost his entire pack of dogs. I asked him what was the matter. He said somebody had poisoned them by giving them carbolic acid. I knew what that meant.

I have experimented a great deal with this disease the past three years. The first year I lost several dogs, before I learned how to treat it and how to prevent its developing further in the kennel.

The second year I lost one, and this year I have not lost any; but I have just handled one of the most stubborn cases that I have ever saved.

And right here I want to say that it doesn't matter what kind of medicine is given, or how it is given, I don't believe it will save the dog in this condition unless equally as much attention is paid to feeding, watering, etc.

As soon as I discover that one of my dogs has a case of black tongue, which is shown by saliva dripping from the dog's mouth and by irritated gums, I remove the sick dog from the kennel, and begin to feed the well dogs at least a tablespoonful of sulphur each day for several days. After a few days, I repeat the treatment. The sulphur seems to check the disease to keep it from developing in the well dogs. It has now been more than four weeks since this

case developed, and my dogs have never been in a healthier condition than at present.

I gave the sick dog about three grains of calomel, one hour apart. Six hours later I gave him two to three tablespoonfuls of castor oil. I then gave him, in a little water, 40 drops of mangifera and 60 drops of echinacea, alternately, three times a day.

As you know, these remedies are from Lloyd Brothers, Cincinnati, and are sold by but few druggists—druggists who handle medicine for the eclectic profession.

I dissolved about ten cents' worth of boric acid in a pint of water and mopped the dog's mouth out twice a day, forcing him to swallow some of this boric acid, because I believe that in cases of this kind the intestines are affected exactly like the mouth.

In treating the last dog I gave but little mangifera and echinacea but used a great deal of sulphur, perhaps from one to two tablespoonfuls each day; while I gave the mangifera and echinacea only about once a day.

I believe that sulphur is the principal medicine. I don't doubt but that a large per cent of cases can be cured by omitting the sulphur and using the echinacea and mangifera regularly; but I believe I can cure a great many more cases by using less echinacea and mangifera and more sulphur.

Doctors who are not of the eclectic profession and know what effect echinacea and mangifera have, and for what they are given, and know the condition of the dog, can doubtless substitute other medicines that would get the same results. These remedies were suggested by a doctor of the eclectic profession whose son was at that time hauling my dogs.

If I have any more cases, and it does not develop on my best dogs, as an experiment I am going to leave off the mangifera and echinacea, using more sulphur from the start.

When I first began to use the sulphur, a year ago, I could not believe that a dog could stand a tablespoonful each day, yet a friend of mine told me he gave his dogs two tablespoonfuls each. In this last case, when I increased the sulphur, I noticed that the dog's condition seemed to improve.

It's very difficult to get a sick dog to take sulphur. When a dog is taken sick, before he loses his appetite and becomes unable to swallow his food, I believe if you will mix the sulphur—a tablespoonful twice a day—with food that he will relish, he will never get to a stage where he will be unable to eat.

I waited so long before beginning the sulphur treatment on this last dog that he had no appetite, wouldn't eat, and could not drink water on account of the condition of his mouth. I knew that it would require food and water to keep him alive; so twice a day I thoroughly mixed a tablespoonful of sulphur with an egg, and sometimes I put in a tablespoonful of whisky. This mixture I put into a big-mouthed bottle and drenched the dog; sometimes I used two eggs, but I think two eggs too much at one time.

About twice a day I would drench the dog with one-half teaspoonful of water, as he could not take water of his own accord; but a better plan would be to reduce the quantity and give oftener.

In every case I find that about five or six days after the dog takes this disease he begins to pass blood, being affected just like a person with flux. And considering this condition, I feel sure that the intestines are affected just like the mouth.

The most difficult part of the disease to handle is regulating the bowels. I gave this last mentioned dog on an average of from five to ten cents' worth of bismuth a day. I also gave him, in broken doses, paregoric, laudanum and salts, mixed, and gave him one or two doses of Jamaica ginger. At one time I gave him one-fourth teaspoonful of black pepper.

Just what checked his bowels I don't know. I never did get his bowels checked until I cut his food down to one egg a day and gave that at different times, and gave but little sulphur that day. Beginning on the following day after I got his bowels checked, I gave him a teaspoonful of ground beef, raw, about three times a day, and one egg. I would mix with the beef about a grain of table salt. I increased his food very slowly, knowing that a relapse would doubtless mean death.

I wasn't so anxious about this particular dog, but the reason I gave his case such close attention was that I might from this experience learn how to treat the other man's dogs and dogs I hope to own if they became similarly affected.

Every case that I have lost since I learned anything about treating the disease has been lost on account of my inability to control the bowels. I don't believe anything we give the dogs will stop that bloody flow until the sulphur, or some other remedy, has time to purify the blood; and it is necessary for this bowel trouble to run its course to a certain extent. Yet if not eventually controlled, the death of the dog will be the result.

If we have no desire to immediately check the bowels, I think that bismuth, or some other preparation to reline the bowels, should be given during the day.

I suppose you think I have covered much ground trying to tell you how I treated this dog, and that I have a very poor way of expressing myself.

CALIFORNIA SALMON FISHING INDUSTRY.

In view of the fact that many round dollars, paid by the sportsmen of this State for annual hunting licenses, are expended in maintaining and developing the "salmon industry" in this State, the following excerpts from a recent government report may be of appreciative interest:

"John N. Cobb, assistant government agent in charge of salmon fisheries in Alaska, has prepared a report to the United States Fisheries Bureau on the Pacific Coast salmon fisheries. Mr. Cobb describes the different varieties of salmon and tells of their habits and the periods of their runs for spawning up the Sacramento, McCloud, Fall, Klamath, Eel, Mad, and Smith rivers, in California, the Rogue river in southern Oregon, and other streams further up the coast until the Arctic ocean is reached.

Mr. Cobb says that much of the catch in the Klamath and other small California rivers is pickled. Salmon formerly frequented the Feather and American rivers, but the development of irrigation and mining either killed them off or drove them away. The facts are similar concerning the San Joaquin river, in which the fish formerly were abundant.

The initial event in the history of salmon fisheries on the Pacific Coast occurred on the Sacramento, when R. D. Hume, his brothers, and Andrew S. Hapgood, formerly of Maine, after having tried salmon fishing near Sacramento, established the first cannery at Washington, Yolo county. That was in 1864. Some years later the Humes went north and did business on the Columbia river. These men had previously been canning lobsters in Maine. The railroads afforded the Sacramento canning industry transportation facilities, the equal of which are not yet enjoyed by some localities frequented by these fish, and the Sacramento industry, which began on an old scow and was continued in a log cabin on the river bank outside the levee opposite the foot of K street, Sacramento, and in other establishments, was not stopped until 1905, when the canners found they could no longer compete with the fish picklers and fresh fish men.

Mr. Cobb's report describes the apparatus used in salmon fishing and methods of canning. Statistics of the industry by counties and by waterways are given in the report. The run of the fish last year in the Sacramento was pronounced very fair. Over 2600 men are employed in the industry in California. More than half of these were engaged on the Sacramento and its tributaries, more than nine-tenths of the total California investment of \$1,232,000 in the industry is represented in that river system, and about four-fifths of the total State catch was made there.

Besides the first cannery, Mr. Cobb says that the first fish cultural station on the Pacific Coast was located on the McCloud river at Baird. The history of this station and of the stations on the Hoopa Indian reservation, Humboldt county; at Korbel, on Mad river; Battle creek, Tehama county; Sisson, Siskiyou county, and at other points is given in the report. It is estimated that these fish cultural stations, maintained by the United States Fisheries Bureau and the State of California, have distributed about a billion salmon eggs and over 700,000,000 fry. These fish and eggs have been planted in many of the rivers of northern California and many have even been shipped across the continent and to foreign countries, to introduce the salmon to strange waters."

A recent exchange states in connection with the run of salmon, now about over, that "the market fishermen working along the Sacramento river near Chico are meeting with excellent success just now, and are making big hauls of salmon. There is a ready market for the fish, and good prices are being obtained.

The catch of one of these men, J. Wagner, last week amounted to 2800 pounds, and already this week he has taken 1600 pounds. He has four men helping him. Most of his catch is shipped north to Portland. It is said that better prices are to be obtained there than in this vicinity."

Comment is hardly necessary, the situation is evident at a glance. Just why, however, the retail price of salmon in our local markets is put on for all the tariff will bear is another question and worthy of investigation.

Locked Horns.—One of the most unusual freaks in the history of Butte county was exhibited recently when W. H. Roberts of the Gladstone Mine, Shasta county, showed to his friends a pair of deer horns locked together in such a fashion that even human ingenuity could not separate them. The horns have been sent to Sacramento and will be presented by Roberts to a fraternal society there. The impression is that the deer began to fight in the Harrison Gulch District. In the deadly conflict their horns sprung and became locked and in the fight for freedom they died from exhaustion. It is thought by those who are familiar with the habits of deer and like animals that they tried to separate and that is what caused the erosive spaces on the horns. It was apparent that they lived about ten days without food or water. The horns were cut from the prostrate carcasses as they lay in the forest.

Charles Tichacheek, an apple grower near Morrison, Wash., opened the fence into his last year's melon patch and trapped 400 jackrabbits inside the fence. The rabbits were sent to Spokane.

IN MEMORIAM.

I read in a daily paper this morning that John Kennedy Orr had died at 7 a. m. Sunday at his home in Berkeley from a stroke of apoplexy. I had known John Orr for many years and hunted with him many times. He had made an appointment with me, writing January 26th, that he would come to Point Reyes station, get my English setter dog Boy, and go quail hunting near Point Reyes. "Man proposes, but God disposes."

Two weeks ago Crit. Robinson died, my schoolmate and friend. The only two old sportsmen to attend "Crit's" funeral were John Orr and Clarence Haight. Such is the irony of Fate.

Both Orr and Robinson thirty years ago were the two best shots with a shotgun on the Pacific Coast. A match or a series of matches were arranged between the two men for the championship of the State. Crit. Robinson won the championship by one bird.

John Orr loved his old friends and held them close. He loved outdoor life and the hills in which the deer hide, and the upland slopes where the quail lay to the point of the setter. He loved the marshes and the ponds in which ducks splashed and fed; the bordering fringes and pasture land where the English snipe "bored" or sped in zig-zag flight only to fall prone to his unerring aim.

In very many respects he was a true sportsman. Many times he has told me of his friend Teddy Tenrct's advice to him. "Mr. Orr, you are a good shot, but you are too hasty. You shoot your game too quickly. Give the bird more time. Just say 'Jack Bunshy' before you shoot. Then you will not ruffle a feather." John learned the lesson well. His bag of birds always showed they had been killed by the hand of an artist. He would lose half an hour to get a wounded bird, rather than to let it be devoured by vermin, or die a slow death.

To show the regard in which my friend John held his old time friends, I heard that an old gendarme named Pollete, a hunting companion of Mr. Orr's on many an outing, after he died, penniless, was kindly taken and buried in the cemetery at Tomales, not in an unknown grave, but in one marked by a marble slab, placed there by the beneficence of him who has just gone on the long journey.

Let us hope that in a better land he has joined the loved ones who have gone before, and is waiting to receive those who shall come after him.

PAYNE SHAFTER.

Olema, January 29, 1911.

HUNTING NOTES.

For the past week duck hunting conditions have been excellent at nearly all of the hunting resorts. The Sunday contingent having a bit the better sport than the mid-week gunners.

Goose hunting at various shooting grounds—Willows, Colusa, Maine Prairie, Rio Vista, and other places is now in full swing—thousands upon thousands of the birds are to be seen.

Duck hunters at different valley points during the previous week have enjoyed excellent sport. Near Newman on Wednesday, eleven trigger pullers each bagged limits, nearly all large birds. The shooting in that vicinity was the best in years.

The recent rainy weather was most favorable for mallard shooting in the Sacramento, Yolo basin and San Joaquin tule overflows. Mallards like to take shelter on rainy, windy days in the lee of the heavy tule growths.

Ryer Island Gun Club members, including C. M. Jones, Jack Perkins, P. Porter and others all shot mallard Wednesday. The birds had been "working in" to the ponds in thousands on the club's non-shooting days.

Sunday on the Volante Gun Club preserve members and guests, numbering ten guns, all shot limits in the different ponds. Among those present were: James Maynard, W. W. Kaufman, J. D. McKee, George Uhl, Harry Blatchley, Frank Maroney, Ned Dimond and Ellis Parrish.

The gunners at the Pat Calboun preserve were: W. M. Gannon, Dr. Bacigalupi, Dr. Sam Gardner, John Barr, Dr. James Murphy and W. L. Gerstle. Ducks were numerous enough to contribute a limit for each shooter.

George P. McNear was the single Joyce Island Gun Club member to take advantage of the fine shooting conditions on the same day.

East bay shore shooting from the blinds has enabled many independent gunners to get good strings of canvasbacks and bluebills. Near the Key Route mole, throughout the week, immense flocks of "cans" and "blueys" have taken things easy despite the harrying fusillade given them by the bombardiers posted in innumerable blinds and paddling after them in skiffs.

The bay shooting near San Quentin point enabled during the week many hunters to burn powder successfully. Leo Weland and Charles Bouton report the shooting to be good.

Phil B. Bekeart, Emil Holling and L. K. Grundy of Chicago made the duck shooting party at Curley Lodge last Sunday.

George Klahrman's four days' shoot at Gustine was a limit quota every day a week ago.

Ray Jones and Clarence Lucky shot near Newark on the bay shore Wednesday. The trip was a double limit one.

Leslie Gun Club members, Ed. L. Hoag, Com-

mander Reynolds, W. Hogan, Dr. Otto Westerfeld, were in on the Wednesday duck gathering on the San Mateo marshes.

W. H. Hillegass and J. Henry Meyer spot on private grounds near Elkhorn station. Last week and for several weeks past the ducks have been plentiful, good shooting being the rule.

On the near-by Empire Gun Club grounds eight members Sunday and three gunners Wednesday were stationed in favorable blinds for a good shoot individually.

Guy T. Wayman, William Kent, John Lawson and William Denman, who shoot from blinds on the Stewart pond, near Denverton, have not been overlooked by the broadbills since the season opened.

Goose and duck shooting near Rio Vista has improved recently. Frolic Gun Club members, George W. Ellery and C. F. Breidenstein were at the club ark last Sunday.

ANGLING BRIEFS.

For the present local angling operations will be confined principally to the tidewaters of Paper Mill creek, near Point Reyes station. The prospects for tomorrow are considered alluring. The creek was high, and the clay-colored water pouring into the main stream from Nicassio creek did not add to favorable water conditions the previous Sunday. At that there will be quite a gathering of the regulars at the resort.

Lots of seven to nine inch steelhead are reported to be in the creek, but the big steelhead are not yet in much evidence. Two weeks ago Sunday, a bright, sunny day, George Uri's 1 pound trout was the best showing made.

Last Sunday a few small fish were taken. High hook for the day was the 8 pound salmon caught by the veteran angler, Jas. Watt.

Billy McGregor and Frank Dolliver were fishing in the pool opposite the slaughter house. Dolliver hooked a big fish—over ten pounds, at least. The steelhead made a short run and broke away with the leader and fifteen feet of line dangling from his jaw.

Among the rod wielders out were: Milton Frankenburg, Frank Marcus, Charles Isaac, Floyd Spence, Mose Uri, John Cattermole, Frank Messner, Joe Pinus, W. F. Cooper, E. H. Humphrey, E. Z. Howe and wife and others.

Russian river advices were not encouraging for much sport at present. The river is high and the water too roily for any chances to tempt the steelhead to strike the spoon or take a baited hook save by running on top of the angler's lure.

The past week's spell of pleasant weather may make a trip to the river worth the while.

Pescadero lagoon is credited with a big run of steelhead within the last week. San Gregorio lagoon, on the contrary, at last advices, had not shown any indications of the expected run of trout.

Last Sunday one of the Wingo anglers hooked and landed a 40 pound striped bass, the big fish was flanked by a 12½ pounder caught by Chas. P. Landresse, several other smaller fish were also taken. All this indicating that Wingo is getting on the fishing map again.

A week before the anglers who visited the Wingo sloughs and creeks got color to a slight degree. George Roberts landed two steelhead trout, each of them 2½ pounders. The trout made their way up the creek from the bay. Joe Dober connected with a 5 pound striped bass and landed the fish. Adam Hackmier caught a 4 pound bass.

These results, no doubt, will induce a big attendance of the gun-boated levee trotters tomorrow. Other anglers present were: Louis Gotthelf, Tim Lynch, Dick Cunningham, W. J. Street, Jack Duckell and others. Those who failed in capturing fish were recompensed with gathered mushrooms. The pasture lands near by are famous for fine mushrooms. One man returned with fifteen gallons picked in but a short time.

San Antone has given faint indication of the presence of bass, the creek waters, however, are believed to be too salty for good results at present. Other striped bass resorts are not offering any prize inducements these days.

There is an indication of a run of steelhead trout in San Francisco and tributary bays. Up river net fishermen have been catching a few of these trout. Near Kentfield in a confluent of Corte Madera creek several 2½ pound trout were taken last Sunday, a good run of fish was on, numerous anglers equipped with faulty tackle were repeatedly cleaned out.

PACIFIC COAST FIELD TRIALS CLUB.

The Pacific Coast Field Trials Club at its annual meeting last week in Bakersfield re-elected Judge Charles N. Post of Sacramento president, and the following officers: First vice president, J. E. Terry, Sacramento; second vice president, Lloyd Tevis, Bakersfield; secretary, E. C. Ford, San Francisco; executive committee, F. J. Ruhstaller, Sacramento; J. W. Flynn, San Francisco; J. H. Schumacher, Los Angeles; H. C. Katze, Bakersfield, and S. Christenson, San Francisco.

The club is in prosperous condition and elected ten new members at this meeting.

Drink Jackson's Napa Soda.

FISH AND GAME COMMISSION NOTES.

So far as local police operations by the Fish and Game Commissioners is concerned the moral effect should have some force. Throughout the State the deputies are equally vigilant and are making arrests daily. The present campaign should be of great educational benefit, particularly to the foreign element. Many of these gentry seem to be imbued with the idea that fish and game laws are like piecrust—only made to be broken.

Seven squads of Fish and Game Commission deputies visited different local market stalls and restaurants last Saturday provided with search warrants to uncover any infractions of the wild game limit law or the illegal traffic in non-saleable game birds.

The forenoon raid was without result. At noon time the unexpected appearance of Deputy A. Fairchild and five assistants at the Bay State Hotel on O'Farrell street, produced 113 ducks from the kitchen larder.

Z. Mallani & Co.'s poultry stand in the Nevada Market, at 1608 Market street, turned over 84 ducks after M. S. Clark and four deputies searched the place. This seizure spoiled an advertised cut rate sale of wild game for Saturday.

Miller & Campagno in the Spreckels Market, S. Campagno & Sons, 1444 Polk street, Baccigalupi, Rossi & Co., Sutter and Polk streets, and Onorato Brothers, Fillmore and California streets, were all inside the limit qualifications Saturday morning.

Deputy W. J. Sedgely and a squad failed to unearth anything contraband in Oakland the same morning.

Monday afternoon a shift was made to the Latin quarter. After the simultaneous inspection by three squads of deputies of the Fior D'Italia, New Bon Gusto and Dante restaurant kitchens not enough ducks were found in the three places to count up one limit of wild ducks.

Three details of deputies made another round of popular restaurants Tuesday afternoon.

Sixty-one fat mallard, sprig and teal were found in the cellar of the Mint restaurant, on Commercial street near Montgomery.

"Jack's" on Sacramento street, near Montgomery, yielded thirty-two ducks, all picked and ready for the oven.

Coppa's restaurant, on Pine street, developed a cupboard of the Mother Hubbard variety, so far as wild game cut any figure.

A fourth detail of deputies visited Blanco's on O'Farrell street, between Larkin and Polk. This expedition returned to headquarters with one undressed striped bass.

Early this week Deputy Wm. Armstrong, of Vallejo, seized an illegal small meshed net 3600 feet long at the mouth of Carquinez straits, off the Mare Island lighthouse.

The net was submerged and anchored in deep water and was operated by a crew of three men in a boat. These nets are worth at least \$1.00 per foot, as this seizure means confiscation and destruction of the net, it will be readily understood that Armstrong's capture is an important one.

SKILLED MOOSE HUNTERS.

While the Penobscot or Tarratine Indian is not considered the equal of the expert white man as a rifle shot, he is the best moose shot in the woods. This sinewy, feet-footed woodsman is fond of picking up a moose trail just after a light snow has fallen. Then, in light marching order, he will follow the animal across the country until he tires him out or kills him. The process frequently takes from three to four days, and it is possible only to the hardiest of pursuers.

When first started a moose will make off through the woods with the speed of an express train. If it is early in the season and there has been but a light fall of snow the traveling is good and it is a simple matter to follow the trail. At length the animal, confident of having thrown off his pursuer, will gradually slacken its pace and stop. But it is off again immediately upon hearing the first sound or upon the presence of those who are following.

It is a fact that a vigorous man can tire out a moose in the long run, and the Indian will at length approach near enough to get a shot. He can burden himself with but little in the way of camp equipage, however, and then a scanty supply of food and a blanket is all that he carries besides his rifle.

This method of killing moose is regarded by many as being far the most sportsmanlike. Surely it requires endurance and determination as well as woodcraft, and the man who has procured a head in this fashion has done something which would be impossible for the average sportsman.

No white man, no matter how expert, can ever quite equal an Indian in following a trail or in a canoe. The Indians seem to possess an aptitude in the handling of these frail craft which has come down to them through a long line of forebears.

However, few birch canoes are made nowadays. Tough winter bark is used in their construction, and with the encroachments of civilization it is becoming more and more expensive each year to get it. A high grade birch canoe will outclass three which are covered with canvas, and a few are still built to order every year on Indian Island, Me. They are much heavier than the canvas canoes, however, and for long trips, where there are frequent carries, most people prefer the canvas covered craft.

GRAND AMERICAN HANDICAP.

Pittsburg, Pa.—Please announce to the readers of the Breeder and Sportsman that the thirteenth Grand American Handicap tournament, that of 1912, will be held at Springfield, Ill., on June 18, 19, 20 and 21, on the grounds of the Illinois Gun Club. There will be \$1,500 added money, and the winner of first place in the Grand American Handicap proper will be guaranteed \$1,000 in cash, in addition to a handsome trophy.

Also be kind enough to announce that our seventh Western Handicap tournament will be held at Kansas City, Mo., on August 14, 15 and 16, under the auspices of the Kansas City Gun Club; \$1,000 added money.

ELMER E. SHANER, Secy.-Treas.

Pittsburg, Pa.—Please announce also to the readers of the Breeder and Sportsman that, since their annual meeting of last December, the directors of the Interstate Association have ruled that money entries in the Grand American Handicap shall be confined to amateurs. Professionals will be allowed to shoot in the Grand American Handicap for "targets only," and compete for a special trophy donated by the Interstate Association.

ELMER E. SHANER, Secy.-Treas.

AT THE TRAPS.

Tacoma, January 25.—Before the Tacoma Rod and Gun Club, near American Lake, this afternoon the touring trap shooting teams rounded out their tenth contest, and the Spokane team finally won a match by the score of 187 against 183 for the San Francisco team. Portland was third.

Hugh Poston and Less Reid, representing Spokane, were in good trim, for the former broke 93 targets, while his teammate went him one better with a score of 94. Fred Willet, the San Francisco star, was once more high man for the day. He broke 95 targets, while his partner, Fisber, fell down, breaking but 88 today. The Tacoma event makes the tenth shoot of the tour, and 1000 total targets were shot at; Willet has the remarkable record of having broken 941 of this total. Holohan is the only other man to do better than 90 per cent, for he has broken 908 of the thousand. The scores today were:

Spokane, 187 (Reid 94, Poston 93).

San Francisco, 183 (Willet 95, Fischer 88).

Portland, 171 (Holohan 84, Robertson 87).

The Aberdeen date for January 26 was cancelled. Vancouver, B. C., January 27.—Before the trap shooters of the Vancouver Gun Club here this afternoon the Spokane and San Francisco teams of the trio now touring the northwest broke the world's trap shooting record for teams by scoring 194 breaks each, which resulted in a tie. In the shoot off, Willet and Fisher of San Francisco won out by the narrow margin of one bird, scoring 46 against 45 for Spokane.

In addition to breaking the team records, the teams also broke all marks for the tour. Hugh Poston of the Spokane team was high man for the day, he not only scored the greatest number of breaks in the century run, but he also tallied high man in the shoot-off. Poston's record for the day was 98 in the regular event, and in the shoot-off of the tie he broke 24 of 25 targets. His teammate, Reid, made the fine score of 96 in the regular event, but missed four right angle targets in the shoot-off. Today's scores of two teams each with better than 96 per cent is claimed to be a world's record. The scores today were:

San Francisco, 194 (Willet 97, Fisher 97).

Spokane, 194 (Poston 98, Reid 96).

Portland, 183 (Holohan 95, Robertson 88).

The teams shoot at Wenatchee Tuesday.

Wenatchee, Wash., January 30.—All three teams of the visiting trap shooters broke better than 90 per cent of their targets today and this despite the cold and the fact that the ground was covered some two feet deep with snow. The San Francisco team, Willet and Fisber, was again victorious, each breaking 96 for a total of 192, while the Portland representatives, with 189, and the Spokane duo, with 186, were second and third, respectively.

Today's shoot was the twelfth event of the tour, and San Francisco has now won nine, Portland two and Spokane one match.

Pete Holohan was high man for the day, breaking 99 out of his 100 targets, and had an incomplete run of 90 consecutive breaks at the finish of the competitive match.

The scores today were:

San Francisco 192 (Willet 96, Fisher 96).

Portland 189 (P. Holohan 99, G. Holohan 90).

Spokane 186 (Poston 93, Reid 83).

The teams shoot at North Yakima Thursday, Pasco Friday and Spokane Sunday, when some great scores are anticipated when the Holohans get after each other. The race for high gun on the Portland team will be worth watching.

W. France, amateur of Houston, by remarkably consistent shooting won the Sunny South Handicap January 26, and with Alfred Gardner, also a Houston amateur, as his teammate, won the team championship of Texas.

France won the handicap by breaking 25 targets straight in a shoot-off after tying Tom Marshall, professional, and P. L. Parsons, amateur of Hot Springs, Ark., with 95 breaks each out of a possible 100.

N. A. Rie of Houston was high amateur the same day with 189 out of a possible 200; P. L. Parsons of Hot Springs, Jay Graham of Long Lake, Ill., and

Harvey Dixon of Oronogo, Mo., tied for second with 188, and Ed Forsgard of Waco, Tex., third with 187. In the professional class, W. R. Crosby of O'Fallon, Ill., led with 193; Ben Schwartz of Houston was second with 189.

On the five day program Billy Crosby and Billy Herr, professionals, led with 961, followed by Graham, amateur, with 949.

A. E. Rainey of the New York Yacht Club won the Preliminary trophy of the annual midwinter trap shooting tournament of the Pinehurst (N. C.) Country Club, scoring 93 from the 18 yard mark. The outcome was uncertain until the last shot was fired.

The score of 92 tied for second place. R. L. Shotts, the Larchmont Yacht Club champion, who shot from 19 yards, with B. E. Ward, of Aberdeen, Md., and R. H. Bruns of Brookville, Ind., both shooting from the 18 yard line. Walter Huff and Jim Skelly led the professionals with 92 and 91.

In the morning sweepstakes, G. S. McCarty of Philadelphia was first with 98, tying with George L. Lyon, a professional.

SAN FRANCISCO SHOW.

The fourteenth annual bench show of the San Francisco Kennel Club, organized February 3, 1897, incorporated 1909, announces the judges for the coming show:

Charles R. Harker of San Jose will judge St. Bernards, Newfoundland, mastiffs and English bulldogs.

J. E. Webster of St. Joseph, Mo., will judge English and Gordon setters, Chesapeake Bay, Irish water, cocker, clumber and field spaniels, fox, bull, French bull and Boston terriers, Danes, dachshunds, Russian wolfhounds, bloodhounds, foxhounds, greyhounds, Dalmatians and curly poodles.

C. W. Buttles of Kansas City will judge Irish setters, English retrievers.

G. S. Halliwell of San Francisco will judge Esquimaux, Chows, sky terriers, Whippets, pugs, Chihuahuas, Pomeranians, Italian greyhounds, all toys and other breeds.

The club officers are: William Ellery, president; H. B. Blatchly, vice-president; Wm. V. N. Bay, secretary-treasurer; Dog Show Committee—William Ellery (chairman), J. Harvey Jones, W. V. N. Bay, P. M. Wand, William Blackwell, H. B. Blatchly, W. G. McMahon, Sydney St. L. Cavill, H. B. Lister, C. W. Riffie; Honorary Promotion Committee—The Ladies' Kennel Association of California (Inc.), Mrs. Henry Lister, president; G. L. Meade, Secretary of the show; J. C. Berret, superintendent; Dr. K. O. Steers, veterinary surgeon.

The club offices for information, premium lists and entries are No. 583-85 Market street, San Francisco; phone, Douglas 4646. Oakland office, No. 454 Ninth street; phone, Oakland 602.

The club announces in the premium list a preamble that will strike a key note with every fair-minded sportsman, as follows:

It will be understood that on account of the multitude of little details connected with the holding of this show that it will be impossible for us to attempt correspondence with every fancier, no matter how much we would like to, hence we will say here that we earnestly request the support of each and every dog lover and owner, and ask that they help make a record-breaker in the annals of Coast shows. We ask this in the interest of the thoroughbred dogs, and wish every dog owner to feel that this show is the "Fancier's Show," rather than the show of the club.

It is well known that the club was organized solely for the purpose of lending its mite toward creating additional interest in "man's best friend" (the dog), and in inviting all fanciers to exhibit their specimens in friendly competition it hopes that thoroughbred dogs may be better understood, and a greater desire instituted for their possession, that we of the Pacific Coast may boast the ownership of better specimens and more of them than can be claimed for any other section.

In affiliating with the National Dog Breeders' Association, a progressive national body of fanciers handed together solely in the interest of our friend, the thoroughbred dog, and including in its fold some of the leading kennel clubs in this State, the San Francisco Kennel Club has exercised the American right to have a direct voice in the government of Western dogdom, and has at the same time pinned its faith on a "home institution," in which action it believes it has the cordial support of all California fanciers who stand for "a square deal to the dog."

Dogs need not necessarily have a pedigree to entitle them to entry. Where the particulars are unknown, dogs of any recognized breed may be entered in the Challenge, Maiden, Graduate or Selling Classes, by stating on the entry blank the word "Unknown," in the event of the date of birth, breeder and pedigree of the exhibit being unknown to the owner.

In the case of dogs coming by express, exhibitors are requested to ship so that the dogs will arrive in San Francisco the day before the show opens, where they will be taken charge of and cared for under the direction of the superintendent. Arrangements have been made with Wells, Fargo & Co. for the prompt delivery of all dogs shipped through them.

Exhibitors will please note the conditions of the various classes provided for in the National Dog Breeders' Association regulations governing dog shows, which will be found in this premium list.

Where no class has been provided for a recognized breed, if three or more dogs of that breed are entered in the Miscellaneous Class, a breed class will then be made for them.

The club is sparing neither pains nor expense to make this show one that will be pleasantly remembered by every exhibitor and instructive to all patrons. Its interest lies in all breeds and to have "the best dog win."

ECHOES FROM THE NORTHWEST.

[By August Wolf]

A three years' war will be waged against the coyote by farmers, sportsmen and members of the Spokane Rod and Gun Club and Spokane Fish Protective Association, according to Al Wieseman, secretary of the two local clubs, who said:

"We will start out at once on the work of exterminating. Farmers from all over the country have appealed to our association for aid, and we have voted to do everything in our power to help them.

"The coyote is ruining the hunting in this section of the country, and we feel confident of being able to remedy the conditions. A big coyote drive will be held next spring, and it is expected that at least 500 farmers and hunters will participate.

"We will send out notices to all farmers and try to have any number of grey and fox hounds imported into this section. With the dogs it will be only a matter of a short time until the coyotes will be killed or driven out of the country."

Mrs. M. Barrett and Mrs. Harry Brown are among the few enthusiastic women hunters of Spokane who tackle the shotgun sport in winter. They have bagged rabbits galore this season and plan to go after the bunnies again soon.

The forestry department has allowed William Kingman, a trapper of Trout Lake Wash., to connect a telephone with the government line which was placed last summer. This is a great convenience for lonely trappers who have cabins in the reserve. Mr. Kingman has secured 15 fine pelts this winter. During three weeks he has been operating his string of traps in the hills south and west of this place he has caught marten, fox and mink.

Paul Redlands and Don Wright of Spokane recently enjoyed a day's rabbit shoot at Marsball junction, where they are reported plentiful and easy to shoot.

Sportsmen and farmers throughout the Inland Empire have been invited by the Spokane Rod and Gun Club to assist in a campaign to exterminate the coyote, upon which there is a State bounty of \$1 in Washington and \$1.50 in Oregon. Al F. Wieseman, secretary of the organization, thinks that the farmers, who are the chief sufferers, should lead in the movement by importing hounds, saying also that "the coyote is the worst enemy of small game, such as prairie chicken, quail, pheasants and ducks."

Officers of the national forest service at Okanogan, Wash., recently advised the game warden and sheriff of the county that information has come to them through a veteran trapper in the Alder creek district of an attempt to capture a colony of 200 beavers at the head of the Pesayton river on the reserve. The plan of the poachers is to kill the beavers and store the hides in an unused cabin which is arranged with a canvas lining, the hides to be secreted between the walls and the canvas until the spring break up, when they will be packed to Bellingham. The matter has been referred back to the forest officers for action as the colony is on the reservation.

Spokane Fish Protective Association, of which A. F. Wieseman is secretary, has secured 525,000 eastern brook spawn, to be hatched at Dartford and planted in the Spokane river, between Seven Mile bridge and the waterworks, early in May. Mr. Wieseman said: "We are working out an idea of making this quite a little ceremony, inviting the mayor and prominent citizens to come out to witness it."

Charles Liftchild, a prominent sportsman in Spokane, said in an interview a few days ago: "We may try to revive the agitation for uniform game laws for eastern Washington and the Idaho panhandle from the next Washington legislature if we can induce our Idaho friends to make a few concessions. Idaho has a good license idea, \$1 entitling every resident to hunt or fish for one year. Idaho's open season is also more liberal. We would prefer to alter their non-resident license fee, which is now \$2 for fishing and \$5 for small game, to a uniform fee of \$2 for small game and fishing. We should favor the reduction of their \$25 fee for big game to \$10. We would encourage hunters to come into our country, not try to keep them out."

Mountain Lions Numerous.—About 100 miles distant from this city in the Annapolis district in northern Sonoma county mountain lions have been driven by hunger down from the high ranges to the ranches.

At the James McLennan place last Saturday one large and two small lions killed a big calf and dragged its body for a long distance back into the hills and there devoured it.

Hunters and hounds have been endeavoring to run the beasts to earth since.

AN ENTHUSIASTIC HORSEMAN'S VIEWS.

Editor Breeder and Sportsman:

Back again in Los Angeles feeling better regarding the prospects of light harness horse racing in California than ever. The two meetings of leading horsemen in San Francisco were attended by earnest, thoughtful men who have stayed with the game in fair and foul weather, for years, and the way they spoke of the necessity of unity of purpose, a consolidation of interests and a continuity of the race meetings in a big circuit was most encouraging.

This idea, supplemented with that of holding a big harness horse meeting at the Stadium in 1915, is one that should be always kept to the front. We should endeavor in all ways possible to spread the news of this big meeting everywhere. It will be the greatest blessing that has ever occurred to the industry and we must let everybody know it. Horsemen should become "boosters" from this time on. Every letter and document mailed should have a line referring to this, "the biggest race meeting ever held!" All who are interested in horses in California, when writing to friends in the East or in foreign lands, should not forget to refer to it.

There is no place in the world where the opportunities are so great for light harness horse racing as on the Pacific Coast, and yet we have very little racing. To my way of thinking, lack of proper advertising and publicity has had much to do with this, but I hope the cause has been entirely removed, for there are a few things which occurred lately which convince me and others that we have turned over a new leaf. The meeting in San Francisco, at which representatives from Vancouver, B. C., Washington, Utah, Oregon, Arizona, as well as California, attended, and the one regarding the 1915 race meeting, seem to have given the industry a new lease of life, the effects of which will be noticeable everywhere. You will see more good mares bred this season than you have in years and these mares will all be named in the Futurities, the "mainstays to keep the harness horse industry alive." We need a few more good Futurities on this Coast. Why not have one for the Panama-Pacific Fair? When we have plenty of colt races we will see the breeding industry flourish. When we begin to show three-year-olds that can trot in 2:08 or 2:09, then we can look for some of that foreign trade which does not extend farther west than Lexington, Kentucky. The Eastern breeders have the monopoly of this now, but they cannot monopolize the business of breeding and racing the fastest colts. California enjoyed that reputation once and will do so again. The P. C. T. H. B. Association should remember this when giving their meetings and select a good, safe, fast track, so that our colts can show to the very best advantage; and there is another important thing that I believe should be remedied, and that is the apathy of owners of good mares who breed them to our best stallions, in failing to enter the produce in Futurity stakes. They should realize that a colt well staked will sell more readily for a higher price than one that is not mentioned in a Futurity or other stake.

There is no reason why California should not henceforth raise and sell as many fast horses as any other State in the Union. I believe this is the year also that every man interested in the light harness horse industry should lay aside all jealousies and prejudices, put his shoulder to the wheel and push the industry along, and, if necessary, dig up a little change to establish a circuit on the Pacific Coast that should give it the prominence it deserves in the horse world.

Mr. Brown, chairman of the State Board, is to have this Exposition Park track completed in a manner creditable to this section of the country, and there is no question but that it will be one of the finest and best equipped racing plants in the United States.

Mr. W. A. Clark Jr., Mr. Bowen, Mr. Christopher, and a few other prominent men here will meet at a luncheon shortly to be given by Mr. Clark, to talk over plans for the proposed harness meeting to be held here this fall, and doubtless there will be some good resulting from such a conference.

Sincerely yours,

TED HAYES.

NEW RACE TRACK AT BAKERSFIELD.

Bakersfield, Jan. 27.—A movement is now on foot among local sportsmen, principally the horsemen who seek the co-operation of the automobile and motorcycle men, to form an association to build two racing tracks, one for automobiles and the other for horse races. It is believed a tract suitable for this purpose could be bought at a low sum a short distance from the city. The plan is to hold racing events by horse and auto on the same day, providing the people of Kern county with a good class of sports, something they can see all the time it is going on.

With the passing of Hudnut park with its half mile track and grand stand into the possession of the Kern County High school as a high school farm, the local sporting men were without a place to speed except on the public highway. It is believed the merchants and residents generally will co-operate with the project, since the plan is to give the city something of a permanent character and something that is badly needed.

Recreation Park fills one need of the sporting public and the fans. A race track for horses and another for automobiles, all fenced in would serve a still more general purpose and answer the needs of the time. It is stated the association could be formed on a paying basis.

Drink Jackson's Napa Soda.

THE FERNDALE FAIR AND RACE MEETING.

A meeting of the directors of the Ferndale Agricultural Fair Association was held last Monday evening. At this meeting the dates for the 1912 exposition were set, and the fair will be held on September 9th, 10th, 11th, 12th, and 13th. Monday, the 9th, will be entry day, and Friday, the 13th, the closing day of the fair. An important move made by the directors was their decision to greatly increase the purses for the horse races. In many events they were almost doubled. One hundred dollars was added to the purse in the free-for-all trot and pace, the purse for which will this year be \$350 instead of \$250 as last year. That the increases right through are substantial ones may be noted by reading the following speed program as adopted by the directors at the meeting Monday evening:

Trot and pace, 2:25 class, best three out of five, purse \$300; trot and pace, 3:00 class, purse \$125; farmers' buggy race, purse \$20; running, 3/8-mile dash, purse \$50; trot and pace, 2:40, purse \$225; trot and pace, two-year-olds, purse \$100; trot and pace, three-year-olds, purse \$150; running 1/2-mile dash, purse \$100; farmers' saddle race, 1/2-mile, purse, \$10; trot and pace, 2:35, \$250; farmers' buggy race, purse \$20; running, 4 1/2 furlongs, purse \$75; running, mile dash, purse \$125; ladies' driving race, purse \$20; free-for-all trot and pace, purse \$350.

A change in the rules was also made by the directors, so that it is now required that all trotting and pacing horses be owned in Humboldt county prior to January 1st, 1912. Heretofore the trotting and pacing events have been open to horses owned in Humboldt, Del Norte, and Mendocino counties. The running races as before are open to Humboldt, Del Norte, Trinity, and Mendocino horses.

Special events will be added to the program as outlined above, and with the incentive of increased purses, it is considered that there will be more horses for the races this year than ever before. With better races there will be larger crowds, and even at this early date it seems safe to prophesy that the fair of 1912 will be the greatest success in the history of Ferndale.

ADVICE TO BREEDERS.

* Dr. D. F. Herspring, in a communication to The Mail of Woodland, writes as follows:

First, breed to the stallion that is fashionably bred and has the blood that the people want. Do not breed to a stallion whose colts only sell for \$50 to \$75.

Never breed to a stallion whose front feet, (the toes) point outward for this is a deformity and is transmitted and the offspring is usually had kneecrackers and interferes.

Don't breed to a stallion with a thick jaw, or one too narrow, one that has to wear a "derrick bit" to keep him from choking down when at speed. Be sure the stallion is free from curbs, sidebones, or other blemishes. Try to breed your mare to a stallion whose ancestors were noted for beauty and style and you will always have an animal that will sell for a good price.

Try and see colts by the stallion you intend breeding to and if they are curby, have weak pasterns, or other deformities, especially if their feet turn out, don't breed to them.

Remember, that "like hegets like." Always inquire if the stallion is a trotter or pacer as sometimes stallions are advertised as trotters when they are not.

Don't be misled by the new stallion law words. "Pure Bred," as the trotter has always been known as the "Standard Bred," and some of the best bred stallions in the world cannot be registered under the new rules due to the carelessness of former owners.

THE CANFIELD-CLARK STAKE NO. 4.

Every breeder should make an entry in this stake and do what he can to stimulate the horse interests of California. Every foal entered in this stake will have his value increased. The prospective buyers will pay one-half more for a colt that is well staked and can show some class than he would pay for the same colt not staked. The race horse business is just the same as any other business. The capitalist will not put his money in unless there is a chance to get it out. Every day in the training season you will see parties looking around the tracks for good youngsters to buy, but they must be staked or you cannot interest them in your colt. The entrance fee is small and the cost of training to bring your colt up to a race as a two-year-old will not be large, in fact, very little larger than if he was not eligible to start in any stake. By entering in this stake you have two chances, as it has a trotting division and a pacing division, and as the guarantors have guaranteed \$1,600, \$1,000 for the trotting division and \$600 for the pacing division.

It is up to the breeders to support this stake and all the other futurity stakes in California, as there is no other move that can be made that will make the race horse business progress faster than a liberal entry in the futurity stakes. Don't let this chance go by; it costs but \$2 to nominate each foal and you should enter all your foals whether you intend to race or sell them. E. J. Delorey, the secretary of the California Breeders' Association, 305 1/2 South Spring street, Los Angeles, will reply to all inquiries regarding it.

FOR THE FAIR IN 1915

The annual meeting of the California Live Stock Breeders' Association will be called in the near future, probably at the end of this month or the beginning of next. It is expected that the meeting will be held at the Palace Hotel, having a banquet in connection with it, following the same custom that has held for the last two years. It seems to this paper that it is about time for stock men to get together and form a strong organization to work with the Panama Exposition Board in arranging a great live stock show in 1915.

We understand there is a move on foot to have the heads of all the county and State fair associations of the coast attend this meeting, and with the chain of fairs already arranged by the latter officials, commencing with Vancouver, B. C., and finishing at Phoenix, Arizona, it would seem that the two bodies working in accord, have splendid prospects for a successful season.

Another thing that will be of value in having this chain of fairs is the railroad rate proposition. The rate has been a one-way rate and home free; but the way fairs are generally run, the exhibitors have to double back, making complications which the railroad and the live stock men will be glad to see abolished.

A strong association would also be a great educator in creating new herds to help make a greater show at the Panama Exposition in 1915 by the Pacific Coast exhibitors. Another thing the California Live Stock Business Association ought to take up is the question of money prizes for the State exhibitors. Every national show has always done this, and at the St. Louis World's Fair the State of Missouri made it possible for two exhibitors out of that State, one a Hereford breeder and the other a Berkshire breeder, to realize \$10,000 in premiums.

Again the California breeders ought to undertake a steer, wether and barrow show. As California is away by itself and transportation rates are high, it would be well to have some kind of fat stock show. All it requires is a move by some of the leading San Francisco business men and it would go right to success. The State of Colorado started such a show four years ago, and now it has grown so that the Union Stock Yards at Denver have had to make many more improvements to accommodate the stock shipped there for exhibition. The different breeders' associations would undoubtedly assist in the work, because at the International Show at Chicago this year the Short-horn Association of America offered a thousand dollars for the best carload of short-horn steers if they were made the grand champions of the show. The other beef breeders' associations put up similar prizes. One of the biggest Short-horn breeders in this State has now on hand some first-class Short-horn steers and it seems the only way to get the value of them is to send them to the Portland show to be held next March (why Portland ahead of San Francisco?) We know of another instance where the breeder has now on hand 40 steers, weighing over 1300 pounds and has no place to ship them unless to Portland. They are in such a place where transportation rates kill all profits that would accrue to them in shipping to the Portland show. If such a fat-stock show was inaugurated here it would not only stimulate people to breed better steers, but would also make a larger market for men who are engaged in the pure-bred business.

It is the duty of every live-stock man in the State to attend this meeting and lend his aid in fostering the live stock interests, as without an association nothing can be done. A move is also on foot by some of the directors to create a means whereby a paid secretary can be elected to take charge of the live stock work.

So, breeders and stock men, when the call is announced do not overlook the date, but come to San Francisco, partake of a meal at the Palace Hotel, join the association and get to work to help the live stock interests.—Rural Press.

It appears that twenty-six of the fifty-one new 2:10 trotters of 1911 inherited the blood of Seely's American Star 14, and eleven of the twenty-six were descendants of the renowned Clara, the dam of Dictator 113, a full brother of the noted old-time champion trotter Dexter 2:17 1/4. It will be remembered that Clara's son, Dictator 113, sired the first trotter to take so fast a record as 2:10, Jay Eye See 2:10. Dictator 113 also got the dam of the champion trotter of her day, Nancy Hanks 2:04, and Dictator 2:17, a son of Dictator 113, got Directum 2:05 1/4, that at four years of age became the world's champion trotting stallion and the world's champion four-year-old trotter. The blood of Seely's American Star 14 is a powerful factor for imparting speed ability, generation after generation. Not less than twelve of the new 2:10 trotters of 1911, that inherited the blood of Mambrino Patchen 58, had inherited the blood of Seely's American Star 14, directly back of the Mambrino Patchen cross. They are as follows: Anvil 2:08 1/4, Chatty Direct (4) 2:09 1/4, Electric Todd 2:09 1/2, Eva Tanguay 2:09 3/4, Elizabeth Ray 2:09 3/4, Muda Guy 2:09, Myrtle Granet 2:08 3/4, Nada 2:09 3/4, Olcott Axworthy 2:08 1/2, Peter Thompson (3) 2:07 3/4, Professor Heald 2:09 1/2, and Vanity Oro 2:09 1/4. This leaves only eight of the twenty new descendants of Mambrino Patchen 58 that made trotting records of 2:10 or better for the first time last season that did not inherit the Seely's American Star 14 cross, while there were fourteen of the new 2:10 descendants of Seely's American Star 14 that did not show a Mambrino Patchen 58 cross.

STALLS FOR HORSES.

The stall-floor in the horse-stables should be level; inclined planes are injurious. The horse is forced to stand in a cramped position, and if continued through a number of years, generally becomes permanently disabled.

Inclined floors are usually constructed to afford drainage, but it is much better to supply enough bedding to absorb all liquids than to have them seep away and ferment, later to aggravate the horses' eyes and nose by pungent ammonia fumes.

Nine feet by 4 1/2 or 5 is about the proper size of stalls for the working horses. Stalls should never be six feet wide, for then the horse may turn, and there is danger of casting.

The boards along the sides of the stalls should run lengthwise, in order to prevent wounds from splinters. Boards running up and down break easier, and are not so flexible.

It does not matter so much what sort of a floor is put in, as the care taken of it. Plenty of bedding must be used at all times. If cement is

used, rough-finish it to prevent slipping and crippling.

Wooden floors are too dry, and have an injurious effect upon the hoofs; beside there is the ever present danger of splintering.

Idle horses should never be tied in the stalls; they should be provided with roomy box-stalls. Stallions, especially, should always be placed in box-stalls. A clay floor, tamped down well, and then covered with cinders, makes an ideal floor for such stalls.

Always place bedding toward the side and rear of the stall, as a horse lies well backward and on its side. Should the horse kick and scratch the straw too far back, place a coarse cocoanut-fiber mat under the straw about where the hocks of the horse lie, and there will be no further trouble. Otherwise, the hocks may be capped and injured.

Beauty and uniformity have a value, even though they do not add to the milk-yields.

Too many dairy-cows are being made useless through the excessive work they are called upon to do through a short, forced test.

After providing plenty of windows, a coat of whitewash will add greatly to the light of the stables.

We need to give the dairy-bull plenty of exercise, and the best of treatment, that we may keep him until he has had an opportunity to show his worth.

TRIANGLE TRIP

OVER THE

Northwestern Pacific Railroad

One of the most delightful scenic one-day jaunts in America.

150 miles of Mountain and Redwood Forest Scenery, a Boat Ride on San Francisco Bay and by rail along the Russian River.

Leave San Francisco 7:45 A. M. daily except Sunday, and 8:45 A. M. Sunday only, by boat across the Bay of San Francisco, in full view of the Golden Gate to Sausalito (the Sorrento of America). Thence via picturesque San Rafael and thriving Petaluma (home of the chicken industry), through Sonoma Valley to Santa Rosa and Fulton. From Fulton, through magnificent mountain scenery and redwood forests and along Russian River, to Monte Rio. Return is made along the coast, passing Tomales Bay, Point Reyes, San Anselmo, etc., to Sausalito, arriving at San Francisco 7:35 P. M. daily the same evening.

If preferred, trip can be reversed, leaving San Francisco at 8:15 A. M. via the coast to Monte Rio and returning along the river and through the valleys, arriving at San Francisco 7:35 P. M. daily except Sunday and 7:05 P. M. Sunday the same evening.

Round Trip Fare for Triangle Trip, \$2.80, except on Fridays or Saturdays. It is \$2.50 and on Sundays only \$2.20.

Tickets on sale at 874 Market Street (Flood Bldg.) and Sausalito Ferry Ticket Office.

KEEP IT HANDY

You can never tell when a horse is going to develop a Curb, Splint, Spavin, Ringbone or lameness. Yet it is bound to happen sooner or later. And you can't afford to keep him in the barn. Keep a bottle of

Kendall's Spavin Cure handy at all times. John Sayer of 324 Bronson Avenue, Ottawa, Ont., writes: "I would not be without Kendall's Spavin Cure at any cost. It is a priceless liniment for both man and beast. Get Kendall's Spavin Cure at any drugist's. \$1 per bottle—6 for \$5. 'Treatise on the Horse'—free—or write to Dr. B. J. KENDALL CO., Lonsburg Falls, Vt., U.S.A."

GOOD FISHING

and pleasure boating on the Marin shore at Tiburon and vicinity. Fishing tackle to let and bait always on hand. First-class boats at reasonable prices.

San Francisco Boat House,
CAPT. F. W. EBBE, Prop., Tiburon, Cal.
Good ferry service from foot of Market St.

Show Horse! Race Horse!! Sire!!!

The Standard Trotting Stallion LIJERO 2:15 1/2 (Reg. No. 45923)

Sired by James Madison 2:17 3/4 (son of Anteo 2:16 1/2), sire of 18 in 2:30 list, including Brilliant 2:08 1/4, Tuna 2:08 1/4, Emily W. 2:10; dam Hilda (dam of William Albert 2:16 1/2, a sire, Saint Ambrose 2:25, and Lijero 2:15 1/2, a sire), by Nutwood 2:18 1/4, the world's champion broodmare sire; second dam Eudora by Volunteer, the greatest sire of race horses that ever lived; third dam by American Star 14, the sire whose daughters have produced 43 trotters and among them some of our greatest sires.

Lijero is a brown stallion foaled in 1902, stands 16.1, and weighs 1200 pounds. He sired Expedito (3) 2:14 1/4. Public trial at Chico as a four-year-old in 2:08 1/4. Lijero forced Prince Lot 2:09 1/4 to trot in 2:10 1/4 at Woodland in 1910 and was only beaten a head. He started in five races, won three and was second in the other two, and it gave Helen Stiles 2:08 1/4 and Prince Lot 2:08 1/4 all they could do to beat him in those two races. Very few horses have ever trotted in 2:10 with less work than Lijero. He should race in 2:03 this year. He has everything to recommend him as a game racehorse and as a sire he will undoubtedly be one of the best. He has size, style, color, conformation, disposition, the best of feet and legs, an iron constitution, and the purest of trotting action. His gameness is unquestioned. He is a perfect show horse and sires show horses. He and his daughter Expedito have won first prizes in the standard class at the California State Fair.

IDORA W., registered in Vol. XIX, Brown mare, 15 1/2 hands; foaled 1901. Sired by James Madison 2:17 3/4, dam Swift Tide by Albert W. 2:20; second dam Uarda (dam of Flowing Tide 2:14 1/4), by Echo; third dam Dewdrop. A sure breeder, due to foal to Lijero 1912. Entered in State Futurity and Breeders' Futurity Stakes.

TOOTS W., registered, Vol. XIX, Bay mare, 15 1/2 hands; foaled 1907 by Stam B. 2:11 1/4, dam Idora W. Due to foal to Lijero 1912. This mare is very fast, having worked quarters in 35 seconds as a two-year-old. Entered in State Fair Futurity and Breeders' Futurity Stakes.

JAMES H. DONNELLEY, b. g., 15.3 hands; foaled 1909. Sired by Lijero 2:15 1/2, dam by Hanford Medium; second dam Algerine (dam of Kelly Briggs 2:08), by Algona, etc. Entered in Breeders' Futurity and State Fair Futurity. With little work this one showed a mile in 1911 in 2:28, half in 1:10 and a quarter in 33 1/2 seconds. He will make a 2:12 or better pacer this year.

IVA W., b. f., foaled 1910; sired by Prince Ansel 2:20 1/4; dam Idora W. (which see). Entered in Breeders' Futurity, State Fair Futurity and Occident Stake. She is just broken to drive and will undoubtedly make a very fast mare. She is eligible for registration.

DR. JOHN. B. C. (1), by Palite (son of Nutwood Wilkes 2:16 1/2 and Palita, 2, 2:16); dam Toots W. (which see). Entered in State Fair Futurity, Breeders' Futurity and Occident Stake. A fine large perfectly formed individual, nicely halter broken.

These horses are all sound and in good condition, ready for anything that horses can be used for. The mare Toots W., if worked, will make a 2:12 trotter, or even a lower record than this.

On account of the many demands upon my time in my business, I find I cannot devote any to the development or care of these, therefore I have decided to sell them.

Any further information regarding prices, etc., will be given by addressing

F. E. WRIGHT,
318 K. St., Sacramento, Cal.

Gombault's Caustic Balsam

The Worlds Greatest and Surest

Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS I

SAFE, SPEEDY AND POSITIVE.

Supersedes All Caustery or Firing. Invaluable as a CURE for

FOUNDER, WIND PUFFS, THRUSH, DIPHTHERIA, SKIN DISEASES, RINGBONE, PINK EYE, SWEENY, BONY TUMORS, LAMENESS FROM SPAVIN, QUARTER CRACKS, SCRATCHES, POLL EVIL, PARASITES.

REMOVES

BUNCHES or BLEMMISHES, SPLINTS, CAPPED HOCK, STRAINED TENDONS.

SAFE FOR ANYONE TO USE.

We guarantee that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin mixture ever made. Every bottle sold is warranted to give satisfaction. Write for testimonials showing what the most prominent horsemen say of it. Price, \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

The Accepted Standard VETERINARY REMEDY
Always Reliable. Sure In Results.

Some genuine willow the signature of The Lawrence-Williams Co. Sole Importers & Proprietors for the U.S. & CANADA. CLEVELAND, O.

NOTHING BUT GOOD RESULTS.

Have used GOMBULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. BAYBOND, Prop., Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBULT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of the largest breeding establishment of trotting horses in the world, and use your blister often.—J. C. GRANE, Training Station, 990 Jennings Street, New York City.

SAVE-THE-HORSE

TRADE MARK REG'T.

JUST NOTE THE KIND OF WORK THIS HORSE DOES IN 5 DAYS' TIME.

Troy Chemical Company, Binghamton, N. Y.
Dear Sirs: I have used your remedy now for five days and must say it is wonderful; did not expect any such results. The horse had not been able to put her heels to the ground and when she walked she would barely touch her toe to the ground and then jump with the other foot. I gave her the first treatment Sunday noon and when I went in the stable Monday morning she was still resting the foot, but when I made her stand over she put the foot plumb on the ground, and bore her weight on it; then I took her out and she walked on it very well. I put her in the team Thursday afternoon and went in the woods after a load of wood, and got in a place where they had to do their best or stay there. She lifted as hard as ever I saw her. I expected to see her lame next morning, but she was not. The trouble seemed to be in the lower part of the tendons of her hind leg. Under these conditions, how long shall I continue to treat her?
Very truly,
R. H. WILLIAMS.

You will observe there was no fever or enormously swollen leg, nor laying up of the horse with this treatment.

MAKES A TENDON AS STRONG AS A ROD OF STEEL.

\$5 A Bottle

With a binding contract to refund money or cure any case of Bone and Bog Spavin, Thoroughpin, Ringbone (except low), Curb, Splint, Capped Hock, Windpuff, Shoe Boil, Injured Tendons and all Lameness. No scar or loss of hair. Horse works as usual.

SPECIAL ADVERTISING.

Wanted, For Sale, and Miscellaneous advertising under this head will be set in nonpareil type (same type below) and will be published at the rate of 2 cents per word each insertion, or 6 cents per word by the month. Count each abbreviation and initial as a word.

RED COCKERS FOR SALE—Handsome pedigreed bitch, 3 years old, and a 5 months' old puppy. A bargain. For particulars address George Van Horn, Redwood City. Phone, 285 Y.

STUD BOOK FOR SALE—Volumes 1, 2, 3, 4, 5 and 6 of Bruce's American Stud Book; handsomely bound; good as new. Will be sold cheap. Address Breeder and Sportsman, San Francisco, Cal.

FOR SALE—Percheron Stallion (grade, 4 years old, bay, absolutely sound, good disposition, and sure foal getter; weighs 1600 pounds. I have several of his weanlings to show how he breeds. Price \$1000. For further particulars address J. E. MONTGOMERY, Davis, Cal.

FOR SALE, CHEAP—The best bred mare in California. Bay filly, 3 years old; sound. With 6 weeks' work paced a mile in 2:20 to a cart and had just 2:00 speed. Sired by Nutwood Wilkes; 1st dam by Bonnie Direct 2:05½; 2nd dam by Searchlight 2:03½; 3rd dam by Director: 4th dam Lidia W., dam of Nutwood Wilkes by Nutwood 600. Bred by Martin Carter, Nutwood Stock Farm, 1414 Alameda St., W. BARSTOW, 1042 Alameda Ave., San Jose, Cal.

FOR SALE, CHEAP—One registered stallion, sired by McKinney 2:11¼; 3 years old; sound. Also one imported draft registered stallion; weighs 1800 pounds; 7 years old. Would consider trade on heavy mare or standard-bred mares, or fillies. Breeding and pictures sent to interested parties. Address D. A. BAKER, Hill P. O., San Diego, Cal.

FOR SALE—Handsome seal brown stallion, 6 years old, weighs 1200 pounds. Has paced a quarter in 30 seconds. He is an inbred Electioneer and is a sure foal getter. Purchaser can see his colts. Also black Percheron stallion, 9 years old, weighs 1700 pounds. Handsome and sure foal getter. The above horses will be sold cheap. For price and particulars, apply to Canton Bros., Ranch, San Pablo Ave., near County Line. Postoffice address, R. F. D. 1, Berkeley, Cal.

STANDARD McKINNEY STALLION FOR SALE—Scott McKinney 33749, by McKinney, dam Primrose (great brood mare) by Sidney; second dam Brown Rose by Privateer; third dam Lady Baldwin by The Moor; fourth dam daughter of Ben Lippincott, son of Williamson's Belmont. Scott McKinney is a handsome bay horse; weighs about 1100; good gaited, and all his get are fine individuals and show speed. Price \$500. Has State license for this year. Address DR. M. F. SCHATLENBRANDT, 4051 20th St., San Francisco.

FOR SALE—ZOLACK 2:18, pacing as a two-year-old; trotting 2:24½ as a three-year-old; trial 2:19. He is a coal black stallion, five years old, stands 15.3 hands, weighs 1200, and one of the best made stallions in California. He should get a record of 2:12 or better this year. Is kind and gentle and is a half brother to the great trotter Zomblack 2:26½, that worked last fall in 2:08½ for his owner, R. J. MacKenzie, and will be on the circuit this season. Zolack is a standard and registered horse, his papers having just been sent for. He was sired by Zolock 2:05¼ (one of the best speed producing sons of McKinney 2:11¼) and his dam is Madeleine Marshall by Demonio 2:11, second dam that great broodmare, Mamie, sired by Nutwood 2:18¾. He will be sold at a reasonable figure as the farm I have leased has been sold and I am compelled to get a new place. This is my only reason for selling Zolack and the following:

TWENTY-THREE SKIDDOO, standard and registered black mare, foaled 1896, sired by Nutwood Wilkes 2:16¼, dam Twenty-Third dam of Sterling McKinney 2:06¼ by Director 2:17, second dam Nettle Nutwood (dam of Hillsdale 2:15) by Nutwood 2:18¾, third dam by Vick's Ethan Allen Jr., fourth dam by Williamson's Belmont. This mare is a fine sized, well made trotter, gentle, but has never been worked for speed. She is bred to be as fast as any.

STAR POINTER, filly (4), out of Trix (dam of Aerolite 2:07½, Mona Wilkes 2:03¼ and four others) by Nutwood Wilkes 2:16¼, etc. This is a nice big mare, stands 15.3 hands and is a free-legged pacer, was handled a little as a two and three-year-old. She was both bred with spindles, so I did not work her. They have disappeared, and, as she never gave a lame step, they must never have been near a cord or tendon. From her breeding she should make one of the greatest of broodmares.

Dan Logan filly (3) out of the standard and registered mare Sophia (dam of Sophia Direct, p. 2:23¾, and Corona 2:27) by Robt. McGee 2:17¾; second dam Grayson by Wildwood 2:41, third dam Lady Utterback by Mambrino Patchen Jr. Dan Logan, her sire, had a trial of 2:12 and is a full brother to the champion Jim Logan 2:05¼. This filly is a pure-gaited trotter, just been broken and will undoubtedly be a fast mare. Her breeding can hardly be excelled. For prices and further particulars address J. W. MARSHALL, Dixon, Cal.

FOR SALE—The trotting stallion Altitude 2:22; seal brown; fine individual; sound and gentle. For terms, etc., address CHAS. THOMPSON, R. F. R. D. No. 3, Bakersfield, Cal.

FOR SALE—Four-year-old filly (full sister to Celia K., trial at Stadium 2:10¼). By Arner 2:17¾, dam by Direct 2:05½; second dam Carrie S., by Mambrino Wilkes. She is a jet black, weighs about 1000 lbs.; handsome, strong, rugged, and sound. Just broken and shows speed, and if properly handled, will undoubtedly be as fast as her sister. I will exchange her for a good sound surrey animal weighing from 1100 to 1200 lbs. H. OLSEN, 5014 E. 14th St., Oakland, Cal.

FOR SALE—Halley Wilkes, black mare by Count Wilkes 2:21; dam by Orator, grandson of Electioneer. An ideal road mare, trots good road easy; paces when at speed, free legged; uses no boots. With one month's training paced quarter mile in 34½ seconds, half mile in 1:12 on half-mile track. Also three and four-year-old fillies out of the same mare by Dictatus 2:17. For price and particulars address W. S. CLARK, Gustine Stock Farm, Gustine, Cal.

FOR SALE—Lady Derby (formerly known as the Schottler mare); five-year-old, by Chas. Derby 2:20; dam (dam of Judge Green 2:09) by Anteeo Jr. 2:25½; second dam by Geo. M. Patchen Jr. 2:27. Stands 16.1 hands; weighs 1100 lbs. A fine, rangy, trotting mare, absolutely gentle and not afraid of anything. Price \$200—cheap! Sound. One of the finest driving mares in this State; trotted as a two-year-old quarters in 37 on a business track. Has all the qualities to make a great brood mare. Can be seen at Kelley's Stables, 1629 Pine St. For further particulars, address J. R. FREEMAN, 322 Pacific Building, San Francisco, Cal.

CHARLES JAMES.

Public Training Stable

Pleasanton Race Track, Pleasanton, Cal.

Trotters and pacers trained at reasonable rates for this season's campaign. Best of care given. Developed and drove the following better than 2:13 in 1911: Prof. Heald 2:09½, Cresto 2:12½, Bodaker 2:13, Merrylena 2:23 (miles in 2:12) and Reina Directum, matinee, 2:11, over the Stadium track. These are all trotters. Address

CHARLES JAMES, Pleasanton, Cal.

CHAS. WHITEHEAD'S

Public Training Stable

Pleasanton Race Track, PLEASANTON, CAL.

Horses and colts trained at reasonable rates for next season's campaign. Best of care given. Developed and campaigned successfully the Futurity stake winners North Star 2:11¼, Della Derby 2:11¼ and many others. Address

CHAS. WHITEHEAD, Pleasanton, Cal.

Ewes should be two years old before being bred.

The Finest Winter Training Track in America.

—THE— PLEASANTON RACE TRACK, Pleasanton, Cal.

There are about 50 box stalls in first-class shape, newly roofed, and ready for occupancy. Horsemen who intend to campaign their horses next season should not delay too long if they want to prepare them on this track, which is universally acknowledged to be the safest and best in existence. These stalls will not be vacant long. For further particulars apply to

H. E. ARMSTRONG, Proprietor.

HOMEPHONE PRAISED.

A new subscriber writes the Home Telephone Company under date of October 28, 1911:

"Please install a phone at my home. I did not know anything about the good points of the Homephone and was rather prejudiced against it until I began using it in my office. I use it all the time now, not only in phoning around the building, but getting outside numbers, because it saves me time and trouble. The Homephone delivers the goods.

"You know the burners of candles rioted in London about 500 years ago when gas was introduced. Most of us object to changes. Possibly that is the reason why I am so late in ordering a Homephone."

BAY CITIES HOME TELEPHONE COMPANY 333 Grant Ave., San Francisco.

CHICAGO FLEXIBLE SHAFT COMPANY, 204 Ontario St., CHICAGO

TWO GREAT SIRES.

The Bondsman

Reg. No. 37641

SIRE OF

Colorado E. (3) 2:04 3/4, champion 3-year-old of the world. Winner of the Matron, American Horse Breeder and Kentucky Stock Farm Futurities; second in Kentucky Futurity.

The Plunger (4) 2:07 1/2, second fastest-old stallion of 1910.

Grace Bond (3) 2:09 1/4, winner both divisions of Kentucky Futurity.

Creighton 2:08 1/4, record made in 1911.

Half brother to Jay Hawker 2:14 3/4, sire of Country Jay 2:05 3/4, Susie Jay 2:06 3/4, etc.

Half brother to The Tramp, sire of Bervaldo 2:08 3/4, Trampfast (2) 2:12 3/4.

Half brother to Sorrento Todd (4) 2:14 3/4, Belle Sentinel 2:15, etc.

BARON WILKES 2:18. Sire of 12 in 2:10, including Bumps 2:03 3/4, Rubenstein 2:05, Baron May 2:07 3/4; sired dams of 4 in 2:10.

SORRENTO Dam of Jay Hawker 2:14 3/4, Sorrento Todd (4) 2:14 3/4, Belle Sentinel 2:15, Eola 2:19 3/4, Lazy Bird 2:26 3/4, Teddy Sentinel, 2:29 3/4, The Tramp (sire), etc.

4th dam Virge—by Abdallah 15.
5th dam Lucy—by Highlander (Veech's).

GEORGE WILKES 2:22 Sire of 83, dams of 204.

BELLE PATCHEN 2:30 3/4 In great brood mare list.

GRAND SENTINEL 2:29 3/4 Sire of 23, including Nettle 2:16 3/4, Tosca 2:18 3/4.

EMPRESS Dam of 2 and granddam of 3.

HAMBLETONIAN 10 Sire of 40.

DOLLY SPANKER Dam of 1.

MAMBRINO PATCHEN 55. Sire of 25, dams of 162.

SALLY CHORISTER By Mamb. Chorister, dam of 2 in 2:20, etc.

SENTINEL 280 Sire of 8 in list.

MAID OF LEXINGTON By Mamb. Pilot 29.

ABDALLAH MAMBRINO Sire of 15, dams of 42.

BIG ELLEN By Clark Chief.

THE BONDSMAN 37641 THE BONDSMAN is the only stallion that sired three new 2:10 performers with race-records in 1910. In spite of the fact that he has no record, The Bondsman was a colt trotter of great merit. He was a contending colt all through the Kentucky Futurity of 1899, getting third money. This was a six-heat race and was won by Boralma. As a four-year-old he was not raced, but trotted a public trial in 2:11. As a sire he is destined to be the leading son of the great Baron Wilkes, founder of the greatest futurity winning family. He will make the season of 1912 at

Pleasanton Training Park. \$100 THE PATCHEN BOY 39033

Three-Year-Old Record 2:10 3/4 In a Winning Race.

Sired by the Great WILKES BOY 3803, sire of 107 in standard time.

A Genuine Race Horse and a Sire of Early and Extreme Speed.

The Patchen Boy 39033 is sire of the following:

- Francis J. 2:08
- Evelyn Patchen ... 2:10 3/4
- Scott Patchen ... 2:12 3/4
- Dessie Patchen ... 2:13
- Frank Patchen ... 2:13 3/4
- Ruby Patchen ... 2:13 3/4
- J. C. Patchen ... 2:14 3/4
- Legal Patchen ... 2:15 3/4
- Lucille Patchen ... 2:16
- Jerry Patchen ... 2:16 3/4
- Knightstown Belle 2:16 3/4
- Alice Williams ... 2:18 3/4
- Lois Patchen ... 2:19 3/4
- Auduous the Miller 2:19 3/4
- Dorothy C. 2:19 3/4
- Louise Patchen ... 2:19 3/4
- Dr. Warren ... 2:19 3/4
- Roscoe Ebbing ... 2:20
- Mary Patchen ... 2:20 3/4
- Black Patchen ... 2:20 3/4
- and 11 others in 2:30.

Dam Lady Clay, the dam of The Patchen Boy (3) 2:10 3/4, C. W. M. 2:24 3/4 (trotted to high wheels), Anglin Wilkes 2:16 3/4 over half-mile track, trial 2:09 3/4, by Metropolitan 1372, son of Hambletonian 10; second dam, Haggie Brown, by Ashland Clay; third dam, Pitty Pat, thoroughbred. The Patchen Boy was the greatest three-year-old race colt in the world, winning six straight races in the Grand Circuit the only year he was raced. His produce are good-headed and real race horses. (No tin cups.)

THE PATCHEN BOY is a beautiful black, 16.1 hands and weighs 1290 pounds. His colts are of fine size, great individuals and the kind that sell for the high dollar.

Season of 1912 at Pleasanton Training Park. Fee: \$50 Return privilege 1913

Both of the Above Horses Will Remain in California.

Best of care and attention given mares, but no responsibility assumed for accidents. Good pasturage at reasonable rates. For further particulars and full tabulated pedigree, address

JAS. D. JOHNSTONE,

Elmhurst, Alameda Co., Cal.

The Man Who has Come Back.

The host of admirers of what the veteran war horse of the shooting game—**The Hon. T. Bill Crosby**—has done lately with his 34-inch barrel Parker gun, will be glad to read the following, viz:

- In the Eastern Handicap . . . 100 out of 100 targets.
- In the Western Handicap . . . 492 out of 500 targets.
- In Evansville, Ind., Tournament . . . 395 out of 400 targets.

Making a continuous run of 987 out of 1000 targets

The only straight score ever recorded in the **Grand American Handicap** event was made with a Parker gun, scoring 100 out of 100 at 19 yards rise. Furthermore the same Old Reliable has won the **National Championship of America** every year it has been shot for.

For information regarding small bore guns, address the pioneer makers of the 20 gauge

Get Your Stallion's Picture IN THE Breeder's Special Number

OF THE
Breeder and Sportsman
WILL BE PUBLISHED
Saturday, March 9, 1912

It will have a handsome cover in colors, contain many illustrations and be replete with matter interesting to breeders and horsemen.

IF YOU OWN A STALLION

don't fail to advertise him in this number, as an advertisement in this issue will reach every owner of a good mare on this Coast.

IF YOU OWN A GOOD MARE

you will find this number interesting and valuable, as it will contain the stallion announcements, giving particulars as to description, pedigree, terms, etc., of all the best stallions on the Coast, and from these announcements you can decide on what stallion will nick best with your mare.

EVERY ONE INTERESTED IN HARNESS HORSES

will be interested in reading this number, as it will contain statistics, news, and articles that will make it entertaining reading and valuable to preserve as a work of reference.

AS AN ADVERTISING MEDIUM

not only for stallions, but for general advertisers who wish to reach the Horsemen, Horse Breeders, Farmers, and those who are interested in Field Sports, it will be particularly valuable.

OWNERS OF STALLIONS

who wish illustrations of their horses to appear in this issue should have photographs prepared without delay and send in their orders for space. Write for price and particulars to

BREEDER AND SPORTSMAN,

San Francisco.

RESULT OF OVER A CENTURY'S EXPERIENCE.

Perfection in powder-making is only achieved by exercising the most scrupulous care in the selection and preparation of raw materials, employing skilled workmen exclusively, and using only the most improved modern mechanical equipment.

This is the **DU PONT** method and accounts for the unequalled reputation among sportsmen enjoyed by the **DU PONT** brands of

SMOKELESS SHOTGUN POWDERS

One of the most popular of these brands is

A dense powder that is absolutely uniform in velocity and pattern. Waterproof—not affected by extremes of heat or cold. "Infallible" SMOKELESS SHOTGUN POWDER will not pit the gun barrels.

Unequaled for Field and Trap-Shooting.

See that your shells are loaded with **INFALLIBLE**. Send to-day for Infallible Booklet No. 99. It gives best loads for various kinds of game and other information of value to shooters. It's free.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

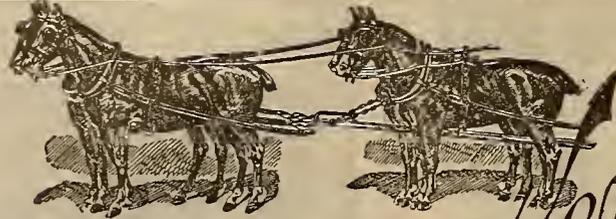

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

AN UNBEATEN RECORD!

TARGETS SHOT AT
4280

97.28 per cent

TARGETS BROKEN
4164

This is the percentage with which **Mr. J. S. Day** won the 1910 OFFICIAL HIGH AMATEUR AVERAGE—a percentage never equaled by an amateur and exceeding by exactly 1 per cent the figures of the 1911 winner, who, moreover, shot at only 2100 targets. Mr. Day's wonderful shooting was done with

Peters FACTORY LOADED SHELLS

The Lion's Share of the 1911 Amateur Honors

Was also won with **PETERS SHELLS**, for they were used either exclusively or for the most of their shooting, by 5 out of the 10 High Amateurs.

THE PETERS CARTRIDGE COMPANY, CINCINNATI, O.

New York: 98 Chambers St., T. H. Keller, Mgr.

New Orleans: 321 Magazine St., E. F. Leckert, Mgr.

WINCHESTER

Repeating Shotguns and Shotgun Shells

WIN THE OFFICIAL AMATEUR SEASON'S AVERAGE.

Dr. W. S. Spencer of St. Louis, Mo., won the Interstate Association's contest for The Amateur Season's Average for 1911. He shot at 2100 targets in various tournaments, scoring 96.28 per cent. In winning this great trap shooting honor Dr. Spencer shot a Winchester Repeating Shotgun and Winchester Shells. His record is conclusive proof of their strong and uniform shooting qualities. Dr. Spencer's victory and the winning of the Professional Season's Average for 1911 by J. R. Taylor with a Winchester Repeating Shotgun and Winchester Shells, emphasizes the wisdom of shooting the make of guns and shells that always helps and never handicaps skill. Their conspicuous winnings show that Winchester guns and shells are of this kind.

THE WINCHESTER COMBINATION WAS SUPREME IN 1911.

Velocity, Pattern, Penetration !

That's Why **SELBY LOADS**

Are **Consistent Winners.**

Not only in 1911 but for years past the Amateurs—the men who pay for their guns and ammunition—have shot **SELBY LOADS** and **WON CONSISTENTLY** at every shoot on the Pacific Coast.

REMEMBER—WITH **SELBY LOADS**

LOADED ON THE PACIFIC COAST.

The Standard Trotting Stallion

Bon McKinney 51480

3-y.-o. Rec. 2:24¼. 3-y.-o. Trial—half, 1:05; mile, 2:15.

By BON VOYAGE 2:08

(fastest mile ever trotted in a race by a stallion in California);

dam, Daphne McKinney (also dam of Frank N. 2:07¼, the only other one of her get ever trained) by McKinney 2:11¼; second dam, La Moscovita (dam of Bon Guy, 3-y.-o., 2:11¼, Yolande 2:14¼ and Tina 2:20¼) by Guy Wilkes 2:15¼; third dam, Moscova 2:28½ (dam of Mamie R., 3-y.-o., 2:15½, and Oro Belmont 2:15¼) by Belmont 64; fourth dam, Mosa (dam of 5 in the list) by Woodford Mambrino.

BON McKINNEY 51480 (3) 2:24¼ is a beautiful bay horse and is in every respect a magnificent individual, possessing size, style, quality, intelligence and frictionless trotting action. With little work as a yearling he trotted a quarter in 35 seconds and a half in 1:15. The next spring as a two-year-old, with 2½ months' work, he worked a mile in 2:19¼, a half in 1:08 and a quarter in 33 seconds. Having no stake engagements, he was taken out of training after making this wonderful showing for a two-year-old. There is no doubt he could have trotted a mile in 2:12 that year had he been worked until fall. As a three-year-old he was given a record of 2:24¼, which is no mark of his speed. Mr. Ted Hayes trained him and says that he considers him the best colt he ever trained and firmly believes that he will not only make a great race horse, but a great sire. As a two-year-old he was bred to ten mares and got nine foals, and everyone who has one of his get is confident that he has the best foal on the Coast. Bon McKinney combines the best of the Electioneer-McKinney cross. His dams are all in the great brood mare list, every one being a producer of speed. He is a young horse and has already commenced to make his mark in the world, and now is the time to breed to him and take advantage to get something exceptionally good at a reasonable price. Study his pedigree, come and see him, and you will be sure to send your mare.

Season of 1912 at the RACE TRACK, SAN JOSE, CAL.

TERMS: \$40 for the Season. Usual return privilege.

Good pasturage and the best of care taken of mares in any manner that owners may desire at reasonable rates, but no responsibility assumed for accidents or escapes. Address JOS. TWOHIG, Manager, Race Track, San Jose, Cal.

JERALD'S Latest and Best Sulky

NOTHING BETTER AT ANY PRICE.

| THE PATCHEN BOY 2:10¾ | Chas. L. De Ryder, Pleasanton |
| TOM SMITH 2:13¾ | P. F. Davey, San Jose |
| WM. HAROLD 2:13¾ | James D. Johnstone, Elmhurst |

THE passage of the registration license law at Sacramento has some good features if the provisions of that law are enforced and every animal for which an application for a license is made is adjudged sound and free from hereditary diseases and ailments as set forth by its requirements. That part of it is commendable; no fair-minded man can find fault with it, but the question of designating whether a horse is "pure-bred," "non-standard," or "mongrel," is one which should never be introduced, and it would not be if the wise legislators who advocated this bill had consulted some one who had made a study of the registration of standard and registered horses. In the first place, horses are not "pure-bred." We have thoroughbreds, but they are the results of a mixture of various racing families which traced to three—Eclipse, Herod, and Matchem—horses that lived over a hundred and fifty years ago.

Trotting horses are, as everyone knows, a "made breed." By judicious mating a number of families have been created which have representatives that trot fast. They have lost all their speed as running horses, if they ever had any. They are not "pure-bred," even though they may have descended from the Morgans, the Clays, the Mambrinos, the Hambletonians, or thoroughbreds. But that is not where the trouble lies. In defining what horses should be licensed there should have been more care given to the classification of stallions that are many removes from being "mongrels," yet they are now, according to this law, designated as such. For instance, they should have stated that any stallion which has a standard record and is sired by a standard and registered horse is eligible as a standard stallion. According to the rules adopted by the American Trotting Association there are two distinct ranks, standard trotting and standard pacing, and there is need for another rule which would relieve breeders of a great deal of anxiety, and the absence of this rule places horses like Uhlan 1:58¾, Aerolite 2:07½, Moortrix 2:07½, Charley D. 2:06½, and hundreds of others in the class called "mongrels," according to the laws of licensing as adopted by the last Legislature. For instance, take Aerolite, a pacer; he was by Searchlight 33657 (a registered trotting stallion), out of Trix (dam of six), by Nutwood Wilkes 22116 (a registered trotting stallion); second dam Trixy, by Director 1989 (a registered trotting stallion); third dam Mischief (dam of one), by Young Tuckahoe 2:28½, non-standard. Mischief is registered as non-standard, and that places Aerolite outside the rule. For it says:

"Rule 2. A stallion sired by a registered standard trotting horse, provided his dam and grandam were sired by registered standard trotting horses, and he himself has a trotting record of 2:30 and is the sire of three trotters with records of 2:30, from different mares."

That is, if he was to be registered as a standard trotting horse, but he happens to be a pacer. The rule in regard to pacing stallions reads:

"Rule 2. A stallion sired by a registered standard pacing horse, provided his dam and grandam were sired by registered standard pacing horses, and he

himself has a pacing record of 2:25, and is the sire of three pacers with records of 2:25, from different mares."

Aerolite has a record of 2:07½, but his sire is a registered standard trotting horse, and his dam and grandam were sired by standard trotting sires. Hence, according to these rules, he is ineligible.

Take Uhlan 1:58¾, the fastest trotting gelding in the world. He was by Bingen 29567, dam Blonde, by Sir Walter Jr., second dam Brunette, by Black Eagle, non-standard. He is also a "mongrel," according to our California law, but somehow everybody would like to have mongrels of his type.

There ought to be some changes made in the registration laws so that a horse getting a record of 2:10 or better that sires two or more with records better than 2:20, be they trotters or pacers, should be considered standard, provided he is by a standard stallion (trotting or pacing), and out of a mare by a standard horse (trotting or pacing).

Everyone recognizes the fact that the majority of our standard bred trotting sires beget pacers and many of our fastest pacing stallions sire trotters. There should be a law to include such produce, and especially if these are record holders.

The enforcement of this law in California may be the means of calling the attention of the officials of the American Registration Association to its erroneous rulings, which work a great hardship on breeders and are detrimental to the very best interests of the trotting and pacing horse breeders.

In the meantime, owners of broodmares should not hesitate to breed their mares to such remarkably good, game stallions as Charley D. 2:06¾, Aerolite 2:07½, or Moortrix 2:07½. They will become sires when many a horse which has the hallmark of registration as standard attached to his name is put on the shelf, there to remain unheard of and forgotten.

THE MEETING of secretaries of the fair and racing associations of the North Pacific Circuit, which was held at Walla Walla, February 1st, was one of the best of its kind ever called. Shirley Christy represented the interests of the Pacific Coast Circuit, and was ably seconded by Mr. H. S. Rolston, of Vancouver, B. C. The question of dates was quickly settled after the delegates from the State Fair of Oregon were convinced that it was to the best interests of the horse and stock men that the dates at Salem should agree with the resolution passed at the meeting of the delegates to the Pacific Coast Circuit, which are September 2d to 7th inclusive. The consensus of opinion was that the formation of this continuous circuit of the leading fairs and race meetings was the best ever devised for the benefit of all concerned. All owners who did not care to follow this big circuit had meetings provided for them at this convention, such as at Walla Walla, North Yakima, Spokane and Boise. Besides this, a two nation association was arranged, including Manitoba, Saskatchewan, Alberta, Montana, Utah and Idaho. The purses will aggregate \$200,000 at these northern meetings.

In about three weeks another meeting of secretaries and delegates of the fair and racing associations in California and the directors of the Pacific Coast Association, will be called in this city, when further details will be given and final preparations made toward getting this circuit under way. Shirley Christy, who is at present in Phoenix, Arizona, spent three days at Los Angeles, where he interviewed the directors of the association there, and, from present indications, horsemen can look forward to the best season's racing on this coast ever held. Everybody realizes the importance of having a continuous circuit for many reasons and when arrangements for it are completed there will be no dissenting opinions.

STALLION OWNERS have been a little slow about advertising their grandly bred horses this year, but those who have done so are more than pleased, for many inquiries have been coming to them from owners of broodmares. These owners should, if possible, go and see the stallions they have selected on their bloodlines and compare them as individuals with their mares, and also take the pedigrees and see how they combine. That is the way the most successful breeders of thoroughbreds achieved fame and fortune. They did not breed all their mares to one stallion because they owned him. Some mares "cross" better and more successfully with stallions which represent a different line from the sire they own. In the Eastern States it is no uncommon thing to see our latest up-to-date students of trotting horse

breeding send a mare or two many hundreds of miles to be bred to some horse they had seen whose bloodlines they believed would cross well with the mares they wanted to get futurity stake winners from. If Senator Stanford had pursued this policy and exchanged stud services with Wm. Corbitt, G. Valensin, Monroe Salisbury, I. Ayers, L. J. Rose, H. Pierce, or any of the other leading breeders, there might have been a vast increase in the number of good ones that would claim Palo Alto for a birthplace. Many a service was wasted on mares at that big farm because no one seemed to realize that other stock farm owners had stallions that would be perfect mates for these Palo Alto mares. Our present-day broodmare owners are all "small breeders" and they cannot afford to follow such unsatisfactory and unprofitable methods. They must study, investigate, decide, and use their best judgment in this work, as it means considerable to them, for in a great measure their decisions on this breeding problem will affect the produce of all horses and mares which trace to their mares for generations.

OUR NEW ZEALAND LETTER.

Christchurch, N. Z., Jan. 11, 1912.

Editor Breeder and Sportsman:

Amongst the competitors at the Canterbury Park (N. Z.) recent meeting was the American bred mare Bonny Jenny, by Bonnie Direct, owned by Mr. Alfred Lawrence. She was not half fit, having only been in work a few weeks, and, under the circumstances, her two displays were decidedly creditable. On the first day she showed a lot of pace in the Templeton Handicap, but spoiled her chance by a bad break. On the second day she went much better, finishing a good second to Mallet in the Progressive Handicap, after getting over the two miles in 5:10.

Glendalough, a full sister to Dan Patch 2:11 (N. Z.), was a competitor in the Champion Handicap at the Canterbury Park meeting on January 2d, but after misbehaving herself at the post was ordered back to the paddock by the starter on account of her erratic behavior. The Rothschild filly has a rare turn of speed, but has been spoiled by incompetent handling. Betel Nut, who won the Plumpton Handicap at the Canterbury Park meeting (N. Z.) on January 1st, is a half brother to the champion King Cole 2:08 3-5. He is the best of Peralta's stock that have raced so far, and, like King Cole, is trained by Newton Price. Peralta was by McKinney 2:11¾.

During the Christmas and New Year holidays a large number of trotting meetings were held in New Zealand, and all were well attended with splendid results. Twelve months ago followers of light harness racing had both the totalisator and bookmakers at their service as mediums of speculation, but since then the calling of a bookmaker has been made illegal by legislation. As a result the totalisator receipts at all recent meetings have shown from 50 to 100 per cent increase and the clubs have benefited accordingly.

The Auckland Trotting Club, the second largest in New Zealand, had a most successful three days' meeting at New Year's time. No less than \$164,470 was speculated on the totalisator, and, as the fields were fairly large, the northern club will come out of its liabilities with a handsome surplus.

The stallion Young McKinney, by Seymour Wilkes 2:08½, who was sent from America to New Zealand with a "faked" pedigree, had a couple of winners at the Auckland Trotting Club's summer meeting in Alf. McKinney and Master Park. Both can muster up a lot of pace and are sure to do much better in the near future.

Notwithstanding the prosperous times they have been having lately, the principal Canterbury Trotting Clubs have not given a commensurate increase in stake money. This has caused a lot of ill feeling in the ranks of owners, who, at a recent meeting, decided to boycott the next race meeting of the New Zealand Metropolitan Trotting Club, unless better prize money be offered. It is quite likely that a compromise will be effected.

A strong agitation is being raised by many New Zealand owners of light harness horses in favor of free-for-all racing. They contend that there are so many horses capable of going a mile between 2:15 and 2:20 that every big club should provide at least one free-for-all for this class of horses on its future programs.

No more popular athlete has ever visited New Zealand than Maurice McLaughlin the young San Francisco tennis player, who, with Beales Wright and W. Larned, made a futile attempt to wrest the Davis Cup from the Australasians. His quiet demeanor both on and off the field of play earned him the respect of all, while the brilliant exposition of tennis given by him in both singles and doubles evoked the enthusiasm of the crowd. If America is ever to lift the coveted cup, it is to men of McLaughlin's stamp rather than to veteran players such as Wright and Larned, that she will have to look to. Norman Brooks is the admitted tennis champion of the world, but whereas he defeated Beales Wright comfortably, it taxed his resources to the utmost to account for McLaughlin on the third day of the competition.

Sincerely yours,
FRED THOMAS.

M. C. Keefer's well-bred stallion The Proof 2:29¾ will be bred to twenty mares this season, and his book is almost full.

PLEASANTON'S BIG ATTRACTIONS.

The Greatest Collection of Famous Horses Ever Stabled at This Historic Track.

It is as natural for horsemen visiting California to desire to go to Pleasanton as it is for tourists to Philadelphia to want to see the old State House, the Liberty Bell, and the room wherein the Declaration of Independence was signed. Horsemen have heard of Pleasanton since 1882, and almost every year some horse has gone away from that track and achieved the very highest honors, either as a money-winner or a record-breaker. Its fame extends to the limits of civilization and its name is linked with that of the histories of some of our greatest turf and track performers. About twenty years ago Palo Alto, San Mateo, and G. Valensin's stock farms were the stellar attractions; but one by one they passed out of existence when their owners died. Even in those days the Pleasanton Stock Farm, owned by Monroe Salisbury, was the birthplace of many good ones, and this track was the pathway over which they took their lessons under the watchful eye of the "King-maker." Not only did this good man make trotters, but he also schooled trainers and taught horsehoers their business. We shall never see his equal in this respect. Some men can take two or three horses and get them ready for racing, Monroe Salisbury could handle fifteen just as easily and no two of them be trained alike. Many of the old stalls out of which he used to say he could "lead more speed than any man in America could out of a stone barn" have been torn down, but there is quite a number left that once were occupied by some of the most famous trotters and pacers whose names grace the pages of trotting horse history as sires and dams of standard performers. Some of these stalls are filled at present by horses which are being prepared for the race meetings on the Canadian, Grand, and Pacific Coast Circuits. They belong to that prince among millionaires, R. J. MacKenzie, of Winnipeg, and are in charge of the noted trainer and reinsman, Havis James.

The first one looked at is a dark bay stallion, not a very large, but a strongly made son of The Exponent 2:11½, by Bingen 2:06¾, he is called The Earnest, and as a two-year-old last year got a record of 2:21¼. He is very well bred, his dam being Mandella, by Del Mar 13313, grandam Label, by Gen. Washington 1161, great grandam Lady Banker 2:23, by Hambletonian 10. Mr. MacKenzie purchased him shortly after he made his record, and as this colt is heavily engaged in a number of futurities and stakes, it is not claiming too much to say that whoever defeats him will have to keep "mighty busy from wire to wire."

March McEwen 2:08¼ is a peculiarly marked chestnut pacing gelding with dashes of white splashed over his coat, legs and face, which give him the appearance of a "calico horse." He started in thirteen races in 1909 and won nine of them. Last year he was "laid on the shelf" by sickness, as were the balance of Mr. MacKenzie's horses, with a few exceptions. This year, however, he looks good and will be ready when the races are called. He is by Fred S. McEwen (son of Fred S. Wilkes 15278), out of Cleo, by Rattler Brooks:

In the next stall is the coal black stallion Zomblack 2:26½ (trial 2:08¾), by Zombro 2:11, cut of Madeleine Marshall (also dam of Zoblack 2:24½), by Demonio 2:11¼; second dam Mamie Comet 2:23½, a great broodmare by Nutwood 2:18¾, the "king of broodmare sires." Zomblack has received careful training and is one of the best mannered horses in the string, and, eligible as he is to so many classes, should win a goodly share of the purses this year.

Vernon McKinney 2:02, with this kind of a record to his credit: 2:03, 2:02, 2:02¼, was the "mainstay of the string" in 1911, but meeting with a slight accident while jogging preparatory to a race, Mr. James deemed it advisable to at once throw him out of training and save him for 1912. He is getting "right as rain," as the Englishmen say, and shows no sign of lameness. When the bell taps he will be ready, and from what he has shown will come nearer reaching the championship record than any horse bred in California. He is the first "green" pacer bred here to start to the races without a mark and come home with a record as low as the one he earned in a hard-fought race.

In the next stall is Joe Patchen II, a "gentleman" of the first school if there ever was one. He was sired by Joe Patchen 2:01¼, out of Bessie Bonehill 2:05¾, by Empire Wilkes 3198; second dam Arab Girl (dam of Sukharte 2:28½ and the sire Crittenden 433); third dam Saieda Bashaw, by Bashaw Jr. 2:24¾, by Green's Bashaw. He has a record of 2:17¼, but, if he had not been the unfortunate victim of a railroad accident on his way East last May, he would be well up among the 2:02 performers. Either in repose or action he is one of the grandest and most impressive types of a stallion one can become enthusiastic over. He was bred to several mares last season, but this season will not be allowed to serve any. He won seven consecutive races on the ice in Canada, and wears nothing but his shoes. No boots, nor toe weights, and in action he is the true exemplar of "poetry in motion."

Judge Blaine, by Trampfast 2:12¼, dam Emma Conductor 2:21¼, by Conductor 12256; second dam Racket, by Egbert; third dam Silence, by Abdallah 15; fourth dam Woodbine, by Woodford. He is well enough bred to suit any judge of pedigree and as an individual is a credit to his ancestry.

Merry Widow 2:03¾ is a sweet little mare. She won seven out of eight starts in 1910 and in 1909 she started in thirteen races and was declared the winner in all of them. She is by Red Pac 2:16½ (son of Pactious 9102 and Kitty Clover, by Redwald 178,

etc.), and her dam was Bonnie, by Sam Wilkes Jr., a horse little known as a sire, but undoubtedly well bred. Merry Widow was taken sick in the East shortly after her arrival there last summer, and for a time it was thought her case was hopeless, but Mr. James being one of the most competent horsemen in the business, never despaired; finally she recovered, but too late to start in any of the races she was named in. She is doing nicely, and if not afflicted with any more ailments will prove that this long resting spell will make her faster than ever.

Another mare here that does not suffer by comparison with the balance in these stalls is the bay mare Dariel that Chas. De Ryder purchased from W. A. Perley, of Chico, about two months ago. She is a racy-looking, determined-going mare and very pure gaited. In Mr. James' hands she will overcome all peculiarities she may have and when the results of the races in which she takes part are announced her name, like Ahou Ben Adam's, "will lead all the rest." She was sired by Arthur Wilkes 2:28, out of a mare by Whips 2:27½; second dam by Antevolo 2:19½; third dam by Winthrop, etc. She is bred to "go the route" and trot until sundown.

There is a two-year-old chestnut filly by Hedgewood Boy 2:01, in the next stall, which must be close to sixteen hands high, very symmetrically made, and a pure trotter. She is so growthy nothing has been done with her, and as she is one of the latest acquisitions to the stable, I believe it will pay to wait a little for her.

Bert Kelly, this is the horse the boys at Stockton used to sing about, and the air of that well known tune, "Has anyone here seen Kelly?" still echoes at the race track. Bert was another "prospect" that came near "pinching out" in the East last summer. No one thought he would live, but good care and the best of veterinary skill pulled him through, and, ere the snow falls, Bert will be in the 2:10 list. He is well thought of as a trotter and his gameness is unquestioned. He was sired by E. D. Digges' well-made stallion McAdrian 2:24, and his dam was by Mountain Boy 4841; grandam by Joe Daniels, one of our famous four-mile winning thoroughbreds.

Peter Preston 2:06½, by Peter the Great, is another added feature to this stable of attractions, he got his record last year and will as surely lower it this year as any horse here. These Peter the Greats are noted for doing better ever time they start, and this fellow is bred to do so. His dam was Tosa 2:19¼ (dam of 5), by Enfield 2:29; second dam Susie G. (dam of 2), by Scipio; third dam Mary M. (dam of 4), by Bassinger; fifth dam Molly, thoroughbred, by Hamlet, son of Consul, etc.

One Better (2) 2:24½, by Nearest McKinney 2:13¾, out of Much Better 2:07¾, by Chas. Derby 2:20, has developed into a good-looking horse, and as a pacer in the 2:25, or faster classes, he will be a valuable member of this string. He only started once last season, but did not lower his record.

St. Thomas 2:19¼ is a bay trotting gelding by Wood Wilkes that much is expected of this year. In 1910 he won five races.

The Canadian pacer Starbrino 2:10¼ was next led out. He is a large, strong-made gelding, and has quite a record as a consistent race horse. He started in twelve races and won them all, four of these being won in six days! His sire is Wildhrino 2:19½ (son of Hambrino 820), dam Mad River Belle 2:17¾, by King of Belair 7530; grandam Losonite, by Currency 3709.

In an adjoining stall is a green five-year-old pacing gelding by Directly 2:03¼ that was bought in one East last fall. He is reputed to have shown fast trials and before he is taken East Mr. James will learn all about his speed and whether the tales told about him are true.

There's another newcomer to this string called Bill Scott, by Red Medium, out of a mare by Alcyoner. He is a trotter.

J. C. Simpson 2:17¾, by San Mateo, is a four-year-old that won nine races and is a credit to the man he was named after.

Alvivilola, by Libretto, is a very promising trotter, he is also a recent purchase.

Harry Direct is the name of an unmarked pacer by Direct 2:05½.

Panboy 2:12½, standing in the stall adjoining these, is one of the ideal pacers we read so much about but seldom see. He has the sweetest disposition imaginable in or out of harness. Never pulls nor lugs on the bit; always ready, a cheerful driver, wears no boots, and his record is nowhere near what he is capable of making. Panboy has been driven over this track by Mrs. MacKenzie a mile in 2:15½, last quarter in 30 seconds, and it seemed no effort for her. This pacer was sired by Pangold (a son of the great sire Pancoast), out of a mare by Hennepin Boy, son of Strathmore.

Last, but by no means least, to be inspected was the latest addition to this stable of "attractions." El Zombro, a fine-looking son of Zombro 2:11, out of Bloom, by Nushagak. In harness, this coal black son of the greatest of McKinney's sons is a show animal, and as a trotter he is destined to be one of the brightest stars in this constellation of brilliant ones. He is a pure-gaited trotter, and everybody who knows Mr. Alex Brown, of Walnut Grove, who bred this fellow, will take a greater interest in the welfare of this collection of horses than ever, because this good-looking, well-bred colt is included in it. That he will "make good" everybody who has seen him, is confident.

Greenebaum 2:22¼, by Red Medium, is also in this string; he belongs to D. J. McDonald, of Winnipeg, who also owns the handsome trotter Kalatan, by Kinney Lou 2:07¾, out of Cricket 2:10, the first pacer to get in the 2:10 list, and, since being retired

to the breeding ranks, has proven to be one of the greatest of broodmares.

Harry Direct, Starbrino 2:10¼, and Peter Preston 2:08¾ belong to Mr. A. C. MacKenzie, of Winnipeg.

Messrs. Havis James and Geo. H. Spencer are getting their horses ready and taking their time to harden them up, and in a month from now will begin moving them along. Two more industrious or careful men cannot be found on any track; they have devoted the better part of their lives to the training and development of trotters and have as assistants men they can rely upon to do their work properly. This combination is a strong one, and with the material they have to work with, it is the earnest hope of every one who has visited Pleasanton and talked with them that they will never have a repetition of the series of misfortunes which befell them during the racing season of 1911. Mr. R. J. MacKenzie, the owner, is not one to give up in the face of trouble, and his pluck and determination to stick to the game, notwithstanding his pecuniary losses as well as great disappointments of last season, have made countless friends and admirers for him wherever trotters are known. He is better equipped now to grapple with every racing proposition than ever, and the best wishes of all interested in trotters on this Coast will accompany these horses and their trainers whenever they start.

BONADAY STOCK FARM.

Mr. Shirley Christy, secretary of the Arizona Territorial Fair visited the Bonaday Stock Farm, Frank E. Alley, proprietor, at Roseburg, Oregon, last week, and speaks most enthusiastically of the place, its improvements and trotting stock. The premier stallion there is Bonaday (2) 2:27½, one of the finest looking and best bred sons of Bon Voyage 2:08, his dam being Welladay (sister to Klatawah 2:05¼, Chas. Derby 2:20, etc.), by Steinyaw. The colts and fillies by this horse are remarkable for their uniformity of conformation, color, and action.

Count Boni is a full brother, a year younger, no record, and is a remarkably handsome stallion.

Sonoma Boy (2) 2:20 is a full brother to that great stake winner Sonoma Girl 2:04¼ and his progeny show that they inherit his splendid disposition, beautiful conformation and phenomenal speed.

Sitka Boy is a coal black four-year-old stallion by Greco B. (son of McKinney 2:11¼ and Alein, by Anteo 2:16½, etc.), out of Oniska (dam of San Francisco 2:07¾), by Nutwood Wilkes 2:16½; second dam Bay Line, by Direct Line; third dam Puss, by California Nutwood. Sitka Boy was worked a little last year before going to the mile track to get ready for the races. He stepped the half-mile track in 2:29, last half in 1:11, last quarter in 34 seconds. He is doing so well now that Mr. Alley has reason to believe he will get a low record this year.

Roseburg Boy (3) 2:21 is a brown gelding by Diawood, out of Lady Lemo, by Memo, that was just beaten a scant head by Ruby Light in 2:15, at Salem, with the track several seconds slow, last year.

The next one looked at is as good a "prospect" as there is on this Coast. He is called Michael Angelo, his sire is Sonoma Boy (2) 2:20, and his dam is Angelina Boswell, by Hart Boswell. He is fast, good-headed, game, and gaited like Sonoma Boy.

This farm's representative in all the Coast Futurities of 1912 is Boniske 57034, by Bonaday, out of Oniska, a slashing good-looking black two-year-old trotter and one that will prove he is worthy of his breeding.

Phyllis Wynne 2:15, by Bon Voyage 2:08, is out of Mabel Wynn 2:21½, by Zombro 2:11, that was conceded to be the handsomest mare in Oregon. Phyllis Wynne will be among the 2:10 trotters this season.

Belle N. Norton, by Bonnie Direct 2:05¼, out of Petrina, by Piedmont 2:17¼, had a bad leg last year early in the spring, but it was fired and she is now apparently sound. Has shown a mile over the Salem track in 2:11, last quarter in 30½ seconds.

Diavola L., by Diabo 2:09¼, cut of the great broodmare Lily Langry, by Nephew, is a "green" pacer, but will be about "ripe" when the bell rings.

Many people have been very much interested in the photographs of the youngsters which were taken at the State Fair, Salem, last year, others have seen the little ones on the farm, and to gratify their wish as to how they were bred, Mr. Alley kindly sent the following list of foals of 1911:

Douglas O., bay colt, foaled April 6; by Bonaday; dam Edie G. by Greco B. Has trotted one-eighth in 25 seconds.

Bonniola, bay filly, foaled April 15; by Bonaday; dam Adiola Mack by McKinney. Has trotted an eighth in 25¼ seconds, one-sixteenth in 11 seconds.

Allie Black, black filly, foaled May 1; by Bonaday; dam Anita by Captain McKinney. Has trotted an eighth in 26¼ seconds.

Bon Diablo, sorrel colt, foaled May 11; by Bonaday; dam Diavola L. by Diablo. Has trotted a quarter in 46 seconds.

Patricia Oregonia, bay filly, trotter, foaled February 10; by Bonaday; dam Angelina Boswell by Hart Boswell.

Valen M., sorrel filly, pacer, foaled April 4; by Bonaday; dam Diabella C. by Diablo.

Miss Bonaday, bay filly, trotter, foaled May 2; by Bonaday; dam Minnie H. by Mulligan.

Bon Cupide, bay colt, trotter, foaled May 4; by Bonaday; dam Diona A. by Cupid.

McKinney Bird, bay roan colt, trotter, foaled May 10; by Sitka Boy; dam Saconne Hal by Pilot Hal.

Princess Bonaday, black filly, trotter, foaled May 19; by Bonaday; dam Oniska by Nutwood Wilkes.

Miss Welladay, brown filly, trotter, foaled June 5; by Everette; dam Welladay by Steinyaw.

Bonnie June, black filly, trotter, foaled June 19; by Bonaday; dam Fortuna G. W. by Guy Wilkes.

Bon Greener, brown colt, trotter, foaled July 6; by Bonaday; dam Maud Greener by Greco B.

Bon Bouret, bay colt, foaled April 7; by Bonaday; dam Maud Stambouret by Stamboul. Has trotted an eighth in 27 seconds.

WILL BREED TROTTERS.

Lexington and central Kentucky now gives promise of becoming as widely and favorably known as the breeding place for trotters as it enjoyed as the center of the thoroughbred breeding world several years ago. So great was the interest shown in the stock farms by visitors to the fall races here last year and so closely were all the details of an up-to-date breeding establishment inspected, and numerous questions asked the owners as to the conducting of such an establishment by wealthy Easterners, that it was then predicted that before another year closed there would be many new recruits in the field, and Lexington and vicinity would be the central point of their operations.

The first of these recruits arrived upon the scene in the person of the New York turfman, David M. Looke, who purchased the famous Castleton farm of James R. Keene, and announced that he would change the place into a nursery for trotting horses. Then W. H. Dickerman purchased a small farm, and now General C. C. Watts, of Charleston, W. Va., is on the lookout for a place to remove his mares, some seventy-five in number, and to establish a breeding plant, with his grand young stallion, General Watts, three-year-old record 2:06½, at its head. Senator Joseph W. Bailey has again signified his intention of entering the game, and has already begun to get together a band of choice young broodmares.

This sudden exodus to Kentucky is credited to the purchase of the Kentucky Trotting Horse Breeders' Association by a New York syndicate, and the number of changes made in the conduct of the affairs of the association, especially in the changing of the three-year-old Kentucky Futurity from a three-in-five heat event to a two-in-three. This race is the richest event of the American trotting turf to-day, and it is the desire of all horsemen to own a winner of this prize, not only for its financial value, but because the winner is declared the champion three-year-old of the year.

Usually the race is a hard-fought one and requires from four to six heats to decide. When three-year-olds trotted around 2:20 this was considered no hardship, but when a horse of that age is required to go a mile better than 2:08 in order to win, owners and veterinarians say it is too much to ask of the youngster to go four or five miles at this rate of speed, and that after a hard-fought battle of this kind a horse was returned useless for racing ever after. The American Trotting Association took this view, and requested the Kentucky Trotting Horse Breeders' Association to change the old-time three-in-five heats to the more modern three-heat event. This they refused to do, and many of the wealthy breeders, including Senator Bailey, refused to nominate their mares until such a change should be made.

When the Eastern syndicate bought the track it was understood that the change would be made at the first official meeting, and millionaires who had long had their eyes upon the rich classic began to look around for promising and richly-bred young broodmares in the hope of securing the dam of a future Futurity winner, and as the majority of the Futurity winners are bred in Kentucky they naturally look toward that State as the proper place to establish their farms.

Besides the four establishments mentioned above, there are now upward of fifty trotting horse farms in this vicinity, among the most noted being John E. Madden's Hamburg place, the home of the Futurity winner Silko, the Native, and others; W. E. D. Stokes' Patchen Wilkes Farm, the home of Peter the Great, which horse has sired more Futurity winners than any other sire in the world; L. V. Harkness' Walnut Hall Farm, the home of Moko, known as the sire of Futurity winners, and Walnut Hall, sire of The Harvester, and himself a Futurity winner; Warren A. Bacon's Maplehurst Farm, the home of Locanda 2:02; R. C. Estill's Elmhurst Farm, the home of the Futurity winner Kentucky Todd, and sire of the Kentucky Futurity winner of last season, Princess Todd, and Atlantic Express, which good winner of last season will be in the stud; W. W. Estill's Elmwood Farm, and numerous other smaller places each with two or more stallions and from ten to fifty mares.

THE HORSEMAN \$20,000 FUTURITY.

The richest of all newspaper Futurities on a most liberal system of entrance is advertised in this issue and appeals to every owner of a broodmare. It is for foals of 1912 and is guaranteed to be worth not less than \$20,000. Entries will close Friday, March 15, 1912, when the first payment of two dollars will be due on each mare nominated. Then on November 1st a payment of \$5 is to be made, and an additional \$5 will be required May 1, 1913, and no further payments until year of race. Entry blanks for this great event may be obtained at this office. There is a four-year-old trotting division, which is a new feature and one that should be appreciated. No one who owns a good mare can afford to let this opportunity pass, for an entry in this stake enhances the value of every colt or filly, and brings the youngster into greater prominence as well as placing it in a position to win a large sum of money on a small investment.

Regarding transportation facilities on the Pacific Coast Circuit, would it not be a good idea to adopt the plan in vogue last year on the Michigan Short Circuit? The managers of this chartered a train of cars and had it for thirteen weeks. Every horse had his stall in it and the expenses were reduced to a low figure. It was better for the railroads and also for the horsemen.

A LITTLE HUMBOLDT BAND.

Dr. Rae Felt, of Eureka, Humboldt county, has over thirty head of trotters and pacers headed by his stallion by Star Pointer 1:59¼, out of Edith 2:10, by Dexter Prince. He also has the only grand daughter of the thoroughbred Imported Sain on the Pacific Coast. She was sired by Bonnie Direct 2:05¼, out of this Sain mare; second dam Morgiana by Gen. Benton. Dr. Felt says there is no road too long for her and a more cheerful driving mare a man never sat behind. There is another mare here, Telltale, that created quite a sensation on the circuit in 1910. She is a peculiarly spotted red roan with white markings which she undoubtedly inherits from a mare that Dr. Felt's father purchased from some emigrants who had her hitched in a team in front of a "prairie schooner" in the early fifties. She was called Old Jude and was like the famous Opelousas horses that came from Louisiana and were undoubtedly descendants of the Arabians and Andalusians that history tells us were brought there by Cortez. Old Jude was a noted roadster, an untrining saddle mare, and had more nerve force and greater recuperative powers than any horse or mare in her immediate neighborhood. Dr. T. D. Felt bred her to many of the old-time sires, she proved a most prolific breeder. Sometimes her produce would resemble her in color, markings and shadings, but all had peculiar fine manes and tails, and clean flat limbs; their heads were typically Arabian, large eyes, broad foreheads, small active ears (always on the alert), wide jaws and small muzzle. She was the progenitress of many famous roadsters and the last of these is Telltale, that was timed a mile in 2:12½. She was by Edward B., he by Stam B. 2:11¼ out of Celia Mc. by Dexter Prince; second dam Belle, by Elect, a son of Electioneer; third dam by Mambrino Eclipse; fourth dam Roxie by St. Lawrence Morgan, and fifth dam by Imported Glencoe. Telltale's dam was out of a mare by Jack W. 2:12 (son of Waldstein 2:22½, and a mare by Rifeman, son of Imported Glencoe); second dam Rapid Ann 2:27¾ (the Year Book says 2:30) by Overland, and the next dam was a daughter of Old Jude's. This mare Rapid Ann was another noted animal and many stories could be told of her achievements. Dr. Felt also has a nice mare called Little Pearl, by Greco B., out of Pearl K. (trial 2:15), by Wayland W. 2:12½; second dam Pensee by The Grand Moor; third dam Lodi (thoroughbred). This mare and Telltale he is to send to Chas. De Ryder, Pleasanton, next month. He also has a very promising Searchlight filly out of Edith 2:10, which he calls Edithlight; she is a Simon-pure pacer and a good one. Another is a filly by the McKinney stallion Cruzados, out of Ril Ray, by Ira; second dam Rapid Ann, by Overland, the horse L. J. Rose brought from Wisconsin with Minnehaha. There are many fine colts and fillies in the little band of horses Dr. Felt owns, all of them are good looking, and bred from families that are noted for the excellence of their limbs, strong constitutions and stamina.

STATE AGRICULTURAL SOCIETY MEETING.

In order to follow the schedule of the Pacific Coast Fair and Racing Association's schedule, the California State Fair will open three weeks later this year than it did in 1911, beginning on September 14th and closing September 21st. This was decided by the Board of Directors of the State Agricultural Society at a meeting in Sacramento Thursday. The stock breeders and horsemen who make the Pacific Coast Fair circuit will not reach the State's capital until September 12th or 13th.

Thursday's meeting was called to hear the report of the committee appointed to revise the premium lists. A number of important changes in premiums was recommended and adopted. In addition, the directors adopted resolutions urging the management of the Panama-Pacific Exposition to plan for a record-breaking livestock show during the World's Fair in 1915. In part the resolutions were as follows: "Resolved, That it is the sense of the Board of Directors of the State Agricultural Society of California that the general plan for a livestock display at said exposition should be projected on a scale so magnificent and generous as to interest breeders everywhere and bring together a showing of the best animals in all classes from all parts of the earth.

"Resolved, That to this end, in view of the close relation of the industry to the best interests of mankind, the prizes given by the exposition management should be on a liberal scale and we urge on the State commission of California, which is authorized to supervise the expenditure of the \$5,000,000 appropriated by this State for exhibition purposes to set aside a suitable sum for the purpose, and let it be known at the earliest possible date that they will duplicate all awards made to California exhibitors in the livestock department at the Panama-Pacific International Exposition in 1915. We emphasize early action in order that breeders may be prompted to improve their parent stock in time to raise up the highest possible type of animals for the great event.

"Resolved, That in our opinion this plan energetically carried out would give greater stimulus to the breeding of better livestock than any measure ever heretofore undertaken, while the cost would be nominal compared to the benefits that would accrue to the human race, to say nothing of the epoch it would mark in the advancement of one of the greatest interests of the earth."

Drink Jackson's Napa Soda.

AEROLITE 2:07½.

There were few better bred stallions than Searchlight 2:03¼ ever brought to California. He was strongly trotting bred, nevertheless he paced and paced smoothly and with less friction than any horse of his day. He was by Dark Night (son of Alcayone 2:27) out of Nora Mapes (dam of Lucie 2:18¼, etc.) by Furor; grandam Hattie Mapes 2:33½ (dam of Judge Woolsey 2:21¼) by Abdallah Star. The late Thos. Keating drove Searchlight in all his races and believed he should have a mark of two minutes, for he had often paced balves better than a minute. Searchlight was bred to a number of mares, and it has only been observed lately that nearly every colt and filly he sired, if from any kind of a fairly well bred mare, had speed. In 1911 he had seven enter the 2:30 list and of these Alberta 2:09¼, the little 800 pound pacer proved to be one of the best campaigners of the year. C. The Limit by him lowered his record to 2:04½ and Aerolite reduced his record to 2:07½. This horse Aerolite is perfect in every way so far as individuality, disposition, soundness, size and color goes, but he is bred to make a sire and by the performances of the stake winners Ruby Light (3) 2:11½, Aerolite (2) 2:21 and Leonid in 1911, he has proven he is one. His dam Trix is one of the greatest broodmares living. She is also the dam of Mona Wilkes 2:03¼, Moortrix 2:07½, a horse that started nine times in 1909 and won eight races. This Mona Wilkes was the fastest daughter of Demonio's and Moortrix was the fastest to the credit of Azmoor 2:20½. Besides these she had three others in 2:30. Trix was by Nutwood Wilkes 2:16½, out of Trixy by Director 2:17; second dam Mischief (dam of Brilliant, sire of Brilliantine 2:17¼) by young Tuckahoe, etc. Aerolite will be raced this year after making a short season in the stud. He is owned by C. L. Gifford, of Idaho, who will have him campaigned. Until then Aerolite will be kept at Woodland in charge of Messrs. Sutherland & Chadbourne.

NORTH PACIFIC CIRCUIT FAIR DATES ANNOUNCED.

Walla Walla (Wash.), February 1.—Secretaries of fair associations of the North Pacific circuit, in annual session here today, set dates for 1912 fairs as follows:

Vancouver, B. C., August 1st to 17th; Seattle, August 19th to 24th; Portland, August 26th to 31st; Salem, September 2d to 7th; Vancouver, Wash., September 9th to 14th; Walla Walla, September 16th to 21st; North Yakima, September 23d to 28th; Spokane, September 30th to October 5th; Boise, October 7th to 12th. A two-nation association was arranged, Manitoba, Saskatchewan, Alberta, Montana, Utah and Idaho being included. The purses will aggregate \$200,000 and the programme provides for racing events for fifteen weeks. The board of stewards is to be composed of three members of the Canadian circuit, one from Manitoba and one from Idaho.

An international circuit association, an organization composed of the five fair and racing circuits in the west, was formed by the men attending the meeting of the North Pacific Fair Association, after adjournment of that body. The new organization has as officers the newly elected officers of the North Pacific organization, of which Walla Walla is a member, and a board of control composed of officers of all the circuits included, which are the North Pacific Fair Association, Pacific Coast Association, British Columbia Circuit, Western Canadian circuit and International circuit.

New officers are H. S. Rolston, Vancouver, B. C., president; Robert Cosgrove, Spokane, vice-president; J. W. Pace, North Yakima and Seattle, secretary. Salem, Ore., gets the next meeting.

STANDARD BRED STALLIONS LICENSED.

Following is a list of stallions that were licensed by the California Stallion Registration Board from January 11th to 31st inclusive:

Athadon—George L. Warlow Fresno.
Black Hall—George L. Warlow Fresno.
Stanford McKinney—George L. Warlow, Fresno.
Nori—George L. Warlow, Fresno.
Strathboul—George L. Warlow, Fresno.
Doctor W.—Geo. & Jos. Avila, Gustine, Cal.
Garret B.—Elmer Treanor, Santa Maria.
Logan Pointer—J. E. Montgomery, Davis.
Jim Logan—J. E. Montgomery, Davis.
Alton—Louis Mativia, Dixon.
Nolac B.—R. S. Brown, San Luis Obispo.
Airlie Demonio—Chas. Johnson, Woodland.
El Dnero—J. D. Shuler, Woodland.
Owney—H. Scott, San Jose.
Athasham—D. L. Bachant, Fresno.
Salvador—Chas. Scott, St. Helena.
Invermay—Chas. Scott, St. Helena.
Search Pointer—J. Kitchen Jr., Oakland.
Red Nuttle—M. McIntire, Kelseyville.
Robert Direct—Macedo & Costa, Hanford.
Jim Wood—O. A. Olson, San Luis Obispo.
Irving Pointer—Wm. A. Stuart, Eureka.
G. Albert Mac—Worthington Parsons, Salinas.
Guy Dillon—F. S. Turner, Santa Rosa.
California Dillon—F. S. Turner, Santa Rosa.
Major Dillon—F. S. Turner, Santa Rosa.
Larry Kinney—Wm. Rourke, San Bernardino.
Star Envoy—H. Nororin, Tulare.
Alconda Jay—H. H. Helman, Salinas.
Dickens B.—S. H. Burns, Santa Rosa.
Palite—E. D. Dudley, Dixon.
McFadyen—E. H. Dudley, Dixon.
Del Gartho—J. R. Black, Arbutle.
Speedway—L. E. Stine, Laton.
Dawson—J. S. Manchester, Napa.
Washington McKinney Jr.—Fred E. Emlay, Marysville.
Sir Poleon—C. R. Marley, Woodland.
Don Rosine—Dr. D. F. Hersprung, Woodland.
Pollerton—C. K. Avery, Farmersville.
King Lilly Pointer—Nesmith & Sons, Los Angeles.
Clay Edwin—Nesmith & Sons, Los Angeles.

NOTES AND NEWS

What stallion will you breed your mare to this season?

Many of those to be sold at Chase's sale next Monday night should be placed in training at once.

Adansel 2:14½, by Prince Ansel 2:20½, will make the season of 1912 at Sweetwater race track, San Diego.

Does any of our readers know of anyone having a Palomena (yellow, with white mane and tail) stallion for sale?

Flewy Flewy (dam of Charley D. 2:06¼), by Memo, is booked to The Bondsman, so is Katharine 2:19, by Diahlo 2:09¼.

The dam of Dariel, that wonderfully fast mare from Chico is to be bred to The Exponent stallion, The Proof 2:29¾, at Woodland this season.

There are some mares to be sold next Monday night at the Chase sale which should have been worked for speed. They are in perfect condition.

The pacing stallion King Cole, owned by R. O. Duncan, of Christchurch, New Zealand, holds the world's race record for two miles, 4:31.

What will Bon Cheval (4), by Bon Voyage 2:08, out of Silver Haw (dam of Helen Stiles 2:08¼), by Silver Bow 2:16, bring at Chase's sale Monday night?

The thoroughbred mare Rosoromonde, by Imported Ormonde, dam Fairy Rose, foaled February 25, 1895, died of pneumonia at Palo Alto, January 26th. Rosoromonde was a stake-winner and one of the handsomest mares foaled in California.

A correspondent writes: "I. M. Lipson, of Tulare, has a filly foaled May 28, 1911, that was sired by R. O. Newman's beautiful bred stallion Best Policy. Last week she trotted an eighth of a mile in 23¼ seconds! It is hard to heat that."

Harry E. Hopper, proprietor of the Hopper Stock Farm, Indianola, Iowa, who is passing the winter in Southern California, recuperating from the effects of a severe sickness of last fall, is rapidly regaining his health.

The Horseman's Annual for 1912 makes its appearance from the press of Magnus Flaws & Co., Chicago, Ill. Price, \$1. Copies for sale at this office.

According to an Eastern journal, Miss Lotta Crahtree loves horses but looks upon racing them as cruelty. Nevertheless Miss Crahtree, if correctly quoted, raced them when they had a chance for the money. It all depends!

One of the commendable innovations planned for the New Pacific Coast Circuit, is a press agent to follow the circuit and see that the daily newspapers in each city correctly report the races, instead of butchering the facts as these papers usually do.

T. W. Barstow, of San Jose, has sold his Nutwood Wilkes filly, Little Light, out of a mare by Bonnie Direct 2:05¼, to Henry Rohner, of Eureka, Humboldt County, and shipped her Wednesday.

Mrs. Weller, by McKinney 2:11¼, is due to drop a foal to Nearest McKinney 2:13¼. Mrs. Weller is out of Much Better 2:07¼, by Chas. Derby 2:20; second dam None Better 2:23¾, by Allandorf 2:19½. She has a colt by Nearest McKinney that is, without doubt, the greatest trotting prospect in Santa Clara County; money cannot buy him.

Now is the time for horsemen to get their sulkies, carts, etc., put in shape for the coming season. Wm. J. Kenney is better prepared to do this work than anyone on this Coast and promptly attends to all orders.

Eva B., by McKinney 2:11¼, dam Iran Alto, second dam Flirtilla, a famous racing mare, is due to foal to Nearest McKinney 2:13¼, and James Rea, her owner, can hardly wait to see what it will be. It ought to be one of the best.

Prince Ansel (2) 2:20½ will make the season of 1912 at the Woodland race track. Judging from the showing as good game race horses his progeny has made he should have his book filled in a very short time.

James Walker, the well-known horseman, died in terrible agony at Coldwater, Mich., Jan. 23, from injuries received by a fall which he sustained the day before. The accident broke two ribs, one of which penetrated his lungs, and in a short time caused general emphysema, his body being bloated twice its natural size. Mr. Walker was at work on an article for "The Horseman" at the time of his death. He was a brother of the late E. C. Walker's ("Veritas") who, as we remember it, died from injuries received in a street car accident.

C. A. Harrison, and E. R. Dunn and son, of Seattle, have been visiting Woodland and Sacramento and found time to go to the race tracks at these places and inspect the trotting horses.

The Livermore Horse Show takes place next Saturday, February 17th. It promises to be one of the best ever held there. It is an annual feature in this thriving town and is usually declared a holiday.

Owners of good mares should not overlook The Patchen Boy (3) 2:10¾. He gets speed and game-ness as well as beautiful foals from mares of all kinds. He is one of the "stoutest bred" stallions on the Pacific Coast and one of our greatest sires.

The State Agricultural Society is doing all in its power toward creating a State-wide interest in our race meetings and also in the big race meeting and livestock exhibit in 1915.

Owners of mares who intend to breed them this season should bear in mind that in 1915 there will be some futurity stakes to be decided, as well as races for two-year-olds, that will be worth thousands of dollars to the winners.

Jennie S. 2:20 was bred as follows, according to W. H. Parker, of Stockton: Sired by Directum 2:05¼, dam by Nephew; second dam by Gen. Dana. She was out of the dam of Steve 2:18¼, and was bred by Clark Archer, of Linden, Cal.

The blood of Silver Bow 2:16 cannot be hidden, it seems. Every animal in Geo. E. Stickle's consignment to be sold on Monday night that traces to this grandly bred son of Roht. McGregor 2:17¼ shows it. What broodmares they should make, even if they never raced.

The drawing for the oil painting of Norfolk for the benefit of Richard Havey, has been postponed until Wednesday, March 13, 1912. It will be awarded to the holder of the ticket containing the last two figures of the capital prize in the M. & M. lottery drawing.

Andrew Robertson arrived safely in Melbourne with all the thoroughbreds and trotters he shipped from this port in November. Mike Kelly, the gray trotter that A. Ottinger drove in the matinee races, gained flesh on the trip and will undoubtedly be heard from in the slow classes for which he is eligible there.

There is talk of a stake being given by the San Francisco Driving Club at the big 1915 race meeting at the Stadium. If such a stake materializes, and if it is for horses owned exclusively by members, there will be many additions made to the list of membership as soon as it is officially announced.

Searchwarrant (3) 2:24¼, the four-year-old trotting gelding, by Searchlight 2:03¼, dam Bessie Taylor by Col. Hambrick, has arrived at Lexington and gone into the stable of St. Clair and Curry. This colt is reckoned as a very fast trotter as he worked in 2:13¼ last fall as a three-year-old for Doc Curry.

Dr. M. W. Hoagland, a well-known veterinary dentist, who had an extensive practice at Haywards and San Leandro eighteen years ago, died at Melbourne, Australia, last month. He was well known and respected among racing men, and was the first veterinary dentist to engage in business in Australasia.

Colorado E. 2:04¾, by The Bondsman, is out of a mare by Jay McGregor, Le by Jay Hawker, out of Prue, by Robert McGregor 2:17¼. There are some mares carrying plenty of the blood of Robert McGregor to be sold at Chase's sale next Monday night, and any one who will purchase one of these will make no mistake in breeding her to The Bondsman.

The trotter that Johnny Ray, the well-known Irish comedian, purchased, is called Almerit and is by Zomhro 2:11. Jas. Thompson, of Sacramento, sold him and will ship him east about March 1st. Almerit has no record but has been timed miles better than 2:16. He is a big, strong, handsome hay gelding and should make a low record this year.

Patrick Riley, who years ago was recognized as an expert horseman and who was an intimate friend of John Mackey when the Haggin breeding farm on the Rancho del Paso was in existence, died at the county hospital, Sacramento, last Friday, at the age of 80 years. He had made his home with Dr. A. M. McCullum for the past fifteen years.

The McMurray Sulky Co. (of which Wm. J. Kenney is the Pacific Coast agent) has adopted this policy: They will guarantee every sulky and cart they manufacture to be free from imperfections and perfect in workmanship and materials. This applies for the life of the vehicle as long as there is any part of it left. Mr. Kenney has just received a new consignment of 1912 models. They are beauties!

Remember our Breeders' Edition is to be issued March 9th. If you desire to get the benefit of our increased circulation for that number and want to reach every owner of a high-class broodmare, you should advertise your stallion in it, if you have one. If you have a mare, colt or filly for sale, send in the advertisement in time. Let everybody know what you have, that's where the benefit of advertising comes in.

Visitors at the State Fair this year will see many improvements, the greatest however, will be the appearance of the entire infield of the race track. Many men have been employed ploughing, harrowing, scraping and leveling it and now it will be seeded with alfalfa. As water pipes are laid through this area it will be independent of the rainfall and in time will be one of the prettiest places imaginable.

The adoption of the new stallion registration law in California is having its effect upon owners of stallions which do not come up to the requirements of the American Trotting Association. It is most unfortunate that owners of the ancestors of many of the very fastest and best of these were careless in not having their mares and horses registered when the rules were not so stringent.

According to a letter just received from Andrew Robertson, Melbourne, Australia, Joe Cuicello, the well-known horseman, did not go with him. Mr. Robertson refused to take him and has not heard from him since he had him good-bye on the wharf when the vessel sailed. He says that perhaps he may have got to Honolulu or New Zealand, as he seemed determined to get away.

Dr. J. S. Schofield, who is training a stable of horses at Macon, Ga., for Wm. S. Tcd, of Greenwich, Conn., has purchased from the Patchen Wilkes Stock Farm, Lexington, Ky., two yearling fillies by Peter the Great 2:07¼. One is out of Bessie Ford, by Happy King, the other out of Guycara, by Guy Wilkes 2:15¼. They will be shipped to Macon to join the Tod stable already there.

E. T. Ayres, of this city, recently purchased the pacing gelding Tom Murphy 2:08¼, and will use him in the matinees at the Stadium this summer. Tom Murphy was sired by Gossiper, out of a mare by Memo, and got his record at Portland, Oregon, September 25, 1908. He was named after the well-known trainer from Petaluma, who has charge of a big string of horses for the Czar of Russia at St. Petersburg.

Robert Carter Wall, editor of the Hemet "News," and a great friend of Budd Dohle's, passed away last Monday at Hemet. He was only thirty years old. His death is a serious loss to the community in which he lived. The deceased was a most enthusiastic horseman and always had something of interest to trotting horse men in the columns of his widely circulated newspaper.

For the first time in many years the annual report of the State Agricultural Society has been completed immediately following the close of the fiscal year. C. A. Telfer, the new secretary of the society, has already placed the report in the hands of the State Printer, and it will be ready for transmittal to Governor Johnson on his return from the East. Telfer reports much difficulty in securing the data from county supervisors.

Harry Cowell, of Santa Cruz, has a two-year-old colt by Kinney Lon 2:07¾, out of Dione 2:07¼ (dam of Bernice R. 2:11¼, the greatest stake-winning trotter on the Coast last year), that is a perfect counterpart of Dione and shows with the little work he has had that he is a very promising trotter. This gentleman also owns a four-year-old filly by Cupid 2:18, out of Dione 2:07¼, that many predict will be even faster than Bernice R. 2:11¼.

A number of carpenters are busily engaged building box stalls at the Sweetwater race track, San Diego, and, in a few weeks, Charles Spencer will start from Woodland with a string of horses to put in them. Since acquiring this track and land adjoining, Messrs. Keefer and Spencer have learned that a number of prominent citizens of San Diego have made arrangements to have their horses developed on this splendid course, and also announced their intention of doing all they can to hold matinee races and a big race meeting there this fall.

Richmond Chief 2:11, the game little roan stallion which raced so well about twenty years ago, was bred as follows: Sired by Monroe Chief 2:18¼, dam Ela by A. W. Richmond 1687; second dam Grey Dale (dam of Longworth 2:19 and dam of Al Bock 2:08¼ and Gusta Kline 2:22¼) by American Boy Jr. (sire of the dam of Venture 2:27¼, etc.); third dam by Winfield Scott; fourth dam Sorrell Poll by Sir Henry. We are indebted to Dr. Herspring, of Woodland, for an old stallion card which contains the above pedigree. Richmond Chief, on account of his color, was only bred to a few mares.

A letter from Highwood Stock Farm, Loveland, O., brings the information that the stallion Highwood 2:21½ died from infirmities attendant upon old age at that farm, January 15th. Highwood was foaled in 1887, and while he was bred by J. W. Stryker, Jerseyville, Ill., he was strictly of the old-time Glenwood Farm breeding, as he was sired by Nutwood 2:18¾, dam Delphine, by Harold, second dam Dahlia, by Pilot Jr. 12. It was, however, at Caton Stock Farm, Joliet, Ill., that Highwood laid the foundation for his fame. It was there that he sired Caid 2:07¼, Ida Highwood 2:09¼, Montell 2:09½, Early Reaper 2:09¾, and most of the other fast performers to his credit. His son Caid, now owned in Austria, is the leading sire in that country, and in this country something like a dozen of his sons have entered the list of speed sires.

Purses of \$2,500 and \$3,000 for free-for-all trotters will be offered this season at Lexington, Readville, Hartford, Cleveland, and Pittsburg.

Mr. and Mrs. John Shepard of Boston, Mass., were visitors at the Hemet Stock Farm last week as guests of W. F. Whittier, and were delighted with all they saw there. Mr. Shepard was at one time closely identified with the light harness horse industry and on two separate occasions owned horses that held the double team record of the world.

Harness races on the Grand Circuit will open at Grand Rapids on July 8. Meetings in successive weeks thereafter will be held at Kalamazoo, Detroit, Cleveland, Pittsburg, Buffalo, Boston, Salem, N. H.; Hartford, Syracuse, Michigan State Fair (Detroit), Columbus, O., and Lexington, Ky. The season will close in the last named city on October 19th. There will be a total of thirteen meetings, with fifteen consecutive weeks of racing.

William Duncan, who won the second largest amount of money on the Pacific Coast tracks last season, has been apprised that he won both first and second prizes offered by The Jerald Sulky Company for driving the two fastest heats in the season of 1911. Duncan drove J. E. Strain's Maurice S., a Yuba county horse, a mile in 2:07½, thus winning the first sulky, and also drove Dr. Merrill's George Woodard in 2:07½, securing the second sulky. Both records were made officially on the Marysville track.

For treatment for scratches or grease heel, I have been successful with a treatment as follows: I wash the affected parts with warm castile soap and water; then grease with fish oil once every three days to keep the sore soft, and give the following medicine: Ten cents' worth each of blood root, copperas, salt-petre, and sulphur. Pulverize all together and give one tablespoonful night and morning in the feed for three weeks. I cured a very bad case with this treatment. In most cases if the blood is cured the sores will heal. This remedy is good for both cattle and horses.—Exchange.

"What a horse to take to Australia would Lijero 2:15 be!" was the remark a gentleman from that country made the other day. "Yes," replied a bystander, "or to keep right here, for he has breeding, color, conformation, size, bone, disposition and speed; he is one of the purest gaited of trotters and as a foal-getter stands in the front rank. There never was a horse sent to Australia that can compare with him, for he is a sire of extreme speed and all his get trot as perfectly as he does and are speedy." The Australian had nothing further to say when this enthusiastic horseman had finished.

Just as we go to press word is received from a Kansas correspondent telling of the death of Antevolo 7648, at the ripe old age of thirty-one years. Antevolo 2:19½ was bred by the late Joseph Cairn Simpson, the well-known breeder and writer. He was a son of Electioneer 125; dam Columbine (dam of Auteo 2:16½, etc.), by A. W. Richmond 1687; granddam Columbia, by Bonnie Scotland. As a sire the Year Book credits Antevolo with nineteen performers, fourteen trotters and five pacers. Nine of his sons are listed in the great table of sires and an equal number of his daughters have won renown as producers.

At the annual meeting of the New York Women's League for Animals, held at the Plaza Hotel January 24, a check for \$25,000 was received from one whose name was withheld, who asked that it be applied to the erection of a free hospital for the humane treatment of dumb animals in need. Mrs. James Speyer, wife of the banker, is president of this league, and her activity has brought good results. In all seasons, but particularly when the weather is intensely hot or bitterly cold, the streets are crowded with horses and other animals which require prompt treatment, and a free hospital, under the direction of the Women's League, can do untold good. Let us hope that other persons of means and humane instincts will follow the example of the man or woman who modestly contributed \$25,000 to a good cause. Abuse of animals is foreign to the spirit of civilization.

If Gen. Wood and those who proclaim that there is likely to be a great scarcity of horses suitable for cavalry use by reason of the exportation of thoroughbreds from the country would come to New York and examine the horses used by the mounted squad of policemen in this city they might have occasion to change their views, says a writer in the Breeders' Gazette. There are something over 700 of these horses now in service, and they are all of sufficiently high quality for officers' mounts or any other service that may be required of them for use by the cavalry. These magnificent animals are all trotting-bred, and except what comes from some remote ancestor there is no thoroughbred blood in their pedigree. I am told by a concern that furnishes these horses to the city that there are plenty of such animals in the country but that they cannot be purchased at the prices which the Government is willing to pay. These horses cost the city from \$325 to \$350 each while the Government expects to purchase what it requires for about \$225. This is scarcely a decent price now for a common cab or delivery horse. From these facts it would appear that the difficulty lies in the want of price rather than in the scarcity of horses for Government service.

The Canadian Government is exercising a very beneficial control over racing in that country. A bill will be passed making it illegal for any association to give a race meeting unless it has been duly incorporated by an act of Parliament. In this way it will be impossible to hold race meetings for purely gambling purposes.

It transpires that General C. C. Watts is not to have a portion of Kingston Farm, Lexington, Ky., for his trotters. Major Daingerfield came to the conclusion that the plan of subdivision would not work out satisfactorily. John Splan, as representative of General Watts, is now arranging for another location.

Send in your items. Has your mare foaled yet? Send us the news. We are as much interested in the increase of choice bred trotting stock in this State as you are. There never can be too many additions to the equine family, especially that portion of it which is known as the "light harness horse" breed.

L. B. Daniels, the well-known horseman, has six head in training in Chico, Cal., they are in fine shape. He has All Style 2:12½, and has leased Dan Logan (trial 2:12) full brother to Jim Logan 2:05¼, and will race him over the Pacific Circuit. Chorro Prince 2:10 is big and strong and will, without doubt, be a good horse in his class. Mr. Daniels has a two-year-old filly by Dan Logan, out of a mare by Arthur Wilkes that he esteems most highly. In an adjoining stall he has a little horse called Delmas by Dialect, a pacer that has been a mile in 2:10 and belongs to Mr. Wesley Bennett, who is also the owner of a bay mare by Arner 2:17¼, out of the dam of Dariel (the mare recently sold to Mr. MacKenzie). Mr. Daniels has a two-year-old by On Voyage, out of Nocha, which he calls The Voyager, a good consistent trotter.

A SIRE OF TWO-MINUTE SPEED.

The blood of the three greatest sons of Geo. Wilkes is combined in the veins of Guy McKinney, sire of Vernon McKinney 2:02, the fastest pacer that ever left this Coast "green" and returned with so fast a record. He has also sired McAdrian 2:24, sire of Bert Kelly, a trotter that will get a mark of 2:05 or better if no accident or sickness happens. He has sired others, and all are out of mares that were not heretofore noted as dams of winners. Guy McKinney is by McKinney 2:11¼, the greatest living sire of trotting horses, and he is by Alcyone 2:27½, the greatest son of Geo. Wilkes, and his dam, Alma Mater, was a progenitress of one of the most famous families of trotters.

The dam of Guy McKinney is by Guy Wilkes 2:15¼, by Geo. Wilkes 2:22, out of Lady Bunker, one of Mambrino Patchen's greatest speed-producing daughters. Guy Wilkes' mares stand high in the estimation of all horse breeders, for from them have come some of our greatest stake and futurity winners. The second dam is Blancheward (dam of China Maid 2:05¼), by Onward 2:25½, another son of Geo. Wilkes, and the greatest daughter of Mambrino Chief 11, Dolly (dam of Director 2:17, etc.). Again are we confronted with the pleasing fact that Guy McKinney's third dam is by Mambrino Patchen 58, the greatest (opportunities considered) of all broodmare sires. The fourth dam is the dam of Alcyon 2:15, one of the greatest trotters ever seen on the race tracks of America, and the fifth dam was by Abdallah 15, sire of Goldsmith Maid 2:14.

As an individual Guy McKinney is all that one can picture from his breeding. He is a large, grandly proportioned black horse standing 16 hands and weighing 1200 pounds. He will make the season of 1912 at the place of his owner, M. A. Lewis, Oakdale, California, and the low fee of \$25 for the season. Mr. Lewis will be pleased to send a card containing tabulated pedigree and other information on request. Owners of good mares should avail themselves of this opportunity to breed to this beautifully bred sire. They can make no mistake in patronizing him.

BON MCKINNEY 2:24½.

The advertisement of this grand young stallion, which appears in this issue, "covers the ground" so well that any other notice seems unnecessary. Nevertheless, as he is the best bred and only son of the great Bon Voyage 2:08 to make the season in San Jose, there are some things that may be said which might induce some doubtful broodmare owner to send his mare to this horse. It has been proven, and especially through the line Bon McKinney represents, that the Bon Voyage-McKinney cross is a "happy nick," and a stallion of this line cannot help siring handsome, stylish, sound, pure-gaited and level-headed trotters, and especially when that sire has all the "class" or "quality" that Bon McKinney has. He is descended from "royalty" on both sides and is worthy of his ancestry. His colts and fillies, the first he sired, are considered models of equine form, and all are endowed with a turn of trotting speed that is almost marvelous. When the owners refuse to put prices on yearlings they must know something of their capabilities; and when these owners have all expressed a wish to send their mares back this year to this stallion no further proof is deemed necessary to show that they have the very best and want more of the same kind. Bon McKinney 2:24½ will get a mark lower than his sire just as soon as he is prepared for it. Jos. Twohig, at the Driving Park, San Jose, has him in charge and will answer all questions regarding him and be pleased to show him to all visitors, for Bon McKinney is a show horse as well as a perfectly gaited, pure bred trotter.

PUBLICITY IS POWER.

Wake up horsemen. If you still love the horse and would have the horse sport kept on the high tide of popularity bestir yourselves, and let it be known. How shall it be known? That is easy. Horse racing is a sport upon business principles and it should be carried on as any other business. Therefore, advertising is what is needed to keep the trotting horse in the foreground.

This is the day of advertising. That it pays to advertise is an undisputable axiom. For an example, pick up any daily newspapers or weekly or monthly periodicals and scan column after columns of ads. Every successful publication contains about 30 per cent of reading matter and 70 of advertising.

About fourteen years ago the horseless drawn vehicle made its appearance chugging along the street. Many were skeptical of the success of the vehicle. The men interested, however, realizing the value of advertising, poured millions of dollars into publicity and today the automobile business is retracting from the horse industry.

In view of the success of the equine's greatest rival is it not high time that something was done to keep the horse in the race? Millions are invested in the breeding and development of the horse but yet little or no effort is made to let the multitudes of horse lovers know what is being done. How can interest be created in the sport when the publicity end is clearly neglected. Every one knows what the automobilists are doing because an army of press agents are employed to scatter news world wide, but when it comes to liberating money from a horseman for publicity or regular paid advertising it is like extracting a discolored molar from the jawbone of an elephant.

With the scope of the horse business as large as it is there is no good reason why it should not be given more publicity. It would be proper steps taken to furnish the public with live news and interesting comment about the horse and the sport in general. To do this would mean the establishment of a distributing bureau with competent writers in charge to furnish the papers in all sections with current topics concerning the horse.—Breeders' Journal.

TOM SMITH 2:13¼.

There are very few sons of McKinney 2:11¼ that have achieved a greater reputation as a sire of stake and futurity winners than this stallion. He has had very limited opportunities in the stud, but now that he is located at the San Jose Driving Park it is believed all broodmare owners who see him will be most favorably impressed with his splendid conformation, kind disposition, soundness, color, and breeding, for he comes on the maternal side from the very gamest of game families. His dam had six in the 2:30 list and all were noted trotters. His grandam had two, and they are in the 2:20 list. The perfect trotting action of Tom Smith 2:13¼, Prof. Heald 2:09½, Vallejo Girl 2:10¼, etc., is acknowledged by horsemen to be unapproachable. All of these should have lowered their present records. Tom Smith is a sure foal-getter. He sired the futurity stake winners Katalina 2:11¼, Ella Mac (3) 2:14¼, Vallejo Boy 2:15, and Eddie G. 2:30. He is the only stallion standing for public service that represents the McKinney-Clark Chief cross, backed up by the stoutest of thoroughbred blood. His colts and fillies are all fine-gaited, level-headed, kind, and tractable trotters, they also have size and the very best of feet and legs. Everyone who owns a Tom Smith colt or filly values it highly, and they ought to, for he is all that one could ask for in a sire.

CHASE'S AUCTION SALE.

Next Monday evening Fred Chase & Co. will sell a consignment of very fine looking trotting bred horses consigned by Geo. E. Stickle, of Lockeford. The reason these are to be sold is that the owner's business interests have increased so rapidly he finds he has not the time to devote to his trotting stock, so he reluctantly offers them for sale without reserve to the highest bidder. The catalogues, which have just been issued, give the breeding of each of the animals, but cannot give a perfect description of them individually. They must be seen to be appreciated. There never was a time when trotting horses of this type are more valuable than they are at present, and, more remarkable still, they will never become cheaper, for reasons too well known to horsemen. There are young horses to be sold that will be found very useful either for pleasure or business purposes, and their rich inheritance is a guarantee that they will improve with work and grow into handsome individuals. The mares are well bred and in their veins flows the blood found in many of our very fastest and gamest trotters. Only one stallion is to be sold, Bon Cheval, and he should find a buyer among those who are seeking material to fit for the races. He is bred and gaited right and is a handsome individual. Don't forget the date and place.

THE JERALD SULKY A WINNER.

A Jerald Sulky was drawn by the fastest green pacer for the season of 1911, also by the fastest four-year-old gelding of 1911. It won the six-heat race of the season, also the fastest sixth heat in a race. Jerald's two-wheelers are acknowledged the world over to be the best racing and training vehicles made. In fact, many horsemen claim that they stand the racket far better than the more costly ones. Before placing your order send for their new forty-eight page catalog, which will be gladly sent on request.

Drink Jackson's Napa Soda.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

PERPETUATING CALIFORNIA FISH AND GAME.

For years past the press of this State has published columns upon columns of articles relative to the fish and game situation in California. These articles have been good, had and indifferent, mostly the two latter, for important as the matter is, it is a lamentable fact that many writers were sadly deficient in the necessary information to handle the subject in an intelligent and fair manner. The Fish and Game Commission has been raked from stern to stern for alleged sins of commission or omission. Rarely has credit been given to whom it belonged, or when and where commendation was due. The anvil chorus was active and alert on every and all occasions.

Time, however, brings forth potent changes for many affairs and in this respect our fish and game conditions are now being better understood; the sportsmen and people at large are gradually deserting the ranks of pessimism and acquiring information along the right line.

Among the few articles that will appeal in the right direction we must commend the article written by H. R. McLaughlin and published in the Sacramento Bee, a journal that has been a heacou light, in past stormy times, for the sportsmen of this State. We believe in passing a good thing along and spreading the gospel of reason and general benefit. The article referred to follows:

One hundred and fifty thousand hunters annually pursue the dove, quail, duck and deer in this State, and these hunters provide enough game for the rest of California to eat. Probably half as many anglers annually whip the mountain streams, lakes and sloughs for the gamy fish the California waters harbor.

Here, then, are more than 200,000 California sportsmen who are vitally concerned in the supply of fish and game. The members of each sportsmen's family are also vitally interested, as are the thousands of people who relish the meat but must look to the markets for some of it.

It can be readily seen from this that the work of the State Fish and Game Commission is the work of The People. How to make the supply of fish and game meet the public demands and yet keep a check on the fish and game "hogs," is the big problem which the members of this Commission must handle.

They have three things in particular to accomplish—furnish the supply of fish and game by propagation and introduction, make the pursuit open to rich and poor alike on equal terms, and see that there is no ruthless destruction.

It is a job that will take possibly years to accomplish, but a big step toward making it a reality has been taken in the organization of an association which will have as its members every licensed hunter and every angler.

For years the anglers of California have looked far ahead into the future for the time to arrive when they will have access to the streams, the lakes and waterways abounding in the gamy trout without running the chances of being yanked up by a country constable and haled before a justice of the peace for trespassing. It has been a dream rivalled only by that of the duck hunter of moderate means, who has pictured open hunting grounds where he will have an equal chance with his fellow of money in hunting, without treading on the toes of some powerful gun club.

These have been air castles which almost every fisherman or hunter has builded who has been up against the barriers which money has raised around the fish and game, the ownership of which is supposed to be vested in one man or set of men.

And if the plans of the State Fish and Game Commission are carried out as President Frank W. Newbert would have them, at least one of these dreams will become a reality—the angler's. As to the monopoly of the hunting grounds, that is a puzzle the solution of which has not been found.

The first step in giving the public the opportunity of whipping the streams or lakes where the State or county has planted fish was taken by the regular session of the Legislature in the passage of Bill 28, introduced by Rutherford. This law permits the supervisors of the various counties to condemn the right of way along streams stocked in part or in whole with fish by the State, unless the streams are navigable or run through cultivated lands.

The supervisors first declare the stream a public highway for the purpose of fishing in the slough, river or stream, as the case may be, and if the owner does not consent to such use of his land the supervisors may purchase or condemn if necessary.

This bill was the entering wedge in the solution of the trespass bugaboo confronting the anglers. According to President Commissioner Newbert, however, it is faulty in that it will force the counties having fishing facilities to stand the cost of throwing such privileges open to outside people who pay

nothing for their maintenance. The answer to this, he says, will be found in the formation of the great Fish and Game Protective Association, which will be powerful enough to ask the State to set aside enough money to stand the cost of acquiring any such rights of way that will not be voluntarily granted by the landowners along streams.

The means having been provided for the common angler to pursue his favorite sport along all streams stocked with fish—the fish he is taxed to propagate—the State Fish and Game Commission will see to it that the fish are placed in streams that are accessible. For this reason they require every applicant for trout fry to show that the fish will not be planted in private grounds, but will be placed where the public will be able to enjoy the sport of catching them.

The protection and propagation of fish and game in California, so that The People and not the Interests will reap the benefit, is a task with which the Commission is now wrestling. To accomplish this the formation of a State wide protective association has been undertaken. About 4000 sportsmen have already enrolled as members, and this number, it is predicted, will reach the 100,000 mark by the end of the present year. Every county is represented.

The father of this plan of giving The People what they want in the fish and game line is Frank Newbert of Sacramento. He says in this regard:

"We hear a lot about The People governing themselves; about having a say in the laws; well, that is just what the Commission is trying to have them do under this Protective Association. We expect to make the Association a sort of separate Legislature for The People on the question of fish and game, and if they cannot rule on that one subject I will lose all faith in them. The laws on fish and game will find their origin in this Association. Every district will be represented, and will naturally see that the fish and game are protected in that district. Their suggestions will be put in the shape of bills which the Legislature will be asked and will have to adopt.

So much for the laws which The People will be asked to make on this subject. Now, the Association will also see that those laws are enforced. It will represent a body of men 100,000 strong, that will demand recognition. Each member pledges himself to protect the fish and game of the State. When a violator of the game laws is arrested and taken to court, I think we will see punishment meted out that will tend to correct instead of encourage violations, as some of the smaller courts have been and are doing in such cases.

The Association will also educate the public to kill the hawks, crows, magpies, bluejays and 'varmints' which prey on the game birds. There are, without question, lots of hunters who complain loudest about violations of the law, who do not hesitate to bag more than the limit number of ducks, quail or doves. I believe one beneficial effect that this Association will produce will be to make 95 per cent of the hunters live up to the law. And in observing the law themselves they will see that the aliens, who compose 85 per cent of the violators, will be brought to time.

The Commission is striving to get more trout, so the sportsmen will have better fishing than they ever enjoyed before; to bring back the valley quail, which is conceded by all to be the fastest and gamest bird flying, and one that takes a good gunner and dog to outwit; to introduce the wild turkey and pheasant and make them part of our big game birds, and to protect the salmon from the monopoly of a few fishing concerns which have made a luxury of its meat, when it should be reasonably priced for everybody, rich or poor. Those are a few things this Commission is working to do."

If the Commission accomplishes only the salmon protection feature of its plans, it will have done something that will merit the commendation of the public. The people are taxed for the maintenance of the hatcheries where the salmon are propagated, yet the big fishing concerns, which pay practically nothing, reap the harvest, and, to fill their own purse, force the price of the fish to an almost prohibitive figure. An over-supply of fish on hand means no reduction in price for the consumer; the surplus is exported, so that local prices may not tumble.

The theory on which the Commissioners are working is that a State-wide Association of sportsmen will educate each hunter and angler to live up to the law himself and protect the fish and game, which are property assets of The People. But voluntary observance of the game laws will be but one feature. The Commission intends to raise its staff of deputies to a high standard of efficiency through a civil service system.

To increase the supply of game the Commission is negotiating to purchase thousands of valley quail from Mexico, bring them to California, raise them on the game farm to be established at Folsom, and at the proper time liberate them. It has been found

that the native valley quail have been driven by the hunters to the seclusion of the canyons, where they have interbred, so it is claimed. To bring new life into the quail colony the Mexican quail will be imported and great results are looked for.

This is one means of increasing the quail family. Another is to wage war on the birds and "varmints," particularly domestic cats that have run wild, which prey upon the eggs and each year reduce the quail by thousands. At the present time the Commission has a woman lecturer touring the country schools of the State and demonstrating with views the harm that such creatures do. She explains to the children what birds to kill as nuisances and what not to kill. She is teaching the rising generation how to protect the fish and game, which will be plentiful when they become old enough to pursue it, if the plans of the State Commission materialize.

FISH AND GAME COMMISSION MEETING.

The monthly meeting of the Fish and Game Commissioners last Tuesday was attended by President Newbert, Commissioner Carl Westerfeld and Secretary Ernest Schaeffle.

Hartley E. Peart, for the past five years attorney for the Commission, tendered his resignation, the press of private business necessitating such action. Attorney Peart remained several months with the Commission in order to dispose of such business as had come under his supervision and consideration in due course.

In accepting the resignation the Board by resolution complimented Mr. Peart and expressed its appreciation for the able and skillful manner in which he had discharged his duties during his connection with the Commission.

R. D. Duke, formerly deputy district attorney under District Attorney William H. Langdon, was appointed as the attorney for the Commission. Increased business of the Board requires the constant attendance of a legal representative to give proper attention to the matters relating to fish and game.

The temporary injunction granted to the American Game Transfer Company and which was to come up before Superior Judge J. J. Van Nostrand yesterday morning was discussed. Both Commissioners Newbert and Westerfeld were sanguine that the action of the Commission deputies in seizing shipments of ducks and calling a halt on what is believed to be an evasion of the game laws would be sustained. At all events, the Commission is prepared to carry the issue to the highest tribunals and meanwhile will not cease its operations against the other companies.

The Commission claims to have the goods on the game transfer companies. Commissioner Newbert was informed Tuesday afternoon by a representative of the Hunters' Express Company that his concern would cease to carry on any further business in that line. The intimation was given out that most of the companies would also go out of business after the positive information that the Commission would not cease in their efforts to break up the alleged infractions of the game laws.

A delegation composed of the Santa Cruz Board of Supervisors and members of the Chamber of Commerce, including J. A. Harvey, chairman; Ralph Madison, Samuel Marcus, J. D. Estee and Jacob Hartman, were present for the purpose of inducing the Commission to take over the Brookdale hatchery and Scott Creek spawning station and operate the same as State establishments, giving Santa Cruz county in lieu thereof 500,000 trout fry annually. This tender was taken under consideration pending the settlement of various details necessary to consummate the transfer.

Secretary Ernest Schaeffle was instructed to communicate with the United States Bureau of Fisheries with the end in view of introducing in our rivers the Atlantic salmon.

George A. Wentworth gave much information in regard to the game and valuable food qualities of the Maine, Dominion and Labrador finny denizens of the Atlantic rivers. These splendid fish, unlike our Coast salmon, run up stream, spawn and return to salt water, performing the propagating functions of nature again and again, as do the big steelhead trout of the Coast rivers. This variety of the salmon is not only a fine table fish, but is the pride of the angler. It will take either fly or spoon and is a fighting demon, and often weighs as much as 80 pounds. It is the same fish that is caught in the rivers of Great Britain and the ice-cold streams emptying into the fjords of Norway.

The educational work conducted by Miss L. E. Libby in regard to game and non-game birds and their economic value will be continued and extended throughout the State.

The special force of deputy commissioners, about 1000 in number, will be reorganized in the near future.

A summary of active operations for the month of January, submitted by Secretary Schaeffle, shows that 49 searches, 39 seizures—1432 ducks, 111 quail, 71 non-game birds, 62 shore birds, 435 rabbits, one deer carcass, 15½ pounds of venison, 25 crawfish, 1500 crabs and four nets—were made.

Seventeen arrests for violations of the fish laws, 52 for game law infractions and 27 for hunting without a license, resulted in \$1422 in fines imposed, 13 jail sentences, 16 cases pending, one dismissed, three acquitted, five sentences suspended and one out on probation.

About 1500 wild ducks are still held pending proceedings.

MARKET HUNTING DOOMED.

The Fish and Game Commission has thrown down the gauntlet to the so-called "hunters' express" companies, and proposes to curb the alleged violation of the duck limit law under cover of carrying on business as common carriers.

Market hunters, so it is claimed, have had no difficulty in disposing of large quantities of ducks, seemingly keeping within the letter of the law, but driving a coach and four through it otherwise. The daily limit—to have in possession or kill—of wild ducks is twenty-five for one day, or not more than fifty in one week, for one individual.

This restriction would put the ordinary market hunter out of business quickly. To get around this provision of the law transfer companies were organized and some of them incorporated. The market hunter shipped his bag of twenty-five ducks generally from his interior shipping point, via Wells, Fargo & Co.'s Express. The game shipments were legally tagged, signed by the shipper, the consignee's name properly inscribed and all in care of a designated "game transfer" company, actually, it is asserted, a commission firm.

This scheme worked very well for a while, until it became overdone and abused. Cases are mentioned where the shipper would send in a dozen or more bags of ducks in one shipment. Although it was morally certain that the limit law had been violated, it was difficult to secure tangible proof to the contrary.

When the birds arrived in this city the bags were called for by the respective "game transfer" agents they were assigned to the "care of." The "game transfer" agents claimed immunity from the provisions of the law relating to the limit possession of wild ducks or other wild game, stating that the game was private property, properly tagged and legally shipped, within the individual limit, and that they were merely the delivery agents in a legitimate express business.

The fallacy of this evasion of the law tinged with a legal aspect, was shown time and again when deputies made seizures of birds consigned to the "care of" different express agents. The birds had been found dumped in a huge pile for the purpose of being sorted and delivered as the "agents" evidently saw fit.

Friday and Saturday of last week Fish and Game Commission deputies with search warrants visited the headquarters of the Hunters' Express Company and others in the same business and seized several hundred ducks.

All of the ducks sent to this city for those two days, per Wells Fargo & Co.'s Express, were held up by the Commission and the "game express" manipulators notified that if anything more than a shipment of twenty-five birds, the legal limit per day, was taken away seizures and arrests would follow.

Forty sacks of ducks, 1000 wild ducks, were taken in charge by the deputies in forty-eight hours and about fifteen later shipments were stopped and kept in the main express company's possession. The consignees were notified if but one bird more than a limit was removed confiscation and second charges would be preferred.

Several of the "game express" concerns refused to take, or acknowledge any responsibility for the birds tagged to them. A temporary shift, in the interest of fair play or legitimate ownership, was made, and the Wells Fargo people were authorized to deliver to ostensible owners small batches of birds Saturday afternoon. This happy turn of the tide doubtless helped out some few duck dinners Sunday. Bona fide consumers, however, had no difficulty in securing the legal dole of twenty-five ducks per day.

Five game express concerns were blocked in getting an overplus of ducks. They were: The Hunters' Express Company, American Game and Transfer Company, Independent Game and Produce Company, Retailers' Game Transfer Company and Market Game Transfer Company, all said to be annexes of dealers or commission houses.

Fifty search warrants have been issued during the last four weeks and searches by squads of deputies made at various places. In that time nearly 4000 ducks held contrary to law, have been seized or held up in transit.

The Commission and its officials have met with but little in the way of direct opposition or antagonism from the retailers, hotels and restaurants. A spirit of co-operation has developed to quite an extent. The Commissioners assert that they will be firm in a determination to have the game and fish laws respected. If the law is at fault or inadequate, the remedy lies with the people at large, they say.

A number of the leading hotels, cafes and dealers have agreed to waive the usual search warrant preliminaries and will permit the properly authorized deputies to inspect the storage places and other receptacles on the premises for game and fish at any time the officials wish to test the standing of the different places in regard to the lines designated by the fish and game statutes.

One prominent hotel man is on record to the effect that if any future infraction of the law in his hostelry should occur, "the whole kitchen and cellar force will be discharged."

Big Herd of Elk.—A herd of elk is roaming in the foothills northwest of McKittrick, Kern county, the number being estimated at sixty. The elk were observed the other day near Caneros Spring, and appeared to be in good condition.

HUNTING NOTES.

The wood duck is not only noted for its beautiful plumage, but has table qualities as well, that are most acceptable to the gourmet. Otto Feudner received last week two full plumaged birds, a drake and a duck, which were shot on the Newman Rod and Gun Club preserve. These specimens of the now comparatively rare wood duck, which will be mounted, were the best seen in this city for many years past.

This fine duck used to be, twenty years ago, very plentiful in some sections of this State, particularly in Elk slough near Clarksburg and in other parts of Yolo basin. So numerous were this variety of ducks that Feudner's bag one day, before the limit brake was applied, counted up 125 wood ducks.

These ducks can yet be found in the San Joaquin valley near Hills Ferry, Newman and that district where they work up and down the sloughs, usually in pairs, not more than eight or a dozen in a flock at any time. Along the wooded banks of the river and sloughs or a wooded point of land jutting into the river is a favorite resort of the birds.

Open water is avoided by the wood duck. The ponds and holes in the tule overflow where water lilies grow is the duck's haunt, lily seeds being its particular diet. A lone tree growing among the tules is a resting place that gives a clear view of its environment and quick notice of the approach of a hunter, nor will they come back to the deserted tree until the hunter, however careful he has hidden himself, retires.

These birds are keen eyed and wary, more so than almost any other wild duck. Returning to the resting tree an hour or so afterward the ducks will be found back on the roost, only to again take rapid wing from the opposite side of the shelter, keeping the tree between their flight and the intruder.

In flight the wood duck has about the same speed as a mallard. In shooting for a double kill, unless the duck is dropped first, it is exceedingly difficult to bag her on the second shot, after the drake has been keeled over. The female wood duck will drop almost to the water with her stricken mate and then go through some flying gyrations that will more than challenge the skill of the best shots. So far as double shots go, when ducks are flying in pairs, an experienced hunter will take the duck first and the drake with the second barrel.

The royal plumage of the wood duck is in great demand for dressing trout flies, these feathers readily bring \$40 a pound.

Reports from the Los Banos country were that ducks are most plentiful but very wary. This section has been shot up so much this season that the ducks are now familiar with every blind and shooting pit. They have an aggravating way of settling down in a pond or open water just outside of gun ranges. They have the faculty of measuring the danger line distance to a foot, and from a safe resting spot they let the hunter fume in his blind and totally ignore the presence of the wooden decoys.

On some of the preserves the keepers have dug new pits, which plan works well for a short time. Suisun marsh gunners two weeks ago found conditions much to their liking, sprig ducks being in the majority. At the Green Lodge ponds Bill Richards' morning shoot counted twenty-three sprig and two teal. This bag was duplicated by Guy Earl, who shot on the Tule Belle Gun Club preserve on the other side of Cordelia slough from Green Lodge.

Five limit bags was the tally of the Cordelia Club members out. The mid-week shooters were: Messrs. Cuthbert, Otis and Dr. Davis, when limits were again available.

E. N. Cuthbert finds a 20-gauge gun ample for duck shooting. Prior to getting a 20 gauge he used a 16 bore. These smaller calibered shotguns are rapidly gaining favor with duck hunters. For upland quail or snipe shooting the lighter fowling pieces are very much in vogue.

Frank Maskey and O. N. Goldarcena were the gunners at the Sunrise ponds. Amby Buckley's shooting was confined to a blind at the famous Pringle pond.

There is not a great deal of Suisun marsh land in the market; what there is brings a good price. Twenty years ago \$2 and \$3 an acre was deemed a fair value for the marsh land and not much in demand at that.

Louis Pierce recently purchased a tract of 1000 acres near Twin sloughs, on the upper bay side of the marsh, paying \$37 an acre for the land. Shortly afterward an offer of \$100 an acre for 200 acres was made and refused.

Phil B. Bekeart, Emil Holling and F. K. Grundy of Chicago shot at Curlew Lodge on the lower Alameda marsh last Sunday. A foggy, sultry morning was not conducive to a big duck flight. However, twenty-three sprig and thirteen other ducks was the bag.

Shooting in the vicinity of Collinsville and Rio Vista has been very good for two weeks past. At the latter river point wild geese are extremely numerous.

Richardson's bay and Tomales bay have given a safe haven recently to thousands of all varieties of wild ducks during the pleasant weather.

Market hunters west of Gridley are reaping a rich harvest killing geese and ducks in the tule lands along Butte Creek. So numerous are the birds, especially the geese, that a rancher from west of the alfalfa town, brought nearly a whole wagonload of the geese to Oroville and disposed of them to local dealers in game. The birds are in a remarkably fine condition.

ANGLING BRIEFS.

Steelhead trout angling, with rod and line, is open all the year in tidewater fishing resorts. The experienced anglers know most of the steelhead waters, others again are unaware of the possibilities of the excellent sport of the bay waters and tributary creeks and sloughs.

The recent rains have sweetened the bay creeks and streams, enough to induce runs of steelhead. The up river net fishermen have been catching a few steelhead trout in their salmon nets during the past three weeks.

During the past ten days Napa creek has afforded pleasant trout fishing. The fish that run up this stream can not get over the dam a mile or two above Napa.

Sunday two weeks ago two score steelhead anglers were operating along the banks of a small creek that runs into Corte Madera slough near Kentfield. The tidings had gone the rounds that trout were in the creek. Tom Pollard Jr. hooked and landed a seven and a half pound fish, A. J. Frauenholtz's trout scaled three and a half pounds, Mo Uri, Floyd Spence, R. Z. Humphreys and others were in luck. On Tuesday J. Gonzales landed a six pound trout.

Near Schellville, at the "Embarcadero" on Sonoma creek, the members of the Schellville Rod and Gun Club had fair sport a week ago.

George Roberts and other members of the California Anglers' Association have recently caught steelhead in the Wingo creeks and sloughs. Some of our bay anglers intimate that choice fishing should be in order in Niles creek, near Alvarado. Further below, near the "bridge," Coyote creek and the many sloughs thereabouts are also a possibility in that respect.

Francisquito creek near Palo Alto and also Stevens creek close to Mountain View are steelhead suggestions from anglers who have fished those streams at this time of the year.

Point Reyes will no doubt be the objective point tomorrow of numerous knights of the split bamboo rod. The sport in the Paper Mill creek tidewaters should improve from now on, particularly since the operations of the net fishermen are prohibited until October 23d.

A week ago the grist was not a pleasing one, but few fish were taken. The Monday previous James Andrews fished the "white house" pool. A seven and a one and a half pound trout were the largest fish he landed.

In a letter last week to Dr. J. Auburn Wiborn from Dr. Rayner of Duncan's Mills, comes the news that two large steelhead were caught Wednesday.

The last storm raised Russian river about six feet and rolled the water so that angling was impossible. Since then the river has fallen that much, but the needed clear water conditions are hardly apparent.

Recent reports from Point Arena state that there is a run of big steelhead in the Guallala river, which empties into the ocean at that point.

Along the San Mateo shores the Pascadero lagoon is credited with offering now excellent steelhead fishing. Further north the trout have made their appearance in the San Gregorio lagoon. San Pedro creek and the nearby lagoon at Salado beach are usually good for a few nice steelhead during this month.

Santa Ynez river, near Lompoc, has been available for some few weeks past for excellent steelhead angling. The stream is an easy one to fish, the banks being open and clear of brush along the tidal stretches. The big trout in this water range from six to nine pounds in weight, eight and ten inch fish, however, are plentiful. Al M. Cummings has enjoyed several weeks' good fishing as well as quail and snipe shooting in that section of Santa Barbara county. John Cattermole left for a try at the stream Friday last week and had two days' fine sport.

Striped bass angling at the Wingo fishing waters received an impetus two weeks ago when a 40 pound fish was caught, that will, no doubt, be the incentive for a big rally of the clam-tossers tomorrow along the levee banks.

Rev. Philip Maxwell Prescott of Washington, D. C., at present in this city, is an ardent devotee of striped bass angling. He is familiar with fishing conditions on the New Jersey shores and other Atlantic fishing resorts.

Among other data in regard to the habits of striped bass, he states that these fish have a way of disappearing from the Eastern shores at times, particularly the big fish, and remaining away for a long time. No one, as yet, has been able to explain where the fish go or what prompts them to leave. This is precisely what striped bass do in our waters.

A few bass were taken last Sunday, one a 17 pounder by M. Merrill, the hero of the big catch the previous Sunday. Louis Gotthelf, fishing with clam belly baits, caught a two and a half pound steelhead, a capture that gives this variety of trout credit for an appetite not confined to the orthodox salmon roe bait.

Frank Marcus, Bob Sangster, E. Accret and other San Antone slough frequenters caught a few minor sized striped bass Sunday. In this creek and Schultz slough it is claimed there was too much salt water at present for good striped bass fishing.

K. Wertheimer, the champion Thuron lagoon striped bass angler, has designed a new bass spoon and combination bait.

Drink Jackson's Napa Soda.

AT THE TRAPS.

North Yakima, Wash., February 1.—By a score of 189, shot on the trap grounds of the North Yakima Gun Club today, the Spokane team, competing in the trap shooting tournament, was victorious here this afternoon. Both Hugh Poston and Lester Reid, representing Spokane, shot in fine form.

This gives Spokane two wins and Portland two wins, against nine victories for the San Francisco team, Willet and Fisher. The scores were:

Spokane 189—Poston 93, Reid 96.

Portland 183—Guy Holohan 93, P. J. Holohan 96.

San Francisco 182—Willet 94, Fisher 89.

The teams shoot at Pasco tomorrow, Spokane Sunday, Lewiston Tuesday and Walla Walla Wednesday.

Pasco, Wash., February 2.—The team competition today resulted in a win for the Spokane team, Poston and Reid, who broke 187 out of 200. Willet and Fisher scored 184 and the Holohans came out of the fray with 182.

Spokane, Wash., February 4.—Spokane carried off the honors in the shoot of the touring tournament held today under the auspices of the Spokane Gun Club. Poston and Berger of the Spokane touring team, defeated the two Holohans of Portland in the shoot-off of another tie, while Chingren and Tom Ware, Spokane amateurs, won out against the Spokane tourist visitors.

The scores in the team shoot were:

Spokane 183—Poston 97, Berger 86.

Portland 183—G. Holohan 94, P. Holohan 89.

San Francisco 171—Willet 94, Randlett 78.

In the shoot-off Spokane won out. Spokane 93, Portland 90 out of 100. The Spokane amateurs, Chingren and Ware, scored a total of 190 against Poston and Berger's 183. The standing now is: San Francisco 9. Spokane 4, Portland 2.

Kendrick, Idaho, February 5.—In the trap shooting touring tournament, the shoot held here today under the auspices of the Kendrick Gun Club, the Spokane team made the fourth straight win with 187 against 180 for the San Francisco tourists. Fred Willet of the San Francisco team and E. J. Chingren, amateur of Spokane, were tied for the high score of the day with 121 breaks in 125 targets. Chingren broke 103 straight. Scores:

Spokane 187—Poston 95, Berger 92.

San Francisco 18—Willet 97, Randlett 83.

Portland 179—P. J. Holohan 89, G. Holohan 90.

The teams shoot at Lewiston, Idaho, tomorrow and at Walla Walla on Wednesday.

Lewiston, Idaho, February 6.—Spokane trap shots scored their fifth straight victory in the Northwestern touring tournament event held here under the auspices of the Lewiston Gun Club. The score:

Spokane 187—Poston 93, Berger 94.

San Francisco 180—Willet 97, Randlett 83.

Portland 180—F. Holohan 91, G. Holohan 89.

The standing of the touring teams now is: San Francisco 9, Spokane 6, Portland 2.

Walla Walla, Wash., February 7.—Spokane made it six straight victories in the Northwestern touring trapshooting tournament held here under the auspices of the Walla Walla Gun Club today. E. J. Chingren, the Spokane amateur, was again high man with a score of 99 out of 100. Willet was high gun among the tourists with 97. The scores were:

Spokane 191—Poston 96, Berger 95.

San Francisco 183—Willet 97, Randlett 91.

Portland 185—Guy Holohan 94, F. Holohan 91.

San Francisco has now won nine contests, Spokane seven and Portland two. The next shoot will be at Boise on Sunday.

The initial trap shoot of the recently organized Ben Lomond Gun Club was held at Ben Lomond last Sunday. Most of the club members are novices in the art of smashing clay pigeons. Clarence A. Haight, Joe Rice and W. A. Simonton, smokeless powder experts, took charge of the Santa Cruz sportsmen's function and aided materially in making the shoot run smoothly.

Wm. F. Silvey is the secretary of the club. A set of Sergeant traps has been installed on the club trap ground. The background, however, where the shooters face a steep mountain side is a bit hard going for novices. A Du Pont trophy and other class prizes will be hung up for the season high scores. The members are a jolly lot of good fellows, which argues the success of the new club.

M. A. Perkins, with nineteen breaks out of twenty-five, and F. A. Dickinson with sixteen, were the high club guns in a twenty-five bird club match. The other club scores were: W. F. Silvey 10, C. H. Paradis 12, J. E. O'Connor 8, A. L. Koch 8, B. C. Peterson 10, H. Heggis 3, T. Heggis 11, H. Turcot 6, H. Rueff 9, T. R. Du Bois 7, J. Cober 5, E. R. Abbott 8, H. Lyng 3, M. Divan 12, H. R. Sault 2, C. A. Haight 18, W. A. Simonton 19.

Twenty-five blue rocks—Haight 20, Silvey 12, Dickinson 11, Simonton 20, Paradis 15.

Ten bluerocks—Peterson 7, Eilvey 1, O'Connor 2, Koch 6, A. Carpenter 1.

Twenty-five blue rocks—Height 23, Kober 13, Dickinson 11, Simonton 20, Paradis 13.

The club proposes to hold blue-rock shoots twice a month during the coming season.

The Interstate Association's seventh Southern Handicap tournament will be held at Columbus, Ga., May 14, 15 and 16, under the auspices of the Columbus Gun Club, and the association's seventh Eastern Handicap tournament will be held at Bradford, Pa., on July 16, 17 and 18, under the auspices of the

Bradford Gun Club. There will be \$1000 added money at each tournament.

In response to an invitation from the Quincy Gun Club, a letter has been received from J. A. Donnenth, of the Taylorsville Gun Club, stating that it is probable that ten members of the last named organization will accept the offer of the former club and go to Quincy on February 22d and cross guns, so to speak on the bluerock grounds east of town.

The Taylorsville club has been organized only a short time, but from scores made it is evident that the organization is developing some good material.

The official list of registered trapshooters, just issued, places Pennsylvania in the lead with 668; Ohio second with 341, New York third with 314. The list shows, Alabama 60, Arizona 3, Arkansas 69, California 87, Canada 239, Colorado 58, Connecticut 184, Delaware 56, Washington, D. C., 11, Florida 2, Georgia 19, New Mexico 16, Idaho 56, Illinois 248, Indiana 75, Iowa 267, ansas 130, Kentucky 38, Louisiana 19, Maine 28, Maryland 114, Massachusetts 82, Michigan 17, Minnesota 50, Mississippi 38, Missouri 237, Montana 35, Nebraska 190, New Jersey 146, New York 314, North Carolina 52, North Dakota 36, Ohio 341, Oklahoma 69, Oregon 40, Pennsylvania 668, South Carolina 11, South Dakota 60, Tennessee 39, Texas 59, Vermont 28, Virginia 76, Washington 78, West Virginia 51, Wisconsin 187, Utah 5, Wyoming 2.

Little Rhody and the Granite State powder burners are each represented by one shooter.

LOCAL KENNEL POLITICS.

In another column we honor the Golden Gate Kennel Club's initial statement for the March show, with publication. Their announcement appeared simultaneously in three Sunday morning dailies of this city.

As an example of misleading bunk and a gold brick for the fancy it is a prize production. This epistle was followed last Sunday by other fullsome stuff. A great play being made on the alleged support Eastern specialty clubs would give the "cuckoo" club show. Names of wealthy and prominent Eastern breeders were mentioned, what their dogs were worth and what they won. All to be shown here in March—including an \$800 cup—with strings on it.

Every paragraph in the statement here given for comparison is of no purpose, save to bamboozle the general public who are beginning to care less about dogs and A. K. C. dog shows every year, a condition brought about by these same tactics.

The general public may be fooled and disgusted but the intelligent fancy is another quantity—a known and knowing one.

The resolution published is laughed at by the "home rulers" who almost unanimously challenge A. K. C. disqualification. It may keep out a few of the timid or vacillating exhibitors. At all events it will put a quietus on the pet dog handlers and exhibitors, who bargain for inducements and stand in with the side that bids the highest. The San Francisco Kennel Club will not tolerate the latter class and is well rid of the former weak material.

Six shows held under National rules in the State last year were bigger shows than the eleven shows under the A. K. C. yoke. The 1911 show of the San Francisco Kennel Club was a five pointer, Oakland turned out a four pointer, Stockton, San Jose and Bakersfield were three point shows. Larkspur was a one day two point show. Two specialty shows in Kansas City were four pointers. This showing beat the A. K. C. following hands down in spite of strenuous "enthusiasm unequaled."

The Golden Gate Kennel Club in this city last year was only a four pointer. Two license shows at Del Monte, the Mill Valley, Oakland, Pasadena, Sacramento, San Jose (cuckoo No. 2) and Santa Cruz, despite all efforts, could not go over the two spot points—raised the deuce at it were, practically each of these shows was a repeat.

San Mateo one day on the grass was a four pointer and has the proud distinction of holding down the record for one dog classes—148 of 'em, count 'em, 148!—being nearly 50 per cent of the number of dogs shown. Who can beat it?

Los Angeles held a three point show. This show was given by the Ladies' Kennel Association of Southern California, was an excellent exhibition, well managed and a credit to the club. Under A. K. C. rules perfunctorily not as a standard bearer of A. K. C. kennel politics.

The S. F. K. C. show last year was the first five pointer held here in a decade. Seattle gave a five point A. K. C. show in 1911, later in the year another show fell off two points. Denver, Portland, and Tacoma only held three-pointers, while El Paso and Spokane played for double tallies only. The El Paso show people were, it is reported, unfortunate in the selection of some of their show officials, a jolly row between them being the aftermath. Moral, don't invite a medicine man to run a show.

Six and eleven are seventeen. That many bench shows during a year in California is too many. Six quality shows for fanciers and one-dog-men in the interest of the dog is of far greater utility than shows that are nothing more than exhibitions of big kennels. Anybody with a long purse can get the best dogs there are anywhere in the world. That is all right as an exhibitor. But, as we understand it, the breeder is the one that should be encouraged and breeding a flyer is an achievement to be proud of. The long priced keyers do not always come out tagged with a guarantee of producing merit.

A decade ago the Pacific Fox Terrier Club was flourishing, where is it today, and where is the fox

terrier fancy on the Coast? One big kennel swept all opposition and put the outsiders in the scrap box. terrier fancier on the Coast? One big kennel swept This big kennel, after breeding and showing the winner in New York, an achievement to be proud of, has passed away, there being "no more worlds to conquer."

National shows will prevail on the Coast and in the Middle West when the American Kennel Club's name is a byword—and an odoriferous memory in the nostrils of a united fancy.

GOLDEN GATE SHOW.

With an enthusiasm unequaled in the history of the Golden Gate Kennel Club, preparations are already in progress for the club's third annual show, to be held at the Auditorium, Page and Fillmore streets, on March 19 to 22 inclusive.

Aristocratic dogdom from Puget Sound to the Gulf of California is interested and is waiting impatiently for the judge's signal to come forward for examination and the award of the silver trophy and blue ribbon.

The officers of the club have been so fortunate this year as to secure James Mortimer of New York city to be the judge of the show. He will judge all breeds. Mortimer's reputation as a judge of the highbred dog is worldwide. He is considered one of the greatest living judges of the dog and he is probably the oldest judge in America. More than thirty years ago he founded the Great Westminster Kennel Club Show of New York, which he has managed ever since. He has given his assurance to the management of the local show that he will surely come to San Francisco this year and officiate during the four days of the show in March.

Entries close on March 10. The club has opened offices in the Westbank building Market and Ellis streets, and all communications are to be addressed to the superintendent of the show at this address. Entries will be made there and all information concerning the show will be given.

This year the officers are Irving Ackerman, president, and Alex Wolfen and J. Arthur Folger, vice presidents.

The show is to be a five-point affair which means that the winners will be able to earn five points toward a national championship under the rules of the American Kennel Club.

At the last meeting of the Golden Gate Kennel Club the following resolution was adopted:

"Resolved, That the privilege of entering dogs at the coming show be denied to those persons who shall between now and the date of the closing of entries on March 10, 1912, enter their dogs at any show held in San Francisco under rules other than those of the American Kennel Club.

"This rule is to apply not only to a person making the entry, but also to a dog that has been entered in such show."

The premium list will be issued in a few days.

It is the ambition and intention of the club to make this coming show the biggest and finest that the club has ever given and an event that will eclipse any other of the kind ever held on the Pacific Coast. Already assurances have come that dogs of lofty lineage will be shipped from points all over the Coast. The trophy list will be larger and better than ever before. The Auditorium has been selected as the largest and most suitable pavilion for a bench show in the city. Every possible detail as to ventilation, space and bench room will be carried out carefully, and all exhibitors are promised that their exhibits will have the best of care during the show. Attendees and veterinarians will be constantly in the building.

Among those who will exhibit are Mayor James Rolph Jr., who will have eight dogs on exhibition from his Mission Cocker Kennels; Miss Irene Sabin of Mountain View, who will show her magnificent wolf hounds; Miss Forgeus, Russian wolf hounds; Miss Jennie A. Crocker, twenty dogs, Boston terriers and French bulldogs; A. Balfour, Burlingame, white West Highland terriers; Mrs. E. F. Brown, collies; W. W. Burnett Jr., James Carroll, Carroll Cook, fox hounds and setters; Miss Lydia Hopkins of Menlo Park, four Pomeranian and four Pekingese spaniels; Frank E. Watkins and Mrs. Robert Weinstock.

Peters Points.

In the Preliminary Handicap at the Pinehurst Tournament, January 24-29, 1912, Woolfalk Henderson, shooting Peters shells, tied for high professional score, breaking 92 ex 100 from 20 yards, and Mr. R. H. Bruns was second amateur 92 ex 100, also with Peters shells. Mr. E. H. Storr made second high professional score in the Pinehurst Handicap, 93 ex 100, from 19 yards.

At Chicago Gun Club, January 28, Mr. H. W. Cadwallader was high man for the day, breaking 116 ex 125, with Peters shells, the kind with "steel where steel belongs."

No Changes in Selby Shells.

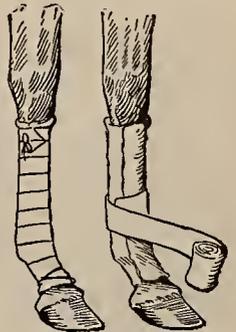

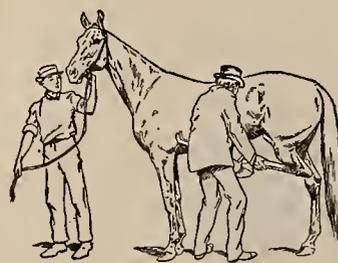

Although it is generally known, the Selby Smelting & Lead Company wish to announce to their many friends, that the coming of Winchester and Rem-UMC. loads to the Coast will in no way affect their arrangements with these companies and that the shooter will be able to obtain the fresh, reliable Selby Load in Winchester, Rem-UMC. and U.S. shells as heretofore.

Mr. Ed Mitchell of Los Angeles has recently joined the Selby ranks, and is now hoisting for the fresh, reliable Selby Loads in the South. He is a shooter of some note, having won, amongst many other trophies, the Pacific Coast Handicap Medal for 1911.

SAVE-THE-HORSE

TRADE MARK REG'T.

OUR LATEST "Save-the-Horse Book"—Is our 16 Years Experience—Treating 87,364 Horses—Ringbone—Thoropin—SPAVIN—Curb and ALL—Shoulder, Knee, Ankle, Hoof and Tendons. With Mistakes left out DISCOVERIES PUT IN. It is a Mind Settler; Tells How to Test for Spavin—Where and What To Do For A Lame Horse—COVERS 58 FORMS OF LAMENESS—ILLUSTRATED.

Write for this and also Book on the "Use and Abuse of Bandages."

Mailed Free to Owners, Trainers and Managers, Only.

January 4, 1912.

Troy Chemical Company, Binghamton, N. Y.:

Gentlemen: My Morgan mare was very lame from bone spavins on both hocks. I was told by my liveryman that there was no cure. She is a splendid roadster, and afraid of nothing. I noticed your advertisement and wrote for your book. With a promise from my livery stable owner (Wm. Henry, Madison st., Brooklyn) that he would personally apply it, I bought a bottle. It has not only taken the swelling down, but she has not shown a lame step since. I am more than delighted with the results. Mr. Henry (an old horseman) says he will never say bone spavins cannot be cured, for my mare shows what Save-the-Horse can do.

Yours truly,

W. E. ATKINS.

Nassagaweya, Ont., Dec. 11, 1911.

Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: Last June I purchased one bottle of Save-the-Horse to cure a bog spavin and thoroughpin which I drew on while stoning with a stone machine and after a cure had been effected I had one-third of the bottle left.
I went West this fall and two days after I was gone she stumbled and fell while playing in a rough pasture field. The veterinary blistered and poulticed her until I came home; that is two months ago, and she was still unable to put her foot under her. The veterinary said it was a rupture in the coffin joint as near the toe as it was possible to get. When I came home I discarded his treatment and used the remainder of Save-the-Horse and she is nearly sound. This mare is a dapple-grey Percheron, three years old, and weighs 1500 pounds. Please send me your opinion and another bottle of your cure from your Toronto office. Your truly,
ALEX CRAWFORD.

JUST NOTE THE KIND OF WORK THIS HORSE DOES IN 5 DAYS' TIME.

Troy Chemical Company, Binghamton, N. Y.:

Dear Sirs: I have used your remedy now for five days and must say it is wonderful; did not expect any such results. The horse had not been able to put her heels to the ground and when she walked she would barely touch her toe to the ground and then jump with the other foot. I gave her the first treatment Sunday noon and when I went in the stable Monday morning she was still resting the foot, but when I made her stand over she put the foot plumb on the ground, and bore her weight on it; then I took her out and she walked on it very well. I put her in the team Thursday afternoon and went in the woods after a load of wood, and got in a place where they had to do their best or stay there. She lifted as hard as ever I saw her. I expected to see her lame next morning, but she was not. The trouble seemed to be in the lower part of the tendons of her hind leg. Under these conditions, how long shall I continue to treat her?
Very truly,
R. H. WILLIAMS.

YOU WILL OBSERVE THERE WAS NO FEVER OR ENORMOUSLY SWOLLEN LEG, NOR LAYING UP OF THE HORSE WITH THE TREATMENT.

Save-the-Horse is the one remedy ever discovered that can always be SAFELY used on a seriously injured tendon while the horse is kept in training, or raced, and prove successful in permanently curing the condition.

Over 95 per cent. of the Owners, Breeders and Trainers of the most valuable horses in the world today are constant users of Save-the-Horse.
For over 16 years it has saved horses and is doing it more today than ever; it does, after all others get through; it undoes the damage and complication others make.

MAKES A TENDON AS STRONG AS A ROD OF STEEL.

\$5 A Bottle

With a binding contract to refund money or cure any case of Bone and Bog Spavin, Thoroughpin, Ringbone (except low), Curb, Splint, Capped Hock, Windpuif, Shoe Bolt, Injured Tendons and all Lameness. No scar or loss of hair. Horse works as usual.

AT ALL DRUGGISTS AND DEALERS OR EXPRESS PAID.

BRED TO THE BEST BRED TROTTING STALLIONS!

Palo King 2:28 1/2 --- Reg. No. 44910.

Sire of Little Lucille (3) 2:19, the greatest pacer of her age on this Coast. Sired by Marengo King 2:29 1/4 (son of McKinney 2:11 1/4 and By By by Nutwood 2:18 1/4); dam Palo Belle 2:24 1/2 by Palo Alto 2:08 3/4; second dam Belle Isle (great brood mare) by Piedmont 2:17 1/4; third dam Ida Belle (great brood mare) by Hambletonian 10; fourth dam Godfrey Star by American Star 14. Palo King is a beautiful bay, stands 16 hands, is a pure-gaited trotter, and all his progeny are intelligent, have style, finish and extreme speed. TERMS \$25 for the season.

Iran Alto 2:12 1/4 --- Reg. No. 24586.

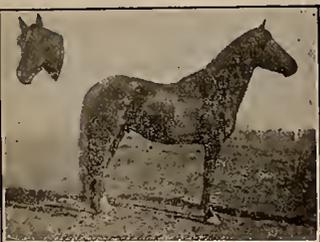

Sired by Palo Alto 2:08 3/4; dam Elaine 2:20 (dam of 4 trotters, 1 sire of 15, 2 dams of 9) by Messenger Duroc; second dam Green Mountain Maid (dam of Electioneer and 9 others in 2:30) by Harry Clay 45, etc. Iran Alto was one of our gamest trotters. He has 15 in 2:30, 3 dams of 3 in 2:30. TERMS \$15 for the season.

Alto Express

Sired by Iran Alto 2:12 1/4; dam Beautiful Bird by Nutwood Wilkes 2:16 1/4; second dam Expressive (3) 2:12 1/4 (dam of Atlantic Express (3) 2:08 1/4, Esther Belle 2:08 1/4, and the dam of Eva Bellini, timed as a two-year-old in 2:11 1/4, as a three-year-old beat 2:10 in her races) the greatest racing daughter of Electioneer. Alto Express is a perfectly made trotter and will undoubtedly be a sire. TERMS \$20 for the season.

For further particulars, address W.M. HOGOBOOM, Woodland, California.

THE ROYALLY BRED YOUNG STALLION

Best Policy 42378

By Allerton 2:09 1/4, Jay Bird's greatest son; dam Exine 2:18 1/4 (dam of Riverside (3) 2:30 and Rinola (3) 2:30) by Expedition 2:15 1/4; second dam Euxine (dam of 6) by Axtell 2:12; third dam Russia 2:28 (great broodmare) by Harold 413; fourth dam Miss Russell (dam of Maud S. 2:08 1/4 and 6 others), etc., etc. Best Policy is a handsome bay, has size, style and quality in every respect. Is a pure-gaited trotter. No better bred one in California. His progeny will be seen in races this year.

Season of 1912 at my feed stable, corner of Bridge and Center Streets, VISALIA, CAL.

R. O. NEWMAN, Owner.

McADRIAN 2:24

Reg. No. 45391. Sire of { Bert Kelly (trial) 2:11 1/2
Trix McAdrian . 2:23 3/4
Grace Chalmers (tr) 2:24

Sired by GUY MCKINNEY (sire of Vernon McKinney 2:02, Linden Girl 2:22, etc.); dam MAPLE LEAF 2:34 1/4 by Adrian 2:26 1/4 (sire of Roseta A. 2:14 1/4), son of Reliance 2:22 1/2 and Adriana by Skenandoah; McAdrian's grandam was OLLIE RAY 2:39 1/4, dam of Acclamation 2:24 1/4 (sire of Lizzie C. 2:15), Vendome, dam of McKinley 2:29; his great grandam was MARY BLAINE by Signal 33:27 (sire of the dam of Prussian Maid 2:19, etc.). Guy McKinney, sire of McAdrian 2:24, was by McKinney 2:11 1/4, out of Flossie D., by Guy Wilkes 2:15 1/4; second dam, Blanche Ward (dam of China Maid 2:05 1/4), by Onward 2:25 1/2; third dam, Blanche Patchen, by Mambrino Patchen 58, etc.

McAdrian is one of the handsomest and strongest made grandsons of McKinney in California. He has no faults; is a pure gaited trotter and a sure foal getter. He will make the season of 1912 at the Pleasanton race track. Terms, \$30 for the season. For further particulars, apply to or address

E. D. DIGGES, Owner, Pleasanton, Cal.

THE NECESSITY FOR SALT.

Regarding the requirements of farm animals for salt, Prof. W. A. Henry says in his book "Feeds and Feeding":

"Of the numerous salt-feeding experiments, only those of Babcock and Carlyle of the Wisconsin station are satisfactory and conclusive. In these trials dairy cows, well nourished otherwise, were given no common salt (sodium chlorid) for long periods—more than a year in some instances. The following conclusions were reached: 'In every case the cows exhibited an abnormal appetite for salt after having been deprived of it for two or three weeks, but in no case did the health of the animal, as shown by the general appearance, the live weight, or the yield of milk, appear to be affected until a much longer time had elapsed. This period of immunity varied with individual cows from less than a month to more than a year. There was finally reached a condition of low vitality in which a sudden and complete breakdown occurred. This stage was marked by loss of appetite, a generally haggard appearance, lusterless eyes, a rough coat, and a very rapid decline in both live weight and yield of milk.' If salt was supplied at this period recovery was rapid. In one case potassium chlorid was given instead of common salt (sodium chlorid). Considerable of the potassium salt was eaten, though cows ordinarily refuse to touch it, and recovery followed as quickly as when common salt was supplied—evidence that not the lack of sodium but the lack of chlorid was responsible for the troubles. The breakdown, due to the lack of salt, usually occurred after calving when the milk flow was heavy, and generally the cows giving the largest amount of milk were the first to show distress.

"Babcock points out that the amount of salt required in the ration will vary greatly in different localities. Soils which contain large quantities of salt doubtless produce feeding stuffs containing more salt than those poor in this ingredient; and again the water of streams and wells varies greatly in its salt contents. Those facts doubtless account for the disagreement among experiments in different parts of the world as to the importance and value of salt. Cows in milk and sheep show the greatest need

of salt; fattening cattle, horses, dry cows, and stock cattle require less salt; and pigs but little."

Prof. Henry concludes that "if animals are allowed free access to salt or supplied with it at frequent and regular intervals, they will consume only enough to meet the needs of the body."

A man can better afford to sell butter at the cost of production than to sell grain, that is, when the selling price of the butter includes the feeds and labor at their market value.

Cows are not always to blame for being unprofitable. We should never sell a cow to a butcher unless we can look her squarely in the eye and say: "Well, old girl, I've done my part to make you profitable."

One of the greatest mistakes a dairyman can make is to sell a bull when he is mature and at his best.

Much farm butter sells at a low price, not because it is in itself bad, but because it is made to suit the maker and not the buyer.

Show Horse! Race Horse!! Sire!!!

The Standard Trotting Stallion LIJERO 2:15 1/2 (Reg. No. 45923)

Sired by James Madison 2:17 3/4 (son of Anteeo 2:16 1/2), sire of 13 in 2:30 list, including Brilliant 2:08 1/4, Tuna 2:08 1/4, Emily W. 2:10; dam Hilda (dam of William Albert 2:16 1/2, a sire, Saint Ambrose 2:25, and Lijero 2:15 1/2, a sire), by Nutwood 2:18 1/4, the world's champion broodmare sire; second dam Eudora by Voltener the greatest sire of race horses that ever lived; third dam by American Star 14, the sire whose daughters have produced 43 trotters and among them some of our greatest sires.

Lijero is a brown stallion foaled in 1902, stands 16.1, and weighs 1200 pounds. He sired Expedio (3) 2:14 1/4. Public trial at Chico as a four-year-old in 2:08 3/4. Lijero forced Prince Lot 2:09 1/4 to trot in 2:10 1/4 at Woodland in 1910 and was only beaten a head. He started in five races, won three and was second in the other two and it gave Helen Stiles 2:08 3/4 and Prince Lot 2:09 1/4 all they could do to heat him in those two races. Very few horses have ever trotted in 2:10 with less work than Lijero. He should race in 2:08 this year. He has everything to recommend him as a game racehorse and as a sire he will undoubtedly be one of the best. He has size, style, color, conformation, disposition, the best of feet and legs, an iron constitution, and the purest of trotting action. His gameness is unquestioned. He is a perfect show horse and sires show horses. He and his daughter Expedio have won first prizes in the standard class at the California State Fair.

IDORA W., registered in Vol. XIX, Brown mare, 15 1/2 hands; foaled 1901. Sired by James Madison 2:17 3/4; dam Swift Tide by Albert W. 2:20; second dam Uarda (dam of Flowing Tide 2:14 1/4), by Echo; third dam Dewdrop. A sure breeder, due to foal to Lijero 1912. Entered in State Futurity and Breeders' Futurity Stakes.

TOOTS W., registered, Vol. XIX, Bay mare, 15 1/2 hands; foaled 1907 by Stam B. 2:11 1/4, dam Idora W. Due to foal to Lijero 1912. This mare is very fast, having worked quarters in 35 seconds as a two-year-old. Entered in State Fair Futurity and Breeders' Futurity Stakes.

JAMES H. DONNELLEY, h. g., 15.3 hands; foaled 1909. Sired by Lijero 2:15 1/2, dam by Hanford Medium; second dam Algerine (dam of Kelly Briggs 2:08), by Algona, etc. Entered in Breeders' Futurity and State Fair Futurity. With little work this one showed a mile in 1911 in 2:28, half in 1:30 and a quarter in 3 3/4 seconds. He will make a 2:12 or better pacer this year.

IVA W., h. f., foaled 1910; sired by Prince Ansel 2:30 1/4; dam Idora W. (which see). Entered in Breeders' Futurity, State Fair Futurity and Occident Stake. She is just broken to drive and will undoubtedly make a very fast mare. She is eligible for registration.

DR. JOHN, h. c. (1), by Palite (son of Nutwood Wilkes 2:16 1/2 and Palita, 2:16); dam Toots W. (which see). Entered in State Fair Futurity, Breeders' Futurity and Occident Stake. A fine large perfectly formed individual, nicely halter broken.

These horses are all sound and in good condition, ready for anything that horses can be used for. The mare Toots W., if worked, will make a 2:12 trotter, or even a lower record than this.

On account of the many demands upon my time in my business, I find I cannot devote any to the development or care of these, therefore I have decided to sell them.

Any further information regarding prices, etc., will be given by addressing **F. E. WRIGHT, 318 K. St., Sacramento, Cal.**

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's Caustic Balsam

IT HAS NO EQUAL

For the Human Body
It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints.

SPECIAL ADVERTISING.

Wanted, For Sale, and Miscellaneous advertising under this head will be set in nonpareil type (same type below) and will be published at the rate of 2 cents per word each insertion, or 6 cents per word by the month. Count each abbreviation and initial as a word.

FOR SALE.—The trotting stallion Altitude 2:22; seal brown; fine individual; sound and gentle. For terms, etc., address CHAS. THOMPSON, R. F. R. D. No. 3, Bakersfield, Cal.

STUD BOOK FOR SALE.—Volumes 1, 2, 3, 4, 5 and 6 of Bruce's American Stud Book; handsomely bound; good as new. Will be sold cheap. Address Breeder and Sportsman, San Francisco, Cal.

CLOSING OUT.—Sixty head of young mares and mules. One four-year-old, two-thousand-pound Percheron stallion. Might consider some trades. N. FARNSWORTH, R. D. 3, Bakersfield, Cal.

FOR SALE.—Percheron Stallion (grade, 4 years old, bay, absolutely sound, good disposition, and sure foal getter; weighs 1800 pounds. I have seven of his weanlings to show how he breeds. Price \$1000. For further particulars address J. E. MONTGOMERY, Davis, Cal.

FOR SALE.—Four-year-old filly (full sister to Celia K., trial at Stadium 2:10½). By Arner 2:17¾, dam by Direct 2:03¾; second dam Carrie S., by Mambrino Wilkes. She is a jet black, weighs about 1000 lbs.; handsome, strong, rugged, and sound. Just broken and shows speed, and if properly handled, will undoubtedly be as fast as her sister. I will exchange her for a good sound surry animal weighing from 1100 to 1200 lbs. H. OLSEN, 5014 E. 14th St., Oakland, Cal.

FOR SALE.—Handsome seal brown stallion, 6 years old, weighs 1200 pounds. Has paced a quarter in 30 seconds. He is an inbred Electioneer and is a sure foal getter. Purchaser can see his colts. Also black Percheron stallion, 9 years old, weighs 1700 pounds. Handsome and sure foal getter. The above horses will be sold cheap. For price and particulars, apply to Conion Bros, Ranch, San Pablo Ave., near County Line. Postoffice address, R. F. D. 1, Berkeley, Cal.

INFORMATION WANTED as to the present address of Monroe Berley, also known among horsemen as Fred Berley. Is about 65 years old and over six feet tall. He was employed at one time at Palo Alto and later worked for P. J. Williams. He went to Montana and came back to Sacramento some time ago. A liberal reward will be paid for finding him or for information that will lead to his discovery, as there is property waiting for his return. Address H. D. B., care Breeder and Sportsman, San Francisco, Cal.

FOR SALE.—ZOBLOCK 2:18, pacing as a two-year-old; trotting 2:24½ as a three-year-old; trial 2:19. He is a coal black stallion, five years old, stands 15.3 hands, weighs 1200, and one of the best made stallions in California. He should get a record of 2:12 or better this year. Is kind and gentle and is a half brother to the great trotter, Zoblack 2:26¼ that worked last fall in 2:08¾ for his owner, R. J. MacKenzie, and will be on the circuit this season. Zoblack is a standard and registered horse, his papers having just been sent for. He was sired by Zolock 2:05¼ (one of the best speed producing sons of McKinney 2:11¾) and his dam is Madeleine Marshall by Demonto 2:11, second dam that great broodmare Mamie Comet 2:23¼ by Nutwood 2:18¾. He will be sold at a reasonable figure as the farm I have leased has been sold and I am compelled to get a new place. This is my only reason for selling Zoblack and the following:

TWENTY-THREE SKIDOO. standard and registered black mare, foaled 1906, sired by Nutwood Wilkes 2:16½, dam Twenty-Third (dam of Sterling McKinney 2:06¼) by Director 2:17, second dam Nettle Nutwood (dam of Hillsdale 2:15) by Nutwood 2:18¾, third dam by Wick's Ethan Allen Jr., fourth dam by Williamson's Belmont. This mare is a fine sized, well made, trotter, gentle, but has never been worked for speed. She is bred to be as fast as any.

STAR POINTER, filly (4), out of Trix (dam of Aerolite 2:07½, Mona Wilkes 2:03¼ and four others) by Nutwood Wilkes 2:16½, etc. This is a nice big mare, stands 15.3 hands and is a free-legged pacer, was handled a little as a two and three-year-old. She was bothered with splints, so I did not work her. They have disappeared, and, as she never gave a lame step, they must never have been near a cord or tendon. From her breeding she should make one of the greatest of broodmares.

Dan Logan filly (3) out of the standard and registered mare Sophla (dam of Sophla Direct, p. 2:23¾, and Corona 2:27) by Robt. McGregor 2:17¾; second dam Orawood by Wildwood 144, third dam Lady Utterback by Mambrino Patchen Jr. Dan Logan, her sire, had a trial of 2:12 and is a full brother to the champion Jim Logan 2:05¾. This filly is a pure-gaited trotter, just been broken and will undoubtedly be a fast mare. Her breeding can hardly be excelled. For prices and further particulars address J. W. MARSHALL, Dixon, Cal.

FOR SALE, CHEAP.—One registered stallion, sired by McKinney 2:11¾; 8 years old; sound. Also one imported draft registered stallion; weight 1800 pounds; 7 years old. Would consider trade on heavy mare or standard-bred mares, or fillies. Breeding and pictures sent to interested parties. Address D. A. BAKER, Hill P. O., San Diego, Cal.

FOR SALE.—Halley Wilkes, black mare by Count Wilkes 2:21; dam by Orator, grandson of Electioneer. An ideal road mare, trots good road gait; paces when at speed, free legged; uses no boots. With one month's training paced quarter mile in 34½ seconds, half mile in 1:12 on half-mile track. Also three and four-year-old fillies out of the same mare by Dictatus 2:17. For price and particulars address W. S. CLARK, Gustine Stock Farm, Gustine, Cal.

STANDARD MCKINNEY STALLION FOR SALE.—Scott McKinney 33749, by McKinney, dam Primrose (great brood mare) by Sidney; second dam Brown Rose by Privateer; third dam Lady Baldwin by The Moor; fourth dam daughter of Ben Lippincott, son of Williamson's Belmont. Scott McKinney is a handsome bay horse; weighs about 1100; good gaited, and all his get are fine individuals and show speed. Price \$500. Has State license for this year. Address DR. M. F. SCHALTENBRANDT, 4051 20th St., San Francisco.

Public Training Stable

Pleasanton Race Track, Pleasanton, Cal.

Trotters and pacers trained at reasonable rates for this season's campaign. Best of care given. Developed and drove the following better than 2:18 in 1911: Prof. Heald 2:09¾, Cresto 2:12¾, Bodaker 2:13, Merrylena 2:23 (miles in 2:12) and Reina Directum, matinee, 2:11, over the Stadium track. These are all trotters. Address

CHARLES JAMES, Pleasanton, Cal.

FOR SALE—Electeur Jr.

A fine young Percheron Stallion, six years old next April. Weighs 2400 pounds. He was sired by Electeur, imported from France in 1904, sired by Valtaque 25159; dam, Sultane 43394; second dam, Biche 17881; third dam, Pelotte 1850. Electeur Jr. is solid black in color, well formed in every respect and is a sure foal getter. His dam is by Uptumus, he by Duke de Charters, the most celebrated horse in the United States. No finer Percheron Stallion is in the State. Can be seen at the McCarty Ranch, 4½ miles northeast of Suisun. Price very reasonable. ED. McCARTY, Owner, Suisun, Cal.

KEEP YOUR HORSES IN PRIME WORKING CONDITION

A HORSE in the field—working for you—is worth two in the barn—simply eating their heads off. There is no way of preventing spavin, ringbone, splint or curb from suddenly lamming and laying up your horses—but there is a way of safely and easily curing all these ailments and preventing them from keeping your horses laid up. For over 35 years there has been a reliable remedy that horsemen everywhere have depended on to save them money, time and worry.

Kendall's Spavin Cure

has been the trusted remedy of horsemen everywhere. It has not only been saving untold time, work and worry but thousands of dollars' worth of valuable horseflesh and has many times saved horses from death.

Here's a man—Mr. W. T. Campbell, Macadonia, Ky.—who not only saves money but actually makes money by using Kendall's Spavin Cure. He writes: "I have used 2½ bottles of your Spavin Cure, and have cured two mules of Bog Spavin. I bought the mules for \$80.00 and can now cash them for \$400.00. Shall never be without your great remedy."

Here's another man who has used Kendall's Spavin Cure with remarkable success. Mr. Floyd Nelson, Kings Ferry, N. Y., writes: "I have used your Spavin Cure for the past six years and have made in the neighborhood of \$700.00 buying Spavined horses and curing them. I consider there is nothing equal to it if it is used according to directions."

Never be without a bottle of Kendall's Spavin Cure. You can never tell when accidents will happen—when this remedy may be worth the price of your best horse. It is better to be prepared.

Don't call your case "hopeless" in the face of above testimony. Next time you go to town get a couple bottles from your druggist. The price is uniform, only \$1.00 per bottle, 6 bottles for \$5.00. At the same time ask for our invaluable "Treatise on the Horse," or write to

Half brother to Sorrento Todd (4) 2:14³/₄, Belle Sentinel 2:15, etc.

THE BONDSMAN 37641

BARON WILKES 2:15... Sire of 12 in 2:10, including Bumps 2:03³/₄, Rubenstein 2:05, Baron May 2:07³/₄; sired dams of 4 in 2:10.

SORRENTO 2:14³/₄... Dam of Jay Hawker 2:14³/₄, Sorrento Todd (4) 2:14³/₄, Belle Sentinel 2:15, Bola 2:19³/₄, Lazy Bird 2:26³/₄, Teddy Sentinel, 2:29³/₄, The Tramp (sire), etc.

GEORGE WILKES 2:22... Sire of 83, dams of 204.

BELLE PATCHEN 2:30... In great brood mare list.

GRAND SENTINEL 2:29... Sire of 23, including Nettle 2:16³/₄, Tosca 2:18³/₄.

EMPRESS... Dam of 2 and granddam of 9.

HAMBLETONIAN 10... Sire of 40.

DOLLY SPANKER... Dam of 1.

MANBRINO PATCHEN 65... Sire of 25, dams of 162.

SALLY CHORISTER... By Mamb. Chorister, dam of 2 in 2:20, etc.

SENTINEL 280... Sire of 8 in list.
MAID OF LEXINGTON... By Mamb. Pilot 29.
ABDALLAH MAMBRINO... Sire of 15, dams of 42.
BIG ELLEN... By Clark Chief.

4th dam Virgle—by Abdallah 15.
5th dam Lucy—by Highlander (Veech's).

THE BONDSMAN is the only stallion that sired three new 2:10 performers with race records in 1910. In spite of the fact that he has no record, The Bondsman was a colt trotter of great merit. He was a contending colt all through the Kentucky Futurity of 1899, getting third money. This was a six-heat race and was won by Boralma. As a four-year-old he was not raced, but trotted a public trial in 2:11. As a sire he is destined to be the leading son of the great Baron Wilkes, founder of the greatest futurity winning family. He will make the season of 1912 at

Pleasanton Training Park. **\$100** the Season with usual return privilege 1913. Season ends June 1st.

THE PATCHEN BOY 39033

Three-Year-Old Record 2:10³/₄ In a Winning Race.

Sired by the Great WILKES BOY 3803, sire of 107 in standard time.

A Genuine Race Horse and a Sire of Early and Extreme Speed.

The Patchen Boy 39033 is sire of the following:

- | | | |
|---|---|--|
| Francis J.2:08 | Legal Patchen ...2:15 ³ / ₄ | Dorothy C.2:19 ³ / ₄ |
| Evelyn Patchen...2:10 ³ / ₄ | Lucile Patchen ...2:16 | Louise Patchen ...2:18 ³ / ₄ |
| Scott Patchen ...2:12 ³ / ₄ | Jerry Patchen ...2:16 ³ / ₄ | Dr. Warren ...2:19 ³ / ₄ |
| Dessie Patchen ...2:13 | Knightsown Belle 2:16 ³ / ₄ | Roscoe Blinnig ...2:20 |
| Frank Patchen ...2:13 ³ / ₄ | Alec Williams ...2:18 ³ / ₄ | Mary Patchen ...2:20 ³ / ₄ |
| Ruby Patchen ...2:13 ³ / ₄ | Lois Patchen ...2:19 ³ / ₄ | Black Patchen ...2:20 ³ / ₄ |
| J. C. Patchen ...2:14 ³ / ₄ | Auduous the Miller 2:19 ³ / ₄ | and 11 others in 2:30. |

Dam Lady Clay, the dam of The Patchen Boy (3) 2:10³/₄, C. W. M. 2:24³/₄ (trotted to high wheels), Anglin Wilkes 2:16³/₄ over half-mile track, trial 2:09³/₄, by Metropolitan 1372, son of Hambletonian 10; second dam, Haggie Brown, by Ashland Clay; third dam, Pitty Pat, thoroughbred. The Patchen Boy was the greatest three-year-old race colt in the world, winning six straight races in the Grand Circuit the only year he was raced. His produce are good-headed and real race horses. (No tin cups.)

THE PATCHEN BOY is a beautiful black, 16.1 hands and weighs 1290 pounds. His colts are of fine size, great individuals and the kind that sell for the high dollar.

Season of 1912 at Pleasanton Training Park. Fee: **\$50** Return privilege 1913.

Both of the Above Horses Will Remain in California.

Best of care and attention given mares, but no responsibility assumed for accidents or escapes. Good pasturage at reasonable rates. For further particulars and full tabulated pedigree, address

CHAS. L. DE RYDER, Pleasanton, Cal.

A Choice Collection of Kentucky Saddle Horses for Sale.

THE STANDARD TROTTING STALLION

AIRLIE DEMONIO 51640

Stands about 16 bands, handsome, sound, without blemish, stylish, fine individual in every respect. Sired by Demonio 2:11³/₄ (sire of Mono Wilkes 2:03³/₄, Denervo 2:06³/₄, Nordwell 2:08³/₄, Memonio 2:09³/₄, Demonio Wilkes 2:09³/₄, Ben Rusb (3) 2:10³/₄, etc., etc.), dam Potrero Girl by Prince Airlie 2:04³/₄; second dam Moscova 2:28³/₄ (dam of Mamie R. (3) 2:15³/₄, Oro Belmont 2:15³/₄, La Moscovita, dam of Frank N. 2:07³/₄, Bon Guy (3) 2:11³/₄, etc.), by Belmont 64; next dam Gosa (dam of 5 in the list), by Woodford Mambrino 345; next dam Hermosa (great brood mare), by Edwin Forest.

Will make the season of 1912 at

CITY STABLES, WOODLAND, CAL.

FEE, \$30 TO INSURE. Usual return privilege. Good pasturage \$2.50 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. Address CHARLES JOHNSON, Woodland, Cal. Phone 40.

TOM SMITH 2:13

Sire of Futurity Stake Winners. Reg. No. 47700

TOM SMITH is one of the handsomest sons of McKinney on the Pacific Coast. He has size, style, speed, is a sure foal getter, and has every qualification to make him one of the greatest of the McKinney tribe. He is the sire of Katalina (2) 2:22³/₄, (3) 2:15³/₄, (4) 2:11³/₄, Ella Mac (3) 2:14³/₄, Vallejo Boy 2:15, Eddie G. 2:30. Every one of his colts that has been trained has shown standard speed.

Sire, McKinney 2:11³/₄; dam, the great brood mare, Daisy S. (dam of 6 with records of 2:09³/₄ to 2:28³/₄) by McDonald Chief 3583; second dam, Fanny Rose (dam of 2 in 2:20) by Ethan Allen Jr. 2903.

Will make the Season of 1912 at the

DRIVING PARK, SAN JOSE, CAL.

Fee, \$50. Usual return privilege. The best of care taken of mares in any manner that owners may desire at reasonable rates, but no responsibility assumed for accidents or escapes. Excellent pasturage. Mares shipped will be met at the train. For further particulars, address P. F. DAVEY, Driving Park, San Jose, Cal.

Apply or address JAS. D. JOHNSTONE, Elmhurst, Alameda Co., Cal.

The Man Who has Come Back.

The host of admirers of what the veteran war horse of the shooting game—**The Hon. T. Bill Crosby**—has done lately with his 34-inch harrel Parker gun, will be glad to read the following, viz:

- In the Eastern Handicap . . . 100 out of 100 targets.
- In the Western Handicap . . . 492 out of 500 targets.
- In Evansville, Ind., Tournament . . . 395 out of 400 targets.

Making a continuous run of 987 out of 1000 targets

The only straight score ever recorded in the **Grand American Handicap** event was made with a Parker gun, scoring 100 out of 100 at 19 yards rise. Furthermore the same Old Reliable has won the **National Championship of America** every year it has been shot for.

For information regarding small bore guns, address the pioneer makers of the 20 gauge

SMITH GUNS

HUNTER ONE-TRIGGER

WEATHER conditions aren't always at their best in the "blind" or in the skiff. That's when you don't want your gun to balk or double.

YOU CAN easily wear gloves if you shoot with a Hunter One-Trigger. And without "addling." It won't balk—because there is no friction to make it balk. And it won't double—because there is no second trigger to get tangled up in your glove.

The very newest Hammerless Smith Gun is the 20-Gauge Hunter One-Trigger. Weighs only 5 3/4 to 7 lbs. Just the finest gun that can be made at the low price.

RESULT OF OVER A CENTURY'S EXPERIENCE.

Perfection in powder-making is only achieved by exercising the most scrupulous care in the selection and preparation of raw materials, employing skilled workmen exclusively, and using only the most improved modern mechanical equipment.

This is the **DU PONT** method and accounts for the unequalled reputation among sportsmen enjoyed by the **DU PONT** brands of

SMOKELESS SHOTGUN POWDERS

One of these brands that retains its popularity year after year is the "Old Reliable."

(Bulk)

High Velocity without sacrifice of regularity of pattern and pressure, and without increase of residue. Burns clean—No "blow back." DU PONT SMOKELESS SHOTGUN POWDER positively will not pit the gun barrels.

Unequaled for Field and Trap-Shooting.

See that your shells are loaded with DU PONT. Send to-day for du Pont Smokeless Booklet No. 99. It gives best loads for various kinds of game, and other information of value to the shooter.

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

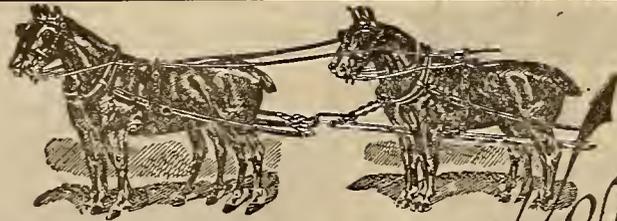

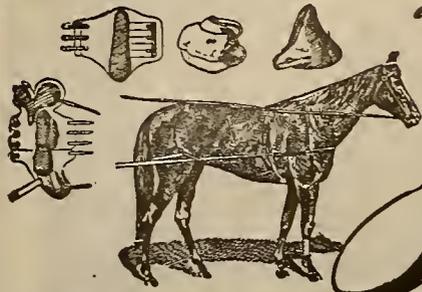

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dick writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpuffs and all hunches it has no equal." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

REMINGTON
UMC

LES MOK .22s

Accuracy. The greater the range, the greater the accuracy of Remington-UMC Lesmok 22's in comparison with competing makes. Remington-UMC Lesmok .22s hold the world's record—2484 x 2500.

Penetration. The complete and instantaneous ignition due to perfect priming insures greater penetration. Comparative tests prove this.

Cleanliness. Remington-UMC Lesmok powder is a moist burning powder, it burns clean. No damaging residue is left in the action or barrel. There can therefore be no erosion.

The new Remington-UMC hollow point Lesmok .22s are especially recommended for their shocking and killing power.

Furnished in short, long and long rifle sizes only.

Remington-UMC ---the perfect shooting combination.

REMINGTON ARMS-UNION METALLIC CARTRIDGE COMPANY, 299 BROADWAY, NEW YORK CITY.

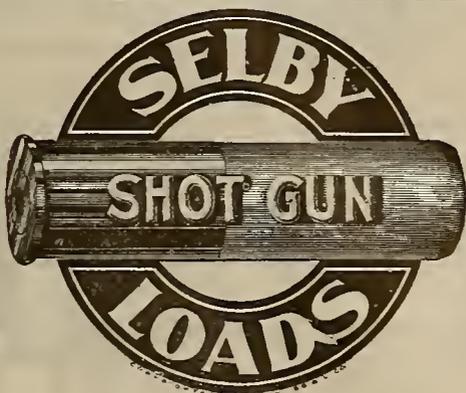

WINCHESTER

Repeating Shotguns and Shotgun Shells

WIN THE OFFICIAL AMATEUR SEASON'S AVERAGE.

Dr. W. S. Spencer of St. Louis, Mo., won the Interstate Association's contest for The Amateur Season's Average for 1911. He shot at 2100 targets in various tournaments, scoring 96.28 per cent. In winning this great trap shooting honor Dr. Spencer shot a Winchester Repeating Shotgun and Winchester Shells. His record is conclusive proof of their strong and uniform shooting qualities. Dr. Spencer's victory and the winning of the Professional Season's Average for 1911 by J. R. Taylor with a Winchester Repeating Shotgun and Winchester Shells, emphasizes the wisdom of shooting the make of guns and shells that always helps and never handicaps skill. Their conspicuous winnings show that Winchester guns and shells are of this kind.

THE WINCHESTER COMBINATION WAS SUPREME IN 1911.

THE SHOOTER WHO PAYS

FOR HIS GUN AND AMMUNITION

Insists on **SELBY LOADS!**

BECAUSE—SELBY LOADS are loaded on the Pacific Coast and are therefore ABSOLUTELY FRESH.

JUST BREEZING HER A LITTLE!

Col. John C. Kirkpatrick driving his mare *Lucretia* 2:13½ by *Nazote* on the Pleasanton track.

WE WISH TO HEAR

From every man who has ever used a can of Reducine. We wish particularly that every man who has used a can of Reducine, which has not brought the results he had reason to expect, to write us at once.

If you ever have, or ever do, buy a can of Reducine which does not bring the desired results, kindly write us at once giving all details. We will take this as a personal favor and you can rest assured that we will do our part to make success out of every failure.

IF YOU HAVE A KICK COMING

About Reducine, write us at once all about it. Don't keep your grievance to yourself or holler to your neighbors. That will get you nothing. We are here to sell Reducine—likewise to see to it that every can we sell does its work properly. Do not fail to tell us all about it if Reducine ever has or ever does not do everything you expected of it. You do not want to pay out Four Dollars for anything and not get full value for your money. We would much rather not sell you Reducine, than to have you buy it and not be satisfied with results. Our business is built by satisfied customers. We want no dissatisfied customers. Write us about every case you use Reducine on—also about anything and everything in regard to horses. Be sure to write us at once IF YOU HAVE ANY KICKS ABOUT REDUCINE.

The Reducine Co.
Gentlemen:—It pleases me to speak a good word for Reducine whenever the opportunity offers. I had a mare that slipped on the ice, throwing out a large spavin. The leg was swollen to four times its normal size, and the vets, that were called did no good for it. I bought a can of Reducine, followed directions, and in ten days the leg was normal and perfect. It is truly a wonderful remedy.
Yours truly,
JAMES DUGAN.

WAUKEGAN, ILLINOIS, DEC. 16, 1911.

COLUMBUS, OHIO, DEC. 14, 1911.
The Reducine Co., 4181 Broadway, N. Y.
Gentlemen:—Four dollars may appear a big price for a can of medicine, but it is much more satisfactory than a doctor's bill. One of our mules had a bad hoof, and the doctor could not do anything but run up a bill. The mule was declared to be worthless. Finally we applied Reducine. One week's application drove out the disease, and now he is as sound as ever and working happily. We still have about half of the medicine left. We recommend Reducine.
Yours truly,
NITSCHKE BROS.

ROCKY FORD, COLORADO, DEC. 22, 1911.
The Reducine Co., New York.
Dear Sirs:—I have used, in my time, twelve cans of Reducine and have cured all kinds of cases. I have taken off splints, bogs, curbs, ringbones, cured bad tendons, big knees, shoe boils, and cured sore shoulders, sore throat, sweeney, foot rot and thrush. I own the champion stallion of Colorado, Dewey Dillon 2:13 1/4. This horse has held this honor for three years. * * *
Send me some of your booklets to use at our meetings of Farmers' Club, of which I am president.
Yours truly,
WM. R. DYE.

CHICAGO, DEC. 22, 1911.
The Reducine Co., 4181 Broadway, New York.
Gentlemen:—Your Reducine has proven itself of much value in my stable, having removed seven vicious warts from one of my horses and a capped hock from another.
I now write to know whether you would recommend it for a horse with a bad rope burn and blister on the back of a hind fetlock.
Yours very truly,
R. HALL McCORMICK.

WASHBURN, ILLINOIS, DEC. 11, 1911.
The Reducine Co.
Dear Sirs:—Last spring I ordered a can of Reducine from you to use on my show stallion that had curbed himself badly, and a trotting filly that had an enlarged ankle of a year's standing.
Now, your Reducine cured both of these up in good shape with one can. I figure that the one can was worth \$500 to me. * * *
Would be pleased to hear from you by return mail.
Yours respectfully,
C. E. ROBINSON.

586 SHERBROOKE ST. EAST, MONTREAL, CAN., DEC. 15, 1911.

The Reducine Co., New York.
Gentlemen:—* * * I have a half dozen tins of Reducine in my stable, having purchased it from Burns & Sheppard, of Toronto.
I praise your remedy to all my hunting friends in the Hunt Club, and all horsemen I meet, and expect the local public will become greater users of it than they are now.
Thanking you in advance for the answer I expect from my inquiry,
Faithfully yours,
EDW. A. BERNARD.

FROM MR. H. L. HERBERT, FATHER OF POLO IN AMERICA AND CHAIRMAN OF THE POLO ASSOCIATION.

17 BATTERY PLACE, NEW YORK, NOV. 23, 1911.

The Reducine Co., 4181 Broadway, City.
Gentlemen:—I have used in my stable several cans of Reducine with very satisfactory results.
I will be greatly obliged if you will send me a copy of your illustrated booklet to 17 Battery Place, New York. Very truly yours,
H. L. HERBERT.

FORT EDWARD BREWING COMPANY,
ALE AND LAGER.

FORT EDWARD, N. Y., NOV. 23, 1911.

The Reducine Co., 4181 Broadway, City.
Gentlemen:—Enclosed find check for \$12, for which send us by express three boxes Reducine.
We consider it a valuable remedy to have in our stable. We have used it for swellings, bunches, scratches and all kinds of troubles horses are subject to, and would not be without it in the stable. Yours truly,
FORT EDWARD BREWING COMPANY.

Dear Sirs:—I have used your goods and like them very much. I wish you would send me your illustrated booklet spoken of in the REVIEW.
I am using Reducine now on a horse that is sort of a problem to me. It possibly would help me.
Yours very truly,
A. P. ROCKWOOD.

TAYLORSVILLE, PLUMAS CO., CALIFORNIA, NOV. 16, 1911.

The Reducine Co., 4181 Broadway, New York.
Gentlemen:—Please send me one of your booklets as advertised in the HORSE REVIEW, of Chicago. I have used your Reducine for some time and have found it good for all soft bunches and swellings. * * *
With many thanks, I remain, Yours respectfully,
DR. H. LESLIE, V. S. D.

BAKER, OREGON, NOV. 19, 1911.

The Reducine Co., New York, N. Y.
Dear Sirs:—I have had good results from Reducine on a horse that had a bog spavin and thoroughpin. It cured him perfectly and no enlargement left to be seen. * * *
Thanking you in advance, I remain, Yours respectfully,
W. W. JOHNSTON.

ALBANY, OREGON, NOV. 14, 1911.

The Reducine Co., New York City, N. Y.
Dear Sirs:—* * * I have used several cans of Reducine for the different uses for which it is made, with good results.
Yours truly,
FRED WOODCOCK.

SAN FRANCISCO, CAL., NOV. 15, 1911.

The Reducine Co., 4181 Broadway, New York City.
Gentlemen:—I take great pleasure in testifying to the merits of Reducine. I have been using it for a year and found it all that you represent it to be. As soon as I discovered its merits, I took pleasure in recommending it to my friends, and in no instance has it failed to give satisfaction.
Very truly yours,
CHARLES JAMES.

SOPHIE-CHARLOTTEN STR., 104
CHARLOTTENBURG, GERMANY, NOV. 27, 1911.

The Reducine Co., New York City.
Gents:—Would be pleased to receive your illustrated booklet. Am a reader of the REVIEW and never without Reducine.
Yours truly,
CHARLES F. FOSTER.

MALOTT, WASHINGTON, DEC. 1, 1911.

The Reducine Co., New York City.
Gentlemen:—* * * I have used Reducine on an enlargement like a ringbone, also on a bad tendon with fine results.
Yours truly,
CHARLES F. BROWN.

TOM SMITH 2:13 1/4 P. F. Davey, San Jose
WM. HAROLD 2:13 1/4 James D. Johnstone, Elmhurst

UNITY of purpose seemed to be the aim of all who attended the convention of secretaries and delegates at Walla Walla, February 1st, if one is to judge by the able report of that meeting published in another column. Action was taken on several very important subjects and at the meeting of the directors of the Pacific Coast Fair and Racing Association, which is soon to be held in this city, there will be more work done in this line. The subject of railroad rates and transportation is one of great importance and appeals to every owner of trotting horses, as well as of choice livestock. One of the principal ideas of holding a straight continuous circuit was to make this matter of railroad transportation safer, easier and cheaper for all who are to travel to Vancouver, B. C., from California and return through Washington, Oregon and California, to Arizona. When the absolute necessity for such an innovation is presented in proper form to the railroad officials in authority, and when it is shown that by setting aside certain cars to be fitted up especially for the horses and their attendants to be occupied by them for almost fifteen weeks, there is no doubt they will agree to furnish them at reduced rates and the expenses of shipment will be materially reduced; at the same time, the men in charge of the horses on these cars can make them healthful, attractive and comfortable, and at no time will they be in danger of having their horses subjected to any disease germs which might be dormant in these cars. Ventilation can be adjusted and, as in circus trains, certain improvements can be made so as to make traveling comfortable for the men as well as horses. The railroad officials in the North are in favor of this and it is believed those in charge of the transportation department of the Southern Pacific Railroad will also consent, for it will save them all the annoyances they have had to submit to in the past and a change will be welcome. The meetings will be extensively advertised. This is another very important item. When the stakes, purses, classes

and conditions are announced on this Pacific Coast Circuit many northern horsemen who have never brought their horses into California, will most likely take advantage of the many opportunities presented by accompanying the majority all the way to Arizona. In order to spread the news of these meetings an abundance of printed matter must be prepared and circulated, besides advertisements in the leading newspapers, and everything be done to attract horse owners and enthruse the general public. Prospects for the light harness horse industry are becoming brighter and in order to have nothing to eclipse the endeavors of the wide-awake members of the various associations interested, every one connected with the business is working quietly and effectively, so that when the time comes for making the last announcements there will not be a dissenting voice, but all will unite in proclaiming it the rejuvenation of the trotting horse industry of the Pacific.

OWING to the publication of the splendid list of entries to the State Agricultural Society's stakes in this issue several interesting articles were crowded out. These entry lists, however, are the best advertisements of the fact that the trotting horse industry on this Coast is in a most healthy and prosperous condition.

GEORGE E. STICKLE'S SALE.

On Monday night a crowd of horsemen attended the sale of George E. Stickle's trotting stock at Chase & Co.'s sales pavilion. Wm. Higginbottom called the bids and considering that many offered were only handled a little and most of them were non-standard, the prices obtained were very fair. Following is a list of those sold for \$100 and over and the buyers' names:

Angeline b. m. (8) by Stickle—by Orator; Jos Earle \$170
Mary S. b. m. (4) by Ebilis—by Silver Bow; J. Edwards 145
Floyd K. b. g. (3) by Stickle—Savannah; J. Nolan 100
Chauncey K. g. g. (7) by Stickle—by Orator; People's Creamery Co. 180
Monte b. g. (8) by Stickle—by Orator; McNab & Smith 185
Bon Cheval b. c. (3) by Bon Voyage 2:08—Silver Haw; J. E. McElrath 205
Baby b. g. (8) by Stickle—by Nephew; Sorenson Bros. 100
Kittie ch. m. (3) by Stickle—A. C. Cleveland 105
Charlie b. g. (8) by Stickle—by Chas. Derby; A. M. Barta 100
Tessie W. b. m. (13) by Silver Bow—Vesper; C. J. Harney 100
Savannah b. m. (13) by Silver Bow—Grandma; G. Hutchings 115
Gus b. g. (8) by Stickle—by Cornelius; G. W. Light 120
Edith b. m. (4) by Stickle—Savannah; Dexter Prince Stable 120
Frank G. b. g. (9) by Silver Bow—Cornelia; Dexter Prince Stable 135
Gray Tom, g. g. (6) by Son of Stickle—by Fair Boy; A. Arnapel 175
White Sox, ch. g. (5) by Stickle—by Orator; J. Fauser 175
Mamie Belle, ch. f. (3) by Ebilis—Tessie W.; Chas. Durfee 105
Council b. g. (6) by Stickle—Julia; McNab & Smith 130
Teddy b. g. (4) by Stickle—Kittie Vernon; C. Safor 175
Diamond b. m. (6) by Stickle—Hazel; J. F. Dolkins 110
Queen, ch. m. (13) by Diablo—Queenie; F. Lauterwasser 105
Crooks b. g. (9) by Silver Bow—Kitty Vernon; McNab & Smith 185
San Toy, b. m. (7) by Stam E.—Tessie W.; G. F. Merchel 130
Dixon, ch. g. (7) by Stickle—by Silver Bow; Dexter Prince Stable 145
Joe, ch. g. by Joe Terry; Dexter Prince Stable 125
Frank, b. g. by Stickle—by Silver Bow; Dexter Prince Stable 135

Mr. E. D. Dudley, of Dixon, advertises in this issue a list of grandly bred stallions, mares, colts and fillies he has for sale, besides a number of yearlings heavily engaged. The circuit this year will be the place where nearly all of these can appear and, as they are naturally fast (two of them holding trotting records), seekers after material to make money with should inspect them. The fame of Palite as a sire is established and all his progeny are noted for their pure trotting action and gameness, and those sired by him are all out of noted mares. Some have not been worked for speed, but all who know anything about the families they represent are convinced they will earn low records. Those which have marks like Pal (2) 2:17 1/2 and his brother Nat Higgins (4) 2:20 will have little trouble in earning lower records and are well enough bred to head any stock farm after their days of racing end. There are three here from Paprika, by Oro Belmont 2:15 1/2, that are very promising, and as they are entered in the Futurity stakes, now is the time to take them in hand and prepare them. Loula, a four-year-old filly by Nushagak, in foal to McFadyen 2:11 1/4 (one of Diablo's gamest sons), is a grand-looking mare; and the two-year-old filly by Carlok in 2:07 1/2, out of Truth, is one of the best bred fillies of her age offered in California. There's not a "cull" in the bunch and all will be priced exceedingly low.

The trotting stallion Superior 2:17 1/4 died last month, aged 31 years.

Drink Jackson's Napa Soda.

LETTER FROM LOS ANGELES.

Ed. Breeder and Sportsman:

The trainers are stepping their horses some these beautiful days and matinees are in order. On February 22d there promises to be a big one. I saw Will Durfee step Oeste, a four-year-old, a mile in 2:09, Fred Ward worked a three-year-old gelding by Wayland W. a quarter in 31 1/2 seconds, which he has just commenced to work, and he acts and looks like a trotter of class. Walter Maben drove a green trotter a mile in 2:16. Ted Hayes has several good colts that can step fast. Mr. Stewart worked a green trotter a mile in 2:14, last half in 1:06. It has not had much work. Mr. Geo. McPherson has arrived with fourteen head from Vancouver, B. C. They are all in good shape and include a nice looking lot of "prospects." Mr. Mosler is edging up Steve Bailey to win another free-for-all at the matinee to be held here Washington's Birthday. Steve has no record, but is fit for any class. The track is in fine condition and everything is being done to complete the plant as soon as possible. When finished as contemplated, it will be the most up-to-date training place in the West, and I think another winter will see a great many more trainers and horses here than there are now. Any day one can see good workouts all the way from 2:09 to 2:12. There are about two hundred and fifty horses working here and among them there are some very fine ones.

Al Russell is conducting a public training stable and is very nicely located, having leased the commodious quarters owned by Mrs. L. J. H. Hastings (formerly the home of Sky Pointer). It is just half a block from the racetrack. There are plenty of good box stalls, paddocks, and good well water. Among the horses are Judge Dillon 2:18, by Sidney Dillon, dam Eveline, by Nutwood 2:18 1/4, who is showing up well, having recently trotted a half in 1:04 1/2 with but very little work. Sapho Dillon, a trotter by Judge Dillon, out of Sapho, is a very promising three-year-old filly. She is receiving her kindergarten lessons in track work. Both of these are owned by Mrs. Hastings.

Another one in Mr. Russell's care is Alfreda B. 2:10 1/4, trotter, by Bob Fitzsimmons, dam Belle Mahoue, is going sound and worked a half mile in 1:05 last week. Buck 2:09 1/4, pacing, by McKinney 2:11 1/4, dam Tuna, is working well and looks like he might make the 2:10 class interesting. Beulah R. 2:17, trotting, by Nutwood Wilkes 2:16 1/4, is also doing fine. These three are owned by E. A. Reichels, Great Falls, Montana.

Big Squaw 2:10 1/4, by Kewanee Boy, dam Argive Helen, who reduced her record a quarter of a second at Minot, N. D., half-mile track, where she won two heats from the great Don Densmore 2:03 1/2, is here. She would have had a much lower mark last year had it not been for an accident which laid her up for the rest of the season. She acts like she would be a good pacer this year. Miss Jerusha 2:03 3/4, pacing, by Zombro, dam Lady Porter, is showing the best she has ever shown and recently stepped a half in 1:03 1/2. Mayo 2:16 1/4, trotting, by Zombro, is improving.

Hellenes Jr. 2:11 1/4, pacugi, by Hellenes, dam Miss Kidd, by Young Kisbar, has improved wonderfully since coming here. He is stronger and acts like he would take a mark of 2:07 or better this season. Irish Alice, trotter, by King Ames, is a very promising mare with a record of 2:19 1/4. Treasure State, a yearling trotter by Patchinwood, dam Lou Chaucer, will only be worked a while, then turned out and held for another season.

This comprises all of Mr. Russell's stable with the exception of Otto Zombro, by Zombro, dam by Conifer, by Lord Russell, that he has leased for 1912. Otto Zombro is a very promising green pacer that won his race here at the Christmas matinee and won at the New Year's matinee at Riverside. He looks to be as good a green pacer as there is around here and has shown his ability to pace in 2:10 and only worked a short time by the young man who owns him.

MCADRIAN 2:24 BY MCKINNEY 2:11 1/4.

The only son of the great McKinney 2:11 1/4 to make the season of 1912 at the Pleasanton race track, is McAdrian 2:24, one of the strongest and best made of the McKinney tribe. He is noted not only for this but for the excellence of his legs and feet, trotting action and perfect disposition. McAdrian traces twice to Reliance 2:22 1/2, by Alexander (that had a three-mile record of 7:54 1/4) and Maud by Mambrino Rattler, son of Biggart's Rattler, he by Sir Henry, the famous thoroughbred. Alexander sired Alexander Button 2:26 1/2, a noted sire of fast horses and splendid stylish roadsters. There is another sire in his pedigree whose progeny were noted for their splendid legs and feet, their gameness and determination, and that was Skenandoah. McAdrian was never bred to a standard and registered mare, nevertheless every colt and filly by him out of ordinary mares, is a natural pure-gaited trotter, and their owners value them highly. A horse of his breeding, conformation, speed, and power to transmit extreme speed should be well patronized. Broodmare owners make no mistake when they breed their mares to a horse that can sire a trotter like Bert Kelley from a non-standard, no record-holding mare, and there are many others by this horse which if developed would be extremely fast. His terms of service are within the reach of all and everyone who sees him hopes his book will be filled, as it is about time he should. That he will be a sire of exceedingly fast, strong, level-headed trotters is conceded by all students of pedigrees and judges of equine conformation.

STATE AGRICULTURAL SOCIETY.

Following is a list of entries to the State Futurity Stake No. 1, to take place in 1912; payments made Feb. 1, 1912—total 30:

- Alex. Brown's Gayristo, by Langton—Nosegay.
- Alex. Brown's Bonnie Ansel, by Chas. Derby—Bonnie Derby.
- Alex. Brown's Josie Ansel, by Nutwood Wilkes—Josie D.
- Alex. Brown's Anselia B., by Mendocino—Serpolo.
- Harry D. Brown's Cole Pointer, by Nutwood Wilkes—Grace Cole.
- Frank H. Burke's Mabel Claire, by Eros—Lady Belle Isle.
- C. A. Canfield's Volador, by El Volante—Cleo.
- W. F. Whittier's Wilbur Lou, by Kinney Lou—Louise Carter.
- A. G. Dahl's Zomjud, by Wm. Harold—Judith.
- John McLeod's Abbie D., by Bonner N. B.—Bonner Bell.
- Robt. Garside's Chanate, by McKinney—Dora Mac.
- Arthur Hardy's Miss Helen, by Nutwood Wilkes—Fannie G.
- D. W. Wallis' Sissy, by Nutwood Wilkes—Josephine.
- F. H. Halloway's Hemet, by Zombro—Lady Zombro.
- Geo. H. McGruder's Aeroletta, by Diablo—Deviletta.
- John Hogan's Ruby Mac, by Count Lionel—Babe.
- E. H. Faby's Busy Body, by Diablo—Diavlaide.
- W. S. Maber's My True McKinney, by Kinney Lou—Trueheart.
- M. Friedberger's Beauty Pointer, by Unknown—Black Beauty.
- Blackwell & Hendrickson's Golden State, by Bay Bird—Zaya.
- H. D. Payette's H. O. Michaels, by Tom Benton—Princess Eulalie.
- I. L. Borden's Myrtle B., by Stam B.—Katie B.
- J. L. Borden's Abaloma, by Stam B.—Loma B.
- G. H. Tomes's Joe Todd, by Zombro—Bessie T.
- Geo. L. Warlow's Kinneysham, by Junio—Cora Wickersham.
- D. L. Bachant's Soison, by Guy McKinney—Soisette.
- Geo. W. Whitman's Starry, by Abbottsford—Violet.
- T. D. Witherly's Valentine, by Soudan—Zetta Richmond.
- F. E. Wright's Jas. H. Donnelly, by Hanford Medium—Pearl Sinclair.
- Zibbell & Son's, by Shadalen Onward—Kate Lumry.

Entries in the State Futurity Stake No. 2, to take place in 1912-13; payments made Feb. 1, 1912-13—total, 41:

- I. L. Borden's, by Barney Barnato—Hester McKinney.
- I. L. Borden's, by Barney Barnato—La Belle Altamont.
- J. N. Jones' Zorrine, by Charley D.—Lady Irene.
- Alex. Brown's Laura Ansel, by Prince Ansel—Laurens.
- Alex. Brown's Lottie Ansel, by Prince Ansel—Lottie.
- E. M. Barber's Arista Ansel, by Prince Ansel—Arista.
- L. E. Barber's Burke, by Lord Isle—Madge.
- C. A. Canfield's, by Walter Barker—Mamie Elizabeth.
- C. A. Canfield's, by Walter Barker—Chloe.
- J. M. Clark's Romalita, by Diarose—Lena.
- J. M. Clark's Joe McCarty, by R. Ambush—Diabotine.
- L. E. Daniels' The Voyager, by On Voyage—Noche.
- E. D. Dudley's Hazel B., by Palite—Bee Sterling.
- E. D. Dudley's John Rice, by Palite—Paprika.
- John F. Heenan's Dorotina, by De Oro—Miss Valentine.
- E. D. Dudley's Truthkin, by Carloklin—Truth.
- John Hogan's Belle De Lopez, by Kinney De Lopez—Babe.
- Hemet Stock Farm's Eradite, by Geo. W. McKinney—Mamie Redmond.
- Hemet Stock Farm's James S., by Geo. W. McKinney—Louise R.
- Hemet Stock Farm's Miss Gailey, by Geo. W. McKinney—Lady Zombro.
- Hemet Stock Farm's California Fiesta King, by Geo. W. McKinney—Fiesta.
- W. J. Irvine's California Mac, by McKena—Ever Green.
- J. W. Marshall's, by Zolock—Trix.
- Sam Silvey's Vivien S., by Palite—Ramona.
- W. J. Miller's Capitola, by Dan Logan—Lulu Mac.
- J. E. Montgomery's Lock Logan, by Zolock—Effie Logan.
- Dana Perkins' Danae, by Stam B.—Zaya.
- Chas. A. Riggs' May Marion, by Carloklin—The Blonde.
- A. W. Schwab's Ray Alto, by Iran Alto—Lorenzo Girl.
- A. L. Scott's Bon Prix, by Bon Voyage—Cora.
- C. A. Spencer's Star Ansel, by Prince Ansel—Noraine.
- John Suglan's Hazel Smith, by Tom Smith—Hazel Mac.
- W. A. Clark's Zombowage, by Nobage—Zombowette.
- Jas. Thompson's Guaco, by Nobage—Zombelle.
- Geo. L. Warlow's, by Athadon—Cora Wickersham.
- Geo. L. Warlow's, by Stamboulette—Soisette.
- Geo. L. Warlow's, by Athalo—Donnagene.
- C. W. Whittier's Hazel Star, by Star Pointer—Violet.
- M. L. Woy's Comet W., by Tom Smith—Cora Dell.
- Wright & Donnelly's Iva W., by Prince Ansel—Iadora.
- J. W. Zibbell's, by Tom Smith—Kate Lumry.

Entries in State Futurity Stake No. 3, to take place in 1913-14; payments made Feb. 1, 1912—total 94:

- H. A. Bassford's Helen J., by Palo King—Lulu Demonia.
- I. L. Borden's, by Barney Barnato—Hester McKinney.
- I. L. Borden's, by Barney Barnato—La Belle Altamont.
- W. V. Bennett's, by Bon Voyage—Clara Collins.
- Bowman & Maurer's Kinworthy, by Prince Axworthy—Malverna.
- T. W. Broxner's Kenneth Chimes, by Kenneth C.—Mary Chimes.
- Alex. Brown's, by Prince Ansel—Laurens.
- Alex. Brown's, by Prince Ansel—Arista.
- Alex. Brown's, by Prince Ansel—Steina.
- Alex. Brown's, by Prince Ansel—Nutflower.
- Alex. Brown's, by Prince Ansel—Josie D.
- Alex. Brown's, by El Zombro—Gay Princess.
- Alex. Brown's, by Nuristo—Zanita.
- C. A. Canfield's, by Carloklin—Mamie Elizabeth.
- C. A. Canfield's, by Carloklin—Eilleen.
- C. A. Canfield's, by Walter Barker—Redena.
- C. A. Canfield's, by El Volante—Chloe.
- C. A. Canfield's, Don Reginaldo—Lillian Wellborn.
- P. J. Chalmers' McInty, by McAdrian—Lot.
- S. Christenson's, by Bon Voyage—Perza.
- Wm. E. Detels', by Bon Guy—Melba.
- E. D. Dudley's, by Palite—Ima Jones.

- P. H. Smith's Zomarine S., by Zombro—Katherine.
- P. H. Smith's Roseval, by El Volante—Rosemary.
- P. H. Smith's El Volante S., by El Volante—Seville.
- C. A. Spencer's, by Adansel—Laura Smith.
- C. A. Spencer's, by El Zombro—Trueheart.
- H. B. Smith's Princess Ayers, by Prince Ansel—Ayers.
- John Suglan's Just Right, by Tom Smith—Hazel Mac.
- W. N. Tiffany's Carmis, by Carloklin—Lady Vasto.
- Edmund McLees' Orange Bell, by Bon Voyage—Zomitella.
- S. C. Tryon's Stitt Wilson, by Moko Hall—Araeze.
- George Herndon's Caroline, by Lijero—Nightingale.
- J. Twohig's Columbia, by Bon Guy—May T.
- Valencia Stock Farm's, by Zombro Heir—L. Nellie H.
- J. C. Wannop's Gladys Style, by All Style—Gladys Moore.
- Geo. L. Warlow's, by Black Hall—Soisette.
- Geo. L. Warlow's, by Black Hall—Narcola.
- Geo. L. Warlow's, by Black Hall—Cora Wickersham.
- Geo. L. Warlow's, by Black Hall—Strathalie.
- Geo. L. Warlow's, by Nogi—Donnagene.
- Jay Wheeler's Carrel, by Gerald G.—Leona Wilkes.
- Donnelly & Ivey's The Surgeon, by Lijero—Daisy W.
- F. E. Wright's Dr. John, by Palite—Toots W.
- J. W. Zibbell's, by Tom Smith—Kate Lumry.
- J. W. Zibbell's, by Tom Smith—Evangie.

Entries in State Futurity Stakes, No. 4; closed Feb. 1, 1912; names with stallion bred to—total 217:

- Frank E. Alley's Fuschia Mack, by McKinney—to Bonaday.
- Frank E. Alley's Angelina Boswell, by Hart Boswell—to Bonaday.
- Frank E. Alley's Addiola Mack, by McKinney—to Bonaday.
- Frank E. Alley's Bettie G., by Greco B.—to Bonaday.
- Frank E. Alley's Anita, by Capt. McKinney—to Bonaday.
- Frank E. Alley's Minnie H., by Mulligan—to Bonaday.
- Frank E. Alley's Oniska, by Nutwood Wilkes—to Bonaday.
- Frank E. Alley's Fortuna G. W., by Guy Wilkes—to Count Boni.
- Frank E. Alley's Lady Lemo, by Memo—to Count Boni.
- Frank E. Alley's Maud Stambouret, by Stamboul—to Count Boni.
- J. N. Anderson's Della Derby, by Chas. Derby—to Peter the Great.
- J. P. Struve's Winta Rose, by Eugeneer—to The Bondsman.
- I. L. Borden's Directola, by Direct McKinney—to Aerolette.
- I. L. Borden's Wanda 2d, by McKinney—to Tom Smith.
- I. L. Borden's La Belle Altamont, by Altamont—to Barney Barnato.
- I. L. Borden's Hester McKinney, by McKinney—to Barney Barnato.
- I. L. Borden's Kate Lomax, by Son of Nutwood—to Barney Barnato.
- S. S. Bailey's Bilpan, by Silver Bow—to Prince Seattle.
- S. S. Bailey's Nancy Wave, by Tidal Wave—to Bon Guy.
- Harry D. Brown's Grace D. Cole, by Nutwood Wilkes—to Nearest McKinney.
- John Baker's Freckle Bird, by Red Freckles—to Beirne Holt.
- S. Benson's Iben Islander, by McKinney—to The Bondsman.
- Alex. Brown's Lottie, by San Diego—to Prince Ansel.
- Alex. Brown's Arista, by Nushagak—to Prince Ansel.
- Alex. Brown's Laurens, by Mendocino—to Prince Ansel.
- Alex. Brown's Gay Princess, by Prince Ansel—to El Zombro.
- Alex. Brown's Evelyn B., by Prince Ansel—to El Zombro.
- Alex. Brown's Zanita, by Electricity—to Nuristo.
- Alex. Brown's The Bouquet, by Nushagak—to The Bondsman.
- E. K. Brown's Maymonio, by Demonio—to Alto Express.
- Bowman & Maurer's Malverna, by McKinney—to Prince Axworthy.
- Mrs. P. H. Burke's Birdie, by Jaybird—to Bon Voyage.
- J. P. Berry's Nell B., by Prince Natural—to Expressive Mac.
- J. P. Berry's Berritta Mac, by Expressive Mac—to Ingoma.
- L. E. Barber's Madge, by Silver Bow Jr.—to The Bondsman.
- C. A. Canfield's Mamie Elizabeth, by Red Regent—to Zombro.

- C. A. Canfield's Dixie F., by Zolock—to Bon Voyage.
- C. A. Canfield's Chloe, by Conifer—to Donasham.
- C. A. Canfield's Belle Raymond, by Raymond—to Donasham.
- C. A. Canfield's Lillian Wellborn, by St. Vincent—to Zombro.
- J. M. Conside's Ida Millerton, by Millerton—to Kinney Lou.
- J. M. Clark's Mattie J., by Arthur W.—to Palo King.
- J. M. Clark's Diabotine, by Diablo—to El Dineo.
- J. M. Clark's Alveta, by Arthur W.—to Don Rosine.
- J. J. Campbell's Kate Kopje, by Cresceus—to The Bondsman.
- J. J. Campbell's Silver Fir, by Silver Bow—to Peter Wilton.
- F. W. Cooper's Jennie L., by Moses S.—Sir John S. Chas. Colquhoun's Lady, by Nutwood Wilkes—Montbaine.
- W. G. Durfee's Carolyn C., by Axtell—to Carloklin.
- W. G. Durfee's Subito, by Steinyar—to Carloklin.
- W. G. Durfee's Lady H., by Del Coronado—to Copa de Oro.
- W. G. Durfee's Ophelia, by Fetigru—to Carloklin.
- W. G. Durfee's Beatrice Zombro, by Zombro—to Carloklin.
- W. J. Durfee's Beatrice Zombro, by Zombro—to Carloklin.
- W. G. Durfee's My Irene S., by Fetigru—to Carloklin.
- W. G. Durfee's Atherine, by Patron—to Carloklin.
- W. G. Durfee's Loner McKinney, by McKinney—to Copa de Oro.
- W. G. Durfee's Ola, by McKinney—to Copa de Oro.
- E. D. Dudley's Paprika, by Oro Belmont—to Lijero.
- E. D. Dudley's Ruby Cullen, by C. The Limit—to The Bondsman.
- E. D. Dudley's Loulia, by Nushagak—to McFadyen.
- E. D. Dudley's Truth, by Searchlight—to Palite.
- R. L. Draper's Lady Hackett, by Gerome—to Kinney Lou.
- Wm. E. Detels' Melba T., by Nutwood Wilkes—to Bon Guy.
- Wm. E. Detels' Daphne McKinney, by McKinney—to Palite.
- Jas. H. Donnelly's Ebner, by Fallis—to Lijero.
- Mrs. Wm. Duncan's, by Dialect—to King S.
- Jas. Dacres' Lida Carter, by Stam B.—to Prince Axworthy.
- F. E. Emly's Fawnette, by Louis Mac—to Washington McKinney Jr.
- F. E. Emly's Bird W., by Eugeneer—to Washington McKinney Jr.
- F. E. Emly's Hermia, by Soudan—to Washington McKinney Jr.
- A. M. Elston's Belle Pointer, by Star Pointer—to Palo King.
- Robert Garside's Dora McKinney, by McKinney—to Alconda Jay.
- E. A. Gammon's Cleo G., by Yosemite—to The Bondsman.
- E. A. Gammons' Linet, by Seymour Wilkes—to The Bondsman.
- H. H. Helman's Lady Mowry, by McKinney—to Alconda Jay.
- H. H. Helman's Ada McKinney, by McKinney—to Alconda Jay.
- Ted Hayes' Belle Pointer, by Sky Pointer—to Bon McKinney.
- Ted Hayes' Cecile M., by Robin—to Bon McKinney.
- Geo. L. Herndon's Emira, by Nazote—to Montbaine.
- A. D. Hubbell's Etta McKinney, by McKinney—to Bon Voyage.
- Heilbron Bros' Califa, by Silver Bow—to Lijero.
- H. S. Hogboom's Beautiful Bird, by Nutwood Wilkes—to Palo King.
- H. S. Hogboom's Diawald, by Diablo—Alto Express.
- W. S. Harkey's Deviletta, by Diablo—to Aerolette.
- Hemet Stock Farm's Louise Carter, by Chestnut Tom—to Kinney Lou.
- Hemet Stock Farm's Mamie Redmond, by Nutwood Wilkes—to Kinney Lou.
- Hemet Stock Farm's Muriel C., by Nutwood Wilkes—to Kinney Lou.
- Hemet Stock Farm's Lady Zombro, by Zombro—to Kinney Lou.
- Hemet Stock Farm's Stambia, by Stam B.—to Kinney Lou.
- Hemet Stock Farm's Nealy W., by Geo. W. McKinney—to Kinney Lou.
- Hemet Stock Farm's Mora Mac, by McKinney—to Kinney Lou.
- Hemet Stock Farm's Louise R., by Sterling McKinney—to Kinney Lou.
- Hemet Stock Farm's Kinney Rosebud, by Kinney Lou—to Geo. W. McKinney.
- Hemet Stock Farm's Hemet Light, by Searchlight—to Kinney Lou.
- Hemet Stock Farm's Lena Lowe, by Geo. W. McKinney—to Kinney Lou.
- Hemet Stock Farm's Hemet Girl, by Geo. W. McKinney—to Armond Lou.
- J. B. Iverson's Salinas Princess, by Eugeneer—to The Bondsman.
- J. B. Iverson's The Freak, by Nutwood Wilkes—to Clear Voyage.
- J. B. Iverson's Mamie Riley, by McKinney—to Clear Voyage.
- R. S. Irvine's Beretta, by Searchlight—to Patchen Boy.
- R. S. Irvine's Elizabeth Direct, by Robert Direct—to Best Policy.
- R. S. Irvine's The Bloom, by Nushagak—to Zorankin.
- Mike Judge's Minnie M., by Azmoor—to Lijero.
- Frederick Jasper's Elizabeth W., by Wayland W.—to Prince Ansel.
- Chas. Johnson's Skate, by Silver Bow—to Bon Guy.
- W. J. Irvine's Ever Green, by McKinney—to The Bondsman.
- M. C. Keefer's Advosta, by Advertiser—to Prince Ansel.
- M. C. Keefer's Nellie Keefer, by Nutwood Wilkes—to The Bondsman.
- M. C. Keefer's The Trueheart, by Nearest—to Prince Ansel.
- W. F. Knox's Bridal Rose, by Falrose—to Lijero.
- Mrs. E. D. Knott's Tribby's Beauty, by McKena—to Guy Carter.
- John Kirkpatrick's Flewy Flewy, by Memo—to June Pointer.
- A. S. Kellogg's Lillie H., by Secretary—to Black Hall.
- A. S. Kellogg's Diabess, by Diablo—to Black Hall.
- A. S. Kellogg's Myrtle, by Nephew—to Athasham.
- D. Lynn's Belle Lynn, by Diablo—to The Bondsman.
- L. Lynn's Woodine, by Woodnut—to G. Albert Mac.
- Leo Lynch's Lena Thorup, by Prince Charles—to Wonderlight.
- Mrs. Mabel Lipson's Alta Almont, by Prince Almont—to Best Policy.
- Mrs. Mabel Lipson's Miss Dorothy, by Peeler—to Life Policy.
- F. Lieginger's Daisy Genoa, by Alto Genoa—to One Better.
- F. Lieginger's Lady Bess, by Major P.—to Adrian.
- F. Lieginger's Ida May, by Major P.—to McAdrian.
- Fred T. Merrill's Sela Nun, by Sela Boy—to Cruzado.
- Fred T. Merrill's Love Me, by Lovelace—to Hal B.
- Fred T. Merrill's Brownlace, by Lovelace—to Hal B.
- Ray Mader's Carrie B., by Alex. Button—to Tom Smith.
- John S. Maben's Zombretta, by Zombro—to Best Policy.
- John S. Maben's Zomgar, by Zombro—to Best Policy.
- F. L. Matthes' Opitsah, by Wm. Harold—to Arner.
- Chas. R. Marley's Nusta, by Nushagak—to The Bondsman.
- Jas. McCaw's Nellie Jones, by Capt. Jones—to Lijero.
- W. T. McBride's La Muscovita, by Guy Wilkes—to The Bondsman.

W. J. Miller's Katalina by Tom Smith—to The Bondsman.
 J. H. McGregor's Juana Maria, by Geo. W. McKinney—to The Bondsman.
 Asa V. Mendenhall's Credit, by Beau B.—to Cole Pointer.
 A. W. Morrison's Iran Bell, by Iran Alto—to The Bondsman.
 J. E. Montfomery's Effie Logan, by Durfee—to Demonio.
 J. E. Montgomery's Margaret M., by Chestnut Tom—to Palo King.
 J. E. Montgomery's Cyrena, by Highland C.—to Zombro.
 M. McGowan's Queen Derby, by Chas. Derby—to The Bondsman.
 Frank Malcolm's Fresno Girl, by Seymour Wilkes—to Expressive Mac.
 Frank Malcolm's Nike, by Antinous—to Expressive Mac.
 J. H. Nelson's Rosie Dillon, by Major Dillon—to Expressive Mac.
 J. H. Nelson's Ada Dillon, by Guy Dillon—to Expressive Mac.
 J. H. Nelson's May Dillon, by Knox—to Expressive Mac.
 Nichols & Holaday's Alma Dexter, by Dexter Prince—to The Bondsman.
 S. J. Nellis's Flaxie, by Jay D.—to Irving Pointer.
 R. L. Ogden's Irish Rose by Lynwood W.—to Palo King.
 Dana Perkins' Princess Eulalie, by Tom Benton—to Guy.
 J. W. Pendleton's Abbie McNutward, by Guy McKinney—to Peter Wilton.
 J. W. Pendleton's Beautiful Bertha, by Moormont—to Lord Alwin.
 Henry Peters' Little Babe, by Bradmore—to Palite.
 W. A. Perley's by Wnlps—to Odd Mark.
 Homer Rutherford's Yu Tu, by R. Ambush—to On Voyage.
 F. P. Roche's Irene, by Iris—to Woodlock.
 Henry Rohner's Dusty D. by Director—to Irving Pointer.
 C. K. Short's Honda Girl, by to Skido Wilkes.
 C. K. Short's Beck, by Waywood—to Skido Wilkes.
 C. K. Short's Mabel, by Waywood—to Skido Wilkes.
 C. K. Short's Keno, by Prismo—to Skido Wilkes.
 Thos. Smith's Marguerite Hunt, by Nutwood Wilkes—to Vallejo King.
 F. E. Stockdale's S. P. Pointer, by Star Pointer—to Black Hall.
 John Suglian's Hazel Mac, by Director—to Expressive Mac.
 Shippee & Thompson's Dowina, by Bon Voyage—to The Bondsman.
 Shippee & Thompson's Lilly Young, by McKinney—to Quintell.
 Shippee & Thompson's by Temescal—to Bon Guy.
 A. L. Scott's Cora, by Ira—to Le Voyage.
 A. L. Scott's Healy Mare, by to Le Voyage.
 A. L. Scott's Rosie Woodburn, by Easter W—to Le Voyage.
 A. L. Scott's Lady Inez, by Nutwood Wilkes—to Le Voyage.
 Jas. Stuart's Easter D., by Diablo—to Copa de Oro.
 Wm. A. Stuart's Phyllis by Greco B.—to Irving Pointer.
 Henry Spaulding's Georgia Lecco, by Lecco—to Bon Guy.
 W. L. Selman's Dulce Yedral, by Milo McKinney—to Knight of Strathmore.
 C. F. M. Stone's Cora J., by Rel Camado—to Carloklin.
 P. H. Smith's Katherine, by Diablo—to Zombro.
 S. C. Tryon's Nightingale, by Knight—to Lijero.
 S. C. Tryon's Zella, by Azmoor—to Montbaine.
 S. C. Tryon's Zeta, by Azmoor—to Montbaine.
 S. C. Tryon's Zena, by Azmoor—to Montbaine.
 S. C. Tryon's Azraze, by Azmoor—to Montbaine.
 L. H. Rodanter's Sweet Boy, by Bon Voyage—to The Bondsman.
 W. N. Tiffany's Lady Vasto, by Vasto—to Carloklin.
 Dr. I. L. Tucker's Babe T., by Rajah—to The Bondsman.
 Valencia Stock Farm's La Belle H., by Derby Heir—to Copper King.
 Valencia Stock Farm's Isabelle, by California Titus—to Pegasus.
 Valencia Stock Farm's Puckachee, by Dexter Royal—to Direct Heir.
 Valencia Stock Farm's Rose Direct, by Direct Heir—to R. Ambush.
 Geo. L. Warlow's Cora Wickersham, by Junio—to E. G. Diablo.
 Geo. W. Warlow's Strathalie, by Strathway—to Black Hall.
 Geo. L. Warlow's Soisette, by Guy McKinney—to Black Hall.
 Geo. L. Warlow's Narcola, by Athadon—to Black Hall.
 Geo. L. Warlow's Donnagene, by Athadon—to Stanford McKinney.
 F. E. Wright's Toots W., by Stam E.—to Lijero.
 F. E. Wright's Iadora W., by Jas. Madison—to Lijero.
 H. W. Whitman's Truman C., by Silver Coin—to Joe Locke.
 H. W. Whitman's Mary M., by H. M. Stanley—to Joe Locke.
 Dr. J. L. White's Camille, by Wildnut—to Lijero.
 Fred E. Ward's Emily W., by Jas. Madison—to Beirne Holt.
 Fred E. Ward's Lady Madison, by Jas. Madison—to Zombro.
 Fred Woodcock's Bessie L., by Montana Director—to Falmont Jr.
 C. F. White's Cornelia, by Beau B.—to Tom Smith.
 D. W. Wallis's Corrine Sidmoor, by Sidmoor—to The Bondsman.
 D. W. Wallis's Miss Custer, by Custer—to El Angelo.
 D. W. Wallis's Annie McKinney, by McKinney—to El Angelo.
 D. W. Wallis's Simona Wilbur, by Nutwood Wilkes—to El Angelo.
 Jay Wheeler's Dixie by Director—to Lijero.
 J. G. Whannop's Gladys Moore, by Moormont—to All Style.
 O. H. Whitehouse's Cashier G., by Greco B.—to Prince Ansel.
 T. D. Witherly's Blanche Richmond, by Son of Nutwood—to Peter Wilton.
 J. W. Zibbell's Kate Lumry, by Shadeland Onward—to Expressive Mac.
 J. W. Zibbell's Evangie, by Shadeland Onward—to Expressive Mac.
 J. W. Zibbell's Lady Owyhee, by Owyhee—to Expressive Mac.
 J. W. Zibbell's Lady Smith, by Tom Smith—to Expressive Mac.
 J. W. Zibbell's Nona Washington, by Geo. Washington—to Athasham.
 J. W. Zibbell's Jess McKinney, by McKinney—to Ed-die G.

THE WALLA WALLA MEETING.

The meeting at Walla Walla of the North Pacific Fair Association, February 1st, was by all odds the best in the history of the organization. The program arranged was entered into with unusual interest and the efforts of Messrs. Ritz and Johnson, of the Walla Walla Fair, seconded most enthusiastically by the Commercial Club and many citizens, resulted in a continuous entertainment of the visitors.

In addition to being the largest and best meeting of the association, it was the most important. California, Arizona, Montana and Utah were represented by men who are sincere in the effort to bring about a greater and more useful organization.

More business of a routine nature was transacted at this session than ever before, and there is no time for details, further than to notice the chief events—those that bear directly upon the fair and racing situation for 1912.

A working committee under R. H. Cosgrove, of Spokane, vigorously tackled the matter of railroad rates, and through the fact that the Northern Pacific, represented by R. T. Bretz, of the general freight department at Tacoma, and the O. W. R. & N. by William McMurray, of Portland, attended the meeting, the matter was taken up and it is safe to say now that the exhibitors making the circuit of fairs will be given reduced rates, whether they return shipments by the going route or not. Also, there will be a more liberal policy regarding the feed, tack, etc., that may be carried. A joint circular to this effect will be in the hands of the fair managers of the Northwest before the end of February or in time for the catalogues.

Regarding the shipments of race horses the assurance is given that there will be some modification of the present rules. One of the stumbling blocks in the way of this concession has been the high valuation placed upon speed stock by the shippers. The committee, comprising Messrs. Cosgrove, Pace, Rolston, and Meredith, of the North Pacific Circuit, and Shoemaker, of Montana, without making any rash promises, believe that satisfactory progress will be made.

There was less friction regarding the matter of dates than ever before, and the following were assigned:

- August 12th-17th, Vancouver, B. C.
- August 19th-24th, open to Seattle.
- August 26th-31st, Portland.
- September 2d-7th, Oregon State Fair.
- September 9th-14th, Vancouver, Wash.
- September 16th-21st, Walla Walla.
- September 23d-28th, Washington State Fair.
- September 30th-October 5th, Spokane Interstate Fair.
- October 7th-12th, Boise, Idaho.

Perhaps the most important matter was the amalgamation of all the circuits, representatives of which recognized the North Pacific Fair Association as the parent organization. South of the Canadian line, the states of Utah, Montana, Washington, Oregon, California, Idaho, and Arizona were represented, while to the north, British Columbia, Alberta, and Saskatchewan had delegates present. Shoemaker, of Montana, president of the Intermountain Circuit, came to the meeting with a plan of organization, seconded by Ensign, of Utah; Rolston, of Vancouver; Christie, of Arizona; Scott, of California; Richardson, of Calgary, and West, of Edmonton. No meeting of fair men was ever held before west of the Rocky mountains where all the states and provinces were represented. The organizations represented were:

- The North Pacific Fair Association,
- The Western Canada Circuit.
- The Pacific Coast Fair and Racing Association,
- The Intermountain Circuit.
- The British Columbia Circuit.

It was moved by Mr. Richardson, of Calgary, and seconded by Shoemaker, of Montana, and Ensign, of Utah, that the officers of the North Pacific Fair Association be the officers of the International Circuits Association for the first year. These are:

- H. S. Rolston, president, Vancouver, B. C.
- Robert H. Cosgrove, vice-president, Spokane.
- John W. Pace, secretary-treasurer, Seattle.

The president was authorized to complete the board of appeals by the appointment of two members.

Action was taken upon the following subjects: That, beginning with the suspensions of 1912, no discounts whatever be made in settlements.

That five per cent of the purse be deducted from money winners in running as well as in harness races.

That all bulletins and information issued by the North Pacific Fair Association be sent to the members of the various circuits represented.

That the meeting of 1913 be held the first Thursday in February at Salem, Oregon.

That the rules and regulations of the North Pacific Fair Association be adopted for the government of members until the next meeting, and that the constitution and by-laws thereof be adopted.

The racing season will commence in California and move north to Vancouver, B. C., on August 12th, and end at Phoenix, Arizona, on November 11th.

Early stakes will close in groups as follows: Vancouver, B. C., Seattle, Portland, June 15th; Salem, Vancouver, Wash., Walla Walla, July 15th; Washington State Fair, Spokane, Boise, August 10th. Purses for harness events will close in groups: Vancouver, B. C., Seattle, Portland, August 1st; Salem, Vancouver, Wash., Walla Walla, August 20th; Washington State Fair, Spokane, and Boise, September 10th.

President Rolston, who has attended many of the circuit and fair meetings, says of the new organization: "I have great hopes for a permanent and strong association. We have with us now members and sections that have heretofore felt indifferent to the effort to bring about a united and co-operative movement among the fairs and tracks in the big territory west of the Rockies and extending north and south from Edmonton to San Diego. There is now a unity of effort never seen before, and the basis has been laid for a big beneficial coalition of all the interests on what is known as the Pacific Slope. Every fair and racing association in this big territory ought to ally itself with the International Circuits Association, as under the present plan it can also maintain its allegiance to its local circuit organization."

A TRIO OF GOOD STALLIONS.

H. S. Hogoboom is as well, if not better known, to all horsemen on the Pacific Coast, than any other in California. For many years he has been closely identified with light harness horses, and at the Woodland race track always has a string in training, and every year returns from the circuit a money winner. He has three stallions which he is standing for public service, and it is doubtful if three better bred ones are controlled by any other man. His stallion Palo King 2:28½ is a grand individual and should have had a record of 2:15 or better if he had not met with an injury. His bloodlines are set forth in his advertisement in this issue and they are worthy of being carefully studied; it is the Wilkes-Electioneer cross backed up by the stoutest of thoroughbred blood and tracing to mares that are famous: By By, Alma Mater, Green Mt. Maid, Rosa Sprague, Rose Kinney, Palo Belle 2:24½, Dame Winnie, Madame Headley, Miss Russell, Clara, Belle Isle, Mag Ferguson, Ida Belle, etc. Not one that has ever been known to throw a "quitter," or a faint hearted colt. Is it any wonder that Palo King is a sire of the gamest of horses. At nine years of age he is the sire of the greatest three-year-old race winner on the Pacific Coast, Little Lucille 2:09. A number of Palo King's progeny will be seen in the races hereafter, and it is almost a certainty they will be leading their rivals.

Iran Alto 2:12¼ the sire of 15 in 2:30 and 3 dams of 3 in 2:30, needs no laudation. As a race horse he was well nigh unapproachable. His pure-gait and bulldog courage endeared him to the general public while his progeny is noted for inheriting these traits, combined with the best of feet and legs, good color, and the sweetest dispositions imaginable. His daughters should prove to be famous broodmares.

The youngest of this trio is a worthy son of his called Alto Express. See how he is bred, and as Mr. Hogoboom truly asks, "Where can you beat it?" He is out of a handsome mare by Nutwood Wilkes 2:16½ and her dam was Expressive, the greatest three-year-old trotter that ever crossed the Rockies. She got her record of 2:12¼ at that time against fields of aged horses. Since being retired to the breeding ranks she has produced a three-year-old stake winner with a mark of 2:08¼, another trotter with a mark of 2:08¼, and the great Eva Bellini, besides she is the dam of Expressive Mac 2:25¼, sire of Vera Hal 2:08. Alto Express is a grand individual, a pure gaited trotter and one that will get a low record this year. Look his pedigree up. See how it contains the names of so many famous sires and wonderful broodmares. At the low price these three horses are standing they should have their books filled in a short time.

Joe McGuire has fourteen head of trotters and pacers in training at Overland Park this winter and is confident that he will duplicate his success of last year. The Estabrook horses, sixteen in all and representing the greatest harness stable in the world, also camped at the Overland, seem to be doing very well for the weather has been mild and fine during the past month for regular work and Macey has them going some. The three-year-old speed marvel, Colorado E. 2:04¼, heads the list, and it is expected by many that he will trot a mile in two minutes before the summer is over. Last fall he stepped a half mile in one minute flat. Estabrook also has Wanderer, the gelding which was a sensation last year in the Kentucky tracks. He has a mark of 2:06¼. This horse will be entered in many of the principal stakes on the big circuit and is being picked by experts to capture several of them. Besides these speedy racers Estabrook has the pacer Hal Wiss, which stepped a mile last fall in 2:05¼, Countess Marie 2:14¼, and Gold Dollar 2:06¼, that will start in the big stakes throughout the East.

Demanding damages in the sum of \$1,000, J. F. Waddle, through his attorney, J. P. Fitzgerald, last Monday filed an amended complaint in the Superior Court against the Southern Pacific Company, in a suit begun some time ago. The plaintiff, in his complaint, sets forth that on September 22, 1909, C. O. Stanton, a well-known breeder and stock dealer of this city, shipped to him, in Lemoore, Kings county, a draft stallion valued at \$3,000. Waddle believes that twenty-four hours would have been a reasonable time for transit and complains that he did not receive his horse for five days because his car was sidetracked at various places en route, and when he did arrive the animal was in such a condition, on account of his long journey in a closed car, that he was damaged to the extent of \$500. Waddle declares he was personally damaged \$500 worth by the non-arrival of the stallion and sues for the lump sum of \$1,000 with costs.

W. I. Higgins, of Deer Lodge, Mont., has purchased from C. X. Larrabee, proprietor of Brook Nook Rancho, Home Park, Mont., the yearling full brother to King Brook 2:07¼. This fellow is a grand looking colt. Mr. Higgins has had him registered as Brook Nook King 56722, and has evidently decided to corner the market in the produce of The King Red and Adelfa. He now owns three head bred this way in addition to King Brooke.

NOTES AND NEWS

The sales of Reducine are increasing daily. There's a reason!

More than 550 stallions and jacks have been licensed in California to date.

We are filling a number of orders for stallion cards. Our facilities for this work are unexcelled.

R. J. MacKenzie is a regular visitor at Pleasanton, where he takes delight in seeing his horses exercised.

Fred Chas & Co. will hold a big combination sale of trotting stock in this city, Monday evening, March 18th.

The gray mare Blancheward (dam of China Maid 2:05½) has been shipped to San Jose to be bred to Bon McKinney 2:24½.

Red Gerrity will spend the balance of the winter at Memphis. The Cochato four-year-old Beirne Holt is the star of his stable.

F. W. Perkins, of Willows, will be pleased to learn if there is anyone shipping mares to Los Angeles or from Woodland to Pleasanton.

There were 217 entries made in the California State Futurity Stake at Sacramento this year; eleven more than were received in 1911.

Frank Childs and Elmo Montgomery may take their string of pacers and trotters north to start in at the race meeting in Calgary, June 29th.

Dick Johnson, of Woodland, has a fine looking two-year-old colt called Decoratia. He is by Monicrat 2:13½, out of Majella B., by Nushagak.

The American Horse Breeders' Futurity, \$10,000, will be raced this year over the Salem, N. Y., track during the Grand Circuit meeting, August 26th-30th.

It is reported that the American Horse Breeder, of Boston, which for a number of years past has annually given a futurity, will not open one this season.

Vernon McKinney 2:02 was jogged a mile in 2:40 on Tuesday. It is the first mile he has paced outside of a slow jog since he arrived at Pleasanton.

Charles Whitehead's fine brown mare Zinsky, by Delphi 2:12, dam Nina B., by Electioneer, trotted a mile Tuesday in 2:28, last half in 1:11, at Pleasanton. She is a good one.

The total amount received for the recent three days' horse sale at Madison Square Garden, New York City, was \$112,740 for 373 head; an average of \$304.

Remember entries to the Canfield-Clark Stake No. 4 will close March 1st. This is for foals of 1911 that are to trot or pace in this stake as two-year-olds in 1913. Owners cannot afford to overlook this.

Entries to the "Horseman and Spirit of the Times" \$20,000 Futurity Stake, will close March 15th. It is to the interest of every owner to have an entry in this, the most valuable stake offered.

Strathdon is the name of the Strathway gelding that Farmer Bunch drove in 2:22½ (the fastest mile made at Pleasanton this year) last Tuesday. Strathdon's dam is Elsie Downs, by Booodle.

H. S. Cowell, of Santa Cruz, has sent his five-year-old mare by Cupid 2:18, out of Dione 2:07¼ (dam of Bernice R. 2:11¼) to J. Elmo Montgomery, of Sacramento. She looks like a good one.

J. W. Zibhell, of Fresno, Cal., is visiting friends and relatives in his old home town, Bay City, Mich. It will not be surprising if he brings back a well-bred, fashionable young trotting stallion.

One cannot put their finger on a spot in the pedigree of a trotting-hred horse where a strong trotting cross is not of more value than a thoroughbred cross, and breeders are fast finding this out.

The noted showmen, Ringling Brothers, purchased fifty-six head of fancy drafters for show purposes in Chicago in 1911. Only the best were able to fill the requirements and cost \$500 each.

The racetrack at San Jose is in fine condition and a number of stalls have been engaged by men who intend to have their horses handled on this splendid course.

Charles L. DeRyder, of Pleasanton, has written R. L. Nash, proprietor of Mansfield Farm, to send a man to Milwaukee for the young mare, Cleo Dillon, three-year-old record 2:13¼, and bring her to the farm to be bred to Axworthy, the sire of General Watts 2:06¾ and Hamburg Belle 2:01¼. Cleo Dillon is a daughter of Sidney Dillon and was winner of the Pacific Coast Breeders' Futurity, in which race she defeated Helen Stiles 2:08¼, one of the fastest daughters of Sidney Dillon.

About the most contemptible being on the face of the earth is the chronic knocker. He is a nuisance first, last and all the time. There are several of this detestable class in California. They are known as the "anvil chorus."

Aristo 2:08¼, the hay trotting gelding whose record was made several years ago over the Brighton Beach track in a dead heat with Sweet Marie 2:02, is being used on the road by Jos. Prescott, of Buffalo.

Carey Montgomery, of Dixon, is standing Logan Pointer at his place this season. Logan Pointer was sired by Star Pointer 1:59¼, out of Effie Logan (dam of Sir Ahert S. 2:03¼ and Jim Logan 2:05¼), by Durfee.

Capt. C. H. Williams' fine large stallion Unimak will be trained and driven by H. S. Hogohoom, of Woodland, this year, and this well-known trainer believes he will give him a mark of 2:15 or better. Unimak is a full brother to Sterling McKinney 2:06¼.

Another of our well-known horse breeders passed away. Nathan J. Stone, who owned a stock farm near Mountain View and bred a number of trotters and pacers about sixteen years ago, died at Hollywood, near Los Angeles, February 5th. Deceased was a most estimable gentleman.

Surprise, by Bonnie Scotland, sired the granddam of Burline 2:14¾ and Reneline, dam of Rena Patch 2:06¾, and Reneline is also dam of the phenomenal Dazzle Patch, by Dan Patch 1:55. Surprise was a full brother to Columbia, dam of Columbine, and she was the dam of Anteeo 2:16½, Antevolo 2:19½, etc.

Messrs. John Quinn, J. Elmo Montgomery, Frank Childs, Ben Walker, Wm. Ivey, Jas. Thompson, and P. W. Hodges are busy working their strings of horses at the Sacramento race track. This course was not in the best of shape all winter, but is improving every day.

J. W. Zibhell, of Fresno, is the owner of a very promising three-year-old filly called Raisin Girl. She was sired by Tom Smith 2:13¼, out of Lady Owyhee, by Owyhee 2:11; second dam Nona Y. (dam of Adam G. 2:05½, Nance O'Neill 2:09½, Charles David 2:15, and Lady Rowena 2:18½). She is entered in a number of Eastern Futurities.

Ray Mead's good broodmare Carrie B. 2:18 (dam of Ray o' Light 2:08¼, Lovelock 2:19¾, and Ishmael 2:21), by Alexander Button, out of Carrie Malone (sister to Chas. Derby 2:20, etc.), by Steinway 2:25¾, is due to drop a foal any day by the splendid McKinney stallion Tom Smith 2:13¼.

W. W. Marshall was buried at Willows last Sunday. He at one time was the owner of Stranger 2:18, Bird Marshall 2:11¼, and raised a good many others. He was a pioneer, 74 years old, and a good man in every particular and respected by everyone. He leaves a son and daughter.

The 1912 catalogue of "The International 1:55 Horse Farm," the home of Dan Patch 1:55, Minor Heir 1:58½, George Gano 2:02, Arion 2:07¾, and a splendid collection of well-bred youngsters, is at hand. It is profusely illustrated and is a credit to the compiler and printer.

Catalogues from the Kentucky Sales Company have been received. There were some splendidly bred trotters and pacers to be sold at their sale this week. Mr. Gethens, of the Riding Academy, is there to purchase some of the grandly bred and perfectly trained Kentucky saddle horses that are to be sold.

Al Russell, the well-known horseman, writes: "I am very much pleased with the Los Angeles track and weather and think it a very desirable place to winter, as the climate can't be beat. It's good enough for me, and I intend to make Los Angeles my permanent home."

A prominent horseman at the San Jose racetrack last week remarked, when Bon McKinney was led into a box stall: "People who are looking to find a fashionably bred young horse at a reasonable price should not overlook this horse Bon McKinney, for I think he will make a great sire. If he does not, there is nothing in breeding and individuality."

P. W. Hodge's three-year-old stallion Rapallo, by Greco B., out of Oniska (dam of San Francisco 2:07¾), gives every promise of being faster than his celebrated half brother. He is a good-gaited, strongly-made horse, and knows nothing but trot. He will be seen on the Pacific Coast Circuit this year.

Mr. G. Wempe has decided to breed his fine trotting mare Plumada by Advertiser 2:15¼ to The Bondsman. Plumado, before meeting with an accident last fall, was the fastest daughter of Advertiser on this Coast. The resultant foal from this mating should be invaluable.

Owyho 2:07¼, by Owyhee 2:11, out of Bertha (the world's greatest broodmare), only brought \$535 at the Midwinter Sale. Owyho was bred to a number of excellent mares in New Jersey and some of his progeny should have achieved distinction as low record holders, but somehow only one, Princess Owyho, got a record pacing of 2:22. That's one of those things, as Lord Dunderary used to say, "that no fellow can find out."

Jim Thompson has only two horses in training at the Sacramento track, Moses, by Moses S., out of a mare by Rajah (this stallion with the Hebrew name is quite a trotter), and in an adjoining stall he has a big gelding he calls Wortby, by Temescal, out of a mare by Dictator Wilkes. These are the property of their breeder, W. A. Shippee.

There is a black colt called Guaco, by Nohage, out of Zomell, by Zomhro 2:11, that Jim Thompson is handling at Sacramento which he believes is one of the best trotting "prospects" in California. As it is growthy and quite young, Mr. Thompson says he can afford to wait on him. This colt belongs to W. A. Shippee.

By the report of the Panama-Pacific Exposition Company the Stadium in Golden Gate Park is to be improved. We understand it will be extended and made to suit the horsemen and all the athletic associations who will work night and day to make it the best paying proposition for the Exposition management of any on the Fair grounds.

George Haag, the popular Calgary, Alta., trainer, has purchased from Dan J. Fenelon, Ripon, Wis., the roan pacing stallion Roan Hal (4) 2:18¼. Fenelon raced Roan Hal very successfully as a three and four-year-old and the colt demonstrated that he was close to a 2:10 pacer over a half-mile track last year. Haag will stake his new purchase in the Canadian Northwest and on the Pacific Coast.

The Wheatcroft thoroughbreds which arrived at Sydney, Australia, from Lexington, via Vancouver, are not considered of much value by the Australians, who are extremely hard to suit, and as judges of conformation and bloodlines surpass their relatives in England. It looks as though that trip will be a losing proposition to the shipper, judging by the criticisms of it in the Australasian press.

Owners of stallions should advertise them as soon as possible, for the foaling season is rapidly approaching and mares should be bred. If broodmare owners do not ascertain how the best stallions are bred and the cost of service they will undoubtedly breed to those which are already advertised in our business columns. There are other stallions deserving of patronage and publicity, but the question confronting broodmare owners is, Where are they?

Two years ago Joe Cuicello was in the north with a string of horses, and, on his return to California, brought a bay colt to San Jose to train for its owner. As everyone knows, Joe skipped away suddenly, leaving this colt. No one knows how it is bred, who owns it, or where it was foaled. Perhaps some of our readers in Oregon and Washington will be able to give some information about it, as it is still at the San Jose racetrack in charge of Ray Mead.

It must be interesting to race a stable of horses at Juarez, Mexico, for the races have to be declared off every time a new revolution is started. Then there is always the pleasing knowledge that the insurgents may confiscate the race horses and use them for cavalry mounts. The running horse game has had some pretty hard knocks in this country, but the horsemen do not seem to have realized an ideal haven in the refuge across the Mexican boundary line.

A driving club is to be formed at Salinas with the idea of holding matinees at least once a month at the race track there. Such an organization should do well and especially when such enthusiastic horse owners as the following are interested in its formation: James N. Anderson, Iver, Cornett, Dr. J. P. Nichols, Henry Storm, Henry Struve, H. H. Helman, Louis Iverson, Denny Lynn, Worthy Parsons, Ross Nissen, Conrad Storm, John Storm, N. Holiday, S. Bullene, Cheri Hebert, Robert Garside, John Garside, and Thos. Ryan.

Mr. W. E. Meek, of Antioch, has just sent two promising horses to Barney Simpson, Pleasanton, to be trained; they are Fleet, by Mendocino 2:19½, dam Rosemary (dam of Iloilo 2:15, by Nutwood Wilkes 2:16½); second dam Emma Lou 2:25, by Director 2:17; third dam by Chieftain; fourth dam Bonnie Belle, a famous race mare by Williamson's Belmont, and Jih, a pacer that has been a trial mile in 2:15. He is by Wm. Harold 2:13¼, out of a mare by Welcome 2:10½; second dam by Director 2:17; third dam by Chieftain; and fourth dam Bonnie Belle. Mr. Simpson was for many years superintendent of the trotting department at the Meek farm, Haywards, and thoroughly understands how to handle horses and develop their speed. He is a welcome addition to the ranks of competent trainers at Pleasanton.

H. S. Hogohoom, of Woodland, writes: "Chas. Spencer will ship from here to San Diego next Tuesday. Barney Schreier's thoroughbred colts that have been here for the past few months, while being driven along the road rushed over a hedge, two were crowded off, broke their legs, and had to be destroyed. Several of the others ran into a barbed-wire fence and were very badly cut. I expect to get some very fine mares for Palo King this year, as all his colts and fillies are well liked. There is one mare to be bred to him; she is by Iran Alto 2:12¼, out of Bell Bird, second dam Beautiful Bird. Another is by Nutwood Wilkes 2:16½, out of Expressive (3) 2:12¼, etc. I believe Palo King is the first nine-year-old stallion to have to his credit a three-year-old as fast as Lucille 2:09."

Det Bigelow's good little pacing mare Tags 2:11¼, by Diahlo 2:09¼, out of Bonny B., by Alexander Button; second dam Frederica, by St. Clair 656, is the dam of Louise Patch 2:24½, by Dan Patch 1:55. Tags is owned at the International Stock Farm.

George A. Estabrook, of Denver, Colo., will race fourteen horses this year—Colorado E. 2:04¾, The Wanderer, Hol Wissy, Gold Dollar 2:07, McKinney Mac, The Ideal Lady, Zomba, Zarrine, Redlock 2:17¼, Country Jay, Estarado, and several others of lesser caliber.

There is a green trotter at the Portland, Ore., track that has all the qualifications of a race horse. A few days ago the writer saw him step an eighth in 1¾ seconds hitched to a 55-pound cart. This colt was bred by the late Monroe Salishury, and is sired by Directwell 2:24¼, dam by Silver Bow. Mr. Salishury worked the dam in 2:14, and as she met with an accident was bred. After Mr. Salishury's death the colt was shipped to the sale there, and some time after passed into C. W. Flanders' hands, who owns him at present. He is sixteen hands high, a nice-made fellow, and has a splendid head; his feet and legs are of the best, and his speed seems to be unlimited. His name is Frederick K.

Mr. John Tiddy writes from New Zealand as follows: "My colt, Nutansel, by Prince Ansel 2:20½, out of Nellie K., by Nutwood Wilkes 2:16½, and the black colt Manuka, by Monicrat 2:13½, out of The Bloom (sister to Red Blossom 2:27¼), by Nushagak, have improved wonderfully since their arrival in Kaipaki and I intend to show them at the next fair. They get all they can eat and are jogged about five miles a day, and I believe they will be all that was claimed for them. I am pleased to hear such good reports about the Prince Ansel and Nushagaks in California."

Changes in the rules made in New York, February 14th, by the biennial congress of the National Trotting Association provide that horses with records on mile tracks shall be allowed three seconds when racing on half-mile courses, and that hobbles may be used in all classes except the two, three and four-year-olds. Before adjournment the horsemen approved a recent suggestion of Major-General Leonard Wood, chief of the United States Army, that a superior standard of horses be bred for the army. A resolution was adopted that the trotting horse men would co-operate in any way they could to carry out the government's desires in this respect.

The Moko stallion Monthaine, owned by P. W. Hodges, at Sacramento, is slowly recovering from an injury received by an incompetent groom who histered his pasterns and heels with a most powerful liniment last November while Mr. Hodges was away. It is hoped this horse will be able to show what he is capable of doing as a trotter this year in the races. Last spring his superior trotting action was highly commented upon by all horsemen who saw him worked. Monthaine was bred to some fine mares and no doubt this year his hook will be again filled.

Farmer Bunch is moving his horses along. He drove Star Searcher, a two-year-old by Star Pointer, dam by Searchlight, a mile in 2:50 last Saturday. He is a trotter and in this mile reeled off a quarter in 40 seconds, but in Jim Rea III he has a pacing colt that is better than One Better 2:24½, Much Better 2:07¼, or None Better 2:23¾, his near relatives, for he paced a mile (and he is only a yearling) in 2:59, last quarter in 39 seconds. Bunch thinks he should be entitled to be called One Hundred Per Cent Better, but his love for Jim Rea and his grandson will not permit him to make the change.

The annual meeting of the California Livestock Breeders' Association will be held on March 2d in the Palace Hotel, San Francisco. This promises to be the most important ever held by this association, for steps are to be taken toward holding a world's exhibition of livestock at our Panama-Pacific Exposition in 1915. Special railroad rates (one and one-third fare) for members and visitors can be obtained at the offices of the railroads. These are good for a five days' excursion and will be on sale ten days prior to March 2d.

Attention is called to the dispersal sale of trotting stock belonging to the estate of Wm. Morgan (deceased). This is an opportunity to buy the very choicest bred in California at auction, and a better made, choicer bred, or more promising lot was never offered in Los Angeles before. There are mares by such sires as Zombro 2:11, McKinney 2:11¼, Redlac 2:07½, Limonero 2:15½, Walter Barker 2:19¼, Direcho 2:34, and Crisis 2:19¼. This last named stallion (Crisis 2:19¼), by Zombro 2:11, dam Nellie K., by Gen. Grant, is also to be sold. This stock is in the hands of Mr. Frank Williams at the Los Angeles race track. L. D. Lowry is the executor and Sam'l Watkins, Ascott Stables, is the auctioneer.

After years of research by Simon W. Parlin, of the "American Horse Breeder," published in Boston, Mass., the pedigree of the dam of Geo. Wilkes 2:22 has been finally established. She was the Clark M. Phillips' mare by Henry Clay 8, out of Telegraph, by Baker's Highlander. Several years ago a doubt was cast upon the authenticity of this breeding, but all doubts are now removed, for it has been proven beyond a doubt that this great progenitor of speed was bred as above stated.

THE MIDWINTER SALE.

The sale at Madison Square Garden, New York, was a most successful one. There were some colts and fillies offered that did not bring the prices their owners expected, because these youngsters were not fitted for the sale, others were very wild and some had conformations which did not escape the critical eye of the experts. Charley Mitchell 2:04¼, the champion trotting gelding of 1911, and considered a coming two-minute trotter, was knocked down to Ed A. Tipton for \$4,500, and the great horse became the property of C. K. G. Billings, owner of such champions as Lou Dillon 1:58¼ and Uhlán 1:58¾.

The famous three-year-old Oklahoma colt, Graham Bellini, that caused a great sensation last year by taking a record of 2:20½ over a half-mile track, brought the second highest price of the sale, when, after an exciting and lively bidding, he was knocked down to the well-known trainer, Charles Dean, of Palatine, Ill., for \$3,500, the purchase being made for R. J. Mackenzie, the well-known Winnipeg, Manitoba, horseman.

Graham Bellini is a product of W. B. Dickerman's Hilldale Farm, Mamaroneck, N. Y., and was sold at the Garden as a yearling for \$225, the buyer being Al Thomas, who later sold him to the present consignee, T. H. Young, of Tusla. He is entered in all important futurities, and in the hands of Dean will surely be heard of, harring accidents.

Aside from his speed showing and individuality, Graham Bellini is bred in the purple, and will become a great addition to breeding ranks after his racing days.

Judged by the lively bidding, there certainly was a great demand for the Peter the Great youngsters from the Patchen Wilkes Farm of W. E. D. Stokes. On the eighteen consigned, seventeen were sold for a total of \$10,015, or a shade less than \$600 per head, an average which certainly was more than satisfactory.

The following brought \$300 and over:

| | |
|---|------|
| Alice Victor 2:16½, b. m. (11), by Royal Victor 2:08¾—Miss Alice, by Alcantara 2:23; B. Cohn, New York City. | 510 |
| Ivey McKinney, blk. g. (7), by Washington McKinney 2:17½—Dinah Button, by Gen. Dana 1757; Geo. Hewlett, Huntington, L. I. | 325 |
| Mataphan 41080 b. h. (8) by Moko 24457—Allie Hooker, by Allie Wilkes; Daniel P. Fahy, Nashua, N. H. | 460 |
| Alto McKinney 40138, b. h. (10) by McKinney 2:11¼—Cressida, by Palo Alto 2:08¾; C. B. Smith, New York | 275 |
| Betty Bingen 2:21¼, br. m. (8) by Bingen 2:06¾—Doxana, by King Wilkes 2:22¼; Wm. H. Leese, Paterson, N. J. | 525 |
| Clenister, 46611, b. h. (6) by Moko 24457—Leetell 2:17¼, by Axtell 2:12; Geo. T. Pinney, Onancock, Va. | 705 |
| Joana 2:27¼, br. m. (4), by Handsome Jos. 2:16¼—Anna, by Harry Plummer 2976; Chas. Moore, Freehold, New Jersey | 350 |

FAIR DEALING.

No concern in any line of business has a better reputation for strictly fair dealing than has the Reducine Co. of 4181 Broadway, New York City. Their enormous business, the largest of its kind in the world, has been built on a firm foundation of satisfied customers. This company will go to any length, in reason, to satisfy every buyer of Reducine, and they ask a special favor in their ad. this week, that every buyer who ever has or ever does get a can of Reducine that fails to produce the expected results, to write them at once, giving all details.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

PROGRESS OF THE HUNTING SEASON.

The Secretary of Agriculture has received from the Biological Survey the following report on the progress of the hunting season in the United States:

The month of January has been marked by abnormally low temperatures throughout most of the country, accompanied in many regions by heavy snowfall. In consequence of these adverse conditions, quail and other game birds suffered severely. While the measures taken for the preservation of the birds were inadequate, yet unusual interest was manifested in the threatened loss, and much activity was exerted in efforts to avert it. The National Association of Audubon Societies called the attention of the public to the need of feeding birds and, as a result of this and other appeals, many persons, chiefly farmers, scattered food and provided shelter. Grain was distributed in suitable places by game wardens, mail-carriers and other public officers. In the District of Columbia more than a thousand quail were fed by the police; while the needs of non-game birds were supplied by many householders, especially in the suburbs. Virginia expended \$200 through the Virginia Audubon Society and the Game Protective Association. In Delaware, Pennsylvania, Ohio, Indiana, Illinois, Kentucky, Missouri, Oklahoma, Montana and other states, concerted action was taken by the residents of many localities in the distribution of food. In Illinois numbers of dead prairie chickens were picked up, and the same conditions doubtless prevailed in other parts of the prairie-chicken country. That provisions for feeding birds in severe weather should be made early in the season and should be more systematic and thorough, has been amply demonstrated. The elk of the Jackson Hole region, Wyoming, have thus far been in good condition and there has been no repetition of the losses by starvation such as characterized the two preceding winters. On account of the severe weather the Virginia legislature on January 30 passed an emergency measure closing the seasons for all upland game throughout the state.

The shooting season is more generally closed in the north than in the south. After January deer shooting ceases in every state in the union except Mississippi, where it continues until March 1; quail, wild turkeys and doves may yet be shot in most of the southern states but nowhere else; and woodcock in North Carolina, Tennessee, Arkansas and the gulf states. Waterfowl may be shot in any part of the United States, except the northern tier of states, New England (omitting Rhode Island), Utah and Oregon. No change in this respect will occur during this month, but at its close the open season will end in Mississippi, Colorado, California and Oregon. The termination of the open season in Illinois on February 1 closes the Chicago market to game from other states till next season.

Nine state legislatures are at present in session and several important game measures are under consideration. Easily first in importance is the bill codifying the New York game laws and extending the authority of the newly created Conservation Commission of that state to cover certain powers formerly exercised by the legislature. The Virginia legislature also has before it several game laws in which, among other things, provision is made for a state game warden and uniform bag limit, both of which are new features in Virginia. In Maryland bills have been introduced that provide for a game and fish commission of three members to serve without pay, a resident hunting license and uniform seasons for the state. In Massachusetts forty game bills have been introduced. One of these is designed to establish a tagging system for marketing game, similar in its provisions to the Bayne law passed by the New York legislature last year. Another provides for better control of "self-hunting" dogs during the nesting season. A bill under consideration in New York authorizes the establishment of six game farms and provides an appropriation of \$75,000 for their operation. A bill taking the robin off the game list has already passed one branch of the Virginia legislature with little opposition.

New Gun Club.—The Barley Sack Gun Club was properly organized and brought into existence last week, when the entire membership of the newly organized club took a trip to their preserve in a launch to spend Sunday in hunting.

The club ark is situated between the junction of the Feather and Sacramento rivers and is an ideal duck country. The club leased 6000 acres of the surrounding country and the members count on enjoying some very rare hunting.

The land is overflow land, and heretofore but very little hunting has been done there. The ark is easy to get to, as a train takes the hunters within half a mile of the ark, and a launch lands them at the door. A visit which J. M. Inman made earlier in the season showed the preserve to be alive with ducks and that but little hunting had been done on the land.

The Barley Sack Club's roster contains the following names: J. M. Inman, Ed Dalton, George Newbert, Dave Ruhstaller and Jimmy Butler.

Drink Jackson's Napa Soda.

SOME PHASES OF DUCK HUNTING.

Few of those who are so fortunate as to get a pair of teal or sprig from some of their hunter friends have any idea of the time, money, labor and worry spent on the clubs or preserves from whence these toothsome birds come and a still smaller number would believe the stories that could be told them of bow and where the duck lives before he makes his debut in the roasting pan.

About all the average man or woman knows or cares to know about the wild duck business is that the bird is good to eat and costs about as much as a terrapin, but what the ordinary hot-bird-and-cold-bottle brigade does not know about the near-past life of the little thing picked to pieces so ravenously after the theater, would fill a large and costly volume.

The killing of wild ducks is really a business in these latter days of high-priced land and corporations. Where suitable "land" costs from \$100 to \$500 an acre and must be purchased in large acreages, drilled with wells to supply the necessary fresh water and adorned with clubhouses costing from \$1000 to \$10,000 and more, such conditions constitute a "business," for while duck shooting is a "pleasure," it cannot become such without the business end of it coming first.

There is no more sneaking along a slough and taking a chance to crawl up on a band of ducks, as hundreds did in the old days. All one does now is to step into a tule blind and wait for the birds to fly along and frequently one may secure the limit in thirty minutes, if the flight is good.

In order to attract the ducks, there must be large bodies of fresh water on some preserves and these mean wells and levees. After these come a keeper's house, a clubhouse for members wishing to stay on the preserve over night, a store house for the grain that is always thrown out for the birds a month before the season opens; fences, garages, wagon roads and the dozens of other improvements that go to contribute to the standing or success of a modern duck club.

The only way to demonstrate to a large class of unbelievers is to "show them" and the many duck clubs of California are fully prepared to do this. It is safe to say that there is more than \$4,000,000 invested in duck clubs in this State and probably one-half as much more is spent every year by the hundreds of members in time, labor and money in the desire to enjoy the season's shooting. The largest club controls by ownership or lease about 10,000 acres and there is probably none of less than ten acres and such small ones are really "all water."

New clubs are organized every summer and the early fall brings active operations on every preserve in the way of plowing land, repairing buildings and fences, refilling the artificial lakes, building new levees, and otherwise getting ready for the opening of the season in October. Those who believe that duck hunting is more of a pleasure than a business should visit the clubs in the fall or at any time during the duck season. They are well worth a day's or a week's investigation.

NEEDED WILD GAME LEGISLATION URGED.

John B. Burnham, president, and William S. Haskell, vice-president and counsel of the American Game Protective and Propagation Association of New York City, are now in Washington to urge the passage of a bill for federal protection of migratory birds.

Enlightened sportsmen throughout the country agree that such a bill is necessary to prevent the speedy and total extinction of certain migrants. They point to at least two cases—that of the wild pigeon and the Esquimaux curlew—in which shooting during the breeding season has resulted in annihilation. The woodcock and woodduck are in immediate danger of a like fate as a result of unrestricted shooting.

It is significant that of the twenty-four varieties of ducks, geese and swans breeding within our borders, the woodduck is the one most distinctly a resident of the United States. Protection for this bird would be sure to result in its increase, for it seldom leaves the confines of the union. Many other species which have been driven from their former breeding grounds would stop with us again, if on their arrival in the spring they were not greeted with deadly fusillades which compel them to continue northward.

Since many of the individual states refuse adequately to protect migratory birds, the only way their extermination can be prevented is for the national government to do so. It is held in some quarters that this would be unconstitutional, as interfering with the police powers of the states. But there is precedent for federal control of matters which concern the nation as a whole when the states refuse, or are unable to control them.

Twenty-four Cougars Killed.—Twenty-four mountain lions were killed in California during January, according to a report issued by the State Controller at Sacramento. The lions were killed in the counties as follows: Siskiyou 5, Humboldt 8, Shasta 4, and one each in Kern, Ventura, Mendocino, San Luis Obispo, Tehama, Trinity and Del Norte.

TO THE AMERICAN PUBLIC.

The National Rifle Association of America herewith appeals for funds to assist in having the United States represented by rifle teams at the "Olympic games" in Stockholm, Sweden, and the Pan-American Rifle Shooting Tournament to be held at Buenos Aires, Argentine Republic, during the coming spring.

The proposition to have this country represented in the rifle shooting division at the Fifth Olympiad should appeal favorably to every American.

We are now the holders of the Olympian rifle shooting team championship with the military rifle, having been the victors at the last Olympiad held in England in 1908.

Our ideals of sportsmanship alone would be argued enough in favor of our defending our hard earned laurels, but there is also another strong reason for our being represented which will be mentioned later.

As to the Argentine proposition there are strong commercial as well as sentimental reasons for our accepting the invitation to join with the South American republics in a friendly passage at arms on the rifle range. This government is most anxious for cordial relations with our rapidly growing sister republics of South America, and in view of the greatly increasing trade relations between them and the United States we would not have been acting for the best interest of such relations not to have accepted the cordial invitation extended by Argentina to send representatives to the Pan-American tournament to be held at Buenos Aires.

A great international rifle shooting tournament is to be held at Camp Perry, Ohio, in 1913, in connection with the Perry Centennial and the sending abroad of these American teams this year will assist greatly in making a success of that event.

Subscriptions are herewith solicited to enable us to send these teams. Corporations, firms, banks, civil and military organizations and individuals are cordially invited to help make it possible to uphold before the world the traditions of "American marksmanship" as we have never failed to do in the past.

Checks should be made payable to "The National Rifle Association of America," and sent to Lieut. Albert S. Jones, secretary, room 1025 Woodward building, Washington, D. C.

Subscriptions will be acknowledged and credit given in the annual report and through the press.

Yours fraternally,

The Executive Committee—Lt. Gen. John C. Bates, U. S. A., retired; Brig.-Gen. C. R. Boardman, Wisconsin; Brig.-Gen. James A. Drain, Washington; Lieut. A. S. Jones, Washington, D. C.; Congressman John Q. Tilson, Connecticut; Col. C. D. Gaither, Maryland; Brig.-Gen. E. C. Dill, Maine; Col. H. G. Catrow, Ohio; Col. Joseph Garrard, U. S. A.; Capt. C. D. Rhodes, U. S. A., representing the Assistant Secretary of War.

Washington, D. C., February 1, 1912.

PLENTY OF PARTRIDGES AND PHEASANTS.

Fish and Game Commissioner F. P. Cady informs us that he hears very encouraging reports from the Hungarian partridges released in this valley two or three years ago, says the Lassen Advocate. They are increasing in different parts of the valley, and if nothing happens to prevent, will, in a few years, be very numerous. The law of the State protects these birds and will do so until they become thoroughly accustomed to conditions.

Reports from several sections of the State are to the effect that the flocks of pheasants that have been planted are more than holding their own and there is every prospect that this game bird will in a year or two afford good sport to the hunters. The birds that were turned at liberty in the vicinity of Tulare have increased wonderfully during the past season and with another year's protection will afford good shooting.

Reports are to the same effect from Tehama, Gridley and in the vicinity of Yreka. The latter seems to be an especially favorite locality for the pheasant as the birds have bred very rapidly during the summer and have evidently found good feeding grounds and favorable surroundings. It will be remembered that the birds did so well in the vicinity of Coyote, Santa Clara county, that they became a nuisance to the farmers and had to be removed.

Those who have had charge of planting the birds are greatly encouraged in these reports and it is hoped that these localities will soon become as good hunting grounds for pheasants as valleys of Oregon.

Different in California.—A correspondent of one of the great New York dailies sent a special telegram from Rangley, Maine, last season, recounting the wonderful angling exploits of E. Napier, of Orange, N. J., one of the Fish and Game Commissioners of New Jersey. This disciple of old Izaak Walton landed in one day, and "after a hard fight, as handsome a trio of salmon as any one could wish to capture." The largest of this handsome trio was 9½ pounds, the smallest 5 pounds. Another astonishing feat was the capture of an 8-pound salmon by an intrepid angler, who actually did the deed alone and unaided. He also was from New Jersey. A New Yorker beat them all, for this brave man landed three tremendous Maine salmon, when rowing his boat alone. The largest monster was 6 pounds. The blithesome California belles that enjoy the summer at Del Monte, and sometimes go out on Monterey bay fishing with their brothers, cousins and other people, think it just child's play to pull in a couple of 30-pound salmon before breakfast. A Maine salmon would feel like a shrimp on their lines.

ANGLING BRIEFS.

The San Francisco Fly-Casting Club announces a midwinter tournament to take place on Tuesday, February 22d, at Stow lake. Should inclement weather interfere with the program the tournament will be held on the first clear Sunday following.

The card calls for five contests: Delicacy fly, accuracy fly, long distance fly, accuracy lure and long distance lure casting events.

The contests will be arranged on a handicap system based on last year's scores made by the different members. There will be three prizes awarded in each event. The club members and their guests are promised an appetizing luncheon at the club pavilion. The managing committee is: T. C. Kierulff, J. L. Burgin and F. J. Cooper.

The annual meeting of the California Anglers' Association will take place Monday evening, February 19th.

The Pacific Striped Bass Club will give a clam-bake at the club's headquarters on the Tiburon cove beach Sunday, March 3d.

The San Francisco Striped Bass Club roster for enrolling exploits of the members is started this year by the initial entry of Charles P. Landresse with a credit of a twelve and a half pound striped bass captured in a Wingo slough.

Reports from Duncan's Mills recently were that Russian river is cleaning and lowering. Fair weather continuing up to yesterday would induce a visit by quite a delegation of local anglers tomorrow.

The stream that runs through Tunitas Glen was visited by Dr. L. L. Cranz, Lester Cranz and Mo Uri. A number of good sized steelhead trout were caught.

Advices that the Pescadero lagoon was in trim for agreeable fishing induced Will Halstead and Percy Henderson to make the trip to that water last week.

A number of anglers were deployed along the tide-water reaches of the Paper Mill creek last Sunday. Small sized trout, from eight to ten inches, were taken, and several large steelheads caught were evidence that the creek is still worthy of attention.

Near Kentfield, a week ago, a gathering of local anglers put out their tackle for the sea trout with a fair degree of success. One of the natives discovered a big steelhead trout caught in a brush dam across the creek and captured the spawning fish with a pitchfork. This being an illegal method of catching steelhead, the fish spearer was subsequently apprehended, tried and upon his attorney disputing the jurisdiction of the justice of the peace the defendant was held to answer to the Superior Court, not having the necessary amount of bail he remained in custody.

Dave Harefield was high rod at the Salmon Creek Rod and Gun Club Sunday, there being a run of small steelhead in the lagoon and creek. Black Jack Lemmer fished in the ocean waters along shore and caught a ninety-four pound halibut.

A year ago the Breeder and Sportsman intimated, among other good steelhead angling resorts, the possibilities of sport in the Santa Ynez. At that time good catches were made during a steelhead run. This season several wise local rosters kept in mind the Santa Barbara coast stream and were on hand to enjoy some capital sport during the past week.

John C. Cattermole of the California Anglers' Association fished the river in the tidal waters near Surf Saturday and Sunday catching three fine large steelhead trout, all over eight pounds in weight, besides a number of smaller fish.

These fish were all fresh run and so numerous that in several instances jumping fish landed in an angler's boat. Members of the Lompoc Fishing Club accounted for eighteen fine fish on Saturday. Sunday morning within an hour twenty-five big trout were landed, none of these fish being under eight pounds in weight.

On Tuesday seventy-five fish was the tally. Jim Jeffries caught three large trout and Ad Wolgast put in some effective upper cuts on half a dozen infighting trout.

Grilse fishing in the bay should be worthy a trial from Powell or Lombard street piers. Mission and Howard street wharves are also a fair bid for a bit of grilse angling. These fish, from two to five pounds in weight, come in the bay from November to March.

The outfit for grilse fishing comprises a rod, rather stout of course, enough so to lift the young salmon from the water up to the wharf. Some anglers use a long-handled dipnet, but this appliance is rather cumbersome. A multiplying reel holding 100 to 150 yards of No. 9 cuttyhunk line, parafined; a heavy three-foot gut leader, No. 1 or No. 2 sproat hooks tied on a gut snell; a float and a split shot or two on the leader all go to make up the proper tackle equipment.

The best bait is a piece of sbiner, and they are easy to get. A wriggling spile or angleworm should be placed on the hook also. This bait is kept two or two and a half feet under the surface of the water. On an outgoing tide, when the fish are "working in," is the best time to fish for the bay grilse.

Billy Kittle and W. H. Hilegass tried San Antone slough for two days last week. Kittle's largest striped bass scaled eight pounds. A Petaluma angler is credited with catching a twenty-eight pound bass in Schultz slough Sunday previous.

Charles Bond, Chris Johnson, Jake Christianson, Emil Accret, Professor McFarland, Bob Sangster, Al Hudson and other skilled clam tossers were engaged in a round-up of striped bass Sunday in San Antone slough. A number of fish were taken. Twelve pounds was the limit weight.

The Wingo Invincibles were out in full force Sunday, and the largest bass lifted ashore was a seventeen pounder, captured by the lucky angler who scored a forty pounder a week previously. A number of smaller sized bass were landed by various anglers. Indications for today and next week are good.

The Wingo district is happily situated. Falling luck in landing striped bass or an odd steelhead or two, the adjacent pasture fields are an unfailing mine for ripe and luscious mushrooms.

Corte Madera creek is reported to be all ready for the striped bass angler. Fish signs have been plentiful during the past week.

HUNTING NOTES.

Quail hunters put away their guns yesterday. The open season in which to enjoy upland sport in the interior valleys or coast foothills closed Thursday, February 15.

Many sportsmen who shoot ducks in the marsh regions accessible in a short time from this city, claim that the close season on wild ducks should also ensue on the same date. Some of the hunters claim that February 1 is not too soon for either duck or quail shooting to cease.

One thing is sure and that is that the table qualities of the ducks, saving the dainty little teal, grow less and less palatable from the first of the year until the season ends. Further than this, the birds are already beginning to mate. The hunters out the past week report numerous instances where the birds were working in pairs. With wild ducks, when one of a pair is destroyed early in the year or during the mating season, the survivor does not seek another mate. This means a brood of ducklings less for the coming summer.

Duck-hunting conditions are shifting the waning days of the season. Around about the bay county marshes since the recent rainfall limit bags have been generally the exception until last week. What will be the duck crop tomorrow is a bit hard to anticipate.

Suisun gunners a fortnight ago were confronted by a heavy fog early in the morning and a high tide that pretty well flooded the whole marsh. A bright, moonlight night gave the ducks a chance to feed and rest until the advent of the trigger pullers on the ponds at daylight. At several preserves the web-feet were congregated in the ponds in big flocks and once disturbed took departure on swift wing and stayed away for the day.

Tule fires that had been started by different keepers also interfered with good shooting conditions.

The best results reported fell to the guns at the Volante Gun Club, located on the Suisun hay shore of Joyce island. James Maynard, Walter W. Kaufman, Bill Lange, Pete Howard, John D. McKee, Cal Brougher and others were able to enjoy shooting that returned limit strings.

Bill Richards' mid-week shoot at Green Lodge afforded a mixed bag of large ducks and almost a limit string of English snipe.

In the "drawbridges" district near Alviso big bags have been few and far between. An average of a dozen ducks to the gun has been the count for the past two weeks. The ducks that frequent that section have become exceedingly wary, and do not pay much attention to the inducements of wooden decoys when a gunner is hidden in a near-by blind.

Hunters working in scull boats had fair sport on Coyote creek and off the bay shore. A heavy fog enveloped both marsh and water expanses on Sunday. When the fog lifted in the forenoon the lower bay was literally covered and white with thousands of canvasbacks. The birds were too well located in open water, however, for the gunners to get many of them.

Petaluma creek hunters have had a fine season, canvasback ducks being very plentiful. Armand de Courtieux and other members of the Hog Island Gun Club have fine sport on the club preserve, between San Antone slough and Petaluma creek.

Many Black Point visitors have shot canvasback limits from tule blinds on Petaluma creek within the past six weeks. One morning recently six duck boats returned to the Point with, it was estimated, about 200 canvashack ducks.

George H. Luchsinger, Captain Seymour and Gus Harper had the pleasing luck to bag a number of canvasback ducks, along with sprig, mallard and teal, that "worked in" to the Seymour ponds on the Suisun. John Haskins and a friend found the shooting equally good last Wednesday.

Phil B. Bekeart, E. Courney Ford, E. H. Lewis of New York and Harry Breuen were the visitors at Curlew Lodge during the two shooting days of the past week.

Recently W. W. Richards and Fred P. Butler found most favorable weather and other conditions for an upland shoot in fine quail country near Marshall's in Marin county.

Several members of the Salmon Creek Rod and Gun Club tried the club coverts on the Bodega preserve. Among the visitors at the shooting ground that day were Ned Bosqui, J. B. Coleman, Joe Harlan, Louis Weinman, John Lemmer and Dave Harefield.

Bosqui was in the hills near Monterey last Sunday, in company with several sportsmen of that section, for the final quail shoot of this season.

Frank Maskey, Clarence Nauman and H. Fishbeck spent Sunday in the Marin quail country above Point Reyes station. Some excellent shooting has recently been available in the vicinity of Tocaloma for local gunners who had the entree to the foothill coverts.

Near Lobitas, in San Mateo county, Ben Angonnet,

a week ago with the aid of a good pointer dog, shot a quail limit in the coast hills. Charles F. Breidenstein and other local hunters had equally good luck in the Purissima country. Quail hunting conditions have been much improved during the last days of the season.

AT THE TRAPS.

In connection with the progress of the Northwest team trap shooting tournament, W. J. Petrain, the press agent for the touring powder burners sends us the following:

On January 15 three two-men teams of professional trap shooters commenced touring the entire Pacific Northwest. The first of these shoots was held at Ashland, Ore., on January 15, and was conducted under the auspices of the Ashland Rod and Gun Club, which organization comprises some highly enthusiastic and clever trap shooters.

All through the Willamette valley in Oregon, as well as in the Puget Sound country in Washington and at Vancouver, B. C., the tourists were received royally, and each occasion marked the turning out of big crowds to see the experts perform, as well as to participate in the shooting in alternating squads, trying their hands at the game during the intervals between each string of 25 targets shot at by the tourists.

The tour was gotten up in the effort to stimulate a more general interest in trap shooting in the Northwest, and, judging by the attendance at each competition, it is proving most successful.

The American Game Protective and Propagation Association has offered a trophy for the team scoring the highest number of wins during the tour, and at present the San Francisco pair, comprising Fred Willet and Ike Fisher, have a commanding lead, these young shooters having won eight of the eleven events shot so far. Willet's performance, so far on the tour, has been remarkable, for he has shot better than an average of 94 per cent in each century run thus far held. At Eugene he distinguished himself by breaking his 100 targets consecutively, the first and only time this mark has been made en tour.

At Eugene the shooters encountered one of the best appointed trap shooting grounds seen so far on the trip, for the Eugene club boasts of a large and enthusiastic membership, and practically all of them were on hand on the day the touring teams appeared at that enterprising place. Walter W. McCornack, one of the members of the Eugene club, distinguished himself on that day by running Willet a close race for the honors of the day, he breaking 99 of his century, missing his ninety-sixth target, which spoiled his perfect score.

At Vancouver, B. C., two of the three teams established what is claimed to be a world's record for two-men team shooting. Fred Willet and Ike Fisher, comprising the San Francisco team, and Hugh Poston and Lester Reid, representing Spokane, tied at the end of the century string with team scores of 194. The individual scores at that shoot were: Willet 97, Fisher 97, Poston 98, Reid 96. It is claimed that this feat has never been beaten in two-men team competition. P. J. Holohan, who, with W. A. Robertson, represented Portland at that shoot, scored 95 breaks, but his team was third in the race, as his partner registered only 83 breaks. Robertson had an average of 90 per cent up to his last frame of 25 targets, during which he lost five. C. A. Mink, Lee R. Barkley, Jim Hillis and Jack Forbes, all noted trap shooters, now located in the Northwest, asserted that the performance of Willet, Fisher, Poston and Reid was a record, and the tourists intend to apply for a marking on this event.

Willet and Holohan, so far, are the only members of the touring teams who have shot a 90 per cent or better clip, but Hugh Poston is rapidly approaching that mark. He got off with a bad start by commencing the tournament with a new gun, but since he went back to his old one he has been doing great work.

The scores of the touring trap shooters up to and including the event held under the auspices of the Vancouver, B. C., Gun Club on January 27, are as follows:

| | F. Willet | J. Reid | H. E. Poston | W. A. Robertson | P. J. Holohan | Ike Fisher | L. Reid |
|----------------------------|-----------|---------|--------------|-----------------|---------------|------------|---------|
| January— | | | | | | | |
| 15, Ashland, Ore. | 91 | 77 | 80 | 75 | 74 | 75 | .. |
| 16, Medford, Ore. | 93 | 96 | 92 | 91 | 95 | 77 | .. |
| 17, Roseburg, Ore. | 95 | 89 | 88 | 92 | 76 | 78 | .. |
| 19, Eugene, Ore. | 100 | 95 | 96 | 93 | 89 | 80 | .. |
| 20, Salem, Ore. | 89 | 89 | 94 | 78 | 89 | 70 | .. |
| 21, Portland, Ore. | 92 | 88 | 94 | 86 | 86 | 80 | .. |
| 22, Seattle, Wash. | 97 | 90 | 94 | 92 | 88 | .. | 90 |
| 23, Bellingham, Wash. | 95 | 95 | 93 | 88 | 96 | .. | 93 |
| 24, Snohomish, Wash. | 91 | 85 | 92 | 89 | 94 | .. | 83 |
| 25, Tacoma, Wash. | 95 | 88 | 84 | 87 | 93 | .. | 94 |
| 27, Vancouver, B. C. | 97 | 97 | 95 | 88 | 98 | .. | 98 |
| Total | 1038 | 989 | 1003 | 913 | 918 | 460 | 455 |

The totals are breaks out of a possible 1,100 targets shot at. The two Reids' score should be registered as one, as they have alternated as partners with Hugh Poston, representing Spokane on the tour. Their total is 915 of the 1,100 targets shot at.

Guy Holohan relieved W. A. Robertson at the Wenatchee shoot. At Spokane Lester Reid was succeeded by A. Berger of Spokane. L. Randlett took Ike Fisher's place as Fred Willet's team-mate.

Hugh Poston, P. J. Holohan and Fred Willet compete throughout the tour which will wind up at Salt Lake about February 20.

Shoshone, Idaho, February 11.—With Randlett high man, Willet, his team mate, next, the San Francisco representation won out in the touring tournament shoot held here this afternoon. The Boise date was canceled and the teams shot here instead. The scores:

San Francisco 191; Randlett 96, Willet 95.
Portland 184; Guy Holohan 92, Morgan 92.
Spokane 182; Poston 93, Acker 89.

The next shoot will be at Twin Falls Tuesday.

At the annual meeting of the California Wing Club the following officers were elected for the ensuing year: Willard W. Terrill, president; Captain A. W. Du Bray, vice-president; Frank Turner, secretary-treasurer; Clarence J. Ashlin, M. R. Sherwood and Ed L. Schultz, executive committee.

Clarence A. Haight, who had been president for two years past, declined the nomination for a third term, urging that a change was timely and that the club's interest could be just as well served by another member. Thereupon the members present accepted his suggestion and unanimously tendered him a vote of thanks for past services.

The club's opening shoot for this season will take place as usual, the first Sunday in March, the 3d inst., at the live bird trap ground near Stege.

The Meridian Gun Club, composed of San Jose sportsmen, held a live bird shoot at Meridian Corners, February 11. Two 10 and one 12 bird match was the program.

Clem Arques and N. H. Cadwallader divided the purse in the first event, each scoring straight.

Cadwallader scored clean again in the second event and won first money. Geo. Brodrick won second money with 9 kills.

Bart Lorigan, with 11 pigeons grassed in the third race, won first money and Brodrick, with 10 kills, won second purse.

The birds were a strong lot of fast flyers. Tomorrow a blue rock shoot will take place, during which a match shoot at 50 targets for \$25 a side will take place between N. H. Cadwallader of San Jose and Fred Gordon of Meridian Corners. Cadwallader is a seasoned trap shot while Gordon is a new beginner, at that a close race is anticipated. Chas. Litchfield is the manager of the new club.

A larger attendance would have been present last Sunday had not a number of the members devoted the day to quail shooting, that being practically the last day of the season. The scores follow:

Events 1 and 2, ten pigeons, Event 3, twelve pigeons, \$5 entrance in each event, birds included, purses \$12.50, \$12.50 and \$15, two moneys in each event, high guns, 30 yards rise—

Secretary-treasurer Elmer E. Shaner announces: "I beg to advise you that the directors of the Interstate Association have appointed J. W. Bell, St. Louis, Mo.; A. C. Connor, Springfield, Ill.; Frank Fuller, Mukwonago, Wis.; Ray E. Loring, Marseilles, Ill., and John H. Noel, Nashville, Tenn., a committee to allot handicaps to entrants in the coming Grand American Handicap Tournament at Springfield, Ill."

J. F. Mallory established a new ground record at the Los Angeles Gun Club blue rock shoot February 6, by smashing 100 targets straight. Mallory's amateur scores have been consistent all season.

Since the first gun was fired on the club ground last April, over 150,000 shells have been used by the club shooters and visiting sportsmen.

E. J. Cbingren has been shooting some pretty good scores recently. The Spokane crack took in the Kendrick and Lewiston shoots in Idaho and the Walla Walla shoot and made three strings of 97, 97 and 99, 293 out of 300.

The Goideu Gate Gun Club will start the local 1912 blue rock trap shooting season with a shoot at the club's Alameda trap ground on Washington's birthday—providing the marsh shooting ground is in condition, the recent rains having flooded the tract.

Herald Frank C. Rhiel announces a change in the dates for the Pacific Indians' tournament at Eugene, Ore., instead of July 9-12, as originally arranged the shoot has been set ahead for June 25-28.

The Spokane Kennel Club has applied for the dates of October 2, 3, 4 and 5, and plans to hold its ninth annual show in connection with the Spokane Interstate Fair this fall.

"We are particularly anxious to have a good exhibit this year, and would greatly appreciate any suggestions from your paper, or from any of your readers," writes President Thos. S. Griffiths.

Dr. Jackson's Napa Soda.

THE MUSKRAT.

This little animal has, apparently, a strong place in the consideration of eastern fur gatherers and some hunters. We have heard at odd times the suggestion that its introduction into this State would be acceptable and in a habitat where it would flourish. This being so, it strikes us that more damage would be done to the levees of reclaimed lands than would be offset by any alleged benefits derived. Its sphere in the East is given in the following article:

The muskrat season, recently closed, has been the most profitable one ever known in the industry. Never before were the little animals so plentiful and old trappers say the fur never was finer—which means high prices. On the Eastern shore alone the industry is worth not less than \$250,000 annually, and some say it will run close to the \$500,000 mark this season, according to the Hoopersville, Md., correspondent of the Philadelphia Record.

In Dorchester county the trappers have been paid \$100,000 for the season's pelts, to say nothing of what they received from the sale of the meat, this in itself more than paying the rental of the marshes, the cost of the traps and the expense of looking after them. One fur buyer of Hooper's Island, in lower Dorchester, paid out \$30,000 for muskrat hides last season, while others have bought almost as heavily. The prices offered by buyers ranged from 30 to 70 cents a hide; the hide of the "kitten," or young rat, which had heretofore been considered almost worthless, bringing the former price, while the big, black rat commanded the top of the market always—the black fur being considered the finest as well as the most durable. The fur of the brown rat is less valuable because of the color and coarseness of the hair. It generally brings from 15 cents to 25 cents less than the fur of the black rat.

There are few sections in the United States where the meat of the muskrat is used as a food as it is on the eastern shore of Maryland. In many sections of the country the little rodent is looked upon with disdain by those who claim to "know a good thing when they see it," but when they frown down the muskrat and talk of it as being an unclean animal and unfit for the stomach of a man it only goes to show how little they know of this, the cleanest of all animals that lives, and proves them to be gastronomers of only ordinary judgment about the good things of life.

The great majority of people are prejudiced against the muskrat because it bears the name of "rat." By any other name it would eagerly be sought after by epicures. Its name is the greatest drawback that it has, and as a weather-beaten islander said recently in remarking upon the prejudice that exists almost everywhere against the muskrat as an edible, "It is a great pity that there are so many people who are determined that they will know the muskrat by no other name save that of 'rat,' for they are missing a good thing."

For cleanliness the muskrat has no equal among its brethren in the animal world. The roots and herbs of the marshes, on which it alone subsists, are given a thorough scrubbing by the little animal before it will allow them to come on its "table," and the house in which it lives, made of the marsh grasses, and towering above the high water mark, is always as dry as a powder magazine and spotlessly clean, so there is nothing about the much despised rat of the great marshes to make it other than what it really is, the cleanest and most toothsome little animal that can be cooked up and set before one. At all the leading restaurants on the eastern shore the muskrat in season "takes the leading role" at midnight suppers. The muskrat industry of the Maryland peninsula bids fair to overtop the oyster industry, and it is certain that there was more clear money made by the trappers in lower Dorchester last season than by the oyster men.

At the recent annual meeting of the Pacific Field Trials Club besides the election of ten new members other matters showing a renewed interest in the sport came up.

The feature of the meeting was the adoption of a resolution providing that the All-American Field Trials Club be invited to hold its trials of the year 1915 in Bakersfield. The sum of \$2,500, the largest ever offered in such an event, will be hung up in purses, in addition to handsome cups for winning owners.

Royal Hall, the son of Walnut Hall 2:08½ and Fereno 2:05½, owned by Joseph and Edward Madden, will be trained by George Hayes this year. He is now five years old, and has never yet been seen in public, although he was reported able to trot close to 2:20 when a two-year-old.

Native King, the own brother of Native Belle (2) 2:07¾, (3) 2:06½, now a three-year-old, that Walnut Hall Farm has retained for future use as a stallion, is to be trained this year for the first time. He is said to possess a remarkable turn of natural speed.

Jas. Sorenson, of Molar, Idaho, is the owner of the good game pacing stallion Moortrix 2:07½, son of Azmoor 2:20½ and Trix (dam of Mona Wilkes 2:03¾, Aerolite 2:07½, etc.), by Nutwood Wilkes 2:16½, and will make the season of 1912 with him. Moortrix achieved an excellent reputation as a race winner in California, and as his breeding is par excellence, he should have his book filled in a short time in his northern home.

Jack McDade, of Vancouver, B. C., will matinee his good mare, Josephine 2:07½, by Zolock 2:05¾, this summer. She will be bred to Mr. McDade's great pacer, Bland S. 2:03½, soon after February 1st.

SIRES THAT BREED ON.

The death of the noted stallion Higbwood, which occurred recently, recalls the stud career of his sire, Nutwood, and points out the fact that in the male line this and innumerable other families are fading away. The study of the breeding problem will convince anyone that successes are not always followed by the ability to reproduce in succeeding generations. The case of Nutwood is a particularly striking one. His paternal great grandsire, Hambletonian, was the founder of the greatest breed of horses this country has ever produced. Hambletonian's son, Alexander Abdallah, was even a greater success than the founder of the tribe as his opportunities were limited. Belmont, a son of Alexander's Abdallah, was placed in the stud at Woodburn and had access to the best mares in America. He sired several trotters of genuine merit, many of his sons and daughters acquitted themselves well, while Nutwood, produced by him from a Pilot Jr. mare, became the fashion. Nutwood was mated with the most select mares to be found in the country, his sons and daughters found their way into most of the breeding studs of America. Nutwood sired many hundred foals, whose dams represented the very acme of breeding, some of these were trained and his roll of honor, which is another name for his 2:30 list, is an exceedingly long one. Judged by the standards of a quarter of a century ago, Nutwood was a tremendous success in the stud; judged by the standard of today he was a colossal failure, but it is true that his 2:30 list is a long one. He does not appear to be the least extraordinary in view of the fact that for over fifteen years of his life he was bred to a large number of valuable mares, and, while he has 174 in the 2:30 list, the mere fact that he was represented in very few of the stakes that were decided during his lifetime, and that he never got a great race horse discredit him, says Hawley, in the Stock Farm.

Nutwood's sons and daughters have done far better than their sire in getting early and extreme speed and giving to the world race horses of the first class, yet among them there has never been one who took a leading place in the list of sires. No son or grandson of Nutwood is at this time conspicuous in the race that is being made for supremacy in siring colt trotters. If Nutwood were alive today and in his prime few breeders would patronize him, and then only for the purpose of getting fillies. There is no son or grandson of Nutwood in the male line that can be brought to Kentucky and receive anything like liberal patronage, nor is there one whose chances of siring a futurity winner would be regarded as promising. All of which leads one to closely study the strains that continue to breed on through the male line. The Woodford Mambrino strain has gone into almost total eclipse, the same is practically true of Mambrino Patchen, for after the death of Mambrino King, who was himself a pronounced success, his sons failed to carry on the name. The Wilkes and the Electioneer families continue their race for supremacy and there is little to choose between them, the only line that seems at this time to threaten them is that which has been made formidable by Peter the Great, who is the only representative of the Happy Medium family in the male line that has accomplished anything worth while. The question as to which of the sons of George Wilkes was destined to carry on his fame has been settled. Baron Wilkes easily leads all others in the achievements of his descendants in the male line, and it can be safely predicted that it will be through him that the strain will be kept alive. Not that other sons of George Wilkes will not continue to live in history through the achievement of their descendants, but it will probably be through the line of Baron Wilkes that the Wilkes tribe of horses will be best known through the victories in the futurities by the members of this family. The Electioneer tribe furnishes a remarkable situation, it has given many sons and daughters of the Palo Alto sire who acquitted themselves well, it has furnished innumerable record breakers, a host of colt trotters and more than one world's champion at maturity, yet the greatest member of the family, Bingen, is so far ahead of all others of the strain that he completely eclipses them. Bingen is an infinitely greater sire than was Electioneer, he has had fewer opportunities and has achieved greater results, the most extraordinary of which is his ability to breed on through his sons and daughters. Bingen has completely upset all the theories that have been advanced concerning him, he made his sire famous, he overcame the prejudices that existed against his blood lines, he forced recognition for his colts and fillies, and he amazed the world by the successes of his sons when placed in the stud. Bingen is now nineteen years old, yet he has lived to see a son attain a distinction as a sire never given to a trotting stallion, he has seen his grandsons command the patronage of discriminating breeders and has been represented in the rich futurities by youngsters in the second and third generations. The sons of Bingen have accomplished in the stud even greater things than are credited to him at the same age, his grandsons are eagerly sought for racing and breeding purposes, and it can be said with truth that the son of May King and Young Miss is represented in a greater number of breeding establishments than any horse now living.

The four greatest sires living are Peter the Great, Bingen, Axworthy, and Moko, the order in which they are given does not necessarily mean that it is their relative standing, all of which is a matter of opinion, but I think that the statement that these four sires are greater than any others of their time and that there is no horse living worthy of displacing any one of the four will be accepted.

\$1,600 Guaranteed.

CALIFORNIA BREEDERS ASSOCIATION

Guaranteed \$1,600.

Canfield-Clark Stake No. 4

For foals of 1911 to trot and pace as 2-year-olds in 1913.

\$1,000 for Trotting Foals.

\$600 for Pacing Foals.

TO BE GIVEN BY THE

CALIFORNIA BREEDERS ASSOCIATION, LOS ANGELES, CAL.

Entries to Close March 1, '12.

ENTRANCE AND PAYMENTS—March 1, 1912, \$2 to nominate a foal; June 1, 1912, \$5; Sept. 1, 1912, \$5; Dec. 1, 1912, \$10; March 1, 1913, \$10; starting payments \$15 for pacers, \$25 for trotters, ten days before the meeting begins at which the races are to take place.

CONDITIONS.

The race will be one-mile heats, 2 in 3. Distance, 150 yards. Entry must be accompanied by entrance fee. Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$1600, the amount of the guarantee only. Right reserved to declare off or reopen these stakes in case the number of entries received is not satisfactory. Membership not required to enter. Owners must become members to start. Money divided 50, 25, 15, 10 per cent. There will be no more moneys than there are starters. Other than exceptions made in this entry, rules of National Trotting Association to govern.

Frequent change to fresh pasture is one of the best ways to stimulate the growth of both the grass and the pigs. If a hog misses a feed, watch him; if he misses the second feed, remove him from the herd and thoroughly disinfect where he has been.

GOOD ONES FOR SALE.

PAL (2) 2:17 1/2, standard bred trotter, 5 years old. Sired by Palite 45062, dam Lorna D. by Bayswater Wilkes; second dam Bee Sterling (dam of 4 trotters with records better than 2:15 and Nat Higgins, trotting (3) 2:20) by Sterling, third dam Flash (dam of 6 in the list) by Egmont. Pal will be a good purchase for anyone looking for a young stallion of good breeding, good individuality and all qualities of a race horse.

NAT HIGGINS, 4 years old, record 2:20 trotting made as a three-year-old. Sired by Palite 45062; dam Bee Sterling, breeding same as above.

SORREL MARE, 4 years old, with a time record of 2:24 1/2 made pacing as a three-year-old. With 90 days' work showed an eighth in 16 seconds. Goes light, no hoppers. By Palite 45062; dam Babe by Dawnlight; second dam Bee Sterling, as above. A full sister to this filly stepped a mile last year in 2:14 at San Jose. This mare is handsome, kind, and gentle and will step a mile in 2:10.

TWO-YEAR-OLD sired by Palite; a good-gaited trotter; entered in the Futurity Stakes and can step fast. Dam Paprika, who stepped a mile in 2:16 as a three-year-old, by Oro Belmont 2:15 1/2; second dam a producer by St. Clair; dam by Alexander; fourth dam by Williamson's Belmont. A good prospect in the Futurity Stakes.

THREE-YEAR-OLD CHESTNUT GELDING, full brother to the above; trotted a mile in his yearling form in 2:43 and is trotting fast now. Entered in the Futurity Stakes. Another good prospect.

FOUR-YEAR-OLD FULL BROTHER to the above. This colt stepped a mile as a two-year-old in 2:31 with a short season's work.

LOULIA, a standard bred 4-year-old filly by Nushagak, sire of two 2:10 performers, dam by Nutwood Wilkes, dam of 3 in the list; second dam Woodflower (dam of Prince Ansel 2:20 at 2 years old and Seylex 2:15 1/2) by Ansel; third dam Mayflower 2:30 1/2 (dam of Manzanita 2:16 and Wildflower) by St. Clair. This mare is soon to foal to McFadyen.

TWO-YEAR-OLD BROWN FILLY by Carlokin; dam Truth (trial 2:12 at 4 years) by Searchlight; second dam Bee Sterling, etc. This filly is entered in all of the stakes and is trotting nicely now with the short workouts she has had. She is very handsome and will make a valuable mare.

Besides the above, I have some nice yearlings, all entered in the stakes. Will be pleased to show the above to prospective purchasers. Call on or address **E. D. DUDLEY, Dixon, Cal.**

Buy the Best Horse Clipping Machine in the World at your Dealer's for Only \$8.50

With this wonderful Stewart Ball Bearing Enclosed Gear Machine, you can clip horses, mules and cows easier and quicker than in any other way. This machine has all gears cut from solid steel bar. They are all enclosed, protected and run in oil. There is six feet of new style high grade flexible shaft and the celebrated Stewart single tensioned clipping knife. There are books and tables telling the feeding value of every feedstuff the cow eats, and it will pay every dairy farmer to study them. But sometimes the cow and the books don't agree as to the worth of a particular kind of feed.

A study of the kind of butter liked best in one's market is quite essential to high prices—as much so as a knowledge of the principles underlying good butter-making.

No branch of farming deserves more fostering than dairying, because of its adaptability to conserving soil-fertility upon which depend all other branches of agriculture.

The care of milk should begin before it is secreted, for unless we start right, we shall encounter obstacles that will make the profits doubtful.

The majority of herds of scrubs owned by men who are not in close touch with the educational work that is under way in the industry, are notoriously unprofitable.

Show Horse!

Race Horse!!

Sire!!!

The Standard Trotting Stallion

LIJERO 2:15 1/2 (Reg. No. 45923)

Sired by James Madison 2:17 1/2 (son of Anteeo 2:16 1/2), sire of 18 in 2:30 list, including Brilliant 2:08 1/2, Tuna 2:08 1/2, Emily W. 2:10, dam Hill 2:10, (dam of William Albert 2:16 1/2, a sire, Saint Ambrose 2:25, and Lijero 2:15 1/2, a sire), by Nutwood 2:18 1/2, the world's champion broodmare sire, second dam Eudora by Volunteer, the greatest sire of race horses that ever lived; third dam by American Star 14, the sire whose daughters have produced 43 trotters and among them some of our greatest sires.

Lijero is a brown stallion foaled in 1902, stands 16.1, and weighs 1200 pounds. He sired Expedo (3) 2:14 1/2. Public trial at Chico as a four-year-old in 2:08 1/2. Lijero forced Prince Lot 2:09 1/2 to trot in 2:10 1/2 at Woodland in 1910 and was only beaten a head. He started in five races, won three and was second in the other two, and it gave Helen Stiles 2:08 1/2 and Prince Lot 2:09 1/2 all they could do to beat him in those two races. Very few horses have ever trotted in 2:10 with less work than Lijero. He should race in 2:08 this year. He has everything to recommend him as a game racehorse and as a sire he will undoubtedly be one of the best. He has size, style, color, conformation, disposition, the best of feet and legs, an iron constitution, and the purest of trotting action. His gameness is unquestioned. He is a perfect show horse and sires show horses. He and his daughter Expedo have won first prizes in the standard class at the California State Fair.

IDORA W., registered in Vol. XIX. Brown mare, 15.2 hands; foaled 1901. Sired by James Madison 2:17 1/2, dam Swift Tide by Albert W. 2:20; second dam Uarda (dam of Flowing Tide 2:14 1/2), by Echo; third dam Dewdrop. A sure breeder, due to foal to Lijero 1912. Entered in State Futurity and Breeders' Futurity Stakes.

TOOTS W., registered, Vol. XIX. Bay mare, 15.2 hands; foaled 1907 by Stam B. 2:11 1/2, dam Idora W. Due to foal to Lijero 1912. This mare is very fast, having worked quarters in 35 seconds as a two-year-old. Entered in State Fair Futurity and Breeders' Futurity Stakes.

JAMES H. DONNELLEY, b. g. 15.3 hands; foaled 1909. Sired by Lijero 2:15 1/2, dam by Hanford Medium; second dam Algernine (dam of Kelly Briggs 2:08), by Algona, etc. Entered in Breeders' Futurity and State Fair Futurity. With little work this one showed a mile in 1911 in 2:28, half in 1:10 and a quarter in 33 1/2 seconds. He will make a 2:12 or better pacer this year.

IVA W., b. f., foaled 1910; sired by Prince Ansel 2:20 1/2; dam Idora W. (which see). Entered in Breeders' Futurity, State Fair Futurity and Occident Stake. She is just broken to drive and will undoubtedly make a very fast mare. She is eligible for registration.

DR. JOHN, b. c. (1), by Palite (son of Nutwood Wilkes 2:16 1/2 and Palita, 2:16); dam Toots W. (which see). Entered in State Fair Futurity, Breeders' Futurity and Occident Stake. A fine large perfectly formed individual, nicely halter broken.

These horses are all sound and in good condition, ready for anything that horses can be used for. The mare Toots W., if worked, will make a 2:12 trotter, or even a lower record than this.

On account of the many demands upon my time in my business, I find I cannot devote any to the development or care of these, therefore I have decided to sell them.

Any further information regarding prices, etc., will be given by addressing **F. E. WRIGHT**, 318 K. St., Sacramento, Cal.

Warranted to give satisfaction.

H. K. Renk.

SPECIAL ADVERTISING.

Wanted, For Sale, and Miscellaneous advertising under this head will be set in nonpareil type (same type below) and will be published at the rate of 2 cents per word each insertion, or 6 cents per word by the month. Count each abbreviation and initial as a word.

CLOSING OUT.—Sixty head of young mares and mules. One four-year-old, two-thousand-pound Percheron stallion. Might consider some trades. N. FARNSWORTH, R. D. 3, Bakersfield, Cal.

FOR SALE.—Percheron Stallion (grade, 4 years old, bay, absolutely sound, good disposition, and sure foal getter; weighs 1800 pounds. I have seven of his weanlings to show how he breeds. Price \$1000. For further particulars address J. E. MONTGOMERY, Davis, Cal.

FOR SALE, CHEAP.—One registered stallion, sired by McKinney 2:11 1/2; 8 years old; sound. Also one imported draft registered stallion; weight 1800 pounds; 7 years old. Would consider trade on heavy mare or standard-bred mares, or fillies. Breeding and pictures sent to interested parties. Address D. A. BAKER, Hill P. O., San Diego, Cal.

FOR SALE.—Handsome seal brown stallion, 6 years old, weighs 1200 pounds. Has paced a quarter in 30 seconds. He is an inbred Electioneer and is a sure foal getter. Purchaser can see his colts. Also black Percheron stallion, 9 years old, weighs 1700 pounds. Handsome and sure foal getter. The above horses will be sold cheap. For price and particulars, apply to Conlora Bros, Ranch, San Pablo Ave., near County Line, Postoffice address, R. F. D. 1, Berkeley, Cal.

STANDARD MCKINNEY STALLION FOR SALE.—Scott McKinney 33749, by McKinney, dam Primrose (great brood mare) by Sidney; second dam Brown Rose by Privateer; third dam Lady Baldwin by The Moor; fourth dam daughter of Ben Lippincott, son of Williamson's Belmont. Scott McKinney is a handsome bay horse; weighs about 1100; good gaited, and all his get are fine individuals and show speed. Price \$500. Has State license for this year. Address DR. M. F. SCHALETENBRANDT, 4051 20th St., San Francisco.

INFORMATION WANTED as to the present address of Monroe Berley, also known among horsemen as Fred Berley. Is about 65 years old and over six feet tall. He was employed at one time at Palo Alto and later worked for F. J. Williams. He went to Montana and came back to Sacramento some time ago. A liberal reward will be paid for finding him or for information that will lead to his discovery, as there is property waiting for his return. Address **H. D. B., care Breeder and Sportsman, San Francisco, Cal.**

FOR SALE.—ZOBBLACK 2:18, pacing as a two-year-old; trotting 2:24 1/2 as a three-year-old; trial 2:19. He is a coal black stallion, five years old, stands 15.3 hands, weighs 1200, and one of the best made stallions in California. He should get a record of 2:12 or better this year. Is kind and gentle and is a half brother to the great trotter Zomblock 2:28 1/2 that worked last fall in 2:08 1/2 for his owner, R. J. MacKenzie, and will be on the circuit this season. Zoblack is a standard and registered horse, his papers having just been sent for. He was sired by Zolock 2:05 1/4 (one of the best speed producing sons of McKinney 2:14) and his dam is Madeline Marshall by Demonio 2:11, second dam great broodmare Mamie Comet 2:23 1/4 by Nutwood 2:18 1/2. He will be sold at a reasonable figure as the farm I have leased has been sold and I am compelled to get a new place. This is my only reason for selling Zoblack and the following:

TWENTY-THREE SKIDOO, standard and registered black mare, foaled 1908, sired by Nutwood Wilkes 2:18 1/2, dam Twenty-Third (dam of Sterling McKinney 2:06 1/4) by Director 2:17, second dam Nettle Nutwood (dam of Hillsdale 2:15) by Nutwood 2:18 1/2, third dam by Vick's Ethan Allen Jr., fourth dam by Williamson's Belmont. This mare is a fine sized, well made trotter, gentle, but has never been worked for speed. She is bred to be as fast as any.

STAR POINTER, filly (4), out of Trix (dam of Aerolite 2:07 1/2, Mona Wilkes 2:03 1/4 and four others) by Nutwood Wilkes 2:16 1/2, etc. This is a nice big mare, stands 15.3 hands and is a free-legged pacer, was handled a little as a two and three-year-old. She was bothered with splints, so I did not work her. They have disappeared, and, as she never gave a lame step, they must never have been near a cord or tendon. From her breeding she should make one of the greatest of broodmares.

Dan Logan filly (3) out of the standard and registered mare Sophia (dam of Sophia Direct, p. 223 1/4, and Corona 2:27) by Robt. McGregor 2:17 1/2; second dam Orarwood by Wildwood 144, third dam Lady Utterback by Mambrino Patchen Jr., Dan Logan, her sire, had a trial of 2:12 and is a full brother to the champion Jim Logan 2:05 1/4. This filly is a pure-gaited trotter, just been broken and will undoubtedly be a fast mare. Her breeding can hardly be excelled. For prices and further particulars address J. W. MARSHALL, Dixon, Cal.

HOMEPHONE PRAISED.

A new subscriber writes the Home Telephone Company under date of October 28, 1911:

"Please install a phone at my home. I did not know anything about the good points of the Homephone and was rather prejudiced against it until I began using it in my office. I use it all the time now, not only in phoning around the building, but getting outside numbers, because it saves me time and trouble. The Homephone delivers the goods."

"You know the burners of candles rioted in London about 500 years ago when gas was introduced. Most of us object to changes. Possibly that is the reason why I am so late in ordering a Homephone."

| Babe McKinney, trl. (2) | 2:21 |

NEAREST McKINNEY 2:13 $\frac{1}{4}$, sired by McKINNEY 2:11 $\frac{1}{4}$; dam, Maud Jay C. by Nearest 2:22 $\frac{1}{2}$ and own brother to John A. McKerron 2:04 $\frac{1}{2}$ and half-brother to Louise Carter, dam of Wilbur Lou (1) 2:19 $\frac{1}{2}$ and sire of Highly 2:04 $\frac{1}{2}$, Alone 2:09 $\frac{1}{4}$, Joe Gans 2:19 $\frac{1}{4}$, Trueheart 2:19 $\frac{1}{4}$, Just It 2:19 $\frac{1}{4}$, and others, by Nutwood Wilkes 2:16 $\frac{1}{2}$, sire of Copa de Oro 1:59, John A. McKerron 2:04 $\frac{1}{2}$, etc., and dams of San Francisco 2:07 $\frac{1}{4}$, Mona Wilkes 2:03 $\frac{1}{4}$, etc.; 2d dam, Fanny Menlo (dam of Claudius 2:13 $\frac{1}{4}$) by Menlo 2:21, by Nutwood 2:18 $\frac{1}{4}$, greatest brood mare sire; 3rd dam, Nellie Anteco by Anteco 2:16 $\frac{1}{4}$; 4th dam, Fanny Patchen, by Geo. M. Patchen Jr. 2:27. Nearest McKinney is one of the handsomest McKinnneys standing for public service. Color beautiful brown, 16 hands high and weighs 1250 pounds. When a three-year-old he was a natural trotter, had two-minute speed, trotted a mile on a half-mile track in 2:15, last half in 1:04, but owing to an accident was put to pacing in 1910 and in 44 days he got a record of 2:14 $\frac{1}{4}$ and in 1911 got a record of 2:13 $\frac{1}{4}$, fastest trotting record made by a stallion in California during the breeding season. Will make the season of 1912 at the

SAN JOSE RACE TRACK.

Fee, \$50 the season, with usual return privilege. Free green pasture up to July 1st to all who pay stallion fee July 1, 1912. Best of care and attention given mares, but no responsibility assumed for accidents. No barb wire fencing; plenty of water and feed.

Address T. W. RARSTOW, 1042 Alameda Ave., San Jose, Cal. Phone S. J. 3000.

BREED TO THE BEST BRED TROTTING STALLIONS!

Palo King 2:28 $\frac{1}{2}$ --- Reg. No. 44910.

Sire of Little Lucille (3) 2:09, the greatest pacer of her age on this Coast.

Sired by Marengo King 2:20 $\frac{1}{4}$ (son of McKinney 2:11 $\frac{1}{4}$ and By By by Nutwood 2:18 $\frac{1}{4}$); dam Palo Belle 2:24 $\frac{1}{2}$ by Palo Alto 2:08 $\frac{1}{4}$; second dam Belle Isle (great brood mare) by Piedmont 2:17 $\frac{1}{4}$; third dam Ida Belle (great brood mare) by Hambletonian 10; fourth dam Godfrey Star by American Star 14. Palo King is a beautiful bay, stands 16 hands, is a pure-gaited trotter, and all his progeny are intelligent, have style, finish and extreme speed. TERMS \$25 for the season.

Iran Alto 2:12 $\frac{1}{4}$ --- Reg. No. 24586.

Sired by Palo Alto 2:08 $\frac{1}{4}$; dam Elaine 2:20 (dam of 4 trotters, 1 sire of 15, 2 dams of 9) by Messenger Ducoc; second dam Green Mountain Maid (dam of Electioneer and 9 others in 2:30) by Harry Clay 45, etc. Iran Alto was one of our greatest trotters. He has 15 in 2:30, 3 dams of 3 in 2:30. TERMS \$15 for the season.

Alto Express

Sired by Iran Alto 2:12 $\frac{1}{4}$; dam Beautiful Bird by Nutwood Wilkes 2:16 $\frac{1}{2}$; second dam Expressive (3) 2:12 $\frac{1}{4}$ (dam of Atlantic Express (3) 2:08 $\frac{1}{4}$, Esther Belle 2:08 $\frac{1}{4}$, and the dam of Eva Bellini, timed as a two-year-old in 2:11 $\frac{1}{4}$, as a three-year-old beat 2:10 in her races) the greatest racing daughter of Electioneer. Alto Express is a perfectly made trotter and will undoubtedly be a sire. TERMS \$20 for the season.

For further particulars, address H. S. HOGBOOM, Woodland, California.

THE ROYALLY BRED YOUNG STALLION

Best Policy 42378

By Allerton 2:09 $\frac{1}{4}$, Jay Bird's greatest son; dam Exine 2:18 $\frac{1}{4}$ (dam of Riverside (3) 2:30 and Rinola (3) 2:30) by Expedition 2:15 $\frac{1}{4}$; second dam Eusine (dam of 6) by Axtell 2:12; third dam Russia 2:28 (great broodmare) by Harold 413; fourth dam Miss Russell (dam of Maud S, 2:08 $\frac{1}{4}$ and 6 others), etc., etc. Best Policy is a handsome bay, has size, style and quality in every respect. Is a pure-gaited trotter. No better bred one in California. His progeny will be seen in races this year.

Season of 1912 at my feed stable, corner of Bridge and Center Streets, VISALIA, CAL.

R. O. NEWMAN, Owner.

McADRIAN 2:24

Reg. No. 45391. Sire of { Bert Kelly (trial) 2:11 $\frac{1}{2}$
Trix McAdrian . . . 2:23 $\frac{3}{4}$
Grace Chalmers (tr) 2:24

Sired by GUY McKINNEY (sire of Vernon McKinney 2:02, Linden Girl 2:22, etc.); dam MAPLE LEAF 2:34 $\frac{1}{4}$ by Adrian 2:26 $\frac{1}{4}$ (sire of Roseta A. 2:14 $\frac{1}{4}$), son of Reliance 2:22 $\frac{1}{2}$ and Adriana by Skenandoah; McAdrian's grandam was OLLIE RAY 2:39 $\frac{1}{4}$, dam of Acclamation 2:24 $\frac{1}{4}$ (sire of Lizzie C. 2:15), Vendome, dam of McKinney 2:29; his great grandam was MARY BLAINE by Signal 3:27 (sire of the dam of Prussian Maid 2:19, etc.). Guy McKinney, sire of McAdrian 2:24, was by McKinney 2:11 $\frac{1}{4}$, out of Flossie D., by Guy Wilkes 2:15 $\frac{1}{4}$; second dam, Blanche Ward (dam of China Maid 2:05 $\frac{1}{4}$), by Onward 2:25 $\frac{1}{4}$; third dam, Blanche Patchen, by Mambrino Patchen 53, etc.

McAdrian is one of the handsomest and strongest made grandsons of McKinney in California. He has no faults; is a pure gaited trotter and a sure foal getter. He will make the season of 1912 at the Pleasanton race track. Terms, \$30 for the season. For further particulars, apply to or address

E. D. DIGGES, Owner, Pleasanton, Cal.

THE BONDSMAN is the only stallion that sired three new 2:10 performers with race records in 1910. In spite of the fact that he has no record, The Bondsman was a colt trotter of great merit. He was a contending colt all through the Kentucky Futurity of 1899, getting third money. This was a six-heat race and was won by Boralma. As a four-year-old he was not raced, but trotted a public trial in 2:11. As a sire he is destined to be the leading son of the great Baron Wilkes, founder of the greatest futurity winning family. He will make the season of 1912 at

Pleasanton Training Park. **\$100**
THE PATCHEN BOY 39033
Three-Year-Old Record 2:10³/₄ in a Winning Race.

Sired by the Great **WILKES BOY 3803**, sire of 107 in standard time.
A Genuine Race Horse and a Sire of Early and Extreme Speed.

The Patchen Boy 39033 is sire of the following:

| | | |
|--|--|---|
| Francis J. 2:08 | Legal Patchen ... 2:15 ¹ / ₄ | Dorothy C. 2:19 ¹ / ₄ |
| Evelyn Patchen... 2:10 ³ / ₄ | Lucile Patchen ... 2:16 | Louise Patchen ... 2:19 ¹ / ₄ |
| Scott Patchen ... 2:12 ¹ / ₄ | Jerry Patchen ... 2:16 ¹ / ₄ | Dr. Warren ... 2:19 ¹ / ₄ |
| Dessie Patchen ... 2:13 | Knightstown Belle 2:16 ¹ / ₄ | Roscoe Blinning .. 2:20 |
| Frank Patchen ... 2:13 ¹ / ₄ | Alec Williams ... 2:18 ¹ / ₄ | Mary Patchen ... 2:20 ¹ / ₄ |
| Ruby Patchen ... 2:13 ¹ / ₄ | Lois Patchen ... 2:19 ¹ / ₄ | Black Patchen ... 2:20 ¹ / ₄ |
| J. C. Patchen ... 2:14 ¹ / ₄ | Auduouss the Miller 2:19 ¹ / ₄ | and 11 others in 2:30. |

Dam **Lady Clay**, the dam of The Patchen Boy (3) 2:10³/₄, C. W. M. 2:24¹/₄ (trotted to high wheels), Anglin Wilkes 2:16¹/₄ over half-mile track, trial 2:09¹/₄, by Metropolitan 1372, son of Hambletonian 10; second dam, Haggie Brown, by Ashland Clay; third dam, Pitty Pat, thoroughbred. The Patchen Boy was the greatest three-year-old race colt in the world, winning six straight races in the Grand Circuit the only year he was raced. His produce are good-headed and real race horses. (No tin cups.)

THE PATCHEN BOY is a beautiful black, 16.1 hands and weighs 1290 pounds. His colts are of fine size, great individuals and the kind that sell for the high dollar.

Season of 1912 at Pleasanton Training Park. Fee: **\$50** Return privilege 1913.
Both of the Above Horses Will Remain in California.
Best of care and attention given mares, but no responsibility assumed for accidents. Good pasturage at reasonable rates. For further particulars and full tabulated pedigree, address
CHAS. L. DE RYDER, Pleasanton, Cal.
A Choice Collection of Kentucky Saddle Horses for Sale.

THE STANDARD TROTTING STALLION

FEE, \$30 TO INSURE. Usual return privilege. Good pasturage \$2.50 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. Address
CHARLES JOHNSON, Woodland, Cal. Phone 40.

TOM SMITH 2:13¹/₄ Sire of Futurity Stake Winners.
Reg. No. 47700

TOM SMITH is one of the handsomest sons of McKinney on the Pacific Coast. He has size, style, speed, is a sure foal getter, and has every qualification to make him one of the greatest of the McKinney tribe. He is the sire of Katalina (2) 2:22¹/₄, (3) 2:15¹/₄, (4) 2:11¹/₄, Ella Mac (3) 2:14¹/₄, Vallejo Boy 2:15, Eddie G. 2:30. Every one of his colts that has been trained has shown standard speed.
Sire, McKinney 2:11¹/₄; dam, the great brood mare, Daisy S. (dam of 6 with records of 2:09¹/₄ to 2:28¹/₄) by McDonald Chief 3533; second dam, Fanny Rose (dam of 2 in 2:20) by Ethan Allen Jr. 2903.

Will make the Season of 1912 at the
DRIVING PARK, SAN JOSE, CAL.
Fee, \$50. Usual return privilege.
The best of care taken of mares in any manner that owners may desire at reasonable rates, but no responsibility assumed for accidents or escapes. Excellent pasturage. Mares shipped will be met at the train.
For further particulars, address **P. F. DAVEY, Driving Park, San Jose, Cal.**

PARKER GUNS

Wear Well, Shoot Well, and Handle Well.

Wear well because they are made of the best material by the most skillful craftsmen.

Shoot well because they hold the charge compactly together at extreme ranges.

Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline.

Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

For further information regarding guns in gauges ranging from 8 to 28, address

PARKER BROS., Meriden, Conn.

N. Y. Salesrooms, 32 Warren Street.

MANUFACTURERS AND OUTFITTERS FOR THE SPORTSMAN CAMPER AND ATHLETE.

The Elery Arms Company

583-585 Market St., SAN FRANCISCO, CAL.

EQUIPMENT AND APPARATUS FOR EVERY NEED. PHOTOGRAPHIC SUPPLIES.

FOR SALE—Electeur Jr.

A fine young Percheron Stallion, six years old next April. Weighs 2400 pounds. He was sired by Electeur, imported from France in 1904, sired by Valtaque 25159; dam, Sultane 43394; second dam, Biche 17881; third dam, Pelotte 1850. Electeur Jr. is solid black in color, well formed in every respect and is a sure foal getter. His dam is by Uptumus, he by Duke of de Charters, the most celebrated horse in the United States. No finer Percheron Stallion is in the State. Can be seen at the McCarty Ranch, 4½ miles northeast of Suisun. Price very reasonable. **ED. McCARTY, Owner, Suisun, Cal.**

The Standard Trotting Stallion

Bon McKinney 51480

3-y.-o. Rec. 2:24½. 3-y.-o. Trial—half, 1:05; mile, 2:15.

By **BON VOYAGE 2:08**

(fastest mile ever trotted in a race by a stallion in California); dam, Daphne McKinney (also dam of Frank N. 2:07¼, the only other one of her get ever trained) by McKinney 2:11¼; second dam, La Moscova (dam of Bon Guy, 3-y.-o., 2:11¼, Yolande 2:14¼ and Tina 2:20¼) by Guy Wilkes 2:15¼; third dam, Moscova 2:28½ (dam of Mamie R., 3-y.-o., 2:15½, and Oro Belmont 2:15½) by Belmont 64; fourth dam, Mosa (dam of 5 in the list) by Woodford Mambrino. **BON McKINNEY 51480 (3) 2:24½** is a beautiful bay horse and is in every respect a magnificent individual, possessing size, style, quality, intelligence and frictionless trotting action. With little work as a yearling he trotted a quarter in 35 seconds and a half in 1:15. The next spring as a two-year-old, with 2½ months' work, he worked a mile in 2:19½, a half in 1:08 and a quarter in 32 seconds. Having no stake engagements, he was taken out of training after making this wonderful showing for a two-year-old. There is no doubt he could have trotted a mile in 2:12 that year had he been worked until fall. As a three-year-old he was given a record of 2:24½, which is no mark of his speed. Mr. Ted Hayes trained him and says that he considers him the best colt he ever trained and firmly believes that he will not only make a great race horse, but a great sire. As a two-year-old he was bred to ten mares and got nine foals, and every one who has one of his get is confident that he has the best foal on the Coast. Bon McKinney combines the best of the Electioneer-McKinney cross. His dams are all in the great brood mare list, every one being a producer of speed. He is a young horse and has already commenced to make his mark in the world, and now is the time to breed to him and take advantage to get something exceptionally good at a reasonable price. Study his pedigree, come and see him, and you will be sure to send your mare.

Season of 1912 at the **RACE TRACK, SAN JOSE, CAL.**

TERMS: \$40 for the Season. Usual return privilege.

Good pasturage and the best of care taken of mares in any manner that owners may desire at reasonable rates, but no responsibility assumed for accidents or escapes. Address **JOS. TWOHIG, Manager, Race Track, San Jose, Cal.**

PALITE 45062

A Sire of Early Speed.

License Certificate 181—"Pure Bred."

Sire, Nutwood Wilkes 2:16½, sire of Copa de Oro 1:59, John A. McKerron 2:04½, etc., and dams of San Francisco 2:07¼, Mona Wilkes 2:03¼, etc.

Dam, Palita (2) 2:16, dam of 2 in list; second dam Elsie, dam of 5; third dam Elaine 2:20, dam of 4, fourth dam Green Mountain Maid, dam of 9.

PALITE is the sire of the 2-year-old stake-winner Pal 2:17¼ and the 3-year-old filly Complete second to the Occident Stake winner El Volante in 2:13¼, and timed separately in 2:14½, and sire of Nat Higgins (3) 2:20 trotting, Cornelia Scott (3) 2:24¼ pacing. Palite is one of the best-bred stallions of the Wilkes-Electioneer cross living. His colts are all trotters, good-gaited and determined. He will make the season of 1912 at the ranch of the undersigned at

OIXON, CAL. Terms: \$40 for the Season with return privilege, or money refunded at my option if mare proves not in foal.

Good pasturage at \$2.50 per month and best of care taken of mares, but no responsibility assumed for accidents or escapes.

For further particulars address **E. D. DUDLEY (Owner), Dixon, Cal.**

**AUTOLOADING
SHOTGUN**

Five shots all under absolute control—three to get the cripples. The action is simple, powerful and sure. The trigger pull is smooth and easy. The hammer is light and quick. Part of the recoil ordinarily absorbed by the shooter's shoulder is utilized to operate the mechanism. Not one single ounce of muzzle energy is lost. Handles the heaviest loads with ease and safety. Solid breech, hammerless, safe.

Remington-UMC ---the perfect shooting combination.

REMINGTON-ARMS UNION METALLIC CARTRIDGE COMPANY, 299 BROADWAY, NEW YORK CITY.

WINCHESTER
Shotguns and Shotgun Shells.

This combination is unbeatable, as has been practically demonstrated at the traps during the last several years in the hands of such shooters as C. G. Spencer, E. F. Forsgard, and many others. Their popularity and wide use for bird shooting shows that they are equally successful as game baggers. No shotgun made shoots any better, or wears any better, or is easier to take care of, than the Winchester; and no shells on the market give better results in any gun than Winchester shells—"Leader" and "Repeater." This is not mere talk, but a plain statement of demonstrated fact. If you wish your shooting days to be crowned with pleasure and success, shoot the satisfactory combination Winchester guns and shells

WINCHESTER

FACTORY
LOADED
SHOTGUN SHELLS

"Leader" and "Repeater" loaded with Smokeless Powders. "Nublack" and "New Rival" loaded with Black Powders.

NOW SOLD ON THE PACIFIC COAST

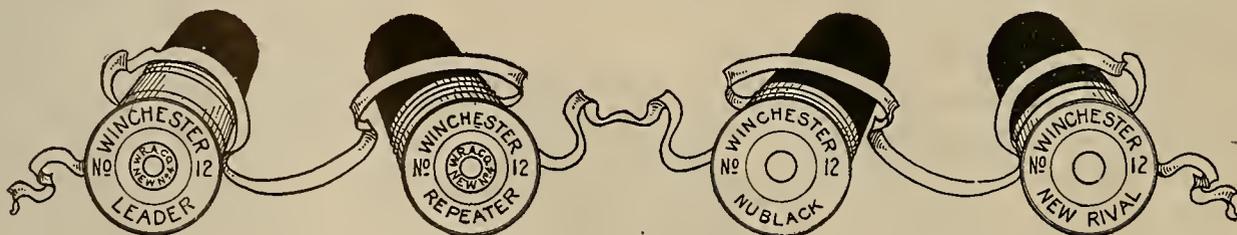

To meet the insistent demand for Winchester Factory Loaded Shotgun Shells, we have arranged to market on the Pacific Coast, through the regular trade channels, our famous Red **W** Brand of shotgun ammunition. Therefore, western sportsmen should henceforth have no difficulty in buying Winchester Factory Loaded Shotgun Shells, loaded with either smokeless or black powders, and in all desirable combinations of powder and shot. All Winchester Factory Loaded Shotgun Shells with the Red **W** on the label are made and loaded at our works in New Haven, Conn.

WINCHESTER REPEATING ARMS CO.

WINCHESTER SHELLS CAREFULLY MADE AND LOADED

It makes no difference what make of shotgun you shoot nor whether your favorite sport is field or trap shooting, Winchester Factory Loaded Shotgun Shells will give you the greatest measure of shooting satisfaction. No shells will make a good shot out of a poor one, but shells that are loaded so that they are uniform in velocity, spread the shot evenly, and give it good penetration, help wonderfully to make good bags in the field and high scores at the traps. Winchester Factory Loaded Shotgun Shells embody all these important elements to the fullest degree. They are designed correctly, made carefully, and loaded with exactness. The Winchester Patent Corrugated Head is an ingenious and distinctive feature of Winchester Shells. It is a superior method of construction to the old English system of metal lining, once used in Winchester shells, but discarded years ago. Other reasons for the superiority of Winchester Shells are their quick and sure primers and the high class of materials used in their construction and loading. When buying, don't simply ask for "some shells." Be specific and insist upon having Winchester—the Red **W** Brand, and the results will repay you for your pains.

The National Trotting Association and the American Trotting Association have held their meetings and adjourned. There was one question which has been discussed with more earnestness by horsemen during the past two years than any other and it was decided at both these conventions. It was "shall the rule which is gradually weeding out the hobbles be rescinded?" The "Trotter and Pacer," in its last issue, referring to this, has the following:

The American Trotting Association has submitted the matter to a referendum of its members, the majority of whom are representatives of the half-mile tracks who have been unduly alarmed over the fear of an impending calamity to their entry lists in case the hobbles are barred. "Tis true 'tis pity, and pity 'tis 'tis true." With the repeal of the present wise rule providing a tolerant and pacific method for removing a disfiguring blemish from a great national sport, the breeders and promoters of harness racing in America will justly deserve the contempt and scorn of every man in the world who has any consideration for the interests of the breed of trotting horses or sense of propriety in the conduct of the sport they represent. It ought to be an ignominious and humiliating reflection to every American breeder who is proud of the status of harness racing in European countries which has been largely created by the prowess of American horses that have gone to those shores, to realize that in our own country, the cradle of the breed and the stronghold of the sport, we are recreant to correct ideas of good taste in the conduct of the sport and hindering the progress of improvement in our horses by a miserable policy of expediency which subordinates every other interest to a paltry consideration of a few entry fees. Shame upon us and woe betide us, as a nation of breeders. We rank with Great Britain and Australia, where the loosest conceptions of propriety in breeding and racing the harness horse prevail, and not with France and Germany and Russia, where ideals are high and nothing is permitted to militate against the public welfare of the nation in a breeding sense. The recrudescence which now seems imminent in the re-

peal of the rules which are gradually exterminating the hobbles means that in a few years the world will turn to Europe for its best selections of trotting bred horses, and our American products will have no honor save in their own country.

This was published prior to the holding of the biennial meeting of this organization wherein it was decided that no horse four years or under can wear hobbles this season, in 1913 no five-year-old or under, in 1914 no six-year-old or under. This is a drastic rule and is a step in the right direction.

The National Trotting Association which controls a much larger number of subordinate organizations in the United States passed a resolution recommending that no hobbles be used upon two, three or four-year-olds, all older classes being allowed to wear them. This ruling will have the effect of increasing its list of membership. For there are hundreds of trainers who never have trained,—nor could have trained,—pacers unless they put the "pajamas" on their horses, and they will want to start them over all tracks which are governed or under the control of the organization giving that privilege. Were it not for threats made by a number of the devotees of the hobbles that they would break away from the National Trotting Association this law would never have been adopted. Now that it is, we shall see whether it is for the good of the industry or not. It was hoped that the law as adopted by the American Trotting Association would be copied by the other parent organization, and we believe that after 1912 it will be. There should be no difference of opinion on a subject so vital as this between these associations. We are pleased to note that in both of them the orders are that no hobbles shall be used on horses four years old or under. In time, breeders and trainers will realize that for the uplift of the industry hobbles should be abolished on horses of all ages.

THE arrival of the collection of choice trotting stock in National City, San Diego county, last week, is a matter of great importance to the people in the extreme southern portion of this State. Never before have there been so many really first-class well-bred trotters in San Diego. They are all from Woodland, most of them being bred by Alexander Brown, one of our leading trotting horse breeders, and M. C. Keefer, another breeder, although not so heavily engaged in this industry. Both these gentlemen have for years patronized our leading sales and purchased standard and registered horses, and, with Chas. A. Spencer, one of the late Chas. Marvin's pupils, at Palo Alto, as trainer and driver, have achieved marked success at the race meetings. Last year their string of horses won over \$15,500. Mr. Keefer recently joined with Mr. Spencer in the purchase of some land adjoining the Sweetwater race track and leased the latter for a term of years with a view to building up the industry in that place. Last week Mr. Spencer took Bernice R. 2:11 1/4, hy Dexter Prince-Dione 2:07 1/4; Nada 2:09 1/4, by Nushagak-Addie N.; Adansel (3) 2:14 1/2 by Prince Ansel-Advosta 2:20 1/2; Bonnie Ansel, by the same sire out of Bonnie Derby; Zorankin 2:29 3/4, by Zombro 2:11-Dimontes; Laura Smith, by Tom Smith 2:13 1/4-Lauress; Babe H. 2:16 1/2, and four broodmares to breed to Adansel 2:14 1/2, besides five yearlings by Adansel, Prince Ansel and El Zombro. These belong to Messrs. Keefer and Spencer. Mr. Brown sent ten head, including that good game trotter Prince Lot 2:09 1/2, Laura Rogers, Nuristo (brother to Aristo 2:08 1/4) Aristan, and five yearlings by Prince Ansel and Nuristo to be trained.

There are hundreds of people coming to San Diego every day and as most of these are interested in light harness horses, undoubtedly they will be delighted to see this consignment. Soon a splendid driving club will be formed and its members will be buying good horses to compete in the events to be decided over that splendid Sweetwater track. A race meeting is to be held there this fall to follow the one at Los Angeles; hence, with such prospects for good racing in view, the coming of Messrs. Keefer and Spencer to that portion of California means a great deal more than one can realize. When Corbitt brought his horses to San Mateo, Stanford followed his example at Palo Alto and both these breeders followed the pioneer L. J. Rose, of Los Angeles, and the trotting horse industry of America owes much to them and the many horses they bred. The same will be said of these men who have taken from Woodland so many fine horses and placed them in a comparatively new place, so far as trotting horse breeding is concerned. What is Woodland's loss will

be San Diego's gain, for these men have numerous friends in the north and will add to their long list in their adopted home in the south, for they have always tried to have the best horses money could buy and their reputations as upright citizens are above reproach.

ONE WEEK from Monday (March 2) the most important annual meeting of the California Live Stock Breeders' Association ever held will commence at two p. m. at the Palace Hotel. It is the intention of those who assemble to discuss the advisability of its re-organization along the lines of the National Live Stock Association, the object in view being to make it a parent association, inviting all kindred associations existing in the State to join it, such affiliated bodies enjoying representation by delegates. By this method it is intended to extend its sphere of usefulness, and by uniting all such kindred associations, to make it possible in 1915 for California to make a showing worthy of her many unequalled opportunities. President Peter J. Shields in a circular to the members of this association says:

"Your attention is called to the fact that every stockman upon the Pacific Coast is vitally interested in the Exposition to be held at San Francisco in celebration of the opening of the Panama Canal. One of the features will undoubtedly be an international stock show, and it is necessary for the several States west of the Rockies to be prepared. Certainly California, favored as it is by nature, should be one of the foremost to take action, and for this reason this association has taken the matter in hand.

"Your presence at this meeting is especially urged, that with the help of yourself and other stockmen it may be possible to so organize the whole State that a great live stock show in 1915 will be practically assured. To do this the horsemen, the beef cattle men, the dairy cattle men, the sheep men, and the breeders and raisers of swine must unite, and it is considered the duty of this Association to combine all the live stock men in the State into one body by the method proposed."

At this convention addresses will be delivered by President Shields, J. A. Tomlinson of Denver, Dr. Chas. R. Keane, State Veterinarian; W. A. Skinner of Denver, and S. A. W. Carver of Los Angeles.

In the evening the regular banquet will be held and the following representative men will speak and the principal topic will be in relation to the importance of holding the "Greatest Live Stock Exhibit the World Has Ever Seen in San Francisco, 1915." Hon. James Rolph Jr., Hon. C. C. Moore, Hon. J. A. Jastro, J. A. Skinner of Denver, Wm. H. Saylor, Chester H. Rowell, and J. A. Tomlinson, secretary of the National Live Stock Association.

The railroad companies have made a special one and one-third rate on return tickets from all points in California to this convention. Purchasers of tickets must not forget to ask ticket agent for certificate when purchasing. Tickets on sale now and are good for from two to five days. A large attendance is requested, for much will be learned that will be of inestimable benefit to all who attend, and the larger the gathering of representative men the stronger will be the influence wielded to gain what those self-sacrificing men are seeking for the benefit of the live stock interests of California.

ENTRIES to the Canfield-Clark Stake No. 4 for foals of 1911 (guaranteed \$1600), will close next Friday, March 1st. This is the last notification. Owners of foals should not overlook this valuable stake. The terms and conditions will be found in our business columns, and owners cannot afford to miss sending entries in to the secretary, E. J. Delorey, Los Angeles.

LAST payment of \$10 is due next Friday, March 1st, on three-year-old trotters and pacers in the Pacific Breeders' Futurity Stakes No. 9. Value \$7,250. Don't overlook this!

PLEASANTON TRACK IS SOLD.

All doubts are set aside regarding the sale of the race track at Pleasanton. Mr. S. S. Bailey, formerly of Salem, Oregon, purchased it on Wednesday—reputed price \$65,000. He intends to spend over \$20,000 on it in building a new club house, putting a new inside track and fencing the entire grounds; laying water pipes around the race course, so that it can be watered the year round; build new stalls and fix up all the old ones; make new paddocks and gravel the entrance to the grounds, converting it into a thoroughly up-to-date place. Mr. Bailey has the taste to do these things right and the improvements will be commenced immediately.

SACRAMENTO RACE TRACK NOTES.

This is the time to visit Sacramento, and especially the race track at Agricultural Park, where a number of trotters and pacers are being jogged preparatory to a more severe course of training. Frank Childs, the young man who achieved such marked success with that wonderful pacing mare Blanche 2:06½, last year, has joined with that other successful trainer, J. Elmo Montgomery, and they are working hard to get their horses ready as they intend to be in Calgary with them when the bell rings in the judges' stand, June 29th. Mr. Childs has his latest purchase, Sirius Pointer (2) 2:18, looking far better than when I saw him a year ago. He has had a hard job to get the surplus fat worked off him, but while this remarkably speedy son of the ex-champion Star Pointer 1:59¼ is pretty high in flesh, he is thin compared with what he was and in the next ninety days will be getting "more genteel." He has not been speeded yet; it is too early in the season. When the time comes, however, he will be ready to prove he has a greater "lick" than Mona Wilkes 2:03¼ or Aerolite 2:07½, his near relatives.

In an adjoining stall is another one out of Trix, dam of Sirius Pointer (2) 2:18, but this is a two-year-old filly by Zolock 2:05¼. She is a chestnut in color, with blaze and two legs white. She is very promising.

Babe Berne, by Jules Verne, out of Little Babe, by Bradmore, owned by Henry Peters, of Dixon, is here, and Elmo Montgomery has been working him. He is five years old and a trotter.

Jim Logan 2:05¼ is big and strong and hasn't a blemish. He will be in the 2:02 class this year, for he never wintered better nor acted as if he had a world of extreme speed on tap more than at present. When he starts at Calgary the gate receipts will be large. Jim Logan is not to be bred to any mares this season.

In the next stall is another belonging to Mr. Montgomery, and from present indications it would not be surprising if he was placed among the fastest three-year-olds in America. He is by Zolock 2:05¼, out of Effie Logan (dam of Jim Logan 2:05¼ and Sir Albert S. 2:03¼). Lock Logan is his name. He is of a different conformation to his near relatives, is a free-legged pacer, and is entered in all the stakes.

Ben Rush 2:10½, by Demonio 2:11¼, out of Minerva (dam of Dinervo 2:06½, Solano Boy 2:07, and Ben Rush 2:10½), by Guy Wilkes 2:15¼, is in training in this string and will be ready when the races are called. This little pacer has a "world of speed," and, like all the Demonio's, is level-headed and game.

H. S. Cowell's five-year-old mare by Cupid 2:18, out of Dione 2:07¼ (dam of Bernice R. 2:11¼), had just arrived and nothing had been done with her. Elmo says he would rest her up for a few days.

Wm. Ivey has that grand-looking James Madison stallion Lijero 2:15½, belonging to F. E. Wright, of Sacramento, and a few others in his care. As an individual he is one of the finest types of a trotting horse ever foaled in California. He has size, color, disposition, breeding, soundness, and extreme speed. His only representative on the trotting track is Expedio (3) 2:14¼ (public trial as a four-year-old 2:08¾). His colts and fillies are of showing type, with the added qualifications, perfect trotting action and speed. Lijero never looked better, and it is hoped he will not be sold to some one living outside the boundary lines of California, for horses of his class are exceedingly rare and are needed here.

Geo. Herndon has sent his bay gelding Chester, by Lynmont. He is a good one, has worked miles in 2:14, last half in 1:04½, and is due to get a very low record. He is absolutely sound.

Mr. Ivey also has a very fine looking three-year-old gelding by Lijero 2:15½, out of Pearl Sinclair, a half sister to that good game pacer Kelly Briggs 2:08.

In a paddock he has a filly and a colt (yearlings) by Lijero 2:15½ that are good to look at. One is out of Daisy, by Knight 2:22, second dam by Echo; third dam Mabel (great broodmare), sister to Beautiful Bells 2:29½ (dam of 11), by The Moor.

The other is out of Nightingale, by Knight 2:22, second dam by that good race horse Jim Brown; third dam is the granddam of Anaconda 2:01¼, by Williamson's Belmont. When it comes to breeding for gameness, these two should fill every requirement.

In another portion of this building John Quinn's horses are kept. The first one shown was Moko Hall, the well-bred son of Moko, the futurity sire, that belongs to Frank Ruhstaller. Moko Hall has developed into a remarkably handsome horse and will be prepared for the races this fall. It is his owner's intention not to breed him to many mares, in order that he can give him the preparation necessary to win races and get a low record.

In the next stall is the handsome big brown mare Expedio (3) 2:14¼. This daughter of Lijero's is a credit to any sire and will undoubtedly get a low record on the Pacific Coast Circuit, and when her days of racing end what a broodmare she will be. She is out of Mater Expedio, by Knight 2:22, one of the stoutest bred Wilkes stallions ever foaled; her next dam was Madam Wilson, a noted road mare owned by the late Zeke Wilson, by Whippleton 1883, a sire whose bloodlines are highly esteemed by all who own any trotters tracing to him.

I. L. Borden's Albaloma, by Almaden 2:19¼ (Charley Durfee's little Direct-McKinney stallion), out of Loma B. (dam of Nobage), by Stam B. 2:11¼, is one of the best made and most promising trotters on this track. It will be easy for him to enter the 2:15 list.

Hymetus 2:07¼, by Zombro 2:11, out of The Silver Bell (dam of Zomboyette-2:14½), by Silver Bow

2:16, is also here. Mr. Quinn says he is all right and will race this year.

He has a green pacing gelding belonging to F. S. Gurnette, of Suisun. This one is out of the dam of Oro Belmont 2:15¼, and is very promising.

In the last stall was Delilah 2:06½, by Zolock 2:05¼, out of Gipsey (dam of Ed Winship 2:15), by Gen. Booth. She is looking well and will be jogging for the word this fall.

Ben Walker, one of the best-known reinsmen in America, has a big string of horses here headed by Teddy Bear 2:05, by Del Coronado 2:09½. The little fellow returned from his campaign without a blemish, and as a sire he is destined to be a success, if one is to judge by the few yearlings by him. There is one here that Ben is working which is described as a "trotting fool." It knows nothing but trot and is anxious to show it is gaited right and ready to be handled for championship honors.

There is a sister to Teddy Bear here that is a trotter and Ben is very sweet on her. She will be out this year.

The Statesman, by James Madison 2:17¾, is the property of Ben Walker. He is one of the finest-looking, purest-gaited stallions in Sacramento. He has a colt out of the dam of Teddy Bear 2:05 that is a slashing good one, a straight line trotter.

Blanche T. 2:18, by Stickle (son of Silver Bow 2:16 and Grace, by Buccaneer), that won at Fresno, is here. Her limbs are as clean and hard as a reindeer's. She will be a money-winner this year for Ben.

White Hose is a green one by Zolock 2:05¼, out of Polka Dot, by Mendocino 2:19½.

Besides these, Ben has several green ones that he is just handling.

Jim Thompson has only a few, and, as he is busy making preparations to take some of the choicest bred mares in this part of the country back to Kentucky, he says he will do very little with his horses until he has all these mares nicely located, then he will return and go to work. Jim is a "rustler" and his idea of breeding mares to these stallions is an excellent one. He says these sires are owned by men who are not afraid to advertise them and that's what attracted him. Any owner who is afraid to use printer's ink to let the horse-breeding public know he has a good stallion cannot expect to get anyone to send their mares to his horse. Jim is a philosopher, but not one of the long-haired, visionary dreaming kind.

P. W. Hodges has a few also, but they are good ones. His fine stallion Montbaine, of which he expected so much as a trotter, was injured through the carelessness of a groom last fall, but is gradually "rounding to," and will soon be taken up and worked. It was a bitter disappointment to this owner and trainer, but he says the horse is almost well.

He has Rapallo, a very promising colt by Greco B., out of Oniska (dam of San Francisco 2:07¾), and he believes, in many respects, he is a far better horse than his famous half brother. Rapallo is a small, compactly made trotter, and has very pure trotting action. He travels with his head low and can reel off quarters in 32 seconds easily. Besides this horse he has several young ones he is handling and a number of broodmares that are in foal to Montbaine.

The track is in perfect condition. Young Tryon (son of Vet. Tryon the old-time trotting horse man) has charge and is accomplishing wonders with it. The infield has been leveled, plowed, seeded and harrowed, and it is hoped it will be covered with green grass and alfalfa when the State Fair opens.

FRESNO, THE GARDEN SPOT OF THE SAN JOAQUIN.

Editor Breeder and Sportsman:

Upon entering the Fresno County Fair Grounds one is impressed with the general neatness and cleanliness of the grounds. After passing through the gate and down the broad walk through the green fields of alfalfa you arrive at the stables, in which, although not many, are a choice collection of trotters and pacers.

Schuyler Walton, who has been so successful with the horses of Geo. Warlow, is stabled nearest the gate, and he has about fifteen head at present, a partial list of which follows:

A. S. Kellogg's two-year-old trotting filly Verda Ray, by Athasham, dam by Secretary, is in the first stall. This one is very highly thought of by Schuyler, and as she is liberally staked, he expects to bring home some of the "needful" with her.

Royal McKinney, that well bred son of the great McKinney, is in training, and if he stands the "prep" there is no doubt he will be a very useful trotter, as he has lots of speed, is a good going horse, and is a sensational filly owned in Stockton.

A five-year-old pacer, owned by B. F. Stone, is well thought of and Walton says that this one is a 2:06 pacer sure, as he worked in 2:10 and repeated it last year with hardly any preparation. He is by Athadon, the sire of Athasham 2:09¼, and his dam is a thoroughbred.

Assemblyman Sutherland has a promising stake colt in the same stable called "Stanmont," by Stanford McKinney, out of a General Logan mare.

There is a chestnut mare owned by H. H. Welsh, on which Walton is very sweet, and he says that it will take a good trotter to beat her. He worked her last year a half in 1:05¼ and quarters in 31 seconds, and figures she can beat 2:09 this year. She is by Diablo, out of a mare by Algona.

Among the others in Walton's string are a very promising two-year-old trotter by Athabou, out of a McKinney mare; a black five-year-old mare by Stanford McKinney; a two-year-old pacer by Sky Pointer,

out of a Diablo dam; a three-year-old trotter called George, by Athabou, and a pacing gelding by Dexter Prince, out of Psyche, owned by M. F. Tarpey, of Fresno and San Francisco. This fellow is one of the last Dexter Princes foaled at the Aptos Stock Farm.

Walton has the stallion California Guide, the well-bred son of Balzac 46162, out of Miss Guide, by Guide, at the track and uses him for a road horse. He is the sire of Florist, the fast pacing mare who trialed last year in 2:07 and was sold recently to Australian parties.

The next string of horses are in the hands of Charlie Clark, and although he has but four head up at present, they are all good ones:

Con Brio 2:14½, the pride of the barn, is a grand-looking bay stallion by Echo Chief, out of a mare by Junio. Last year was the first he raced and took his present mark in a winning race. He has been a mile in 2:12 on the trot, and Clark says that he will take a lot of beating in the 2:15 class this year.

Little Beau, a chestnut mare by Stamboulet, dam by Strathway, is a nice going trotter. Last year she worked in 2:16½ as a three-year-old, and he speaks of her in the highest terms.

Comet W., a two-year-old by Tom Smith (sire of Katalina, etc.), out of Coradell, by Junio, is a nice thing, as is a two-year-old colt by Athasham, out of Sweet Alice, by Cupid 2:18.

Mr. Zibbell, who has been such a successful trainer here for some years past, is in the East at present, looking for a son of Peter the Great to breed to his "Tom Smith mares."

Here's hoping he finds one, as we need that kind of blood on the Coast.

D. L. Bachant, to whom, by the way, the writer is greatly indebted for a most pleasant afternoon spent in and around Fresno in his machine, has just moved some of his horses to the track for spring training.

The first horse seen was old Adam G. 2:05½ pacing and 2:11 trotting. This good, game old horse is as sound as a dollar, and to cap the climax the old boy has decided to go back to the trot, at which gait he was first raced. Mr. Bachant intends to give him his legging up personally and then send him to Chas. DeRyder to campaign. Let's hope Charlie will be as successful this year with Adam G. on the trot as he was with him as a pacer.

In the next stall to him is a sweet-looking filly by Athasham, out of Bessie, by Egbert.

Soison, a three-year-old stake colt, is a promising trotter, also by Athasham, out of a mare by Guy McKinney.

California B., a three-year-old trotting gelding by Athasham, and a two-year-old colt by the same sire, out of Maud Sears, by Wayland W., complete the string.

This last fellow is a great looking baby and Louie says he will "bring home the bacon," as he is heavily staked.

Athasham, the daddy of all the above mentioned colts, is in superb shape, and, if he don't have several in the list this year, it will not be his fault, because his sons and daughters are very much like him and all show lots of speed.

Mr. Geo. L. Warlow, a member of the California State Agricultural Society, has four head in Walton's care.

Kinneysham (3) 2:18½ (winner of the two-year-old pacing division of the Pacific Breeders' Stakes), by Stanford McKinney, out of Cora Wickersham (dam of Athasham 2:09¼, Donasham 2:09¾, Nogi 2:10½, etc.), is in fine shape and has filed out wonderfully in the past year. Walton thinks he is a 2:08 pacer this year and, as he could pace a half in 1:04 last season and a quarter in 31 seconds, it looks as though he would improve a great deal.

A bay two-year-old colt (half-brother to Kinneysham and full brother to Athasham, Donasham, Mat-tewan, etc.), is in the next stall, and if he is as good a trotter as his brothers he will get some of the change. This fellow is, of course, staked, as is the two-year-old trotting colt by Stamboulet 2:10½, dam Soisette, by Guy McKinney, second dam by Athadon.

Mr. Warlow reports all his stallions, of which he owns many, and all good ones, too, to be in first-class condition, especially Athadon, his favorite. This horse, by the way, tops the scales at over 1,400 pounds at present.

A foal is expected from Cora Wickersham (the great broodmare) in a few weeks and Mr. Warlow is hoping for a filly, but it is only guess work, because she has never given birth to anything but horse colts. She was bred to El Diablo in hopes that this cross would have the desired result. The way this old mare Cora Wickersham has always produced horse foals leaves plenty of room for argument in regard to "Is the female of the species mightier than the male?" a leading question now before the public.

DOC.

James Thompson of Sacramento, left for the East last Wednesday, taking eight mares to breed to such stallions as Moko, Walnut Hall, Gen. Watts, Baromore, Trampfast, and The Exponent. He is also taking the gelding Alert he sold to Johnny Ray, the Irish comedian. Mr. Thompson selected and purchased these mares for Mr. W. A. Shippee, of Sacramento, and has devoted considerable time to the study of their bloodlines, and if the stallions he has chosen are of the right formation he will have these mares stunted to them. If not, he will inspect others that will suit. Nearly all the mares he is taking are in foal.

Spohn's Distemper Compound is the largest selling horse medicine in the world. The merits of this remedy have produced this result. All druggists sell it.

SOME NEW IDEAS ADVANCED.

Western Fair Secretaries, Robert H. Cosgrove, Secretary, Spokane Interstate Fair Association, Spokane, Wash.

Gentlemen: I note with keenest interest article on sporting page of the Spokesman-Review under date January 9, 1912, and under head, "Vigorous Kick at Harness Horse Men From Fair Secretaries of West," and personal interview by our local secretary, Mr. Robert H. Cosgrove, regarding the great dissatisfaction during the last few years in this country with the way the harness races have been going, and the hippodrome tactics indulged in by the different horsemen in contesting for a \$1,500 or \$2,000 purse, "they are just stealing our money, that's all, although they may be technically entitled to it." "We are getting sick and tired of two and three horse races up this way. We want more and better horses, but how to get them up here is the problem."

I think in justice to the men who are spending their money in the endeavor to advance the interests of the harness horse that your article should not be allowed to go unanswered and I think the article is a very unjust criticism on the part of the secretaries, for the reason, that the greatest percentage of men acting as secretaries have had little or no experience with the harness horse and are not qualified to make such unjust criticism as contained in the paper above referred to, and had they ever had experience with harness horses they would not do it, but would be an everlasting friend of the harness horse and the men who are endeavoring to bring it above petty larceny tactics referred to in your interview.

I have been an owner of harness horses for the past seven years, and am not in the business for the purpose of making money, but own and race horses for pastime, and my greatest hope is to break even, if I can, and I would respectfully ask you respective secretaries who are so eager to criticize, if you can name one man in all your experience among the harness horse men that has ever amassed a fortune in racing harness horses? You can count the men on the fingers of one hand that have even been fortunate enough to break even, and on the other hand you will find 99½ per cent that have lost money and have pursued the business simply for the sport.

In the first place, a man owning a harness horse begins his work to prepare his horse for the next season's campaign immediately upon finishing the last campaign. He carefully cares for the horse that he has nursed and trained for four or five years to make him what he is, to properly winter him, and perhaps a horse that has cost several thousand dollars. It is necessary to exercise this horse daily regardless of the weather, and it becomes incumbent upon the owner to begin training for the coming season as early as the middle of February, and not later than the first of March, at an expense which exceeds \$60 per month. Until the time when the season opens, which is usually about the middle of August, he has paid out very close to \$500. During all this time you have worked hard and diligently to get your horses ready for entry, to compete for purses offered by different associations, with no assurance that they can get enough horsemen to enter to make up the purse, and under rules prescribed by the associations, where they reserve the right to declare off any race that does not fill satisfactorily. Right here I wish to ask some of the secretaries who are advancing such a vigorous protest against the harness horse men what they mean by "satisfactorily"? "It simply means that unless the respective secretaries of the associations do not receive entries enough to make up the purse that is offered, that it is declared off, owing to insufficient entries." As a matter of fact, these same secretaries have found the harness horse men such easy prey that they have begun to think that a man who owns a harness horse will stand for anything. Show me an association that takes a single dollar from the money received at the gate to make up a purse for the harness horse men to compete for, unless that purse is guaranteed by entries, together with the 5 per cent additional to be deducted from money winners, and I will show you a "white blackbird." The association is merely acting as the agent for the easy harness horse man, and if the associations didn't think they could make some money off the harness horse man they would not solicit the entries.

Right here is where I say it is high time for the harness horse men to get together and associate themselves into an association that will give them prestige, and require dignity from the many cheap fair associations who are outlining the way in which these races should be conducted. The harness horse men, if able to own a harness horse, and wish to further the interests of the harness horse, can just as well through its association own their own track, and conduct races under well regulated rules, offer good liberal purses, and take the money from the gate receipts and part entry money, and get and give the public the worth of their money, instead of allowing a lot of money-making managers and stockholders to declare a dividend, and skimp on the amount of purses for fear that the association will run behind, and then lay the blame at the feet of the harness horse men, when, as a matter of fact, they have not got a single dollar invested, but have a guarantee in entries that will give them a profit in excess of the purse guaranteed, and then there is 5 per cent additional deducted from money-winners, which is unjust. Unless a horse participates in the earnings he should be exempt from entrance money, and doubly exempt from the 5 per cent additional from money-winners. Of course, if this was done then the fair associations would have to take from the proceeds of their gate receipts the difference to

make up the guaranteed purse. This they are not willing to do, but they openly and notoriously advertise that they are spending large sums for the harness horse, when, as a matter of fact, they have not put up one dollar. If there was danger of their doing so they would fall back on their ironclad rule which contains the words "right reserved to declare off any race that does not fill satisfactorily."

Furthermore, the harness horse man, after undergoing heavy training expenses and the purchase of racing paraphernalia, which all men know is expensive, before he can start is obliged to pay 5 per cent entrance, and in the event of a misfortune, which is common, after having gone through the expense of training and shipping, their horse becomes incapacitated for racing and is put on the shelf for the balance of the season. He is obliged and duty bound to pay the entire 5 per cent before he can start the horse the next season, perhaps an aggregate of \$1,000 or more on the circuit, and if not paid, he is suspended and cannot start until this 5 per cent back entrance money is paid, and remains a lien upon the owner and horse until it is paid, and the horse is barred from starting on any association track. This is done to protect the fair association, where he has entered, against loss. Then our local secretary says we are just "stealing their money," when, as a matter of fact, they have not put up one dollar.

Does any one of the respective secretaries at the head of the different associations which they represent make any effort to reduce the expense of the harness horse man in shipping back and forth? I can regretfully say no, get in as best you can, and when you get within our jurisdiction we will further penalize you as best suits the case, and then get out. They employ the cheapest man to act as starter, and men to act as judges who know as little about the duties of the judge as the ordinary man does about the articulation of the Chinese language.

Usually a fair and race meeting is only held in a city or county once a year, then from three to six days, and people coming to attend usually come to see the horse races and exhibits, and not a lot of cheap, foolish vaudeville stunts, for which you pay big money, but you are too cheap to offer a purse for a good harness race, because you have got so in the habit of relying on the harness horse man putting up his money and racing for it that you expect if there is to be an extra race the harness horse man should put up his own money and race for it. Right in this connection I will say, that a gentleman by the name of "Carson" brought to Spokane one of the greatest and grandest harness horses, and the fastest and grandest horse that ever showed here, and asked for an exhibition mile, but the poor Spokane Fair Association could not put up a paltry \$250 purse to have this horse go against the track record with a running pacemaker. I saw this same horse step a mile at Vancouver over a poor half-mile track this fall in 2:05, an exhibition that alone was worth the price of admission to the grounds and grandstand, including reserved seat. There were less than one-half of one per cent of the people who attended this fair that ever saw such a wonderful horse as "Bland S." perform, and it was a disgrace upon the fair association to have a man bring a horse of this kind to the city and then, through the cheapness of the association, not give this man an opportunity to show the wonderful skill that it has taken to develop a horse that can work as smooth as any well regulated piece of machinery, and deny the public an opportunity to see this wonderful horse; but, on the other hand, the association found it easy to get and give money for foolish vaudeville, something that can be seen every evening in the week in any small town. Secretaries, put the money that you foolishly waste into purses for harness horses instead of filling in with vaudeville between heats, and give the people something they only have an opportunity to see once a year in their home town. If you are going into vaudeville get out of the horse business. Don't ask the harness horse man to put up his money and race for it, but put it up yourself, and then let them race for it, and I think you will find that you can attract harness horse men from far and near and get the real article.

You don't hesitate to put up three and four hundred dollars for three and four running races in an afternoon to the running horse men for six consecutive days, and on Derby day put up a purse for the Derby winner of \$2,000, without receiving one cent entrance money from entrants for the competition of horses that will sell for \$75 to \$300. Any horse can run, for it is the most natural way for him to go, and a horse with proper wintering can be conditioned to run a race in thirty to sixty days, but it takes years of patient training to get a harness horse in condition so that he can be made to pace or trot. The object of such training is to get him to travel the mile without running. I say this requires skill and patience and the expenditure of a great deal of money, and then you don't want to give the harness horse men a chance. Don't you gentlemen think you are somewhat indebted to the men that have given you exhibition after exhibition without cost to you?

Every fair association is supposed to race under rules of the National or American Trotting Association, the only protection that a man has for his horse and money; but you will find that the associations are grossly abusing the rules of their parent association and violate the very purpose for which they are intended. Your associations put men in to act as starters and judges who are not qualified, and, in the majority of cases, have never before acted as either in a public race meeting, nor have never looked on the inside of a rule book governing harness races, then, how can you beat the contesting horse or horses and the men who are acting as judges, who are

ignorant of rules governing such contests. Every association should secure men who are disinterested, honest, and fearless to start and judge the fairness of the contest. If you are anxious to meet the difficulties that you are encountering get busy and make regulations that will aid the harness horse man, and he is too good a sport to oppose you, which he has demonstrated from year to year by putting up with your unfair treatment. When you stop to consider and peruse the above you will find that it is the harness horse man that is entitled to enter a vigorous protest and not you.

I want to say that if any hippodroming is indulged in it is through the fault of the judges and association by permitting two horses out of the same stable to compete in the same race, as was witnessed in the Spokane \$1,500 2:12 trot, which was openly and notoriously known by the association and the judges, and if not, they did not want to know it. Is this giving the public a square deal? Who is allowing the hippodrome, Mr. Secretary? If you had raced according to rules this could not have occurred. This has occurred in different towns on the Pacific Northwest Circuit, notwithstanding the fact that protest to this sort of thing was entered on several occasions by your humble servant, but were entirely ignored.

Now, Mr. Secretary, get busy and offer some of the following inducements to the harness horse man:

1. Give some added money out of the gate receipts along with the entrance money to make up the purse offered, and only charge entrance to horses that participate in the division of the purse, and refrain from the Shylock method of deducting 5 per cent additional from money winners. The man who competes and gets nothing should not be compelled to pay anything. Require 5 per cent from entrants as a condition of good faith, and if the horse is present, races and gets nothing, return the 5 per cent, and if he does not come to the meet he is subject to pay the 5 per cent penalty or stand to be suspended. The man who races and does not participate in the division of the purse has been under as great an expense in preparing his horse and shipping him to your meet as the man who wins. Don't ask him to contribute money for your purses, but treat him as loyally as you do the running horse man.
2. Arrange your circuit so that shipping can be done with least cost to horsemen.
3. Use your influence with the railroads and try to secure reasonable rates.
4. Do everything in your power to encourage the men who have so bravely stood at the helm and spent their money to try and give you good, clean sport.
5. Don't think that you have been abused, but admit that the harness horse man has been abused.
6. Employ the very best starter and judges that money will hire.
7. Employ experienced horsemen to act as judges and rules who are honest, fearless and disinterested, and will not hesitate to race according to the rules of the parent association. Don't be cheap, and pick dubs.
8. Discontinue the vaudeville between races and give an extra race, so that when the first heat of the first race is over the horses are on the track for the first heat of the second race, and then you will find that it will not be monotonous.
9. Adopt a rule that this tiresome scoring be eliminated, and that the horse must start the third time down, regardless what his position may be or condition of horse. It will make the horseman use and take greater pains to teach his horse to score. You must also at the same time have a good starter.
10. If you have more races, purses need not necessarily be so large.
11. Don't advertise that you are giving large amounts for harness horses when you are not. By my system you can say exactly what you are giving, and then you will not have to falsify to the public.
12. If any of my suggestions should conflict with the rules of your parent association you can modify them so as not to violate any rule and give the relief required in the particular case. Conditions in different sections alter circumstances.
13. Spokane with its population of over 100,000 does not give the purses for harness horse races that our neighboring villages give, namely: Salem, Ore.; North Yakima and Walla Walla, Wash., and Boise, Idaho.
14. Get good live harness horse men on your racing committee.

Respectfully submitted,

ROBERT L. DALKE.

INCREASE IN PURSES.

Salem, Ore., February 17.—There will be \$5,500 additional paid in purses at the State Fair this year over the purses of last year, according to a decision reached at an all-day meeting of the State Board of Agriculture. This move will contemplate two \$2,500 purses, one a 2:24 trot, to be stepped on Monday, and the other a 2:25 pace to be stepped on Tuesday.

In addition to the harness races, a radical change has been made in the running events, so that a \$500 Derby will be run on Friday, and every other day there will be \$300 stake races in place of the overnight entry events of past years.

The board decided to abolish all events where the entries are limited to North Pacific Fair Association horses and to open all entries to the world at large. There have been in the past several events where the entries were tied down to the circuit horses.

Drink Jackson's Napa Soda.

NOTES AND NEWS

Columbus will give a \$10,000 purse for 2:15 trotters this season.

Preparations are being made for the Annual May Day festival at Dixon this year.

All the horses at Pleasanton are doing well this year. No sickness reported; track is fast and climate unexcelled.

Dick Wilson is driving his big Hedgewood Boy filly at Pleasanton; she is of sensational calibre so far as speed and good manners go.

It is feared that many of the speed-burners who have no patience now will have plenty of patients when the circuit commences. Go slow, gentlemen!

The Aerolite pacer Leonid that, as a two-year-old, forced Aerclletta to pace in 2:21, will be sent to Fred Chadbourn next week and prepared for the races this fall.

W. J. Kinney, the "hike," man has two new runabouts for sale, one has wooden, the other wire wheels, with hard rubber tires. They will be sold remarkably cheap.

A half-mile track is to be built at Port Albernie, B. C., this spring. Arrangements will be made to hold a harness meeting there during the coming season.

H. E. Armstrong, of Pleasanton, has just returned from Portland, Oregon. He says it rained all the time he was there. Chas. James drove his trotters and pacers while he was away.

It is rumored that a new association is to be formed entitled the Seattle-King County Fair Association, for the purpose of holding a fair and race meeting at the Meadows track, Seattle.

The colts and fillies by Chas. Johnson's beautiful stallion Airlie Demouie 51640, at Woodland, are models of equine form. He will, without doubt, be a sire of extremely fast horses.

Attention is called to the advertisements in our business columns of some of the choicest bred trotting stock ever offered at private sale in California. Every one is exactly as represented and must be seen to be appreciated.

Paprika, by Oro Belmont 2:15½, out of Auntie, by Dawn, is heavy with foal to Lijero 2:15½, and E. D. Dudley, of Dixon, her owner, is very anxious to see it, as all the Lijero's he has seen are splendid looking individuals.

The stallion Menlow, sire of Blanche 2:06¾, was known as Avalon when he was in Los Angeles, and Will Durfee has a full brother to Blanche he calls Aviator that has shown greater flights of speed than his famous sister.

Effie Logan (dam of Jim Logan 2:05¼ and Sir Albert S. 2:03¾) is in foal to Demonio 2:11¼, and about next Monday J. Elmo Montgomery, her owner, will be watching for the advent of the little stranger. It ought to be the best foal she has had.

King Miller 39812, by King Patchen, out of Wilema, by Eros 2:29¾, is stated by competent judges to be the handsomest topped trotting bred stallion in Vancouver, B. C. In fact, his equal would be hard to find anywhere.

Fred Chadbourne, of Pleasanton, has had another addition to his string. Last week he received from M. B. McGowan the brown colt Healani, by Zolock 2:05¼, dam Queen Derby 2:06¾, by Chas. Derby. Healani has a pacing sire and dam, nevertheless, he is a pure-gaited trotter.

J. W. Gyles, of Paterson, N. J., purchased the lowest-priced horse sold at the Garden sale—Emperor Nero, twenty-two years old, by Eros 2:25½, dam Nerea, by John Nelson, paying \$55 for the animal. Emperor Nero was bred at the La Siesta Farm, Santa Clara county.

From present indications it looks as if every event to be advertised on the Pacific Coast Circuit will be well filled and the fields will be larger than we have ever seen them. The horsemen in the north are all anxious to take in the California Circuit.

Ed Parker, one of our most careful trainers, who worked for several years at Salinas, is handling two colts for E. D. Dudley on the half-mile track on this well-known breeder's farm. They are by Palite, and like all the sons of this grandly-bred horse they are fast and dead game trotters.

Major Tbos. Bowbill, the celebrated veterinarian, who is well and favorably known in all parts of the civilized world, recently purchased the Graves farm, Sonoma. He leaves for Vancouver, B. C., where he has resided for several years, shortly, but will make his latest acquisition his winter home and with his taste will make it a model place.

The good stallion Prince Ansel 2:20½ will make the season of 1912 at the Woodland racetrack, where he has stood for several years. He will be in charge of A. B. Kenney, who has been for four years an assistant trainer to C. A. Spencer.

Shirley Christy, of Phoenix, Arizona, will be in San Francisco about the first of March. A meeting of the Board of Directors of the Pacific Coast Racing Circuit will then be called and further action taken toward completing arrangements for the race meetings this year.

Deviletta 2:10½, by Diablo 2:09¼, the dam of Aeroletta (2) 2:21 pacing, was bred to Teddy Bear 2:05 pacing, and the foal, now being worked, is one of the fastest and truest-gaited trotters ever seen at Marysville. Isn't it remarkable that mares by Diablo and Demonio are the dams of early and extreme speed and know no other gait?

F. W. Perkins' fine mare Rose Trix foaled a bay colt by The Bondsman last Wednesday, and nearly every horseman at Willows has been around to look him over, and they pronounce him one of the finest ever seen there. Mr. Perkins booked the dam to Messrs. Keefer & Spencer's Exponent colt, The Proof 2:29½.

The drawing for the painting of Norfolk for the benefit of Richard Havey, the well known horseman, will take place at Roeders' Cafe, 834 Market street, on Saturday evening, March 16, at 8 o'clock. This is a magnificent oil painting and the reason the drawing did not take place before is there were so many tickets out and unaccounted for.

E. D. Dudley's beautiful mare Ruby Crellin, by C. The Limit 2:04¼, dam La Moscovita (dam of Yolanda 2:14¼, Bon Guy 2:11¼, etc.), by Guy Wilkes 2:15¼, second dam Moscova (3) 2:28½ (dam of Mamie R. 2:15), by Belmont 64, is due to foal to The Bondsman in a few weeks. The foal should be exceedingly valuable.

Despite all efforts on the part of the government to encourage horse breeding in England the number of horses raised each year grows smaller and smaller. Livestock returns for 1911 show a falling off of 5,333 in the number of horses under one year old, the total being 120,847, as compared with 126,180 in 1910, and 129,681 in 1905.

Senator Ben Rush, of Suisun, shipped his greatest speed-producing mare, Minerva (dam of Dinervo 2:06½, Solano Boy 2:07, and Ben Rush 2:10½), by Guy Wilkes 2:15¼, grandam Rosalee (dam of Mary B. 2:22¼, Jean Wilkes 2:24¼, and Roselle R. 2:26½), by Sultan 2:24, to Woodland, to be bred to The Proof 2:29½.

Charles Smith, of Phoenix, is at Liberty, Ind., for the purpose of shipping the pacing stallion Directly 2:03¼ to Arizona. This phenomenal colt pacer and good sire will be of great benefit to the breeding industry of the Southwest, which is in a much better condition than at any time in the history of this latest addition to the States of the Union.

Dr. Alex. H. Davidson of Phoenix, Ariz., recently visited Riverside, Cal., and purchased the black pacing stallion Patchlock 01271, by Zolock (p.) 2:05¼, dam Angie Duryea (p.) 2:17½, by Patchen Wilkes 2:29½; grandam Angie D. (p.) 2:07, by Mikagan 2:19¼. Patchlock is one of the best bred pacing horses ever brought to Arizona, and a fine representative of the famous Zombro family.

Guy Axworthy (4) 2:08¾, the handsome son of Axworthy (3) 2:15½ and Lillian Wilkes (3) 2:17¼, dam of three, by Guy Wilkes 2:15¼, and already, though but ten years old, sire of six standard performers, including Muda Guy 2:09, whose record at three years, 2:12¼, is the world's mark for a trotter of that age over a half-mile track, was shipped from William Bradley's Ardmaer Farm, Raritan, N. J., last week to Lexington, Ky., where he will head Senator J. W. Bailey's Fairland Farm. The stallion is still the property of Mr. Bradley, who several weeks ago leased him to Senator Bailey.

Charley Dean, the famous trainer, has a string of over fifty from which to select his breadwinners of 1912. In his charge are a bunch of very high priced horses owned by the wealthy Canadian horseman, R. J. MacKenzie. The prospects are that Dean will invade the big line with one of the strongest strings he ever campaigned in the past, judged by the past performances and speed reputation of the majority of the horses now in his Palatine, Ill., stable. Only the worst kind of luck will prevent Dean from topping the winning list of 1912, for he certainly has the working material of a fine selection.

The news has been received by cable that the ex-American stallion, Allen Winter 2:06½, famous as the winner of the \$50,000 American Trotting Derby at Readville, Mass. in 1908, Sunday, February 8, won the great International race at St. Petersburg, Russia, in which country he is now owned. He was driven by the American trainer Will Caton, and his best time was 2:12¾, over the ice. The dispatches failed to state the names of the horses which he defeated. The value of the purse was 20,000 rubles, or about \$10,000, and it was the chief event of the winter racing season in Russia, open to international entries.

Mattawan (3) 2:17½, owned by I. L. Borden, is to be sent to John Quinn, Sacramento, to be prepared for the races this year. John A. McKerron measured this four-year-old for a set of harness and was astonished to find that his girth measured 75 inches.

Farmer Bunch is trying to break all track records ever made in February at Pleasanton. No one has seen a purse hung up for such a performance, but then it's nice to have the record. He worked his pacer a mile in 2:12½ last Saturday. The day before M. Henry drove his pacer in 2:13¼. It looks as if there is a rivalry between these two well-known trainers. Horsemen in the frozen East, please make a note of these remarkably fast battles against Father Time on Pleasanton's classic course.

The executor's sale of choice trotting stock formerly the property of the well-known breeder, Wm. Morgan (deceased), of Pasadena, is one that should be well patronized, for a grander lot was never offered in Southern California before. All are trotters and royally bred. Mr. Frank Williams has them at the Exposition Park race track, Los Angeles. The sale takes place Tuesday, February 27th, at 1:30 p. m. Besides these broodmares, colts, and fillies, and the richly bred Zombro stallion Crisis 2:19¼, by Zombro 2:11, there is to be sold the complete racing outfit consisting of sulkies, harness, boots, blankets, etc. Sale is positive, L. D. Lowry is executor, and Sam'l Watkins, auctioneer.

M. C. Keefer's fine trotting stallion Adansel (3) 2:14½ will make the season of 1912 at Sweetwater track, National City, San Diego County. Adansel is one of the purest gaited trotters in California and his breeding is of the very best. Sired by Prince Ansel (2) 2:20½ (son of Dexter Prince and Woodflower, also dam of Seylex 2:15¾), by Ansel 2:20, dam Advosta 2:20½, by Advertiser 2:15¼ (son of Electioneer and Lula Wilkes, by Geo. Wilkes 2:22); second dam Valdosta, by Nutwood 2:18¾; third dam Emma Arteburn (dam of St. Arnaud 2:29¼, 2 sires of 8 and 5 dams of 8 in 2:30), by Mambrino Patchen 58; fourth dam Jenny Johnson, by Sweet Owen. He is owned by M. C. Keefer, of Woodland, who has several foals by him that are a credit to their sire.

In reply to the article regarding the ownership and breeding of a three-year-old colt at the San Jose race track which appeared in our last issue, we are informed that the colt is registered in volume 19 of the American Trotting Register as Valentine K. 53244, foaled 1909, sired by Oronto 28322, dam Estabelle K., by Norwood 25732; second dam Easter K. (dam of 5), by Silas Wright, etc. He was bred by the Kuster-Erwin Horse Company, of Wyoming, and his owner lives in Portland, Oregon. It seems that when Joe Cuicello left, this colt was being cared for by a man who a little while afterwards died suddenly. Ray Mead then took charge of it. As it had been fully described in the "Breeder and Sportsman" when it arrived, and is well known to all the horsemen on the track, there should have been no mystery about it. However, a little investigation would have solved it for Mr. Mead at any time. The colt is a very promising trotter.

Trainer George Haag, of Calgary, Alta., who raced General H. 2:04¼ so successfully, has purchased from Dan J. Fenelon, of Ripon, Wis., the roan pacing stallion Roan Hal (4) 2:18¼. Fenelon raced Roan Hal very successfully as a three and four-year-old and the colt demonstrated that he was close to a 2:10 pacer over a half-mile track last year. Haag will stake his new purchase in the Canadian Northwest and on the Pacific Coast. Haag has a big stable at Calgary, of which Hydrangia 2:28¼, by Vice Commodore 2:11; Countess Peter, by Peter the Great 2:07¼; Ambassador Todd (3), by Kentucky Todd (3) 2:08¾, out of Sadie T. 2:09¼; Delamon (2), by The Director General, out of Ella Belmont, by Belmont; W. H. S., by Gamaleon 2:25¼, are among the trotters. Alberta 2:09¼, the pony pacer by Searchlight 2:03¼, heads the pacers, of which others are: M. S. McCarthy 2:24¼, by The Director General; Albert Boy, by Vice Commodore 2:11; I. J. Ruttle, by Charley Herr 2:07; Minnie B. B., by Searchlight 2:03¼; Minor Eel, by J. J. Audubon 2:19; Minnie H., by Alcyone Jr.; Klein Ream, by Klatawah 2:05½, with some green ones by General Adelle, Gambetta Wilkes, Leland Onward, and so on.

Archie Frost, of Phoenix, Arizona, has the following horses in his stable and has been jogging them for the past two months: Edward Patchell, a three-year-old by Dan Patch 1:55, dam by Axtell (3) 2:12, is one that he is particularly sweet on, and he believes that Edward is showing more speed right now than Knight of Strathmore, p. (4) 2:05½, did at the same age. In the latter part of December, Archie stepped him an eighth in 16 seconds, and thinks he will prove a sensation as a three-year-old. The others consist of Dixie Lou (p.) 2:13¼, owned by W. J. Gam, of Madison, Wis.; Creme De Menthe 2:26, by Boydelo 2:14¾, owned by Frank Cavalliere, of Phoenix, Ariz., has been a mile for Frost in 2:17 and is tabbed to trot in 2:12 this year. A two-year-old trotter by Milo McKinney, a full brother to Sweet Marie 2:02, out of Nordica (2) 2:18, by Advertiser 2:15¼, looks like a coming trotter. Besides the above four he has a green trotter by Oh So 2:25½, that has been a mile in 2:28, quarter in 33 seconds, a three-year-old filly by Direct View 2:08¾, a green trotter by Sonny J. (not Sunny Jim, p. 2:06½), and a green pacer by Klatawah, p. (3) 2:05½, out of Midget Willis 2:13¼. On April 15th Frost will ship to Monroe, Wis., for their final preparation.

HOPPLES MAY BE USED AGAIN.

Representatives of nearly every track devoted to light harness racing throughout the country went into session last Monday at the biennial meeting of the National Trotting Association at the Murray Hill Hotel, New York City. President P. P. Johnston of Lexington, Ky., presided over the meeting with W. H. Gocher, of Hartford, Conn., as secretary.

An important amendment to the rules was made, which is expected to benefit the half-mile tracks greatly, which provides that horses with records made over one-mile tracks shall be allowed three seconds if the entry is not slower than that of the half-mile tracks. The Rules Committee recommended an allowance of four seconds, but it met with general opposition, and in the compromise it was agreed that three seconds should be the handicap.

The subject which came in for the greatest amount of discussion was the fight made by the leading horsemen present to prevent the repeal of the rule which placed a ban on hoppers, two years ago. Since the abolishing of hoppers there has been a great deal of criticism among followers of the sport, and a threat was made by those opposed to this feature to break away from the National Association.

A vote was taken for the restoration of hoppers in all except the classes for two, three and four-year-olds, which resulted in 295 to 61 in favor of hoppers in all other classes.

Additional duties were placed on the official and licensed starters, which they must comply with under penalty of expulsion, and this movement also brought about opposition. This paragraph was added to the rules governing track officials as follows: "In addition to the duties heretofore required of the starter, he shall give information as to the practical application of the rules, when called upon by either track officials or employees. He shall also at the close of each meeting at which he officiates send to the Secretary of the National Trotting Association a special report of the events decided, giving the names of the horses starting, their positions in each heat, together with the notice of all penalties."

The horsemen approved the recent suggestion of Major Leonard Wood, of the army of the necessity for breeding a superior standard of horses for cavalry and artillery purposes, and the following resolution on the subject presented by President Johnston, was adopted unanimously:

"There is an active sentiment in this country, created perhaps, by Gen. Leonard Wood's letter, in favor of breeding in this country a sufficient number of horses of standard requirements for remounting our cavalry and furnishing a supply to the artillery. The trotting bred horse has been looked upon with great favor for that purpose. And it might not be amiss for us to resolve that we will co-operate with these gentlemen in any way we can to carry out the Government's purpose in that respect."

With the election of these officers the meeting concluded its work: President, P. P. Johnston, Lexington, Ky.; Vice-President, Morgan G. Bulkeley, Hartford, Conn.; E. P. Heald, San Francisco, Cal., and P. H. Wall, Ottawa, Ont.

A new southern district was created with this board of directors: J. W. Bailey, Gainesville, Texas; Samuel Walton, Falls Mills, Va., and John Earley, Nashville, Tenn.

The other boards were elected as follows: Eastern District—E. O. Beal, Bangor, Me.; J. M. Johnson, Boston; Samuel McBride, Toronto, Canada; Atlantic District—H. N. Bain, Poughkeepsie; J. Howard Ford, Stoney Ford, N. Y.; and De Forest Settle, Syracuse. Central District—William Russell Allen, St. Louis; H. A. Drehm, Baltimore, Md., and A. B. Cox, Palio, Penn. Western District—John C. Welty, Canton, Ohio; W. W. Collins, Detroit. Pacific District—J. C. Kirkpatrick, San Francisco; Benjamin F. Rush, Suisun, Cal., and J. H. Booth, Salem, Oregon.

HOBBLER ARE BARRED.

Chicago, February 20.—Members of the American Trotting Association, at the biennial meeting of that organization today, made a drastic ruling against the use of hobbles. The association ruled:

One—That hobbles will not be allowed on any horse four years old or under during the 1912 season.

Two—That hobbles will not be allowed on any horse five years old or under during the 1913 season.

Three—That hobbles will not be allowed on any horse six years old or under during the 1914 season.

This action, with a change of rule regarding points, was the principal business decided by the meeting.

The new rule on points follows:

"In deciding the rank of a horse the winner of two heats in a two-in-three race, or the winner of three heats in a five-heat race, shall be entitled to first money.

"In deciding the rank of horses other than the winner the horse having the smallest number of points in the summary is entitled to second money, the next smallest to third money and the next to fourth money.

"A dead heat shall count one for each horse making it, but where a deciding heat is necessary the horses starting in such deciding heat shall be entitled to first and second money, according to their position in that heat."

F. O. Van Der Kar, president of the Troy Chemical Company, manufacturers of Save-the-Horse, speaking of the peculiarities of different breeds and families of horses, said that trotters rarely suffer from buck shins, while among runners and jumpers, particularly young ones, it is one of the most common and aggravating forms of lameness. "The trouble is caused by inflammation of the membrane covering the bone," he explained, "and is usually the result of concussion or jarring. The colt goes lame, and next day is apparently all right again, but as soon as you work him he is likely to pull up so lame you can hardly get him home, and so it goes for weeks. After a while you will notice a little roughness under the skin if you run your hand down the front of the cannon bone, and there will be more or less soreness and fever in the leg. The symptoms are just the same when a harness horse gets a splint, and from much the same causes. The only difference is that the roughness on the cannon bone of the runner is in front, while the trotter's enlargement is on the side of the bone. And that is practically the only difference between buck shins and splints. The treatment is the same in each case. Firing and blistering used to be the universal practice, but it has almost ceased since the trainers of thoroughbreds and trotters began using Save-the-Horse so extensively."

R. J. MACKENZIE'S LATEST PURCHASE.

When the three-year-old colt, Graham Bellini (2) 2:20½, by Bellini 2:13¼, out of Grace Onward 2:12, by Onward, was driven before the auctioneer's stand during the Midwinter Sale last week, Mr. W. B. Dickerman, who bred him, moved quietly up to the rear of the stand and, when bids were called for, he got into the game early, says Horse World. In a conversation with Mr. Dickerman shortly before the colt was sold, that gentleman remarked that he believed Graham Bellini was of real futurity calibre and that he ought to go into some stable where he could have the advantage of such training as would enable him to take part in the futurity events to which he is eligible. Possessing plenty of good futurity prospects himself, Mr. Dickerman did not really care to buy Graham Bellini, but he evidently felt that he would buy him rather than see him go to someone who would not train him for his engagements. He carried the bidding up to \$3,000 and then, satisfied that nobody would pay more than that for the colt except for the purpose of fitting him for his futurity engagements, he smilingly dropped out of the contest. At a bid of \$3,500 the Illinois trainer, Charley Dean, got the Bellini colt, he acting, it is said, for R. J. MacKenzie, the Manitoba turfman, for whom Havis James trains. Graham Bellini, excepting in one respect, is one of the best-looking young trotters in the country. He has that peculiar cut-out formation under the knees which at the first glance would cause one to say he is over on his knees. Mr. Dickerman stated, however, that the colt was foaled that way, and a close examination shows that the peculiar formation is not in any way an indication of unsoundness. Robert J. 2:01½, it will be remembered, was characterized by this same conformation, only in a more pronounced degree, and no one ever had occasion to say that it was any drawback to his racing powers. From his looks, Graham Bellini appears to be a colt that will race over about any kind of a track. He is very strongly built, has, with the exception noted, a fine set of legs, and his head indicates the possession of the kind of brains that go with good manners on the racetrack. Of his speed there can be no question, for on the half-mile tracks of Kansas and Oklahoma last season as a two-year-old he did what few trotters of that age have done. If all goes well with him, he will be a factor in some of the futurities of 1912.

MARYSVILLE RACE TRACK.

That live and wideawake newspaper, the Marysville "Democrat," in its last issue published the following words of advice and fatherly wisdom:

The directors of the Yuba and Sutter Driving Club met at the Decker-Jewett Bank, Tuesday night, to discuss ways and means for collecting all of the back dues from the members of the club and it was decided to appoint A. W. Gluckman as collector. The club came out at the small end of the horn when the big race meet was held in this city last year and they were forced to borrow something like \$1,000 to pay off the bills. This would not have happened if all of the members of the club had paid their dues regularly, as this sum, together with the money derived from the matinee race meets and the big meet, would have covered the expenses.

All members of the club should pay up their back dues, and the people in general should assist the club in every manner possible, as they are endeavoring to put on some great racing cards here this spring and summer. Marysville has a race track that the city may well be proud of, and it is the duty of the public to patronize the matinee race meets because, while they are getting something for their money, they are assisting the Driving Club. Some fine stock is in training at the local track and these with horses from the nearby towns should furnish the people with the best possible sport in the harness racing line.

The Pacific Coast Circuit meet, which is to be held in Marysville in July, will furnish the lovers of light harness racing the greatest sport to be obtained anywhere on the Coast, as horses from all parts of the country will be here and some great records made.

The local driving club has done much to make this city a racehorse center. The Marysville track when taken over by them was in a most dilapidated condition, while now it presents the appearance of a first-class race course, and this is all due to the hard work of the club. These race meets held here bring several hundred people into town, which will naturally assist the business men. Now, why should the Yuba and Sutter Driving Club not have the assistance of the merchants?

The Horseman \$20,000 Futurity is the richest of all newspaper futurities on a most liberal system of entrance, and is advertised in this issue, and appeals to every owner of a broodmare. It is for foals of 1912, and is guaranteed to be worth not less than \$20,000. Entries will close Friday, March 15, 1912, when the first payment of \$2 will be due on each mare nominated. Then, on November 1st, a payment of \$5 is to be made, and an additional \$5 will be required May 1, 1913, and no further payment until year of race. There is a four-year-old trotting division, which is a new feature, and one that should be appreciated. No one who owns a good mare can afford to let this opportunity pass, for an entry in this stake enhances the value of every colt or filly, and brings the youngster into greater prominence, as well as placing it in a position to win a large sum of money on a small investment.

Drink Jackson's Napa Soda.

STANDARD BRED STALLIONS LICENSED.

Following is a list of stallions that were licensed by the California Stallion Registration Board from February 1st to 17th, inclusive:

- Bouncer—Jos. F. Cunha Jr., Niles.
- Paio King—H. S. Hogboom, Woodland.
- Iran Alto—Jas. W. Rea, San Jose.
- The Proof—Keefe & Spencer, Woodland.
- Adansel—M. C. Keefer and C. A. Spencer, Woodland.
- Douglas Derby—Thos. McCormack, Rio Vista.
- Dan Logan—L. B. Daniels, Chico.
- Governor Perkins—J. J. Botello, Walnut Creek.
- Stellwell—Gordon & Ott, Concord.
- Prince B.—E. P. Sailor, Upper Lake.
- Lou Derby—U. S. Wood, Fomona.
- Hi Alto—C. M. & N. M. Boufars, Woodland.
- Delmont—J. T. Flood, Newville.
- Aisrat—S. H. Sterner, El Centro.
- Malbeck—W. C. Chisholm, Santa Rosa.
- Expressive Mac—J. H. Nelson, Selma.
- Shortnut—G. W. Short, Anaheim.
- Bon McKinney—Ted Hayes, Los Angeles.
- Bon Volante—W. A. Clark Jr., Los Angeles.
- San Juan—E. P. Heald & L. Leadbetter, Napa.
- Merry Mac—Geo. F. Anderson, Ukiah.
- Wild Nuthing—Geo. McCormack, Santa Maria.
- Teddy Aldier—L. R. Howard, Lower Lake.
- Donnelo—I. B. Jessup, Bakersfield.
- Richard B.—I. B. Jessup, Bakersfield.
- Alexander Malone—J. M. Ferguson, Santa Cruz.
- Bright Raven—H. L. Middleton, San Jose.
- Bonnie—R. J. Johnson, Turlock.
- Milton Gear—F. A. Ramsey, Turlock.
- Stam Boy—Edmund Miller, Stockton.
- Byron Wilkes—J. W. Hammond, Byron.
- Herbert Dillon—Josie S. Frary, Red Bluff.
- Gold Nut—Geo. W. Ford, Santa Ana.
- Nearnut—Geo. W. Ford, Santa Ana.
- Don Gentry—J. H. Waggoner, Selma.
- Guy Carlton—C. C. Crippen, Mayfield.
- Rora McGregor—The Whitcomb Co., Exeter.
- Diamax—E. L. Fissel, Woodland.
- Barton—R. J. Kirk, Dinuba.
- Nobage—A. S. Kellogg, Fresno.
- Red McK.—Wm. Murphy, Los Angeles.
- Nearnes—John Suglan, Fresno.
- All Style—Dana Perkins, Rocklin.
- Tom Smith—Mrs. F. H. Burke, San Jose.
- Guy's Centergy—Frank S. Turner, Santa Rosa.
- Alto Dawn—L. W. Redwine, Ukiah.
- The Fleet—W. E. Meek, Antioch.
- All Hal—A. E. Heller, Riverside.
- Bon Voyage—W. A. Clark Jr., Los Angeles.
- The Statesman—Ben Walker, Sacramento.
- Biff McKinney—Callexico Breeding Co., Callexico.
- Zoblack—J. W. Marshall, Dixon.
- Richard Alto—Louie Ambrust, Stockton.
- Jr. Dan Patch—J. W. Elwell, Marysville.
- Varcoo—J. W. Elwell, Marysville.
- El Tesoro—Robt. Garside, Salinas.
- Al De Baron—S. U. Mitchell, Sacramento.
- Young John—Will E. Harris, Yuba City.
- McO. G.—J. W. Griffith, Liveoak.
- Diawood Jr.—J. H. Hanner, Colusa.
- Jack Hockins—Richard Harris, Tudor.
- M. D. N.—P. W. McCune, Marysville.
- Montee—John B. Renatti, Marysville.
- King S.—J. E. Strain, Marysville.
- Bronzo McKinney—G. H. Simpson, Honcut.
- Barney M.—J. B. Renatti, Marysville.
- Sir John S.—Stevenson Estate, Marysville.
- Tonopah—Stevenson Estate, Marysville.
- Bonny Yuba—Stevenson Estate, Marysville.
- Juan Diablo—A. J. Edwards, Alvarado.
- Sir Chas. Valpey—W. B. Kirk, Niles.
- Navajo—J. F. Bowling, Madera.

FAIR AND RACES AT SAN JOSE.

One of the big attractions of the Santa Rosa County Fair and National Pure Food Exposition was announced at a meeting of the board of directors Tuesday when E. W. Allen, Vice-President of the Board, said that he had secured a place for San Jose on the grand racetrack circuit of the Coast. At the series of races, which will begin in Vancouver on August 1, some of the finest blooded horses on the track today are to be found. San Jose will have an opportunity between September 9-14 to see these races at the San Jose Driving Park.

The chairman of the board, H. E. Hoff, recently resigned, and at the meeting Tuesday a committee composed of H. C. Doerr, O. P. Forbes and P. B. Payne was appointed to nominate a man for this position at the next meeting of the Board. It was decided to make the First National Bank of San Jose the Treasurer of the organization.

The plan is to hold the day attractions at the San Jose Driving Park, arrangements for which were completed yesterday, and the night attractions at the Auditorium Rink. At the park, besides the livestock and vegetable exhibits, there will be a series of horse races, automobile races and an aviation meet. The pure food exhibits will be in the Auditorium, as they were last year.

Thousands of letters are being sent to the manufacturers of the country, asking their support of the exposition, and a large number have already given a favorable reply.—Mercury.

GONE TO NATIONAL CITY.

Keefe & Spencer's string of thirty-six trotters and pacers, including fourteen head from A. Brown's stable at Woodland, was shipped Tuesday to San Diego. They will in the future be quartered at the Sweetwater track at National City, a suburb of San Diego, which track has been leased by Messrs. Keefe & Spencer for a period of five years. In the list of racing stock were such fine performers as Bernice R., Prince Lot, Adansel, Nada, and Wesos, all good money-getters on the circuit last season. The fine stallion, The Proof, which Keefe & Spencer purchased while on their Eastern trip, was left behind and will remain at the Woodland track, where he will make the season in charge of Mr. Keefe. The departure of Mr. Spencer removes from Woodland a most desirable citizen as well as a thorough trainer of horses, and San Diego's gain is distinctly Woodland's loss.—Democrat.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DOWITT.

A WINTER'S DAY IN KASHMIR.

A bright crisp January morning with a couple of inches of snow outside my hut and a roaring fire to keep me company inside, found me as outwardly comfortable as one could wish, though still longing for time to fly a little faster and for something to turn up which would break the monotony of the last few weeks I had been spending in the wilds by myself. Not that I had nothing to while away the time with, for my forest work kept me out of doors most days. But after snow such as we had the day before, followed by the most awful slush, which a warm Indian sun creates, even at a height of 6000 feet, one does not feel inclined for walking about much. I was wondering what new program I could make up for the day, besides snowball fights with all the "moonshes," chuprassis and naukers I could lay my hands on, and sliding, at which gentle art none but a Goorkha "moonshes" showed any signs of grace, all the others that joined in performing the most wonderful spreadeagle antics, it has ever been my lot to behold; but this diversion was generally followed, like most good things, by my being told the next day, that so and so was still suffering and unable to walk, from the effects of the hard knocks received the previous day.

I was aroused from my wandering thoughts this morning, however, by the subdued voice of my hearer behind me: saying "Sahih, one man has brought news of shikar," and on turning round in my chair, I beheld a villager, who had followed on the heels of the bearer, and who soon unfolded his tale. The "khabah" was to the effect that a dog had been walked off with the night before by a leopard, which he said was also accompanied by a kuh and which the villager informed us we would be sure to get, by following the tracks which could not lead very far. He added that the quarry was as good as bagged, after eating such an unclean animal as a "jungli kutta." The after effects of such a meal are believed by all villagers to interfere with Mr. Spots' agility and make him long for a good undisturbed sleep in the open, near by his well disposed of supper, from which, however, he is generally aroused by a moh of howling villagers, who have followed on his tracks, with tom-toms, spears, swords, and "hunducks," and in fact anything capable of doing damage to all except the guilty animal pursued, and for whom they are brought out. Spots, when aroused from his slumbers, generally slinks off, making a road for himself, through his would-be antagonists, who scatter right and left to give him more room, but immediately he is out of reach, he is followed up with loud "tom-toning," and letting off guns regardless where the pieces of nails, stones, lead, and copper loaded in them may fly to.

However, I am digressing, so to go back again to the worthy villager, I first took good care to find out from him if the whole hillside had yet been called out to join in the fray, as if I was to follow on the tracks of the wily panther, I did not mean to be followed myself by a howling moh of warriors, such treatment having been accorded to me on a former occasion. Being a small and out-of-the-way village, from which the man bled, I did not besitate in believing him when he said that he had brought me the "khabah" first and that no army had collected, but I knew the news would not take long to travel to the other villages near by, who would soon assemble on the warpath. So putting on my goat hair socks, and leather "chuplies," I followed the villager for about two miles through snow and slush to his village, being accompanied by a Goorkha who also took good care to bring his gun, he himself being a very keen sportsman, and with whom—long may he live—I have enjoyed many a good day's outing.

On arriving here I was pleased to find only a few men about. As they were not wanted, we were soon on the tracks of the panther, who, only about fifty yards up the hill, had been joined by another which the villagers informed us was the "hutchah" as shown by the tracks. After following the tracks for some distance through six inches of snow and low bushes, we suddenly came upon the remains of the dog under some brushwood, all that was left then being the lower part of the jaw, and a few hairs. The tracks of the two panthers, however, were quite fresh, and they could have only moved off on hearing us coming up the hill from below.

We were soon following the tracks again which after some distance separated, one making slightly up the hill and the other across. My Goorkha companion taking up the latter track, while I followed the former, and we were soon both in hot pursuit. We could not have followed—each his track—for more than a couple of hundred yards, when the tracks again joined each other, and the Goorkha and myself met almost simultaneously where the tracks converged, and were following up again when we came to the edge of a cliff, where they again parted, one going below the cliff and the other following along the ridge.

Here we held a consultation as to which to follow, but on being informed the next instant by the villager that there was a small cave underneath the cliff, in which, in all probability Spots had betaken himself, we decided on the plan of surrounding him

there, and then getting him driven out to afford us an open shot, while we placed ourselves on the opposite side of the nullah.

Having decided on this plan we were now at a loss what to do for men to drive the beast out from below, and also to prevent Spots from hetaking himself when roused into thick cover close by. The villager who brought the news being the only man with us we sent him hack double quick, to call up men for this purpose. We then sat down in the snow, to wait patiently till they should turn up. In about what seemed to us ages, but which was not in reality more than a few minutes, the villager returned accompanied by two men which he said were all he could find.

This was rather a blow to our "handohust" at first, as we didn't reckon on having any difficulty in obtaining men, and wanted as many as possible for shouting, and to guard likely places leading to thick jungle which it would be Spots' first aim to reach. To make the best of a bad job, however, we placed the two new arrivals on the top of the cliff with strict injunctions to keep "chup" until we had settled ourselves across the nullah, when, at a given signal, they were to hurl rocks, lumps of snow, and anything they could lay their hands on, down to where Spots was supposed to be in hiding below. We ourselves then proceeded cautiously to go across the nullah, baving to make a slight detour up the hill owing to bad ground. We had gone about half way and almost reached the nullah, when we suddenly came upon the tracks of the panther, leading up the hill, the panther who was all this time supposed to be lying up in the cave.

This looked as though we had been badly "had" and I was nearly giving up the chase—knowing that they must have got a good start ere this—when a thought struck me to go down and have a look at the cave, in case it should serve its purpose at some later date. We forthwith started down the hill, following the villager, who then had as little thoughts of shikar as I expect we had, and I was myself thinking what a wretched wild goose chase it had all been. My thoughts were suddenly brought to their senses, by a sudden "kuff—kuff—kuff—kuff"—kind of a noise which seemed to leap into being from the very snow in front. A hear's lower jaw was next revealed wagging from side to side from underneath a fallen tree directly ahead, and not four yards above us. She evidently had not seen us and seemed only to have got wind of the fellows on the cliff above, for her nose was turned in that direction. I had put my Winchester up to my shoulder and was on the point of firing when the Goorkha at my side quickly brought down the muzzle, and in hasty words said: "No sahih, don't shoot, hut come across the nullah," he forthwith started to lead us across, the villager being second—with 12 bore loaded with hall and myself bringing up the rear. We had not taken five paces when on looking round I discovered that the hear had spotted us and had already started in pursuit. My one thought was "now or never," and yelling out "khabador" as a warning to my two followers, I dropped on one knee expecting the worst.

I had only time as it seemed, to do this, when the hear was practically upon us. The next instant my rifle had gone off, the mark intended for the bullet, being the broad chest of the hear, which was then not two yards off. I was astonished to see her drop to the shot, as one brained, and to crown all she was prevented from sliding on the top of us by some small undergrowth in which her arms got locked. My next feeling was of being pulled violently by the wrist to one side; this was, the Goorkha again, who quickly brought me to my senses as regards the foolish position I was in, for when he caught me, I was still kneeling on one knee, and the suddenness of the whole thing, with the hear lying two yards above, hadn't struck me. The fact was, it was all so unexpected, and I was so surprised at seeing the beast drop, that I had no thought of the awkward position I occupied.

The Goorkha having got us to a level with hruin then put her hors de combat with another bullet in the head, for she was then only looking dazed and foolish. My attention was then attracted by the villager who was yelling "Maro Sahih, Maro" at the top of his voice a dozen yards away.

I discovered afterwards that on my warning note of "khabador," this worthy individual had acted up to it only too well for himself, for the Goorkha, who was in front of him, was sent sprawling by the villager in his haste, but recovered himself in time to put one shot in at the hear, which he must have done simultaneously with mine, for we discovered that his first shot had ripped the flesh in between its ears, whilst my lucky fluke had somehow caught her just above the left eye. We were soon joined by the two men on the top of the cliff, and were told by them that after the reports of the guns, a fair sized kuh had holted from the place the bear had been lying up in, and on our visiting the place this proved to be correct, and of course accounted for hruin's behaviour; for hears, I hear, will seldom charge as many as three men even though they be above them, unless, they have culs to protect.

A roaring fire was soon ahlaze and after sitting round it for about twenty minutes, in order to give

hruin time to "cool down"; we started her down the hill and shortly afterwards had her tied to a pole between two-coolies and were on our return journey. I broke the monotony again that night by shooting four fine foxes over the bear's carcass which had been deprived of its skin, and at length retired to bed well satisfied with the day's work.

ANGLING BRIEFS.

Steelhead angling has been persistently practiced by one branch of the local angling fraternity with varied luck for the past ten days. Paper Mill creek tidewater near Point Reyes station has the call for the present on a majority of the rod wielders. A week ago the visitors at that resort were numerous and enthusiastic. Large steelhead were not apparent to any great degree. Smaller, eight and ten inch, trout, however, were plentiful enough to keep the rodsters in good humor. Among the anglers present were: Mr. and Mrs. H. M. Street, J. E. King, Miss Anna Delmas, James Watt, Mr. and Mrs. Z. V. Howe, Mr. and Mrs. H. Herger, Frank Smith and others.

Russian river data has not been of an overly encouraging nature. Julian Eisenhruck visited Duncan's Mills a week ago, but his tryout of the Austin pool failed to produce the desired results.

A large run of steel head was reported in the Pescadero lagoon this week. Rufus Kingman had the experience of hooking a big trout that fought for forty minutes. Darkness meanwhile coming on the fish broke away. Clarence Heywood, John Boshoff, H. Frey, J. H. McCormick and other San Mateo county sportsmen have had fine luck in the lagoon.

William Copper advises that the San Lorenzo tide-waters at Santa Cruz are full of steelhead trout at present. A good haul of large trout was made last Sunday.

The Supervisors of Santa Cruz county are considering a proposition of transferring the Brookdale hatchery and the Scott creek egg taking station to the State Fish and Game Commission. The county has been carrying on the Brookdale hatchery for several years at an expense of from \$2000 to \$4000 annually. The output has been from 2,000,000 to 3,000,000 trout fry every year, which have been liberated in the various streams of the county.

The hatchery was deeded to the county by Judge J. H. Logan with a reversionary clause. So long as the establishment is operated as a trout hatchery the property will not revert to the donor. An effort will be made to have the hatchery kept open the year round if the Commission assumes control.

James Thomson, an ardent and enthusiastic striped bass fisherman, who, it will be remembered, gave a tug, several months ago, a game battle, has learned to use the fly rod with the left hand. Last summer his catch of a seven and a half pound rainbow was a Truckee record.

Operations in the striped bass line were conducted by about three score rodsters at the Wingo dam distributing points last Sunday. Eleven bass, the largest a nine pounder, made up the crop.

The bass chasers included among the expert regulars: Charles P. Landresse, James S. Turner, Will Turner, Louis Gotthelf, Joe Doher, Jack Duckrell, Terry Evans, Emil Accret, Frank Marcus, Joe Gahorini, Joe Harding, James Lynch, Tim Lynch, Charles Urfer and Mrs. Urfer and others.

Last Monday the tale was a different one. Ed Cunningham is reported to have taken four bass, 18, 12, 16 and 20 pounds respectively—a remarkably fine catch for one day's fishing.

This catch was made near Turkey point. Such being the case, the Wingo sloughs will be well studied with fishing rods today—the tide, by the way, being very favorable, with high water there at 6 a. m.

San Antone creek, near Burdell's rendered up a few small striped bass last Sunday. Better luck was awarded those who fished in the Schultz slough confluence, where Harry Hook caught a fifteen pounder, Hugh Draper a fourteen pound fish and J. C. Wallace two small bass.

FEDERAL GAME LAWS INTRODUCED.

Officials of the American Game Protective and Propagation Association have just returned from Washington, where they arranged for a hearing in the matter of a national law for the protection of migratory game birds. Three bills for this are now pending.

Conferences were held with Senator McLean and Congressmen Weeks, Anthony and Lamh. It is announced that the bearing will be given as soon as the appropriation bills are out of the way.

It is generally believed that nothing short of Federal regulation will save the country's migratory birds, and it is of the greatest importance that all those interested in the measure arrange to attend the bearing, the date of which will shortly be announced.

Elmer E. Shaner, secretary-treasurer of the Interstate Association, writing the 14th inst., requests us to:

"Please announce to the readers of the Breeder and Sportsman that the Seventh Pacific Coast Handicap Tournament will be held at Portland, Oregon, August 27, 28 and 29, under the auspices of the Portland Gun Club. There will be \$1,000 added money, and the winner of first place in the Pacific Coast Handicap will be guaranteed \$250 in cash and a trophy."

Drink Jackson's Napa Soda.

HUNTING NOTES.

Duck hunters are in a bit of a quandary for tomorrow's shooting. In most of the marsh districts the ducks have dwindled down to straggling visitors or small flocks. Reports from the shooting centers at Newman, Firebaugh's, Gustine, Los Banos and other valley points are that both ducks and geese are very plentiful. Near Firebaugh's splendid shooting has been in vogue for the past ten days.

At nearly all of the Suisun gun club preserves last Sunday and during the week limit bags of ducks were few. Last Sunday the shooters on the north end grounds had fine sport.

Today and tomorrow will practically wind up the duck shooting season for local sportsmen. Numerous gun clubs have already closed the club preserves for anything like the regular weekly shooting operations.

Around the bay counties marshes the sport for a week past has been irregular in results. At some resorts good sport has been available, at others again, a pair or two of ducks was the hag for a morning and evening visit to the blinds.

Walter D. Burlingame bagged a limit on the Jacksnipe preserve. Other gunners in that section of the Suisun marsh also had excellent shooting last Sunday. Bob Murdock, Kit Chinn and Burlingame were at the Jacksnipe ponds last Friday.

Near Cygnus and Teal stations the sport was indifferent a week ago. The clubs in that district have stopped baiting the ponds. This and a large area of tule marsh burned over kept the quackers away.

Otto Feudner received word last Wednesday from Firebaugh that the best duck and goose shooting this season was on tap at the Lone Willow Gun Club preserve. Teal ducks were fat and juicy by reason of a tule stub diet. Sprig are getting in better condition. Widgeon are still in good shape, the birds are yet on a grain regime. Mallards in the valley section are rather poor.

Good shooting prevails at all of the valley resorts. Two days' shooting at Gustine by Arthur T. Ehrenpfort and Gus Russ produced duck limits, and forty-three wild geese. That country is now literally alive with geese.

One of the best duck shooting resorts on the Alameda marsh is that of the Buffalo Gun Club, located on the Curtis tract, near the bay shore, west of San Leandro. Lieutenant August Westphal's score for the season counts up 462 ducks, mostly sprig. Billy Eicker has enjoyed equal good sport. The club has had the ponds for the past six years, and recently received a three years' renewal of the shooting privilege.

At the Widgeon Gun Club's ponds near Visalia one day's shooting recently produced sixteen limit bags of ducks. Several San Francisco and Hanford sportsmen were present. The shooting has been good all season on the club preserve, there having been few club shooting days when any of the members out failed to secure a twenty-five limit bag. Teal ducks have been most numerous recently.

"California for the Sportsman" devoted to hunting and fishing, is accepted by sportsmen as a thorough and practical booklet, descriptive of the fish and game of this State. The expert and technical data are furnished by Al. M. Cumming, a well-known local devotee of the shotgun and rod. The booklet is edited by Allan Dunn.

During the pleasant days recently bay shore shooters along the east side of San Pablo bay have been almost deserted by the "cans" and bluebills.

Two arrests were made by Deputy Game Warden Emerald and Thomas during the past week for shooting ducks from a power boat in motion. This particular section of the game laws which makes the pursuit or killing of ducks from a power boat, a misdemeanor is inoperative if the craft should be anchored and those on board were popping at flying ducks.

Saturday morning last Roy Mayes and Archie Ratenbury of this city drove to the marshes about 14 miles east of Dixon for a day's shoot. At 2 o'clock in the afternoon they had to their credit 177 geese and 18 ducks. The weight of the game was more than 700 pounds. This is a record shoot for two men in this section of the State.

A Squarehead Misunderstanding.—A good story is told at the expense of several prominent members of a Suisun duck shooting club. One of the club shooters concluded to continue his sport at another club. Early in the season he had made for him two very comfortable seats. These cosy chairs were part of the equipment of his blinds at the old club ponds. The keeper of the second preserve was an honest, painstaking but rather thick-headed individual. One who described a double kill as "two shots mit one aim." He was instructed to go over to the old quarters and bring back the seats. Meeting his fellow-keeper, a man of like kidney, and stating the object of his visit, somewhere in the colloquy "seats" were changed to "sheets." The visitor insisted that he had been sent for "all dem sheets." His mission was not doubted, the old keeper was not aware of the ownership of the "seats," and took his fellow's request in good faith. The result was that the beds in the clubhouse were stripped of sheets and a package of clean sheets that had arrived the same day were all made up into a bundle and packed about five miles away to the other clubhouse. That afternoon several club members and guests arrived from the city, gentlemen accustomed to the best in the linen line. Great was their surprise and disgust upon retiring in their comfortable quarters, when they were told why the beds were denuded of sheets. What one duck hunter said could better be told in a whisper.

NATIONAL RIFLE ASSOCIATION NOTES.

At a meeting of the executive committee of the National Rifle Association, held at the office in Washington on Wednesday, February 7, the following organizations and individuals were elected to membership in the association:

Life Members—Brig. Gen. Theo. Schwan, U. S. A., retired; Mr. M. Merillon, president de L'Union Internationale des Federations et Associations Nationales de Tir, Paris, France; Senor Don Antonio del Pino, president Tiro Federal Argentino, Buenos Aires, Argentine Republic; J. H. Cumpston, Dallas, Tex.; W. S. Park, Las Vegas, Nev.; Hon. Butler Ames, Boston, Mass.; William B. Coit, Buffalo, N. Y., and J. H. Carl, Gilroy, Cal. Regiments—Ninth U. S. Cavalry. Third Class (Military) Organizations—Company E, Third Wyoming Infantry, and Company I, Tenth Pennsylvania Infantry. Civilian Rifle Clubs—California Grays Rifle Club, San Francisco; Brooklyn (N. Y.) Naval Militia Rifle Club, Bucyrus (Ohio) Rifle Association, Hayward (Cal.) Rifle Club, Payette (Idaho) Rifle and Revolver Club, Boston (Mass.) Revolver Club, Winnemucca (Nev.) Rifle Club, Ancon (Canal Zone) Pistol and Rifle Club, and Fremont (Ohio) Rifle Club. College Clubs—Kansas University Rifle Club, West Virginia University Rifle Club, Norwich University Rifle Club. Schoolboy Rifle Clubs—Eastern High School, Washington, D. C., and New Mexico Military Institute.

The ambitious plans of the association to organize and send two rifle teams abroad this spring will mean strenuous work to collect the fifteen thousand dollars necessary for the sending of these teams.

Subscriptions have begun to come in. The first to be heard from is the well known shot, "Billy" Martin of New Jersey, who writes that his regiment, the Second Infantry, will subscribe one hundred dollars. Two hundred dollar subscriptions have been received from the Remington-U. M. C. Company and the Winchester Repeating Arms Company. General Crozier, Chief of Ordnance, U. S. Army, sends in his check for five dollars and Mr. J. H. Cumpston of Dallas, Tex., one for ten dollars.

Plans are under way by several regiments who have adopted the suggestion sent out to the regiments in a circular letter by the association recommending the holding of a review or other entertainment in the armory for the benefit of the fund.

The details have been completed for the ammunition tests which will be held at the United States Marine Corps range, Winthrop, Md., March 26 and 27.

The officers for the Argentine team have been selected. The team captain will be Colonel Charles D. Gaither of Maryland, who is well known by all the riflemen of the country, he having been in charge of the Maryland State Rifle Team at the National matches for a great many years. The team adjutant will be Captain James A. Moss of the General Staff, U. S. Army, one of the best known linguists in the army. He is from Louisiana and French is almost his native tongue. He has also been a teacher of Spanish in the army school and will be of invaluable assistance in representing the United States at the Congress of Sharpshooters to be held at Buenos Aires at the same time as the tournament, and in the conferences of the team captains preliminary to the matches.

The Army, Navy and Marine Corps have expressed their intention of nominating candidates to try-out for these teams. Reports are beginning to come in from the states as to the number of representatives. West Virginia will send three, California two, and the indications are that the representation will be very general.

GOSSIP FOR SPORTSMAN.

Pheasants and Partridges Thrive.—According to reliable reports from different sections of this State, the pleasing information for sportsmen comes that the ring necked pheasant, or as it is called in Oregon, the Denney or Mongolian pheasant, has made itself at home and is thriving and increasing.

In one section of the San Joaquin valley a stretch of about seventy miles long, from Kings river, north of Hanford down to the Tule river, at Porterville, these beautiful game birds have increased to quite an extent.

Deputy Commissioner D. L. Hoen, of Visalia, reports that he counted seventy-five pheasants in one covey and has seen as many as eight different flocks in one day. The district referred to here comprises every conceivable kind of country—vineyards, orange groves, orchards, stubble fields, pasture lands, chaparral, rough foothill country, etc.

The birds seem to prefer the orange groves. They are most partial to an insectivorous diet. The fertilizing agents used by the orange growers produce an abundance of insect and grub food. The valley farmers and ranchers give the pheasants all kinds of protection, for the bird is regarded as the "farmers' friend," an economical deduction the value of which has been proven.

The ringneck here seems to prefer an open country instead of seeking a heavy-cover district. At present they are rarely shot at, the general protection being keen and well observed by all classes. What tactics these pheasants will adopt when the close season is taken off and the shotgun brigade starts something is a problem. It is claimed that the assertion that these pheasants fight the valley quail and drive them from their vicinity is erroneous, as the two varieties get along seemingly well in the same territory.

Nine pairs of pheasants were liberated five years ago by J. C. McCabe and Dr. H. Hardiman of Porterville, the original planting being sufficient to make this fine showing at present. The birds have be-

come, through non-molestation, very tame, and they are to be found within half a mile of Visalia.

Hungarian partridges that were liberated in that territory did not remain long, but worked up in the high hills and timber growths.

Ducks a Nuisance.—Talk about being thick! Well, here is a story where a farmer found the game birds so thick that they ate the grain during the night which he had sowed during the day, and he was forced to set off fireworks during the night to frighten them away. Listen to the facts:

S. Lyons, a pioneer rancher near Brawley, after an unsuccessful war upon the myriads of wild fowl which raided his wheat and barley fields at night, resorted to fireworks to scare away the marauding quackers.

Hunters, scarecrows and trap guns failed to keep the birds away from his crops at night. In fact, the birds increased in numbers from week to week despite the slaughter.

As a last resort he purchased an assorted lot of fireworks. Armed with this ammunition, he went into the fields after dark, where thousands of ducks were eating his crops and raked the greedy hordes of web-feet with huge skyrockets and Roman candles. The experiment was successful, for since the initial bombardment the wild ducks have given that district a wide berth.

Mudhen Battue.—The Raisin City Gun Club of Fresno this week announced its fourth annual mudhen and goose shoot at Oxalis. The date set is Sunday, March 3. The special train will leave the Fresno depot at 7 o'clock in the morning and return about 9 o'clock in the evening. At 1 o'clock a grand barbecue and mulligan stew will be served free of charge at the clubhouse, 3 miles from Oxalis. These annual shoots are looked forward to with a great deal of interest by every man who pulls the trigger of a shotgun.

Several coyotes are always killed during these yearly outings. One of the features is to be a mudhen fight and the presence of Charley Shaw's mudhen band of ten pieces. Photographs will be taken of the party before and after the mulligan stew is devoured. Mudhens and geese are said to be very plentiful on the West Side and March 3 will probably witness the most successful outing in the history of the valley.

Here and There.—The superintendent of the aching soul department is responsible for the following:

The "cure" has broken out in many places. We have had starvation "cures," stuffing cures, no work cures, water cures, sun and air cures, electric mud, steam, music, color, tabloid and grape-put cures, but no one until quite recently has ever seriously advanced the proposition that the real cause of all the ills to which human flesh is heir lies in our clothes. Microbes, as one knows are hotly pursued by the faculty in everything that we eat, drink or are otherwise merry with, but hitherto they have been so kind as to leave us our raiment. It has now however, been discovered that if we went back to the times before even the Joyce Island epoch, and discarded all clothes, and just wore a few pretty beads or spats and a cigarette (according to sex) we should be doing a vast deal towards improving the health of the present generation, and building up a race of giants for the future. When we were first created the tailor and the dressmaker were never so much as thought about, and it is advanced that if we discarded clothes we should benefit ourselves both physically and mentally, for we should be far more hardy and we should forever do away with the mental worry of the tailor's and the dressmaker's "little account." It is well enough to suggest these things but who is going to start them? Even the medicine men who propose them have not, so far as one knows or hears, been sufficiently brave to take the first plunge. He would require the courage of the man who first tackled an oyster off the hard shell to walk abroad in nothing more than his birthday suit.

Another thing that has recently been discovered is that you should not yourself, nor should you allow your guests or your friends (there is as one knows a considerable gulf between the two classes) to talk about unpleasant subjects at meal times. Gruesome descriptions of symptoms, and how they felt when they caught their last chill, or what they took when they were last suffering from a pain should be strictly taboo. It would, as we know, make many an informal dinner party especially, as a conversational dessert, but we are all for this reform ourselves in this land of delicate appetites. It is emphatically not invigorating, to say no more than this, when you are not feeling quite the thing yourself—even if you are not downright "ikk"—to be told all the various stages of your friends' diseases and the agony through which they have passed. Often we ourselves have in these circumstances wished that dinner parties began with the old brandy, and ended with ox-tail soup.

The annual meeting of the American Trotting Register Association was held in Chicago at their office last Wednesday. The following directors were elected to serve three years: Wm. Russell Allen, J. W. Bailey, L. Brodhead, W. C. Brown, H. K. Devereux, Sterling R. Holt, P. P. Johnston, W. H. Knight, Wm. Simpson, Paul C. Wilson. All these were re-elections, except H. K. Devereux, who takes the place of the late Norman J. Colman. John Donovan was elected to fill the one year's unexpired term of the late Geo. Campbell Brown. Next year's meeting will be important because it will then be decided whether or not to rescind all Standard rules except rule 1.

AT THE TRAPS.

Idaho Falls, Idaho, February 15.—Fred Willet's high score today in the trap shooting tournament gave the San Francisco team the victory over Portland by a margin of five breaks. The shoot, which was given under the auspices of the Idaho Falls Gun Club, was held under unfavorable conditions, the temperature being uncomfortably low and a high wind prevailing. Score:

San Francisco 186—Willet 97, Randlett 89.
Portland 181—G. Holohan 91, Morgan 90.
Spokane 178—Poston 90, Acker 88.
The teams shoot at Ogden tomorrow and Saturday and Sunday at Salt Lake City.

Ogden, Utah, February 16.—High scores marked the touring tournament shoot held here this afternoon in which the Spokane team was victorious by a score of 191 to 190 for the San Francisco team. Willet was high man with 98. Score:

Spokane 191—Poston 94, Acker 97.
San Francisco 190—Willet 98, Randlett 92.
Portland 176—P. Holohan 92, G. Holohan 84.

Salt Lake City, Utah, February 17.—By winning the postponed Boise shoot of the northwestern tournament, which was held here this afternoon, the Portland trap shooting team put Spokane out of the running for the trophies, which have been won by the San Francisco marksmen. All the tourists scored better than 90 per cent.

The regular Salt Lake shoot will be held tomorrow morning, and this will end the tournament. The scores today were:

Portland 191—P. J. Holohan, 94, Guy Holohan 97.
Spokane 187—Poston 94, Acker 93.
San Francisco 186—Willet 93, Randlett 93.

Salt Lake City, February 18.—In the face of a high wind, accompanied by snow and rain, the touring trap shooting teams wound up the northwestern tournament, with the Spokane team winner of the last event. San Francisco is victorious in the series. That team finished with a percentage of 91.5 for 50,000 birds.

Fred Willet, although he shot his poorest score of the trip today, finished with a grand average of 94.1 for the long tour. Portland, although third in number of victories, was second in general average with 90.1. Spokane's general average was 88.6, though Poston broke 90.5 per cent of his 2500 targets in the tournament.

Pete Holohan was second to Willet with 90.7 per cent. Today's scores were:

Spokane 176—Poston 93, Acker 83.

Portland 169—P. Holohan 83, G. Holohan 86.
San Francisco 168—Willet 83, Randlett 85.
San Francisco won eleven events, Spokane nine and Portland five of the twenty-five shoots held since the tour began, January 15.

The Exposition City Gun Club held the local opening blue rock shoot for the season at the Presidio trap grounds on Thursday. An account of which will appear in our next issue.

Meridian Gun Club members shot live birds and broke clay pigeons last Sunday. The proposed match at 50 birds between Harry Gordon of Saratoga and N. H. Cadwallader of San Jose did not come off.

The club is trying to bring off a 5 man team match with either Guadalupe, Madrone or Saratoga Gun Club shooters.

Roy Coykendall, who will be remembered as one of the crack shots of the old Garden City Gun Club team, faced the traps with the boys, his first appearance in the game for fifteen years.

Two club events were shot, 10 bird pigeon matches, \$5 entrance. Hogg and Sillick with straight scores divided the purse in the first race; Cadwallader's clean score won the money in the second match. The latter shooter was high man in the clay pigeon shoot. The scores follow:

| | | | | | | | | | | | | | |
|-------------------|-------|---|---|---|---|---|---|---|---|----|----|---|----|
| R. C. Hogg | | 1 | 2 | 2 | 1 | 2 | 1 | 2 | 2 | 1 | 2 | — | 10 |
| Clem Arques | | 2 | 2 | 2 | 1 | 2 | 1 | 2 | 1 | 0 | — | 9 | |
| N. H. Cadwallader | | 1 | 1 | 2 | 0 | 2 | 2 | 1 | 2 | *— | 8 | | |
| R. Coykendall | | 2 | 0 | 0 | 2 | 1 | 2 | 2 | 0 | 2 | 1— | 7 | |
| W. Sillick | | 2 | 2 | 1 | 2 | 2 | 1 | 2 | 2 | 1— | 10 | | |

| | | | | | | | | | | | |
|-------------|-------|---|---|---|---|---|---|---|----|----|---|
| Hogg | | 2 | 2 | 1 | 2 | 2 | 1 | 2 | 2 | 0— | 9 |
| Cadwallader | | 1 | 2 | 1 | 2 | 2 | 2 | 1 | 2— | 10 | |
| Arques | | 2 | 2 | 1 | 2 | 1 | 1 | 2 | 0 | 2— | 8 |

* Dead out.

Bluecock shoot at 36 targets—Freeman 24, Allen 22, Arques 31, Sutherland 22, Cadwallader 32, Gordon 27, Coykendall 23, Wm. Perry 23, Litchfield 28.

The United States Cartridge Company, of Lowell, Mass., has been elected to membership in the Interstate Association.

ANGLERS ELECT OFFICERS.

At the annual meeting of the California Anglers' Association Monday evening the following officers were elected for the ensuing year: President, Geo. A. Wentworth; 1st Vice President, Dr. Geo. A. Wood; 2d Vice President, Edward Bosqui; Treasurer, H. B. Gosliner; Secretary, Ernest C. Boucher; Board of Directors—L. H. Eaton, Floyd Spence, H. A. Thomson Jr., James Watt, A. J. Baker, Hugh Copeland.

SAN FRANCISCO SHOW.

Entries for the fourteenth annual bench show of the San Francisco Kennel Club closed Wednesday night. At this time we are not able to give the exact number, but indications pointed to as large an exhibit as the club had last year, despite the efforts of the "goo-goo" to impede the show.

Rem.U.M.C. Won All the Way.

At Pinehurst, N. C., recently, the first big trap shooting tournament of the season was held. Remington-U.M.C. Eastern factory loaded shells were used by the winners of practically every event.

The trap-shooters on the Pacific Coast will soon have the same opportunity of obtaining these splendid steel-lined shells, which are being used by nearly every well known trap shot in the East.

At Pinehurst, N. C. First professional average, L. S. German 586 x 600 singles, shooting Remington-U.M.C. steel lined shells. First amateur average, G. S. McCarty 587 x 600 singles, shooting Remington-U.M.C. steel lined shells. Second amateur average, H. W. Kahler 587 x 600 singles, shooting Remington-U.M.C. steel lined shells.

At all targets: First, H. W. Kahler 766 x 800, shooting Remington-U.M.C. steel lined shells. Second, L. S. German, 763 x 800, shooting Remington-U.M.C. steel lined shells. Third, G. S. McCarty, 755 x 800, shooting Remington-U.M.C. steel lined shells.

Preliminary: First, F. A. Ranney 93 x 100 (18 yds.) shooting Remington-U.M.C. steel lined shells. Second, R. L. Spotts 92 x 100 (19 yds.) shooting Remington-U.M.C. steel lined shells. Third, R. B. Ward 91 x 100 (18 yds.) shooting Remington-U.M.C. steel lined shells.

Midwinter Handicap: First, H. W. Kahler 98 x 100 (21 yds.) shooting Remington-U.M.C. steel lined shells. Second, Wm. Ridley 97 x 100 (20 yds.) shooting Remington-U.M.C. steel lined shells. Third, Henry Powers 95 x 100 (18 yds.) shooting Remington-U.M.C. steel lined shells.

At Houston, Tex.: Southern amateur championship, Houston Chronicle Trophy, won by J. R. Graham 93 x 100, shooting Remington-U.M.C. steel lined shells and a Remington-U.M.C. pump gun.

Remington-U.M.C.—the perfect shooting combination.

Red "W" Loads.

The Winchester Repeating Arms Company announces on the inside front cover of this issue an important departure in the interests of Coast sportsmen.

GOOD ONES FOR SALE.

PAL (2) 2:17½, standard bred trotter, 5 years old. Sired by Palite 45062, dam Lorna D. by Bayswater Wilkes; second dam Bee Sterling (dam of 4 trotters with records better than 2:15 and Nat Higgins, trotting (3) 2:20) by Sterling; third dam Flash (dam of 6 in the list) by Egmont. Pal will be a good purchase for anyone looking for a young stallion of good breeding, good individuality and all qualities of a race horse.

NAT HIGGINS, 4 years old, record 2:20 trotting made as a three-year-old. Sired by Palite 45062; dam Bee Sterling, breeding same as above.

SORREL MARE, 4 years old, with a time record of 2:24½ made pacing as a three-year-old. With 90 days' work showed an eighth in 16 seconds. Goes light, no hoppers. By Palite 45062; dam Babe by Dawnlight; second dam Bee Sterling, as above. A full sister to this filly stepped a mile last year in 2:14 at San Jose. This mare is handsome, kind, and gentle and will step a mile in 2:10.

TWO-YEAR-OLD sired by Palite; a good-gaited trotter, entered in the Futurity Stakes and can step fast. Dam Paprika, who stepped a mile in 2:16 as a three-year-old, by Oro Belmont 2:15½; second dam a producer by Anteeo; third dam by Alexander; fourth dam by Williamson's Belmont. A good prospect in the Futurity Stakes.

THREE-YEAR-OLD CHESTNUT GELDING, full brother to the above, trotted a mile in his yearling form in 2:43 and is trotting fast now. Entered in the Futurity Stakes. Another good prospect.

FOUR-YEAR-OLD FULL BROTHER to the above. This colt stepped a mile as a two-year-old in 2:31 with a short season's work.

LOULIA, a standard bred 4-year-old filly by Nushagak, sire of two 2:10 performers, dam by Nutwood Wilkes, dam of 3 in the list; second dam Woodflower (dam of Prince Ansel 2:20 at 2 years old and Seylex 2:15¾) by Ansel; third dam Mayflower 2:30¾ (dam of Manzanita 2:16 and Wildflower) by St. Clair. This mare is soon to foal to McFadyen.

TWO-YEAR-OLD BROWN FILLY by Carlok; dam Truth (trial 2:12 at 4 years) by Searchlight; second dam Bee Sterling, etc. This filly is entered in all of the stakes and is trotting nicely now with the short workouts she has had. She is very handsome and will make a valuable mare.

Besides the above, I have some nice yearlings, all entered in the stakes. Will be pleased to show the above to prospective purchasers. Call on or address **E. D. DUDLEY, Dixon, Cal.**

Economic conditions are sure to drive scrub dairymen out of business, but at the present time he is a millstone about the neck of the industry.

Progress in dairying is greatest where there is the most interest. Cow-test associations stimulate interest. Cow-test associations stimulate interest and progress.

Show Horse!
Race Horse!!
Sire!!!
The Standard Trotting Stallion
LIJERO 2:15 1/2 (Reg. No. 45923)

Sired by James Madison 2:17 3/4 (son of Anteo 2:16 1/4), sire of 15 in 2:30 list, including Brilliant 2:08 1/4, Tuna 2:08 1/4, Emily W. 2:10; dam Hilda (dam of William Albert 2:16 1/4, a sire, Saint Ambrose 2:25, and Lijero 2:15 1/4, a sire), by Nutwood 2:18 1/4, the world's champion broodmare sire; second dam Eudora by Volunteer, the greatest sire of race horses that ever lived; third dam by American Star 1 1/2, the sire whose daughters have produced 43 trotters and among them some of our greatest sires.

Lijero is a brown stallion foaled in 1902, stands 16.1, and weighs 1200 pounds. He sired Expedito (3) 2:14 1/4. Public trial at Chico as a four-year-old in 2:08 3/4. Lijero forced Prince Lot 2:09 1/4 to trot in 2:10 1/4 at Woodland in 1910 and was only beaten a head. He started in five races, won three and was second in the other two, and it gave Helen Stiles 2:08 1/4 and Prince Lot 2:09 1/4 all they could do to beat him in those two races. Very few horses have ever trotted in 2:10 with less work than Lijero. He should race in 2:08 this year. He has everything to recommend him as a game racehorse and as a sire he will undoubtedly be one of the best. He has size, style, color, conformation, disposition, the best of feet and legs, an iron constitution, and the purest of trotting action. His gameness is unquestioned. He is a perfect show horse and sires show horses. He and his daughter Expedito have won first prizes in the standard class at the California State Fair.

IDORA W., registered in Vol. XIX, Brown mare, 15.2 hands; foaled 1901. Sired by James Madison 2:17 3/4, dam Swift Tide by Albert W. 2:20; second dam Uarda (dam of Flowing Tide 2:14 1/4), by Echo; third dam Dewdrop. A sure breeder, due to foal to Lijero 1912. Entered in State Futurity and Breeders' Futurity Stakes.

TOOTS W., registered, Vol. XIX, Bay mare, 15.2 hands; foaled 1907 by Stam B. 2:11 1/4, dam Idora W. Due to foal to Lijero 1912. This mare is very fast, having worked quarters in 35 seconds as a two-year-old. Entered in State Fair Futurity and Breeders' Futurity Stakes.

JAMES H. DONNELLEY, b. g., 15.3 hands; foaled 1909. Sired by Lijero 2:15 1/4, dam by Hanford Medium; second dam Algerine (dam of Kelly Briggs 2:08), by Algona, etc. Entered in Breeders' Futurity and State Fair Futurity. With little work this one showed a mile in 1911 in 2:28, half in 1:10 and a quarter in 33 1/2 seconds. He will make a 2:12 or better pacer this year.

IYA W., b. f., foaled 1910; sired by Prince Ansel 2:20 1/4; dam Idora W. (which see). Entered in Breeders' Futurity, State Fair Futurity and Occident Stake. She is just broken to drive and will undoubtedly make a very fast mare. She is eligible for registration.

DR. JOHN, b. c. (1), by Palite (son of Nutwood Wilkes 2:16 1/4 and Palita, 2, 2:16); dam Toots W. (which see). Entered in State Fair Futurity, Breeders' Futurity and Occident Stake. A fine large perfectly formed individual, nicely halter broken.

These horses are all sound and in good condition, ready for anything that horses can be used for. The mare Toots W., if worked, will make a 2:12 trotter, or even a lower record than this.

On account of the many demands upon my time in my business, I find I cannot devote any to the development or care of these, therefore I have decided to sell them.

Any further information regarding prices, etc., will be given by addressing

F. E. WRIGHT,
318 K. St., Sacramento, Cal.

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

The great problem is to make plants and animals produce more food per acre and retain the bulk of fertility of the farm.

FOR SALE.
To Dissolve Partnership—This Grand Lot.

BEATRICE ZOMBRO, handsome bay mare, 16 hands high, weighs 1150 pounds. In seven years old and has a foal by Carlok in 2:07 1/4. With very little work she showed 2:20 speed as a three-year-old. Sound and gentle. Sired by Zombro 2:11; dam Atherine 2:16 1/4 (dam of Copa de Oro 1:59 and Crescendo, trial 2:13 1/4, etc.). Standard and registered; a regular breeder. Zombro mares are exceedingly scarce and there are few to be bought which are as well bred or perfect as Beatrice Zombro.

CONSELO B., by Del Coronado 2:09 1/4, a handsome three-year-old dark brown colt; good gaited; will do to race. Entered in Occident and Breeders' Futurity stakes. Only trained six weeks, trotted in 2:35, last eighth in 18 seconds. This colt is also out of Atherine 2:16 1/4 (dam of Copa de Oro 1:59, Staline 2:21 1/4, etc.) by Patron 2:14 1/4; second dam Athene (dam of 2) by Harold 4:13; third dam Minerva (dam of 2) by Pilot Jr. 12; fourth dam Beahante Mambribo.

FULTON G., by Carlok in 2:07 1/4; a two-year-old bay colt; good size and a perfect type. Entrance on him is paid up in Oregon Breeders', California State Fair's Occident and Stanford stakes and the Canfield Clark stakes. Good gaited and level headed. Came off pasture December 1st, trotted in 2:39 1/4, last eighth in 18 1/2 seconds on February 16th. Sound.

HASTINGS, bay stallion, four years old, by Del Coronado 2:09 1/4; dam Sappho 2:15 1/4 (trial 2:08) by Robert McGregor 2:17 1/4 (sire of dams of Jay McGregor 2:01 1/4, Gratian Boy 2:05, Elmore 2:08 1/4, York Boy 2:08 1/4, Blizzard 2:09 1/4, etc.); second dam Pauline (dam of Sappho 2:15 1/4 and three sires) by Ashland Chief 751, son of Mambribo Chief 11; third dam Rosena by Abdallah 15. With very little training trotted in 2:16 last year in July; he will trot in 2:10 this year if given an opportunity. Has no record. Is perfectly sound. Stands 15.3 hands, and when matured will weigh 1200 pounds. He is a remarkably handsome stallion of show horse type. Standard and eligible to be registered. His breeding is of the stoutest and best. By one of McKinney's greatest race winning and choicest bred sons, out of one of Robt. McGregor's fastest daughters, and she out of a famous speed-producing mare. Hastings should, when his days of racing end, be invaluable as a sire of handsome, stylish, perfect trotting horses.

WILKES BOY JR. 3858 1/2; brown stallion, sired by Wilkes Boy 2:44; dam Carona by Liberty Bell 2:24 (son of Bell Boy 2:19 1/4 and Prefix by Pan-coast, etc.); second dam Carna (dam of Aurita 2:25 1/4, Carnation 2:26 1/4 and Axewood, sire of 3) by Nutwood 2:18 1/4; third dam Candace (dam of Albert Lee 2:25, a sire) by Harold; fourth dam Fairy Belle (dam of 2) by Belmont 64; fifth dam Waterwitch (dam of 6) by Pilot Jr. 12, etc. As can be seen, he is one of the best-bred stallions in America. He is nine years old; stands 15 1/2 hands; weighs 1080 pounds. Has never been trained, but can show a 2:10 gait. Is good gaited; does not wear boots and does not pull.

As stated above, these horses are to be sold to dissolve a partnership and are priced extremely low. They can be seen at Los Angeles. For further particulars, address

W. G. DURFEE,
2010 So. Figueroa St., Los Angeles.

SPECIAL ADVERTISING.

Wanted, For Sale, and Miscellaneous advertising under this head will be set in nonpareil type (same type below) and will be published at the rate of 2 cents per word each insertion, or 6 cents per word by the month. Count each abbreviation and initial as a word.

CLOSING OUT.—Sixty head of young mares and mules. One four-year-old, two-thousand-pound Percheron stallion. Might consider some trades. N. FARNSWORTH, R. D. 3, Bakersfield, Cal.

FOR SALE.—Percheron Stallion (grade, 4 years old, bay, absolutely sound, good disposition, and sure foal getter; weighs 1800 pounds. I have seven of his weanlings to show how he breeds. Price \$1000. For further particulars address J. E. MONTGOMERY, Davis, Cal.

FOR SALE, CHEAP.—One registered stallion, sired by McKinney 2:11 1/4; 8 years old; sound. Also one imported draft registered stallion; weight 1800 pounds; 7 years old. Would consider trade on heavy mare or standard-bred mares, or fillies. Breeding and pictures sent to interested parties. Address D. A. BAKER, Hill P. O., San Diego, Cal.

STANDARD MCKINNEY STALLION FOR SALE.—Scott McKinney 33749, by McKinney, dam Primrose (great brood mare) by Sidney; second dam Brown Rose by Privateer; third dam Lady Baldwin by The Moor; fourth dam daughter of Ben Lippincott, son of Williamson's Belmont. Scott McKinney is a handsome bay horse; weighs about 1100; good gaited, and all his get are fine individuals and show speed. Price \$500. Has State license for this year. Address DR. M. F. SCHATLENBRANDT, 4051 20th St., San Francisco.

INFORMATION WANTED as to the present address of Monroe Berley, also known among horsemen as Fred Berley. Is about 65 years old and over six feet tall. He was employed at one time at Palo Alto and later worked for P. J. Williams. He went to Montana and came back to Sacramento some time ago. A liberal reward will be paid for finding him or for information that will lead to his discovery, as there is property waiting for his return. Address H. D. B., care Breeder and Sportsman, San Francisco, Cal.

FOR SALE—ZOBLOCK 2:18, pacing as a two-year-old; trotting 2:24 1/2 as a three-year-old; trial 2:19. He is a coal black stallion, five years old, stands 13 hands, weighs 1200, and one of the best made stallions in California. He should get a record of 2:12 or better this year. Is kind and gentle and is a half brother to the great trotter Zomblock 2:26 1/4, that worked last fall in 2:08 3/4 for his owner, R. J. MacKenzie, and will be on the circuit this season. Zoblock is a standard and registered horse, his papers having just been sent for. He was sired by Zolock 2:05 1/4 (one of the best speed producing sons of McKinney 2:11 1/4) and his dam is Madeleine Marshall by Demonio 2:11, second dam that great broodmare Mamie Comet 2:25 1/4 by Nutwood 2:18 1/4. He will be sold at a reasonable figure as the farm I have leased has been sold and I am compelled to get a new place. This is my only reason for selling Zoblock and the following:

TWENTY-THREE SKIDOO, standard and registered black mare, foaled 1906, sired by Nutwood Wilkes 2:16 1/4, dam Twenty-Third (dam of Sterling McKinney 2:06 1/4) by Director 2:17, second dam Nettie Nutwood (dam of Hillsdale 2:15) by Nutwood 2:18 1/4, third dam by Vick's Ethan Allen Jr., fourth dam by Williamson's Belmont. This mare is a fine sized, well made trotter, gentle, but has never been worked for speed. She is bred to be as fast as any.

STAR POINTER, filly (4), out of Trix (dam of Aerolite 2:07 1/2, Mona Wilkes 2:03 1/4, and four others) by Nutwood Wilkes 2:16 1/4. This filly is a nice big mare, stands 15.3 hands and is a free-legged pacer, was handled a little as a two and three-year-old. She was bothered with splints, so I did not work her. They have disappeared, and, as she never gave a lame step, they must never have been near a cord or tendon. From her breeding she should make one of the greatest of broodmares.

Dan Logan filly (3) out of the standard and registered mare Sophia (dam of Sophia Direct, p. 2:23 1/4, and Corona 2:27) by Robt. McGregor 2:17 1/4; second dam Orawood by Wildwood 144, third dam Lady Utterback by Mambribo Patchen Jr. Dan Logan, her sire, had a trial of 2:12 and is a full brother to the champion Jim Logan 2:05 1/4. This filly is a pure-gaited trotter, just been broken and will undoubtedly be a fast mare. Her breeding can hardly be excelled. For prices and further particulars address J. W. MARSHALL, Dixon, Cal.

KENDALL'S SPAVIN CURE

The old reliable remedy for curb, splint, bony growths, ringbone, spavin or any lameness. 55 years of remarkable results. 10¢ a bottle, 60¢ a dozen. Sold at all drug stores. Ask for Free Book, "Treatise on the Horse." Dr. E. J. Kendall Co., Esopus, N.Y.

HOMEPHONE PRAISED.
A new subscriber writes the Home Telephone Company under date of October 23, 1911:
"Please install a phone at my home. I did not know anything about the good points of the Homephone and was rather prejudiced against it until I began using it in my office. I use it all the time now, not only in phoning around the building, but getting outside numbers, because it saves me time and trouble. The Homephone delivers the goods."
"You know the burners of candles rioted in London about 500 years ago when gas was introduced. Most of us object to changes. Possibly that is the reason why I am so late in ordering a Homephone."

TRADE MARK REGD.

OUR LATEST "Save - the - Horse Book"—Is our 16 years Experience—Treating 87,364 Horses—Ringbone—Thoropin—SPAVIN—Curb and ALL—Shoulder, Knee, Ankle, Hoof and Tendons. With Mistakes left out DISCOVERIES PUT IN. It is a Mind Settler; Tells How to Test for Spavin—Where and What To Do for a Lame Horse — COVERS 58 FORMS OF LAMENESS—ILLUSTRATED.

MAILED FREE TO OWNERS, TRAINERS, AND MANAGERS, ONLY.

JUST NOTE THE KIND OF WORK THIS HORSE DOES IN 5 DAYS' TIME.

Troy Chemical Company, Binghamton, N. Y.:

Dear Sirs: I have used your remedy now for five days and must say it is wonderful; did not expect any such results. The horse had not been able to put her heels to the ground and when she walked she would barely touch her toe to the ground and then jump with the other foot. I gave her the first treatment Sunday noon and when I went in the stable Monday morning she was still resting the foot, but when I made her stand over she put the foot plumb on the ground, and bore her weight on it; then I took her out and she walked on it very well. I put her in the team Thursday afternoon and went in the woods after a load of wood, and got in a place where they had to do their best or stay there. She lifted as hard as ever I saw her. I expected to see her lame next morning, but she was not. The trouble seemed to be in the lower part of the tendons of her hind leg. Under these conditions, how long shall I continue to treat her?

R. H. WILLIAMS.

YOU WILL OBSERVE THERE WAS NO FEVER OR ENORMOUSLY SWOLLEN LEG, NOR LAYING UP OF THE HORSE WITH THE TREATMENT.

MAKES A TENDON AS STRONG AS A ROD OF STEEL.

\$5 A Bottle

NEAREST MCKINNEY 2:13 1/4, sired by MCKINNEY 2:11 1/4; dam, Maud Jay C. by Nearest 2:22 1/2 and own brother to John A. McKerron 2:04 1/2 and half-brother to Louise Carter, dam of Wilbur Lou (1) 2:19 1/2 and sire of Highfly 2:04 1/4, Alone 2:09 1/4, Joe Gans 2:19 1/2, Trueheart 2:19 1/2, Just It 2:19 1/2, and others, by Nutwood Wilkes 2:16 1/2, sire of Copa de Oro 1:59, John A. McKerron 2:04 1/2, etc., and dams of San Francisco 2:07 1/2, Mona Wilkes 2:03 1/4, etc.; 2d dam, Fanny Menlo (dam of Claudius 2:13 1/4) by Menlo 2:21, by Nutwood 2:18 1/4, greatest brood mare sire; 3rd dam, Nellie Anteeo by Anteeo 2:16 1/4; 4th dam, Fanny Patchen, by Geo. M. Patchen Jr. 2:27. Nearest McKinney is one of the handsomest McKinneys standing for public service. Color beautiful brown, 16 hands high and weighs 1250 pounds. When a three-year-old he was a natural trotter, had two-minute speed, trotted a mile on a half-mile track in 2:15, last half in 1:04, but owing to an accident was put to pacing in 1910 and in 44 days he got a record of 2:14 1/4 and in 1911 got a record of 2:13 1/4, fastest trotting record made by a stallion in California during the breeding season. Will make the season of 1912 at the

SAN JOSE RACE TRACK.

Fee, \$50 the Season, with usual return privilege. Free green pasture up to July 1st to all who pay stallion fee July 1, 1912. Best of care and attention given mares, but no responsibility assumed for accidents. No barb wire fencing; plenty of water and feed.

Address T. W. BARSTOW, 1042 Alameda Ave., San Jose, Cal. Phone S. J. 3000.

BREED TO THE BEST BRED TROTting STALLIONS!

Palo King 2:28 1/2 --- Reg. No. 44910.

Sire of Little Lucille (3) 2:09, the greatest pacer of her age on this Coast. Sired by Marengo King 2:29 1/4 (son of McKinney 2:11 1/4 and By By by Nutwood 2:18 1/4); dam Palo Belle 2:24 1/4 by Palo Aito 2:08 3/4; second dam Belle Isle (great brood mare) by Piedmont 2:17 1/4; third dam Ida Belle (great brood mare) by Hambletonian 10; fourth dam Godfrey Star by American Star 14. Palo King is a beautiful bay, stands 16 hands, is a pure-gaited trotter, and all his progeny are intelligent, have style, finish and extreme speed. TERMS \$25 for the season.

Iran Alto 2:12 1/4 --- Reg. No. 24586.

Sired by Palo Aito 2:08 3/4; dam Elaine 2:20 (dam of 4 trotters, 1 sire of 15, 2 dams of 9) by Messenger Duroc; second dam Green Mountain Maid (dam of Electioneer and 9 others in 2:30) by Harry Clay 45, etc. Iran Alto was one of our gamest trotters. He has 15 in 2:30, 3 dams of 3 in 2:30. TERMS \$15 for the season.

Alto Express

Sired by Iran Alto 2:12 1/4; dam Beautiful Bird by Nutwood Wilkes 2:16 1/2; second dam Expressive (3) 2:12 1/4 (dam of Atlantic Express (3) 2:08 3/4, Esther Belle 2:08 3/4, and the dam of Eva Bellini, timed as a two-year-old in 2:11 1/4, as a three-year-old beat 2:30 in her races) the greatest racing daughter of Electioneer. Alto Express is a perfectly made trotter and will undoubtedly be a sire. TERMS \$20 for the season.

For further particulars, address H. S. HOGOBOOM, Woodland, California.

THE ROYALLY BRED YOUNG STALLION

Best Policy 42378

By Allerton 2:09 1/4, Jay Bird's greatest son; dam Exine 2:18 1/4 (dam of Riverside (3) 2:30 and Rinoia (3) 2:30) by Expedition 2:15 1/4; second dam Exine (dam of 6) by Axtell 2:12; third dam Russia 2:28 (great broodmare) by Harold 413; fourth dam Miss Russell (dam of Maud S. 2:08 1/4 and 6 others), etc., etc. Best Policy is a handsome bay, has size, style and quality in every respect. Is a pure-gaited trotter. No better bred one in California. His progeny will be seen in races this year.

Season of 1912 at my feed stable, corner of Bridge and Center Streets, VISALIA, CAL.

R. O. NEWMAN, Owner.

McADRIAN 2:24 Reg. No. 45381.

Sire of Bert Kelly (trl) 2:11 1/4
Trix McAdrian . . . 2:28 3/4
Grace Chalmers (tr) 2:24

Sired by GUY MCKINNEY (sire of Vernon McKinney 2:02, Linden Girl 2:22, etc.); dam MAPLE LEAF 2:34 1/2 by Adrian 2:26 1/2 (sire of Roseta A. 2:14 1/4), son of Reliance 2:22 1/2 and Adriana by Skenandoah; McAdrian's grandam was OLLIE RAY 2:39 1/4, dam of Acclamation 2:24 1/2 (sire of Lizzie C. 2:15), Vendome, dam of McKinley 2:29; his great grandam was MARY BLAINE by Signal 3:27 (sire of the dam of Prussian Maid 2:19, etc). Guy McKinney, sire of McAdrian 2:24, was by McKinney 2:11 1/4, out of Flossie D., by Guy Wilkes 2:15 1/4; second dam, Blanche Ward (dam of China Maid 2:05 1/4), by Onward 2:25 1/2; third dam, Blanche Patchen, by Mambrino Patchen 58, etc.

McAdrian is one of the handsomest and strongest made grandsons of McKinney in California. He has no faults; is a pure gaited trotter and a sure foal getter. He will make the season of 1912 at the Pleasanton race track. Terms, \$30 for the season. For further particulars, apply to or address

E. D. DIGGES, Owner, Pleasanton, Cal.

Athasham Race Rec. 2:09 1/4, A Game Race Horse In the Stud Reg. No. 45026.

Bay stallion; stands 15 1/2 hands; weighs 1150. Sired by Athadon (1) 2:27 (sire of The Donna 2:07 1/4, Athasham 2:09 1/4, Donasham 2:09 3/4, Sue 2:12, Listerie 2:13 1/2, Matawan (3) 2:17 1/2, and 8 others in 2:30); dam the great broodmare, Cora Wickersham (also dam of Nogi (3) 2:17 1/2, (4) 2:10 1/2, winner of 3-year-old trotting division Breeders' Futurity 1907 and Occident and Stanford Stakes of same year, and Donasham 2:09 3/4 and Kinneysham (2) 2:18 1/4), by Junio 2:22 1/2 (sire of dams of Geo. G. 2:05 1/2, etc.). Athasham has a great future before him as a sire. He is bred right and made right, and has every qualification one can expect in a sire. He has been timed in 2:06 1/4 in a race, and his courage is unquestioned.

Season 1912, Feb. 15th to June 15th, at Orchard Farm and Race Track, Fresno, Cal., for a fee of \$25. Approved mares.

Good pasturage at \$3.00 per month. For further particulars, address this place.

D. L. BACHANT, R. R. 1, Fresno, Cal.

TWO GREAT SIRES.

The Bondsman

Reg. No. 37641

SIRE OF

Colorado E. (3) 2:04³/₄ champion 3-year-old of the world. Winner of the Matron, American Horse Breeder and Kentucky Stock Farm Futurities; second in Kentucky Futurity.

The Plunger (4) 2:07¹/₂, second fast-old stallion of 1910.

Grace Bond (3) 2:09¹/₄, winner both of divisions of Kentucky Futurity.

Creighton 2:08¹/₄, record made in 1911.

Half brother to Jay Hawker 2:14³/₄, sire of Country Jay 2:05³/₄, Susie Jay 2:06³/₄, etc.

Half brother to The Tramp, sire of Bervaldo 2:08³/₄, Trampfast (2) 2:12³/₄.

Half brother to Sorrento Todd (4) 2:14³/₄, Belle Sentinel 2:15, etc.

THE BONDSMAN 37641

| | | |
|---|---|--|
| <p>BARON WILKES 2:18¹/₂ Sire of 12 in 2:10, including Bumps 2:03³/₄, Rubenstein 2:05, Baron May 2:07³/₄; sired dams of 4 in 2:10.</p> <p>SORRENTO Dam of Jay Hawker 2:14³/₄, Sorrento Todd (4) 2:14³/₄, Belle Sentinel 2:15, Bola 2:19³/₄, Lazy Bird 2:26³/₄, Teddy Sentinel, 2:28³/₄, The Tramp (sire), etc.</p> <p>4th dam Virgie—by Abdallah 15. 5th dam Lucy—by Highlander (Veech's).</p> | <p>GEORGE WILKES 2:22 Sire of 83, dams of 204.</p> <p>BELLE PATCHEN 2:30³/₄ In great brood mare list.</p> <p>GRAND SENTINEL 2:29³/₄ Sire of 23, including Nettle 2:16³/₄, Tosca 2:18³/₄.</p> <p>EMPRESS Dam of 2 and granddam of 9.</p> | <p>HAMBLETONIAN 10 Sire of 40.</p> <p>DOLLY SPANKER Dam of 1.</p> <p>MAMBRINO PATCHEN 58 Sire of 25, dams of 162.</p> <p>SALLY CHORISTER By Mamb. Pilot 29.</p> <p>ABDALLAH MAMBRINO Sire of 15, dams of 42.</p> <p>BIG ELLEN By Clark Chief.</p> |
|---|---|--|

THE BONDSMAN is the only stallion that sired three new 2:10 performers with race records in 1910. In spite of the fact that he has no record, The Bondsman was a colt trotter of great merit. He was a contending colt all through the Kentucky Futurity of 1899, getting third money. This was a six-heat race and was won by Boralma. As a four-year-old he was not raced, but trotted a public trial in 2:11. As a sire he is destined to be the leading son of the great Baron Wilkes, founder of the greatest futurity winning family. He will make the season of 1912 at

Pleasanton Training Park. \$100

THE PATCHEN BOY 39033

Three-Year-Old Record 2:10³/₄ in a Winning Race.
Sired by the Great WILKES BOY 3803, sire of 107 in standard time.

A Genuine Race Horse and a Sire of Early and Extreme Speed.

The Patchen Boy 39033 is sire of the following:

| | | |
|--|---|---|
| Francis J. 2:08 | Legal Patchen ... 2:15 ³ / ₄ | Dorothy C. 2:19 ³ / ₄ |
| Evelyn Patchen... 2:10 ³ / ₄ | Lucile Patchen ... 2:16 | Louise Patchen ... 2:19 ³ / ₄ |
| Scott Patchen ... 2:12 ³ / ₄ | Jerry Patchen ... 2:16 ³ / ₄ | Dr. Warren ... 2:19 ³ / ₄ |
| Dessie Patchen ... 2:13 | Knightstown Belle 2:16 ³ / ₄ | Roscoe Blinning ... 2:20 |
| Frank Patchen ... 2:13 ³ / ₄ | Alec Williams ... 2:18 ³ / ₄ | Mary Patchen ... 2:20 ³ / ₄ |
| Ruby Patchen ... 2:13 ³ / ₄ | Lols Patchen ... 2:19 ³ / ₄ | Black Patchen ... 2:20 ³ / ₄ |
| J. C. Patchen ... 2:14 ³ / ₄ | Auduous the Miller 2:19 ³ / ₄ | and 11 others in 2:30. |

Dam **Lady Clnr**, the dam of The Patchen Boy (3) 2:10³/₄, C. W. M. 2:24³/₄ (trotted to high wheels), Anglin Wilkes 2:16³/₄ over half-mile track, trial 2:09³/₄, by Metropolitan 1372, son of Hambletonian 10; second dam, Haggie Brown, by Ashland Clay; third dam, Pity Pat, thoroughbred. The Patchen Boy was the greatest three-year-old race colt in the world, winning six straight races in the Grand Circuit the only year he was raced. His produce are good-headed and real race horses. (No tin cups.)

THE PATCHEN BOY is a beautiful black, 16.1 hands and weighs 1290 pounds. His colts are of fine size, great individuals and the kind that sell for the high dollar.

Season of 1912 at Pleasanton Training Park. Fee: \$50 Return privilege 1913

Both of the Above Horses Will Remain in California.
Best of care and attention given mares, but no responsibility assumed for accidents. Good pasturage at reasonable rates. For further particulars and full tabulated pedigree, address

CHAS. L. DE RYDER, Pleasanton, Cal.
A Choice Collection of Kentucky Saddle Horses for Sale.

PALITE 45062 A Sire of Early Speed.

Sire, Nutwood Wilkes 2:16¹/₂, sire of Copa de Oro 1:59, John A. McKerron 2:04³/₄, etc., and 2 dams of San Francisco 2:07³/₄, Mona Wilkes 2:03³/₄, etc.

Dam, Palita (2) 2:16, dam of 2 in list; second dam Elsie, dam of 5; third dam Elaine 2:20, dam of 4, fourth dam Green Mountain Maid, dam of 9.

PALITE is the sire of the 2-year-old stake-winner Pal 2:17³/₄ and the 3-year-old filly Complete second to the Occident Stake winner El Volante in 2:13³/₄, and timed separately in 2:14³/₄, and sire of Nat Higgins (3) 2:20 trotting, Cornelia Scott (3) 2:24³/₄ pacing. Palite is one of the best-bred stallions of the Wilkes-Electioneer cross living. His colts are all trotters, good-gaited and determined. He will make the season of 1912 at the ranch of the undersigned at

DIXON, CAL. Terms: \$40 for the Season with return privilege, or money refunded at my option if mare proves not in foal.
Good pasturage at \$2.50 per month and best of care taken of mares, but no responsibility assumed for accidents or escapes.
For further particulars address **E. D. DUDLEY (Owner), Dixon, Cal.**

TOM SMITH 2:13¹/₄ Sire of Futurity Stake Winners. Reg. No. 47700

TOM SMITH is one of the handsomest sons of McKinney on the Pacific Coast. He has size, style, speed, is a sure foal getter, and has every qualification to make him one of the greatest of the McKinney tribe. He is the sire of Katalina (2) 2:22³/₄, (3) 2:15³/₄, (4) 2:11³/₄, Ella Mac (3) 2:14³/₄, Vallejo Boy 2:15, Eddie G. 2:30. Every one of his colts that has been trained has shown standard speed.
Sire, McKinney 2:11³/₄; dam, the great brood mare, Daisy S. (dam of 6 with records of 2:09³/₄ to 2:28³/₄) by McDonald Chief 3583; second dam, Fanny Rose (dam of 2 in 2:20) by Ethan Allen Jr. 2903.

Will make the Season of 1912 at the **DRIVING PARK, SAN JOSE, CAL.**
Fee, \$50. Usual return privilege.

The best of care taken of mares in any manner that owners may desire at reasonable rates, but no responsibility assumed for accidents or escapes. Excellent pasturage. Mares shipped will be met at the train.
For further particulars, address **P. F. DAVEY, Driving Park, San Jose, Cal.**

PARKER GUNS

Wear Well, Shoot Well, and Handle Well.

Wear well because they are made of the best material by the most skillful craftsmen.

Shoot well because they hold the charge compactly together at extreme ranges.

Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline.

Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

For further information regarding guns in gauges ranging from 8 to 28, address

FOR SALE—Electeur Jr.

A fine young Percheron Stallion, six years old next April. Weighs 2400 pounds. He was sired by Electeur, imported from France in 1904, sired by Valtaque 25159; dam, Sultane 43394; second dam, Biche 17881; third dam, Pelotte 1850. Electeur Jr. is solid black in color, well formed in every respect and is a sure foal getter. His dam is by Uptumus, he by Duke of de Charters, the most celebrated horse in the United States. No finer Percheron Stallion is in the State. Can be seen at the McCarty Ranch, 4 1/2 miles northeast of Suisun. Price very reasonable. ED. McCARTY, Owner, Suisun, Cal.

The Standard Trotting Stallion

Bon McKinney 51480

3-y.-o. Rec. 2:24 1/4. 3-y.-o. Trial—half, 1:05; mile, 2:15.

By BON VOYAGE 2:08

(fastest mile ever trotted in a race by a stallion in California); dam, Daphne McKinney (also dam of Frank N. 2:07 1/4, the only other one of her get ever trained), by McKinney 2:11 1/4; second dam, La Moscovita (dam of Bon Guy, 3-y.-o., 2:11 1/4, Yolande 2:14 1/4 and Tina 2:20 1/4) by Guy Wilkes 2:15 1/4; third dam, Moscova 2:23 1/4 (dam of Mamie R., 3-y.-o., 2:15 1/4, and Oro Belmont 2:15 1/4) by Belmont 64; fourth dam, Mosa (dam of 5 in the list) by Woodford Mambrino. **BON MCKINNEY 51480** (3) 2:24 1/4 is a beautiful bay horse and is in every respect a magnificent individual, possessing size, style, quality, intelligence and frictionless trotting action. With little work as a yearling he trotted a quarter in 35 seconds and a half in 1:15. The next spring as a two-year-old, with 2 1/2 months' work, he worked a mile in 2:19 1/4, a half in 1:08 and a quarter in 33 seconds. Having no stake engagements, he was taken out of training after making this wonderful showing for a two-year-old. There is no doubt he could have trotted a mile in 2:12 that year had he been worked until fall. As a three-year-old he was given a record of 2:24 1/4, which is no mark of his speed. Mr. Ted Hayes trained him and says that he considers him the best colt he ever trained and firmly believes that he will not only make a great race horse, but a great sire. As a two-year-old he was bred to ten mares and got nine foals, and everyone who has one of his get is confident that he has the best foal on the Coast. Bon McKinney combines the best of the Electioneer-McKinney cross. His dams are all in the great brood mare list, every one being a producer of speed. He is a young horse and has already commenced to make his mark in the world, and now is the time to breed to him and take advantage to get something exceptionally good at a reasonable price. Study his pedigree, come and see him, and you will be sure to send your mare.

Season of 1912 at the RACE TRACK, SAN JOSE, CAL.

RESULT OF OVER A CENTURY'S EXPERIENCE.

Perfection in powder-making is only achieved by exercising the most scrupulous care in the selection and preparation of raw materials, employing skilled workmen exclusively, and using only the most improved modern mechanical equipment.

This is the **DU PONT** method and accounts for the unequalled reputation among sportsmen enjoyed by the **DU PONT** brands of

SMOKELESS SHOTGUN POWDERS

One of the most popular of these brands is

A dense powder that is absolutely uniform in velocity and pattern. Waterproof—not affected by extremes of heat or cold. "Infallible" SMOKELESS SHOTGUN POWDER will not pit the gun barrels.

Unequaled for Field and Trap-Shooting.

See that your shells are loaded with INFALLIBLE. Send to-day for Infallible Booklet No. 99. It gives best loads for various kinds of game and other information of value to shooters. It's free.

Isn't He Worth Saving?

ABSOLUTELY CURES QUINNS OINTMENT REMOVES CURBS SPLINTS SPRAINS WINDPUFFS

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpufts or Bunches which will not yield readily and permanently to treatment with

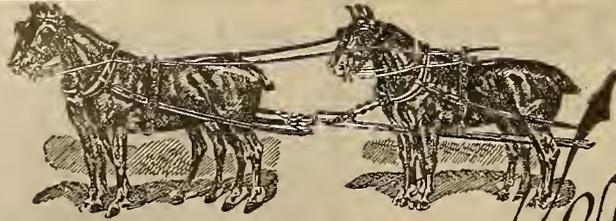

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have tried a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitation that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc.

WINCHESTER

FACTORY
LOADED
SHOTGUN SHELLS

"Leader" and "Repeater" loaded with Smokeless Powders. "Nublack" and "New Rival" loaded with Black Powders.

NOW SOLD ON THE PACIFIC COAST

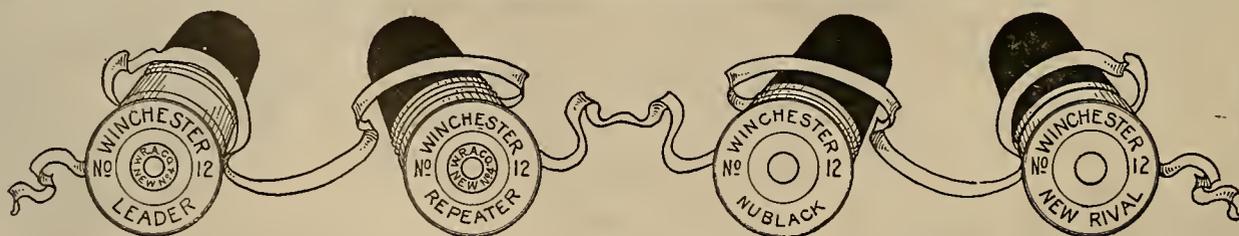

To meet the insistent demand for Winchester Factory Loaded Shotgun Shells, we have arranged to market on the Pacific Coast, through the regular trade channels, our famous Red **W** Brand of shotgun ammunition. Therefore, western sportsmen should henceforth have no difficulty in buying Winchester Factory Loaded Shotgun Shells, loaded with either smokeless or black powders, and in all desirable combinations of powder and shot. All Winchester Factory Loaded Shotgun Shells with the Red **W** on the label are made and loaded at our works in New Haven, Conn.

WINCHESTER REPEATING ARMS CO.

WINCHESTER SHELLS CAREFULLY MADE AND LOADED

It makes no difference what make of shotgun you shoot nor whether your favorite sport is field or trap shooting, Winchester Factory Loaded Shotgun Shells will give you the greatest measure of shooting satisfaction. No shells will make a good shot out of a poor one, but shells that are loaded so that they are uniform in velocity, spread the shot evenly, and give it good penetration, help wonderfully to make good bags in the field and high scores at the traps. Winchester Factory Loaded Shotgun Shells embody all these important elements to the fullest degree. They are designed correctly, made carefully, and loaded with exactness. The Winchester Patent Corrugated Head is an ingenious and distinctive feature of Winchester Shells. It is a superior method of construction to the old English system of metal lining, once used in Winchester shells, but discarded years ago. Other reasons for the superiority of Winchester Shells are their quick and sure primers and the high class of materials used in their construction and loading. When buying, don't simply ask for "some shells." Be specific and insist upon having Winchester—the Red **W** Brand, and the results will repay you for your pains.

A CHANGE TO WINCHESTER SHELLS IS A CHANGE FOR THE BETTER

A MEETING of the officers and members of the Pacific Coast Fair Circuit will be held at the Palace Hotel in this city next Monday, March 4, at 10 a. m. This meeting will be held for the purpose of seeing what can be done about arranging the program, classes, and conditions of the harness races for the different fair associations in the circuit. The members will also discuss publicity in advertising, the securing of reduced railroad rates on race horses and general exhibits, and any other matters that will be beneficial to the different associations that are members of the circuit. Mr. Shirley Christy, who has been so active in this work, will be present and present a statement of what has been accomplished so far.

IN NEARLY all the States where laws have been passed regarding licensing of stallions standing for public service, more or less difficulty seems to have arisen which might have been overcome had the laws been properly drawn up. The law that now prevails in California has aroused much discussion, and while everyone is in favor of the veterinary part of it, the classification of breeds according to the act has met with much criticism and has gone far to show up the inconsistency of the registration laws as adopted by the American Trotting Register Association. This association makes no mention of "pure bred," "grades," or "mongrels," which are the classes adopted by the State law, the result being that many of the best bred, finest individuals, and fastest stallions on the Coast can only be advertised as "grades" or "mongrels," while other stallions, because some former owner of the dam complied with rules in regard to registration that no longer exist, is able to advertise an inferior horse as "pure bred." There appears in this issue a criticism of the wording of the act creating this licensing law, contributed by our esteemed citizen and noted horseman, Mr. George L. Warlow, of Fresno, which no doubt will be read with considerable interest. For the information of those who contemplate getting horses registered with the American Trotting Register Association, we publish below the requirements for registration as "standard" for both trotters and pacers. It will be noted that performances of trotters do not apply on the registration of pacers, and vice versa. Also, that mares are not given numbers, while the blank issued by the licensing board leaves a space for the mare's number.

THE TROTTING STANDARD.

When an animal meets these requirements and is duly registered, it shall be accepted as a standard-bred trotter:

1—The progeny of a registered standard trotting horse and a registered standard trotting mare.

2—A stallion sired by a registered standard trotting horse, provided his dam and grandam were sired by registered standard trotting horses, and he himself has a trotting record of 2:30 and is the sire of three trotters with records of 2:30, from different mares.

3—A mare whose sire is a registered standard trotting horse, and whose dam and grandam were sired by registered standard trotting horses, provided she herself has a trotting record of 2:30 or is the dam of one trotter with a record of 2:30.

4—A mare sired by a registered standard trotting horse, provided she is the dam of two trotters with records of 2:30.

5—A mare sired by a registered standard trotting horse, provided her first, second, and third dams are each sired by a registered standard trotting horse.

THE PACING STANDARD.

When an animal meets these requirements and is duly registered, it shall be accepted as a standard-bred pacer:

1—The progeny of a registered standard pacing horse and a registered standard pacing mare.

2—A stallion sired by a registered standard pacing horse, provided his dam and grandam were sired by registered standard pacing horses, and he himself has a pacing record of 2:25, and is the sire of three pacers with records of 2:25, from different mares.

3—A mare whose sire is a registered standard pacing horse and whose dam and grandam were sired by registered standard pacing horses, provided she herself has a pacing record of 2:25, or is the dam of one pacer with a record of 2:25.

4—A mare sired by a registered standard pacing horse, provided she is the dam of two pacers with records of 2:25.

5—A mare sired by a registered standard pacing horse, provided her first, second and third dams are each sired by a registered standard pacing horse.

6—The progeny of a registered standard trotting horse out of a registered standard pacing mare, or of a registered standard pacing horse out of a registered standard trotting mare.

OVER eighty per cent of the members of the National Trotting Association asked to have Rule 29, Section 2, relating to hoppers, repealed or made optional. Hence the rule was struck out and the following substituted:

"In races exclusively for two, three, or four-year-olds, hoppers shall not be used."

This bars them in Futurities, but does not prevent horses of any age racing in hoppers in class races.

LICENSING STALLIONS AND JACKS.

Editor Breeder and Sportsman:

Section 5 of the Act creating a Stallion Registration Board in the State of California and pertaining to the registration of stallions and jacks for public service, provides as follows, to-wit:

"The Stallion Registration Board shall make and keep records of all stallions and jacks enrolled in the State of California; said stallions or jacks to be enrolled as 'pure bred,' 'cross bred,' 'non-standard,' 'grade,' or 'mongrel,' according as the facts may have been determined," etc., etc.

Determined by whom? By the Stallion Registration Board of California, of course. Not by the American Trotting Register Association or by some foreign registration association or by the American Registration Board of Thoroughbreds, because many horses are eligible to registration respectively in these different registration associations that are not registered, because the owners have not seen fit to pay the registration fees or thought it even necessary for using them for public service in the community where they reside by reason of their being so few mares that are what are called "pure bred." When you come to apply the term "pure bred" to a standard trotting, pacing, or saddle horse, it is very doubtful if there is a pure bred horse of any of these types. They all trace to the thoroughbred, and there is probably not one living or dead from which the thoroughbred blood is entirely eliminated.

The California Stallion Registration Board is required to determine from the pedigree of a stallion or jack in what class they will place him in the registration certificate.

The Registration Board seems to have adopted a rule as to what they determine to be a "pure bred" horse or jack, not with reference to his pedigree, but with reference to the fact as to whether they can find his name in some American or foreign registration book or a certificate furnished by the owner to the Registration Board of California from some of the different registration boards, and in case they don't find the name of the stallion or jack in some book or a certificate is not furnished, they class him as a "grade," "cross bred," or "mongrel," and very frequently they don't know whether they have placed him in the correct class or not, for not enough of a pedigree is furnished to determine the fact as to where he should be classed. The certificate or affidavit to be made by the veterinary and the owner as to soundness does not give space for pedigree to be given sufficient for the Board to determine anything definite as to the breeding.

Palo Alto's dam was a thoroughbred, yet Palo Alto is registered as a standard trotter, and a colt by him out of a mare that was registered as being by a

standard registered horse and was the dam of two trotters in 2:30, although her dam was unknown, could be registered in the American Trotting Register Association, and, if so registered, this colt would be given a certificate by the California Registration Board as "pure bred" trotter. While a stallion that is not registered in the Trotting Register Association,—although his sires and dams for seven generations are registered as standard trotters,—would be given a certificate as a "grade" simply because his owner failed to register him with the American Trotting Register Association.

This is all wrong. One would think the Registration Board was instituted in the interests of the different registration associations. A rule should be adopted by the Board providing that upon the owner furnishing the Board with the pedigree of a stallion, verified by the affidavit of the owner that the pedigree was true as given, with such additional proofs as might be required by the Board (if they desire further proof) that if the Board found the stallion to be a standard trotter, or pacer, or saddle bred, and was eligible to registration in their respective associations, they (the Board) should issue to the owner a certificate that the horse was enrolled as "pure bred." I am in favor of having stallions and mares registered in their respective registration associations and do not breed to those which are not or are so clearly eligible to registration that they could be registered any time, but I know an injustice is being done to some owners of stallions who applied for their licenses without first registering their stallions. And they are compelled for the season of 1912 to put up with a grade certificate when their stallions may be as "pure bred" as any horse whose name appears between the lids of an association registration book.

The Registration Board should be composed of men who are thoroughly familiar with the pedigrees of the leading blood lines of the different types or breeds of horses (and I am not saying those on our present Board are not, because they are my friends and I have a high respect for them), or men who will thoroughly post themselves in pedigrees of jacks and the different breeds of horses, and the rules adopted by the Board should be published so every applicant would know just what is required to get his horse classed in its true type. GEO. L. WARLOW.

Fresno, Cal., Feb. 21, 1912.

SOME PROMISING MATERIAL.

H. S. Hogoboom, of Woodland, has quite a number of excellent trotters to take care of and prepare for the races this fall. He has Unimak, the fine looking brother of that speedy trotter Sterling McKinney 2:06 1/4, in one of the stalls. This horse has been most unfortunate in his training, which left him with a bad leg, but it is so much better than it was that Mr. Hogoboom believes it will stand. If so, it will be as easy as "rolling off a log" for this horse to get a mark of 2:10.

In the next stall he has the very handsome bay mare Virginia Lee 2:17 1/4, by Iran Alto 2:12 1/4, dam Maggie, by Soudan 2:27 1/2. She will lower this record this season.

He has a colt that is one of the finest looking at this famous track. He is called His Highness and is by Palo King 2:28 1/2, out of Queen Alto 2:18 1/4, grandam by Director 2:17. This breeding should suit the most fastidious and His Highness is no discredit to it, for he is a natural born trotter and satisfies his owner he will do to train.

In an adjoining stall is another good one by Iran Alto 2:12 1/2, out of a sister to that good game trotter Lady Mowry 2:09 1/4, by McKinney 2:11 1/4, out of Electress Wilkes 2:28 1/2, by Nutwood Wilkes 2:16 1/2.

Another is by his grandly bred stallion Alto Express, out of Diawalda, by Diablo 2:09 1/4; second dam Walda, by Waldstein 2:22 1/2; third dam Rosa, by Guy Wilkes 2:15 1/2; fourth dam Rosebud, by Del Sur 2:24; fifth dam Blanche (dam of 7), by Arthur; sixth dam Nancy, by Gen. Taylor. There's enough trotting bred blood in this one, and from what has been seen of his capabilities as a trotter he will prove a valuable asset this fall.

There is a filly and a colt here by Unimak, out of a mare by Nutwood Wilkes 2:16 1/2, which belong to Capt. C. H. Williams, and they are models of equine beauty. When the United States Government is in need of a horse to use for siring the very highest class of remounts, this colt should not be overlooked. He has all the requirements: substance, bone, and style, a beautiful neck and head, short back, sloping shoulders, heavy quarters, and the finest of feet and legs. He is a trotter, Mr. Hogoboom says, and one that will always attract attention. His sister is of a different type, and unless all signs fail she will need very little work to prepare her for a 2:15 or better record this season.

The next one looked at is called Honest Boy, a name, by the way, one would expect to see applied to some all-purpose or draft horse, but this yearling is far from that type. He is bred right and is as pure gaited a trotter as a man would want to see. He was sired by Palo King 2:28 1/2, out of Miss Ione, by Iran Alto 2:12 1/4; second dam Ione, by McKinney 2:11 1/4; third dam Gipse (dam of Gazelle 2:11 1/4, Ed Winship 2:15, and grandam of Zolock 2:05 1/4, Zephyr 2:11, etc.), by Gen. Booth. Honest Boy is entered in all the stakes and when the bell rings he will be ready to do his best like the good Honest Boy he is.

Besides these, Mr. Hogoboom has his three stallions Palo King 2:28 1/2, Iran Alto 2:12 1/4, and Alto Express to look after, so he manages to keep pretty busy. His horses are doing well and are worthy of all the care bestowed upon them.

NEW EXPOSITION PARK, LOS ANGELES, CAL.

Editor Breeder and Sportsman:

The new park now under construction at Los Angeles, although only about half completed, is commencing to assume gigantic proportions. The two buildings that are finished are things of beauty and stability, having cost in the neighborhood of half a million dollars. One is to be used to display the resources of the Southland and the other as an auditorium. With the proposed sunken gardens and the Armory which will be in the midst of a paradise of green lawns, shrubs, and flowers, the new park now being built on the site of Old Agricultural Park will be a credit to California.

The new track, one mile in length, is completed and fenced, and are several of the stables, which are conveniently located and very attractive. The track itself is a very fast piece of dirt, but a little hard owing to the scarcity of rain, which is becoming a serious question at present. There are over three hundred horses being worked over it. A number of them, however, are stalled in barns adjoining the track, as stable room is very limited, because the new barns are not all completed.

Billy Durfee has the largest stable, consisting of some forty or more horses, about half of which are colts and fillies by Copa de Oro 1:59, and Carlokín 2:07½.

The first horse led out in the Durfee stable was a pretty bay filly called Esperanza, by Carlokín 2:07½, dam Irene S. (full sister to Zula Belle, 3, 2:16¾, winner of the Breeders' Futurity a year or so ago). This little miss, while only nine months old, has trotted eighths in 22 seconds, and Billy says she is the best thing he ever had. Like all the rest of his baby colts, she is well staked throughout the West.

Helen Stiles 2:08¾ is in the next stall, looks good, and is taking her work nicely.

Maurico, a handsome stallion by Moko (the futurity sire), out of Silurian, by Wilton (making him a blood brother to the great horse Silico), is certainly a nice trotter, and, if nothing goes wrong, will be another fast performer for his daddy.

Kitty Bon, by Bon Voyage 2:08, dam by McKinney 2:11¼, is a very promising filly, and last year as a four-year-old trialed very fast on the trot over the Pasadena half-mile track.

Aviator, full brother to Blancbe 2:06¾, the highest money-winning mare on this Coast last year, is a great pacer himself, having been halves in 59 seconds.

Peter Fairbanks, a chestnut colt, three years old, by Peter the Great, dam by Baron W., is well staked in the East, and as he has already been a mile in 2:18, he will do to pay expressage on when Billy goes over the hills this summer.

Omar, by Del Coronado, and Old Folks, a two-year-old trotter by the same sire, are well thought of.

Lady Alice, known locally as Lady Love, by Chief Whips, dam by Welcome, has trotted in 2:14¾, last half in 1:03¾, and will be staked right down the line. She is owned by the genial Sam Watkins, and "Here's hoping she does him some good," because no one better deserves to have a good one.

Del Oeste, a three-year-old green pacer, has been a mile in 2:09, last half in 1:03¾, last eighth in 14 seconds, is by Del Coronado, but Durfee will save him until next year.

Trix, a four-year-old green trotting gelding by Redlac, dam by McKinney, and owned by Wm. Garland (former owner of Sweet Marie 2:02), has been a mile in 2:18.

Hastings, by Del Coronado, dam by Robt. McGregor, is one of the handsomest horses in the United States, which is a broad assertion but nevertheless true. He has been a half in 1:08½ on the trot on a half-mile track in his three-year-old form.

Carlos, a black gelding twenty months old, sired by Carlokín, dam Irene S., has been a mile in 2:38 on the trot. He, as well as all the other Durfee colts, is staked extensively.

Fulton G., by Carlokín, out of a Zombro mare, second dam Atherine (dam of Copa de Oro 1:59), is a two-year-old trotter and has been a mile in 2:39½. In fact, all the Carlokín youngsters show wonderful speed, and out of six yearlings there is but one that has not beaten a 2:30 gait. A two-year-old by the same sire out of Atherine has shown a 2:20 gait, trotting.

Wilkes Boy Jr., by Wilkes Boy, first dam Carna Belle, by Liberty Bell; second dam by Nutwood; third dam by Harold; fourth dam by Belmont 64, is bred for a trotter, and as all his dams are great broodmares should be a great sire. Although never worked for speed he can show a 2:10 gait on the trot and is as handsome as a picture. What a sire he will make when his days of racing end!

Jeff, a green pacer by Morris A., has been a half in 1:02½, as well as others too numerous to mention have worked fast on the trot or pace, and, from the condition and appearance of the whole stable, it looks as though Billy would have an exceptionally good year.

Just a few words in conclusion about the Durfee stable, in regard to Don Pronto 2:05½, who looks very good; Zula Belle, winner of the Breeders' Stakes a few years ago, on the trot, but since converted to the pace, at which gait she promises to be one of the sensations of 1912.

Copa de Oro 1:59 never looked better in his life, so does Carlokín 2:07½, both of which, by the way, are the fastest stallions at their respective gaits standing for service west of the Mississippi and should have their books filled, for no better are to be found anywhere as individuals, as racehorses, and as royally bred ones.

Walter Maden has, as usual, a big stable, second

only to Durfee. Most of his stuff is aged and will be raced this year on this Coast, while Durfee expects to go East and race on the Grand Circuit.

Donasham 2:09¾ (full brother to Athasham, Mattawan, etc.) has been a mile in 2:20 and Walter likes him very much.

Walter Barker, Mr. Canfield's stallion, is only being jogged, but several of his colts and fillies are being worked a little.

Eileen (2) 2:29¾, by Walter Barker, is a very fast mare on the trot, as is her two-year-old brother on the pace.

Del Zura, a chestnut filly by the same sire, that has been a mile in 2:25½, half in 1:08, and Carbon, by the same horse, is well thought of.

El Valador, a chestnut gelding by El Volante (3) 2:13¾, is a pacer and well staked. If he is as good a horse as his daddy he will do. The above-mentioned horses are all owned by Mr. Canfield, a very liberal patron of the game and one of the gentlemen who has made it possible to have the new track at Los Angeles.

Mr. John W. Considine, of Seattle, another lover of the game, has a number of good prospects in the same stable, a partial list of which follows:

Rubell, a very handsome sixteen-hand mare by Del Coronado, dam by Jas. Madison, has been a mile in 2:12½, trotting, which is the fastest mile but one so far this year.

Bondelette, black filly by Bon Voyage 2:08, dam Sidlette, has a trial of 2:16 and half in 1:05.

F. S. Whitney, bay stallion by F. S. Turner, out of By Guy, by Guy Wilkes, has been a mile in 2:17½.

Modeste, brown filly, by Walter Barker, dam Sue 2:12¾, can trot right now in 2:16 and a half in 1:06.

Victor Mac, by Red McK., has a trotting trial of 2:19½, and a green pacer by Zomhro 2:11 has been a mile in 2:22 and a half in 1:07. A green trotting mare by the same sire has been one in 2:30.

Fiesta Maid, the sensationally fast trotter by Zombro, has not been let down yet, but is being worked around 2:16.

True Kinney (2) 2:19, the good-looking son of Kinney Lou 2:07¾, has filled out wonderfully and will be ready to meet his champion relative, Wilbur Lou (1) 2:19½, when the bell taps.

El Carbine, a two-year-old Carlokín colt, a three-year-old stallion by Worth White, a two-year-old by Best Policy, and a two-year-old by Walter Barker can all trot a 2:20 gait or better. These babies are all staked and will be raced if good enough.

Last, but not least, is Chiquita 2:08½, public trial 2:04, the fast but erratic daughter of Highland C., who so far this year is taking her work beautifully and has displayed no symptoms of her old habits.

Ted Hayes, to whom the writer is greatly indebted for a very pleasant ride behind the "champion who came back," Bon Voyage 2:08, has a small but very select stable of young things.

Bon Voyage looks better than ever, and if he goes to the races this year, look out for the Pacific Coast trotting record.

Jean Val Jean (3) 2:10, his pacing son, is in ideal condition and is as handsome as his dad. He has been a half in 1:03.

Bon Volonte (3) 2:19¾ is, like all the rest, in superb shape and will reduce his record many seconds this year.

Voyager (3) 2:23¾, by the same sire as the others, is another of the same type and, like all the Bon Voyage's, is as handsome as a horse could be.

Zombowage, by Nobage (a son of Bon Voyage), out of Zombowetta, by Zombro 2:11, a two-year-old colt, has been a mile in 2:30¾ and can beat that a few seconds at any time.

Ted is evidently going to breed a good one of his own, as he now owns the good mare Belle Pointer, by Sky Pointer (she the dam of Boton de Oro), and two of her daughters, one a two-year-old by Copa de Oro and the other a yearling by Carlokín that has been a quarter in 46 seconds. This last is a trotter and well staked. Belle Pointer herself has been turned out, as she is safe in foal to the good colt Bon McKinney, having been bred before he was shipped north.

Bon Courage, a chestnut colt by Bon McKinney, out of Helen Dillon 2:21¼, trial 2:08, by Sidney Dillon, and Bon Heur, a black colt by Bon Voyage, complete the stable.

Al Russell, who trained last year at the Spokane, Wash., track, came south to avoid the rigors of the climate there and speaks very highly of Los Angeles. He has twelve head and they all look good.

Mrs. Hastings' chestnut stallion Judge Dillon has improved wonderfully in his hands and has already been a mile in 2:14, good gaited and going sound. He looks like another 2:10 trotter for Sidney Dillon.

Auto Zombro, a green pacer, has been leased recently and has been a mile in 2:15.

Big Squaw 2:10¾, is going sound and right, looks good, and should be a hard mare to beat in her class.

Miss Jerusha 2:08¾, the pacing daughter of Zombro; Alfreda B. 2:10¾, by Bob Fitzsimmons, and Buck 2:09¾, by McKinney, are all taking their work nicely and should be good, useful horses in their classes this year.

Fred Ward, as usual, has a choice stable headed by Zombronut 2:08, the white-faced son of Zombro 2:11. He is sound and fit, but so far has only been jogged.

Jos. McGregor, the white-faced pacing stallion that was in Havis James' stable last year, is back in his old stall and is going sound. If Fred's two "Herefords," as the boys call them, stay sound, they will be mighty hard to beat all the time.

A three-year-old trotter by Wayland W. that Fred bought from Ted Hayes a short time ago, has already been a quarter in 31¾ seconds, and, if one is

to judge by Ted's expression when he sees him, he seems to be sorry he sold the horse to Ward.

Dr. Wayo (trotting trial 2:11) has been a mile in 2:30, and Escabado 2:13¾ is going sound after a season in the stud.

Nordwell 2:08½, the good son of Demonio 2:11¾, is being jogged on the road and looks as though he would do to race this year.

Fred has a two-year-old trotter in the barn claimed by Mrs. Ward as her property, but, as she has paid no training bills, Fred is considering foreclosure. This colt was raised on Eagle Brand condensed milk and appropriately named Eagle M. He has been a quarter in 37½ seconds.

Jay Direct, by Direcho, a green trotter, has been a mile in 2:14¾, and a green four-year-old pacer by Audubon Boy 1:59½, is very promising.

A two-year-old pacer by R. Ambush 2:09¾, out of the dam of Zombronut 2:08, and Wonder, a two-year-old trotter by Jay Direct, are both very promising babies.

Two Zombro's, one a trotter called Siwash Maid, and the other a green pacer, look good, as do a green pacing stallion by Ob So.

El Bell Maden (2) 2:30, the filly that chased out Wilbur Lou (1) 2:19½ last season, looks extra good and will be ready to meet her stake engagements.

Another horse called S. P. Local, by Longworth, is a nice pacer, and let's hope he has more speed than some of the S. P. locals that I have ridden on.

Geo. W. McPherson, who trains for Vancouver, B. C., parties, has a good stable of record and green horses. He is nicely stabled just outside the track and, like many others of our Canadian friends, has already fallen in love with the perfect climate of California.

John McLeod, of Vancouver, owns seven head in the McPherson stable.

Bel Mar 2:21¾, trotting, full brother to Mobil 2:10, has been shifted to the pace and seems to like it immensely.

Belle Wilkin 2:24, by Zombro, dam by The Marquis, is a nice-gaited trotter.

Rose Lecco, by Lecco, is a green trotter which promises to be very fast.

McSeal, a green trotting stallion by Red Seal, is a fine-looking horse.

Abbie D., a three-year-old pacer by C. The Limit, dam by Bonner N. B., should be good on her breeding alone.

Dolly McKinney, by McKinney, and a weanling by Belmar complete Mr. McLeod's holdings.

J. T. Wilkinson has six in the stable, namely:

Carlrea, a bay pacing stallion by Carlokín; Hazel Wilkin, by Zombro, dam by Altamont, a green pacer; Ora Wilkin, a three-year-old trotting filly by Ora Wilkes Jr.; Selma Wilkin, by the same sire; Aurelia Lou, a three-year-old trotting colt by Kinney Lou, and Roy Wilkin, a two-year-old colt by Ora Wilkes Jr., complete his string.

Vera Wilkin, a two-year-old filly by Ora Wilkes Jr. 2:12¾, dam Red Girl, by The Marquis, is owned by Mr. J. H. Wilkinson, of Vancouver, B. C. These horses have only been up a short time, but are all jogging nicely and seem to be as much taken with the California climate as Mr. McPherson.

Bob Morehead is out every morning to jog or work his matinee horses and Dr. Dodge has been having lots of fun working his family horse a little. This horse can trot a mile in 2:25 and will be matined.

Charlie Nickerson is also training a stable of matinee horses.

Jim Stewart has fifteen head, among them a promising trotter by Guy Dillon, out of By By, by Nutwood 600, that has been a half in 1:06.

A very promising two-year-old pacing filly by Zolock 2:05¾, out of Esther D. (2) 2:13¾ (winner of the Breeders' Stakes and joint holder with Ray o' Light (3) 2:08¾ of the Coast two-year-old pacing record).

A beautiful little black mare by Zombro 2:11, out of a Titus mare, has been a mile last year in 2:07 and will be raced this season.

Mr. Brown has two colts, one a Carlokín, the other a full brother to Guy Carlton, by Guy Dillon.

Jos. Williams has a chestnut gelding by Limonero that has been a mile in 2:19; a four-year-old pacer by Audubon Boy 1:59½, dam by Star Pointer 1:59½ (some speed inheritance there), and a gelding by Del Coronado. E. S. TRAIN.

OREGON FAIR PURSES AGGREGATE \$35,000.

Salem, Or., February 25.—Purses at the Oregon State Fair, September 2 to 7, will aggregate \$35,000 this year, according to a statement just issued by Secretary Frank Meredith in furtherance of that action of the board at a recent meeting.

The programme for the harness events was completed Saturday and shows that there will be purses for these events aggregating \$32,200, with purses for the stake races amounting to \$3,200.

Out of the harness races there are four that are now closed, these including the four futurity races with aggregate purses of \$5,200 and represent two and three-year-old trots and paces.

As usual the big feature harness races of the week will be the Lewis and Clark \$10,000 purse for the 2:12 trot to be trotted Thursday, September 5, Portland day, and the \$5,000 Greater Oregon purse for the 2:08 pace to be stepped Wednesday, Salem day.

The Fraternal purse will be hung up on Tuesday for the Woodmen of the World, this purse to be for \$2,400.

On the last two days of the fair there will be a total of four purses for \$1,000 each, including two consolations, the State Fair and Rural Spirit purses.

THE LIVERMORE HORSE SHOW.

While not the largest, the horse show of last Saturday was the best that has yet been given. It was a quality show throughout and it was witnessed by the biggest crowd that ever gathered for the purpose in Livermore. Although held two or three weeks in advance of the usual time and upon short notice the show was a most successful one in every way.

There may have been horse shows heretofore in which more horses were in line, but none have been held where the quality and class of the horses in line were equal to that of last Saturday.

In the procession were horses of all breeds that had won the highest honors in their class at State fairs and other exhibitions.

Grand Marshal David McDonald had little difficulty in arranging the line-up, and, once in motion, the parade moved rapidly along the line of march.

When the parade halted on Lizzie street it is safe to say that the value of the horses awaiting their turn to be taken before the reviewing stand would come close to the \$150,000 mark.

The crowd that surged around the reviewing stand was an immense one, and all of them remained from the beginning to the end of the reviewing.

President H. M. Christensen, on taking his place in the reviewing stand, made a few appropriate and well-received remarks concerning the show, after which he introduced the Hon. Jas. W. Clarke, who delivered a most interesting and well-worded address on the necessity of horse shows and the advantages that would come from their continuation.

Hon. Frank K. Mott, Mayor of Oakland, who was present, was called upon and made a speech in which he expressed his surprise at the display of the exhibition and his pleasure at being present. Upon the conclusion of Mayor Mott's speech the horses were called to the stand, where Announcer McDonald gave the pedigrees of the entries and other information of interest to horsemen.

The parade moved in four sections—first, standard bred and coach horses; second, roadsters; third, Percheron drafters; fourth, Belgian drafters; fifth, graded drafters, broodmares, colts, and work horses.

The following named standard bred horses were in line in the first division:

The Bondsman, sired by Baron Wilkes, dam Sorrento.

Patchen Boy, sired by Wilkes Boy, dam Lady Clay. The Bondsman and Patchen Boy were entered by Chas. De Ryder, of Pleasanton.

E. H. Digges, of Pleasanton, showed McAdrian, by Guy McKinney, dam Maple Leaf.

Sylvan Bordes entered Welcome Jr., by Welcome, dam Nellie.

E. Donahue entered Ed. D., by Diahlo, dam Lurline. H. A. Turner, of Pleasanton, showed Thomas H., by Echo Chief, dam Bird.

D. C. McNally's entry was Lecco Jr., by Lecco, dam Ruth C.

Crawford Letham, of Pleasanton, entered Vantrim, by Antrim, dam Alma, and Lady Fern, by Odin, dam Vantrim.

Michael Cronin entered Bud and Bob, by Nutwood Wilkes, dam Baby.

Chas. Ferrario showed Little Daisy, by Girard, dam Admro.

Arthur Baxter had Electric, by Electrical, in line. Harold Anderson drove Dolly Gray.

In the German coach horse class were Machus, owned by the Danville Coach Horse Company, and Odin, owned by Max Berlin.

In the Percheron class were Jean Bart, owned by the Livermore Valley Percheron Horse Company; Bernard, owned by King, Andrus & King; Robert, owned by the San Jose Jack and Draft Horse Company; Dick, owned by the Tassajara Horse Company; Inquiet, owned by Wm. Bond, of Newark; Rosier, owned by the Santa Rita Percheron Horse Company; Colino, owned by the Altamont Horse Company; Origen Jr., owned by Jos. H. Martin; Moltke, owned by H. C. Coldewei, and Ulema, owned by A. Fregolia.

In the Belgian class were Chas. De Ryder's Ouragan, Max Berlin's Barnum de Limelette, John Meyn's Bijou Berni, John Silver's Rock, Livermore Valley Belgian Company's Jules de Zulte, William Larsen's Trappiste Jr., John Jorgensen's Young Trappiste, George Bruns' Trappiste II, San Jose Jack and Draft Horse Company's Klondyke, Livermore Belgian Horse Company's Felix de Herlaumont, A. Goulart's drafter, a full brother of Trappiste.

Jos. Anderson showed Livermore Belle and two of her colts by Odin.

A fine span of drafters were shown by A. Goulart. Hans M. Christensen showed Rose, Nellie, Flora, Prince, and Mink, by Colino, all coming two-year-olds.

Mr. Christensen's entry of yearlings were Max, by Barnum de Limelette; Bess, Live, George, Susie, Queen, and Frank, by Colino.—Livermore Herald.

GREAT ACTIVITY AT MARYSVILLE.

There are in round numbers just forty trotters and pacers working on the Marysville racetrack. This celebrated course, by the way, needs neither excuses nor apologies, for at any time, winter or summer, it is a model track for horses. With this advantage over all others, it is not surprising that phenomenal speed is developed here, especially when one takes into consideration that there are very few except the highest class of colts bred in this portion of California. Their enthusiastic owners are determined that as a racing as well as horse raising center, Marysville is entitled to occupy a very prominent place on the map, for it is the home of some of the best horses that appeared on the circuit last season.

Mr. Emlay is working three fine colts, the progeny of Washington McKinney Jr.

Mr. Renatti has five trotters and four pacers to look after. The foremost one of these is his fine stallion Montego; he paced this track in 2:07, and will be sent up and down the Pacific Coast Circuit this year in a way that will make some of the "phenomenal green ones" know they have a worthy competitor to beat.

Mr. Buell's Sir B., a fine big four-year-old by Sir John S. 2:04½, is beginning to show some fast quarters. It is a little too early to force these horses fast for a longer distance. Mr. Gomaz, a two-year-old, also by Sir John S. 2:04½, is also in his string, and is a credit to his sire.

Mr. Duncan has sixteen head now and more are coming. It is needless to add he has the cream of the best. Among them is Mabel 2:15, the grand big five-year-old trotter owned by Mr. Magruder. Mabel was sired by Sir John S. 2:04½, she was campaigned successfully last season and is justifying all the prophecies made at that time as to her speed. Marlin, the big strong pacer from Willows, is taking his work smoothly. He seems to have unlimited reserve power and whenever called upon is always ready to "let out a link or two."

Aeroletta (2) 2:21, by Aerolite 2:07½, out of Deviletta 2:10½, by Diahlo 2:09¼, the Futurity winner owned by Mr. Harkey, has grown big and strong and is a remarkably well-matured three-year-old. Her work indicates that greater honors will surely be hers in 1912.

Two full brothers to that champion Maurice S. 2:07½ have been received by Mr. Duncan. They show that they have been carefully handled by their proud owner, Mr. Ed Strain, who is a great believer in having his horses thoroughly schooled before they see a racetrack, consequently these colts are strong, well muscled, and ready for work. These are merely a few of Mr. Duncan's favorites, and with the others he has he will undoubtedly make a good record again this year.

Mr. Gomez is jogging his special pride, Belle S., by Sir John S. 2:04½, and is very proud of her. She is one of the handsomest at the track and demonstrates she has inherited extreme speed. Belle S. is a three-year-old.

Mr. Vance is jogging four and they are all doing everything required of them.

Sir John S. 2:04½ will be a great sire of speed if we are to judge by what his progeny has shown and is showing. He is in fine condition. Tonopah, the big handsome horse, will enter the 2:10 trotting list, for an easier gaited trotter is hard to find. Bongula, by Bon Voyage 2:08, is a rich seal brown four-year-old stallion and is coming along beautifully at the trotting gait. The last one in Mr. Vance's string is a big strong fearless-going four-year-old bay by Sir John S. 2:04½, that is a credit to his sire.

Mr. Ed Strain has four colts and fillies, the progeny of King S., to which he is going to give track work himself. They have had plenty of road work.

Junior Dan Patch 2:09½ (over a half-mile track), by Dan Patch 1:55 and Varcoe, a trotter by Nutwood Wilkes 2:16½, are both doing well and going very satisfactorily, especially when they jog alongside of Sir John S.

SOME SUGGESTIONS OFFERED.

Editor Breeder and Sportsman:

I see that suggestions are in order relative to purses and stakes, classes, etc., for this year, and I hit off the following:

It has been proposed to give the big money for the 2:03 and faster classes. I know it is hard to suit everybody, but am of the opinion that there would be more entries in 2:18, 2:16, or 2:14 classes than for any other classes of trotters. I also think that \$10,000 is too large for one purse, especially as there can only be four winners and the rest of the nominators are hung up for big entrance money. There should be more purses for \$5,000 on as liberal a proposition as possibly can be made in regard to entrance. I also think there should be more colt races all around the circuit for colts that don't win or start in the futurities. There are always a number that are not entered in the futurities that prove to be good enough to race, and then those that don't win in the futurities would have a chance to get money out of these other colt stakes. I know that this would tend towards training more colts and increase the interest in the game and make it more profitable to all concerned. I have been in the money in the futurity stakes for the last six years with Carlokin, Queen Alto, Alto Express, Virginia Lee, Applaya, and His Highness. Now another idea suggests itself that would give the horses whose ability is around 2:20 a chance. The woods are full of horses of that class. There are lots of races that do not fill satisfactorily under the present way they are offered. Suppose we gave a 2:24 or 2:22 or a 2:20 class for a large amount of money and also for the same classes to take place on the same day for a smaller amount of money. The good ones would enter for the big money and give the others a chance to get records and win in the cheaper races. There is another way of getting around this, and that is by giving selling classes around the 2:20 mark. For instance, geldings to be sold for \$300, mares \$400, and stallions \$500, all over this amount to go to the association. No crackerjacks that are worth a lot of money would enter in these stakes, as it would cost the nominator too much to keep him if he won. I also believe that reclassification every three weeks would help the game.

H. S. HOGOBOOM.

Woodland, Cal.

THE SUISUN STOCK FARM.

This is the season of the year to go to the country. The fields are green, flowers are blossoming, birds are singing, foals are playing by their dams, and all nature seems to smile. Last Saturday I accepted an invitation to visit the Suisun Stock Farm, owned by Senator Ben F. Rush, one of our foremost cattle and horse breeders. Meeting me at Suisun, we walked to the slough, or arm of the bay, embarked in a fine large gasoline launch, and after a very pleasant trip landed at a wharf on the Suisun Stock Farm, a tract of 3,000 acres of level and rolling land, which extends for miles over the hills and valleys.

It is the time of year when the wild geese are usually grazing on the new crop of grass and blades of harley and wheat, and, as we walked along, hundreds of these "honkers" left their feeding grounds and circled above us. We soon reached the fine residence where Mr. Rush spent many years. This large, old-fashioned building is almost hidden in a grove of cypress and eucalyptus trees. Back of it are the paddocks, corrals, and barns. In one of the latter were the premier stallions Demonio 2:11¼ and Gen. John B. Frisbie. The former looks better than he did when I saw him four years ago. He is one of the finest types of a stallion in California. In conformation he does not resemble Diablo 2:09¾, Arner 2:17¾, Don Derby 2:04½, Owyho 2:07¼, or any of the other sons of old Bertha. He strongly resembles the Alcantara family. As a sure foal-getter he is remarkable. His sons and daughters are noted for all the qualities sought after by horse men: color, disposition, soundness, gameness, early and extreme speed. Nearly all his progeny are pacers. His daughters, and there are a few here, are grand looking individuals, and to see his band of yearlings, as much alike in conformation as a herd of reindeer, no white markings on any of them, all romping over the low-lying hills and across the little valleys, is a most inspiring sight.

General John B. Frisbie 41637, full brother to Valjejo Girl 2:10¼ and Tom Smith 2:13¼, was then led out, and at once the regret was expressed that there was no horse show in California, for this horse would capture the blue ribbon, no matter how many competitors were entered against him. A real coal black,—the black that does not turn brown,—he has a head and crested neck like a thoroughbred, a perfect back and loin, from points of hips across he is symmetrical, his shoulder slopes to clean, sharp withers, he is deep through the heart and barrel (not drawn up), is very close coupled, and stands perfectly on as fine, flat, cordy legs as any horse that ever started in the Derby. He is faultless in repose, while in action he is an "exemplar of the poetry of motion." All the colts and fillies by him out of pacing mares are pure gaited trotters, and as he is a representative of one of the greatest combinations of bloodlines created: McKinney-McDonald Chief, Ethan Allen, and thoroughbred, he inherits the right to sire beauty, color, speed, and class. Daisy S., the dam of Gen. Frisbie, was one of the gamest road mares in Solano county, and, when placed in the harem, produced six in the 2:30 list, including Prof. Heald 2:09¼. Her dam, Fanny Rose, produced two in the 2:17 list, and she was out of a mare that won several running races and when mated with Vick's Ethan Allen Jr. produced Prince Allen 2:27, a full brother to Fanny Rose.

It is a recognized fact that the Demonio mares, when bred to stoutly bred trotters, have produced some remarkably good ones. For instance, Zomblock 2:26, in R. J. MacKenzie's string; Del Ray, the stallion that paced a trial mile in 2:05 as a three-year-old, and several other "phenoms" and these mares on the Suisun Farm will undoubtedly be placed in the phenomenally fast class also.

In the fields I saw a fine three-year-old black filly by Unimak, dam Annabelle, by Demonio; grandam May Norris, etc.; a bay filly my Demonio, out of May Norris, and a bay filly by the same sire out of Laura H., by Nutwood Wilkes; it would be hard to heat them in any show ring.

Among the yearlings I noticed a brown filly by Gen. Frisbie, out of Memonio 2:09½, by Demonio; a brown filly by the same sire out of Elvira, by Demonio, grandam Hannah; a bay filly by Demonio, dam Minerva, by Guy Wilkes 2:15¼; bay colt by Demonio out of Mamie Airlie, by Prince Airlie; a bay filly by Demonio, dam Olita, by Bradtmoor; a bay filly by Demonio, dam Laura H.; a chestnut colt by Demonio, dam Hannah; a chestnut filly by Demonio, dam Potrero Girl; a black colt by Gen. Frisbie, dam Edna Earl, by Demonio, second dam Olita, by Bradtmoor. Nearly all the dams of these fine, lusty-looking youngsters—the best lot ever bred here—are speed producers. And, from present indications, (as all who have Demonios in training elsewhere declare they have sure winners as soon as the bell rings), it looks as if these youngsters will bring good prices when led into the sales ring this fall.

Over in the broodmare paddocks every mare is in foal, and Mr. John Haile, who has been on this farm for over twenty years and is associated with Mr. Rush in the ownership of these horses, has the mares looking fat and the youngsters as "gentle as kittens," and takes great pride in listening to the favorable comments made on his pets.

The pleasant day was brought to a close, and on the return trip many were my conjectures about the future of some of the beautiful colts and fillies I had seen on that pleasant trip where I was so hospitably entertained.

Drink Jackson's Napa Soda.

NOTES AND NEWS

Vera Hal's record is 2:07 $\frac{1}{4}$, made at Marysville.

Hay is selling for \$28 and \$30 per ton in Los Angeles.

Dr. Rae Felt, of Eureka, is to ship three or four trotters to Chas. De Ryder today.

Budd Doble, manager of the Hemet Stock Farm, is busily engaged compiling a catalogue of the stock on this farm.

Chas. Whitehead, of Pleasanton, has had the Demonic pacing stallion, Ulattis 2:24 $\frac{1}{2}$, sent to him to prepare for the races.

We don't know of any better way for a man to bury his stallion than to keep his name out of the advertising pages of the horse papers.

'I would sooner mate my mares with a jack,' writes a Kansas breeder, "than send them to a positive sire of speed and then neglect naming them in a few futurity stakes."

That pacer George H. Estabrook recently purchased has been chronic'd as Hol Wise, Hal Wise, Holewis, Howise, etc., and Mr. Estabrook in self defense will call him Denver Jay.

We learn on excellent authority that Joe Cuicello did not go on the same vessel to Australia with Andy Robertson and his big string of horses, but on another, and is now in Australia.

J. C. Adams, of Phoenix, has sold to George Watson, of Chicago, Ill., the yearling colt Vernon Clark, by Milo McKinney (own brother of Sweet Marie 2:02), dam Nordica (2) 2:18.

T. W. Barstow came to the San Jose race track yesterday with his royally bred stallion Nearest McKinney 2:13 $\frac{1}{4}$, and several other younger ones which he will train this year.

When a duck lays an egg, she goes on quietly and says nothing. The hen, upon consummation of the same accomplishment, promptly cackles and raises an awful rumpus. Just see what a difference in the demand for ducks' and hens' eggs. Advertising did it.

Don't forget to go and see that splendid consignment of McMurray carts and sulkies which the agent, W. J. Kenney, 531 Valencia street, has for sale. It will pay you to make your selection now.

B. Rebmke, of Woodland, is the owner of Princess Dione (full sister to Bernice R. 2:11 $\frac{1}{4}$), by Dexter Prince, out of Dione 2:07 $\frac{1}{4}$. She has a yearling filly by Pallite that promises to be as good as any of her family.

Dr. Harvey, one of the leading veterinarians in Eureka, Humboldt County, has just purchased a Bonnie Steinway colt, dam by Wayland W., that will be four years old this spring. He is a trotter and will be seen at the races this year.

Gen. Sherman remarked "War is hell!" Some of the bookmakers' clerks who have been idle for weeks near the scenes of conflict in Mexico, declare he had the right "dope," for "Juarez hell!"

Wm. Maloney has a bay gelding at Hans Frelson's that is by Unimak, out of the dam of Jack (trial 2:12), by Hart Boswell; second dam by Menlo 2:21 $\frac{1}{2}$; third dam by Fallis 2:23. This is a very promising trotter.

Monroe Salisbury was one day invited to see a stallion. He asked: "What is his record?" "2:11 $\frac{1}{2}$, but I don't know his exact breeding," replied the owner. "He can't need any," quickly replied Mr. Salisbury. "2:11 $\frac{1}{2}$ race record, is pedigree enough for any horse!"

Patsy Davey is driving Solano Boy 2:15 and Tina 2:20 $\frac{1}{2}$ (trial 2:15) together and as both are thoroughly broke and do not "pull a pound" they make an ideal pair. Solano Boy has wintered well and will be in the 2:10 list to the credit of Tom Smith 2:13 $\frac{1}{4}$, his sire, this season.

One of the handsomest colts at San Jose belongs to Chas. M. McCarthy. He is seven months old and is by Bon McKinney 2:24 $\frac{1}{2}$, out of School Belle 2:16 $\frac{1}{4}$, by Prodigal 2:16; second dam Maria Bell, by Albert W. 2:20; third dam Ma Belle, by Echo, etc. He is just as promising as his rich breeding warrants.

Ray Mead, proprietor of the San Jose Driving Track, for the past four weeks has been leveling, plowing and seeding the entire infield and every available foot of land on this property in alfalfa. It is his intention to sink two wells to get sufficient water for the irrigation of this land. Mr. Mead has many other improvements in contemplation and expects to complete this race track and fair grounds will be one of the finest in California.

Cohen, the clotbier, followed a customer out to his buggy.

"Dot's a pretty fine horse you are driving," he commented approvingly.

"Yes, he's a good one."

"How much would you sell him for?"

"Seventy-five dollars."

"Mein Gott! is he silk-lined?"

C. C. Crippen has Guy Carlton 2:30, a horse, by the way, that has grown considerably the last year; Re-deem, by Directum II (he by Directum 2:05 $\frac{1}{4}$, out of Little Witch 2:27, by Director 2:17), dam Muriel C. 2:29 $\frac{1}{2}$ (sister to Bob Ingersoll 2:14 $\frac{1}{4}$), by Nutwood Wilkes 2:16 $\frac{1}{2}$, and the Kinney Lou mare, Della Lou 2:23, at the San Jose track.

Henry Rohner, of Eureka, Humboldt county, can be seen jogging his filly by Nutwood Wilkes 2:16 $\frac{1}{2}$, dam by Bonnie Direct 2:05 $\frac{1}{4}$ every day. He recently purchased her from that good horseman, T. W. Barstow, of San Jose, and is delighted with his bargain. He says she takes to the pace like a duck does to water.

May T. 2:15, by Monterey 2:09, out of Melba by Nutwood Wilkes 2:16 $\frac{1}{2}$, has a beautiful filly by Bon Guy (3) 2:11 $\frac{1}{4}$, that is the most ambitious and busiest little trotting miss one could wish to see, and Joe Twohig, her owner and trainer, is very proud of her. This year he will breed May T. to Tom Smith 2:13 $\frac{1}{4}$, the sire of Futurity winners. The union will certainly be a happy one.

Irving Pointer, sired by Star Pointer 1:59 $\frac{1}{4}$, dam Maud J. C. (dam of Nearest McKinney 2:13 $\frac{1}{4}$) by Nearest 2:22, is owned by Wm. Stuart, of Eureka, and never looked better. After making a short season in the stud he will be trained. This is one of the handsomest, most promising pacers that ever stood in Humboldt county. His progeny (now weanlings) are very much like him.

Attention is called to the advertisement of the twelfth annual sale of high-class horses to be held at Portland, Oregon, under the auspices of the Portland Horse and Cattle Sale Company, April 16 to 20, inclusive. Entries to it will close March 10. This is a fine opportunity for California horsemen to dispose of all horses they desire good prices for. Further notice next week.

M. C. Keefer, of Woodland, purchased a very handsome mare recently and shipped her to National City to be trained by Chas. A. Spencer. She is seven years old, has no record, but undoubtedly will have one, for she has a perfect trotting gait and when called upon can show enough speed to satisfy anybody. She is by that good sire of game racehorses, Prince Ansel (2) 2:20 $\frac{1}{2}$, out of a mare called Bonnie Derby, by Charles Derby 2:20, grandam Bonnie Red, by Prince Red, son of Red Wilkes.

Jack Villar has three in his stable at the San Jose race track which he is preparing for the races: Lady Arabella (trotter) by Alta Vela 2:15, dam Anna Belle 2:22 $\frac{1}{2}$, by Dawn 2:18 $\frac{1}{4}$; Direno, a three-year-old pacer by Demonic 2:11 $\frac{1}{4}$, and Lady Dell, by Del Coronado 2:09 $\frac{1}{2}$, out of a mare by Owyhee 2:11, grandam Coquette by Wilton. This mare is six years old, and like her stable companions, is a good one, at the San Jose track.

L. E. Barber, of Milpitas, has sent his handsome mare Madge, by Silver Bow Jr., to be bred to Tom Smith 2:13 $\frac{1}{4}$. This mare was bred to the late F. H. Burke's stallion Lord Isle, by Zolock 2:05 $\frac{1}{4}$, and produced a colt which Mr. Barber calls Burke, and turned him over to Joe Twohig to train this year at San Jose. This youngster is one of the best-limbed trotters there, as well as one of the most promising He will never disgrace the name, that's sure.

Judge Brents, of Oregon, has one of the handsomest trotting yearlings ever foaled in Santa Clara county. She is by Ben Voyage 2:08 out of Magladi 2:07, by McKinney 2:11 $\frac{1}{4}$. This baby knows no other gait, but when hitched up starts off like her sire and seems to be always ready to show that she is proud to be like her daddy and that her mother's gait (pacing) is unknown to her.

The stallion Vasnut, by Vasto 2:16 $\frac{1}{2}$, out of Daisy Nutwood (dam of Consuelo S. 2:07 $\frac{3}{4}$), by Nutwood 2:18 $\frac{1}{2}$; grandam Ruth Ann (grandam of Prince Nutwood 2:16 $\frac{1}{2}$), by Bell Alta, which belongs to T. F. Kiernan, of Modesto, is eligible for registration for Daisy Nutwood is also the dam of Daisy Direct, by Direct, that got a record of 2:19 on the Goshen track, New York, August 23, 1906. That gives this mare two in the 2:30 list. The Year Book gives this record, but omits it in its list of 2:30 performers. Credit should be given the sire and dam for this good trotter.

When Mr. S. S. Bailey, of Pleasanton, purchased that remarkably fast and game three-year-old trotting stallion Bon Guy 2:11 $\frac{1}{4}$, he noticed that one of his hoofs was in a bad shape. The front was concaved and the heel was badly contracted. He determined to make a change, so he took the horse out of training and has gradually, after almost a year's treatment, restored the hoof to its proper shape and at the same time has this horse balanced so that he trots with very light shoes and "folds" better. Bon Guy will a formidable rival for our 2:10 or better trotters this year.

Vallejo Girl 2:10 $\frac{1}{4}$ and Blancheward (dam of China Maid 2:05) have been bred to Bon McKinney 2:24 $\frac{1}{2}$. Every day there is an application for services to this magnificent young Bon Voyage stallion at San Jose, and these are from owners of some grandly bred mares. The fact that he is known as a sure foal-getter and also that those of his progeny which have appeared are models of beauty, and are pure-gaited trotters, has much to do with his popularity.

Mr. S. S. Bailey, proprietor of the Pleasanton track, retired from the ranks as a horse breeder some time ago and sold all but a few mares. One of these, by his good horse Tidal Wave 2:06 $\frac{1}{4}$, out of a mare by Zombro 2:11, however, he bred to his stallion Bon Guy (3) 2:11 $\frac{1}{4}$, and the other a mare called Silpan by Silver Bow 2:16, out of Kitty Fox by Pancoast, which he purchased from Mr. S. Stiles, is in foal to his stallion Prince Seattle 2:25 $\frac{1}{4}$. He says the foals should be coming along some time next month.

The following mares were bred on the Woodland Stock Farm and are in foal to the handsome Zombro stallion El Zombro, now in R. J. MacKenzie's string at Pleasanton: Steina, by Steinmont, dam Francisca, by Altamont; Gay Princess, by Prince Ansel (2) 2:20 $\frac{1}{2}$, dam Nosegay, by Langton; Evelyn B. (sister to Wesos 2:12 $\frac{1}{4}$), by Prince Ansel (2) 2:20 $\frac{1}{2}$; Princess Jose, by Prince Ansel, out of Josie D., by Nutwood Wilkes 2:16 $\frac{1}{2}$; grandam Everette, by Nephew; great grandam Evangeline, by Longfellow, and the double producing mare Anselois, by Prince Ansel, out of Chamois, by Shamrock (2) 2:25.

Laura A. Keyes is the name of the much-talked-of Alconda Jay-Helen Keyes three-year-old filly at San Jose. She is a trotter of high class and her trainer, H. D. Brown, has cause to feel proud of her. He says every time he drives this little filly he realizes what a great loss the death of her dam was to the trotting turf, for undoubtedly she would have been one of our greatest broodmares. Under the name of Helen Dillon she got a record of 2:21 $\frac{1}{2}$ in the East, but had trotted miles in her workouts in 2:08 $\frac{3}{4}$ and 2:09.

It is very seldom we have to note that a well-bred mare has been stolen, but this is one of those occasions: La Belle Altamont, a bay mare with black points, off hind leg showing scars of being fired and blistered, forefoot scarred by barb wire cut. This mare is ten years old, weighs 1000 pounds and has a very light foretop and hair on tail rather thin. She is due to foal in April, and was stolen from a pasture field near Fitchburg, Alameda county, last Saturday. A reward of \$50 will be paid at this office for her return and \$50 will be paid for any information that will lead to the conviction of the thief.

H. D. Brown, of San Jose, has one of the most promising trotters in California, or in fact anywhere in the United States. She is a beautiful seven-year-old mare by Alta Vela 2:15 (a horse that is considered by the majority of horsemen to be and of the purest gaited and gamest trotting sons of Electioneer), out of a mare by Diablo 2:09 $\frac{1}{4}$; grandam by Nephew. She is called Camilla and trotted miles in 2:09 $\frac{1}{4}$ last fall. She needs very few boots and always has her speed. Mr. Brown says if he does not sell her he will enter her throughout the Pacific Coast racing circuit.

C. A. Harrison, Seattle, last week bought two two-year-old fillies from Woodland for John W. Considine. The youngsters were owned by Mr. Alex. Brown, and been in training at Keefer & Spencer's Woodland Farm. Both are by Prince Ansel 2:20 $\frac{1}{2}$; one, a brown filly, is a full sister to Prince Lot 2:09 $\frac{1}{2}$; the other is a chestnut, and out of a mare by Mendocino 2:19 $\frac{1}{2}$. They are trotters and look like they had a lot of class. Charlie Spencer was given his choice of the two for training, and he picked the chestnut, although she has not shown the most speed. Walter Maben will train the sister to Prince Lot. Mr. Considine has not seen his new purchase yet.

Chauncey H. Sears, of Fall River, Mass., one of the best known of the amateur harness horsemen in the East, is a guest at the Palace Hotel, San Francisco. Sears has been spending a few weeks in Southern California and will remain some days here. Accompanied by S. Christenson, he is visiting Pleasanton today. The Easterner is an enthusiastic member of the Charles River Speedway of Boston, and owns two well-known trotters—Chase 2:07 $\frac{1}{4}$ and Major Wellington 2:08 $\frac{1}{4}$. He was a partner with Ed "Pop" Geers in the filly Harvester Girl that died last Christmas.

There is a fine large black McKinney stallion called Constructor at Vallejo, he has never obtained a record although repeatedly driven in 2:15; he is a full brother to Vallejo Girl 2:10 $\frac{1}{4}$, Tom Smith 2:13 $\frac{1}{4}$, and Gen. Frisbie at the Suisun Stock Farm. He has quite a number of very promising trotters out of ordinary bred mares at Vallejo while at San Jose his daughter, Mabel Claire, out of Lady Belle Isle, which is entered in all the stakes is one of the best there. She is a pure gaited trotter and is just recovering from a little lameness. When fully restored she will be a rival worthy of meeting any trotters of her age in California. She belongs to Mrs. F. H. Burke and is being trained by Patsy Davey.

Directly 2:03¼ was purchased at Liberty, Indiana, for \$1,000 by Charles Smith, of Phoenix, Arizona, and was shipped there last Monday.

L. R. English, a prominent horse breeder of Chino, has a large string of harness horses as well as a large string of saddle horses which he will take around the Pacific Coast Circuit. He claims that he is going to break the track record at Fresno, established last fall by Copa de Oro.

Seven hundred horses are used by the Frank Parmalee Transfer Company of Chicago, and the present intention is to increase the number. Except on long hauls, the horse has proven to be the best motive power.

A subscriber to Colman's Rural World gives the following as a sure cure for bog spavin or thorough-pin: Take one quart of best cider vinegar, a lump of salomoniac equal to the size of a goose egg; dissolve and apply, rubbing in thoroughly. This will be enough to cure two or three horses, will not blister or take the hair off.

The Boquet (trial 4, 2:17¼), by Nushagak, out of Woodflower (dam of Prince Ansel 2, 2:20½, etc.), by Ansel 2:20, grandam Mayflower, is heavy with foal to The Bondsman and will be bred to The Proof (2) 2:29¾ this season. Mr. Brown, her owner, believes she is one of his best broodmares, and there are many others who share this opinion with him.

J. David West, the well-known harness maker, is the Pacific Coast agent for the celebrated "Sell brand" of Horse Goods, and will carry a full and complete line. He will also be pleased to send very comprehensive and interesting catalogues of horse goods to all who send their names and addresses to him, 1265 and 1267 Golden Gate avenue. See advertisement.

C. A. Harrison's good five-year-old gelding, North Star Pointer, by Star Pointer 1:59¼, will be trained this year if Mr. Harrison does not trade him for a trotter before the training season opens. He is a grand-looking horse, 15.3 hands high, weighs 1100 pounds; he is a natural pacer, needs no rigging, and has a lot of speed, although the fastest mile he was ever asked for was 2:29; he has stepped quarters in 31 seconds. A curb threw him out of training last year, but he is now sound again. He is a grandly-bred horse, being out of Maid of Del Norte 2:26½, second dam Little Maid 2:13, by Rockwood; third dam by Hambletonian Mambrino; fourth dam by Black Stranger, son of Gen. Knox; fifth dam by Waterloo, one of the early days' sires of Oregon.

Last Monday evening about twenty members of the Salinas Driving Club met in the law offices of Norris & Warth, Salinas, to adopt by-laws, elect officers, and get organized. W. E. Norris, of the committee appointed for that purpose, reported a draft of by-laws which was adopted, and then the club elected officers as follows: Jas. N. Anderson, president; A. J. Zabala, vice-president; J. P. Nichols, secretary; W. Parsons, treasurer, and W. E. Norris, historian. The initiation fee is \$5 and dues \$6 a year, payable semi-annually. The club will hold a workout meeting April 1 and a matinee race on May 1, club meetings the second and fourth Saturdays.

George Hammitt is the name of a counterpart in conformation of his sire Nutwood Wilkes 2:16½, but he is a rich bay in color. He is three years old and belongs to Chas. M. McCarthy, who has him in Joe Twobig's hands at the San Jose track. George Hammitt is a trotter and last fall it seemed no effort for him to trot as a two-year-old in 2:20½. He is level-headed, sound and kind, has no blemish, and from his breeding should be a race horse of the highest class, and after that, a sire of noted horses. His dam is School Bell 2:16¼, by Prodigal 2:16; second dam Maria Bell by Almert W. 2:20; third dam Ma Belle, by Echo; fourth dam Mabel (sister to Beautiful Bells 2:29¼, dam of 11) by The Moor 3:70; fifth dam Minnehaha (dam of 8), by Bald Chief. There's plenty of good blood lines in his pedigree.

At the closing out sale of August Uihlein's trotting stock at Milwaukee, Wis., March 20, there are many grandly bred stallions, mares, colts, and fillies to be sold. One yearling colt in particular should attract attention anywhere; he is called Sir Harvester. He is black with tan muzzle and flanks, sired by The Harvester 2:01, dam Rosario (trial 2:18), by McKinney 2:11¼, out of By By (dam of 2), by Nutwood 2:18¾. Rosario is a full sister to Marengo King 2:29¼ (sire of Marie N. 2:08¼ and Palo King 2:28½, sire of Little Lucille, 3, 2:09, etc.), and she was the handsomest and most promising McKinney mare ever bred at the Santa Rosa Stock Farm. She was never worked for speed after Messrs. Henry and Ira Pierce sold her to Mr. Uihlein. He used her for his personal driving as she had ideal manners, needed no boots, and had "speed on tap," as he used to say, at all times. She is now in foal to Electrification 2:19¼ and is to be sold also. She is fifteen years old. Sir Harvester, her son, is like her, pure gaited and remarkably handsome. He is entered in several of the largest futurities. What a sire he will make for some one!

Drink Jackson's Napa Soda.

SALE OF PLEASANTON TRACK.

In our last issue we published the announcement of this sale. The Pleasanton "Times" has the following additional information as to the transfer and improvements contemplated. It is needless to add that horsemen everywhere are pleased to know that this historic course is not purchased by the Spring Valley Water Works, as it was rumored it would be.

The new owner, Mr. S. S. Bailey, assumed control of his new acquisition on the first day of March, Mr. H. E. Armstrong relinquishing his hold on the property at that time.

The news of the transfer of this famous training ground and the advent into the California field of Mr. Bailey, who is an Oregonian and has for years maintained an extensive breeding and stock farm near Albany, will be met with much satisfaction among horse owners and trainers, not only in the West but in all parts of the country. Mr. Bailey contemplates the expenditure of \$15,000 to \$20,000 in improvements at once and will hasten to put the track itself into first-class condition just as soon as possible.

One of the chief improvements he intends making is the installation of six stand pipes for track watering purposes, present facilities are such that proper watering and care of the renowned training ground, is not possible to the degree necessary.

He will also build a clubhouse, with commodious lounging rooms and a wide veranda, where horse fanciers may congregate and watch workouts, and where a general meeting place of those interested in the game may comfortably take place.

All stalls and stables needing attention about the foundations and roofs will be repaired, and fences, paddocks, and other improvements on the property, will be put into serviceable shape. A pole fence will also be constructed and the boundary fence, in certain places at present in a dilapidated condition, is to be remodeled and extended the entire length of the property. In fact, the track and grounds will be modernized in every way and everything requiring attention will receive it as soon as practicable.

Mr. Bailey will also purchase or build a full complement of track-working tools and implements and constantly keep a man on the speedway that it may be in the best of training condition at all times. This one feature alone, promised by the new owner, means more to Pleasanton than is realized by those who are not directly interested in the horse-training vocation. Constant attention to the track-hed is absolutely essential and by means of the six standpipes to be erected, furnishing an abundance of water, the work of accomplishing this condition will be made easy.

Electric lights will be installed immediately, so that there will be no more complaining about the darkness of this place at night.

The acreage not used for track purposes and heretofore used for paddocks, etc., consisting of over eighty-five acres, Mr. Bailey, realizing that to make his investment pay should be utilized in some other manner, has decided, the soil being excellent for that purpose, to farm to peas, corn, and alfalfa, and to carry on extensively the hog-raising industry.

In an interview with the editor of the "Times" the new owner stated:

"Yes, you may say I have purchased the Pleasanton training park and that I contemplate many improvements to begin just as soon as I can conveniently arrange to do so. There are many things needing attention and they cannot be done all at once, but I estimate it will take from \$15,000 to \$20,000 to do what I am figuring on. My chief aim at present is to put the track itself into the best of condition, and if tools and men will do this such will be done.

The fact that Pleasanton and the State of California, with its wonderful climate and promising outlook, has attracted the investment of Oregon capital, is a pleasing knowledge. Mr. Bailey has a wide acquaintance in the West and with extensive interests in the North, is a capitalist whose association with various ventures has always been sought.

There is no question in the least that Pleasanton will be a large gainer by the deal just consummated and that the renowned training ground, which has turned into the racing world as many, if not more, faster animals than any other locality in existence, will gain even a wider reputation than it has enjoyed in the past.

The reported purchase price of the property is \$65,000. It is well to note that since owned by Mr. Armstrong, a large grandstand was built and other improvements made. These, with the ones contemplated by Mr. Bailey, will provide Pleasanton, without any question, coupled with its ideal climate and adapted soil for training purposes, the finest training ground for harness horses in the United States.

The MacKenzie string of horses under the care of Havis James and G. H. Spencer are doing better and are further advanced in their training at Pleasanton than they were this time last year. The mild winter has made it possible for every member of this string to be worked daily. Zomblock, the phenomenally fast Zombro stallion, was quite sick but since his recovery seems to display more vim and has more strength than he ever had. The other Zombro horse, El Zombro, is a different type, but is doing remarkably well. Vernon McKinney, Bert Kelley, Merry Widow and Joe Patchen II have recovered from their ailments and by the time the races are called they will be ready. The owner, Mr. MacKenzie, is satisfied that a genial climate and a soft and well kept race track combined with great care is a combination that is hard to beat.

LOS ANGELES MATINEE RACES.

Several hundred lovers of good harness racing, among whom were many women and white-haired men, hugely enjoyed the Washington day matinee programme given at Expositon Park under the auspices of the Los Angeles Driving Club.

There were seven races, including both trotting and pacing. All events were for the best two out of three heats. Although every one was won in straight heats, there were several exciting finishes, and good time was made. The matinee was also characterized by good getaways.

The free-for-all pace, won by Miss Jerusha, driven by Al Russell, was the big feature of the afternoon card. This pretty traveler made the first heat in 2:09¼. Buck, driven by E. A. Reichel, finished second, and L. J. Christopher's beautiful black Alecer was a close third in both heats. In the first heat Alecer had the pole all the way until the last turn. In the second heat Buck was unable to overtake the winner.

These three racers started off in both heats with an even getaway, traveled in a bunch all the way around the mile track, and finished neck and neck. There was not a break in the two heats and, as the evenly-matched horses finished, their drivers were cheered by the enthusiastic crowd.

The 2:30 class pacing, the last event of the day, was another most interesting contest, four pacers contending for the blue ribbon. Mahel H. won both heats, but in each the four horses were strung out and it looked as if it was anyone's race up to the finish. In the first heat Burney lost the pole by breaking before reaching the first quarter and Dr. Hall later broke. Catalina Goat, driven by Charles Chick, hard-pressed the winner at the finish in both heats, but lost all chance to win by breaking at the stretch when just behind the first horse, and then losing second place in the second heat.

In the three-minute trotting class Zola was an easy winner. The 2:40 class trotting event, won by Bobby Boy, driven by R. B. Morehead, was characterized by considerable running. Voyaguer and Joe made a pretty race in the fourth event, the 2:30 class trotting, but Joe was unable to keep his feet at the turn on the turn, could not overtake the speedy Voyaguer.

The 2:20 class pace was won by Hall Mc, driven by J. W. McClain, the second heat being made in 2:16¾. In an exhibition mile against time, Lady Love, driven by Sam Watkins, trotted the distance in 2:12. This replaced the free-for-all trotting event, as the other horses entered did not arrive for the race.

E. J. Delorey was starter and L. J. Christopher, W. A. Glasscock, and John W. Nickerson were judges. The results were as follows:

| | |
|--|------------|
| Trial to beat 2:25, pacing: | |
| Zoco, b. h. by Zombro (Maben) | Time—2:20 |
| Trotting, 2:40 class, two in three heats: | |
| Zola, br. m. by Zolock (Watkins) | 1 1 |
| Clinchfast, b. c. by Trampfast (Tiffany) | 3 2 |
| Major, b. g. by Zombro (Thomas) | 2 3 |
| Time—2:48, 2:44. | |
| Trotting, 2:40 class, two in three heats: | |
| Bobby Boy, by Pettigru (Moorehead) | 1 1 |
| Carsto, by Carlokin (Tiffany) | 2 2 |
| Bob, by Strathway (Holcomb) | 3 3 |
| Time—2:30, 2:35. | |
| Pacing, free-for-all, two in three heats: | |
| Miss Jerusha, by Zombro (Russell) | 1 1 |
| Buck, by McKinney (Reichel) | 2 2 |
| Alecer, by Symbolien (Christopher) | 3 3 |
| Time—2:09¼, 2:12. | |
| Trotting, 2:30 class, two in three heats: | |
| Voyaguer, by Bon Voyage (Clark) | 1 1 |
| Joe, by Simonero (Dodge) | 2 2 |
| Time—2:28, 2:28. | |
| Pacing, 2:20 class, two in three heats: | |
| Hall Mc. (McClain) | 1 1 |
| David St. Clair (Nickerson) | 2 2 |
| Time—2:25¼, 2:16¾. | |
| Exhibition mile against time, trotting class: | |
| Lady Love, by Chief Whips (Watkins) | Time, 2:12 |
| Trotting, 2:25 class, two in three heats: | |
| Bon Volonte, by Bon Voyage (Clark) | 1 1 |
| Alarich, by Direcho (Duell) | 2 2 |
| Time—2:20¾, 2:20. | |
| Pacing, 2:30 class, two in three heats: | |
| Mabel H., by Zombro (Field) | 1 1 |
| Burney, by Marmute (McCaugh) | 3 2 |
| Catalina Goat, by Young Hal (Chick) | 2 3 |
| Dr. Hall, by Hal B. (Watkins) | 4 4 |
| Time—2:22, 2:26¾. | |

LIVESTOCK COMMITTEE APPOINTED.

To show our readers how far matters have progressed in regard to an International Stock Show, to be held during the existence of the Panama-Pacific Exposition, says our esteemed contemporary, the "Butchers and Stockgrowers' Journal," we desire to inform them that President Moore has already appointed a committee to arrange for the 1915 livestock show. The committee in question consists of A. W. Foster, A. W. Scott Jr., S. F. Hogue, C. Walters, and E. W. Howard. These gentlemen, or at least some of them, will be present at the annual meeting of the California Livestock Breeders' Association next Saturday.

The appointment has, we are glad to say, been made in good time, as it will enable the members of the exposition committee to give stockmen some idea of what will be expected of them. Then it will be up to them in their various localities to take the necessary action to stimulate preparations for the great event. Everybody has got to work, and even father will on this occasion have to take off his coat and sail in. When the time comes for the show, it will never do for California to take a back seat. We are not used to that, boys, so go to the Palace Hotel this Saturday, hear what the exposition committee has to say, discuss the subject, pass the necessary resolutions, and then go home and get a move on.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DOWITT.

RANDOM NOTES.

[By J. B. Thompson.]

The Irish setter is not as prominent a breed as it was a few years back. It holds a lofty position on the bench exhibits; and those who are still faithful adherents to the breed, have abundant faith in their future prospects. But it is only on a few very rare occasions when they are seen in the field on game. On the bench they are still well represented, and great pains have been taken to hold them up to a desirable type that will conform to the rules of judging and public favor. So well have they held themselves in popular esteem of the show followers, that it is not infrequent to find the number of Irishmen entered equal to that of any other of the breeds used for shooting purposes. But in the field, the breed is almost a rarity, and it is worthy of comment to note the scarcity of this once highly faddish shooting dog.

With the importation of the so-called Llewellyn breed, a strain of the English setter, and the rapid advance of the smooth coated pointer as a serviceable dog; the popularity of the red dog as a hunting companion began to decline. A number of years ago the breed was looked upon as the "general purpose" hunting dog. He was looked upon by sportsmen in the same way the Morgan horse was appreciated by the horseman; as the animal that was the nearest adapted for general utility purposes. And like the horse mentioned, he was ahly fitted to perform the duties required. The Morgan horse, though at times slighted by the advent of other breeds, still retains a place among his supporters, which no other blood and breeding has been able to fill. But the red dog lost his prestige through the actions of those who were really the most interested in him. With his good coat, keen nose, bravery and endurance, he was well fitted to perform any of the ordinary tasks required of a dog; from work in the prairies, the tangled coverts of undomesticated growth, upland cover, the cold plunge in icy waters after ducks, or the wearing plodding in the slashes, he performed under all conditions well, and willingly.

Unfortunately type and color had proved his downfall, and since it was so strongly featured by his admirers, it permitted the English setter and the wiry pointer to assume a place in the heart of out-of-doors sportsmen that he will never be able to supplant; if we are to judge by the mediocre strides for recognition he has made in the last few years. As type and the color had began to be esteemed above excellence in the field work, the dog gained in the desirable hench show qualities, but depreciated in his field worth.

The rage for the dark mahogany color on the hench sounded the death knell to his field greatness. Individuals, a trifle off color, that would have materially assisted in perpetuating the hunting instincts through generations, were curtly put aside as breeders, and in their stead were substituted animals having the favored coloring of coat so appealing to the eye; but hunting ability unknown. So emphatic was the demand for the hench show color, we can remember how often we have been regaled by the controversies of the red breeders in the sporting press, and how they raged in newspaper conflict, if one breeder happened to state that his opponent's dog had one or two black hairs in his coat; or possibly it might have been an off shade.

If all the efforts in advertising the colors had been expended in selecting capable field dogs, it is reasonable to expect that the breed would have held its own with any other on game. We hear the advocates of this breed today still claim the greatness of their dogs for field purposes, and we willingly admit that they have yet many able representatives; but it is solely a case of individuals, not the masses.

How many Irish fanciers have proclaimed field trial aspirations within the last fifteen years; but among the starters only a very few have even secured place. They lacked the steam of the trialers and the ability to find birds at the clip the other breeds set as a standard.

All hopes for the breed have not passed, and there are numbers of these worthy animals that through judicious breeding can elevate the race up to the height of field excellence that it once had attained. But it must be accomplished through those individuals that are conspicuous by their brilliancy on game, and not through the influence that has won them prestige on the bench. They were bold, strong dogs, and if the breeders aim at the qualities of persistent hunting which they were known to possess, and many do yet, we can save them from falling back into the distances of disrepute their advocates have brought them to.

Instances innumerable crop out where sportsmen will not keep a bird dog on account of its natural predilection for poultry. The only course they pursue to stamp out this destructive habit is constant effort with the whip; and as it so often fails to do much good, only as a warning to the dog to subdue his inclinations in that line while the master is present, we are forced to resort to some other scheme that will eradicate this annoying part of his natural

instincts. We realize that the whip is only occasionally successful, causes us to lose our temper, and exert physical strength that might be better employed at something else. It is not alone at home where this habit becomes undesirable, but out in the field near game countries where we are forced to pass through the farmers' yards, along the roadside where the ubiquitous chickens afford ready temptation, or where some old hen has wandered to surfeit herself with the gleanings of the stubble fields. A malfeasance in this line, the slaughter of one 50 cent chicken within the farmer's sight, is often liable to cost you your shooting privileges, and those of others, too. So it is well at the start to instruct the pupil with a thorough abhorrence of poultry; and the incidental trouble will save many an unpleasantness.

With the man who rears puppies, if he has chickens on the place, there is very little work necessary to inculcate in the youngsters the words "thou shalt not," when chickens are in sight. With the very young dog, an old fussy hen with a brood of youngsters, will frequently flog the youngster into a realization of the folly of his ways; and the sight also of chickens in contact with him every day, will have the beneficial effect of removing the oddity and the consequent desire for capture. Personally I have had no trouble with dogs raised on the farm, for from the day when their filmy little blue eyes peeped into the world for the first time, chickens were continually in their presence. When the dog came from the city or elsewhere, and failed to assimilate the sacredness of the hen, then the fatality of the feathered tribe was in evidence, and many a pet Biddy was sacrificed to his instincts. The easiest way to cure a dog of the chicken habit is to work in another way—not by whipping him, but taking advantage of his sense of disgust. If when the youngster kills a chicken it is tied to his collar, and kept there for three or four days until it is well ripened and odorous with decaying stench, it is not often that the dog will return to the chicken habit. Sometimes it takes two or three enforcements to accomplish a cure, but this is rare. At one time I was forced to resort to extremes to effect a cure, and will relate the incident.

A friend sent to me an orange and white son of May Fly to try out, and was very anxious to know within a week what his prospects were. He came and I found him to be the most persistent poultry killer I had ever seen; he killed merely for pleasure, and there seemed to be no limit in that line. The first day out he was a terrible annoyance; if he saw a farm yard a half a mile away, he made for it in a gallop, and while I blew the whistle until my face was an apoplectic purple, it did no good. This first trial of Dan cost me four dollars, and all my reserve diplomatic forces to square myself for further shooting on that extremely desirable farm. I returned home and tied Dan; early in the morning I was awakened by a noisy disturbance among the chickens, and found that Dan had broken his chain and began an onslaught that certainly was wonderful for the limited time since daybreak, considering the numbers of dead chickens that were strewn over the yard. I collected the carcasses—I think fourteen were the numbers; realizing the inefficacy of ordinary punishment, I secured another chain and fastened him to a peach tree. I poured a goodly quantity of coal oil on the hodies. Three of them were thoroughly saturated and tied to his neck. The balance I placed in a circle around him, within the limit of his chain. I watched him carefully, he would walk up to a chicken, smell the oil, and turn up his nose with repugnance; in about two hours' time he tried to wind around the tree to avoid them. I kept him tied all of the day, and as the hours wore on saw his repugnance increase. He refused to eat that day. The following day I favored him with the same attentions, again he refused to eat. The third day I released him and awaited developments. His appetite returned, but every time a chicken approached him, he sheered off as if he had an ominous awakening to something very disgusting under cover of the chicken's feathers. Dan never hothered a chicken afterward, and I am told that, while he is only six years old, he has still retained a strong dislike toward poultry.

I have never found it essential to use coal oil in preference to anything else, for the coal tar drips will act as well. But it is not obligatory to resort to this, but if something of the kind is not used, the dog will frequently release the fowl from his neck and eat it; or find another dog who is only too willing to tear it off, but if the chicken has been doped in the manner above, the other dog will refuse to assist. These tactics can be pursued in the field on rabbits, when the youngster exhibits a strong inclination to chase fur; but if he has been handled well from the start, his quick response to the whistle, or words of command, will obviate the use of the extremes.

Tom Hopper of Spokane bagged three hears and a big cougar on a trip in the Spokane valley, recently. He is arranging a hear hunt for Adam Beede of Hastings, Neh., who will pass a month in the Spokane country.

ECHOES FROM THE NORTHWEST.

[By August Wolf.]

Claude F. Smith and Frank Cole of Spokane are planning a hunting and sightseeing trip by automobile through Washington, Oregon, California and Arizona. They expect to start early in July and cover 6000 miles in two months. From Spokane they will motor to Pendleton, Ore., thence to Portland and down south to San Diego, thence eastward into Arizona, stopping at points en route. The machine, a thirty-horsepower touring car, will be stripped to carry the guns and camp equipment and extra oil tank.

"We shall take our time and see everything worth while on the trip," said Cole. "We will have equipment to take 1500 pictures, and when we find an ideal place we'll get out and camp. Smith is a good cook and has had experience in camp life. I rode a bicycle from Minneapolis to Spokane and know what it is to hit the trail. Our machine will be stocked with provisions and fitted out in first class style."

John T. Little of Spokane, secretary of the Inland Empire Game Protection and Propagation Association, recently reorganized, says that the chief purposes are to encourage the propagation of fish and game; obtain a uniformity of game laws applicable to the Inland Empire and to correct such existing laws as are detrimental to the propagation of game and fish; also just laws providing bag limits for game and laws prohibiting the selling of game. The association will assist the game wardens in the better enforcement of the present law and its legal department will furnish expert advice in framing new game laws when desired. Mr. Little added: "We have seen the results of fish propagation in the Spokane river and nearby lakes, and equal results can be obtained in game and bird propagation."

Walter Gihhs reports that hundreds of deer in the Glacier National Park in western Montana died this winter for the lack of food and that many others are victims of coyotes. Mrs. Brewster, wife of a park guard stationed in the upper North Fork country, has been feeding deer for some time, and they have become so desperate for food that at times they will eat out of her hand. Old timers say that if the Federal government is interested in the preservation of its game that steps should be taken at once to prevent the starvation and slaughter by wild animals, or the park will soon lose its claim to being the home of the deer and the elk.

Two hundred quail have been liberated in the lower valley of Yakima county, Washington, by Frank Bryant, game warden. One hundred more will be given their liberty in a short time. This plan makes it possible for the county commissioners to keep the quail season closed for another year. Fifty pairs of Eastern prairie chickens and sixty pairs of Hungarian partridges have also been ordered for propagation this season, and another order of Chinese pheasants will be placed in the event the commissioners decide to keep the season closed against the killing of these birds.

Frank Palmer of Spokane, who uses a camera instead of a rifle in hunting big game in the Spokane country, while on a tour of the Priest Lake district recently, obtained a portion of a deer's skull pierced by an iron arrow. The skull was found by a trapper in Hunt creek. The years during which iron arrows were used by the Indians were between 1820 and 1875, which would seem to prove that the deer was shot more than thirty-six years ago.

John Kruger, a rancher near Harrington, Wash., captured an eagle on February 17. By means of horseflesh bait he tempted the big bird, one of the two seen in the vicinity during the winter, to come to earth. As the bird, which measures eight feet from tip to tip of wings, nipped at the bait, the rancher, from a hiding place, threw his lassoo, the noose of which closed upon the bird's claws.

Owen Ford, a pioneer trapper of Columbia Falls, Mont., returned home a few days ago after a stay of five months in the mountains to run trap lines. He was incapacitated nearly two months on account of freezing and suffered hardships and privations untold. Ford and M. McKay, his partner, started for the head of the west branch of Big creek, thirty miles distant, a country that has been traversed little. The men had just finished building their cabin, and had their lines set. Ford started to look over the traps when he was overtaken by the first big snowstorm in November. He had no snowshoes and was unable to make camp that night. Before he could get a fire he had frozen both feet and hands, but the next day managed to reach his cabin.

His partner started for town and Ford says he expected to be all right in at least two weeks, and as he had provisions to last longer than that he felt safe. McKay never reached town, and is thought to have been lost in the snow. In the meantime Ford's feet swelled. When his provisions gave out, and after he had put in two months there came a thaw and he started for Whitefish, where he was given medical attention.

J. A. Uhlig, game warden of Spokane county, reports that while scores of quail perished this winter, thousands were saved by the present mild weather. He is of the opinion that they are increasing rapidly since the laws were made more stringent.

A CONTRAST.

A Philadelphia paper gives the following account of shooting conditions on the 10th of February which may be interesting by way of contrast to Coast sportsmen:

"The past month or more of cold and stormy weather has placed a decided check on duck shooting along the coast of the North Atlantic States, though in the South sportsmen are still enjoying big hags. Now sportsmen are anxiously waiting for the ice to break up and go out of the bays and thoroughfares along the Jersey coast. Duck shooting from blinds during winter weather is anything but comfortable, especially when the birds are slow coming to the stools. The severe weather last month proved too much for the market gunners, who hunt on the Jersey coast when the only remaining method to reach the birds is to don a white suit and look for airholes in the ice where the ducks and geese come to feed. During the present winter, however, the ice was so thick that the airholes were scarcer than the game itself. According to the weather man, the outlook for an early break-up is good, and the guides are sending word from the shore that the severe weather cannot last much longer. Large numbers of sportsmen packed up their shooting irons last week and journeyed toward the South, some of them heading for the North Carolina coast, where they hope to escape the promised heat wave that is expected to shorten the ice crop in the vicinity of the New Jersey shooting grounds. Large number of duck, geese and brant are said to have starved to death in the vicinity of the Delaware breakwater during the zero weather last month. Many Delaware duck hunters look for excellent shooting on the lower bay marshes after the thaw gets to work on the ice. The birds are unusually plentiful this year, and this fact is considered to augur well for a couple of weeks of good hunting before the season closes on April 15. The severe January weather was the cause of the sudden ending of the upland hunting season in Virginia last week, when a bill to protect the game birds was rushed through the legislature, being promptly signed by the governor. A large number of sportsmen who were gunning in the field and uplands received notice from the game wardens to stop all hunting."

The same day the writer was comfortably seated in a blind on one of the Sunrise Gun Club ponds on the Suisun marsh. A heavy west wind was blowing and but few birds came in to the decoys. The next morning the weather was calm and delightful as a summer day. There was a good fight late in the morning and during the forenoon. Standing up in the blind one could see a few miles away here and there in the bordering foothills large fruit orchards with the trees in full bloom. Next morning going to the pond a bunch of five swans took flight. These graceful birds came in to the pond twice during the forenoon, being on the protected list, they were un-molested. At the famous old Sunrise pond nearby, that morning and the afternoon previously, before a shooting companion got into his blind and ready for operations, sprig rose out of the pond in a big bunch of about 300. That day the weather was warm enough to cause a sweater to be a very uncomfortable garment.

DU PONT GIFT FOR ROADS.

A special press dispatch from Wilmington, Del., last week states:

Gen. T. Coleman du Pont, President of the old du Pont Powder Company, will give the surplus of his fortune in building good roads not only for this State but for the benefit of adjoining States. The General has decided to make this disposition of most of his fortune rather than leave it to his children.

Dwelling on the benefits to be derived from good roads, he said:

"I believe good roads will do more good than libraries, hospitals, and in fact, than any of the usual forms of philanthropy."

Gen. du Pont wants Gov. Pennewill to call a special session of the Legislature to pass amendments to the law enacted last session which empowers him to build a two million dollar boulevard as a gift to this State. The extraordinary session will be called for next month if two-thirds of the legislators agree in writing to pass the desired amendments. They will give the donor authority to extend the proposed highway of 103 miles to providing for its construction this year. A poll will shortly be taken of the members to this end. The Governor is in accord with Gen. du Pont's proposal.

Mountain Lions.—Cougars have been doing considerable damage in the hills near Bodega, a number of ranches in that vicinity having suffered from the loss of stock supposed to have been killed by the varmints. A panther has been seen several times of late, and several parties have tried to hunt it down, but thus far without success. Not long ago a report came from Annapolis of the depredations of the panthers in that section, and only a few days ago one was killed near Cloverdale. They seem to be unusually numerous this year in Sonoma county.

The Portland, Ore., Anglers' Club was recently launched with the following officers: President, H. B. Van Duzer; vice president, C. G. Sutherland; treasurer; G. Henderson; secretary, Dr. Earl C. McFarland.

Drink Jackson's Napa Soda.

NATIONAL RIFLE ASSOCIATION NOTES.

Iowa University is still in the lead in the Western Intercollegiate Rifle Shooting League, their score of 955 being the highest score for the week's competitions, defeating Purdue University by 30 points.

The second highest score was made by the University of Minnesota, whose 946 was 85 points better than their competitor, the University of Nebraska.

The highest individual score for the week was made by Lambert of the Minnesota team, whose 94 standing and 94 prone showed a high degree of skill.

The University of California and the University of Minnesota are trailing on behind Iowa University with only one loss each for their teams.

The results of the sixth week's competitions are as follows:

State University of Iowa, 955; Purdue University, 920.

University of Minnesota, 946; University of Nebraska, 861.

University of California, 910; Kansas University, defaulted.

Michigan Agricultural College, 902; University of Arizona, 871.

University of Michigan, 888; College of St. Thomas, 811.

Standing to Date—Iowa University, won 6, lost 0; University of Minnesota, won 5, lost 1; University of California, won 5, lost 1; Michigan Agricultural College, won 4, lost 2; Purdue University, won 3, lost 3; University of Arizona, won 3, lost 3; University of Michigan, won 2, lost 4; University of Nebraska, won 1, lost 5; College of St. Thomas, won 1, lost 5.

Massachusetts "Aggies" and Princeton still lead the Eastern League with seven straight wins each. Both teams won their matches last week, the "Aggies" from New Hampshire College and Princeton from the Veterinary Surgeons by 54 points. Lloyd of Massachusetts and Carver of Harvard tied for high individual scores. All the teams are improving greatly in their scores.

The eighth week of the Interclub League series was brimful of excitement among the clubs, three teams going over the 990 mark and the low score being 958. The New Haven team won from Bridgeport and incidentally broke the record, putting up the magnificent total of 995 out of a possible 1000. Bridgeport made 990. Cleveland made a grand spurt and put a total of 994, within one point of the record. Next week the series comes to a close.

AT THE TRAPS.

Members of the Exposition City Gun Club assembled at the Presidio blue rock trap ground Washington's Birthday to take part in the opening practice shoot of the club for this season. Twenty-nine shooters participated in a program of six events. Weather conditions were most agreeable during the day.

Lester Prior's team of eleven powder burners met an equal number of trigger pullers comprising George Thomas' team. The winning team scored 116 targets out of a total of 165, against 108 targets peppered by the Tom-Toms.

Dick Reed and Toney Prior, with 24 out of 25 clay pigeons each, were the high scores in any event during the day. George Thomas, with 19 out of 20 in the first event; A. C. Stubbs' 17 out of 20 in the second event, H. D. Swalles' 14 out of 15 in the "grub shoot" and Al Cooke's 21 out of 25 in the last race were the best seven in the other matches. Joe French broke 18 out of an extra 21 he shot at.

The scores in six events during the day were:

| Targets— | 20 | 20 | 15 | 25 | 25 | 25 |
|-----------------------|----|----|----|----|----|----|
| T. D. Riley | 14 | 14 | 8 | 19 | 16 | .. |

| L. Lockwood | .. | .. | .. | 16 | 18 | .. |
| H. McCoy | .. | .. | .. | 11 | 15 | .. |

The annual meeting of the Contra Costa Gun Club was held on Tuesday night, February 20, 1912, at the Hercules Club quarters, Pinole, California. A large number of members were present and a very active and lively discussion brought out some good suggestions which will insure a most interesting and successful season, so writes Secretary McCoy.

With a good organization already perfected and the members all taking an active interest, the season will likely open up in April and run for six months. There will be at least four trophy events, including the Du Pont, Selby, Peters and the club's trophy.

The annual election of officers resulted as follows: President, Sam D. Beasley; vice-president, W. A. Simonton; secretary-treasurer, J. W. McCoy; field captain, R. R. Robinson; member of executive committee, John Silvas.

After the meeting the gun club members enjoyed

seeing the moving picture showing the Great American Handicap for 1911, held in Indianapolis. Many interesting scenes were shown in connection with trap shooting, which is the only outdoor sport indulged in somewhere in the United States every day in the year. The use of this reel was a concession made to the club by the du Pont Powder Company and it was thoroughly enjoyed and appreciated.

The club is in a flourishing condition financially, has a large and active membership from not only various parts of Contra Costa county, but includes members from San Francisco, Oakland, Alameda and a number of new members are joining for the coming season.

While considerable time was lost last season in getting organized, the field cleared and the traps installed, there was, however, about 30,000 targets shot at as it was; but with all in readiness this year, the season will undoubtedly open up and run with even more interest and pleasure.

The club's traps and shooting grounds are located at Pinole, California, being easily accessible to both the Southern Pacific and Santa Fe Railroad stations, making it possible for members from any section of this county or even the cities around San Francisco bay to attend. Any one interested in trap shooting or a lover of blue rock shooting, is eligible for membership.

Following the Sunny South Handicap a number of the star professionals, including Tom Marshall, Bill Crosby, Fred Gilbert and Rollo Heikes took a jump over to San Antonio, Texas, and shot over the new traps recently installed by the Topperweins.

President Dalton of the Highland Shooting Association of Philadelphia, recently made the assertion that his club had the best individual shot, the best five-man, 10-man, and 15-man teams in the country as well as the best two-man team over 60 years of age, and the best three-man team under 17 years. He would be glad to have matches with clubs in these events. As the club contains such great shooters as Harry Kahler, George McCarty, Charles Newcomb, F. S. Cantrell, Jesse Griffith, H. L. David, Tom Tansey and Billy Severn he comes pretty near being right.

Secretary Stanton A. Bruner of the Los Angeles Gun Club hints at a lively bluerock season down south in the following communication received this week:

"The Los Angeles Gun Club was organized February 9, 1911, with a charter membership of 126 members. The club has a keeper in charge the year round. Their grounds are located at Venice, Cal., and are strictly up to date. The club opened their grounds April 2, 1911, and up to February 1, 1912, had shot 182,000 targets. They gave their first tournament last May, which proved a big success, and for their annual tournament this year, May 10, 11 and 12, they propose to hold the largest target shoot ever given west of the Rocky mountains. The club will hang up \$3,500 cash, with optional pools on the side. The above dates were selected in order to give Eastern and Middle West shooters the benefit of the cheap Imperial Shriner Conclave rates allowed during the Shriner convention in Los Angeles.

The club is making arrangements to take care of 150 to 200 shooters, as the game is especially strong at the present time all over the Pacific Coast, and new gun clubs are being formed every day.

It is the intention to form a State association at the time of our May tournament and select dates for the first State Association shoot, also place of holding same."

At the Los Angeles Gun Club shoot two weeks ago Ed. Mitchell was high gun with 94 out of 100 targets. Wm. Pugh and J. F. Mallory broke 93 each.

Geo. Persinger, who is comparatively new at the game, showed good form, scoring 89, and Chas. Von Valkenburg, Boh Bungay, Van Brunt, Mitchell and S. A. Bruner, shooting as a squad, made a percentage of 94.

Mrs. J. F. Mallory and Mrs. Ed. Bohring again showed improvement in their scores and soon will have to be rated with their masculine opponents.

The scores made in four 25 bird events were:

| | | | | |
|----------------|----|----|----|----|
| Hagerman | 18 | 21 | 22 | .. |
| Van Valkenburg | 22 | 23 | 24 | 22 |
| Mitchell | 24 | 23 | 24 | 23 |
| Pugh | 24 | 24 | 23 | 22 |
| Middleton | 18 | 15 | 19 | 22 |
| Tows | 18 | 19 | 19 | 16 |
| Clemons | 17 | 17 | 16 | 16 |
| A. W. Bruner | 19 | 19 | 17 | 22 |
| S. C. Miller | 19 | 23 | 19 | 16 |
| Trout | 23 | 19 | 20 | 23 |
| Van Brunt | 23 | 23 | 23 | 19 |
| Mallory | 23 | 23 | 23 | 24 |
| Bungay | 23 | 23 | 23 | 23 |
| Great | 20 | 21 | 20 | 14 |
| Persinger | 21 | 21 | 23 | 23 |
| Bohring | 21 | 24 | 22 | .. |
| Mrs. Bohring | .. | 14 | 12 | .. |
| Mrs. Mallory | 6 | 13 | .. | .. |
| Kimble | 16 | 11 | .. | .. |
| Hare | 6 | 8 | .. | .. |

Henry Garrison, secretary of the Modesto Rod and Gun Club, announces that the annual tournament of the club will take place at Modesto, Saturday and Sunday, March 30 and 31. Programs will be issued next week.

W. E. Keplinger, who has been vice-president of the Peters Cartridge Company for several years, was recently chosen president of that company. Keplinger has been very close to the trap shooting fraternity for several years and numbers his friends among the clay bird shooters by the hundreds.

The Spokane, Wash., Rod and Gun Club is in for a busy season, according to the predictions of the new officers, who are as follows: President, Charles Millius; vice-president, W. D. Knight; secretary-treasurer, W. H. Echbardt; captain, C. Carson.

When the time comes to select an Olympic shooting team the question will not be whether America can get together enough good men, but rather one as to how America can find room on the team for all the good men it has. On paper American trap shooters look good enough to sweep the field.

Vacaville sportsmen organized the Vacaville Gun Club on Washington's Birthday. W. C. McBride was elected president; Henry Bassford, vice-president; W. C. Frahm, secretary-treasurer; field captain, Dr. C. A. Weldon.

The Vacaville shooters are energetic and enthusiastic, a practice shoot signalized the organization day; can you beat it? Henry Bassford, an old time crack shot, faced the traps again, the first time in 15 years. Club shoots will be held the second and fourth Sundays of the month.

Emil Holling, Joe Rice, "Hop" Lee and W. J. Higgins joined the Cowtown trigger pullers in their initial powder burning. The fact that some scores are not up in the 90 per cent row is not a criterion to go by. The gunners of that section are clever shotgun handlers, this first showing at the traps will be snowed under before the season is over.

In a team shoot, Capt. Holling's fusiliers won over Capt. Lee's sharpshooters by 8 birds—93 to 85 in a 25 bird race. The scores were: E. Holling 25, Dr. Weldon 15, W. J. Higgins 12, Dr. A. P. Finnan 10, Dr. L. Townsen 8, W. Buckingham 18. "Hop" Lee 22, W. S. Killingsworth 12, R. Rippey 14, H. H. C. Schulke 11, Dr. J. D. Wirt 8, Earl Lawrence 11, Tom McLaughlin 17.

Other scores during the day were:

Twenty-five targets—Holling 22, 24, 22, 24, 22, 25. Higgins 15, 14, 18, 18, 14, 16, 16. Dr. Waldon 14, 19, 13, 19, 20. Lee 19, 24, 23, 18, 19, 21, 21. Rice 10. Bassford 23, 21. McLaughlin 11. Erickson 18, Killingsworth 14. Buckingham 12, 14, 13.

Fifteen targets—Rice 4. Ream 6, De Bruen 3, 1; Lawrence 10, 9, 6, 8, 8; Weldon 7, Killingsworth 9, 7, 7, 8; Erikson 7, Schulke 8, 7, 3; McLaughlin 12, 8, 8; Rippey 9, Buckingham 11, Nort 4, Finan 6, 7; Reynolds, Townsen 4, 7.

Ten targets—A. Erikson 7, 11, 8, 7, 5; Rice 4, Waldon 7, 9; McLaughlin 11, Killingsworth 8, 6; De Bruen 1, 2, 2; Wirt 4, 0; Marshall 4, Lawrence 4, 4, 3, 8; E. H. Ream 3, Harkey 9, Rippey 8, 9, 7; Buckingham 8, Chandler 4, 1; Townsen 3, 5.

Handicaps for the California Wing Club members this season will be the following: C. C. Nauman, 32 yards; M. O. Feudner, A. J. Webb, W. F. Willet, 31 yards; C. A. Haight, P. F. McRae, Toney Prior, E. L. Schultz P. L. Murphy, F. W. Munday, H. E. Poston, R. C. Reed, Captain A. W. DuBray, H. Stelling, M. R. Sherwood 30 yards; W. J. Golcher, P. J. Walsh, C. J. Ashlin, P. C. Thede, 29 yards; H. L. Nielsen, Frank Turner, B. F. Woolner, J. V. Coleman, 28 yards; L. F. Prior, R. O. Hobson, G. W. Thomas, T. D. Riley, 27 yards; R. C. Haas, J. T. Connelly, R. C. Haas, 26 yards; A. Roos, J. A. Chanslor, 25 yards.

These handicaps are set for the opening shoot this year of the club at Stege tomorrow. Straight scores add a yard to the distance, misses of one or two birds advance the shooters a yard. The club program will be the same this year as in past seasons: A 12 bird forenoon (medal race), and a 12 bird afternoon (purse race) event. A club purse of \$50 will be hung up for each event, one money for every four entries, high guns.

The three high scores for the season will receive a medal worth \$50, \$40 and \$30 respectively. Members in shooting up back scores will be penalized one yard for each back score and not more than two back scores may be shot up at one time.

Golden Gate Gun Club members attended the annual meeting in Armorer Price's quarters Tuesday evening. The following officers were elected for the ensuing year: Pete Ashcroft, president; Clarence Lancaster, vice-president; Joe Rice, secretary-treasurer; Emil Hoelle, W. J. Lancaster and W. A. Simonon, executive committee. W. A. Simonon will act during the coming season as field captain.

E. Courtney Ford, Joe Rice and W. A. Simonon were elected to club membership. "Howdydew" in the box and Simonon on the grass means that the club shoots will be run in jig time.

Silver and gold bars will be on tap this season for straight strings of 15 and 25 birds. Shooters will declare a "bar" stunt and pay a cent extra a bird.

All club scores must be shot up by the sixth monthly shoot this season. Two back scores only can be shot up on one day and these before 10 a. m. of the club shooting day.

The regular club shooting day will be the third Sunday of each month, beginning on March 17 and ending September 15.

Saturdays the grounds will be open for practice shooting. The grounds are easily reached and the indications point to some lively and largely attended week end powder burning functions. Billy Murdock will be in charge of the grounds this year.

It is probable that the Bay View Gun Club will take the fourth Sunday of the month on the Golden Gate grounds. The club is at present in strong financial condition.

The trophies or medals to be shot for and other matters will soon be announced by the executive committee.

W. W. Turner, a prominent business man of Omaha, Neb., and a brother of Frank Turner, of the du Pont de Nemours Powder Company, will attend the California Wing Club shoot tomorrow.

The Exposition City Gun Club will shoot on the third Sunday of the month, the San Mateo Gun Club has selected the second Sunday for the club shooting day.

All in all, the local blue rock season for 1912 is looming up in fine shape.

Harvey McMurchy reached here this week and took in Sportsmen's Row. Mac will be at the Wing Club shoot tomorrow, having missed but few opening shoots of the club in the last twenty years.

Peters Points.

At Vacaville, Cal., February 22, Emil Holling broke 212 out of 225 targets, making a trifle over 94½ per cent. He had a run of 52 straight and carried away the high professional and general averages, using Peters Factory loaded shells.

SAN FRANCISCO SHOW.

The fourteenth annual hench show of the San Francisco Kennel Club opened at Dreamland Rink Thursday morning under most auspicious conditions.

Despite the strenuous opposition of the "goo-gooes" and their satellites there was an entry of 472 dogs—65 cocker spaniels, a record Coast entry for the breed, 60 collies, 60 setters (English, Irish and Gordon), 30 pointers, 15 Irish water spaniels, 15 St. Bernards, 10 Great Danes, 20 Dachshundes, 30 Airedales, 30 fox terriers, 15 Irish terriers, 35 Boston terriers being the leading breed entries.

That exclusion resolution helped rather than obstructed the "home rulers." The rabies scare, the muzzling ordinance of the local board of suspenders, which did not go through, and the proposed action of the Oakland Board of Health to put that city in quarantine against all outside dogs which also did not materialize, did not scare the independent and fair minded sportsmen and fanciers away from the "out-law" show.

C. W. Buttes, of Kansas City, and J. E. Webster, of St. Joseph, Mo., arrived in this city Wednesday afternoon and were taken in charge by J. Hervey Jones and other prominent local fanciers.

A report of the show and list of winners will appear next week.

AS OTHERS SEE US.

We quote from the American Stock-Keeper of February 10, 1912, the following timely comment on the local doggy situation. As usual, Harry Lucy rises to the occasion fearlessly and to the point:

The San Fran—Situation.

We have been asked repeatedly in the last year or so why we have not had much to say about Coast affairs, the A. K. C. and Nationals rumpus and "sich." Stock-Keeper had its say—said a lot, and while probably led astray in some things, our general idea to try and stop a schism that could do no good to the dog was born of a knowledge of facts and conditions out there—the men who were making and undoing history and so on. When the Nationals showed their hand and split from the governing body, Stock-Keeper stopped, and just as straightforwardly owned up to its allegiance to the A. K. C. in so far as upholding that club as our national kennel governing body. That we shall always do, with all rights of a free press reserved. We believe the American Kennel Club means to do right, and though we would not arrogate to ourselves the idea that we could influence the officers in the conduct of their show, nevertheless we have discerned traces of amenability to common sense suggestions, especially in late constructions and rulings.

So long as the Pacific Coast is an integral part of the American Kennel Club it should be so considered and publicly discussed. Its A. K. C. doings take up no inconsiderable space in the official reports, and it even has gone to the length of attempting to teach its elder how to extract the sustenance of the embryo chicken.

Those of us who have been most interested in these Coast proceedings have been willing to watch and wait. Through judging of our interest in the big squabble it may have been surmised that we had dealings with the Nationals or those instrumental in its launching. We have said before and reiterate that we have never communicated with them. We never wrote to poor Chute, little dreaming but that there would be plenty of time for friendly correspondence once more when the clouds had rolled by; but alas!

This is all preliminary to the statement that matters out there are just about shaping themselves as we warned they would. The claim is made that the A. K. C. is being used by two or at most three to run things as they desire, intensifying the situation that existed before the National troubles began. The leading city on the Coast, around which is grouped the greatest interest in dogs, is a seething cauldron of unrest and rivalry, that cannot possibly do good to any one. Leave out the dogs altogether. They have not been considered anyway. This is how things stand at this moment. According to an absolutely reliable A. K. C. supporter—Irvine C. Ackerman is giving the Golden Gate show with Mr. Wolfen and Mr. Folger as figurehead vice-presidents. Who is the secretary, the treasurer? Anyhow there is to be a show, March 19 to 23, under A. K. C. rules of course.

The show to be in San Francisco at the Auditorium. Our correspondent writes: "Is the Golden Gate representative of what it aspires to be? No. The club was organized in 1910 with C. K. Harley, the old fox-terrier man and a right good fancier; Max Taft, another good sort; Robert Wallace, the collie man, and a leading merchant; Alex Wolfen, a prominent fancier; Irving C. Ackerman, the noted fox-terrier fancier; and J. A. Folger. This year three good men, Harley, Wallace and Taft, resigned. Last year, wishing a larger membership, Harry Hastings, Miss Crocker and Mr. Korbel, all good fanciers, were added. These three latter have since been dropped by the then secretary, Mr. Ackerman, without reason. They had never been notified of any meeting or any other club business. That is one side.

The Nationals had announced a show in San Francisco under their rules and under the name of the San Francisco Kennel Club that has been outlawed by the A. K. C., to be held about February 29. Two shows within three weeks means war, and Mr. Ackerman has passed this resolution:

"Resolved, That the privilege of entering dogs at the coming show shall be denied to those persons who shall between now and the closing of entries on March 10, 1912, enter their dogs at any show held in San Francisco under rules other than those of the American Kennel Club.

This rule is to apply not only to a person making the entry, but also to a dog that has been entered in such show.

Entries will close on March 10."

"In view of the fact that the Golden Gate Kennel Club does not represent any further membership than is given above—three men, by those who know the internal facts, and merely is the rod in pickle of one man using the A. K. C. as a motor, this resolution looks like making some more trouble for the exchequer of some body or hodies. It was made public on January 23, in the San Francisco dailies."

We have long supported the theory that while the A. K. C. have every right to enact rules to control the integrity of their government in outlawing officers of clubs, judges and so on mentioned, stipulated in their rules, who persist in holding shows antagonistic to the A. K. C., all of which is a domestic concern provided for in the rules, they are going outside their province in curtailing the constitutional privileges of a citizen who has done no wrong under their rules. And especially is this action deplorable if it is taken under the initiative of one who is assuming the responsibility of having the A. K. C., through local influence, back him up in this queer proceeding. Is the A. K. C. to be used that way?

If the A. K. C. passes a rule that exhibitors showing at a show under other rules than theirs may be disqualified, that is different and the exhibitor takes his chances as he listeth. But at present there is no such rule and the Golden Gate Kennel Club or Mr. Ackerman (whose little bill that was cut down, showed his disinterested feeling toward the A. K. C.) have no right to enact any such ruling or place the exhibitor in an equivocal position, or seek to restrain the actions of an exhibitor against whom nothing further can be urged than that he indulged in the sport of showing his own dog where he pleased. But that is the situation in San Francisco this minute, and if continued will probably result in reprisals which hitherto have not been the policy of the Nationals, and bitterness will be heaped upon bitterness to the detriment of dog showing and dog breeding.

If there are to be two parties on the Coast it would appear to be the part of wisdom for each to go its own gait, giving shows how and where they please, and let it go at that, and if the A. K. C. is what the Californians want they will demonstrate that fact without being herded to it, and vice versa. There would seem to be just two men who run things.

The feeling among the better sort of fanciers out there is such that at the Oakland show last October, about fifty fanciers, all solid for the A. K. C., wanted to get up a petition to abolish the Pacific Advisory Committee, to be signed and sent to headquarters in New York. Does that show a satisfactory state of affairs, and does One Liberty know of it? You bet it don't!

Dog Chat.

It is with no disrespect to the American Kennel Club that we say that if the Californians will stand for that silly resolution of the Golden Gate Kennel Club debaring all persons and dogs from entering their show that have competed at a show in San Francisco between the end of January and March 10, they might as well give up any idea of sport or hack-bone or independence or anything that stands for true Western Americanism. The Nationals claim that the late shows of the Golden Gate were fizzes and that if this ruling is allowed to stand they wonder where the dogs are coming from for the G. G. show. This may be true and it may be partisan tincture. Some of the very best friends of the club are astonished and disgusted over the situation, which is another illustration of what will happen when the one-man-power bee gets buzzing. The men whose actions are here criticised are really good fellows and pleasant gentlemen personally, but that they are ill advised in this summary action it is firmly believed by their best friends. They must bear in mind that a dog show is common ground for sport and the cotton weaver's dollar entry is just as available as the society woman's, and further they must bear in mind that a little social coterie or hunch of personal friends does not make a show—only the fancy at large does that. So pull down the obnoxious resolution and open the gates to fair play—in other words, as we have said before—play the game. It's a sign of fear to do otherwise.

Gombault's Caustic Balsam

The Worlds Greatest and Surest

Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS I

SAFE, SPEEDY AND POSITIVE.

Supersedes All Caustery or Firing. Invaluable as a CURE for

PORTLAND HORSE & CATTLE SALE CO.,

BOX 82.

PORTLAND, ORE.

Get the Blood That Produces Champions!

BLACK HALL 48645

Brother in blood to **The Harvester 2:02**
Sired by **Ozono**, trial (2) 2:17 $\frac{1}{2}$, sire of **Norvalon** (4) 2:22 $\frac{1}{2}$ by **Moko 2:45** (sire of **Fereno 2:05 $\frac{1}{2}$** , **Brenda York 2:01 $\frac{1}{2}$** , **Native Belle** (2) 2:07 $\frac{3}{4}$, and the dam of **The Harvester 2:02**. First dam **Maggie Yeager** (dam of **Walnut Hall 2:08 $\frac{1}{2}$** , sire of **The Harvester 2:02**, etc.) by **Red Wilkes 17:49**; second dam **Dorcia Payne** (great broodmare) by **Almont 33**.

Black Hall is a very handsome black horse, standing 15.3 hands high and weighs 1100 pounds. With his breeding, individuality, conformation, etc., he is bound to make a great sire. **TERMS: \$50** for the season; usual return privilege. California Stallion License. Pure bred.

ATHADON 20990 Rec. (1) 2:27 Sire of **The Donna 2:07 $\frac{3}{4}$** , **Athasbam 2:09 $\frac{1}{4}$** , **Donasbam 2:09 $\frac{1}{4}$** , and 15 others
Sired by **Matadon 9392**, sire of **Athadon** (1) 2:27, etc. First dam **Athalie** (dam of 7) by **Harkaway 11:08**; second dam, **Mag** by **Alcalde 103**, etc.

Athadon (1) 2:27, for many years the holder of the yearling trotting record, is a very handsome bay horse, standing 16 hands and weighs 1400 pounds. He has proved his worth as a sire, not only of good game race horses, but of the class of carriage horses that bring the high dollar. **TERMS: \$25.** Usual return privilege. Stallion License No. 128. Pure bred.

STANFORD MCKINNEY 45173 Sire of **Kinnersbam** (2) 2:18 $\frac{1}{2}$, winner 2-y-o pacing division **Breeders' Futurity**
Sired by **McKinney 2:11 $\frac{1}{4}$** (sire of 23 in 2:10 list).

First dam **Palavena** (2) 2:19 $\frac{1}{2}$ by **Palo Alto**, rec. 2:08 $\frac{3}{4}$, Reg. No. 5354, he by **Electioneer 125**; second dam **Astoria** (dam of **Palavena** (2) 2:19 $\frac{1}{2}$ by **General Benton 17:55**; third dam by **Kentucky Prince**, etc.

Stanford McKinney is a beautiful black horse with star in forehead; stands 15.2 hands and weighs 1050 pounds. This horse is one of the best **Wilkes-Electioneer** stallions in the world and it will pay any breeder to consider his blood lines well before breeding elsewhere. **TERMS: \$25** for the season; usual return privilege. California Stallion License No. 126. Pure bred.

These horses will make the season of 1912 at **Fresno, Cal.**, at **Geo. L. Warlow's** ranch. Good pasturage and best of care taken of mares for \$3.00 per month, but no responsibility assumed for accidents or escapes. For tabulated pedigrees and further particulars, address **GEO. L. WARLOW, Fresno, Cal.**

NOGI 2:10 $\frac{1}{2}$

Winner of **Pacific Breeders' Futurity**, **Occident** and **Stanford Stakes**, and never beaten as a three year old.
Sired by **Athabio 2:24 $\frac{1}{4}$** . First dam **Cora Wickersham** (dam of **Athasbam 2:09 $\frac{1}{4}$** , **Donasbam 2:09 $\frac{1}{4}$** , **Nogi 2:10 $\frac{1}{2}$** , **Mattawan** (3) 2:17 $\frac{1}{2}$, **Kinneysbam** (2) 2:18 $\frac{1}{2}$) by **Junio**; second dam by **Whippleton 18:33**; third dam by **Gladator 8:38**.

Nogi 2:10 $\frac{1}{2}$ is a very handsome bay stallion with black points; 7 years old; stands 16 hands and weighs 1150 pounds; and although he has only been bred to a very few mares he has proven to be a sure foal-getter, and all his colts have size, good looks and plenty of trot. No one can make a mistake in breeding to this horse.

(Registered under California Stallion Law as a Grade. Certificate No. 25.)
Season of 1912 at barn of **DR. T. A. DANIELS, Madera, Cal.**

TERMS: \$25 for the season, cash or approved note, payable at time of service. Usual return privilege or money refunded at owner's option. For further particulars address **J. E. VINCENT (Mgr.), Madera, Cal.**
GEO. L. WARLOW (Owner), Fresno, Cal.

GOOD ONES FOR SALE.

PAL (2) 2:17 1/2, standard bred trotter, 5 years old. Sired by Palite 45062, dam Lorna D. by Bayswater Wilkes; second dam Bee Sterling (dam of 4 trotters with records better than 2:15 and Nat Higgins, trotting (3) 2:20) by Sterling; third dam Flash (dam of 6 in the list) by Egmont. Pal will be a good purchase for anyone looking for a young stallion of good breeding, good individuality and all qualities of a race horse.

NAT HIGGINS, 4 years old, record 2:20 trotting made as a three-year-old. Sired by Palite 45062; dam Bee Sterling, breeding same as above.

SORREL MARE, 4 years old, with a time record of 2:24 1/2 made pacing as a three-year-old. With 90 days' work showed an eighth in 16 seconds. Goes light, no hoppers. By Palite 45062; dam Babe by Dawnlight; second dam Bee Sterling, as above. A full sister to this filly stepped a mile last year in 2:14 at San Jose. This mare is handsome, kind, and gentle and will step a mile in 2:10.

TWO-YEAR-OLD sired by Palite; a good-gaited trotter; entered in the Futurity Stakes and can step fast. Dam Paprika, who stepped a mile in 2:16 as a three-year-old, by Oro Belmont 2:15 1/2; second dam a producer by Antee; third dam by Alexander; fourth dam by Williamson's Belmont. A good prospect in the Futurity Stakes.

THREE-YEAR-OLD CHESTNUT GELDING, full brother to the above; trotted a mile in his yearling form in 2:43 and is trotting fast now. Entered in the Futurity Stakes. Another good prospect.

FOUR-YEAR-OLD FULL BROTHER to the above. This colt stepped a mile as a two-year-old in 2:31 with a short season's work.

LOULIA, a standard bred 4-year-old filly by Nushagak, sire of two 2:10 performers, dam by Nutwood Wilkes, dam of 3 in the list; second dam Woodflower (dam of Prince Ansel 2:20 at 2 years old and Seylex 2:15 1/2) by Ansel; third dam Mayflower 2:30 1/4 (dam of Manzanita 2:16 and Wildflower) by St. Clair. This mare is soon to foal to McFadyen.

TWO-YEAR-OLD BROWN FILLY by Carlokini; dam Truth (trial 2:12 at 4 years) by Searchlight; second dam Bee Sterling, etc. This filly is entered in all of the stakes and is trotting nicely now with the short workouts she has had. She is very handsome and will make a valuable mare.

Besides the above, I have some nice yearlings, all entered in the stakes. Will be pleased to show the above to prospective purchasers. Call on or address E. D. DUDLEY, Dixon, Cal.

Work Horses to Let. Country Horses for Sale.

Horses and mules bought and sold

122-124 Clara St., bet. Fourth and Fifth, SAN FRANCISCO.

Phone Kearny 659. Home J 2643.

Special attention paid to the purchase and shipment of horses and mules to foreign and domestic ports.

FOR SALE.

To Dissolve Partnership—This Grand Lot.

BEATRICE ZOMBRO, handsome bay mare, 16 hands high, weighs 1150 pounds. Is seven years old and has a foal by Carlokini 2:07 1/2. With very little work she showed 2:20 speed as a three-year-old. Sound and gentle. Sired by Zombro 2:11; dam Atherine 2:16 1/2 (dam of Copa de Oro 1:59 and Crescendo, trial 2:13 1/2, etc.). Standard and registered; a regular breeder. Zombro mares are exceedingly scarce and there are few to be bought which are as well bred or perfect as Beatrice Zombro.

CONSELO B., by Del Coronado 2:09 1/4, a handsome three-year-old dark brown colt; good gaited; will do to race. Entered in Occident and Breeders' Futurity stakes. Only trained six weeks, trotted in 2:35, last eighth in 18 seconds. This colt is also out of Atherine 2:16 1/2 (dam of Copa de Oro 1:59, Staling 2:14 1/2, etc.) by Patron 2:14 1/2; second dam Athene (dam of 2) by Harold 4:13; third dam Minerva (dam of 2) by Pilot Jr. 12; fourth dam Bacchante Mambriño.

FULTON G., by Carlokini 2:07 1/4; a two-year-old bay colt; good size and a perfect type. Entrance on him is paid up in Oregon Breeders', California State Fair's Occident and Stanford stakes and the Canfield Clark stakes. Good gaited and level headed. Came off pasture December 1st, trotted in 2:39 1/2, last eighth in 18 1/2 seconds on February 16th. Sound.

HASTINGS, bay stallion, four years old, by Del Coronado 2:09 1/4; dam Sappho 2:15 1/2 (trial 2:08) by Robert McGregor 2:17 1/4 (sire of dams of Jay McGregor 2:07 1/4, Grattan Boy 2:08, Elmore 2:08 1/2, York Boy 2:08 1/2, Blizzard 2:09 1/2, etc.); second dam Pauline (dam of Sappho 2:15 1/2 and three sires) by Ashland Chief 751 son of Mambriño Chief 11; third dam Rosena by Abdallah 15. With very little training trotted in 2:16 last year in July; he will trot in 2:10 this year if given an opportunity. Has no record. Is perfectly sound. Stands 15 1/2 hands, and when matured will weigh 1200 pounds. He is a remarkably handsome stallion of show horse type. Standard and eligible to be registered. His breeding is of the stoutest and best. By one of McKinney's greatest race winning and choicest bred sons, out of one of Robt. McGregor's fastest bachelors and sire out of a famous speed-producing mare. Hastings should, when his days of racing end, be invaluable as a sire of handsome, stylish, perfect trotting horses.

WILKES BOY JR. 3805 1/2; brown stallion, sired by Wilkes Boy 2:24 1/4; dam Corona by Liberty Bell 2:24 (son of Bell Boy 2:19 1/4 and Prefix by Pancoast, etc.); second dam Carna (dam of Aurita 2:25 1/2, Carnation 2:26 1/2 and Axewood, sire of 3) by Nutwood 2:18 1/2; third dam Candace (dam of Albert Lee 2:26, a sire) by Harold; fourth dam Fairy Belle (dam of 2) by Belmont 64; fifth dam Waterwitch (dam of 6) by Pilot Jr. 12, etc. As can be seen, he is one of the best-bred stallions in America. He is nine years old; stands 15 1/2 hands; weighs 1080 pounds. Has never been trained, but can show a 2:10 gait. Is good gaited; does not wear boots and does not pull.

As stated above, these horses are to be sold to dissolve a partnership and are priced extremely low. They can be seen at Los Angeles.

For further particulars, address W. G. DURFEE, 2019 So. Figueroa St., Los Angeles.

DISPERSAL SALE.

I must move owing to the sale of my property, consequently must dispose of all my horses, a list of which follows:

Zomstein, a very handsome four-year-old bay pacing stallion by the great Zombro 2:11; dam by Steinway. He has had very little work, but can pace halves in 1:06 and quarters in 31 1/2 seconds. This fellow is sound, gentle, and is a good-gaited, good-headed horse and will do to race.

Zonie Secretary, a two-year-old black trotting colt by Zombro; dam by Secretary, is well staked and will do to spend some money on. He has been a mile in 2:45, last half in 1:20, last quarter in 37 1/2 seconds. This fellow is entered in all the stakes on the Pacific Coast.

A yearling, full sister to Zonie Secretary, is a very handsome baby and is also staked throughout the West.

Zonie Gray, two-year-old gray colt by Zombro; dam by McGrath, has been a quarter in 40 seconds and is also staked.

High Pride, a very handsome stallion by Judge McKena, out of Whisper (dam of Zombro 2:11), is as handsome as his dead brother and acts like as good a trotter.

A yearling, full sister to Lady Garland, three-year-old, trial 2:14 1/2, and five weanlings to The Bondsman, Zombro, etc.

For further particulars, prices, etc., address GEO. T. BECKERS, 3727 So. Figueroa St., Los Angeles.

CHARLES JAMES.

Public Training Stable

Pleasanton Race Track, Pleasanton, Cal.

Trotters and pacers trained at reasonable rates for this season's campaign. Best of care given. Developed and drove the following better than 2:13 in 1911: Prof. Heald 2:09 1/2, Cresto 2:12 1/2, Bodaker 2:13, Merrylena 2:23 (males in 2:12) and Reina Directum, matinee 2:11, over the stadium track. These are all trotters. Address:

CHARLES JAMES, Pleasanton, Cal.

SPECIAL ADVERTISING.

Wanted, For Sale, and Miscellaneous advertising under this head will be set in nonpareil type (same type below) and will be published at the rate of 2 cents per word each insertion, or 6 cents per word by the month. Count each abbreviation and initial as a word.

CLOSING OUT.—Sixty head of young mares and mules. One four-year-old, two-thousand-pound Percheron stallion. Might consider some trades. N. FARNSWORTH, R. D. 3, Bakersfield, Cal.

FOR SALE, CHEAP.—One registered stallion, sired by McKinney 2:11 1/4; 8 years old; sound. Also one imported draft registered stallion; weight 1800 pounds; 7 years old. Would consider trade on heavy mare or standard-bred mares, or fillies. Breeding and pictures sent to interested parties. Address D. A. BAKER, Hill P. O., San Diego, Cal.

WANTED.—Standard bred mare, 4 years old or over. Must be registered or eligible to registration. Blood bay preferred; level headed; good looking; thoroughly broken; good gaited trotter or pacer (no straps). Must pass medical examination. Reply, giving details and price. Address A. M. Breeder and Sportsman, Drawer 447, San Francisco, Cal.

FOR SALE.—ZOBLOCK 2:18, pacing as a two-year-old; trotting 2:24 1/2 as a three-year-old; trial 2:19. He is a coal black stallion, five years old, stands 15 1/2 hands, weighs 1200, and one of the best made stallions in California. He should get a record of 2:12 or better this year. Is kind and gentle and is a half brother to the great trotter Zomblock 2:26 1/2, that worked last fall in 2:08 1/2 for his owner, R. J. MacKenzie, and will be on the circuit this season. Zoblock is a standard and registered horse, his papers having just been sent for. He is sired by Zolock 2:05 1/4 (one of the best speed producing sons of McKinney 2:11 1/4) and his dam is Madeleine Marshall by Demonio 2:11, second dam that great broodmare Mamie Comet 2:23 1/2 by Nutwood 2:18 1/2. He will be sold at a reasonable figure, as the farm I have leased has been sold and I am compelled to get a new place. This is my only reason for selling Zoblock and the following:

TWENTY-THREE SKIDOO, standard and registered black mare, foaled 1906, sired by Nutwood Wilkes 2:16 1/2, dam Tiredy-Third (dam of Sterling McKinney 2:06 1/4) by Director 2:17, second dam Nettie Nutwood (dam of Hilldale 2:15) by Nutwood 2:18 1/2, third dam by Vick's Ethan Allen Jr., fourth dam by Williamson's Belmont. This mare is a fine sized, well made trotter, gentle, but has never been worked for speed. She is bred to be as fast as any.

STAR POINTER, filly (4), out of Trix (dam of Aerolite 2:07 1/2, Mona Wilkes 2:03 1/4 and four others) by Nutwood Wilkes 2:16 1/2, etc. This is a nice big mare, stands 15 1/2 hands and is a free-legged pacer, was handled a little as a two and three-year-old. She was bothered with splints, so I did not work her. They have disappeared, and, as she never gave a lame step, they must never have been near a cord or tendon. From her breeding she should make one of the greatest of broodmares.

Dnn Logan filly (3) out of the standard and registered mare Sopbia (dam of Sophia Direct, p. 2:23 1/4, and Corona 2:27) by Robt. McGregor 2:17 1/2, second dam Orawood by Wildwood 1:44, third dam Lady Utterback by Mambriño Patchen Jr. Dan Logan, her sire, had a trial of 2:12 and is a full brother to the champion Jim Logan 2:05 1/4. This filly is a pure-gaited trotter, just been broken and will undoubtedly be a fast mare. Her breeding can hardly be over-estimated and further particulars address J. W. MARSHALL, Dixon, Cal.

HOMEPHONE PRAISED.

A new subscriber writes the Home Telephone Company under date of October 28, 1911:

"Please install a phone at my home. I did not know anything about the good points of the Homephone and was rather prejudiced against it until I began using it in my office. I use it all the time now, not only in phoning around the building, but getting outside numbers, because it saves me time and trouble. The Homephone delivers the goods."

"You know the burners of candles rioted in London about 500 years ago when gas was introduced. Most of us object to changes. Possibly that is the reason why I am so late in ordering a Homephone."

OUR LATEST "Save - the - Horse Book"—Is our 16 years Experience—Treating 87,364 Horses—Ringbone—Thoropin—SPAVIN—Curb and ALL—Shoulder, Knee, Ankle, Hoof and Tendons. With Mistakes left out DISCOVERIES PUT IN. It is a Mind Settler; Tells How to Test for Spavin—Where and What To Do for a Lame Horse — COVERS 58 FORMS OF LAMENESS—ILLUSTRATED.

MAILED FREE TO OWNERS, TRAINERS, AND MANAGERS, ONLY.

JUST NOTE THE KIND OF WORK THIS HORSE DOES IN 5 DAYS' TIME.

Troy Chemical Company, Binghamton, N. Y.
Dear Sirs: I have used your remedy now for five days and must say it is wonderful; did not expect any such results. The horse had not been able to put her heels to the ground and when she walked she would barely touch her toe to the ground and then jump with the other foot. I gave her the first treatment Sunday noon and when I went in the stable Monday morning she was still resting the foot, but when I made her stand over she put the foot plumb on the ground, and bore her weight on it; then I took her out and she walked on it very well. I put her in the team Thursday afternoon and went in the woods after a load of wood, and got in a place where they had to do their best or stay there. She lifted as hard as ever I saw her. I expected to see her lame next morning, but she was not. The trouble seemed to be in the lower part of the tendons of her hind leg. Under these conditions, how long shall I continue to treat her?

Very truly,
R. H. WILLIAMS.

YOU WILL OBSERVE THERE WAS NO FEVER OR ENORMOUSLY SWOLLEN LEG, NOR LAYING UP OF THE HORSE WITH THE TREATMENT.

\$5 A Bottle

With a binding contract to refund money or cure any case of Bone and Bog Spavin, Thoroughpin, Ringbone (except low), Curb, Splint, Capped Hock, Windpuff, Shoe Boil, Injured Tendons and all Lameness. No scar or loss of hair. Horse works as usual.

The Standard Trotting Stallion

Bon McKinney 51480

3-y.-o. Rec. 2:24 $\frac{1}{2}$. 3-y.-o. Trial—half, 1:05; mile, 2:15.

By **BON VOYAGE 2:08**

(fastest mile ever trotted in a race by a stallion in California); dam, Daphne McKinney (also dam of Frank N. 2:07 $\frac{1}{4}$, the only other one of her get ever trained) by McKinney 2:11 $\frac{1}{4}$; second dam, La Moscovita (dam of Bon Guy, 3-y.-o., 2:11 $\frac{1}{4}$, Yolande 2:14 $\frac{1}{4}$ and Tina 2:20 $\frac{1}{4}$) by Guy Wilkes 2:15 $\frac{1}{4}$; third dam, Moscovita 2:28 $\frac{1}{2}$ (dam of Mamie R., 3-y.-o., 2:15 $\frac{1}{2}$, and Oro Belmont 2:15 $\frac{1}{4}$) by Belmont 64; fourth dam, Mosa (dam of 5 in the list) by Woodford Mambrino.

BON MCKINNEY 51480 (3) 2:24 $\frac{1}{2}$ is a beautiful bay horse and is in every respect a magnificent individual, possessing size, style, quality, intelligence and frictionless trotting action. With little work as a yearling he trotted a quarter in 35 seconds and a half in 1:15. The next spring as a two-year-old, with 2 $\frac{1}{2}$ months' work, he worked a mile in 2:19 $\frac{3}{4}$, a half in 1:08 and a quarter in 33 seconds. Having no stake engagements, he was taken out of training after making this wonderful showing for a two-year-old. There is no doubt he could have trotted a mile in 2:12 that year had he been worked until fall. As a three-year-old he was given a record of 2:24 $\frac{1}{2}$, which is no mark of his speed. Mr. Ted Hayes trained him and says that he considers him the best colt he ever trained and firmly believes that he will not only make a great race horse, but a great sire. As a two-year-old he was bred to ten mares and got nine foals, and everyone who has one of his get is confident that he has the best foal on the Coast. Bon McKinney combines the best of the Electioneer-McKinney cross. His dams are all in the great brood mare list, every one being a producer of speed. He is a young horse and has already commenced to make his mark in the world, and now is the time to breed to him and take advantage to get something exceptionally good at a reasonable price. Study his pedigree, come and see him, and you will be sure to send your mare.

Season of 1912 at the **RACE TRACK, SAN JOSE, CAL.**
TERMS: \$40 for the Season. Usual return privilege.

Good pasturage and the best of care taken of mares in any manner that owners may desire at reasonable rates, but no responsibility assumed for accidents or escapes. Address **JOS. TWOHIG, Manager, Race Track, San Jose, Cal.**

The Standard Stallion

NOBAGE 48390

Sire of

Zombowage, the sensational yearling trotter, that stepped a full mile in 2:40 and a half in 1:18, with 30 days' work last year, and was purchased by Mr. Ted Hayes at the State Fair.

NOBAGE 48390 is by Bon Voyage 2:08; dam Loma B. by Stam B. 2:11 $\frac{1}{4}$; second dam Italia (great broodmare) by Sidney 2:19 $\frac{1}{4}$; third dam Dot 2:29 by Prompter, sire of dam of Gratt 2:02 $\frac{1}{2}$. Nobage's first crop of colts, sired when he was two years old, are all high-class and show great inherited speed.

Pasture \$2.50 per month, and all mares from a distance will be first month free. Will make the season of 1912 at **EASTERBY RANCH, 3 miles east of FRESNO, CAL.** TERMS: \$50 to insure. Address **A. S. KELLOGG (Owner), 120 Fourth Camp Avenue, Fresno, Cal.**

THE STANDARD TROTTING BATTALION

NEAREST MCKINNEY 40698

Record 2:13 $\frac{1}{4}$

SIRE OF

NEAREST MCKINNEY 2:13 $\frac{1}{4}$, sired by MCKINNEY 2:11 $\frac{1}{4}$; dam, Mand Jay C. by Nearest 2:22 $\frac{1}{2}$ and own brother to John A. McKerron 2:04 $\frac{1}{2}$ and half-brother to Louise Carter, dam of Wilbur Lou (1) 2:19 $\frac{1}{4}$ and sire of Highly 2:04 $\frac{1}{2}$, Alone 2:09 $\frac{3}{4}$, Joe Gans 2:19 $\frac{1}{2}$, Trueheart 2:19 $\frac{1}{2}$, Just It 2:19 $\frac{1}{2}$, and others, by Nutwood Wilkes 2:16 $\frac{1}{2}$, sire of Copa de Oro 1:59, John A. McKerron 2:04 $\frac{1}{2}$, etc. and dams of San Francisco 2:07 $\frac{1}{2}$, Mona Wilkes 2:03 $\frac{1}{4}$, etc.; 2d dam, Fanny Menlo (dam of Claudius 2:13 $\frac{1}{4}$) by Menlo 2:21, by Nutwood 2:18 $\frac{1}{2}$, greatest brood mare sire; 3rd dam, Nellie Anteeo by Anteeo 2:16 $\frac{1}{4}$; 4th dam, Fanny Patchen, by Geo. M. Patchen Jr. 2:27. Nearest McKinney is one of the handsomest McKinneys standing for public service. Color beautiful brown, 16 hands high and weighs 1250 pounds. When a three-year-old he was a natural trotter, had two-minute speed, trotted a mile on a half-mile track in 2:15, first dam in 1:04, but owing to an accident was put to pacing in 1910 and in 44 days he got a record of 2:14 $\frac{1}{4}$ and in 1911 got a record of 2:13 $\frac{1}{4}$, fastest trotting record made by a stallion in California during the breeding season. Will make the season of 1912 at the

SAN JOSE RACE TRACK.

Fee, \$50 the Season, with usual return privilege. Free green pasture up to July 1st to all who pay stallion fee July 1, 1912. Best of care and attention given mares, but no responsibility assumed for accidents. No barb wire fencing; plenty of water and feed.

Address **T. W. BARSTOW, 1042 Alameda Ave., San Jose, Cal. Phone S. J. 3000.**

BREED TO THE BEST BRED TROTTING STALLIONS!

Palo King 2:28 $\frac{1}{2}$ --- Reg. No. 44910.

Sire of Little Lucille (3) 2:09, the greatest pacer of her age on this Coast. Sired by Marengo King 2:20 $\frac{1}{4}$ (son of McKinney 2:11 $\frac{1}{4}$ and By By by Nutwood 2:18 $\frac{1}{2}$); dam Palo Belle 2:24 $\frac{1}{2}$ by Palo Ato 2:08 $\frac{1}{2}$; second dam Belle Isle (great brood mare) by Piedmont 2:17 $\frac{1}{2}$; third dam Ida Belle (great brood mare) by Hambleton 10; fourth dam Godfrey Star by American Star 14. Palo King is a beautiful bay, stands 16 hands, is a pure-gaited trotter, and all his progeny are intelligent, have style, finish and extreme speed. TERMS \$25 for the season.

Iran Alto 2:12 $\frac{1}{4}$ --- Reg. No. 24586.

Sired by Palo Alto 2:08 $\frac{3}{4}$; dam Elaine 2:30 (dam of 4 trotters, 1 sire of 15, 2 dams of 9) by Messenger Duroc; second dam Green Mountain Maid (dam of Electioneer and 9 others in 2:30) by Harry Clay 45, etc. Iran Alto was one of our greatest trotters. He has 15 in 2:30, 3 dams of 3 in 2:30. TERMS \$15 for the season.

Alto Express

Sired by Iran Alto 2:12 $\frac{1}{4}$; dam Beautiful Bird by Nutwood Wilkes 2:16 $\frac{1}{2}$; second dam Expressive (3) 2:12 $\frac{1}{4}$ (dam of Atlantic Express (3) 2:08 $\frac{1}{2}$, Esther Belle 2:08 $\frac{1}{2}$, and the dam of Eva Bellini, timed as a two-year-old in 2:11 $\frac{1}{4}$, as a three-year-old beat 2:10 in her races) the greatest racing daughter of Electioneer. Alto Express is a perfectly made trotter and will undoubtedly be a sire. TERMS \$20 for the season.

For further particulars, address **H. S. HOGOBOOM, Woodland, California.**

THE ROYALLY BRED YOUNG STALLION

Best Policy 42378

By Allerton 2:09 $\frac{1}{4}$, Jay Bird's greatest son; dam Exine 2:18 $\frac{1}{4}$ (dam of Riverside (3) 2:30 and Rinola (3) 2:30) by Expedition 2:15 $\frac{1}{4}$; second dam Euxine (dam of 6) by Axtell 2:12; third dam Russia 2:28 (great broodmare) by Harold 413; fourth dam Miss Russell (dam of Maud S. 2:08 $\frac{1}{2}$ and 6 others), etc. Best Policy is a handsome bay, has size, style and quality in every respect. Is a pure-gaited trotter. No better bred one in California. His progeny will be seen in races this year.

Season of 1912 at my feed stable, corner of Bridge and Center Streets, **VISALIA, CAL.**

R. O. NEWMAN, Owner.

McADRIAN 2:24

Reg. No. 45391. Sire of (Bart Kelly (trial) 2:11 $\frac{1}{2}$; Trix McAdrian 2:23 $\frac{3}{4}$; Grace Chalmers (tr) 2:24)

Sired by **GUY MCKINNEY** (sire of Vernon McKinney 2:02, Linden Girl 2:22, etc.); dam **MAPLE LEAF 2:34 $\frac{1}{4}$** by Adrian 2:26 $\frac{1}{2}$ (sire of Roseta A. 2:14 $\frac{1}{4}$), son of Reliance 2:22 $\frac{1}{4}$ and Adriana by Skenandoah; McAdrian's grandam was **OLLIE RAY 2:39 $\frac{1}{2}$** , dam of Acclamation 2:24 $\frac{3}{4}$ (sire of Lizzie C. 2:15), Vendome, dam of McKinley 2:29; his great grandam was **MARY BLAINE** by Signal 3:27 (sire of the dam of Prussian Maid 2:19, etc.). Guy McKinney, sire of McAdrian 2:24, was by McKinney 2:11 $\frac{1}{4}$, out of Flossie D., by Guy Wilkes 2:15 $\frac{1}{4}$; second dam, Blanche Ward (dam of China Maid 2:05 $\frac{1}{4}$), by Onward 2:25 $\frac{1}{2}$; third dam, Blanche Patchen, by Mambrino Patchen 58, etc.

McAdrian is one of the handsomest and strongest made grandsons of McKinney in California. He has no faults; is a pure gaited trotter and a sure foal getter. He will make the season of 1912 at the Pleasanton race track. Terms, \$30 for the season. For further particulars, apply to address

E. D. DIGGES, Owner, Pleasanton, Cal.

Athasham

Race Rec. 2:09 $\frac{1}{4}$. A Game Race
Reg. No. 45026. Horse In the Stud

Bay stallion; stands 15.3 hands; weighs 1150. Sired by Athadon (1) 2:27 (sire of The Donna 2:07 $\frac{1}{2}$, Athasham 2:09 $\frac{1}{4}$, Donasham 2:09 $\frac{3}{4}$, Sue 2:12, Listerine 2:18 $\frac{1}{2}$, Mattawan (3) 2:17 $\frac{1}{2}$, and 8 others in 2:30); dam the great broodmare Cora Wickersham (also dam of Nogi (3) 2:17 $\frac{1}{2}$, (3) 2:10 $\frac{1}{2}$, winner of 3-year-old trotting division Breeders' Futurity 1907 and Occident and Stanford Stakes of same year, and Donasham 2:09 $\frac{3}{4}$ and Kinneysham (2) 2:18 $\frac{1}{4}$), by Junio 2:22 $\frac{1}{2}$ (sire of dams of Geo. G. 2:05 $\frac{1}{2}$, etc.). Athasham has a great future before him as a sire. He is bred right and made right, and has every qualification one can expect in a sire. He has been timed in 2:06 $\frac{1}{4}$ in a race, and his courage is unquestioned.

Season 1912, Feb. 15th to June 15th, at **Orchard Farm and Race Track, Fresno, Cal.**, for a fee of \$25. Approved mares.

Good pasturage at \$3.00 per month. For further particulars, address this place.
D. L. BACHANT, R. R. 1, Fresno, Cal.

Sired by Nutwood Wilkes 2:16 $\frac{1}{2}$ Sire of Copa de Oro 1:59 Jno. A. McKerron 2:04 $\frac{1}{2}$, etc.

The Wilkes-Nutwood-Director cross.

By Mamb. Chorister, dam of 2 in 2:20, etc.

SENTINEL 280
Sire of 8 in list.

MAID OF LEXINGTON
By Mamb. Pilot 29.

ABDALLAH MAMBRINO
Sire of 15, dams of 42.

BIG ELLIEN
By Clark Chief.

BARON WILKES 2:18.
Sire of 12 in 2:10, including Bumps 2:03³/₄, Rubenstein 2:05, Baron May 2:07³/₄; sired dams of 4 in 2:10.

SORRENTO
Dam of Jay Hawker 2:14³/₄, Sorrento Todd (4) 2:14³/₄, Belle Sentinel 2:15, Eola 2:19³/₄, Lazy Bird 2:26³/₄, Teddy Sentinel 2:29³/₄, The Tramp (Sire), etc.

4th dam Virgie—by Abdallah 15.

5th dam Lucy—by Highlander (Veech's).

THE BONDSMAN is the only stallion that sired three new 2:10 performers with race records in 1910. In spite of the fact that he has no record, The Bondsman was a colt trotter of great merit. He was a contending colt all through the Kentucky Futurity of 1899, getting third money. This was a six-heat race and was won by Boralma. As a four-year-old he was not raced, but trotted a public trial in 2:11. As a sire he is destined to be the leading son of the great Baron Wilkes, founder of the greatest futurity winning family. He will make the season of 1912 at

Pleasanton Training Park. \$100

THE PATCHEN BOY 39033

Three-Year-Old Record 2:10³/₄ in a Winning Race.

Sired by the Great WILKES BOY 3803, sire of 107 in standard time.

A Genuine Race Horse and a Sire of Early and Extreme Speed.

The Patchen Boy 39033 is sire of the following:

- | | | |
|--|---|---|
| Francis J. 2:08 | Legal Patchen .. 2:15 ³ / ₄ | Dorothy C. 2:19 ³ / ₄ |
| Evelyn Patchen... 2:10 ³ / ₄ | Lucile Patchen .. 2:16 | Louise Patchen ... 2:19 ³ / ₄ |
| Scott Patchen .. 2:12 ³ / ₄ | Jerry Patchen .. 2:16 ³ / ₄ | Dr. Warren .. 2:19 ³ / ₄ |
| Dessie Patchen .. 2:13 | Knightstown Belle 2:16 ³ / ₄ | Roscoe Binning .. 2:20 |
| Frank Patchen .. 2:13 ³ / ₄ | Alec Williams ... 2:18 ³ / ₄ | Mary Patchen ... 2:20 ³ / ₄ |
| Ruby Patchen ... 2:13 ³ / ₄ | Lois Patchen ... 2:19 ³ / ₄ | Black Patchen ... 2:20 ³ / ₄ |
| J. C. Patchen ... 2:14 ³ / ₄ | Auduous the Miller 2:19 ³ / ₄ | and 11 others in 2:30. |

Dam Lady Clay, the dam of The Patchen Boy (3) 2:10³/₄, C. W. M. 2:24³/₄ (trotted to high wheels), Anglin Wilkes 2:16³/₄ over half-mile track, trial 2:09³/₄, by Metropolitan 1372, son of Hambletonian 10; second dam, Haggie Brown, by Ashland Clay; third dam, Pity Pat, thoroughbred. The Patchen Boy was the greatest three-year-old race colt in the world, winning six straight races in the Grand Circuit the only year he was raced. His produce are good-headed and real race horses. (No tin cups.)

THE PATCHEN BOY is a beautiful black, 16.1 hands and weighs 1290 pounds. His colts are of fine size, great individuals and the kind that sell for the high dollar.

Season of 1912 at Pleasanton Training Park. Fee: \$50 Return privilege 1913

Both of the Above Horses Will Remain in California.

Best of care and attention given mares, but no responsibility assumed for accidents. Good pasturage at reasonable rates. For further particulars and full tabulated pedigree, address

CHAS. L. DE RYDER, Pleasanton, Cal.

A Choice Collection of Kentucky Saddle Horses for Sale.

PALITE 45062

A Sire of Early Speed.

License Certificate 181—"Pure Bred."

Sire, Nutwood Wilkes 2:16¹/₂, sire of Copa de Oro 1:59, John A. McKerron 2:04³/₄, etc., and dams of San Francisco 2:07³/₄, Mona Wilkes 2:08³/₄, etc.

Dam, Palita (2) 2:16, dam of 3 in list; second dam Elsie, dam of 5; third dam Elaine 2:20, dam of 4, fourth dam Green Mountain Maid, dam of 9.

PALITE is the sire of the 2-year-old stake-winner Pal 2:17³/₄ and the 3-year-old filly Complete second to the Occident Stake winner El Volante in 2:13³/₄, and timed separately in 2:14³/₄, and sire of Nat Higgins (3) 2:20 trotting, Cornelia Scott (3) 2:24³/₄ pacing. Palite is one of the best-bred stallions of the Wilkes-Electioneer cross living. His colts are all trotters, good-gaited and determined. He will make the season of 1912 at the ranch of the undersigned at

DIXON, CAL. Terms: \$40 for the Season with return privilege, or money refunded at my option if mare proves not in foal.

Good pasturage at \$2.50 per month and best of care taken of mares, but no responsibility assumed for accidents or escapes.

For further particulars address E. D. DUDLEY (Owner), Dixon, Cal.

TOM SMITH 2:13

Sire of Futurity Stake Winners. Reg. No. 47700

TOM SMITH is one of the handsomest sons of McKinney on the Pacific Coast. He has size, style, speed, is a sure foal getter, and has every qualification to make him one of the greatest of the McKinney tribe. He is the sire of Katalina (2) 2:22³/₄, (3) 2:15³/₄, (4) 2:11³/₄, Ella Mac (3) 2:14³/₄, Vallejo Boy 2:15, Eddie G. 2:30. Every one of his colts that has been trained has shown standard speed.

Sire, McKinney 2:11³/₄; dam, the great brood mare, Daisy S. (dam of 6 with records of 2:09³/₄ to 2:28³/₄) by McDonald Chief 3583; second dam, Fanny Rose (dam of 2 in 2:20) by Ethan Allen Jr. 2903.

Will make the Season of 1912 at the

DRIVING PARK, SAN JOSE, CAL.

Fee, \$50. Usual return privilege. The best of care taken of mares in any manner that owners may desire at reasonable rates, but no responsibility assumed for accidents or escapes. Excellent pasturage. Mares shipped will be met at the train.

For further particulars, address P. F. DAVEY, Driving Park, San Jose, Cal.

PARKER GUNS

Wear Well, Shoot Well, and Handle Well.

Wear well because they are made of the best material by the most skillful craftsmen.

Shoot well because they hold the charge compactly together at extreme ranges.

Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline.

Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

For further information regarding guns in gauges ranging from 8 to 25, address

Prince Ansel 29220

2-7-0. Race Record 2:20 1/2.

By Dexter Prince 11363 (sire of Lisonjero 2:08 1/2, Eleata 2:08 1/2, James L. 2:09 1/2, Edith 2:10, etc.); dam Woodflower (dam of 2, 1 sire of 10 and 1 dam of 1) by Ansel 2:20 (sire of 14, 4 sires of 11 and 14 dams of 17 in 2:30) by Electioneer; second dam Mayflower, a great broodmare by St. Clair 16675, etc.

Sire of Prince Lot (2) 2:29, 1911, 2:09 1/2; Wesos 2:12 1/4; Adansel (3) 2:14 1/4; Dorothy Ansel (2) 2:20, 1910; Laura Rodgers (2) 2:18 1/4; Frances C. (3) 2:24 1/4, Mat. 2:19; Anjella 2:27 1/4, tr. 2:16 1/4; Bonnie Princess 2:25 1/2; Princess Mamie 2:27 1/4, tr. 2:18 1/4; Prince Gay, tr. 2:12 1/4; Harold M., tr. 2:23; Josie Ansel, tr. 2:23; Ansevola, tr. 2:22; Ima Dudley (3), tr. 2:29; Joseph D. (2), tr. 2:18 1/2; Oddmark (2), tr. 2:23; Georgie K. (2), tr. 2:30.

PRINCE ANSEL is a handsome bay stallion, stands 15.3 hands and weighs 1200 pounds. During the season of 1910, 6 of his get took records, 4 of them being 3-year-olds and under. Prince Lot started 7 times, was once fourth, once third, three times second and twice first. In 1911 he lowered his record to 2:09 1/2. Adansel, his three-year-old son, lowered his record to 2:14 1/2 and Wesos started three times and won twice, lowering his record to 2:12 1/4.

Season of 1911 at the **Race Track, WOODLAND, CAL.**

Terms: \$50 to insure, \$40 by the season, with return privilege. Pasture for mares during season at \$3.00 per month; not responsible for accidents or escapes. For further information, address **A. B. KENNEY, Manager Woodland Stock Farm, Woodland, Cal.**

The Standard Trotting Stallion

LOS ALTO Registered No. 57267

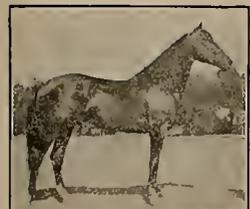

By McKenna 39460, son of McKinney 2:11 1/4, out of Helena 2:11 1/4 (dam of 5 in 2:30) by Electioneer 125.

First dam Ida Apetz by Nutwood Wilkes 2:16 1/2 (sire of Copa de Oro 1:59, John A. McKerron 2:04 1/2, Happy Dentist 2:05 3/4, etc.); second dam Novelist 2:27 by Norval 2:14 1/2; third dam Elsie (dam of 5 in 2:30 list) by Messenger Duroc.

Los Alto 57267 is a magnificent brown stallion; stands 16 hands high and weighs 1250 pounds. He is well built, stylish and a horse of high quality in every respect. He is a good-gaited trotter. Is 5 years old. As a three-year-old he broke him and trotted him a mile in 2:30, a half in 1:13 and a quarter in 36 seconds with very little work. He has not been worked since that time, but he proved to my satisfaction that he had all the speed that belonged to him as a representative of the McKinney-Guy Wilkes and Electioneer blood.

Season of 1912 at **MAYFIELD, Santa Clara Co., Cal.**

SERVICE FEE: \$30; \$15 time of service and \$15 when mare proves in foal. Good pasturage and the best of care taken of mares. For further particulars, address **J. S. PHIPPEN, Manager, Box 172, Mayfield, Cal.**

FEE: \$75 for the season. (Limited to 50 mares.)

CARLOKIN 2:07 1/2

REG. NO. 36548.

Exhibition Mile 2:05 1/4; 15.2 hands; 1100 lbs.

By McKinney 2:11 1/4; dam the great broodmare Carlotta Wilkes (dam of Inferlotta 2:04 1/4, Mary Dillon 2:06 1/4, Carlokin 2:08 1/4, Volita 2:15 1/4, Lottie Dillon 2:16 (trial 2:10 1/4), Frank S. Turner 2:28, etc.); second dam Aspasia (dam of 4 standard performers); third dam Miss Buchanan, great broodmare, etc.

FEE: \$75 for the season. (Limited to 50 mares.)

The above stallions will make the Season of 1912 at

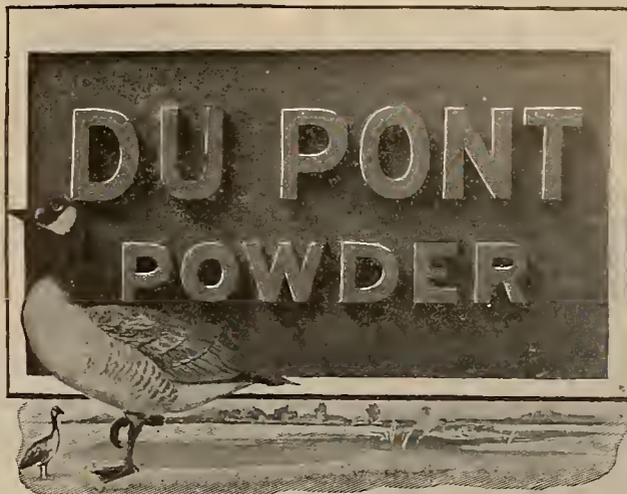

New Exposition Park, Los Angeles, Cal.

Very best care taken of mares at reasonable rates. For further particulars, address

W. G. BURFEE,

Box 1, University Station, Los Angeles, Cal.

RESULT OF OVER A CENTURY'S EXPERIENCE.

Perfection in powder-making is only achieved by exercising the most scrupulous care in the selection and preparation of raw materials, employing skilled workmen exclusively, and using only the most improved modern mechanical equipment.

This is the **DU PONT** method and accounts for the unequalled reputation

among sportsmen enjoyed by the **DU PONT** brands of

SMOKELESS SHOTGUN POWDERS

Two of these brands that are in high favor among shooters are

(Bulk)

(Bulk)

A perfect shotgun powder with light recoil. Unlike other powders of light recoil, Schulz gives high velocity and remarkable patterns.

Hard grain—Smokeless—uniform. Requires no special wadding to make it do its best. Loaded just as easily as Black Powder. "The Old Time Favorite."

These powders positively will not pit the gun barrels.

Unequaled for Field and Trap-Shooting.

See that your shells are loaded with either **SCHULTZ** or **E. C.** Send to-day for Schulz and E. C. pamphlet No. 99. It contains information of interest to all shooters.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, etc.

PRICE 10 CENTS

BREEDERS' NUMBER

WINCHESTER

FACTORY LOADED SHOTGUN SHELLS

"Leader" and "Repeater" loaded with Smokeless Powders. "Nublack" and "New Rival" loaded with Black Powders.

NOW SOLD ON THE PACIFIC COAST

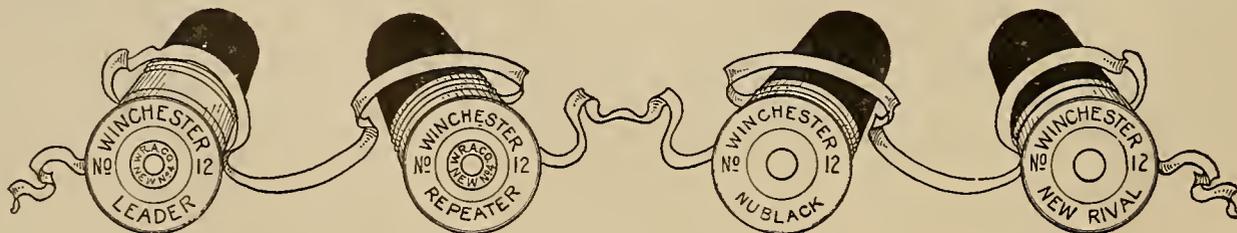

To meet the insistent demand for Winchester Factory Loaded Shotgun Shells, we have arranged to market on the Pacific Coast, through the regular trade channels, our famous Red **W** Brand of shotgun ammunition. Therefore, western sportsmen should henceforth have no difficulty in buying Winchester Factory Loaded Shotgun Shells, loaded with either smokeless or black powders, and in all desirable combinations of powder and shot. All Winchester Factory Loaded Shotgun Shells with the Red **W** on the label are made and loaded at our works in New Haven, Conn.

WINCHESTER REPEATING ARMS CO.

WINCHESTER SHELLS CAREFULLY MADE AND LOADED

It makes no difference what make of shotgun you shoot nor whether your favorite sport is field or trap shooting, Winchester Factory Loaded Shotgun Shells will give you the greatest measure of shooting satisfaction. No shells will make a good shot out of a poor one, but shells that are loaded so that they are uniform in velocity, spread the shot evenly, and give it good penetration, help wonderfully to make good bags in the field and high scores at the traps. Winchester Factory Loaded Shotgun Shells embody all these important elements to the fullest degree. They are designed correctly, made carefully, and loaded with exactness. The Winchester Patent Corrugated Head is an ingenious and distinctive feature of Winchester Shells. It is a superior method of construction to the old English system of metal lining, once used in Winchester shells, but discarded years ago. Other reasons for the superiority of Winchester Shells are their quick and sure primers and the high class of materials used in their construction and loading. When buying, don't simply ask for "some shells." Be specific and insist upon having Winchester—the Red **W** Brand, and the results will repay you for your pains.

A CHANGE TO WINCHESTER SHELLS IS A CHANGE FOR THE BETTER

A MODERN UP-TO-DATE PLANT.

CLIMATE UNSURPASSED.

A GREAT WINTER TRACK.

SAN JOSE DRIVING PARK

Most Centrally Located Training Quarters in California.

From San Francisco—
One hour and twenty minutes; eighteen trains daily.

From San Jose—
Twenty minutes from Southern Pacific depot by electric car line.

Large, tight-board paddocks, with running water in each, at the disposal of patrons.

All stalls 12 x 14 feet, with 12-foot shed running full length. Boarding house on the grounds.

The Most Perfect One Mile Training and Racing Track in the West.

Ten miles macadamized road running by the grounds. An abundance of fine pasturage adjoining the land. Fifty acres of irrigated land, including the infield, now being cultivated for alfalfa, which insures green feed the year round. A modern plant, laid out and constructed scientifically. Turns raised 1 inch to the foot, home stretch and first turn 75 feet wide, back stretch and upper turn 60 feet wide. Perfectly drained with iron-stone sewer pipe, absolutely high, dry and safe all winter; and while the soil contains no grit or sand it is entirely free from mud during the rainy season, and firm, fast and safe all summer. Stalls, \$2 per month. Shipping station, **Hillsdale, Cal.** Free track and feed rooms. Address all communications to

TOM SMITH 2:13 1/4 P. F. Davey, San Jose

THE IMPORTANCE of the meeting and final organization of the Pacific Coast Racing Circuit Association, which was held in this city this week, cannot be overestimated in regard to the many beneficial effects which will be derived from it. The greatest harmony prevailed and the consensus of opinion seemed to be that the light harness horse industry of this Coast should be awakened from its lethargy and steps immediately be taken to arouse a more widespread interest in it. The adoption of a constitution and by-laws to govern this body, the best method of electing delegates, the protection of its lay members, and the great need for a circuit secretary to attend to the details in connection with it, in accordance with the plans adopted at this meeting, were ably set forth by the delegates present. The problems presented as to the best methods to attract larger attendance at our fairs and race meetings, how to arrange for the transportation of horses and racing paraphernalia livestock and the caretakers more economically were discussed, and a committee appointed to interview the railroad officials regarding the formation of a train of cars to be used exclusively by racehorse and livestock owners from Vancouver, B. C., to Phoenix, Arizona. This is after the plan in use on the Grand and Great Western Circuits. The value of more extensive and earlier advertising and giving greater publicity to our meetings was admitted in order that horsemen in remote places will be induced to make entries so that larger fields will face the starter in every event. Larger fields mean better racing and increased receipts. Until this meeting was held and this organization formed, horsemen were in doubt as to whether it would pay to train their horses or not, and with only a limited season of eight weeks' racing the outlook was decidedly dark and uninviting. The programme of each day's racing on this circuit was arranged and will be submitted to the various associations which have claimed dates. New suggestions regarding conditions, making entries, and deciding how moneys shall be divided were suggested by Shirley Christy, the secretary of this association. These look sensible and feasible; at all events, they are worth trying. The amounts to be offered for the various events, however, are to be left to the associations comprising the circuit.

The appointment of a reputable, thoroughly qualified presiding judge to be present at all meetings on this circuit was another needed innovation adopted. The subject of side attractions for our fairs was

also discussed, and Secretary Christy was instructed to ascertain the cost of these and also the cost of thoroughly advertising these meetings. Thus the Pacific Coast Racing Circuit was successfully launched.

For the financial backing (outside of the money to be received from the various associations and regular membership), this association is deeply indebted to W. A. Clark Jr., of Los Angeles, who volunteered to contribute enough monthly to defray a large portion of the secretary's salary (this in addition to the first cheque of \$500 he gave) to insure the success of this organization. The horsemen of this Coast are also indebted to Messrs. I. L. Borden, T. J. Crowley, S. S. Bailey, and the others who cheerfully responded to the call for funds at the first meeting.

THE many important subjects relative to our animal husbandry, dairying interests, quarantine laws and value of introducing the highest bred cattle, sheep and hogs into California were most eloquently presented by Judge Peter J. Shields of Sacramento, President of the California Live Stock Breeders' Association, at the Palace Hotel, last Saturday. His reference to these and kindred subjects was most timely and everyone present realized how vitally important it was. He spoke feelingly of California and its great agricultural and horticultural resources. He then touched upon the animal industry and of its great importance to the human family. He advocated in ringing words the holding of the greatest livestock exhibition at the Panama-Pacific Exposition in 1915, ever seen in the world, and begged his hearers to work shoulder to shoulder to make it the success it deserves. "No time," he said, "is to be lost. Every effort should be directed to secure the very finest specimens of cattle, sheep, hogs, goats and poultry for this great fair." There is not a country on the globe that will not contribute its share and as a "drawing card" it will be one of the best, most instructive and interesting to be held. As an educational feature it will have a most lasting effect upon the minds of all, young and old, who visit it. Lectures will be delivered daily and live stock judging, dairying and butter and cheese making will be explained so simply that all who hear can understand them.

The Panama-Pacific Exposition must not put some "city or town men" on the committee to take charge of this important branch of the exhibit. It needs a committee of thoroughly qualified live stock and dairymen to handle this, and without such a committee working in harmony the whole thing will be a failure. The location for this big exhibit, and erection of a large pavilion and suitable structure for the housing of live stock, are subjects which will demand the careful attention of men who have had experience in this line. These arrangements and a great deal of detail work in connection therewith will have to be attended to. Then the publicity through the leading live stock and dairy journals and the transportation of all animals to this fair must be arranged months in advance. There will be live stock exhibits not only from North and South America, but from Europe, Asia, Africa and Australasia, and the choicest specimens of each breed will be sent to compete for the valuable prizes to be offered. The Live Stock Breeders' Association, therefore, has a great work before it; but, knowing the character of the men composing it, we believe there will be few mistakes and no failures, and that this will be one of the most successful financial and educational attractions of our big fair.

THE GREAT SUCCESS which has attended the eleven renewals of these annual sales of the Portland Horse and Cattle Company, of Portland, Oregon, will undoubtedly be repeated at the coming sale, April 16th to 20th, inclusive. There is a splendid lot of trotting and pacing stallions, mares, geldings, colts and fillies, the "cream of all the stock farms in the Northwest," to be sold and a number will be shipped from here, but owners have only until next Monday, March 10th, to decide, as entries will close on that date. There will also be a whole carload of registered Percherons, besides registered Shires, Belgians, and Clydesdales, all selected with the greatest care for this Pacific Coast market. There will be over 100 head of grade draft horses to be sold, besides all-purpose horses, saddlers and runabout horses. The very best auctioneer will be engaged, and as these sales are given more publicity than any others west of Chicago, a large attendance of buyers is confi-

dently expected. This is the last notice, and sellers and buyers should make arrangements to be represented there.

PACIFIC COAST RACING CIRCUIT.

At a meeting of the directors and delegates from the various Pacific Coast Racing Circuit, which was held at the Palace Hotel, last Monday evening the following were present: W. A. Clark Jr., I. L. Borden, John A. McKerron, Fred W. Kelley, Geo. L. Warlow, Ray Mead, T. J. Crowley, M. C. Keefer, Col. J. C. Kirkpatrick, S. Christenson, Chas. Durfee, W. G. Layng, A. G. Robinson, Dwight Hackett, J. H. Dickinson, E. H. Allen, J. McCarthy, E. T. Train, Mrs. Frank H. Burke, Mrs. Ray Mead, Mrs. Zapp, G. A. Westgate and Shirley Christy. I. L. Borden presided, Shirley Christy acting as secretary. A new constitution and by-laws was adopted and a permanent organization effected. Some changes were made in relation to the manner in which directors should be elected and it was decided that each association shall be represented on the board of directors by one member and that the individual members shall be represented by four delegates at large. Two classes of membership, association and individual, were provided.

J. H. Dickinson, of Fresno, A. G. Robinson, of Hanford, and Ray Mead, of San Jose, were elected to vacancies on the board of directors.

At the meeting in executive session of the directors in the Palace Hotel Tuesday it was voted to recommend for adoption by the association delegates in a later meeting several innovations in the trotting game which is believed will stimulate and build up the sport from the standpoint of the horsemen as well as from the public. Probably the most important feature which will receive a thorough tryout on the Pacific Coast Racing Circuit this season is a new division of purses, in which every heat will be made a race by dividing one-half of the purse among the winners of the first three heats. The other half of the money will go to the horse winning the three heats or scoring the greatest number of wins in the five heats.

This proposed division of the purses is the idea of Shirley Christy, of Phoenix, Ariz., secretary of the association, who is credited with having fostered the move which led to the formation of the organization. Shirley contends that this division will eliminate the drivers piling up heats in that each heat will carry a purse for the winner, and also will give a good horse, which is injured and forced to retire after winning one or two heats, a reward for its work and a chance to win hack for its owner the entrance fee. Two races a week will be under this plan for the first year, as an experiment, according to the recommendation of the directors, and if it proves successful it may be adopted exclusively for the 1913 season. The money for the first three heats will be cut 50 per cent to the winner, 30 per cent for second place and 20 per cent for third horse.

The directors also recommended a change in the usual entrance rules, the new rules allowing horses entered in two races in one day to start in only one without forfeiting the entrance for the other, but providing that he must enter in or pay the entrance fee for the race carrying the higher purse. They also advised the adoption of a rule allowing an owner to enter two horses in one class and start only one without forfeiting the entrance fee of the second horse.

The committee recommended that the National Trotting Association rules be adopted to govern all meetings and that no race be longer than five heats.

A tentative programme for each day's racing on the grand circuit, which opens in Vancouver, B. C., and closes in Phoenix, Ariz., was submitted. It follows:

Trot—2:30, 2:20 (stake), 2:14, 2:09 (stake) and free-for-all. Pace—2:25, 2:15 (stake), 2:10, 2:07 (stake) and free-for-all. Other races may be added to meet local conditions.

This programme, it was pointed out, would allow practically any horse to start in two classes in one week.

Following is the Pacific Coast Circuit:

Vancouver, B. C., August 12th to August 17th.
Seattle, Wash., August 19th to August 24th.
Portland, Oregon, August 26th to August 31st.
Salem, Oregon, September 2d to September 7th.
San Jose, September 9th to September 14th.
Sacramento, September 14th to September 21st.
Breeders' Association of California (place not fixed), September 23d to September 30th.
Fresno, September 30th to October 6th.
Salt Lake City, September 30th to October 6th.
Hanford, October 7th to October 14th.
Los Angeles, October 14th to October 21st.
San Diego, October 21st to October 28th.
Phoenix, Arizona, November 4th to November 12th.

Following are the subordinate meetings:

Marysville, July 17th to 20th.
Chicago, July 24th to 27th.
Roseburg, Oregon, July 30th to August 3d.
Vancouver, Wash., September 9th to September 14th.
Walla Walla, September 16th to September 21st.
North Yakima, September 23d to September 28th.
Spokane, September 30th to October 5th.
Boise, October, 7th to 12th.

G. A. Westgate, of Portland; W. A. Clark Jr., of Los Angeles, and G. W. Warlow, of Fresno, were named to compose a committee to select a presiding judge who will follow the meetings throughout the grand circuit and probably those of the California secondary circuit. The following were named on the committee on transportation: Colonel J. C. Kirkpatrick, Thomas Bannan, and S. Christenson, all of San Francisco; W. A. Clark Jr., of Los Angeles, and J. W. Dickinson, of Fresno.

THE TWO "BONS."

When Bon Voyage 2:08 was brought to Pleasanton he had been purchased from the late Chas. Marvin by Wm. A. Clark Jr. for \$10,000, many horsemen who had read about him visited his stall and had Mr. Gerrity, his caretaker, lead him out, and after inspection they declared he was one of the best-limbed, best-made, and best-bred youngsters they had ever seen, and then and there predicted he would become one of the greatest sires of speed ever brought to California. At that time he held the champion race record for two-year-old stallions, 2:15, and the champion race record for three-year-old stallions, 2:12 $\frac{1}{4}$, and was also accredited with being the largest money-winner as a two and three-year-old of these years, an honor never equaled since by a trotting stallion.

The predictions made by these critics at Pleasanton have come true. Although his list of foals is not large, nevertheless, every one of his sons and daughters are endowed with speed, the best of limbs, and stamina, and when trained were also Futurity stake winners, if entered in these stake races. Why shouldn't they? Is he not the greatest representative of the great Electioneer family of early and extreme speed on the Pacific Coast? Has he not proven that time has not dulled the edge of his speed nor caused him to falter in races which had caused fresh young trotters to quit? Just think of it. He had a let-up for five years, was used in the stud, and never trained during that period; his muscles were allowed to become soft and flabby, fat accumulated on him internally and externally. Then, when Ted Hayes, his trainer, persistently declared "he was faster and better than ever," Mr. Clark allowed him to go on and train him. What was the result? Did he break down and thus verify the assertion so often made by the late Senator Stanford: "One let-up is worse than two breakdowns"? No. He went on and raced in many of the hardest contested events seen on the Coast in years and won, lowering his record to 2:08. He trotted the fastest heat ever trotted in a race by a stallion in California and demonstrated most decidedly that Ted Hayes was right, that the long resting spell had not taken away his speed nor gameness and that "he was faster and better than ever!"

But Bon Voyage has other honor marks to his credit on the scroll of equine fame: He never sired a colt that could not beat 2:30 as a two-year-old, if trained; he gets trotters out of dyed-in-the-wool pacing mares; he transmits all his qualities to his progeny with a uniformity that is most gratifying to owners, and has been one of the most successful stallions ever foaled to cross with mares of Wilkes blood.

BON VOYAGE 2:08.

Bon Voyage 2:08 is a grandson of Electioneer and no better bred Electioneer was ever foaled than his sire Expedition 2:14 $\frac{1}{4}$, and Bon Voyage 2:08 stands only three-quarters of a second behind Exalted 2:07 $\frac{1}{4}$, the fastest of this sire's progeny. The Expeditions were strongly in evidence in 1910 and 1911, and why were they? One reason is that Expedition's dam, Lady Russell, was not only a full sister to Maud S. 2:08 $\frac{3}{4}$, who wore the crown for so many years as "Queen of the Trotting World," but she is also the dam of five in the 2:30 list, three producing sons and two producing daughters. Her dam was Miss Russell, the progenitress of hundreds of trotters and pacers, principally through her sons Nutwood 2:13 $\frac{3}{4}$ and Pistachio 2:21 $\frac{1}{4}$, and her daughters Lady Russell and Russia. Miss Russell was by Pilot Jr. 12, the great sire of famous broodmares.

Bon Voyage 2:08 is extremely rich in the blood of famous great broodmares on his dam's side also, and presents in himself the happiest blending of strong lines whence have come some of the handsomest and best trotters in America, and the hallmarks of stamina, intelligence and speed are stamped all over them. He does not carry a drop of Geo. Wilkes, Strathmore, or Dictator blood (directly) in his veins, that is why mares tracing to any of the following sires should be desirable to breed to him: McKinney, Zolock, Zombro, Nutwood Wilkes, Searchlight, Sidney Dillon, Allerton, Carlok, Copa de Oro, Del Coronado, Silver Bow, Director, Direct, and any of the other sires for which California is noted.

As a sire he has to his credit the stake winners Jean Val Jean (3) 2:10, Bon Guy (3) 2:11 $\frac{1}{4}$, Sweet Bow (2) 2:17 $\frac{1}{4}$, Bonaday (2) 2:27 $\frac{1}{4}$, besides those race winners Bon Vivant (3) 2:10 $\frac{1}{4}$, Phyllis Wynn 2:15, Bon Volonte (3) 2:19 $\frac{1}{4}$, Bon McKinney 2:24 $\frac{1}{2}$, Voyageur (3) 2:23 $\frac{1}{4}$, Bonaletta (3) 2:24 $\frac{1}{4}$, Ulatitis (4) 2:24 $\frac{1}{4}$, On Voyage 2:25, Le Voyage 2:25 $\frac{1}{4}$, Viaticum (2) 2:29, and Manager (2) 2:30.

He is standing for the season of 1912 at the Expo-

sition Park race course, Los Angeles, at \$75, in charge of Ted Hayes, of 3818 South Vernon avenue, Los Angeles, and owners of broodmares should not hesitate to send their best mares to this remarkable sire of handsome, speedy, intelligent, and high-class individuals.

One of the finest bred sons of Bon Voyage 2:08 is the handsome four-year-old cherry bay stallion Bon

BON McKINNEY (3) 2:24 $\frac{1}{2}$.

McKinney (3) 2:24 $\frac{1}{2}$, that is to make the season of 1912 at the San Jose Driving Park in charge of Joseph Twohig. Last year this horse made a short season there and was only bred to ten mares, yet nine have proven with foal. When Mr. Andrew Robertson, superintendent of the largest farm devoted to the breeding of trotters in Australasia, was here last year, he visited almost all places where trotting colts were, and, after looking Bon McKinney over, said, "There's the best-limbed, best-made, and handsomest type of a trotter of his age I have ever seen. Kentucky has none his equal!" This is the consensus of opinion of all who have seen him. How fast he will trot will be proven this year, for after his season ends he will be taken in hand by Ted Hayes, who declares he believes he is the fastest Bon Voyage ever foaled, and next year in his five-year-old form he will "go down the line with him." He has trotted halves as a three-year-old in 1:05 and a purer gaited trotter never came down the homestretch.

Of Bon McKinney's breeding on the sire's side it is needless to refer further than to what has been said above. On his dam's side, however, the same amount of space could be taken up and then the "story would not have been half told." His dam, Daphne McKinney, never had but two foals trained, one was Frank N., which got a record of 2:07 $\frac{1}{4}$ last year and has shown miles in two seconds faster, the other is Bon McKinney 2:24 $\frac{1}{2}$. Daphne McKinney is by McKinney 2:11 $\frac{1}{4}$, the greatest sire of 2:10 performers ever foaled. His history is told elsewhere in this issue and should be preserved by all who are interested in the trotting horse industry. McKinney, however, was never bred to a better mare than La Moscovita, the dam of Daphne McKinney, she was also the dam of Bon Guy (3) 2:11 $\frac{1}{4}$, the gamest trotting stallion of his age and size that ever faced a starter in California. He won, among other closely contested races, the California Breeders' stake and the Stanford stake, and he was by Bon Voyage 2:08, too, so it proves this blood "nicks" well with the descendants of Geo. Wilkes, for Bon McKinney's grandam, this mare La Moscovita, was by Guy Wilkes 2:15 $\frac{1}{4}$, and, besides producing Bon Guy (3) 2:11 $\frac{1}{4}$ and Daphne McKinney, she is also the dam of Yolande 2:14 $\frac{1}{4}$ and Tina 2:20 $\frac{1}{4}$. We all know what the daughters of Guy Wilkes are doing as producers of the fastest stake winners and gamest campaigners in America. The records prove this, but let us look further. La Moscovita was out of Moscovia 2:23 $\frac{1}{2}$ (dam of Mamie R. 2:15 $\frac{1}{4}$ and Oro Belmont 2:15 $\frac{1}{4}$ (a sire), by Belmont 64 (sire of Nutwood 2:18 $\frac{3}{4}$ and 58 others in 2:30), the fourth dam was Mosa (dam of five), greatest speed-producing daughter sired by Woodford Mambriño 2:21 $\frac{1}{4}$; the fifth dam was Hermosa (dam of one and the dams of 12), by Edwin Forrest 49, and sixth dam Black Rose (also dam of the great broodmares Primrose and Malmaison), by Tom Teemer.

We would advise every owner of a good mare to send a postal card to Jos. Twohig for a tabulated stallion card of Bon McKinney. This grand looking young horse cannot fail to make a splendid campaigner and one of the best sires of early and extreme speed (as well as handsome individuals) ever bred in the United States. His progeny (now weanlings) are perfectly formed, strong limbed and intelligent, and "run away on a trot." The service fee set for this horse is only \$40, with usual return privilege, and he is a sure foal-getter. His percentage of foals during his first season in the stud was ninety per cent!

PALITE, BY NUTWOOD WILKES 2:16 $\frac{1}{2}$.

There were three famous stock farms in California whence some of our greatest trotters and pacers came, namely: Palo Alto, San Mateo and the Nutwood Wilkes Stock Farm. To get a colt that traces to the three greatest sires on these places is an honor held by few owners, Mr. E. D. Dudley, of Dixon, being one of these fortunate ones. In the veins of his big, handsome chestnut stallion Palite there flows the blood of the most conspicuous and successful race horses on these nurseries of speed. That he is a sire and is destined to become one of the leading sires of early and extreme speed, is admitted by all. Another

qualification they will inherit, and it is very essential nowadays, and that is, stamina.

Palite was sired by Nutwood Wilkes 2:16 $\frac{1}{2}$, the greatest sire of early and extreme speed sired by the mighty Guy Wilkes, the premier stallion of the San Mateo Stock Farm, and for a dam he had one of the greatest speed-producing daughters of Nutwood 2:18 $\frac{3}{4}$, the most famous sire of broodmares ever foaled. Nutwood Wilkes sired 59 in the 2:30 list, 13 of these being in 2:13 $\frac{1}{2}$ or better, and seven are in the 2:10 list, namely, the great Copa de Oro 1:59; John A. McKerron 2:04 $\frac{1}{2}$, holder of the world's stallion record to wagon; Happy Dentist 2:05 $\frac{3}{4}$, winner of three races in six days, all heats averaging 2:07 $\frac{1}{4}$; Tidal Wave 2:06 $\frac{3}{4}$; Miss Idabo 2:09 $\frac{1}{4}$, besides two new 2:10 performers in 1911; Nutmoor 2:06 $\frac{1}{4}$ (timed separately in the Hotel Hartman Stake at Columbus in 2:03 $\frac{3}{4}$), and Professor Heald 2:09 $\frac{1}{4}$.

The sons of Nutwood Wilkes have sired seven in the 2:10 list, besides the stake winners Pal (2) 2:17 $\frac{1}{4}$ and Ella M. R. (2) 2:16 $\frac{1}{4}$.

Nutwood Wilkes is so well known and highly esteemed by Pacific Coast horsemen that it is unnecessary to add anything further regarding his individuality, gameness, and rich bloodlines, but his son Palite is also a claimant for distinction in other ways. His dam Palita, as a two-year-old, earned the fastest record at that age of any daughter of Palo Alto's. She is also his greatest speed-producing daughter, for she is the dam of Nutalita 2:26, McCutcheon 2:27 $\frac{1}{4}$, and Miss Carnac 2:25, besides Palite, the sire. Palo Alto 2:08 $\frac{3}{4}$ was once the holder of the world's championship record as a trotting stallion, and a gamer or more consistent trotter never was foaled. His racing career proves this. He was by Electioneer out of Dame Winnie (by Planet, by Imported Trustee, out of Nina, by the undefeated Boston), one of the most remarkable thoroughbred broodmares as a dam of trotters in the world. Palo Alto sired sixteen in the 2:30 list, five sires of eighteen, and nine dams of twelve in the 2:30 list, and one of his daughters produced High Admiral 2:07 $\frac{3}{4}$.

Palite's second dam was Elsie, dam of five, two sires, and three dams of six in 2:30, and she was one of Gen. Benton's greatest speed-producing daughters, and we know that some of those produced Sunol 2:08 $\frac{1}{4}$, the ex-queen of trotters, Surpol 2:10, and Lena N. 2:05 $\frac{1}{4}$. Elsie's dam was that beautifully formed and perfect gaited trotter Elaine 2:20, and she was also the champion four-year-old filly of her day and when placed in the breeding ranks produced from Alto 2:12 $\frac{1}{4}$ (a sire), Palatine 2:18, Anselma 2:29 $\frac{1}{2}$, Altvaine 2:29 $\frac{1}{2}$, and the dams of nine in the 2:30 list. Elaine was by Messenger Duroc, out of Green Mountain Maid, dam of Electioneer, one of the greatest sires of trotters the world has ever known, and nine

PALITE 45062.

trotters in the 2:30 list, four sires of 211 and five dams of ten in the 2:30 list, and her sire was Harry Clay 45, who sired the dams of St. Julien 2:11 $\frac{1}{4}$, Silent Brook 2:16 $\frac{1}{2}$, the great sire, and many others.

With such a remarkable speed inheritance it is not surprising that Palite is a sire of early and extremely fast performers, for if he did not come honestly by the gift of extreme speed he could not transmit it as uniformly as he does, and, in many instances, control the gait of his progeny that come from pacing mares or mares that have a strong pacing inheritance. Palite was a perfect gaited trotter having plenty of knee and hock action. He was only worked sixty days as a two-year-old and easily trotted quarters in 36 seconds. He met with an accident in his stall at this time and was thrown out of training. He was then bred to a few mares, one of these produced that good two-year-old colt Pal, who won two two-year-old trotting stakes in straight heats and took a record of 2:17 $\frac{1}{4}$, and the two-year-old Nat Higgins, who took a record of 2:25, trotting, at the Woodland meeting in 1910, which he lowered to 2:20 this year. Another one to the credit of Palite is Cornelia Scott 2:24 $\frac{1}{4}$, while Complete, a three-year-old, was second to Volante in 2:13 $\frac{1}{4}$, the fastest heat ever trotted in an Occident stake, and she was timed separately in 2:14 $\frac{1}{4}$. There are many at Mr. Dudley's place which will get low records, and every owner who bred mares to this grandly bred stallion is confident that he made no mistake, and, from the appearance of the youngsters, it can be seen that their sire was a horse of size (he stands over 16 hands) and symmetry, and in disposition the youngsters by him have inherited the same good sense and gentle disposition he is noted for. Every one is easy to handle and trots as naturally as if there never was any other gait. Palite is a very sure foal-getter and will make the season of 1912 at E. D. Dudley's place, Dixon, Cal.

NOTES AND NEWS

It is reported that Walnut Hall Farm will probably sell Ozono, its son of Moko.

John Splan is now the owner of the five-year-old stallion Basso, by Bellini 2:13 $\frac{1}{4}$, dam Operetta, by Elyria.

E. L. Binder, of Riverside, advertises two grandly bred mares for sale in this issue. They should find ready buyers.

John E. Madden has in training Royal Hall, by Walnut Hall 2:08 $\frac{1}{4}$, dam Fereno 2:05 $\frac{1}{2}$. He should be a good one.

Robert Nolan, of this city, has sent his promising trotting mare Billie Burke, to Chas. Durfee to prepare for the races this fall.

Two million eight hundred and thirty-four thousand six hundred dollars was raced for in 1911 over the American Association's tracks.

C. A. Canfield and W. A. Clark Jr., two of the best friends the trotting horse industry of California ever had, are visiting San Francisco.

Notemore, a full brother to The Harvester 2:01, brought only \$400 at the New York sale. He must have been a bad shaped colt.

There's a broad smile on the face of everybody in California, caused by the welcome downpour of rain this week which means millions to this State.

Vance Nuckols, who marked Brenda Yorke, pacer, in 2:04 $\frac{1}{4}$, has purchased Martha Yorke (2), by Walnut Hall, dam Sylvia Yorke, by Mobil 2:10 $\frac{1}{4}$, granddam Grace Tipton (4) 2:13, dam of Brenda Yorke.

Twenty-eight-year-old Anderson Wilkes 2:22 $\frac{1}{4}$ is to be offered at auction next month. It is such things as this that form one of the unpleasant features of the business.

The trotter J. C. Simpson 2:18 $\frac{1}{4}$ recently trotted a half-mile in 1:02 $\frac{3}{4}$ over the Pleasanton track. He has improved wonderfully in appearance, gait and speed since his arrival there.

Hal B. 2:04 $\frac{1}{4}$, Cruzado 2:29 $\frac{1}{4}$, Oregon Patch, Dictatress 2:08 $\frac{1}{4}$, Altacora 2:13, Harold Welcome 2:11 $\frac{1}{4}$, are a few to be sold at the Portland Horse and Sale Company sale April 16-20, at Portland.

If any of our readers are looking for first-class racing material or trotting stock to be placed in the breeding ranks, they will find what they need advertised in our business columns.

F. W. Perkins, of Willows, has booked two mares to The Bondsman, viz: Garra Patta by Pittick, and Minnequa by Athamax 2:22 $\frac{1}{2}$. He has a fine colt by The Bondsman and says he has room for a few more like him.

It is announced that Messrs. Simpson, proprietor of Empire City Farms, Cuba, N. Y., will have thirty-six youngsters by McKinney 2:11 $\frac{1}{4}$ and Axworthy (3) 2:15 $\frac{1}{2}$ trained at the Lexington, Ky., track the coming season, by Everett D. Middleton.

It is announced that Lancelot 2:23, the youngest son of Green Mountain Maid, is now owned in Germany. He is 24 years old and has done service for several years past in Austria, where he got several race winners, the fastest of which is Darling Girl 2:18 $\frac{1}{2}$.

The three-year-old bay stallion Zeno Bond, by The Bondsman, dam Hallie Lumps, by King Hal, owned by J. H. Beavers, D. V. S., Canton, Miss., is reported to be a very fine individual and quite a speed prospect.

The strong, well-formed young stallion Logan Pointer (half brother to Sir Albert S. 2:03 $\frac{3}{4}$, and Jim Logan 2:05 $\frac{1}{4}$), is to make the season of 1912 at Carey Montgomery's farm, Davis. Logan Pointer is by the champion Star Pointer 1:59 $\frac{1}{4}$, out of the dam of the champion three-year-old Jim Logan 2:05 $\frac{1}{4}$ and should be a sire of colts and fillies of champion caliber.

Governor Foss, of Massachusetts, has sent a special message to the Legislature in which he advocates the raising of the tax on automobiles. He clearly points out that road building and road repairs have become very serious problems with the cities, towns, and states since the advent of the automobile. And there is not a question but that he is on the right track in urging a higher tax upon the automobiles, for there certainly is no class of vehicles that wear out the road as much as an automobile, and their owners should be made to bear their full share of the burden for the support and maintenance of the public highways. Governor Foss suggests that the tax be increased from 35 cents per horsepower to at least 50 cents, in other words more than doubling the present tax rate.

W. L. Snow will have two gray horses in his racing string this season—Zombrewer 2:04 $\frac{1}{4}$, pacer, by Zombro 2:11, and Oakland 2:12 $\frac{1}{4}$, trotter.

A trotter that has demonstrated on more than one occasion that she is a trotter of real class is Donna Bly 2:16 $\frac{1}{4}$, by Zombro 2:11. She is owned by the Chicago Stock Farm, E. Smith, proprietor, Marceline, and has wintered in the pink of condition. Another good slow class trotter owned by the same farm is Lady Marceline 2:25 $\frac{1}{4}$, by Owynex 2:22 $\frac{1}{4}$.

A very handsome catalogue has been issued by M. W. Savage, of Savage, Minn., describing the horses at the International 1:55 Horse Farm. The book is handsomely illustrated with pictures of Dan Patch 1:55, Minor Heir 1:58 $\frac{1}{4}$, George Gano 2:02, Arion 2:07 $\frac{1}{4}$, Dazzle Patch, the sensational son of Dan Patch, and some very beautiful farm scenes.

The colt Dillon Bell, which recently won the New Zealand Dunedin Cup (two miles in 4:35), is by Harold Dillon, full brother to Dillicara, owned by the Sacramento Stock Farm, but is at present occupying a stall at the Pleasanton race track. These two are, without doubt, the best bred sons of Sidney Dillon foaled.

G. Lindauer has the largest livery and sales stable in San Francisco and always has on hand an extra carload or two of fine draft horses and mules. Mr. Lindauer ships more livestock to the Hawaiian Islands than any other man in California, and his judgment as an expert buyer and his integrity as a business man are unquestioned. His place at 122 Clara street is worthy of a visit.

If horsemen want their horses fitted with the very finest boots, they will be making no mistake if they have John A. McKerron, the celebrated horse boot maker, measure their horses and fit them perfectly out of the very best and most desirable materials. The boots he makes keep their shape and are more durable than any others. His track harness outlasts those made elsewhere.

R. S. Burns, proprietor of the Santa Rosa race track, has this course in splendid shape—better, some horsemen say, than it has ever been, and trainers and drivers who have not decided where to take their horses will find they will be welcomed at this track, and their wishes regarding its care will be promptly acceded to.

Mr. S. S. Bailey, the proprietor of the Pleasanton race track is having special harrows and scrapers made for that track, and when his water pipes are installed he will be able to keep the course perfect for racing all summer, as well as winter. He has been receiving applications for stalls every other day and it looks as if there will not be a vacancy in the place by April 1st.

We learn that Kinney Lou 2:07 $\frac{3}{4}$, the California stallion that Rosemire purchased at the Old Glory sale last fall, made such an impression upon the Russians that he could have been sold at a good price upon several occasions. Kinney Lou was sold to P. V. Makaroff, a wealthy Russian and owner of a good stock farm. Makaroff formerly owned the American stallion Nominator.

John Splan will be in the racing game this year with a fast string. Among his prospects are: Pearl Ongale (2) 2:15 $\frac{1}{4}$, pacer, by Ongale, son of Baronmore 2:14 $\frac{1}{4}$, dam Lou Ross, by Eugene Ross, son of Trevillian 2:08 $\frac{1}{4}$, and the green pacer Lew Perkins (6), by Platte Jr. 2:11 $\frac{1}{4}$, dam Lou Ross. It's hard to keep a good man out of the racing game.

In our correspondent's notes from Fresno the statement was made that Cora Wickersham, Geo. L. Warlow's famous broodmare, never had a filly. This is a mistake. She had one called Coradan, a full sister to Athasham 2:09 $\frac{1}{4}$, etc., which was bred to Robert Direct and had the beautiful stallion known as Don Direct, now owned by Wm. Sinnock of Santa Ana. Don Direct is a very promising young trotter and will enter the 2:20 list easily if trained. He has sired some of the finest colts and fillies in Southern California and his services are always in demand. Coradan, his dam, died from the effects of a kick. Her death was a serious loss to the trotting horse industry.

Al Schwartz has left the Alameda race track for Pleasanton with the following trotters and pacers: Prince G. 2:19, by Prince Charles (son of Chas. Derby 2:20); Welcome Boy (p), by Welcome 2:10 $\frac{1}{2}$, dam by Alto Reo; Miss Helen by Greco B., dam by Nutwood Wilkes 2:16 $\frac{1}{2}$; Oakwood by Chas. Derby 2:20; Jerry D. by Sidney Howard, dam by McKinney 2:11 $\frac{1}{4}$; California Belle by Chas. Derby 2:20; Allegro by Star Pointer-Sadie Mason; Rey Alto (2) by Iran Alto 2:12 $\frac{1}{2}$, out of Lorenzo Girl by Monterey 2:09 $\frac{1}{4}$, and a black stallion called Albany by Educator, out of a mare by Washington.

P. H. Smith, of Los Angeles, owner of a number of very choice trotters being handled by Chas. De Ryder, at Pleasanton, was much impressed by the speed they are showing and contemplates visiting the track several times before returning to his home in Southern California.

The Merchants and Manufacturers, one of the largest in the Grand Circuit stakes of \$10,000, is again for 2:14 class trotters and will be decided during the blue ribbon trotting meeting in Detroit, July 22d to 25th. Requests to change this class were refused by the Detroit Driving Club last Saturday, and this trotting feature continues for the same class it has been given to for twenty-three years. The Chamber of Commerce stake of \$5,000 is for the 2:15 class.

Hiram Rush, of Suisun, has one of the choicest bred as well as one of the most natural trotters seen in Solano county. She was sired by Gen. John B. Frisbie (he by McKinney 2:11 $\frac{1}{4}$, out of Daisy S., dam of five, by McDonald Chief), out of Eva Demonio, by Demonio 2:11 $\frac{1}{4}$ (he by Chas. Derby 2:20, out of Bertha, dam of twelve), by Alcantara 2:23; second dam Eva Airlie, by Prince Airlie (he by Guy Wilkes 2:15 $\frac{1}{4}$, out of Chantilly, dam of three, by Nutwood 2:18 $\frac{1}{4}$); third dam Hannah (dam of two), by Le Grand; fourth dam Hannah Price (dam of six), by Arthurton; fifth dam Priceless 2:45 $\frac{1}{2}$. Hannah Price, besides being the dam of Hannah, is also dam of Annie G. (dam of six) and Anita (dam of two), and these three producing mares are full sisters. Mr. Rush is a son of Senator B. F. Rush, and if he uses as good judgment in selecting mares and breeding them as he has in this instance we can look for some remarkably fast trotters racing in his name in a few years.

A splendid half-mile track has been made on E. D. Dudley's farm (home of Palite), near Dixon. The infield is set out in the check system for the planting of alfalfa, which has just been sown. A large pump has been installed and next year this will be one of the show places of Solano county. Mr. Dudley has some of the finest bred mares, colts and fillies foaled in California, and as he intends to sell all the colts and fillies on his farm hereafter, there should be some "crackerjacks" picked up there. His stake-winning stallion McFadyen 2:11 $\frac{1}{4}$ has his first crop of foals this year and they ought to be good, for he was one of the best of the Diablo's, and a handsomer horse never looked through a bridle. Mr. Dudley advertises some of his choicest young horses and mares in this issue and will price them exceedingly low.

Last week Mr. Wm. Kennedy, of the Rio Bravo Oil Company, Houston, Texas, purchased of Geo. L. Warlow, of Fresno, the handsome stallion Strathboule (3) 2:13 $\frac{1}{2}$, and shipped him Monday to his home. Mr. Kennedy came to California during the early part of January to purchase a trotting stallion. He finally decided that Strathboule was the best horse he had seen and induced Mr. Warlow to put a price on him. He then left California and visited the stock farms of A. G. Danforth & Son, Washington, Illinois; L. E. Brown at Delavan, Illinois (the home of Parole), then went to Walnut Hall Stock Farm, and from there to the Patchen Wilkes farm (home of Peter the Great). Not finding a stallion to suit him he purchased seven Peter the Great fillies, shipped them to Houston, and then returned to California and purchased Strathboule. He will breed this grand looking son of Stamboulet 2:10 $\frac{1}{4}$ to these fillies and then place him in the hands of Al. Thomas, the famous reinsman, who will fit him for the races in Texas. Strathboule will be a 2:10 performer before the circuit of 1912 ends.

There was quite a gathering of enthusiastic horsemen at the celebrated Pleasanton race track last Saturday to see Mr. R. D. MacKenzie's horses work out; incidentally, some of these gentlemen enjoyed the rare pleasure of piloting a few of the best fitted ones over the course. R. D. MacKenzie is an excellent reinsman and his friends from Winnipeg, Jas. Cowan (owner of Peter Wilton, and a number of others), one of the leading railroad contractors and builders in Canada, drove the pacer St. Thomas a mile in 2:19 $\frac{1}{2}$ and the way he handled the ribbins convinced the horsemen there that a famous reinsman was spoiled when he engaged in any other calling. He weighs about 260 pounds and is as active as any young man at the track. Jack Vassar, a cousin of R. D. MacKenzie's, is also a good driver and quite a skillful reinsman. He has some good horses in Winnipeg. C. M. Abbott, cashier of the Western Electric Railway, is also another genial gentleman and when Chauncey H. Sears, the leading amateur driver of Fall River, Mass., got up behind a pacer and then Col. Kirkpatrick followed with another, and both started away on even terms, he took as much interest in them as if they were to race for a \$10,000 purse. Coming down the homestretch the Colonel tried to pass Mr. Sears, but the latter was too cute, and urging his pacer to her limit, forged ahead, as the Colonel's mare broke, and landed the heat a winner. The applause which greeted this reinsman for his exhibition of driving showed how quickly the spectators appreciated it. S. Christenson of the Palace, and Frank P. McInerney, also of this city, were among those present and shared in the enjoyments of the afternoon. Nearly all the horses in Mr. MacKenzie's string were led out for inspection and the opinion was expressed they looked better than they did this time a year ago and great credit is due Messrs. Havis James and Geo. H. Spencer for the splendid condition they are in. Vernon McKinney, Joe Patchen II, Bert Kelley, Merry Widow and all the others that were on the sick list, have fully recovered and are going sound.

TOM SMITH 2:13¼.

It is usual for people owning stallions sired by famous horses to claim that they are perfect likenesses of their sires. But, when attention is called to this fact, in nine cases out of ten, if the person addressed has an idea about conformation and remembers the sire, he will say nothing, but discreetly keep quiet. There is a horse in San Jose that is pronounced by all horsemen to be like his sire in many respects, but he is better made, better limbed, and has more quality or "class," and that is Tom Smith 2:13¼, the son of McKinney 2:11¼, who is the greatest sire of early and extreme speed that ever lived,—a horse that is destined to be placed in that inner circle of sires now occupied by Hambletonian 10, Geo. Wilkes, Onward, Nutwood, and Mambrino Patchen. In another column of this issue is the story of McKinney, and the attention of our readers is called to it.

The dam of Tom Smith 2:13¼ is one of California's most famous broodmares, she is called Daisy S., and while possessing speed of the highest order, and what is meant by this, she is a pure-gaited trotter needing neither toe weights nor heavy shoes, neither does she need boots of any kind to protect her clean, flat, cordy limbs. How fast she really could trot her owner, Mr. Thos. Smith, of Vallejo, never learned, for she was always so full of "nervous energy" and "gimp" that he found it well nigh impossible to control her on a race track. Her powers of endurance seemed to be without limit, and the statement "no road was too long for her" was a truism in her case. She was just the type to become a great broodmare, and time and trials have proven she is, for, bred to McKinney she produced Vallejo Girl 2:10¼, Tom Smith 2:13¼, Gen. John F. Frisbie, and Constructor; to Mambrino Chief Jr. she produced Gen. Vallejo 2:20½ and Sweet Rosie 2:28¾, and to Stone's Election, she produced Little Mac 2:27½.

Daisy S. was by McDonald Chief, he has four trotters (including Columbus S. 2:17, that game campaigner,) to his credit, one of his sons sired four, and three of his daughters produced eight and there is only one pacer among them. McDonald Chief was by Clark Chief 89, a good sire and sire of Kentucky Prince and eleven other sires, he was by Mambrino Chief 11, out of Little Nona, by Downing's Bay Messenger, son of Hurlpinus.

McDonald Chief's dam was by Bethune, he by Sidi Hamit (sire of the dam of the famous broodmare Jessie Pepper), out of Susette, by Aratus (sire of third dam of Alma Mater, dam of Alcylene 2:27, etc.), and Susette's dam was Jenny Cockeracy, by Potomac, etc. Susette was a full sister to Betsy Harrison, dam of Denmark, the foundation sire of the greatest Kentucky saddle horses that ever lived. He was the Hambletonian 10 of that breed, if one may use that title. Sidi Hamit's name appears in the pedigrees of many handsome trotting horses. He was by Virginian, out of Lady Burton (dam of nineteen foals), by Sir Archy; second dam Sultan, by the Barb horse.

McDonald Chief's second dam was by McDonald's Copperbottom. The dam of Daisy S. was Fanny Rose (dam of George Washington 2:16¾, a sire, and Columbus S. 2:17), by Vick's Ethan Allen Jr. 2:30, by Ethan Allen 2:25½, out of the Harris mare by Hambletonian 2. Jenny Lind, the third dam, when bred to Ethan Allen Jr., produced, besides Fanny Rose, a full brother to her called Prince Allen that got a record of 2:27 in May, 1876.

It is not surprising that Tom Smith is a pure-gaited trotter having size, symmetry, quality, strength, and the disposition to never falter. He transmits these qualities with marvelous uniformity to his progeny, one of them, Katalina, the first trained, won the two-year-old division of the Breeders' Futurity in 2:22½, and as a four-year-old lowered it to 2:11¼. He sired Eddie G. 2:30, and last season but two of his progeny appeared, Vallejo Boy, that won the 2:20 class trot at the Breeders' meeting in Salinas in August. After losing the first heat to Lucille Patchen in 2:16 he won in 2:15¼, 2:15, and 2:16½. The other starter that year was the three-year-old trotter Ella Mac 2:14¼, who won the Occident stake at Sacramento in 2:14¼, 2:15¼, and 2:14¼, and the same week won the Stanford stake there in straight heats. She was then taken north to the other State Fair at Salem, and captured the Oregon Futurity stakes in straight heats, and these were all the Tom Smith's trained.

He has been "buried" in Fresno County, but Mrs. F. H. Burke purchased him last spring and brought him to the San Jose race track, where she placed him in charge of P. E. Davey, the superintendent of the La Siesta Stock Farm horses for over eighteen years. Mr. Davey served a long apprenticeship in the care and development of trotting horses with that prince of horsemen, S. A. Browne, of Kalamazoo, Michigan, and is noted throughout the Pacific Coast as one of our most careful and capable horsemen.

He has driven in a number of races and won. He pays great attention to all mares sent to any stallions he has in charge, and those who want the finest looking natural trotters that will have all the merits expected in the highest type of a horse, either for road or racing purposes, will never regret sending their mares to this stallion, Tom Smith, for Mr. Davey will give them his personal attention.

TOM SMITH 2:13¼

Sire of Futurity Winners.

DICKENS B.

On the Santa Rosa race track where Lou Dillon 1:59½ and all the Sidney Dillons used to be, Mr. S. H. Burns has his good, game pacing stallion Dickens B., and will give him a record after making a season in the stud there. Dickens B. is a beautiful shade of bay in color with black points, and is a horse of perfect conformation, weighing about 1,100 pounds. He has style, finish, quality, the best of feet and legs, and a splendid constitution. He was only worked a little, yet he has been a mile in 2:23, last half in 1:09½.

Dickens B. was sired by Dictatus 2:17, a remarkably game campaigner, and afterwards a noted sire, baving to his credit Funston 2:08¼, Dictatress 2:08¾, Ama A. 2:10½, San Lucas Maid 2:16¾, and six others in 2:30; one of his sons is a sire and four of his daughters are speed producers. Dictatus was one of the best bred horses ever brought to California. His sire was Red Wilkes (son of Geo. Wilkes 2:22 and Queen Dido by Mambrino Chief 11) and his dam was Miss Lollie by Dictator 113; second dam Gold Pen, by Mambrino Abdallah; third dam by Harold 413, sire of Maud S. 2:08¾, etc. The dam of Dickens B. was Maggie Mc.; she was sired by Abbottsford Jr. 2:27, he by Abbottsford 2:19, a noted sire by Woodford Mambrino 2:21½, and Abbottsford Jr.'s dam was by American Boy, a thoroughbred.

Speculation, a fine looking son of Hambletonian 10 and Martha Washington (dam of Whipple's Hambletonian) sired the granddam of Dickens B. Speculation's daughters are the dams of fourteen in the 2:30 list, including Dione 2:07¼, Venus II 2:11½, Venita Wilkes 2:13, Psyche 2:16¼, and Princess 2:19. This Speculation mare was out of a good mare by Bell Alta, by Williamson's Belmont, one of the greatest thoroughbred foundation sires of trotting stock that was ever foaled.

Dickens B. traces four times to Hambletonian 10 through Geo. Wilkes 2:22, Dictator, Belmont 64 and Speculation. He is only seven years old, just in his prime, and owners of good mares who are anxious to get colts and fillies that will undoubtedly inherit all

the qualities they desire, should not hesitate to send them to Dickens B. His service fee is only \$25. Mr. Burns has every facility for caring for mares in any manner owners may desire, as he owns the Santa Rosa race track, and has every provision there for doing so.

GEO. T. BECKERS' OFFERINGS.

Since Zombro 2:11 died and his owner, Geo. T. Beckers, has sold his home place near the Los Angeles race track, he feels that he can never take the same interest in the light harness horse he once did, hence his determination to sell the balance of his horses, and, in our business columns, an announcement to that effect will be found. Here is an opportunity to get high-class stallions, mares, colts and fillies by Zombro 2:11, the "king of all of McKinney's sons," out of some royally bred mares. Then there are others by Judge McKena and The Bondsman. Write to Mr. Beckers 3727 So. Figueroa street, Los Angeles, for further particulars. It is a chance to get trotting stock at your own prices, for Mr. Beckers is determined to sell them even if the prices are in the "sacrifice list."

LOS ALTO 57267.

There was one mare on the Palo Alto Stock Farm which Superintendent Covey used to say was the finest type of a broodmare ever foaled there, and that was Helena 2:11¼, by Electioneer. She proved his opinion was a correct one, for she has five in the standard list to her credit, and all her brothers and sisters are "breeding on." Helena 2:11¼ was a good game race mare, she stood nearly 16 hands high and had most perfect trotting action. Her dam was Lady Ellen 2:29½, by Carr's Mambrino, and she was the only mare carrying the blood of Mambrino Patchen in her veins that was ever bred to Electioneer. Carr's Mambrino sired the dam of Sweet Marie 2:02, the fastest trotter sired by the great McKinney 2:11¼. Lady Ellen was out of Lady May Jr., by Owen Dale (son of Williamson's Belmont), and her next dam was Ida May, by Williamson's Belmont, so it can be seen that Helena traced twice to this remarkable sire. When one comes to realize what that one mare Lady Ellen, by Carr's Mambrino, has given the trotting world the question arises: "How much larger would Electioneer's list be, had he been bred to more mares which traced to Mambrino Patchen?" Helena was bred to McKinney 2:11¼, and produced McKena, sire of Los Alto. With such an inheritance on his sire's side it can be seen he should be a sire. But let us see how he is bred on his dam's side: His dam is Ida Apetz, by Nutwood Wilkes 2:16½, the greatest speed-producing son of Guy Wilkes 2:15¼, he sired Copa de Oro 1:53, John A. McKerron 2:04½, etc.

LOS ALTO 57267.

His second dam was Novelst 2:27 (dam of Novelo 2:19¼), by Norval 2:14½, one of Electioneer's most famous speed-siring sons. His third dam is Elsie (dam of five in 2:30 list), by General Benton; fourth dam Elaine 2:20 (dam of four), by Messenger Duroc; fifth dam Green Mountain Maid (dam of Electioneer and nine in 2:30 list), by Harry Clay 45.

There are very few stallions which have the right that Los Altos has of being called "bred in the purple." He is a grand-looking individual, rich brown in color, stands 16 hands high, well built, stylish, and a horse of high quality. John S. Phippen, the well-known reinsman writes: "At three years of age I broke him, he trotted a mile in 2:30, a half in 1:13, and a quarter in 36 seconds, with very little work. He has not been worked since, but he proved to my satisfaction that he had all the speed that belonged to him as a representative of the McKinney-Guy Wilkes and Electioneer blood."

Los Altos will make the season of 1912 at Phippen's place, Mayfield, at the low service fee of \$30. Broodmare owners will profit by seeing this grand-looking horse, and if they analyze his breeding they will be convinced that he is bred to make a sire of fast, game, handsome, stylish, and reliable horses. Mr. Phippen has had a lifelong experience with stallions and mares. For many years he was the first trainer under Chas. Marvin at the Palo Alto Stock Farm and since then has always maintained a public training stable. He will take the very best care of all mares sent to this horse.

In reply to a query we learn that the stallion Valentine Boodle is a full brother to Valentine, and someone asked for the pedigree of Woodene. Woodene was by Woodnut 2:16, out of Inez (dam of Elect, a sire of 2 in 2:30), by Nordale (a thoroughbred son of Norfolk and Blue Dale, by Owen Dale), granddam Lizzie, by Williamson's Belmont.

MOKO HALL 2:29¼, BY WALNUT HALL 2:08¼.

At Pleasanton, March 4, 1910, the late Frank J. Kilpatrick, of New York, sold a consignment of choicely bred stallions he had purchased in Kentucky to introduce their blood into California. His idea was to breed them to the mares known as "California bred." Sickness, which finally proved fatal, was the only cause given for their dispersal.

In the large assemblage that attended this sale were many of our horsemen, including Frank Ruhstal-

laster 2:17 and grandam of four, including Nuthoy 2:07¼, by Stockridge Chief, son of Vermont Black Hawk.

The second dam of Moko Hall is by Simmons 2:28, another famous sire who represented the George Wilkes-Mambrino Patchen cross. He sired McKaig Simmons 2:05¼, Dr. Madara 2:08, Tregantle 2:09¼, etc.; but his daughters produced a number of famous ones, for instance, Hamburg Belle 2:01¼, Brenda York 2:04¼, Bonnie Direct 2:05¼, Fereño 2:05¼, Hal C. 2:05½, etc.

The third dam of this stallion was by a son of Almont 33, whose fame as a sire will never be tarnished. Mr. Harkness, of Lexington, used her as a

AEROLITE 2:07½.

It is a recognized fact among horsemen throughout the United States that the gamest horse that ever faced a starter over all kinds of racks, wet, dry, muddy, and hadly constructed, was Searchlight 2:03¼. He was a glutton for work and delighted in going in all kinds of weather, in season and out of season, and a summary of his races proves him to be one of the most remarkable horses ever developed. An analysis of his bloodlines shows that he honestly came by all the attributes that we look for in game race horses. One of his sons left in California is Aerolite 2:07½, sire of Ruby Light (3) 2:11½, Aeroletta (2) 2:21, and Leonid, second to her in 2:21. He is out of one of our greatest speed-producing mares, Trix, by Nutwood Wilkes 2:16½, she is also the dam of Mona Wilkes 2:03¼ and three others by different sires that have beaten 2:15, and her dam was Trixy, by Director 2:17. Aerolite had achieved wonders as a two and three-year-old and was then placed in the stud for several seasons; last year he was worked for speed a little and lowered his record to 2:07½. This year, if nothing happens he will pace in 2:03. Hence he will only make a short season at Pleasanton in charge of Messrs. Sutherland & Chadbourne.

A number of prominent citizens of Santa Cruz have leased a piece of ground near Capitola and have almost completed the grading for a half-mile track. At a meeting recently held it was decided to form a driving club and the following members were elected to office: John Maher, president; J. M. Ferguson, vice-president; P. S. Pfeiffer, secretary; Frank George, treasurer. The following were elected directors: Henry Harris, D. M. Russell, Frank George, Ed Leonard, and G. Bell. The club has been named the Santa Cruz and Capitola Driving Club; it will have one of the most modern and up-to-date tracks in the country.

G. A. Westgate, of Portland, one of the most prominent men interested in the light harness horse industry in Oregon, has been in attendance at the meeting of the Pacific Coast Racing Circuit Association and also visited Pleasanton, Suisun, and other places in the interest of the big sale of horses to be held at Portland, Oregon, next month.

Bona Vincent, sister of Lord Vincent 2:08¾, foaled a bay colt February 14th by Searchlight (p) 2:03¼, which has been named St. Valentine. Fiducial 2:18¼ is heavy in foal to Searchlight, and several high-class mares from a distance have been hooked to the noted sire for this season. Searchlight will be a leading sire ten years hence.

J. W. Marshall's good mare Ramona, by Demonio 2:11¼, the dam of that wonderfully fast three-year-old pacer Del Ray, foaled a nice colt by Sirius Pointer (2) 2:18, his first and only colt, and Mr. Marshall shipped her to Pleasanton to be bred to Vernon McKinney 2:02 last Monday.

Clarence Uhl's good horse Ulattis 2:24¼ is by Bon Voyage 2:08 (not Demonio 2:11¼, as published last week), his dam is by Demonio, however, and he got this record trotting. Ulattis is in Charley Whitehead's string at Pleasanton.

Jean Val Jean (3) 2:10, driven by W. A. Clark Jr., was separately timed in 2:09½ in one of the matinee races at Los Angeles this winter.

Voyageur (3) 2:23¼, by Bon Voyage 2:08, has won both his starts in the matinee races at Los Angeles.

MOKO HALL 2:29¼ (Trial 2:11¼).

Owned by Frank Rubstaller, Sacramento, Cal.

ler, of Sacramento, who determined to buy one of those three-year-olds. He finally succeeded in getting the dark brown colt Moko Hall, and shipped him to the race track in charge of John Quinn. The colt seemed to improve in looks, size, and speed from that time until the present, and he is now considered, by all who are competent to judge, one of the hand-somest and most uniformly made five-year-olds ever led out for inspection. He is fully 16 hands high and weighs 1150 pounds, but so well proportioned is he that none would imagine he would weigh so much. There is not a weak spot or place on him.

As a trotter he is one of the best "prospects" we have on this Coast, and many a Sacramento horseman is anxious to see just how fast this level-headed, pure-line trotter can trot. At Woodland last fall he trotted a mile in 2:11¼, last quarter in 31¼ seconds, and was never urged. He trots "on his courage" and likes it. A glance at his breeding will convince anyone that he comes by right of inheritance to his beauty, disposition, soundness, frictionless gait, and speed, for he is a worthy representative of the greatest Futurity winning blend known, "the Walnut Hall and Moko cross." His sire is Walnut Hall (5) 2:08¼, winner of the Kentucky Futurity for two-year-olds, sire of The Harvester 2:01, the world's champion trotting stallion; Martha Tipton 2:09¼, Sister Frances 2:11½, O'Neill (3) 2:13¼, Sterling Hall 2:14¼, and twenty-three others in 2:30. Walnut Hall was sired by Conductor 2:14¼ (son of Electioneer 125 and Sontag Mohawk, dam of five, by Mohawk Chief), out of Maggie Yeazer (also grandam of Lady Maud C. 2:00½, Hedgewood Boy 2:01, Vito (4) 2:09½, etc.), by Red Wilkes; second dam Docia Payne (dam of Ruby 2:22½, a sire, and Milly, dam of two in 2:30), by Almont 33; third dam Maggie Gaines (dam of Almont Jr. 2:26, a sire), etc.

The dam of Moko Hall was by the most fashionable sire of trotters in the United States today, and that horse is Moko, and Moko Hall is bred in the top crosses just like The Harvester, who was also by Walnut Hall out of a mare by Moko, the sire of seventy-eight in 2:30, including such stake winners as Fereño 2:05½, Brenda York (5) 2:04¼, Native Belle (3) 2:06½, Susie N. (3) 2:09¼, Mohel 2:10¼, Silko (3) 2:11¼, Leftwich (3) 2:12, besides Silver Silk (4) 2:08½, Gomoko 2:10, Mochester 2:10¼, Charmond 2:10¼, and his sons are siring early and extreme speed also. Moko is a brother to Bumps 2:03¼ and Baron D. 2:10, and was sired by Baron Wilkes 2:18 (the leading speed siring son of George Wilkes today), out of Queen Ethel (dam of eight), by Strathmore; second dam Princess Ethel (dam of two), by Volunteer; third dam Black Bess (dam of

road mare for a number of years and claimed she was the best mare he had ever driven.

Coming as he does from such famous progenitors of early and extreme speed, can anyone deny the assertion that Moko Hall 2:29¼ will not transmit all the qualities he possesses to his progeny? He was bred to a few mares last season, but this year it is Mr. Rubstaller's intention to prepare him for the races this fall, consequently he will limit his season to June 1st at a service fee of \$75. John Quinn, of 2830 Thirty-third street, Sacramento, will stand him at the Sacramento race track, and all who desire to breed to this magnificent, grandly bred trotting stallion should book their mares as soon as possible. They stand a chance to get a horse like The Harvester, for which \$75,000 has been refused.

MRS. F. H. BURKE with her team of trotters, Valjeo Boy 2:15 and Tina 2:20¼, trial 2:15.

TWO OF OUR GREATEST STALLIONS.

The horseowners of California, and especially those who reside in the lower portion of the State, are to be congratulated upon having an opportunity to breed their mares to two of the greatest stallions that ever faced a starter, viz: the pacer Copa de Oro 1:59,

CARLOKIN 2:07½.

and the trotter Carlokín 2:07½, and both of these are in charge of that prince among horsemen, Wm. G. Durfee, Exposition Park, Los Angeles.

Copa de Oro is a type of equine very rarely seen. He is not shaped like a pacer and yet he is one of the most rapid, purest gaited pacing stallions in the world. Where he derives such perfect action from is a question difficult to solve, for his sire, Nutwood Wilkes 2:16½, his grandsire, and great grandsire, were all trotters. The dam of Nutwood Wilkes 2:16½, Lida W. 2:18¼, is the only one in his pedi-

taken East in 1908 and met the fastest pacers of the year. He won six bitterly contested races and over \$9000 in purses, reducing his record to 2:03¼; and the tables show he stood third in the list of greatest money winners that year. He was taken to Phoenix, Arizona, the following year and paced a mile in 1:59 flat, but by a little technicality he was deprived of this credit. He wears nothing but quarter boots and is one of our cleanest going pacers. He has an excellent constitution and the few colts and fillies by him show that he transmits all his qualifications with remarkable uniformity. That he will excel as a sire all must admit, for his progeny have all his quality, class and extreme speed transmitted to them. Money will not buy a Copa de Oro, so proud are their owners of them, and they should be, for he represents the acme of breeding and enjoys the enviable honor of being the fastest pacing stallion in the world. At the Phoenix meeting a challenge to prove this, for any amount of money, was not accepted. Owners of broodmares will have reason to be proud of having sent their mares to Copa de Oro.

Some years ago the late Henry Pierce, proprietor of the Santa Rosa Stock Farm, attended a sale of trotting stock held by P. S. Kellogg, of New York, with the intention of buying some mares for breeding purposes, and after paying \$10,000 for By By by Nutwood 2:18¼, it was thought by the Eastern horsemen there that he had bought the best mare offered, but, when Carlotta Wilkes, an untried filly, was led into the ring, Mr. Pierce remarked to a friend: "That's the type of a mare that suits my fancy." Bidding commenced and when it ended Carlotta Wilkes belonged to this tall, distinguished looking Californian, his bid being \$7500. Time has demonstrated his judgment was correct, for she proved to be a greater brood mare than any he owned. She is the only mare that has produced three in the 2:08 list that are not all trotters, and all of her's have been in 2:06¼ or better, viz: Inlertotta 2:04¼, Carlokín (public exhibition 2:05¼), May

Carlokín has won in purses alone over \$30,000, and though raced hard and over all kinds of tracks, very often two races a week, and on one occasion three races (all of which he won) in one week, he has never shown any soreness or stiffness, is remarkably rugged and if ever a horse was entitled to be called an iron horse, it is Carlokín.

His breeding should suit the most fastidious; sired by the greatest speed sire in the world and out of this great speed producing mare, Carlotta Wilkes, he is bred to be a sire, for she was the greatest speed producing mare McKinney was bred to during his long and successful career on the Pacific Coast.

Carlokín's colts and fillies prove that he has the power to transmit his symmetry of form, soundness of limb, intelligence, and natural speed. They are his greatest recommendation. No horse has ever sired a more uniform, better looking or more promising lot than those in training at Exposition Park, Los Angeles. Out of a possible six coming two-year-olds, five have shown better than a 2:30 gait, and two have shown a 2:10 clip; all are good looking, good headed and good gaited.

He has been liberally patronized for the past three seasons, getting his book filled each time.

Both stallions will make the season of 1912 at Exposition Park, Los Angeles, at a stud fee service of \$75 each, and there should be no hesitancy on the part of broodmare owners to patronize them if they desire to own only the very best and those they can always take pride in.

The attention of horsemen is called to the advertisement of the San Jose Driving Park. It is located in the prettiest part of the famous Santa Clara Valley where the climate is unsurpassed, and it is one of the latest and safest for horses of any ever made in California.

RED McK. 43766.

This grand looking rich mahogany bay stallion is sired by McKinney 2:11¼, whose record as a race horse and the leading sire of 2:10 trotters in America is unequalled. (A story of this great son of Alcýone 2:27 and Rosa Sprague appears elsewhere in this issue.) Red McK.'s dam was Bonnie Red (also dam of Bonnie Derby, dam of Bonaka P. 2:23¼ and Bonnie Princess 2:25¼), by Red Wilkes 1749, one of the greatest speed-producing sons of George Wilkes; 175 of his daughters are the dams of 285 in the 2:30 list. Red McK.'s second dam, Bonnie Belle, has Rebel Medium 2:15¼, Happy Promise 2:16¼, and three others in the 2:30 list, two of her sons sired seven, and one of her daughters is the dam of one. Bonnie Belle leads all other daughters of Almont as a progenitress of speed. Red McK.'s third dam was Alice Drake (dam of three trotters, two sires of four, and three dams of seven), by Norman 25. His fourth dam was Viley, by Pilot Jr. 12, the great sire of broodmares, and his next dam was called the Withers Mare.

While Red McK.'s opportunities in the stud have been very limited and he has never had many record mares sent to his court, nevertheless all show speed and are of the highest trotting type. Several of his yearlings show a 2:40 gait while being broken. His only colt worked trotted a mile in 2:18 as a trial. A yearling filly by Red McK., owned by Mr. P. H. Smith, of Los Angeles, which is called Blanka S., is said by Mr. De Ryder, her trainer, to be the fastest yearling ever driven over the Pleasanton track, and this opinion is shared by everybody there.

There is no reason why Red McK. should not equal his famous sire when bred to good mares. He is remarkably handsome, has superb finish, fine carriage, style, a splendid disposition, is very intelligent, and has all the qualifications desired in a high-class stallion. He has never had any continual training, yet he has trotted quarters in 32½ seconds. This year he will be trained and raced. He is the sire of Victor McK. (3) 2:25¼, trial 2:18¼. He will make the season of 1912 at W. R. Murphy's stables, 752 Santee street, Los Angeles, at the low price of \$30 for the season, with usual return privileges.

Owners of broodmares should not hesitate to send them to this richly bred Wilkes stallion. His rare

RED McK. 43766.

breeding, conformation, size, bone, style, frictionless gait, and faultless disposition make him one of the most desirable horses to breed to in California. Mr. Murphy, his owner, is a careful and conscientious horseman and will pay personal attention to all mares sent to his handsome horse.

COPA DE ORO 1:59.

gree that was a pacer. On his dam's side he is also very strongly bred in the stoutest of trotting lines, hence he has an inherent right to sire some of the finest and fastest trotters.

His sire, Nutwood Wilkes 2:16½, was not only a good, game and consistent racehorse, but he has proven to be one of the best sires for his opportunities of the George Wilkes family. Nutwood Wilkes never had as many opportunities as his sire, or as McKinney 2:11¼, Zombro 2:11, Electioneer, Nutwood or any other stallion which became noted for the number of representatives they have in the 2:30 list. Nutwood Wilkes founded a family also that "breeds on" and "races on," but none of his sons can compare in beauty of form, perfection of limb, intelligence and extreme speed with Copa de Oro. He is a typical show horse, beautiful rich bay in color stands 15¾ hands high and weighs 1200 pounds. That he inherits some of his beauty, gameness and quality from his dam and her family none can deny. She was called Atherine, and had a record of 2:16¼. Her sire was Patron 2:14¼, one of the stoutest bred trotters ever foaled. He was by Pancoast 2:21¾ (son of Woodford Mambrino 2:21½ and Beatrice, also dam of that famous campaigner and sire, Prodigal 2:16, and Beatrice was by Cuyler 100, out of Mary Mambrino by Mambrino Patchen.) Atherine's dam was called Athene (dam also of Aroon 2:27½), by Harold 413 (sire of Maud S. 2:08¾, etc.) and her dam was that famous broodmare Minerva, by Pilot Jr. out of Bacchante Mambrino, progenitress of speed, by Mambrino Chief 11. Every sire in Copa de Oro's pedigree for four generations is a noted sire of speed, while every broodmare, with a few exceptions, is in the great broodmare table. That is one reason why he is a wonderfully fast and game horse.

His history on the turf was a most remarkable one, and after the hard campaigning over all kinds of race tracks he has undergone, his limbs and feet are as perfect as the day he was foaled. He was

Dillon 2:06¼. Four of her other colts have standard records and two have trialed better than 2:10. Another thing to prove her greatness as a speed matron, her seven standard performers are by six sires. Her dam, Aspasia, was the second best speed producing daughter sired by Alcantara 2:23; she has four to her credit in the 2:30 list, and her dam, Miss Buchanan, was the dam of Escape 2:26½, and two of her daughters produced ten in the 2:30 list; she was by Clark Chief 89, one of the best sons of Mambrino Chief 11. Charley Wilkes 2:21½, the sire of Carlokín's dam, was also a good sire. He was by Red Wilkes, out of a great broodmare by Clifton Pilot, by Pilot Jr. 12. In a recent interview with Mr. Durfee in Los Angeles, he said: "I believe Carlokín will prove to be the greatest sire of trotters ever in California. That opinion is based upon what I have seen of his colts and what I know of him. He has more good qualities than I have ever found in any other horse and his produce show him to be a remarkably strong breeder. Carlokín has extreme speed, is a grand looking horse, (my idea exactly of a perfect type), and is undefeated in the show ring in standard and sweepstake classes.

He raced successfully for six years and obtained his record of 2:07½ at the close of the sixth season, and last year, with a very limited preparation showed his ability to trot in 2:05.

The following summary of the \$10,000 Empire stakes trotted over a muddy track, gives one an idea of his caliber as a race horse:

| | |
|--|--------|
| Buffalo, N. Y., Aug. 14, 1908.—Trotting, 2:11 class; Empire Stake, \$10,000: | |

TWO FAMOUS STALLIONS.

There was a time years ago when one owner had several stallions standing for public service at one time, but lately it is rarely we find such an ownership. Capt. C. P. McCan, of Hood River, Oregon, however, enjoys this distinction, and now that he has placed them in the care of that clever horseman, Chas. De Ryder, at the Pleasanton race track, it will not be long before we see mares sent to them from all parts of the Pacific Coast. Horses that attract such patronage must be famous and they are, for it would be difficult to find one more celebrated than The Bondsman, or one that is more rapidly forging to the front as a sire than the coal black horse, The Patchen Boy (3) 2:10 $\frac{3}{4}$.

Although The Bondsman carries no record, this does not mean that he had no speed, for the Kentucky Futurity of 1899 is still fresh in the minds of racegoers, the six-heat battle won by Boralma 2:07, in which The Bondsman won third money, showing him to be one of the best colt trotters of the year. Had he stood training, later he would undoubtedly have taken a record better than 2:10.

In the stud The Bondsman never had the advantages which favored many sires, as his former owner, J. H. Thayer, did not have a stock farm, and all his life the great horse has been a public stallion. Grace Bond being the only one of his four 2:10 performers bred by his owner. His breeding alone is a sufficient license for his greatness, as he is a son of Baron Wilkes 2:18, founder of the futurity winning family, out of the great brood mare Sorrento (dam of Jayhawker 2:14 $\frac{3}{4}$; Sorrento Todd 2:14 $\frac{3}{4}$; Belle Sentinel 2:15 $\frac{1}{4}$; Eola 2:19 $\frac{1}{4}$; Lazy Bird 2:26 $\frac{3}{4}$; Teddy Sentinel 2:29 $\frac{3}{4}$, and The Tramp, sire of Trampfast (2) sire of three two-year-olds that entered the list in 1911), by Grand Sentinel (sire of the dams of Peter the Great 2:07 $\frac{1}{4}$; J. Malcolm Forbes 2:09 $\frac{1}{2}$, etc.), and the next dam, Empress, is the dam of Edenia 2:13 $\frac{1}{2}$, Sutherland 2:24 $\frac{3}{4}$, and the dams of eight in 2:30, by Ahdallah Mamhrino 3715, he by Almont 33, out of Lyd (dam of Lady Majolica 2:25) by Brown Chief 4445, grandam Fanny (grandam of Director 2:17, Onward 2:25 $\frac{1}{2}$, etc.) The third dam of The Bondsman was Big Ellen, by Clark Chief 89; fourth dam Virgie, by Ahdallah 15; fifth dam Lucy, by Veech's Highlander.

With such remarkably strong breeding The Bondsman has proven that in him is concentrated all the rich qualifications of a sire, and he has demonstrated that he can transmit the same to his progeny. If he had never sired a gamer trotter than Colorado E. 2:04 $\frac{3}{4}$, that on three occasions in his three-year-old form, broke the world's record for his age, he would be heralded as a wonderful sire, but he has other performers that demonstrated they had speed and gameness even if Colorado E. got his record in a final heat of the Kentucky stake; The Plunger took his of 2:07 $\frac{1}{2}$ in the third heat; Creighton took his of 2:09 $\frac{1}{4}$ in the third heat, and Grace Bond trotted the fifth heat of her winning race in 2:09 $\frac{3}{4}$. So, if it is pure gait, stamina and courage that is sought for in our race horses The Bondsman has proven he is a sire of horses that have these qualifications. The Bondsman was only eight year old when Grace Bond got her record of 2:09 $\frac{1}{4}$.

These are not the only ones sired by this horse. He has 35 to his credit and last year the following by him lowered their records to the time set opposite their names: The Clansman 2:12 $\frac{1}{2}$, Doctor Ullman 2:14 $\frac{3}{4}$, Panama Bond 2:16 $\frac{1}{2}$, The Slave 2:17, while Creighton lowered his record from 2:09 $\frac{1}{4}$ to 2:08 $\frac{1}{2}$. His son, The Clansman, had three enter the list in 1911. The Bondsman was bred to 69 grandly-bred mares in Pleasanton last season and that was the highest season he ever made. From latest advices all but seven have proven with foal.

His companion stallion, The Patchen Boy (3) 2:10 $\frac{3}{4}$, is of an entirely different type. He was raced early and often and a gamer pacer never faced a starter. He is a Wilkes Boy, and that, in itself, is a great recommendation, for the descendants of that strongly-bred Geo. Wilkes stallion are noted for their excellent feet and legs, strong constitutions and race horse qualities. Wilkes Boy also sired Courier Journal 2:06, Judge Swing 2:08 $\frac{1}{4}$, York Boy 2:08 $\frac{3}{4}$, Ormonde 2:08 $\frac{3}{4}$, and has sons "breeding on." Such sires as Grattan, Oratorio, Constantine and The Patchen Boy are keeping his name well to the front through the performance of their progeny.

Lady Clay, the dam of The Patchen Boy, is also the dam of Anglin Wilkes 2:16 $\frac{1}{4}$, trial 2:09 $\frac{1}{4}$, C. W. M. 2:24 $\frac{1}{4}$, and Chirper, dam of King Burdo 2:22 $\frac{1}{2}$. She was sired by Metropolitan 1372, one of the best bred sons of Hambletonian 10, his dam being Hyacinth (dam of Mecca 2:19 $\frac{1}{4}$, a sire), by Volunteer 55; grandam Clara (dam of Dexter 2:17 $\frac{1}{4}$, Alma 2:28 $\frac{3}{4}$, Astoria 2:29 $\frac{1}{4}$, Dictator, the great sire, etc.) by American Star 14.

The second dam of this good sire is Haggie Brown by Ashland Clay (sire of the dams of Dan S. 2:04 $\frac{1}{2}$, Martha Marshall 2:06 $\frac{1}{4}$, Gordon Prince Jr. 2:07 $\frac{1}{4}$, etc.), and he was by Curtis' Clay, he by American Clay 34 (son of C. M. Clay Jr., out of a mare by Imported Tranby) dam by Bay Messenger, The Patchen Boy's third dam was Pitapat, a thoroughbred.

The Patchen Boy sired Francis J. 2:08, a winner up north last season, and a number of others whose names appear in his advertisement in our business columns. He is bred to be a progenitor of early and extreme speed. Such a combination of rich bloodlines is seldom found in a sire and that is the reason he was a good consistent race horse, and is siring a family that is also noted for its race horse abilities. They have size, bone, conforma-

tion, disposition, soundness, color and extreme speed, are naturally very tractable, and, as he sires many trotters, he is just the horse to heget large handsome colts and fillies that will pay for themselves anywhere. Every horse by him that has been trained has earned a record.

Mr. De Ryder is one of the most conscientious of horsemen. He will take the very best care of all mares sent to these horses and will see that they are properly fed and looked after. He has had a life-time experience in handling stallions and mares, and owners can rest assured that all will be done that is possible to get their mares in foal. Several leading breeders are anxious to have him take these stallions to Oregon in July, so broodmare owners should not wait too long, but hook their mares now.

Old Point Breeze race track in Philadelphia is going to be transformed into a new amusement park, rivaling, in tinsel splendor and thrills, Luna Park and Dreamland, the two Coney Island inclosures recently swept away by flames. It is expected that the new park will be ready to amuse Philadelphia's thrill-hungry thousands by the coming summer. As soon as the charter is granted the work of remodeling and building will begin. All the tumble-down sheds and the grandstand will be demolished, and in their stead will rise lofty structures of wood, plaster and electric lights, imitation mountains and mines, palaces of gaudily-painted sheet iron, colorful carousels, death-defying contraptions to charm the nickels and dimes from the public's pockets, restaurants, cafes, hot-lunch stalls, and all the other accessories of a summer pleasure ground.

MANAGEMENT OF STALLIONS.

H. L. Flaus, in the Chicago Horseman, has the following timely article:

The proper care and management of stallions during the breeding season is quite a feature when the welfare of both the stallion and broodmare owners is taken into consideration. Improper management will not only have a tendency to promote vice in the stallion, but it will soon make him a worthless piece of property.

From colthood he should be taught obedience to every command, and positively no fondling or caressing should enter his daily attentions. Nipping, pawing, rearing, and kicking with one foot may seem rather amusing to the caretaker during his colthood, but if he is not chastised for the little things which are generally considered antics, he will gradually become vicious and unruly, and a constant source of stallions refuse to have them properly corrected for their misdemeanors, owing to the fact that "they cost him lots of money and he didn't want them to be abused." Such owners are a menace to the welfare of the stallion and himself. I do not advocate abusing him, nor whipping him to extremities, but he should be taught to mind when spoken to, and that his caretaker is his boss. In giving him his first lessons in serving mares it is necessary to impress upon him that patience and obedience is required of him before he is allowed to serve the mare. Also, he must be taught to go to the mare slowly and go to her side before mounting. In this way a mare that is ready to be served will rarely kick the horse, as she would if he were allowed to run from a distance

FIESTA MAID

By Zomhro 2:11, dam Fiesta, by Boh Mason. Owned by J. W. Considine, driven by Walter Mahen.

WELCOME WILKES.

Owners of mares in the vicinity of Concord, Antioch, Martinez or the Brentwood Farm, will have an opportunity this year of breeding them to Welcome Wilkes, a magnificent coal black stallion, standing 17 hands high and weighing 1350 pounds. He is a very handsome horse in every respect, of symmetrical conformation, fine style and carriage and sound in every particular. His progeny is noted for inheriting all these qualities. They have plenty of stamina and are remarkably intelligent. Welcome Wilkes is an inbred Wilkes stallion. His sire, Welcome 2:10 $\frac{3}{4}$, was by Arthur Wilkes 2:28 $\frac{1}{2}$, he by Guy Wilkes 2:15 $\frac{1}{4}$, a son of Geo. Wilkes 2:22. Hera 2:20 $\frac{1}{2}$, the dam of this stallion was a fine, large bloodlike mare; she was by Mamhrino Wilkes 6013, son of Geo. Wilkes 2:22, and Lady Chrisman by Todhunter's Mamhrino; second dam by Pilot Jr. 12, the great broodmare sire. The second dam of Welcome Wilkes was called Kitty and she was by Conductor (sire of Skipaway 2:29 $\frac{3}{4}$) son of General Knox and Fanny Patchen by Trenton, son of Geo M. Patchen 2:23. The third dam was Kate by Hard Road. Welcome Wilkes sires the most useful kind of horses which are fit for the track or road; they have the best of feet and legs, are high headed and very tractable. There are many of his colts and fillies to be seen in and around these towns and places and they are living recommendations as to his worth as a useful sire. His terms of service are \$20. C. R. Dindeler, of Concord, Cal., is his owner.

R. W. Brown, a prominent young horseman of Salt Lake City, has been stopping at Pleasanton for the past two weeks, and almost daily could be seen in the sulky jogging some of the youngsters there. Mr. Brown was quite successful as a driver over the half-mile rings last season.

on his hind legs and mount. Before serving the mare she should be examined for disease, or perineal laceration. Both are detrimental to the stallion owner, and his stallion should not be allowed to serve either.

I have found that for mares that are "hard to catch" it is sometimes advisable to dilute the mouth of the womb with fingers, and the womb thoroughly douched with a sodium bicarbonate solution. The use of the soda will counteract the acid reaction in the womb. Acid in the womb will cause a destruction of the semen in a short time.

Some owners of mares have a dread for the hobbles, but I deem it advisable to put them on all mares, as some of them will sometimes kick the horse when he is leaving her, and when least suspected. A slight kick will sometimes retire a horse from his races, and if kicked in the genitals or other vital parts it might cause his death.

He should not be allowed to serve over two mares each day. Care should be taken that the horse does not "waste" between services, as it will decrease his foal-getting properties and will weaken him. Sexual stimulants are not necessary if proper care and moderate service is allowed him. In serving a mare a horse should be allowed to remain as long as he desires to do so, as the mare rarely discharges before the stallion.

Good feed and treatment, with the proper management, will make the stallion a profitable investment.

The old horse does not always receive the proper attention in regard to feed. The condition of the teeth of old animals makes it imperative that this point be not neglected. The old horse cannot masticate some kinds of food, especially corn, thoroughly, nor can he eat his rations in as short a time as can a young animal whose teeth are sound. So, unless some ground grain is provided for him and he is given sufficient time to eat his food, he will rapidly run down.

Story of A. W. Richmond 1687

By Wm. G. Layng.

In these days when "fashionable" or "futurity winning" pedigrees and those which trace innumerable times to Hambletonian 10, American Star 14, Pilot Jr. 12, and Mambrino Patchen 53 are so much in demand, we are reminded of the fact that there must have been some strains of blood flowing from outside sources that blended well with that which came from Ahdallah 1 or Mambrino Chief 11. Students of bloodlines love to trace the pedigrees of all champions to their source, and, during the past four years, their researches have led them to one stallion which was never known as a campaigner, hence was kept in comparative obscurity for many years, and that was the stallion A. W. Richmond. This horse was bred by Azariah Prussia, of Jackson county, Ohio, and sold to the late Joseph Cairn Simpson, one of the best judges of equine form and ablest writers on turf subjects that ever lived. Mr. Simpson had sold this stallion to Milton S. Patrick, of San Diego a few days before he left Chicago for California, so he brought him,—the only trotting stallion in the consignment,—with his thoroughbreds, Hock Hocking, Three Cheers, Craigeburn, Double Cross, and that wonderful mare Marian, which was afterwards known as the greatest producer of high-priced stake-winning thoroughbreds in America. She became noted as the dam of Emperor of Norfolk, Empress of Norfolk, Yo El Rey, El Rio Rey, Duke of Norfolk, Prince of Norfolk, King of Norfolk, Queen of Norfolk, Czar of Norfolk, Yo Tambien, and Rey del Sierras. He also had a peculiarly spotted red roan mare called Nourmahal, a full sister to the handsome, perfectly-proportioned stallion A. W. Richmond. After the latter had arrived at San Diego Mr. Patrick sold him to Hancock Johnson, a son of General Sidney Johnson. Mr. Johnson was quite a breeder of horses at the time of this purchase, having Crichton by Imported Glencoe and Argyle and a small but select collection of mares. A. W. Richmond's record as a sire will be noted hereafter, but, before referring to it as one of the most remarkable in trotting horse history, it will be interesting to allude to his breeding and history.

A. W. Richmond was foaled in 1862, and was sired by Blackbird 401 (more commonly known as Simpson's Blackbird), out of an old white mare bred by Thos. W. Pope, who, at the time of her birth, lived near Cleveland, Ohio, thence he brought her to Iowa in the forties. Mr. Pope was a Methodist minister and shared in the general tendency of that profession in admiring a good horse and own one of the very best, if it were possible to accomplish that end. He was an excellent judge of "form" and reasonably well posted in pedigrees. The sire of that mare he said was a thoroughbred called Rattler, brought from Tennessee, and her dam was by a horse called Spotted Ranger, an Arabian. This was unquestionably one of the breed of horses called Opelousas horses in the South, though in Ohio, New York, and Northern Pennsylvania, Arabian was the title.

The old mare had a dark skin, so that when wetted there was a tinge of blue, and before A. W. Richmond was foaled she had two sons, also white, but with numerous black spots from the size of a dime to a dollar dotting their coats, and, being very handsome and hoodlike horses otherwise, they were sought for a large sum by a circus proprietor and, no doubt, were called pure-blooded "Arabians of the Desert."

Nourmahal was a most peculiarly marked mare, having many spotted shadings in her coat, but her mane was very light and she had a "rat" tail. In conformation, she more closely resembled a thoroughbred than did her brother, A. W. Richmond. Mr. Simpson had an oil painting of her in his library in Oakland and never tired telling visitors of her speed and gameness.

The sire Blackbird was almost a thoroughbred in breeding, but, as a trotter, he was remarkably pure gaited and had plenty of action, a trait not often met with in the descendants of the "Children of the Winds." While Mr. Simpson owned him this horse proved to be one of the gamest of his day. He won a five-mile race in 14:33 hitched to a heavy sulky. This was in Davenport, Iowa, November 6, 1860, just ten months after he had won a ten-mile match race in St. Louis, and captured the stake, \$2,000. He was sired by Camden, a thoroughbred son of Shark, he by American Eclipse, out of Lady Lightfoot (dam of the famous race mare Black Maria), by Sir Archy; second dam by Imported Shark. Camden was out of Imported Invalid (dam of Lady Mostyn, the third dam of Venture 2:27½, sire of the dam of Directum (4) 2:05¼, etc.); second dam Helen by Hambletonian; third dam Susan by Overton; fourth dam Drowsy by Drone; fifth dam Old England; sixth dam by Cullen Arahian, the sire of Duchess, whence Salvatore, Luke Blackburn, Levity, Tenny, Sensation, Tammany, and The Bard, all famous thoroughbreds, descended.

Blackbird's dam was by Post Boy, he by Henry, out of Garland by Duroc; second dam Young Damsel by Hambletonian; third dam Miller's Damsel (dam of American Eclipse), by Imported Messenger. Blackbird's grandam was by Cone's Bacchus, a son of Bacchus, a famous thoroughbred sire.

Blackbird sired, besides A. W. Richmond, the stallion Reavis' Blackbird 2:22, which turned perfectly white before he died at the age of 30 years on a farm near Chico, in this State. He also sired the dam of

Little Fred 2:20. Reavis' Blackbird met and defeated a number of trotters in Iowa and Illinois before being sent to California. After his arrival he was driven by Jim Eoff at the State Fair, Sacramento, in 1870, where he defeated Alexander, Venture 2:27¼, and F. F. Low. The following year he defeated Ajax, Hiram Woodruff, and Copperhead. Three years after he distanced Ella Lewis, Mary Davis, and George Treat in two heats, time 2:28 and 2:32½; Dan Denison was his driver in this race. When placed in the stud he sired that remarkably game and handsome trotting mare Vic H. 2:12, a sensational money-winner. He also sired Mamie Griffin 2:12, and Ned Forrest 2:25¼. One of his sons, Berlin, sired five in 2:30, one sire of one, and the dams of four, the fastest of these being the pure-gaited, consistent trotter Allison 2:11¼. One of Reavis' Blackbird's daughters is the grandam of Alex. Brown's stallion Nushagak, sire of Aristo 2:08½ and Nada 2:09¼. All of Nushagak's progeny are noted for the excellence of their limbs, stamina, and pure trotting action.

Simpson's Blackbird's daughter Nourmahal was a very determined, headstrong mare, with a mean disposition. She was never known to tire and Mr. Simpson offered to match her for five miles against the best horses then before the public, the sum to be raced for being \$2,000 a side. She had defeated Lady Mac in Chicago a five-mile race in 13:39. After being brought to California she was bred to Steinway 2:25½ and produced Cassidy 2:30. She was then sent to the San Mateo Stock Farm and was bred to a big seventeen-hand son of Almont 33 and Jessie Pepper, called Le Grand, a horse Mr. Corhitt purchased in Kentucky when he went East to buy Guy Wilkes 2:15¼. Nourmahal dropped a colt that created a sensation as a three-year-old by trotting a mile to a high-wheeled sulky in 2:23½. He was called Grandee, and at Petaluma he defeated Direct that year in straight heats in 2:26 and 2:23½. John A. Goldsmith, it was claimed, won over \$8,000 on him in this race. In the Stanford stake, value \$1,325, at Sacramento, he met Direct, Balkan, and Moses S., and defeated them in straight heats in 2:30, 2:28½, and 2:29. At the San Jose fair he had a walkover; no other three-year-old appearing against him. His proud trainer and driver then offered to wager \$5,000 he could drive him a mile in 2:18, but got no takers. Another colt she had (a full brother to Grandee) was called Grandissimo; he also got a mark of 2:23½, and after the late Fred Loehner, of Vineland, Napa county, bought him, he bred him to a few mares, the resultant foals being Myrtle Thorne 2:18, Altissimo 2:25¼, and Topsy 2:26½.

Mr. Simpson, when asked about the speed of A. W. Richmond, once said: "Prussia, his owner, hroke him as a three-year-old and used him in light work on the farm from then until the fall after he was four years old. He was then sent to Maquoketa, placed in the hands of a trainer, and started all the onlookers by trotting twice around the half-mile track in three minutes, the first time he was ever hitched lighter than in an old wagon weighing at least four hundred pounds. The track was made in the shape of a letter D, and, as A. W. Richmond was a long-striding, hold-going horse and horse hoots were unknown, in making one of the sharp turns he struck his foreleg and never really recovered from the blow. Although I must say I have ridden pretty fast behind trotters in my day, but I do not remember ever having ridden quite so fast over ice as I have behind this gray stallion hitched to a skeleton wagon."

There was another peculiar handicap which fate had in store for this stallion A. W. Richmond. When placed in the stud in his California home, he was never bred to a mare that was a descendant of Hambletonian 10, American Star, or Mambrino Patchen, as the record shows. From Crichton's First, by Crichton (a son of Imported Glencoe), he got Arrow (p) 2:13¼ and Elwood (p) 2:17¼; from Gretchen, by Mambrino Pilot, he got that good game trotter Romero 2:19½; from Belle, by Ben Wade (a thoroughbred son of Woodburn), he got Dick Richmond 2:20; from Nelly, by Grant, he got Leon 2:22¼; from Ventura Belle, by Ventura, he got Richelieu 2:29½; from two unnamed daughters of Overland, he got What Ho 2:25¼ and Larco 2:28, and from mares of unknown breeding, he got Orlanda Richmond (p) 2:15, Richmond Jr. 2:15, Jack 2:26 and Rosewald 2:29¼. One of his sons, Len Rose that sired Rita 2:15½ and was shipped to Australia, was out of Barbara by Stevens' Bald Chief, and the other, Idler, sire of Barhero 2:29½, was from an untraced dam.

A. W. Richmond's daughter, Queen, when bred to Anteeo 2:16½ (whose dam, Columbine, was the greatest daughter of A. W. Richmond's), produced Anteeo Richmond 2:24½. Ben Corhitt 2:21 was out of a mare by A. W. Richmond; second dam by Ben Wade (thoroughbred). The dam of Clara (3) 2:26½ was by A. W. Richmond, dam untraced. The dam of Alrich 2:12¼, Donovan 2:27, and Dick Richmond 2:20 was Aloha, by A. W. Richmond, out of Barbara, by Stevens' Bald Chief. Directress 2:19, King Buzz 2:23¼, and Miss Monroe 2:27 were out of Aloha by A. W. Richmond; grandam Guadaloupe by Crichton, by Imported Glencoe. This horse Crichton was out of a mare by the great four-mile race winner Wagner, by Sir Charles, son of Sir Archy; second dam by Smapter, by Sir Archy, son of Imp. Diomed; third dam by Tiger, by Blackburn's Whip; fourth dam by Duke of Bedford. Crichton sired the dams of Arrow 2:13¼, Elwood 2:17¼, and the grandams of Italia 2:04¼, El Diahlo 2:11¼, Pacific King 2:17¼, Katharine 2:19, Casco 2:22¼, and El Trebizond 2:26¼, these last five named being out of Elwood 2:17¼. Rory O'More 2:19¾ was out of an A. W. Richmond mare, second dam untraced. Elegance 2:30 was out of another Richmond mare, but her dam was said to be by Geo. M. Patchen Jr. 2:27.

Waldo J. 2:08 was from an A. W. Richmond mare, grandam by Gen. Taylor. Rex Gifford 2:14¼ and Thayermont 2:24½, also out of an A. W. Richmond mare, had for a grandam Pauline by Skenandoah 926. Coal Dust 2:22¼ was out of Bonestel by A. W. Richmond, dam untraced. Blaza 2:20¼ was bred like Coal Dust 2:22¼. New Richmond 2:07¼ was out of one of A. W. Richmond's daughters and had for a grandam Crichton's First (dam of Arrow 2:13¼), by Crichton. Rozelle 2:14, a good game trotter out of Hinda, by A. W. Richmond, had Venus by Cooper's Black Hawk, for a grandam. Italia 2:04¼ was the fastest of the tribe, she was out of an A. W. Richmond mare; second dam by Crichton. Idyllwild 2:17¼ traced to this taproot also. General Boodle 2:16¼ was out of Carrie by A. W. Richmond, grandam by Ben Wade, by Woodburn (thoroughbred). Idolvay 2:27½ and Radium (p) 2:11¼ were also out of this mare Carrie. Silver Dick 2:09¼ was out of Miss Taylor (dam of Waldo J. 2:08), by A. W. Richmond; second dam by General Taylor, by The Morse Horse. Zomell 2:14¼ was out of a mare by A. W. Richmond; second dam by Shelby Chief. Anteeo 2:16½, Antevolo 2:19½, Coral 2:25, J. C. Simpson 2:18¼, Conrad, and Anteros, great sires and producers of speed were out of Columbine, by A. W. Richmond; second dam the thoroughbred Columbia (sister to Surprise, who sired the dam of Phoebe Wilkes 2:08½ and Pheon W. 2:08¼), by Imported Bonnie Scotland.

In studying this list, is it not a remarkable one? From sons and daughters of mares of thoroughbreds or of unknown breeding A. W. Richmond founded a family that will always be considered one of the very best in the world! This fact is most strongly emphasized when we consider the number of 2:10 performers which trace to the few mares enumerated above. These performers are not ordinary, they come under the caption of "extraordinary," for, on top of this A. W. Richmond cross, the Hambletonian blood assimilated most kindly, and to give all those in the 2:30 list, which are bred that way, would take up more space than can be allotted in an article of this kind. Suffice it to know, however, that the year 1911 closed with a remarkable record so far as the performances of some of our greatest colts and fillies show which trace to A. W. Richmond.

Frank Perry 2:15, the world's champion yearling trotter; Princess Todd (2) 2:12½, the best two-year-old out that year. Cochato (3) 2:11¼, a Futurity winner, has 16 two and three-year-olds in the list. Miss De Forest 2:05¼ is the champion three-year-old pacing filly. Todd 2:14¼, that died at nine years of age, had nine in the list, and, age considered, he excels all other sires in this respect. Willy 2:05, the wonderfully game trotter that defeated all comers in Europe, and made a remarkable showing here last season, traces through Faustissima to Dell Foster, by A. W. Richmond, and Faustissima is full sister to Fausta, that had a yearling pacing record of 2:22¾. Faustissima's grandson, Aufwieglerin 2:17½, is one of the greatest colt trotters in Austria. This mare Dell Foster was out of a mare said to be by Geo. M. Patchen Jr. 2:27, and consequently is bred like the rest of A. W. Richmond's daughters. Bob Douglas 2:04½ was another sensational horse. So one could go on enumerating many that have achieved wonderful reputations whose names are in the 2:10 list below, while columns could be filled with accounts of great races won by the scores of descendants of Anteeo, Antevolo, Anteros, and the great producing daughters of A. W. Richmond, most of whose dam's pedigrees were "lost in obscurity," but the name of the white horse, so often extolled by Joseph Cairn Simpson, the dean of turf writers, will live as long as trotters are bred and raced.

Following is a list of 2:10 performers that trace to A. W. Richmond. It will be observed that many of these have been noted as our very largest stake and money-winners in America during the past four years. There never was any question about their gameness, and the inheritance they derived from the strong A. W. Richmond mares above enumerated—although limited in numbers—makes them doubly valuable. Their careers as sires and broodmares will be watched with interest by all who have a liking for the blood of A. W. Richmond and Blackbird, his sire, and this includes every horseman who has handled any on the Pacific Coast:

A movement is on foot, started in Canada, to organize a new trotting association in that country independent of both the American and the National of this country. In the past racing in the north has been conducted under the same legislation as in the States. The new idea was born with the Toronto Driving Club, and is said to have the enthusiastic support of horsemen and racing associations generally throughout that country.

Drink Jackson's Napa Soda.

Why McKinney Is a Great Sire

(By Wm. G. Layng.)

In compiling the tables of fast performers for the year 1911 it is ascertained that the McKinney family compares very favorably with all others, and that the number of phenomenally fast ones for their ages belonging to it, makes a splendid showing and places McKinney as a progenitor of early and extreme speed in the class so long dominated by Electioneer. There are many reasons why this horse should be a perfect racehorse and a great sire, and when one comes to analyze his bloodlines it is apparent whence this great gift of pure trotting instinct and power to transmit speed to his descendants comes. His sire, Alcione 2:27 was by Geo. Wilkes 2:22 the best speed-siring son that Hambletonian 10 had, and Alcione's dam, Alma Mater, was the greatest speed-producing daughter of Mambrino Patchen. Alcione's stud career was very brief compared with that of Alcantara, his full brother, nevertheless, all horsemen concede he was a far greater sire than the latter. Their dam, Alma Mater, was one of our greatest broodmares, being the dam of eight, seven sires of 2:22 trotters, and 73 pacers, and two dams of three in the 2:30 list.

McKinney, strange to relate, only traced twice to Hambletonian 10, once through Geo. Wilkes 2:22, his grandsire, and once through Belle Brandon, the dam of Rosa Sprague, his dam. And this mare Belle Brandon, being the dam of three in the 2:30 list, was the greatest speed-producing daughter (with one exception) that Hambletonian 10 sired, and that exception was Reina Victoria (dam of four), but she was inbred to the Hero of Chester, her dam being by Volunteer 55 one of Hambletonian's famous speed-siring sons. Outside of these two descendants of Hambletonian, McKinney traced to some of the very best thoroughbred sires: Imported Australian, Imported Margrave, American Eclipse (three times) with many strains to Imported Messenger and other sires which were considered very fashionable forty years or more ago. Their blood, blended with other strains produced in McKinney, the greatest sire of 2:10 performers in the world! His dam, Rosa Sprague 2:20½, is also the dam of Hetty Case (dam of Ferenno 2:05½) and Edna Sprague (dam of Mary Sprague 2:20½ by Gov. Sprague, is also the dam of Hetty Case (dam of Ferenno 2:05½) and Edna Sprague (dam of Mary Sprague 2:20½). But let us go back about four score years to his maternal foundation line and see whence he derived his speed-producing powers.

Back in the early '30s a Frenchman at Rouse's Point, New York, near the Canadian boundary line, bred a fast pacing mare of unknown breeding to a thoroughbred horse called Sir Walter, by Whip, out of Nettledrop by Imported Diomed; the produce was the horse North American (also called the Bullock Horse). A daughter of his produced the sire Strathmore 408, one of Hambletonian's greatest sons, whose name appears in the pedigrees of more extremely fast performers, noted for their early and extreme speed, than that of any other sire. One of North American's daughters was the dam of Vergennes Black Hawk (a sire), and another the Stone Mare, is the dam of two, while two of her daughters are the dams of Robert Lee 2:23½ and Sterling Boy 2:10½. One of North American's sons, called Whitehall, is known to fame as the sire of Rhode Island 2:23½. There seems to be a difference of opinion regarding the breeding of the dam of this stallion Rhode Island. Wallace claimed she was a black mare by a black horse called Davy Crockett that was brought from Pennsylvania, and her dam that was a horse called Bald Hornet. S. W. Parlin, however, has given this breeding as by Nigger Baby; second dam, bred in New Jersey, breeding unknown. This latter version is conceded to be the correct one. Nigger Baby was by Tiger Whip, out of a mare by Paragon; second dam an Arabian. Whitehall had three sons that sired 2:30 trotters, viz: Adams' American, sire of Nellie Holcomb 2:28; Buck, sire of Brown Joe 2:29½, and Rhode Island 2:23½, sire of Gov. Sprague 2:20½ and two others in 2:30. Rhode Island was quite a remarkably pure gaited racehorse and on the old Fashion course, New York, in October, 1868, earned his record of 2:23½. He then passed into the hands of Messrs. Sprague & Akers, who had a stock farm in Lawrence, Kansas, where he died in 1875. One of his sons, called Kansas Central, sired the well-known pacer Haverley 2:25, that was raced in California many years ago.

About the time Gov. Amasa Sprague bought this horse, Rhode Island 2:23½, he had among his broodmares the dark bay mare Belle Brandon, by Hambletonian 10, out of a daughter of Young Bacchus, grandam the Warden Mare, by Exton Eclipse. Belle Brandon was bred by Howard Leonard, of Orange County, New York, and was an individual of the highest excellence, a pure-gaited trotter, and it was claimed she trotted to pole with Sprague's Hambletonian in 2:29½. She was bred in 1871 to Rhode Island and the produce was Governor Sprague 2:20½, one of the purest gaited and gamest trotters that was ever foaled. He defeated in his turf career such trotters as Lucy, American Girl, and George Wilkes. Belle Brandon is also the dam of Amy 2:20¼ and Wilmar 2:29¼, Wildair (sire of two, and one sire of six in 2:30 list), and the dam of Clay King 2:27¼, sire of twenty-four, and five dams of

seven in 2:30 list, one of them being the mare Moy 2:07¼, which the late Frank J. Kilpatrick drove at the Stadium in Golden Gate Park in 1910 and took her east to the Patchen Wilkes Farm. Volo Maid 2:13¼ is also out of Amy 2:20¼.

Governor Sprague 2:20½ as a sire, was fairly successful for the opportunities he had, for he died at eleven years of age. He sired thirty-six trotters and two pacers. Twenty-five of his sons sired forty-six, and forty-one of his daughters produced sixty-three in the 2:30 list. Hence we can see where the good line in Rosa Sprague springs from on the paternal side, but her dam, Rose Kinney, was also a noted producer, although there was not a line in her pedigree tracing to Hambletonian 10, Black Hawk, American Star, Mambrino Patchen, Pilot Jr., Morgan, or any of the other sires so fashionable in those days. She was the dam of Messenger Chief 1825 (and was also a full sister to the sire Gen. Geo. H. Thomas 530), and her sire was Mambrino Messenger, or, as he was better known "The Dunkin Horse." He was a beautiful bay in color and was foaled in 1841; his sire was Mambrino Paymaster, dam Lady Messenger by Coffin's Messenger; grandam by Old Childers, son of Kouli Khan. He was bred by Jacob Dunkin, Duchess County, New York, and after passing through several owners' hands, finally died in Boyle County, Kentucky, in 1863. Mambrino Paymaster, his sire, was also the sire of Mambrino Chief 11, and he was by Mambrino (sire of Abdallah 1). Coffin's Messenger was by Imported Messenger, out of a daughter of Imported Light Infantry (son of the renowned English Eclipse and a mare by Feather). Old Childers was by Kouli Khan (sire of Bajazette) out of Imported Harlot by Phenomenon; second dam by Snap. This horse, Light Infantry, had quite a reputation as a sire of game racehorses in England.

Messenger Chief, whose dam was this mare Rose Kinney, sired sixteen in 2:30 list, one of them was Manning 2:18¼, a gelding those well known horse-

SWEET MARIE 2:02
McKinney's fastest trotter.

men the late By Holly and Thos. Keating won a number of races within California. Seven of Messenger Chief's sons sired fifteen, and twenty-six of his daughters produced thirty-seven in the 2:30 list. Rose Kinney's brother, Gen. Geo. H. Thomas was also quite a sire, some of his descendants are in the 2:10 list. Billy Andrews 2:06½ and Captor 2:09¼ being out of two of his daughters. He sired seven trotters one sire of five and eight dams of fourteen.

It was no disgrace to trace to this horse Mambrino Messenger, for his name is to be found in the pedigrees of Queen Walnut 2:07¼; the sire Grand Moor, whose daughters produced Joe Wheeler 2:07½, Arthur W. 2:11½, John A. 2:12¾, Humboldt Maid 2:13½, Lady Waldstein 2:15, Sidmore 2:17¾ (sire of Rosie O'Moore 2:12, Enoch 2:12½, General 2:14½, Little Miss 2:17¾, etc.). Mambrino Messenger also sired the dam of Ulster Chief, to whom Clipper 2:06, Maud Newman 2:17½, and Miles Beauty traced. He also sired Lulu Powell, dam of Joe Elmo, a noted sire.

The third dam of McKinney 2:11¼ was called the J. S. Kinney mare (dam of Gen. Geo. H. Thomas, etc.) by Mambrino Chief 11, out of the Jesse Bryan mare, by Imported Napoleon (thoroughbred), out of a mare by the thoroughbred horse Tempest, by Tormentor, out of Lottery by Imported Expedition, another foundation sire that appears in the pedigrees of many famous racehorses as well as trotters and pacers, such as Williamson's Belmont, Long's American Boy, etc. The reason this pedigree of McKinney is carried so far back on the dam's side is to show that he had an inheritance of which he was worthy, and which, to many students, is as a sealed book. His breeding on his paternal side: Alcione, Geo. Wilkes, Hambletonian 10, Mambrino Patchen, Mambrino Chief, and thoroughbred, etc., is conceded to be the "acme of breeding," but does it surpass that of Rosa Sprague's to any remarkable degree? The combination of both, however, has given us the greatest sire of his day—a sire that is a credit to his ancestry—McKinney 2:11¼.

He was foaled the property of W. H. Wilson, of Cynthia, Kentucky, in 1887, and was purchased in 1889 and brought to California with another stallion called Durfee, whose blood flows in the veins of Jim Logan (4) 2:05¼, Sir Albert S. 2:03¾, and several others. There has been a peculiar story regard-

ing the purchase of McKinney that has gained credence everywhere. It is to the effect that Charles Durfee purchased McKinney for a gentleman named Gardiner of Los Angeles, who refused to pay for him after the colt arrived here, claiming he did not like McKinney's hocks and said they were "curby." This is an unmitigated falsehood. Durfee bought him for his own use, and no two year old that was ever seen in California had more perfect hocks, limbs and feet than McKinney, as many who had inspected the colt when he arrived can attest.

Here is the story of his purchase: Mr. Durfee took a carload of trotting stock to sell at J. C. Kellogg's New York sale, the same time that L. J. Rose and G. Valensin were to sell their consignments. Among the lot Mr. Durfee brought were Del Sur 2:24 and a sister to Arrow 2:13¼. From the entire sale he realized a little over \$7,000. Mr. Valensin then asked him to accompany him to Kentucky as he wanted his (Durfee's) advice in selecting some broodmares. They stopped at W. H. Wilson's place, Cynthia, Kentucky, and, in looking among the colts Mr. Durfee saw this brown two-year-old and liked him. He spoke to Mr. Wilson about another colt, a black one, he admired, but the old gentleman would not sell him for any price; this colt was afterwards known as Coraloid 2:14¼. Durfee never hinted that he cared for the colt he had first seen (McKinney) when he spoke about the black one. Mr. Wilson said: "Durfee, why don't you buy that brown colt (Highly he was then called). I will sell him, as his sire, Alcione, is dead and I have sold his dam and do not care to train any more of the family." Durfee inquired the price. "Five thousand!" "Not for mine," replied Durfee. "That's too much money." Mascot had just sold for \$22,000 and everybody who owned a colt imagined he had a fortune, and prices were elevated everywhere accordingly. Mr. Wilson was a keen horseman and knew that if he could get Mr. Durfee up behind any colt he might make a sale, so the next morning he had a hoy call on the latter and tell him he could drive the brown colt. Durfee demurred, but finally consented, and he tells this part of the transaction as follows:

"I had been used to driving a lot of youngsters by Sultan and other good descendants of The Moor, but they would almost jump out of the harness if the wheel ran over a dry leaf, and when I got up behind this youngster I liked him, and tapped him gently with the whip, he didn't break or jump, but I didn't trotting. I went down the back stretch and was delighted with the good square-going youngster I was teaming. I tapped him a little harder and he responded, seem to squat down and light out. I was surprised; he was so different from all others I had ever handled. Coming down the stretch I clucked at him and began to drive, and saw that I was behind a natural trotter that would not break, but I didn't want Mr. Wilson to know this. So, when he asked me what I thought of him, I replied: 'Oh! He is a nice colt, but not worth that much money!' Mr. Wilson was persistent and lowered his price. I said 'No!' but, at the same time I felt as though I could never feel right unless I owned that two-year-old. I went to Lexington and visited a number of farms, bought some mares with Valensin, and then got a telegram from Wilson to come to his place at once. I did so, and bought Grace Kaiser, Briar Belle, the stallion Durfee, Etta Wilkes, by Billy Wilkes; a mare by Don Carlos and others, in all I had ten head when Wilson begged me to take the colt. To make a long story short I paid \$1500 for him and put him with the rest in the car. Coming to California he was stricken with spasmodic colic, and only for some of Goings' Colic Medicine he would have died. I never saw a horse as sick as he was recover. When I got him to Los Angeles I jugged him after the Marvin style of training gave him fast eighths and quarters, and then, one day, I made up my mind to drive him a mile. He had trotted quarters in 39 seconds, and to my surprise he came the last quarter of that mile in 37 seconds, the fastest he had ever trotted, and never made a break! I felt happy. I turned him out, and the next year took him up confident I was to see a big improvement. After he was jugged awhile, I got up behind him one day, feeling like a millionaire, but after this colt had gone to the three-quarter pole he kept going slower and slower, until he almost came to a walk at the wire. I got out of that sulky totally disgusted and feeling like a pauper. I was sure that at last I was 'stung!' I told the man who had him in charge to sell him to the first man who would make an offer, and then I went up the corner store and took a glass of that stuff the boys call 'Oh! Be joyful.' Then I took one of those German disturbers with its high collar of froth, and then I did not care to look at a horse. McKinney (who was named after H. D. McKinney, the well-known turf writer) was being led toward me by his caretaker, who said: 'Mr. Durfee, I don't wonder this colt slowed up; look at his elbows and knees, they are bleeding. Why he didn't run away with you surprises me. The poor fellow is better than you ever thought he was. I felt relieved I can assure you, so I got my elbow boots, got a different cart, and from that time never had any trouble with him. He never broke but twice in all his races and in both instances I found he had been hitched too low. When he got his record he was hitched to a cart. If we had the sulkies in those days we have now I believe he would have trotted five seconds faster.'

Mr. Durfee handled the horse in all his races, and out of twenty-eight of them he was declared the winner in twenty-five. McKinney was placed in the stud, and his success as a sire was phenomenal, although none of his progeny were noted as fast colt-trotters; they appeared to do better as three year olds and older. His sons proved to be good sires and his daughters speed-producing matrons. His fame as a sire of extremely fast, handsome, and game campaigners spread, and the demands for his services came from broodmare owners everywhere. Finally, Mr. Durfee was offered \$25,000 by H. B. Gentry for him, and, as his other business callings prevented him from devoting all the time he would like to this stallion, he accepted the offer, and McKinney was shipped East. It was then that Sweet Marie 2:02, and a number of other extremely fast ones of his get appeared, and William Simpson, a very wealthy and enthusiastic horsebreeder of Cuha, New York, purchased him for \$50,000! McKinney has so many good qualities and natural advantages that he won first prize whenever exhibited. At the horse show held in this city some years.

ago the late Jos. Cairn Simpson measured him and compared these measurements with those published of the great Sir Archy and there was no apparent difference. In breeding, disposition, intelligence, conformation, soundness, color and pure trotting gait with plenty of knee and hock action and an almost total inability to gallop fast, he is one stallion among thousands.

The showing made by the descendants of McKinney in 1911 is a very creditable one. Although he had no new 2:10 sons and daughters, his son, Belwin McKinney holds the fastest yearling trotting record for the year 2:21¼, his grandson, Vernon McKinney, paced in 2:02. One of our fastest three-year-old pacers, Little Lucille 2:09, Zombro 2:04¼, Hal McKinney 2:08½, Frank N. 2:07¼, Teddy Bear 2:05, Vera Hal 2:07¼, are among grandsons and granddaughters that entered the inner circle this year, and his great grandson, Harry R., holds the coast record for yearling pacers, 2:24½.

McKinney's list of sons and daughters to enter the 2:30 list consists of Nearest McKinney 2:13¼, Royal McKinney 2:15¾, H. B. McKinney 2:17½, Diablo McKinney (3) 2:19, Belwin McKinney (1) 2:21¼, Baby McKinney 2:25¼, Sunny McKinney 2:27½, Bro. McKinney (3) 2:28, Fair McKinney (2) 2:29½ and Worthy McKinney (1) 2:30.

McKinney's sons that are noted as sires are: Captain McKinney, Baron McKinney 2:10¼, Bonnie McK. Del Coronado 2:09½, Expressive Mac 2:25½, G. Albert Mas 2:30, Geo. W. McKinney 2:14¼, Guy McKinney, Kinney Lou 2:07¼, McPherson 2:22½, Eli McKinney, McZeus 2:13, Judge McKenna, McAlropa, Tom Smith 2:13¼, McNear, Mac Rose, Marengo King 2:29¼, Nearest McKinney 2:13¼, Scott McKinney, Wallace McKinney 2:26¼, Washington McKinney 2:17½, Zolock 2:05¼, and Zombro 2:11, and to these twenty-four we must add the following six splendidly bred sons that have earned honors as sires this year:

1. Ben Liebes 2:17¼, dam Belle McGregor (dam of Direct's Daughter 2:20) by Robert McGregor; grandam Wyoming Belle (dam of Wanita 2:20¼) by Lowe's Pilot. Sire of Direct McKinney 2:16½.
2. Greco B. 43129—dam Alein 2:26½ (great broodmare) by Anteo 2:16½; grandam Lou Milton (dam of Lou Dillon 1:58½ etc.) by Milton Medium. Sire of Martin Carter (3) 2:29.
3. Kinney Rose 2:13¼—dam Golden Rose by Falrcse 2:23. Sire of Kinney H. (4) 2:22.
4. Merry Mac—dam Advocatrix by Attorney. Sire of Merrylina (4) 2:23.
5. Franzel—dam Miss Lamartine by Lamartine. Sire of Mack's Mack (4) 2:18¼.
6. Stanford McKinney 45173—dam Palavena 2:19½ by Palo Alto 2:08¾. Sire of Kinneysham (2) 2:21½.

Besides these Zombro 2:11 has nine new ones in the list this year: Zolock 2:05¼ has three; Kinney Lou 2:07¼, three; Tom Smith 2:13¼, two; Nearest McKinney 2:13¼, two; Wallace McKinney 2:26½, three; Washington McKinney, Del Coronado, Eli McKinney, Bonnie McK., G. Albert Mac, Geo. W. McKinney and Expressive Mac each have had another added to their list of 2:30 performers, and when the full tables of all the new ones are published it will be found that McKinney's daughters have contributed their share of extremely fast ones.

McKinney has to his credit today 149 in 2:30, thirteen 2:10 trotters and ten 2:10 pacers. His sons have sired twenty-four in the 2:10 list and 156 others and his daughters are dams of at least thirty-four, of these sixteen are in the 2:10 list. Surely by inheritance and prepotency McKinney is entitled to wear the crown as the "King of All Sires of Extreme Speed!"

A TROTTING TRINITY.

There are few "small" breeders in California who have had more marked success than Mr. Geo. L. Warlow of Fresno. When he came to the Raisin City over twenty years ago he brought a few good mares and from these has bred more futurity and stake winning colts than any other breeder possessing the same number of matrons. His colt Athadon, as a yearling, won the world's champion record, 2:27, and he has proven a remarkable sire for founding a family of sound, good-boned, level-headed horses; those that were not trained for speed became noted as the most useful horses for livery, carriage and business purposes in Central California. It is a question what the horse interests of Fresno would be without the Athadons. Mr. Warlow owns him and always will, and this year he is standing him together with two of the best bred young stallions in California: Moko Hall 48645, by Ozono (trial 2:17½) by Moko, dam Maggie Yeazer (dam of Walnut Hall 2:08¼, sire of The Harvester 2:01, etc.) by Red Wilkes, and Stanford McKinney 45173, one of the best bred sons of McKinney 2:11¼, out of Palavena (2) 2:19½ (dam of Mendovena 2:19¾, a producer, and Menlow 2:29¼, sire of the phenomenal race winner of 1911, Blanche R. 2:06¾) by Palo Alto 2:08¾, etc. These are grand looking individuals and when their season ends both will be put in training. The colts and fillies by them are handsome and bloodlike and owners of mares will not be committing a mistake if they send them to these horses, for they represent the most fashionable trotting, the leading "breeding-on," as well as the best speed-producing families of the present day. For further particulars, address Geo. L. Warlow, Fresno, Cal.

As soon as the weather moderates, Frank Colby, of Romeo, Mich., will ship The Angelus 2:10¼, by Zombro, to Chas. Bateman, of Mt. Bridges, Canada, where he will make the stud season of 1912.

BEST POLICY 42378.

We have not had many sons of the mighty Allerton 2:09½ on the Pacific Coast, and it is doubtful if there ever was one so well bred as Best Policy, not only as a trotter with the prospect of getting a low record, but as a sire with every hope of becoming one of the greatest ever foaled. A glance at this horse proves this, while a close study of his pedigree is most convincing. Allerton 2:09½ stands highest of all our sires. He has founded a family of do-or-die race horses that will always be admired for their dispositions, their symmetry, soundness, and speed. He is the greatest speed-producing son of Jay Bird, one of the best and most fashionable sons of Geo. Wilkes. Allerton traces to Geo. Wilkes twice and to Mambrino Patchen twice. This is the combination of blood which has given us Guy Wilkes 2:15¼, Baron Wilkes 2:18, Alcyno 2:27, Alcantara 2:23, Patchen Wilkes 2:29½, Simmons 2:28, and Wilkes Boy 2:24½. That is one reason why C. W. Williams, of Independence, Iowa, bred this horse, and the result justified his experiment.

The dam of Best Policy is Exine 2:18¼, by Expedition 2:15¾, one of the choicest bred and greatest progenitors of speed sired by the immortal Electioneer. His dam, Lady Russell, besides being a full sister to Maud S. 2:08¾, produced five in the 2:30 list, three speed-producing sons and two producing daughters. Exine is the dam of two three-year-olds that have marks of 2:30 and one that has a trial of 2:19¼. Exine is a sister to two great race mares, and she is out of Euxine, Axtell's most famous speed-producing daughter, she being the dam of six in 2:30, and this is not surprising when one considers whence she derives this speed procreative power, for besides being by Axtell 2:12, the one-time champion three-year-old trotting stallion, she is out of Russia 2:28, a producer, and is also a sister to Lord Russell, sire of Kremlin 2:07¼, and the next dam is Miss Russell, dam of Maud S. 2:08¾, Selavonic 2:09¾, Nutwood 2:18¾, the greatest broodmare sire in the world, and four more in standard time.

Isn't that a wonderful pedigree? It traces to the

AIRLIE DEMONIO.

Messrs. Rush & Haile, owners of Demonio 2:11¼, the splendid looking speed-siring son of Chas. Derby 2:20 and Bertha, "the world's greatest broodmare," purchased some of the finest of the San Mateo Stock Farm broodmares, and one mare, in particular, McCocva 2:28½, which was in foal at the time to Prince Airlie, the best bred son of Guy Wilkes on the farm, the produce was a mare they called Potrero Girl, a real line trotter, handsome as a picture, one that is destined to become one of the best broodmares on the Suisun Stock Farm. They bred her to Demonio 2:11¼, and Chas. Johnson, the popular liveryman of Woodland, purchased the colt and registered him as Airlie Demonio. As an individual there are few to excel him. He was bred to a number of mares last season in Yolo county, and the produce are noted for their likeness to him in symmetry, being all close-coupled, high-headed, short-backed, and have the most perfect legs and feet. That he is destined to become a famous sire of early speed is conceded by all who have seen these youngsters trot and pace across the fields. This year a number of standard and registered mares will be bred to him because their owners are so well pleased with the speed and quality shown by all the little ones they have seen that are sired by him.

THESE MUST BE SOLD.

The value of McKinney blood in sires and broodmares cannot be overestimated and a man is not poor who has them. Will Durfee advertises a grandly-bred Zombro mare, out of the dam of Copa de Oro 1:59, and she is in foal to Carlokkin 2:07½, and is absolutely perfect. Then he lists some royally bred colts by Del Coronado 2:09¼ and Carlokkin 2:07½ which are fit to be taken in hand and raced. All are good looking, sound, and worthy of being placed at the head of any stock farm in the land. Besides these, there is the grandly-bred Wilkes Boy stallion, Wilkes Boy Jr., out of Carona Bell, by Liberty Bell 2:24, etc. These must be disposed of to

BEST POLICY 42378

R. O. Newman, owner.

greatest of broodmares known and is representative of the golden cross, the "Wilkes-Electioneer," supported by the best of trotting and thoroughbred strains. With such a royal inheritance Best Policy is a credit to it in every way. He is remarkably handsome and one of the cleanest going trotters imaginable as can be seen by the above excellent photo engraving. He is a bay in color, is of good size, sound, heavily boned, stylish, perfect in disposition, remarkably sensible, and kind.

His natural speed has not been developed. It is his owner's intention, however, to have him worked this year after a short season in the stud. None of his colts is old enough to be worked, but as field trotters they are worth the trip to Visalia, where the horse is standing, to see them. Owners of broodmares should strive to breed their choicest bred mares to this horse. They will never regret it, for as sure as the sun shines he will leap into popular favor as a trotter and a sire, and all who have any of his progeny will feel proud of the fact that they had the foresight to send their mares to him. His terms of service, \$50, are remarkably low, and his owner, Mr. Newman, being one of our most experienced horsemen, will give all his time to caring for any mares sent him.

Sam Watkins, an old-time auctioneer, well-known in San Francisco and vicinity, is now a resident of Angeles, and is creating quite a stir among the trotting horse fraternity as a horse buyer and as an amateur reinsman. He recently purchased a green six-year-old mare which he calls Lady Love, and at the matinee races on Washington's Birthday drove her a mile in 2:12. She is sired by Chief Whips out of a mare by Welcome 2:10½.

close out a partnership and are sold for no fault. Mr. Durfee has placed the advertisement in our business columns, and it is so complete that we take pleasure in calling attention to it, for we believe that whoever purchases any of these will have no cause to regret it. Opportunities of this character do not occur every day.

NEAREST McKinney 2:13¼.

There are few sons of McKinney that are endowed with the power to get inside the 2:15 class limit, trotting and pacing, as Nearest McKinney 2:13¼ did. His breeding is excellent and is a rare combination of the best trotting families on the Pacific Coast. As an individual he has no equals and few superiors. He is a sire of early and extreme speed. He has size, color, disposition, conformation, intelligence of a high order, breeding, and speed. Had he not accidentally injured one of his hoofs it would have been no difficult feat for him to have trotted in 2:08 and then be turned around and paced a mile equally as fast. He is a sure foal-getter and Mr. T. W. Barstow, who has him at the San Jose Driving Park, will answer all questions and be pleased to show this horse to owners of broodmares, who can rest assured that all mares sent to him will receive the best attention and care. See advertisement. Go and see his colts and fillies.

Mrs. William Green, wife of the late Col. Green (the copper king), had the misfortune to lose the trotting stallion Direct View 2:08¾, by Direct (p.) 2:05½. The stallion died very suddenly, a short time since, at the Green ranch in old Mexico.

A MATCH RACE AT THE BAY DISTRICT TRACK.

The other day while walking along Hayes street I met Gerhard Wempe and Wm. Smith, and seeing them both at almost the same time recalled one of the bitterest fought match races I had ever seen, which came off on the old Bay District track in October, 1891; over twenty years ago. I wrote the article for the "Breeder and Sportsman" at the time, and on referring to this they said they and their friends would like to see the account of that race reprinted. This is the reason why it appears again:

Many people have an idea that the chivalric age of match-making passed away since the trotting-horse and blood-horse associations have taken charge of the affairs of the equine race and conduct all the meetings. But once in a while an unheard-of and unthought-of prospective match between horses is spoken of, so that finally it becomes a reality, the

come, so dreariness reigned supreme. The voice of the poolseller grew husky as he tried to draw the mob toward the pool box, but the audience was too busy shivering to be able to make anything heard except the clashing of their teeth. The judges were selected, and, after they had read and digested the contents of a ponderous volume of rules of the American Trotting Association, all three grabbed the bell-ropes and rang out a peal that reminded one vividly of a country fire alarm. The owners stood ashen pale and sadly frightened in front of the judges' stand as they received their final instructions. Weights and distance were waived, and then the trainers brought up the prancing steeds whose manes were braided and bedecked with vari-colored ribbons. The boots the animals wore would make the heart of a McKerron or O'Kane leap with joy, for toe boots, scalpers, shin boots, and knee boots were fastened on every limb. The grooms had kindly and thought-

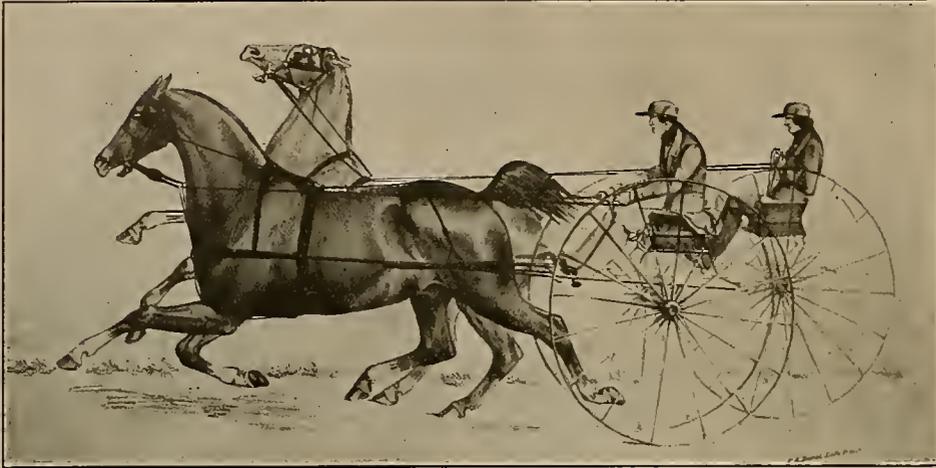

reached the wire. The audience had sufficient time to think of all these things before the pair heard the word, for they scored several times. To a good start they got away, both under a heavy pull. The drivers, as soon as they got to the eighth pole, pushed on the lines. Cyse, not being used to such kindly assistance, broke, and Harry Lee passed him and led to the quarter. He took the pole away from Cyse at this point, as the latter had no need for it and was apparently rebelling against the undue influence of his driver, and when he got settled made another attempt to catch the flying Lee, whose driver nearly fell out of his sulky with joy when he found that his rival was so far behind. However, Wempe never lost his solid grip on the lines nor forgot to say "Steady! Whoa, boy! Steady!" To the half it was a procession. It could not be called a horse race. At the three-quarter pole Harry made a skip, his driver adroitly brought him to his gait, and remembering that perhaps he was overweight, he threw his penknife inside the fence. The horse felt the difference immediately, and came home a winner with grand strides. Cyse, it was plain to be seen, was being laid up for the heat, and came in two hundred yards behind. It took the judges ten minutes to decide, and finally, when the bell rang to call the attention of the audience to the announcement, the fog lifted as if by magic and the judge awarded the heat to Harry Lee, Cyse second. Time, 2:63. As to the fog lifting, it is claimed that the drivers blew a long breath on it.

The horses were called for the second heat after receiving the regulation amount of sponging, blanket-ing, and walking exercise. A look of triumph o'er-spread the classic features of Harry Lee's driver as he nimbly hopped into the sulky. Cyse's driver had a determined look in his blue eyes, for he was almost sure that unless Harry Lee fell dead he would win that money. His only hope was that heart disease might strike Harry. He knew that when the match was made his gallant gray was more than a match for Harry, but, like Little Albert, Direct, Charles Derby, and other famous horses, his animal "went wrong." To do the driver justice, he kept his part of the agreement, knowing these facts, and in this heat he was not so far behind at the word, "go." Cyse had a nose the best of the start, and the driver of Harry Lee found that the previous heat had made a race horse out of the pacer that he could not leave like a "rock from a balloon" somewhere on the track, for Cyse kept right alongside to the quarter. Of course, he galloped, paced, and walked a little, but he got there, just the same. Harry Lee then made a disastrous break, and Cyse forged ahead and led past the three-quarter pole. Harry Lee recovered his gait and speed slowly. On coming down the back turn Harry went around Cyse like a cooper around a barrel, and led all the way home. Cyse's driver thought he was overweight, so he left his hat at the drawgate and made a beautiful drive for position, which he won. The judges awarded the heat, race, and money to Harry Lee. Time, 2:67½. The following is the

After the race was over mutual congratulations

TROTTING MATCH AT HUNTINGTON PARK,

Near Philadelphia, October, 1840.

Cuyughi Chief and Kate Kearney—2-mile heats: 1st heat, 5 minutes, 30 seconds; 2d heat, 5 minutes, 35 seconds.

money is placed in the hands of a stake-holder and the horses are given the freedom of a box stall in some local trainer's stable. Hayes Valley was noted, years ago, for its large number of "scrub races," as they were called, and if the stakes did not amount to more than ten dollars the crowds that came to the race track left an aching void in the cottages in that portion of this city.

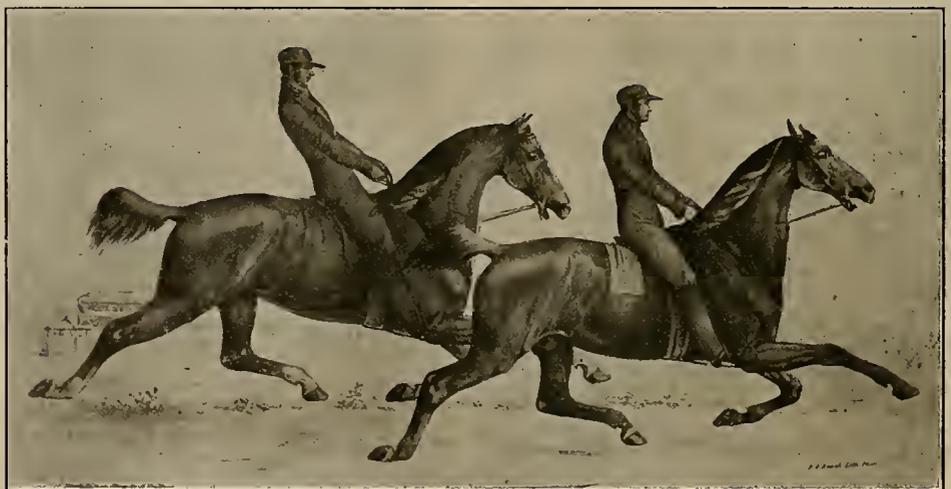

About four months ago, a little lively talk about the merits of two steeds resulted in a wager between the owners. The match was to be at the trotting gait, best two in three, the owners to drive, while the stakes were \$1,800. The race to take place at the Bay District track on October 19th. The gentlemen who were the principals in this event were G. Wempe, the well-known paper-box manufacturer, and W. Smith, a popular baker. The horses were well deserving of the training, for as far as breeding was concerned Wempe's colt, Harry Lee, represented two great trotting families, viz., Nutwood and Hambletonian Jr., while the gray colt belonging to W. Smith was called Cyse (not souse, for that is more in a butcher's line). An observant bystander confidently remarked at the time the contract was drawn up between the two gentlemen that, from all he could learn, "Cyse vas slahed by John Treat, and hees mudder vas by Gray Eagle, vat beat Vagner, de horse who vas named after de gomposer whose moosic is better as it sounds."

The stake-holder was Ned Donnelly, of Donnelly, Dunne & Company, wholesale butchers, a genial son of the Emerald Isle. He kept the owners riding back and forth to the track every other day to witness the training of the "wonders." His reports to either of them regarding the physical condition of the animals had the effect of making the hox stalls redolent with the odor of liniments, dopes and flax-seed, while the walls of the stalls were literally covered with boots, bandages, patent bits, toe-weights, straps, and blinders. There was an intense rivalry between the two as to which would have the greatest variety of these useful appliances. Gorgeous blankets and hoods adorned the rear of the stalls. A hale of straw was used for bedding every other night, and the unfortunate trainers slept in the small stalls with the restive steeds, bulldogs beside them, to keep away any arch fiends that might be loitering around with cold poison to sweeten the drinking water or flavor the hot mashes that were dealt out according to strict rule. The owners never spoke as they passed by, but an air of mystery pervaded their movements as they were seen looking for some desirable investment for that \$1,800, for be it known that they were both sure of winning the prize. Did not the stake-holder tell them that they had an airtight-fall-down-get-up-and-win-cinch on the coin? The amounts they heard of that were wagered "on the side" made their investments seem tiny in comparison.

The great day of the race dawned full of fog. It was last Monday. Old Sol was hidden from view behind a dense bank, so thick that the rival colt-owners thought of hiring a force to shovel it off the track, and the cold winds blew across the bleak sand dunes, and seemed to freeze the marrow in the bones of the madding crowd that assembled near the race course fence. The band that was engaged did not

fully placed stallion shields on each, and the tails of the two were carefully crimped and curled. With a voice like a fog horn the owners were commanded to mount and "prepare to score."

After shaking hands and bidding all their friends a heart-rending farewell, with tears in their eyes and quivering lips, they placed gaudy silken caps upon their heads, and at length, with the assistance of their trainers and grooms, got in. The presiding judge, John A. Goldsmith, shouted that the gray horse had the pole, and one of his backers stepped out on the track to see if it was anything serious. After a careful inspection, he thought the judge must be fooling, and said: "Go ahead! You're all right!" Cyse kept the pole and Harry Lee kept the outside rail for fear of a collision, and in order to get a good start the two were driven to the three-quarter pole. Another fire alarm stroke from the judges' stand bell brought them partly to their senses, and they realized

TROTTING MATCH AT HUNTINGTON PARK,

Near Philadelphia, 3d of October, 1840.

Buffalo mare and Don Juan—2-mile heats: 1st heat, 5 minutes, 26 seconds; 2d heat, 5 minutes, 21 seconds.

they were out for business and not for pleasure. On returning to the wire, both drivers showed that they had profited by what they had seen and learned during their visits to the track; they handled the ribbons like veterans, and checked their horses whenever they broke. Harry Lee is a very promising trotter, and will surely make his way into the 2:30 list. Cyse did not know whether it was a pacing race or a running event that he was in. He should be entered in some of the latter events next week—in a ten-mile dash—if his work-out Monday is any criterion. His owner drove him as well as could be expected, the colt having been very ill and just recovering; any one could observe this from his actions before he

followed, and all feeling of enmity was drowned in the flowing howl. The judges who had labored so hard were each presented with a case of wine and asked to officiate again. One hard-hearted but scheming hacker of the gray horse said that the owner would have made money if he had let some miscreant give his horse Rough-on-Rats, for then the match would have been off, the horse would be dead, the purse returned, and the three judges would not be "treated." Mr. Wempe's mail since Monday has been filled with challenges and large offers for his colt. Mr. Smith gets no mail, for he has nailed up his letter-box and gone to the springs to build up his shattered nerves.

W. G. L.

PRINCE McKINNEY (2) 2:29¼.

McKinney 2:11¼ is entitled to the honor of being the greatest sire of trotters living, and he should also be credited with siring some of the handsomest trotters ever foaled. One of his sons, Prince McKinney, is claimed by many to be entitled to a place in this class. He is only eight years old, a beautiful dark bay with black points, stands 16 hands, and weighs 1150 pounds. He is one that for conformation, bone, constitution, and gait, cannot be surpassed. He has trotted miles in 2:13¼ in his workouts, but, owing to the sickness of his owner, Mr. F. Gomett, who could not give the horse his attention, he did not start him since he won the two-year-old division of the Pacific Breeders' Futurity stakes at Fresno, July 24, 1905. Prince McKinney has not been bred to many mares. One of his daughters, Sweet Princess, a three-year-old, has been timed miles in 2:13½ and will be seen on the circuit this year. She is the only one that ever received any track development.

PRINCE McKINNEY (2) 2:29¼.

Prince McKinney, as stated, was by McKinney 2:11¼, a sire whose history appears on another page of this issue. His dam was the bloodlike mare Zorilla, by Dexter Prince 11363, one of the stoutest bred sires ever foaled; he being by Kentucky Prince (son of Clark Chief 89 and Kentucky Queen), out of Lady Dexter (sister to Dictator, the great sire; Dexter 2:17¼, the ex-champion trotter; Alma 2:28¾, etc.), by Hambletonian 10; grandam Clara (dam of three, two sires of sixty-two, and three dams of three), by American Star 14.

Prince McKinney's second dam was Lily Thorn, by Electioneer 125, and his third dam was Lady Thorn Jr. (dam of Santa Claus 2:17½, sire of twenty-five, including Sidney 2:19¾, one of our greatest speed progenitors; Navidad 2:22½, Mollie Mack 2:30½, and Hinkston Boy, a sire), by Williams Mambrino (son of Ericsson 2:30½ and a mare by Aratus, sire of the second dam of Fanny G., the grandam of Alma Mater, dam of Alcycone 2:27, etc., and the great grandam of Palo Alto 2:08¾). Prince McKinney's fourth dam was Kate, by Highland Chief, son of Mambrino Chief 11; fifth dam by Magowan's Halcorn, son of Peters' Halcorn (grand sire of dams of Steinway 2:25¾, Solo 2:28¾, etc.); sixth dam by Cockrell's Highlander; seventh dam by General Taylor.

There are few better or stronger bred stallions standing for public service than Prince McKinney, the stout blending of the infusions of Wilkes, Electioneer, Dexter Prince, and American Star blood with that of the thoroughbred strains to which so many of our champions all the way down to Lou Dillon 1:53½ trace, places him in a position to transmit style, quality, finish, constitution, good limbs and feet, a splendid disposition, and with these qualifications, extreme speed. He inherited speed and he had speed from his yearling form on, and should have been kept in training, for his gait is frictionless and rapid. Mr. Gomett is residing in San Francisco, and as many owners of mares have expressed a wish to breed to his horse, he decided to have him brought from Palo Alto and has placed him in charge of F. E. Burton at the McKinney Stables, Thirty-sixth avenue and Fulton street, setting his service fee at the low price of \$40. Every horse owner is invited to come and see this horse, and those who breed their mares to him will have no cause to regret it, for the foals will undoubtedly be of the best, as all of McKinney's sons are sires of speed so far.

VERNON McKINNEY'S RACING CAREER.

The story of the racing stable of the Canadian horseman, R. J. MacKenzie, for the season of 1911 is a story of one of the greatest aggregations of speed ever in one stable; also the story of a continued series of disasters which would have discouraged and driven out of the harness racing sport the majority of owners. In spite of the tide of misfortune which kept the stable company during the season, there were times when fortune seemed to smile on the equine aggregation and at least one sensational performer was developed from the formidable looking stable which Havis James brought across the mountains last spring from their winter quarters in sunny California.

During the training season up to practically the time the bell called the horses to the post for the first meeting of the Grand Circuit the pacing stallion Joe Patchen II was featured in the public prints to a greater extent than any other harness horse. There seemed to be no limit to the speed of which the son of Joe Patchen was capable and the hearts of the owners of other stake pacers were filled with woe. Then came the accident to the pacing phenomenon which killed his chances for the season; an injured leg which did not yield to treatment in time to allow of the horse being started in such classic events as the Chamber of Commerce, Hotel Rickman, etc. James, however, had a second string to his bow in the California bred stallion Vernon McKinney and

there was more than one of the railbirds at the Indianapolis track to predict that he was equally as good if not better than Joe Patchen II, says Western Horseman.

The first appearance of Vernon McKinney in fast company was not auspicious. It was at Kalamazoo in the \$5,000 Hotel Rickman stake in which he proved very unsteady, finishing third to Zombrewer in 2:06¾, 2:08¼, and 2:05½. After this race the critics were disposed to treat the chances of the California stallion in the Grand Circuit stakes rather

lightly, but there was more to follow. He next started in the \$5,000 pacing stake at Grand Rapids, where he met Branham Baughman, Sir R., Peter Preston, and other fast ones. No sooner was the word given in the first heat than Vernon McKinney went to the front and led all the way, winning easily in 2:03¾, then came right back and repeated the second heat in 2:03¼. It now looked as if the stallion had the race at his mercy, but in the third heat he became unsteady and lost the race to Branham Baughman in 2:05¼, 2:05¼, and 2:06¼, the time of the race averaging only a shade slower than the world's record five-heat race.

It was now conceded that Vernon McKinney was a horse of marvelous speed, but his liability to break lost him many supporters before the start of the classic Chamber of Commerce stake at Detroit in which Branham Baughman was favorite. When the stallion broke in the first heat in which Peter II beat Branham Baughman in 2:04½, his supporters were discouraged over the outlook, but after that they had no cause to worry, for the flying Californian had things his own way in the next three rounds, which he won in 2:04, 2:03¾, and 2:04½. It was plainly apparent that none of the stake pacers had a chance to beat him as long as he stayed pacing.

The Grand Circuit scene next shifted to the North Randall track near Cleveland, and on the opening day Vernon McKinney started in the \$3,000 stake for 2:12 pacers in which he met Sir R., Branham Baughman, Peter II, and others. He broke going away in the first heat and Sir R. won in 2:06¼, but the next two rounds were easy for him in 2:03½ and 2:06, pacing out in third-horse position nearly all the way as the going was very heavy next the pole.

Vernon McKinney made his next start in the Hotel Hartman \$5,000 stake at Columbus, where he won the first heat in 2:04¼, but broke in the second and was distanced, Sir R. winning in 2:03¾, 2:04½, and 2:05½. The stallion got revenge the following week, however, when he started in the \$3,000 stake for 2:07 pacers, in which he showed his heels to Sir R., Peter II, and others in straight heats, the time 2:03¾, 2:02, and 2:02¼, a new world's record for three heats by a pacing stallion, and his new record of 2:02 made him the fastest new pacing performer of the year. This was the last appearance of the fast stallion, as he met with an accident shortly afterwards which caused his retirement for the balance of the season. As he raced to a record of 2:02 and broke the world's record for three heats by a stallion the sixth time he ever started in a race it would appear that he has not reached the limit of his speed, and with an even break in luck the coming season he is liable to be added to the select list of pacers which have beaten 2:00.

GUY McKinNEY 37625.

In these days when so many students of trotting horse breeding, and this includes the majority of breeders, are studying to see what sire is preferable for their mares, the bloodlines of the well-formed, high-class stallion Guy McKinney will immediately attract attention. In the first place, he is by McKinney 2:11¼, that, in itself, is recommendation enough for any sire, for he is the progenitor of a family that will breed on just as surely as he is a descendant of his sire Alcycone and his dam Roscoe Sprague, whose sires were famous campaigners and whose dams were famous broodmares. McKinney's career from the time he first saw the light of day on W. H. Wilson's farm, near Cynthia, Kentucky, is told in another part of this journal, but it remains for Guy McKinney to appear as the sire of the first two-minute performer in the McKinney family, for this will

be the result when his son Vernon McKinney meets some horse on the Grand Circuit this year that will force him to his limit. Guy McKinney has other claims for public notice and public patronage aside from his individuality and the fact that he was sired by McKinney. His dam, Flossie Drais, is by Guy Wilkes 2:15¼, the fastest entire son of the mighty Geo. Wilkes (grand sire of McKinney 2:11¼, etc.). Guy Wilkes was a good race horse, but a greater sire, and his daughters as matrons are astonishing the trotting horse world by the performances of their produce, which include the leading Futurity winners of 1910 and 1911, viz: Peter Thompson (3) 2:07½, the fastest gelding of his age in the world! Guy Axworthy (4) 2:08¾, Miss Stokes (3) 2:08¾, Eva Tanguay (4) 2:09¾, and the California-bred pacers, Denervo 2:06½ and Solano Boy 2:07. Guy Wilkes, like Alcycone, was out of a Mambrino Patchen mare. The second dam of Guy McKinney was Blanche Ward (dam of China Maid 2:05¼), and she was by Onward 2:25½, the founder of an iron-limbed, stout-hearted family. He was by Geo. Wilkes, too, but his dam was Dolly, that grand little mare which also produced Director 2:17, a remarkable sire of campaigners; Czarina 2:21, Thorndale 2:22¼, and the sire John F. Payne. Dolly was by Mambrino Chief 11, out of Fanny, by Saxe Weimar, etc.

The third dam of Guy McKinney was Blanche Patchen, by Mambrino Patchen 58, and her dam was Lady Blanche (dam of Alcryon 2:15, two sires of forty-eight, and one dam of one in 2:30), by Hoagland's Privateer 258; Guy McKinney's fifth dam was Jenny Lind, by Abdallah 15, and his sixth dam was Lady Weisner, by Saltram, sire of Highland Maid 2:27, holder of the world's record in 1853.

Surely it is a remarkable pedigree. It contains lines of breeding that have given us hundreds of our very fastest trotters and pacers. Within five generations there are such sires as McKinney 2:11¼, Alcycone 2:27, Gov. Sprague 2:20½, Onward 2:25½, Rhode Island 2:23½, Geo. Wilkes 2:22 (three times), Hambletonian 10 (four times), and Mambrino Patchen (three times). The great broodmares are Rosa Sprague, Alma Mater (twice), Dolly Spanker (three times), Dolly, Lady Bunker, Bell Brandon, and Lady Blanche. Such a combination must inevitably be good in a sire. It has proven so in Guy McKinney, for he could trot in 2:20 and, when placed in the stud, sired Babe Kemp 2:28, Linden Girl 2:22, McAdrian 2:24 (sire of the phenomenally fast trotter Bert Kelley, now in R. J. MacKenzie's string at Pleasanton). But, greater than all these, is the pacing stallion Vernon McKinney, that started out as a green stallion and returned with a record of 2:02, the fastest record made in 1911; he also holds the record for pacing the three fastest heats ever made by a stallion, viz., 2:03¾, 2:02, and 2:02¼. He will erase all these records this year if he continues to improve as he has the past month.

There are several others by Guy McKinney that will astonish the race-loving public, even though they, like Vernon McKinney, have not been "bred in the purple" on the maternal side. Guy McKinney is so intensely trotting bred and stamps his impress on his progeny so strongly that his trotters are all pure gaited and his pacers need no hoppers, but all are speedy, level-headed, intelligent, and well-formed, have the best of feet and legs, and are endowed with courage and stamina.

In appearance Guy McKinney is a magnificent individual; he is a coal black in color, stands full sixteen hands, and weighs 1200 pounds, and from the tip of his nose to his heels is without a blemish in conformation. He is stylish, active, and remarkably intelligent. His opportunities in the stud have been very limited, as there are few standard bred mares in his immediate neighborhood, but from ordinary mares he has produced some of the finest look-

GUY McKinNEY 37625.

ing horses in Stanislaus and San Joaquin counties, where he has stood for several years. He is owned by M. A. Lewis, of Oakdale, who will stand him for the season of 1912 at \$25 for the season, with usual return privilege. Mr. Lewis is a thorough horseman and will see that all mares sent to Guy McKinney will receive every attention. Owners of broodmares will be blind to their own interests if they fail to send them to this one of the grandest bred sons of McKinney and also one of his greatest speed siring sons.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DOWITT.

GOSSIP FOR SPORTSMEN.

Shooting Season Closed—The open shooting season on wild ducks, ibis and other shore birds—sand pipers, robin snipe, etc., wound up Thursday, February 29, that being the last day for a chance to indulge in hunting the wildfowl here specified. English snipe, curlew and plover will be in open season for the gunner until May 1. Black sea brant may be shot until April 1. Wild geese are at the disposal of the hunter at any time and in any number when opportunity offers, there being no close season or limit on these birds. The goose northern migration begins with the departure of the honkers—the last species to arrive here and the first to leave, starting about the middle of March. By the end of April all varieties of geese are gone saving the cripples or sick birds.

The past wild duck hunting season has been one of the best in years, particularly so for the clubs that baited ponds liberally during the dry spell. Two weeks ago the ducks were very plentiful throughout the San Joaquin valley and farther south. They have since been coming north in thousands.

preying on the hogs and cattle belonging to O. F. Bacon.

About a month ago Olie missed one of his hogs and a few days later he found the remains of the porker and also those of a freshly killed deer within a few feet of each other and not far from the Flint camp on the Chalone creek. Then Olie and Ben Bacon set a number of traps around the remains of the animals and Olie visited the traps every morning, but for some time without success. However, one Saturday morning he found that two of the traps, with about fifty pounds weight attached, had disappeared. He followed the trail for several hundred yards when he found Mr. Lion fast in a bunch of chapparal. Olie fired twice at the brute's head with his pistol, hitting it both times, but not fatally. Then he went for his Winchester 30-30 rifle, with which he soon put an end to the lion. It was a large one, measuring six feet from the tip of its nose to the end of its tail and weighing 104 pounds. It was caught by just one toe of the hind foot.

Sunday Olie missed a young calf and Monday he and Ben found it where the second lion had dragged

It might be pointed out in this connection that, while a few birds may be accidentally killed in the warfare against the rodents, this campaign will eventually increase very largely the number of game birds in this State because it will kill off those animals which prey upon the eggs and the young and which destroy a large amount of food material which would otherwise go to feeding game birds."

Angling Notes—It is but three weeks and a day when the Coast streams will be open for the anglers, on April 1. Your orthodox devotee of rod and reel is nothing if not methodical. The joy of preparation and pleasure of anticipation go far to keep up the enthusiasm and love of the sport.

Just about these preliminary days rods are being overhauled, reels adjusted, lines tested, fly-books critically inspected, outing garments and wading boots examined and innumerable matters attended to which are deemed unnecessary to give one a day's sport on a favorite stream without setback or mishap. The wise angler does not wait until the eleventh hour to put his kit in commission.

Reports from Russian river up to a week ago were that a few fish had been taken on different days recently, but the fish were not in evidence as they were several weeks ago. The river was reported to be at about the same level as before the bar was opened.

During the past week, however, good catches were made near Duncan's Mills, enough so to induce a number of anglers to visit the resort Sunday.

Many anglers have visited the tidewater of Paper Mill creek, near Point Reyes station, within the week. The creek is too low at present for good results, a few small steelhead have been caught and now and then a large fish. Plenty of steelhead trout are now in Tomales bay, at the mouth of the creek, waiting a favorable opportunity to get upstream.

John Borshoff of Pescadero gave out the pleasing news during a visit to this city last week that the Pescadero creek lagoon was "full of fish" and that quite a few large steelhead had been caught.

Recent reports from Santa Cruz stated that in the tidewaters of San Lorenzo creek and in Monterey bay nearby steelhead trout were very plentiful. All efforts to tempt the trout with ordinary lures have been, for some reason or other, unsuccessful. It is believed a rain and fresh water sweetening of the salt water will change angling conditions.

Following the above news reliable reports stated that good catches were made daily last week. The trout ran from 6 to 18 pounds in weight and were caught as far upstream as the Santa Cruz bridge.

A seizure of fifty large steelhead trout was made recently by Fish and Game Commission Deputies Benson and Barnes on Eel river, at the Hanson place, near Ferndale. These fish had been freshly caught in nets and were prepared for salting down.

The brush dam in San Anselmo creek, Marin county, has been taken out after notice served by the Fish and Game Commission. Fish can now run up this tributary of Corte Madera creek.

Saltwater Angling—The creeks and sloughs near Wingo station, in Sonoma county, for the past fortnight have had the call with the striped bass fishermen. Friday, a week ago, Dick Cunningham landed seven fine bass, ranging from 12 to 32 pounds in weight respectively. The following day he caught three more of the striped fish and wound up on Sunday with a seven pounder. Three days' striped bass fishing sport like that at any of the Eastern shore fishing resorts would be given headline notices all over the New England States. Cunningham used "bullheads" and clam baits.

Evidently there was a run of big fish in Steamboat and Napa. No. 2, sloughs on favorable tides the end of the previous week. The tidings of the big catch caused a large delegation of clam tossers to try their luck in the Wingo waters Sunday.

Among the boat anglers were Joe Dober, who caught three bass; Mr. and Mrs. Charles Urfer, Charles Reynaud, Joseph Gabarino, Al Martin, who landed two fish; George Bebesheimer, Adam Hackmeir, Tim Lynch, Joe Harding, H. Hammond and others. The levees were manned by about two score

Newman Rod and Gun Club.

Charley Huber (in center), Hugh Poston (second from right end) and nine other good sportsmen with limit bags.

These visitors from the south will stay in central California but a short time, until the mating season is over. In about four weeks the webfeet will all have journeyed to the breeding grounds farther north.

With many sportsmen in State game district No. 5 the sentiment became strong this season that it would be preferable if the open season on wild ducks began October 1 and closed January 15, or at least February 1. Just what benefit is derived by beginning the season on plover and curlew November 15, and continuing the open shooting season until May 1 is a problem yet unsolved.

Sacramento sportsmen have enjoyed fine duck shooting recently. Big flocks of ducks had chosen that section of country lying between the Feather river and Sacramento slough, and in consequence the members of the recently organized Barley Sack Gun Club were getting the cream of the shooting. Crack shooters picked their shots, Barney Worthen and Jack Inman accepted drake sprig only on several shooting days.

Judge Hughes and a party of seven went up one evening and returned early the following day. Every member of the party shot limits.

The same conditions are reported around Knight's Landing. Millions of ducks were coming in from the south at that time.

Goose Hunting Good—For from four to six weeks goose shooting in Glenn, Colusa, Solano and Napa counties will offer shotgun application for the gunners. Near Dixon and Denverton—in fact, all through the Yolo basin—the sport has been very good.

East of Elmira, and between Maine Prairie and Rio Vista, all varieties of geese are found in flocks of thousands. Kripps and Lewis, two market hunters in that section, one Tuesday shot 244 geese.

California Lions Caught—For several years California lion tracks have been seen very frequently in the southern end of Bear valley, San Benito county, near Hollister. A number of deer that they had killed have been found and lately they have been

it into some chapparal. Then the boys got busy and set five traps around it. Tuesday morning they found the lion fast in two of the traps. Then the telephone was set to work and before the beast was killed nearly fifty people had seen it, including all the children, the teachers, and many of the parents from Bear Valley and Willow Creek districts.

As there is a good bounty on lions the boys are wishing they would catch all their calves.

Four beautiful mountain lions' hides were brought into Oroville, Butte county, one day last week, by Fred Taylor and J. Q. Mullings. As a bounty the pelts are worth \$20 each. After the clerk of the county has checked them they are returned to the owners and may be sold, thus bringing in a fair return for the effort of bringing them in.

Poisoning of Game Birds Denied—Reports that quail and doves had been killed by eating poisoned grain laid out by the Federal officials for the destruction of ground vermin are discredited in the following letter from W. C. Rucker, passed assistant surgeon, in temporary charge of the work, to Secretary Ernest Schaeffle of the Fish and Game Commission:

"Replying to your letter of February 2, 1912, in which you request a report concerning the damage done to birds and game by the general rodent poisoning campaign, I would state that, in spite of the large amount of poison which has been distributed, the reports of the employes of this department, who are constantly observing the work in the field, show that the destruction of game birds is remarkably small. I think this may be accounted for by the fact that we have largely used poisoned barley for this purpose. As you well know, the rough beard upon the barley renders it less apt to be eaten by birds than any other form of grain. We have never received a report of a dove which was killed in this way, and very few dead quail and meadow larks have been found whose death could be attributed to the poison. I may further state that at this season of the year we do not recommend the use of strychnine in killing squirrels, but advise the employment of carbon sulfide.

Mrs. W. W. Richards, Mr. and Mrs. Fred P. Butler.
At Green Lodge, Suisun Marsh.

of other anglers. The catch reported for the day was fourteen striped bass, running from four to twelve pounds in weight.

Last Sunday a thirty-three pounder was caught by an Eastern visitor—his initial try at striped bass

angling. During last week a number of large bass were taken on different days.

San Antone creek and Schultz slough were non-productive to the striped bass anglers during last week. A north wind prevailing on Thursday spoiled the sport for the rosters, who were at Wingo and San Antone.

Later on Professor McFarland, at the mouth of Schultz slough, caught a 12 pound bass.

San Leandro creek, at odd times, is good for steel-head trout or striped bass. Sam Wells tried the fishing place known as Gravelly creek Washington's Birthday and was the lucky captor of a sixteen and a half pound striped bass.

The same holiday tempted many rod and line enthusiasts to spend the day fishing in Tiburon lagoon. Striped bass had deserted the lagoon for the day, possibly, for none were taken. Catfish and large sized porgies were plentiful. For a week and more past the lagoon has been full of crabs. The large sized edible variety being in the majority. Keep this in mind for the open season on crabs began March 1.

Salmon Notes—The growing encroachment of irrigation and rapacious captures of greedy net fishermen are blamed for the enormous destruction of young salmon in the Sacramento river in the annual 1911 report of Commissioner J. Bowers of the United States Bureau of Fisheries to the Secretary of the Department of Commerce and Labor.

Salmon spearing at the mouth of the Carmel river in Monterey county has been practiced recently by Monterey fishermen, a number of fine fish have been captured in this illegal manner, so it is reported, in the river shallows, while swimming upstream to spawn.

Anglers' Club Committees—At a meeting of the board of officers of the California Anglers' Association the following committees were appointed: Standing committee, E. C. Boucher, Elkan Goshner, E. C. Medau; outing committee, C. F. Breidenstein, B. Christensen, G. Gorman, Dr. L. F. Cranz, H. B. Goshner; casting committee, Charles H. Kewell, George W. Uri, R. D. Moon, H. A. Thomsen Jr., Carlos G. Young; committee on distribution of fish, W. J. Street, J. C. Meyer, F. Spence, W. Chambers, C. Caswell; membership committee, J. H. Sammi, Frank Marcus, James Watt, L. H. Eaton, A. T. Baker, W. R. Eaton, F. C. Ensinger; publicity committee, J. S. Springer, J. S. Swan and Herbert Rose.

Building a Fish Ladder—The government is now constructing a new fish ladder at the Derby dam, so it is reported. This is being built so that the large lake trout can travel up the Truckee river to the spawning beds and not have to stop below the dam, where they are slaughtered by the "fish hogs."

All of which will be grateful news for many anglers.

SAN FRANCISCO FLY-CASTING CLUB.

Midwinter Handicap. Stow Lake, February 22, 1912. Wind, variable. Weather, fair.

TURKEYS AND QUAIL LIBERATED.

A shipment of three coops of wild turkeys and one coop of mountain quail arrived in Hollister last week consigned to Dr. H. J. Macomber.

The game birds were sent there by the State Fish and Game Commission, the turkeys coming from one of the State Farms in Alameda county, while the quail are from the Coachella Valley, in Southern California, where the birds were trapped by the Game Wardens.

A press dispatch states that ranchers from the Coachella Valley, who were in Los Angeles recently, reported that quail were so thick in the valley that crops of all kinds were being destroyed despite the efforts of the State Game Wardens, who are now trapping the birds by the thousands and sending them to other sections of the State.

One rancher declared that he saw one covey of quail that must have contained 5000 birds. "They were so thick the sunlight was shut out when they flew past," he said. "The quail are very wise," he continued, "and hunters find trouble in shooting them, while trapping them is still more difficult."

The birds will be liberated on the big Paicines ranch and given full protection until they become acclimated and hardy.

CALIFORNIA WING SHOOTING CLUB.

[By the late J. K. Orr.]

The claim is made by the present membership of the above named club, that it is the oldest organization of its kind existing in the United States today.

From data to hand and information deemed reliable, we believe the claim to be well founded.

The organization of the California Wing Shooting Club dates back to the early seventies, 1872, and from that year up to the present time it has had a continuous, active existence. We may, therefore, well concede the claim made by its members, that the California Wing Shooting Club is the oldest, in point of years, to the fore today, in this country, to be correct.

Many shooting clubs have "come and gone" since the early days of San Francisco, dating as far back as 1854, when the first club, known as the San Francisco Shooting Club, was organized, remaining in commission until about 1858. But the California Wing Shooting Club still is with us, as flourishing and more prosperous than ever, truly "a survival of the fittest."

It contains among its membership some of the best

On the present roster of the club we find such names as Mess, Haight, Turner, Reed, Murdock, Walsh, Nauman, Feudner, Prior, Terrill, W. J. Golcher, Prather, Havens, Capt. A. W. Du Bray, a recent acquisition of the club; (and one who has rarely missed being on hand for the first match of the season for twenty years), the favorite sportsman and admirable shot, Mr. Harvey McMurehy.

During the club's career its matches have been held in various localities around San Francisco; first, we believe, at Millbrae, formerly and better known by early day sportsmen as the Seventeen Mile House; at Bird's Point, Alameda county; San Bruno for a number of years (and where the best and swiftest birds were always to be found), at the Oakland race track, in Emeryville, and of later years at Ingleside, an admirable locality; from whence a move was made, last year, to the present shooting grounds at Stege station, on the Southern Pacific railroad line in Contra Costa county.

That the California Wing Shooting Club may continue to prosper and keep up its present excellent and active organization, in the days to come, is the sincere wish of its many friends and all true sportsmen as well.

California Wing Shooting Club.

The late Louis Rink (third from left) and John K. Orr (center).

field and trap shots on our Coast, sportsmen who are capable of "holding their own," as a body, in any company, and so admitted by sportsmen generally.

Its annual monthly matches are always fully attended and looked forward to by its members and invited guests with increasing interest, and those, as non-members, who are fortunate enough to be invited to participate on these occasions, anticipate with pleasure being present.

The club is particularly noted for its courtesy and well known hospitality to visiting, outside sportsmen, and of these "strangers within our gates" the members always made welcome.

So far as credible information is to be obtained at this late day, the California Wing Shooting Club had its origin in a club predating it by a few years, and known as the "Park Club," formed, we believe, about 1870. The members of this club shot their matches in a little valley, south of the present Golden Gate Park (and afterwards included within it), some eight or ten men forming the membership. Of all the original members, but one is now known to survive, and it is to this survivor, Mr. John Kerrigan, we are indebted for the above information.

After the dissolution of the Park Club, about 1872, a few of the members got together and formed the nucleus of what is now known as the California Wing Shooting Club, but known originally as the California Shooting Club.

Its first president was a Mr. William Clark; as far as known, there is a loss of records between 1872 and 1878, and no mention can now be made of the list of members, its officers, or where matches were shot by the club in the interval between these years.

Of the gun clubs of note, of the early days in San Francisco, may be mentioned the Cosmopolitan Club (organized some years prior to the California Wing Shooting Club) in 1861, of a large membership, who shot their matches at Hunter's Point and existed for eight or nine years; and was then followed by the California Wing Shooting Club in 1872, the San Francisco Gun Club in 1876, and later on a second Cosmopolitan Club, which shot the club matches at the famous San Bruno shooting grounds, admittedly the finest pigeon shooting locality in California. Mr. F. W. Maskey was a prominent member of this club and afterwards a member of the California Wing Shooting Club.

Some of the old timers of pioneer pigeon shooting days still remain with us, and among the old guard yet to the fore we may mention the names of Mr. Frank W. Maskey, P. J. Walsh, John Kerrigan, etc., still in the field and doing good work with the gun today.

Of a later date, we are glad to find quite a number of "good men and true" who still keep up the old reputation of the club, for its excellence in shooting, and we trust they may continue to do so for many years to come.

Fish Hatchery—It was announced recently that the government is to establish a temporary fish hatchery at Sparks, Nev., for the propagation of trout and other valuable fishes, and that the plant will probably be made permanent.

Carp In Demand—Sacramento fish dealers are elated over the fact that the heretofore despised Sacramento river carp is now bringing a good price in Eastern cities. The fish is not a favorite here, except with the Chinese.

Recently a carload of 40,000 pounds of carp was shipped to New York city. It is expected an order for ten carloads of carp will follow this initial shipment.

Through the efforts of the American Game Protective and Propagation Association, a hearing on the Weeks Bill for Federal protection of migratory birds has been secured for March 6 before the House Committee on Agriculture at Washington, D. C.

Although the matter of Federal protection of migrants has been agitated for years, it has never before been given a hearing, and it is extremely important that all those interested in the measure should take advantage of this opportunity and go to Washington to urge the passage of the bill.

Since many States refuse, or are unable to protect the birds during the breeding season, the only way they can be saved from extermination is for the National Government to step in.

A Volante Gun Club Pond.

A Producer of Many Sprig Limits.

Bear hunters of Spokane and vicinity are arranging for trips into nearby districts to bag some of the "big fellows." St. Joe and St. Maries river, the head of Wolf Lodge creek, above Clark Forks, Pend Oreille lake, between the Pend Oreille and Hayden lakes, at Hayden lake and along the Little North Fork in northern Idaho, afford many opportunities. The hunters use foxhounds, Airedale terriers, also collies.

RANDOM NOTES.

[By J. B. Thompson]

One can make no set rule which will conform to all youngsters about the age at which they are to be started in their course of training, preparatory to work afield with gun. The majority of sportsmen prefer to start their dogs as soon as they are able to trot along in the meadows, and break their way through stubble. If the pup has the strength for it, no harm will follow if you will, while he is only a romper, let development of instinct take precedence over training. While some are of the opinion that a dog can only learn when young, it is an erroneous idea, for some of the classiest shooting dogs today are animals that have never been subjected to a day's training, until they were almost three years old; and in some instances dogs have never had a day's work on game until they were five and up to ten years of age, and then made good.

I remember a bitch whose breeding escapes me, that was not put to work until she was seven years of age; but despite the handicap of lack of early experience, she was easily trained and became a valuable fielder. She had been owned by a lady whose husband had died when the bitch was a very young puppy, she kept the dog only as a companion. Growing into mature age it attracted attention on account of its wonderful physical beauty; the owner finally constnted to its being trained and the results were especially satisfactory.

Few of us could afford to raise up to such a ripe age before trying them out, but the oftener I look over the matter and the way dogs are bred today from classy ancestors, I am strongly inclined to wait until the dog is over eighteen months prior to getting them under the restrictions necessary for good field work. Many of the trainers are inclined to wait longer. Though this is meant to bear entirely on training in its true meaning, it must not be confused with developing instinct, which may commence signs of the pointing instinct until his third year; and it has been my privilege to meet up with many at an early age, and be kept up until you are pre-

that showed absolutely no visible signs, that they had any instinct bearing on quail—while quails were around them, running through coveys as if they did not exist, their whole intellect bent in search for rabbits or sparrows; and in many cases they never noticed these, just hunted on wildly with no apparent

Frank H. Ruhstaller's Light.
Pacific Coast Derby Winner, 1911.

interest in field life, except to run. I have seen hundreds of dogs make this kind of display during their first two years, when suddenly the divine spark, that had been dormant, rushed to the surface, and with it came great field ability. But few can wait this long, and few have that much confidence in the blood lines of a strain that are slow developers.

To the owner of only a few dogs, it must be very trying to be obliged to await on a youngster like the ones described, and with them it can hardly be expected. The man who owns a string has so many to select from for his shooting, he is able to tarry, and does not realize that the slow comer existed until he

come necessary in handling dogs whose dispositions are somewhat out of the ordinary.

Should we own only one dog, our minds are so centered on it that we feel almost slighted if the dog commits an error, and are really more apt to censure the pupil than if we had many to contend with. The more we become affiliated with dogs afield, the quicker we realize that what we thought in earlier days were faults, now assume the proportions of real virtues.

It must be that forty or more years back, the bolter must not have existed; or if he did exist, he was considered as absolutely worthless. I have before my mind an old work on sports afield, it was evidently published only a short time after the differences between the North and South had been settled. It treats on the subject of dog training, and many of its hints would be valuable to the amateur today. A lesson on teaching the pup obedience in responding to the voice or whistle of the master was very interesting. It went on to treat how to make the pup come in, etc., but finally it went to the point of where a dog ranged too wide, and could not be controlled at once, the best way to cure him of this despicable habit, as the author classed it, was to hide from the dog every five or ten minutes; if this did not break him in a few days, the animal was worthless, and never could be cured of ranging wide. How would the dog of today conform to this standard of judgment? How many great dogs would have never been known to exist, if this method of control and judging of merit was adhered to by everyone.

A young dog needs constant restraint applied, he is a firm believer in his own intellectual powers, and awaits continually for chances to display his putative prowess, in so much that a youngster of high strung field trial breeding exacts steady training for several years before we can call him a well trained dog. And this exhibits the reason why training too young means re-training with the classy fellow. But if the young one had been permitted to mature before he was placed under restraint, his retentive memory and quieted down nervous organism would have saved a lot of work. It is not reasonable to anticipate that many will heed the warning against train-

Two Of The Right Sort.

pared to begin the essential submission to the control of man. My reasons for leaning so strongly toward late educators are because the older the dog, if not too old, its mind is more retentive of lessons; and also, it has the strength to stand field work of the gruelling kind at the time of training.

The young dog learns rapidly, but is more inclined to forget, and while he has absorbed many useful lessons afield, and learned them well, the strain he has been put to in his early days frequently precludes his use at an age when the older dog is just getting ripe. When a very young dog displays great excellence, the average owner can hardly refrain from permitting him to work more than is actually good for him; so much so that when he reaches the age of four or five all the dash and snappy ways of working on game have gone and he remains a plodding old dog, only ordinary. But if he exhibited in his youth wonderful adaptness to game and his resources had not been drawn on so strenuously, at five he would be at the right age of strength and intelligent bird sense.

On account of the desire of sportsmen for early training hundreds of young dogs are condemned yearly as unworthy of work. No one can really try out a youngster at an early age; a precocious youngster of ordinary talents can shine brilliantly, and a dog that might later develop into a performer of real merit can be overlooked. Talent at an early age attracts, and with it its importance is magnified; whether in the child, horse or dog, we have a natural love for early manifestation of intelligence. But is it really a prophecy and reliable, of the future gifts? Go back to our old school days, and remember how some of the young ones put the older ones to shame by their early gain of knowledge; glance at them now as the class room has faded in the distances of time. Are they conspicuous in any way above their older classmates, who often received sneers on account of their slowness at learning? Take the standard bred horse of today. Is it always the two-year-old winner that shines above all others when by right of age he has reached the right to compete with the all age ones? So with the dog, many a great individual that has daily exercise on game has displayed no

begins to shine. Then he takes him in hand. Before his brilliancy cropped out, he was only tolerated because he came from certain favored ancestors. It is not solely luck that produces winners, but an absolute faith in breeding; a faith so strong that the ordinary disappointments of the start can not discourage, and with it training ability. It is pardonable in the young man who attempts to train dogs to be egotistical as far as his work is concerned, for it is an assurance of success. There must be mental dubitation, but an absolute certainty and an over strong self confidence, that there is no task in dog education that can not be mastered by him. It may be conceived as an assumption of superiority in this line; but it is pardonable, for it can only be attained

D. L. Crane's Joyeuse.
Second, Pacific Coast Derby, 1911.

by patient attention to the fine points of the game. The tyro or the amateur would do well in assuming it, and the phlegmatic stage, which is such a valuable assistance, will come with it. When he has reached this stage of self confidence in his ability to handle any pupil, he has mastered a lesson which will be-

ing too young; the companionship of a puppy is too eagerly taken advantage of, and early work in the field is the next step. But as not every pup has real class, and may not have gifts above the average run, in many cases it will be found that but slight damaging influence has been extreed by overworking him.

Repeatedly the sportsman asks which shall he use for field purposes, the dog or the bitch. Many at once claim greater amenableness for the bitch, greater intelligence and scenting powers. Of course nine out of every ten men prefer owning a dog, their environments obviate the possibilities of keeping a bitch, their quarters being limited; and nowhere can they keep them safely during the season of heat, from the consequent annoyances of the canine contingent in the neighborhood. Not the least disappointing feature, the chances of the female arriving in season when her services are desired in the field. Though science of late has donated to breeders a system without spaying of preventing the rutting season, I do not think that it has been tried sufficiently to warrant the wonderful claims made by its originators, and there has always been a doubt in the writer's mind of anything beneficial resulting from its use as a preventive. The old method of spaying had many advocates, certainly it prevented the return of the periods, but the majority of the females lost their vim, and consequent brilliant display, by being subjected to the operation.

It is very true, that if the average owner watched the bitches with more care, and took precautions, a female in season would not be such an abhorred creature, as she is from the following she attracts. The careful dog owner has none of these troubles with his females, he is all alertness for the first indications of heat; instead of letting her romp the neighborhood broadcasting the effluvia, he confines her securely, and none of the dogs around are any wiser about her condition. Some kennelmen in the cities go further; after confining the bitch, spray the quarters each day with strong coaltar disinfectants, preventing any of her scent escaping. But this part of the female's life has only an indirect bearing on her field qualifications—the curtailing of her useful-

The San Mateo Gun Club will hereafter be known as the Easton Gun Club. The club shoots will take place at Easton station on the second Sunday of each month, beginning tomorrow.

This organization has received a number of new members recently and will open the season under very good auspices.

One of the largest crowds of the season gathered at Kenton for a recent meet of the Portland Gun Club. Since the announcement of the Pacific Coast Handicap shoot in August interest has been on the increase, until now almost double the usual number of shooters go out to the meets. The scores out of 100 targets were: Cullison 94, Ellis 93, Abraham 92, Waguer 92, Young 90, Veatch 89, Morris 88, Knight 88, Holohan 87, Long 84, Rice 82, Steanek 82, Mrs. Koehler 82, Honeyman 80, Connell 80, Fay 80, Beck 80, Reid 80, Carlson 79, Sequin 76, Love 78, Bakman 77, Mathews 76, Fay 76, Price 74, Stone 74, Loomis 74, Beesman 74, Zimmerman 72, Cofoid 70, Jones 69, Negro 68, Joy 68 and Lown 60.

At an enthusiastic meeting of Oregon sportsmen the Albany Gun Club was organized lately. Grant Froman, county recorder of Linn county, was elected president of the club, and other officers were chosen as follows: Vice-president, W. G. Ballack; secretary, Frank Tracy; treasurer, Neil Bain; field captain, W. E. Parker; executive committee, F. A. Hackleman, Grant Froman, W. G. Ballack, Philip Baltimore and Frank Tracy.

The club proposes to hold regular shoots on the first and third Fridays of each month. The executive committee was instructed to get suitable grounds at once. It is planned to hold the first shoot in about two weeks. The Interstate Association rules were adopted to govern the club in its shoots.

The regular weekly shoot of the Los Angeles Gun Club was held on February 18, states the Times, on the club's grounds at Venice, twenty-one shooters facing the traps. Four 25 target events were shot, and some good scores were made. The members who shot 90 per cent or better were: J. F. Mallory, R. H. Bungay, William Pugh, J. R. Converse and Ed Mitchell, Mr. Mallory finishing high man with 96 per cent. Mrs. Thomas also shot very well, scoring 69 out of 75 targets.

Harvey McMurchy, one of the oldest traveling gun salesmen in the country, and a splendid shot either at targets or live birds, was a visitor to the grounds. He made a score of 89 out of 100, and did it, too, without apparently extending himself. Mr. McMurchy has a host of friends on the Coast and is given the glad hand wherever he goes.

Several new members were taken into the club. The organization will make an effort to increase its membership by at least 100 before May 1. Members of the different duck shooting clubs will be especially invited to visit the grounds and take part in the shoots. In this way they can keep their shooting eye good in the off season, with the result that the bird limit will come easier next fall. The scores follow:

Table with 2 columns of names and scores. Targets: 25 25 25 25. Dr. Thomas: 17 15 20. Miller: 16 20 19 20. Mrs. Thomas: 23 23 23. Mallory: 24 25 24 23. S. A. Bruner: 22 19 20 24. Jamison: 6 10 15. McMurchy: 24 20 23 22. Pugh: 23 22 23. Peterson: 13 24 19 21. Hall: 11 12 19 12. Groat: 11 19 19 15.

E. E. Young of Portland, Hugh Fleming, E. Ellis and Less Reed Sr. tied for high score of the day, each having 90 out of 100 targets to his credit in the shoot of the Seattle Trap Shooters' Association, on February 18. Ike Fisher was second with 89. Less Reed Jr. was third with 88. E. E. Young and A. Z. Smith were the out of town visitors.

In a 25 target special match, Hall, Fisher and Hambright tied on 21 apiece. Fisher won in the shoot-off. The scores were:

Table with 2 columns of names and scores. E. E. Young: 100 90. Hugh Fleming: 100 90. E. Ellis: 100 90. Less Reed, Sr.: 100 90. Ike Fisher: 100 89. Less Reed, Jr.: 100 88. Clewly: 100 85. Vallen: 100 83. Ruppe: 100 80. Hall: 100 78. Hambright: 100 76. Ross: 100 69. Ulverstad: 100 64. A. Z. Smith: 100 59. Stadtfeld: 100 55. Hartley: 60 31. Campbell: 45 31.

In one of the final matches of the United States Revolver Association's indoor tournament at the Portland Revolver Club's headquarters the local club rolled up two scores calculated to bring the club out on top. Springfield, third in the league at present, must surpass a score of 1142, while against Oakland, one of the minor teams, Portland made 1117.

The Vancouver, Wash., Gun and Protective Association has been organized with a membership of 37. Officers elected are: Dr. R. D. Wiswall, president; Otto Zumsteg, secretary-treasurer, and Frank Wilcox, manager. George M. Bordeau was chosen chairman of the committee to prepare a constitution and by-laws. The association will try to secure 100 members and have them appointed each deputy game wardens.

Bank Jackson's Napa Soda.

BALLADE OF YE ARMORER PRICE.

[By Watts Dewin.]

Pete Ashcroft had two guns they say, Two guns had he, for his delight. He oiled and cleaned them all the day, And rubbed and wiped them all the night. His Parker, like summer's day, was bright— And Smith! roses dipped in wine. But though they were a goodly sight No gun is so fair as mine.

Guns, other, caused a grievous fray, And Hop Lee's pump points right. Good Clabrough in field holds sway, With gunsmith's skill bedight. My wonderment these guns invite, Their comeliness it is divine. And yet I say in their despite, No gun is so fair as mine.

Guns other caused a grievous fray, Nor with 'em could brave men fight. The noise they made turned Joe Rice gray, And put stout hearts in woeful plight. Then here no rhymes will I indite, For these no garlands will I twine. 'E'en tho' Schultz fails his bed at night, No gun is so fair as mine.

L' Envoi.

du Pont, king of smokeless might, Who at Wilmington dost recline, Do I not tell the truth aright? No gun is so fair as mine.

W. W. Richards' Catch of San Lorenzo Creek Trout.

Big Bluejay Shoot—A big bluejay shoot is to be held between Lincoln, Auburn, Loomis and Newcastle some time in March. Dr. C. H. Blemmer of Loomis is arranging the shoot, and any one in the State is at liberty to enter. Ten good shots from Loomis will shoot against any ten from Lincoln, Auburn or Newcastle for a banquet, the losers paying for the feed. It is expected the Lincoln Gun Club will take the offer up. A big crowd will be expected from Sacramento and other places.

DOINGS IN DOGDOM.

The annual bench show of the Portland Kennel Club will be held in the basement of the Yeon building, April 3 to 6. The directors in session recently accepted a donation offer by J. B. Yeon. Entries will close on March 23.

Further confirmation of the probability that Portland will obtain the Airedale Futurity Club exhibit for the local show was contained in a letter from G. F. Downer, of Butte, Mont., who declared that he figured Portland as the most suitable city on the circuit.

The board of directors of the Oregon State Fair are considering the advisability of giving a dog show during the State Fair. If the dog owners of the State offer sufficient encouragement, this feature will be added to the annual Fair.

The report of the fourteenth annual bench show of the San Francisco Kennel Club last week was crowded out at the last minute but will appear next week.

Peters Points.

On February 12 the rifle team representing the Cuyahoga Rifle Club in the N. R. A. Inter-Club Matches, made a score of 994 out of a possible 1000, equaling the world's record. The individual scores of the team are as follows:

F. C. Fry 200, J. J. Mumphrey 200, M. M. Foster 199, W. C. Andrews 198, G. L. Hale 197, making a total of 994.

The entire team used Peters Factory loaded 22 cal. Long Rifle Semi-smokeless cartridges and all declared these loads to be as near perfection as anything could possibly be.

At the annual tournament of the 22 cal. Indoor League of the U. S. at Brooklyn, N. Y., February 3 to 10, Peters 22 cal. Semi-smokeless cartridges kept up its great record of winnings covering the past fifteen years. In the Continuous Match, Expert Match, Bullseye Match and Honor Target, shooters using Peters cartridges won or tied for first place in each. In addition to this, they won second, third and fourth in a number of matches, scored the highest and second highest number of bullseyes and won the most premiums. A still further evidence of the superiority of this famous ammunition, evidence that is perhaps the most conclusive of all, is the fact that 60 per cent of all the contestants used the original and only Semi-smokeless kind as manufactured by the Peters Cartridge Co.

CALIFORNIA LIVE STOCK BREEDERS' ASSOCIATION.

One of the best annual meetings ever held by this sterling organization took place at the Palace Hotel last Saturday. There was an attendance there of the principal men interested in animal husbandry, and the able address of President Peter J. Shields was listened to with marked attention. It was one of the ablest and most comprehensive ever delivered at a meeting of this kind. In part he said:

"This association, during the ten years of its life, has exerted a great influence for constructive advancement in the State. Since the inception of the society we have witnessed astounding developments in the agricultural districts of California. The determination to have the best has spread everywhere.

"The association has so far done much good. One agitation I might mention that we have taken a vital interest in is the pure food movement, for no class of men look more eagerly for agitation and legislation for pure foodstuffs than the class of men who support this organization. We clearly realize that impure foodstuffs placed upon the market directly serve to cheat the agriculturist, whose first aim is to produce pure foods.

"There are in the neighborhood of 31,000 men and companies in California maintaining dairy stock, and this association, acting as a unit for these men, can make California the greatest stock section on earth. Particularly can we now plan an unexcelled live stock show in San Francisco in 1915. It can be made the greatest live stock exhibit the world has ever seen."

As the first step toward achieving the purposes outlined by President Shields, the association adopted new by-laws designed to take in all classes of live stock breeders, and a new system of dues was adopted. The amended by-laws call for membership dues according to the number of stock owned by a member, the minimum dues being fixed at \$5 a year and the maximum at \$10. District societies also can get membership and be entitled to delegates at the meeting of the State organization by the payment of fixed annual dues.

Mayor James Rolph Jr., and Mayor Mott, of Oakland addressed the meeting. Mayor Rolph said in part:

"This city is delighted to welcome you. I am somewhat of a stock breeder myself. I raise Holstein cattle and Cocker spaniels. There is talk afoot the exposition directors of a live stock exhibit. I trust you will see to it that the 1915 live stock show at the exposition is the best that the world has ever seen, and while from the bottom of my heart I greet you now, this greeting is nothing to the one you will get here in 1915."

Mayor Mott made a brief address of welcome also. E. W. Howard of San Francisco was elected president of the association after a spirited contest, at which three ballots were taken before any candidate received a majority of the votes. Judge Shields declined a re-election.

Addresses were made in the morning and afternoon by T. W. Tomlinson, of Denver, Colo., secretary of the National Live Stock Association; Dr. Charles R. Keane, State Veterinarian; George M. Hyland, of Portland, Ore., and S. A. W. Carver, of Los Angeles. live stock men and stated that Moore and the directors of the Panama-Pacific International Exposition, acting as the personal representative of President C. C. Moore, addressed the evening session of the live stock and stated that Moore and the directors were heartily in sympathy with the aims of the association and would do all in their power to further them.

Edward Rainey, secretary to Mayor Rolph, made an address, welcoming the members to the city, and H. A. Jastro, president of the National Live Stock Association, spoke on the magnitude and importance of the live stock industry.

D. O. Lively, of Portland, Ore., spoke of the industry in the Pacific Northwest, and the "Pacific Coast Spirit" was the subject of an address by George M. Hyland, of Oregon. William H. Saylor spoke on the importance of dairy exhibits at the 1915 exposition. Judge Shields presided and made an able opening address, in which he said that agriculture is the greatest thing in the world, and pointed out the fact that, in California alone, \$100,000,000 is the value of the products and by-products of live stock annually.

ATHASHAM 2:09 1/4.

There may be better made, better bred, scunder and more intelligent trotting stallions in California than Athasham; there may be some that have won harder fought races on the Pacific Coast and more of them; there may be some that have sired better locking or more promising colts and fillies, but a three years' recent search throughout California will not reveal them. He is by Athadon (1) 2:27, a wonderful sire for his opportunities, out of the great broodmare Cora Wickersham (also dam of Donasham 2:09 1/4 and Nogi 2:10 1/2), by Junio 2:22 1/2, one of the largest, finest looking, and purest trotting-gaited sons of the immortal Electioneer. Mr. D. L. Bachant, owner of Athasham, has placed his service fee at the low price of \$25 for approved mares, and should have no trouble in getting his book filled. Athasham will make the season of 1912 at the Orchard Farm, Fresno. Owners of broodmares should go and see him and the colts and fillies he has sired. They are the best advertisements as to his prepotency as a sire.

THE FARM

INDIVIDUALITY OF A COW AS A FACTOR IN ECONOMIC MILK PRODUCTION.

Economy in milk production is of prime importance both to the producer and to the consumer. Examples of the wide range in the cost of the production, due, to a large extent, to the individuality of the cow, have been previously given in this series. The cause of this difference in individuality has been studied by the Missouri Station, where careful comparisons were made of good and poor cows. Two Jersey cows from the same sire were found to digest their feed equally well, and both required about the same amount of feed for maintenance.

The real cause in the difference in production was found to be in the amount of feed consumed above that required for maintenance. During the year the better cow consumed 3,424 pounds of grain, 2,904 pounds of hay, 3,778 pounds of silage, and 4,325 pounds of green feed. The other cow consumed 1,907 pounds of grain, 1,698 pounds of hay, 5,088 pounds of silage, and 2,102 pounds of green feed. In general, the better cow consumed 1.7 pounds of feed for one pound consumed by the other cow, and produced 2.67 pounds of milk and 2.77 pounds of fat for each pound produced by the inferior cow. The better cow consumed 3.27 pounds of grain per day for maintenance, and the other 2.92 pounds. Both took hay and silage in the same proportion. The better cow required for maintenance for the entire period 1,200.8 pounds of grain, 904.5 pounds of hay, and 4,818 pounds of silage, which left available for milk production 2,293.2 pounds of grain, 1,699.5 pounds of hay, 3,960 pounds of silage, and 4,323 pounds of green feed. The inferior cow required for maintenance 1,065.8 pounds of grain, 1,065.8 pounds of hay, and 4,292.4 pounds of silage, leaving available for milk production 341.2 pounds of grain, 632.2 pounds of hay, 795.6 pounds of silage, and 2,102 pounds of green feed. These figures show the large amount of feed left for milk production in the better cow, which was 8,522.9 pounds of milk, containing 5.51 per cent fat. The other cow produced 3,188.9 pounds of milk, containing 5.31 per cent fat.

Data are presented of two other cows kept for an entire lactation period under identical conditions as those above described. The feed consumed during the lactation year, minus the estimated maintenance, is the amount considered available for milk production. The ratio between the feed available for milk production and the milk produced is practically the same with each of the four cows. The available feed consumed and the milk solids produced are also calculated in calories in order to reduce all to a common basis. The main difference between profitable and unprofitable dairy cows is not to be found in the coefficient of digestion, or in the amount of feed required for maintenance. A superior dairy cow is simply one with a large capacity for using food above the maintenance requirement and one that uses this available feed for milk production.

A further illustration of the difference in the individuality of cows is shown in the records of a herd kept at the New York State Station. The best cow in the herd averaged 10,150 pounds of 4 per cent milk annually for three years on \$58 worth of feed. The poorest cow averaged 3,350 pounds of 5.85 per cent milk on \$52.40 worth of feed. If in one year the poorer half of the herd had been replaced by animals equal to those in the better half, it would have increased the yearly station revenue \$237.40, if the milk had been sold at current shippers' prices, or \$379.90 if the milk fat had been sold, with an added expense of only \$40, the cost of the extra feed consumed by the better cow.—Farmers' Fulletin 465.

It is much easier to start with stock that is a proven success than it is to breed up. The latter is a costly as well as tiresome experiment.

MORRIS & SONS IMPORT HOLSTEINS.

Frauk Morris, of A. W. Morris & Scns, has just returned from the East with four carloads—85 head—of fancy Holsteins for their registered herd near Woodland, which is probably the largest and best in the State. These were imported from Syracuse, N. Y., Minneapolis and Buckingham, Idaho, and include some of the finest heifers ever brought into the State. Among the two-year-olds, two just completed a seven-day test, is one with a record of 25.40 pounds of butter, 80 per cent fat, and the other with 20.25 pounds. Morris & Sons are making some interesting yearly tests, which threaten to establish new records. One cow, Riverside Sadie De Kol Burke, just completed a test of 365 days, with a record of 26,050 pounds of milk, and 975 pounds of butter, 80 per cent fat. Aurelia De Kol, who won the prize in the milking contest at the State fair last fall, has completed seven months of the year's test and promises to considerably exceed the above record.

The Ballard Company has an exceptionally fine herd of Rambouilletts this spring. The company is putting out 160 acres more to alfalfa for hay and pasture.

T. B. Gibson, of the Roselawn Stock Farm, reports a very strong demand for sborthorns and says that his herd is practically sold out.—Rural Press.

The person who raises good stock need have no fear about prices. First class fowls always bring good prices, no matter how great the surplus of ordinary stock is.

It is a noticeable fact that few improvements have been made in recent years on the old standard breeds. Conservative raisers and dealers still prefer the old standbys.

FOR SALE.—Maud Jay C., the dam of Nearest McKinney 2:13 3/4, and also El Angelo by The Angelus 2:07 3/4, at Banta, and another very promising colt by Star Pointer at Eureka that is a whirlwind pacer. She also has a filly by Bon McKinney that cannot be beaten. Maud Jay C. is a beautiful mare having color, size and conformation. She is a fine roadster and a lady can drive her. She was bred to Tom Smith 2:13 1/4 in 1911, but failed to get with foal. Maud Jay C. is registered standard. She was sired by Nearest 2:22 1/2 out of Fanny Menlo, dam of Claudius (4) 2:13 1/2 by Menlo 2:21 1/2; second dam Nelly Anteeo by Anteeo 2:16 1/2; third dam Fanny Patchen (dam of California Nutwood, a sire) by Geo. M. Patchen Jr. 2:27. As a broodmare she is destined to be one of the greatest if her four foals are any criterion. I will price her very reasonably. For further particulars, address

Gombault's Caustic Balsam

The Worlds Greatest and Surest

Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS I

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cauctery or Firing. Invaluable as a CURE for

FOUNDER,
WIND PUFFS,
THRUSH,
DIPHTHERIA,
SKIN DISEASES,
RINGBONE,
PINK EYE,
SWEENEY,
BONY TUMORS,
LAMENESS FROM
SPAVIN,
QUARTER CRACKS,
SCRATCHES,
POLL EVIL,
PARASITES.

REMOVES

BUNCHES or
BLEMISHES,
SPLINTS,
CAPPED HOCK,
STRAINED TENDONS.

SAFE FOR ANYONE TO USE.

NOTHING BUT GOOD RESULTS.

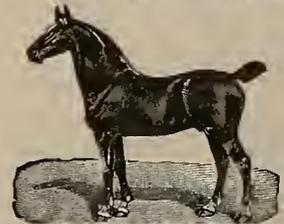

Have used GOMBHAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. RAYMOND, Prop., Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBHAULT'S CAUSTIC BALSAM for ten years; have been very successful in curing curbs, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—E. C. CHASE, Training Stables, 390 Canaloga Street, New York City.

We guarantee that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin mixture ever made. Every bottle sold is warranted to give satisfaction. Write for testimonials showing what the most prominent horsemen say of it. Price, \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

Colt Distemper

You can prevent this loathsome disease from running through your stable and cure all the colts suffering with it when you begin the treatment. No matter how young, SPOHN'S is safe to use on any colt. It is wonderful how it prevents all distempers, no matter how colts or horses at any age are "exposed." All good druggists and turf goods houses and manufacturers sell SPOHN'S at 50c and \$1.00 a bottle; \$5.00 and \$10.00 per dozen. All druggists and manufacturers.

SPOHN MEDICAL CO., Chemists and Bacteriologists, Goslen, Ind., U. S. A.

IN THE FIELD MAKING MONEY—

or in the Barn Wasting It

Whether your horses work or not, their feed costs you big money. When a horse is laid up you not only lose the cost of feed, but also the profit that the horse would have paid if able to work in the field. Since there is no way to prevent spavin, curb, splint, ringbone, sprains and lameness, your thought should be given to the quickest, surest and most economical cure. And for over 35 years, thousands of horsemen have depended on Kendall's Spavin Cure. It's the old, reliable, safe remedy that has saved thousands of dollars' worth of horse flesh, to say nothing of the worry, time and trouble it has saved horse owners. You should get and keep a bottle of—

Kendall's Spavin Cure

for emergencies. You never can tell when you'll need it, and when the time does come, you'll be mighty glad you had the foresight to prepare. Here are samples of the thousands of letters we receive from grateful horse owners every year. Mr. J. J. Sandlin, New Hope, Ala., writes:—"I am a great believer in Kendall's Spavin Cure. A few applications have just taken an unnatural growth off my horse's back, thereby increasing his value \$25.00 at least." Mr. J. B. McCullers, Haleyville, Ala., writes:—"Last July I bought a mule for \$35.00. He had a bad spavin and was unable to work but after using three bottles of your Spavin Cure, I cured it and he was sold in March for \$180.00. I advise all horse owners to use Kendall's Spavin Cure." And Mr. Wm. Booth, of Grovetts, Ark., writes:—"I have cured both Blood and Bone Spavins, taking the bunch all off and leaving the horse as sound as he ever was. The

horse does not need entire rest while using Kendall's Spavin Cure. Light work and careful handling are better than standing in the barn. If the horse was in the pasture not many people would take proper care of him. I use the Spavin Cure a week at least, sometimes three, according to the severity of the trouble. There is enough in one bottle to cure three large Spavins if used according to directions. It is excellent for bruises, both for man and beast. Your Spavin Cure will cure Thoropin in a hurry. With over twenty years' experience with this remedy I know what I say to be true. If one doubts my word he may bring me a horse with a Blood Spavin on one leg, Bone Spavin on the other and Thoropin on both and I can make him a sound horse in six months. What I have done I can do again and what I have done others can do."

Why experiment with other remedies—when you know what Kendall's has done and can do. You can get Kendall's Spavin Cure at any druggist's, \$1.00 per bottle, 6 for \$5.00. Ask for free book. "Treatise on the Horse," or write direct to

Dr. B. J. Kendall Company, Erosburg Falls, Vt., U. S. A.

A warm, soft ration gives the layers a good start for the day during the winter months, as the soft food is soon digested and the hen begins scratching for something to fill her empty crop.

Corn should form the main proportion of the food for chickens on a very cold day, as the hens then require a food that will not only be serviceable in producing eggs, but also creating heat.

Hens should not be compelled to drink ice water. It is impossible to keep the water warm on a cold day but if a pan of warm water be placed before the fowls three times a day it will answer the purpose.

GOOD ONES FOR SALE.

PAL (2) 2:17½, standard bred trotter, 5 years old. Sired by Palite 45062, dam Lorna D. by Bayswater Wilkes; second dam Bee Sterling (dam of 4 trotters with records better than 2:15 and Nat Higgins, trotting (3) 2:20) by Sterling; third dam Flash (dam of 6 in the list) by Egmont. Pal will be a good purchase for anyone looking for a young stallion of good breeding, good individuality and all qualities of a race horse.

NAT HIGGINS, 4 years old, record 2:20 trotting made as a three-year-old. Sired by Palite 45062; dam Bee Sterling, breeding same as above.

SORREL MARE, 4 years old, with a time record of 2:24½, made pacing as a three-year-old. With 90 days' work showed an eighth in 16 seconds. Goes light, no bopples. By Palite 45062; dam Babe by Dawnlight; second dam Bee Sterling, as above. A full sister to this filly stepped a mile last year in 2:14 at San Jose. This mare is handsome, kind, and gentle and will step a mile in 2:10.

TWO-YEAR-OLD sired by Palite; a good-gaited trotter; entered in the Futurity Stakes and can step fast. Dam Paprika, who stepped a mile in 2:16 as a three-year-old, by Oro Belmont 2:15½; second dam a producer by Anteeo; third dam by Alexander; fourth dam by Williamson's Belmont. A good prospect in the Futurity Stakes.

THREE-YEAR-OLD CHESTNUT GELDING, full brother to the above; trotted a mile in his yearling form in 2:43 and is trotting fast now. Entered in the Futurity Stakes. Another good prospect.

FOUR-YEAR-OLD FULL BROTHER to the above. This colt stepped a mile as a two-year-old in 2:31 with a short season's work.

LOULIA, a standard bred 4-year-old filly by Nushagak, sire of two 2:10 performers, dam by Nutwood Wilkes, dam of 3 in the list; second dam Woodflower (dam of Prince Ansel 2:20 at 2 years old and Seylex 2:15½) by Ansel; third dam Mayflower 2:30½ (dam of Manzanita 2:16 and Wildflower) by St. Clair. This mare is soon to foal to McFadyen.

TWO-YEAR-OLD BROWN FILLY by Carloklin; dam Trub (trial 2:12 at 4 years) by Searchlight; second dam Bee Sterling, etc. This filly is entered in all of the stakes and is trotting nicely now with the short workouts she has had. She is very handsome and will make a valuable mare.

Besides the above, I have some nice yearlings, all entered in the stakes. Will be pleased to show the above to prospective purchasers. Call on or address **E. D. DUDLEY, Dixon, Cal.**

SPECIAL ADVERTISING.

Wanted, For Sale, and Miscellaneous advertising under this head will be set in nonpareil type (same type below) and will be published at the rate of 2 cents per word each insertion, or 6 cents per word by the month. Count each abbreviation and initial as a word.

FOR SALE.—Mike C, bay gelding, pacer; sired by Sidney Dillon. Has only raced in amateur races. Good prospect for the circuit. For particulars, write **J. RYAN, Sonoma, Cal.**

CLOSING OUT.—Sixty head of young mares and mules. One four-year-old, two-thousand-pound Percheron stallion. Might consider some trades. **FARNSWORTH, R. D. 3, Bakersfield, Cal.**

FOR SALE, CHEAP.—One registered stallion, sired by McKinney 2:14½; 8 years old; sound. Also one imported draft registered stallion; weight 1800 pounds; 7 years old. Would consider trade on heavy mare or standard-bred mares, or fillies. Breeding and pictures sent to interested parties. Address **D. A. BAKER, Hill P. O., San Diego, Cal.**

WHO WANTS THIS GOOD COLT?—Lynwood Ayers, 2 years, by Lynwood W. 2:20, out of Irene Ayers, full sister to Jasper Ayers 2:09 and May Ayers 2:25. Irene's trial 2:32 at 3 years, ten weeks off pasture. Lynwood Ayers is entered in Breeder Stake No. 10; also Stanford Stake for 1913. Will sell Lynwood Ayers for \$200. If I don't sell him will sell his entry for what it cost me—\$33.00, I paid into the above Stakes. He is nicely broken; never trained, but very promising. **H. T. OWEN, 921 Oregon St., East Bakersfield, Cal.**

FOR SALE.—Beautiful Trotting Mare; color brown; coming 5 years; dam by Zombro; full sister to Zomalto; very promising fast trotter; has only been worked the last 3 months and can trot close to 2:20 on mile track. She is also a fine roadster; city broke.

Registered Electioneer-Wilkes mare; bay; coming 7 years; by Expedition; dam by St. Vincent; second dam by Guy Wilkes; third dam by Baron Wilkes; fourth dam by Geo. Wilkes. She was bred by C. W. Williams of Galesburg, Ill. Is a fine driver and has speed. Should make an excellent brood mare.

No fancy prices asked. Write to **E. P. BINDER, 1364 West 5th St., Riverside, Cal.**

FOR SALE.

To Dissolve Partnership—This Grand Lot.

BEATRICE ZOMBRO, handsome bay mare, 16 hands high, weighs 1150 pounds. Is seven years old and has a foal by Carloklin 2:07¾. With very little work she showed 2:20 speed as a three-year-old. Sound and gentle. Sired by Zombro 2:11; dam Athetine 2:16½ (dam of Copa de Oro 1:59 and Crescendo trial 2:13½, etc.). Standard and registered; a regular breeder. Zombro mares are exceedingly scarce and there are few to be bought which are as well bred or perfect as Beatrice Zombro.

CONSUELO B., by Del Coronado 2:09½, a handsome three-year-old dark brown colt; good gaited; will do to race. Entered in Occident and Breeders' Futurity stakes. Only trained six weeks, trotted in 2:35, last eighth in 18 seconds. This colt is also out of Athetine 2:16½ (dam of Copa de Oro 1:59; Stallie 2:21¼, etc.) by Patron 2:14¼; second dam Athene (dam of 2) by Harold 4:13; third dam Minerva (dam of 2) by Pilot Jr. 12; fourth dam Bacchante Mambriño.

FULTON G., by Carloklin 2:07¾; a two-year-old bay colt; good size and a perfect type. Entrance on him is paid up in Oregon Breeders', California State Fair's Occident and Stanford stakes and the Camfield Clark stakes. Good gaited and level headed. Came off pasture December 1st, trotted in 2:39½, last eighth in 18½ seconds on February 16th. Sound.

HASTINGS, bay stallion, four years old, by Del Coronado 2:09½; dam Sappho 2:15½ (trial 2:08) by Robert McGregor 2:17¼ (sire of dams of Jay McGregor 2:07¼, Grattan Boy 2:08, Elmore 2:08½, York Boy 2:08½, Blizard 2:09½, etc.); second dam Pauline (dam of Sappho 2:15½ and three sires) by Ashland Chief 7:1, son of Mambriño Chief 11; third dam Rosa by Abdallah 15. With very little training trotted in 2:16 last year in July; he will trot in 2:10 this year if given an opportunity. Has no record. Is perfectly sound. Stands 15.3 hands, and when matured will weigh 1200 pounds. He is a remarkably handsome stallion of show horse type. Standard and eligible to be registered. His breeding is of the stoutest and best. By one of McKinney's greatest race-winning and choicest bred sons, out of one of Robt. McGregor's fastest daughters, and she out of a famous speed-producing mare. Hastings should, when his days of racing end, be invaluable as a sire of handsome, stylish, perfect trotting horses.

WILKES BOY JR. 3855½, brown stallion, sired by Wilkes Boy 2:24½; dam Carona by Liberty Bell 2:24 (son of Bell Boy 2:19½ and Prefix by Pancoast, etc.); second dam Camo (dam of Aurita 2:25½, Carnation 2:26½, and Axewood, sire of 3) by Nutwood 2:18¾; third dam Candace (dam of Albert Lee 2:26, a sire) by Harold; fourth dam Fairy Belle (dam of 2) by Belmont 64; fifth dam Waterwitch (dam of 6) by Pilot Jr. 12, etc. As can be seen, he is one of the best-bred stallions in America. He is nine years old; stands 15:2½ hands; weighs 1080 pounds. Has never been trained, but can show a 2:10 gait. Is good gaited; does not wear boots and does not pull.

As stated above, these horses are to be sold to dissolve a partnership and are priced extremely low. They can be seen at Los Angeles.

For further particulars, address **W. G. DURFEE, 2019 So. Figueroa St., Los Angeles.**

DISPERSAL SALE.

I must move owing to the sale of my property, consequently must dispose of all my horses, a list of which follows:

Zomstein, a very handsome four-year-old bay pacing stallion by the great Zombro 2:11; dam by Steinway. He has had very little work, but can pace halves in 1:06 and quarters in 31¾ seconds. This fellow is sound, gentle, and is a good-gaited, good-beaded horse and will do to race.

Zonie Secretary, a two-year-old black trotting colt by Zombro; dam by Secretary. Is well staked and will do to spend some money on. He has been a mile in 2:45, last half in 1:20, last quarter in 37¼ seconds. This fellow is entered in all the stakes on the Pacific Coast.

A yearling, full sister to Zonie Secretary, is a very handsome baby and is also staked throughout the West.

Zonie Gray, two-year-old gray colt by Zombro; dam by McGrath, has been a quarter in 40 seconds and is also staked.

High Pride, a very handsome stallion by Judge McKena, out of Whisper (dam of Zombro 2:11), is as handsome as his dead brother and acts like as good a trotter.

A yearling, full sister to Lady Garland, three-year-old, trial 2:14½, and five weanlings by The Bondsman, Zombro, etc.

For further particulars, prices, etc., address **GEO. T. BECKERS, 3727 So. Figueroa St., Los Angeles.**

SANTA ROSA RACE TRACK.

THE OUTLAW.

[Charles Badger Clark, Jr., in Pacific Monthly]
 When my loop takes hold on a two-year-old
 By the feet or the neck or the horn,
 He kin plunge and fight till his eyes go white.
 But I'll throw him as sure as you're born.
 Through the taut rope sing like a banjo string
 And the latigoes creak and strain,
 Yet I've got no fear of an outlaw steer
 And I'll tumble bim on the plain.

For a man is a man and a steer is a beast,
 And the man is the boss of the herd;
 And each of the bunch, from the biggest to least,
 Must come down when he says the word.

When my legs swing 'cross on an outlaw hawse
 And my spurs clinch into his hide,
 He kin r'ar and pitch over hill and ditch,
 But wherever he goes I'll ride.
 Let 'im spin and flop like a crazy top,
 Or fit like a wind-whipped smoke,
 But he'll know the feel of my rowelled heel
 Till he's happy to own he's broke.

For a man is a man and a hawse is a brute,
 And the hawse may be prince of his clan,
 But he'll bow to the bit and the steel-shod boot
 And own that his boss is the man.

When the devil at rest underneath my vest
 Gets up and begins to paw,
 And my hot tongue strains at its bridle-reins,
 Then I tackle the real outlaw;
 When I get plumb riled and my sense goes wild,
 And my temper has fractious growed,
 If he'll hump his neck just a triffin's speck,
 Then it's dollars to dimes I'm throwed.

For a man is a man, but he's partly a beast—
 He kin brag till he makes you deaf,
 But the one, lone brute, from the West to the East,
 That he kaint quite break is himself.

The farmer who gives his fowls the same careful attention that he does his horses and cattle is the farmer who always has money to spend during the dull winter months.

The poultry business requires study and constant attention, the same as any other business. First efforts are rarely ever successful.

TRIANGLE TRIP

OVER THE

Northwestern Pacific Railroad

One of the most delightful scenic one-day jaunts in America.

150 miles of Mountain and Redwood Forest Scenery, a Boat Ride on San Francisco Bay and by rail along the Russian River.

Leave San Francisco 7:45 A. M. daily except Sunday, and 8:45 A. M. Sunday only, by boat across the Bay of San Francisco, in full view of the Golden Gate to Sausalito (the Sorrento of America). Thence via picturesque San Rafael and thriving Petaluma (home of the chicken industry), through Sonoma Valley to Santa Rosa and Fulton. From Fulton, through magnificent mountain scenery and redwood forests and along Russian River, to Monte Rio. Return is made along the coast, passing Tomales Bay, Point Reyes, San Anselmo, etc., to Sausalito, arriving at San Francisco 7:35 P. M. daily the same evening.

If preferred, trip can be reversed, leaving San Francisco at 8:15 A. M. via the coast to Monte Rio and returning along the river and through the valleys, arriving at San Francisco 7:35 P. M. daily except Sunday and 7:05 P. M. Sunday the same evening.

Round Trip Fare for Triangle Trip, \$2.80, except on Fridays or Saturdays, it is \$2.50 and on Sundays only \$2.20.

Tickets on sale at 874 Market Street (Flood Bldg.) and Sausalito Ferry Ticket Office.

Mailed Free to Owners, Trainers and Managers, Only.

Troy Chemical Company, Binghamton, N. Y.:

Gentlemen: My Morgan mare was very lame from bone spavin on both hocks. I was told by my liveryman that there was no cure. She is a splendid roadster, and afraid of nothing. I noticed your advertisement and wrote for your book. With a promise from my livery stable owner (Wm. Henry, Madison st., Brooklyn) that he would personally apply it, I bought a bottle. It has not only taken the swelling down, but she has not shown a lame step since. I am more than delighted with the results. Mr. Henry (an old horseman) says he will never say bone spavins cannot be cured, for my mare shows what Save-the-Horse can do.

Yours truly,

January 4, 1912.

W. E. ATKINS.

Nassagaweya, Ont., Dec. 11, 1911.

Troy Chemical Co., Binghamton, N. Y.:
 Dear Sirs: Last June I purchased one bottle of Save-the-Horse to cure a bog spavin and thoroughpin which I drew on while stoning with a stone machine and after a cure had been affected I had one-third of the bottle left.

I went West this fall and two days after I was gone she stumbled and fell while playing in a rough pasture field. The veterinary blistered and poulticed her until I came home; that is two months ago, and she was still unable to put her foot under her. The veterinary said it was a rupture in the coffin joint as near the toe as it was possible to get. When I came home I discarded his treatment and used the remainder of Save-the-Horse and she is nearly sound. This mare is a dapple-gray Percheron, three years old, and weighs 1500 pounds. Please send me your opinion and another bottle of your cure from your Toronto office. Yours truly,
 ALEX CRAWFORD.

West Barnstable Jan 1, 1912.
 Troy Chemical Co.
 Dear Sirs: Enclosed find check for five Dollars please send me one bottle of Save the Horse Spavin cure. How would a bad bone spavin on a horse 18 year old and a splint on some hind and limb it the best remedy out.
 Yours truly
 Herbert W. Parker
 West Barnstable
 Mass

JUST NOTE THE KIND OF WORK THIS HORSE DOES IN 5 DAYS' TIME.

Troy Chemical Company, Binghamton, N. Y.:

Dear Sirs: I have used your remedy now for five days and must say it is wonderful; did not expect any such results. The horse had not been able to put her heels to the ground and when she walked she would barely touch her toe to the ground and then jump with the other foot. I gave her the first treatment Sunday noon and when I went in the stable Monday morning she was still resting the foot, but when I made her stand over she put the foot plumb on the ground, and bore her weight on it; then I took her out and she walked on it very well. I put her in the team Thursday afternoon and went in the woods after a load of wood, and got in a place where they had to do their best or stay there. She lifted as hard as ever I saw her. I expected to see her lame next morning, but she was not. The trouble seemed to be in the lower part of the tendons of her hind leg. Under these conditions, how long shall I continue to treat her?
 Very truly,
 R. H. WILLIAMS.

YOU WILL OBSERVE THERE WAS NO FEVER OR ENORMOUSLY SWOLLEN LEG, NOR LAYING UP OF THE HORSE WITH THE TREATMENT.

Save-the-Horse is the one remedy ever discovered that can always be SAFELY used on a seriously injured tendon while the horse is kept in training, or raced, and prove successful in permanently curing the condition.

Over 95 per cent. of the Owners, Breeders and Trainers of the most valuable horses in the world today are constant users of Save-the-Horse.

For over 16 years it has saved horses and is doing it more today than ever; it does, after all others get through; it undoes the damage and complication others make.

\$5 A Bottle

MAKES A TENDON AS STRONG AS A ROD OF STEEL.
 With a binding contract to refund money or cure any case of Bone and Bog Spavin, Thoroughpin, Ringbone (except low), Curb, Splint, Capped Hock, Windpuff, Shoe Bolt, Injured Tendons and all Lameness. No scar or loss of hair. Horse works as usual.

\$20,000

Guaranteed Futurity for Foals of 1912.

| Division of Stake. | |
|---|-----------|
| Three-year-old trotters | \$ 10,000 |
| Four-year-old trotters (a new feature) | 3,000 |
| (Note.—All added entrance goes to the Stake. In case the stake exceeds \$20,000 in value, the excess will go to the four- year-old division.) | |
| Two-year-old trotters | 3,000 |
| Three-year-old pacers | 2,000 |
| Three-year-old, half-mile track records.... | 2,000 |
| \$ 20,000 | |
| Payments. | |
| March 15, 1912—Entrance | \$ 2.00 |
| November 1, 1912—Second payment | 5.00 |
| May 1, 1913—Third payment | 5.00 |
| (The above \$12 carries foal to year of race, even if you wish to wait till its four-year-old form.) | |
| June 1, 1914—On two-year-olds if started.. | 50.00 |
| (No payment due if you do not wish to start.) | |
| June 1, 1915—On three-year-old trotters if started | 150.00 |
| On three-year-old pacers if started | 25.00 |
| On three-year-old trotters (half-mile) | 15.00 |
| On three-year-old pacers (half- mile) | 10.00 |
| (No payment due on three-year-olds if you do not wish to start.) | |
| June 1, 1916—On four-year-olds if started.. | 50.00 |
| (This is the first futurity to open a division for four-year-old trotters. \$12 carries foal to four-year-old form if not started as two or three-year-old.) | |

You can race at home and win money in the half-mile track division.
If you have a three-year-old crackerjack, Eastern breeders will want
him for the four-year-old division.

KING S. (Trial) 2:15

Sire of Maurice S. 2:07¼

Sire, Silver King 3622; dam Maud by Brigadier; see
ond dam by Owen Dale.

King S. is one of the handsomest stallions on the
Pacific Coast. He has size, style, speed, is a sure foal-
getter, and has every qualification to make him one
of the greatest of sires. His oldest and first colt
trained is Maurice S., one of the most consistent race
horses in California last season, and five others, now
being handled at the Marysville track, show remark-
able speed.

King S. will make the Season of 1912 at the J. E.
STRAIN RANCH, 10 miles north of MARYSVILLE, CAL.

FEE: \$50. Usual return privilege.
The best of care taken of mares at \$2.50 per month, but no responsibility
assumed for accidents or escapes. For further particulars, address

J. E. STRAIN, Marysville, Cal., Box 514.

Prince McKinney (2) 2:29¼

Winner of 2-y.-o. Trotting Division Pacific Breeders'
Futurity Stakes No. 3.

PRINCE MCKINNEY is by McKinney 2:11¼, the
greatest of all speed sires, and is out of Zorilla, by
Dexter Prince, one of the most successful sires ever
owned by the Palo Alto Farm; next dam Lilly Thorn
by the great Electioneer; next dam Lady Thorn Jr.,
dam of that good racehorse Santa Claus 2:17¼, that
sired Sidney, grandsire of the world's champion trot-
ter, Lou Dillon 1:58½.

Prince McKinney is a handsome dark bay horse,
standing 16 hands and weighing 1150 or more pounds.
He has grand bone, a rugged constitution and fine
trotting action.

Season of 1912 at McKinney Stables, 36th Ave. and Fulton St.
SAN FRANCISCO, CAL.

Good opportunity for San Francisco owners of good mares to breed them to
a high-class stallion. FEE \$40 (cash), with return privilege.

F. GOMMET, Owner. Apply or address F. E. BURTON,
McKinney Stables, 36th Avenue, San Francisco.

The Jay Bird-Baron Wilkes Stallion

ALCONDA JAY 46831

California License 175

Sired by Jay Bird 5060, sire of 8 in 2:10 and 130
others in 2:30 or better; first dam Alma Wilkes
(dam of 2) by Baron Wilkes 2:18; second dam
Almeta 2:31 by Almont 33; third dam Alma
Mater (dam of 8) by Imp. Australian, etc. Al-
conda Jay sires size, style and good looks.

His colts are fast, natural trotters.
Alconda Jay, dark brown stallion, stands 15.3
and weighs 1150 pounds. He was bred at Maple-
hurst Stock Farm, Paris, Ky.; foaled in 1905.

Will make the Season of 1912 at

THE SALINAS FAIR GROUNDS, SALINAS, CAL.

TERMS: \$40 the Season. Usual return privi-
lege. Pasture, \$4 per month; every care taken of
mares, but no responsibility assumed for accidents
or escapes. H. H. HELMAN, Salinas, Cal.

Breed to the Sire of Futurity Winners!

Demonio 28016 Record 2:11¼.

Bay stallion; 15.2 hands. Sired by Chas. Derby 2:20; dam Bertha (dam of
12 in 2:30 list, five in 2:10) by Alcantara 2:23 (son of Geo. Wilkes and Alma Mater,
dam of 8 in 2:30 list); second dam Barcana (dam of Bayard Wilkes 2:11¼, two
producing sons and two speed-producing daughters) by Bayard 53 (son of Pilot
Jr. 12, the famous sire); third dam Blandina (dam of six speed-producing sires)
by Mambrino Chief 11; fourth dam Burch Mare (dam of two) by Parker's Brown
Pilot.

Demonio with very limited opportunities sired Mona Wilkes 2:03¼, Denervo
2:06½, Nordwell 2:08½, Memonia 2:09¼, Demonio Wilkes 2:09¼, Ben Rush (3)
2:10¼, Grace R. 2:10½, Miss Winn 2:12¼, Normono 2:14¼, and is a full brother
to the sires, Diablo 2:09¼, sire of 50, Arner 2:17¼, sire of 2, and Don Derby 2:04¼,
sire of 1.

Will make the season of 1912 at SUISUN STOCK FARM. FEE: \$50. Usual
return privilege. Good pasturage, \$3.00 per month. Address

RUSH & HAILE, Suisun Stock Farm, Suisun, Cal.

TWO GREAT SIRES.

The Bondsman

Reg. No. 37641

SIRE OF

Colorado E. (3) 2:04³/₄ champion 3-¹/₄ year-old of the world. Winner of the Matron, American Horse Breeder and Kentucky Stock Farm Futurities; second in Kentucky Futurity.

The Plunger (4) 2:07¹/₂, est 4-year-old stallion of 1910.

Grace Bond (3) 2:09¹/₄ winner both divisions of Kentucky Futurity.

Creighton 2:08¹/₄, record made in 1911.

Half brother to Jay Hawker 2:14³/₄, sire of Country Jay 2:05³/₄, Susie Jay 2:06¹/₄, etc.

Half brother to The Tramp, sire of Bervaldo 2:08³/₄, Trampfast (2) 2:12¹/₄.

Half brother to Sorrento Todd (4) 2:14³/₄, Belle Sentinel 2:16, etc.

THE BONDSMAN 37641

BARON WILKES 2:18.
Sire of 12 in 2:10, including Bumps 2:03³/₄, Rubenstein 2:05, Baron May 2:07¹/₂; sired dams of 4 in 2:10.

SORRENTO
Dam of Jay Hawker 2:14³/₄, Sorrento Todd (4) 2:14³/₄, Belle Sentinel 2:16, Eola 2:19³/₄, Lazy Bird 2:26³/₄, Teddy Sentinel 2:29³/₄, The Tramp (sire), etc.

4th dam Virgie—by Abdallah 15.
6th dam Lucy—by Highlander (Veech's).

THE BONDSMAN is the only stallion that sired three new 2:10 performers with race records in 1910. In spite of the fact that he has no record, The Bondsman was a colt trotter of great merit. He was a contending colt all through the Kentucky Futurity of 1899, getting third money. This was a six-heat race and was won by Boralma. As a four-year-old he was not raced, but trotted a public trial in 2:11. As a sire he is destined to be the leading son of the great Baron Wilkes, founder of the greatest futurity winning family. He will make the season of 1912 at

Pleasanton Training Park. **\$100**

the Season with usual return privilege 1913. Season ends June 1st.

THE PATCHEN BOY 39033

Three-Year-Old Record 2:10³/₄ In a Winning Race.

Sired by the Great WILKES BOY 3803, sire of 107 in standard time.

A Genuine Race Horse and a Sire of Early and Extreme Speed.

The Patchen Boy 39033 is sire of the following:

| | | |
|--|---|---|
| Francis J. 2:08 | Legal Patchen ... 2:15 ³ / ₄ | Dorothy C. 2:19 ³ / ₄ |
| Evelyn Patchen... 2:10 ³ / ₄ | Lucile Patchen ... 2:16 | Louise Patchen ... 2:19 ³ / ₄ |
| Scott Patchen ... 2:12 ³ / ₄ | Jerry Patchen ... 2:16 ³ / ₄ | Dr. Warren ... 2:19 ³ / ₄ |
| Dessie Patchen ... 2:13 | Knightstown Belle 2:16 ³ / ₄ | Roscoe Hinning ... 2:20 |
| Frank Patchen ... 2:13 ³ / ₄ | Alec Williams ... 2:18 ³ / ₄ | Mary Patchen ... 2:20 ³ / ₄ |
| Ruby Patchen ... 2:13 ³ / ₄ | Lols Patchen ... 2:19 ³ / ₄ | Black Patchen ... 2:20 ³ / ₄ |
| J. C. Patchen ... 2:14 ³ / ₄ | Auduous the Miller 2:19 ³ / ₄ | and 11 others in 2:30. |

Dam Lady Clay, the dam of The Patchen Boy (3) 2:10³/₄, C. W. M. 2:24³/₄ (trotted to high wheels), Anglin Wilkes 2:16³/₄ over half-mile track, trial 2:09³/₄, by Metropolitan 1372, son of Hambletonian 10; second dam, Haggie Brown, by Ashland Clay; third dam, Pitty Pat, thoroughbred. The Patchen Boy was the greatest three-year-old race colt in the world, winning six straight races in the Grand Circuit the only year he was raced. His produce are good-headed and real race horses. (No tin cups.)

THE PATCHEN BOY is a beautiful black, 16.1 hands and weighs 1290 pounds. His colts are of fine size, great individuals and the kind that sell for the high dollar.

Season of 1912 at Pleasanton Training Park. Fee: **\$50** Return privilege 1913

Both of the Above Horses Will Remain in California.

Best of care and attention given mares, but no responsibility assumed for accidents. Good pasturage at reasonable rates. For further particulars and full tabulated pedigree, address

CHAS. L. DE RYDER, Pleasanton, Cal.

A Choice Collection of Kentucky Saddle Horses for Sale.

PALITE 45062

A Sire of Early Speed.

License Certificate 131—"Pure Bred."

Sire, Nutwood Wilkes 2:16¹/₂, sire of Copa de Oro 1:59, John A. McKerron 2:04³/₄, etc., and 21 dams of San Francisco 2:07³/₄, Mona Wilkes 2:03³/₄, etc.

Dam, Palita (2) 2:16, dam of 3 in list; second dam Elsie, dam of 5; third dam Elaine 2:20, dam of 4, fourth dam Green Mountain Maid, dam of 9.

PALITE is the sire of the 2-year-old stake-winner Pal 2:17³/₄ and the 3-year-old filly Complete second to the Occident Stake winner El Volante in 2:13³/₄, and timed separately in 2:14³/₄, and sire of Nat Higgins (3) 2:20 trotting, Cornelia Scott (3) 2:24³/₄ pacing. Palite is one of the best-bred stallions of the Wilkes-Electioneer cross living. His colts are all trotters, good-gaited and determined. He will make the season of 1912 at the ranch of the undersigned at

DIXON, CAL. Terms: **\$40** for the Season with return privilege, or money refunded at my option if mare proves not in foal.

Good pasturage at \$2.50 per month and best of care taken of mares, but no responsibility assumed for accidents or escapes.

For further particulars address E. D. DUDLEY (Owner), Dixon, Cal.

TOM SMITH 2:13

Sire of Futurity Stake Winners. Reg. No. 47700

TOM SMITH is one of the handsomest sons of McKinney on the Pacific Coast. He has size, style, speed, is a sure foal getter, and has every qualification to make him one of the greatest of the McKinney tribe. He is the sire of Katalina (2) 2:22³/₄, (3) 2:15³/₄, (4) 2:11³/₄, Ella Mac (3) 2:14³/₄, Vallejo Boy 2:15, Eddie G. 2:30. Every one of his colts that has been trained has shown standard speed.

Sire, McKinney 2:11³/₄; dam, the great brood mare, Daisy S. (dam of 6 with records of 2:09³/₄ to 2:28³/₄) by McDonald Chief 3583; second dam, Fanny Rose (dam of 2 in 2:20) by Ethan Allen Jr. 2903.

Will make the Season of 1912 at the

DRIVING PARK, SAN JOSE, CAL.

Fee, \$50. Usual return privilege.

The best of care taken of mares in any manner that owners may desire at reasonable rates, but no responsibility assumed for accidents or escapes. Excellent pasturage. Mares shipped will be met at the train.

For further particulars, address P. E. DAVEY, Driving Park, San Jose, Cal.

(3) 2:15³/₄, Oro Belmont 2:15³/₄, La Moscovita, dam of Frank N. 2:07³/₄, Bon Guy (3) 2:11³/₄, etc.), by Belmont 64; next dam Mosa (dam of 6 in the list), by Woodford Mambrino 345; next dam Hermosa (great brood mare), by Edwin Forrest.

Will make the season of 1912 at

CITY STABLES, WOODLAND, CAL.

FEE, \$30 TO INSURE. Usual return privilege. Good pasturage \$2.50 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. Address CHARLES JOHNSON, Woodland, Cal. Phone 40.

The Standard Trotting Stallion

Bon McKinney 51480

3-y.-o. Rec. 2:24 1/2. 3-y.-o. Trial—half, 1:05; mile, 2:15.

By **BON VOYAGE 2:08**

(fastest mile ever trotted in a race by a stallion in California):

dam, Daphne McKinney (also dam of Frank N. 2:07 1/4, the only other one of her get ever trained) by McKinney 2:11 1/4; second dam, La Moscovita (dam of Bon Guy, 3-y.-o., 2:11 1/4, Yolande 2:14 1/4 and Tina 2:20 1/4) by Guy Wilkes 2:15 1/4; third dam, Moscova 2:28 1/2 (dam of Mamie R., 3-y.-o., 2:15 1/4, and Oro Belmont 2:15 1/4) by Belmont 64; fourth dam, Mosa (dam of 5 in the list) by Woodford Mambrino.

BON McKINNEY 51480 (3) 2:24 1/2 is a beautiful bay horse and is in every respect a magnificent individual, possessing size, style, quality, intelligence and frictionless trotting action. With little work as a yearling he trotted a quarter in 35 seconds and a half in 1:15. The next spring as a two-year-old, with 2 1/4 months' work, he worked a mile in 2:19 1/2, a half in 1:08 and a quarter in 33 seconds. Having no stake engagements, he was taken out of training after making this wonderful showing for a two-year-old. There is no doubt he could have trotted a mile in 2:12 that year had he been worked until fall. As a three-year-old he was given a record of 2:24 1/2, which is no mark of his speed. Mr. Ted Hayes trained him and says that he considers him the best colt he ever trained and firmly believes that he will not only make a great race horse, but a great sire. As a two-year-old he was bred to ten mares and got nine foals, and everyone who has one of his get is confident that he has the best foal on the Coast. Bon McKinney combines the best of the Electioneer-McKinney cross. His dams are all in the great brood mare list, every one being a producer of speed. He is a young horse and has already commenced to make his mark in the world, and now is the time to breed to him and take advantage to get something exceptionally good at a reasonable price. Study his pedigree, come and see him, and you will be sure to send your mare.

Season of 1912 at the **RACE TRACK, SAN JOSE, CAL.**

TERMS: \$40 for the Season. Usual return privilege.

Good pasturage and the best of care taken of mares in any manner that owners may desire at reasonable rates, but no responsibility assumed for accidents or escapes. Address **JOS. T. WOHIG, Manager, Race Track, San Jose, Cal.**

One of the best bred sons of the pacing king
Star Pointer 1:59 1/4

Dam Effie Logan (dam of Sir Albert S. 2:03 1/4; Jim Logan 2:05 1/4, world's champion 3-year-old pacing colt 1909; Dan Logan, mat. 2:15) by Dur fee 11256 (sire of Shecam 2:12 1/4 and 2 others, and of Capt. Hicks, sire Edwin S. 2:08, etc.); 2nd dam Ripple (sister to Creole 2:15, sire of Javelin 2:08 1/4, etc.); 3rd dam Grace (dam of Daedalion 2:08 1/4, etc.) by Buccaneer, etc.

LOGAN POINTER 52167 is a very handsome blood bay, 13 1/2 years old, stands 15 1/2 hands high and weighs 1150 lbs. He is a horse of splendid conformation, has the best of feet and legs and is intelligent and of good disposition.

Will make the season of 1912 at **DAVIS, CAL.**

TERMS: \$30 to insure.

Good pasturage for \$3 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. Address **J. E. MONTGOMERY, Owner, CAREY MONTGOMERY, Davis, Cal.**

Get the Blood That Produces Champions!

BLACK HALL 48645

Brother in blood to **The Harvester 2:02**

Sired by **Ozone**, trial (2) 2:17 1/4, sire of Norvalon (4) 2:23 1/4 by Moko 24457 (sire of Fereno 2:05 1/4, Brenda Yorke 2:04 1/4, Native Belle (3) 2:06 1/4, and the dam of The Harvester 2:01. First dam Maggie Yeazer (dam of Walnut Hall 2:08 1/4, sire of The Harvester 2:01, etc.) by Red Wilkes 1749; second dam Docia Payne (great broodmare) by Almont 33.

Black Hall is a very handsome black horse, standing 15 1/2 hands high and weighs 1100 pounds. With his breeding, individuality, conformation, etc., he is bound to make a great sire. **TERMS:** \$50 for the season; usual return privilege. California Stallion License. Pure bred.

ATHADON 20990 Rec. (1) 2:27

Sired by **Matadon 9392**, sire of Athadon (1) 2:27, etc. First dam Athalie (dam of 7) by Harkaway 11308; second dam, Mag by Alcalde 103, etc.

Athadon (1) 2:27, for many years the holder of the yearling trotting record, is a very handsome bay horse, standing 16 hands and weighs 1400 pounds. He has proved his worth as a sire, not only of good game race horses, but of the class of carriage horses that bring the high dollar.

TERMS: \$25. Usual return privilege. Stallion License No. 128. Pure bred.

STANFORD McKINNEY 45173

Sire of Kinneysam (2) 2:18 1/2, winner 2-y-o pacing division Breeders' Futurity

Sired by **McKinney 2:11 1/4** (sire of 23 in 2:10 list). First dam Palavena (2) 2:19 1/2, also dam of Mendovena 2:19 1/4 and Menlo 2:29 1/4, sire of Blanche R. 2:06 1/4, by Palo Alto, rec. 2:08 1/4, Reg. No. 5354, he by Electioneer 125; second dam Astoria (dam of Palavena (2) 2:19 1/4 by General Benton 1755; third dam by Kentucky Prince, etc.

Stanford McKinney is a beautiful black horse with star in forehead; stands 15 1/2 hands and weighs 1050 pounds. This horse is one of the best Wilkes-Electioneer stallions in the world and it will pay any breeder to consider his blood lines well before breeding elsewhere. **TERMS:** \$25 for the season; usual return privilege. California Stallion License No. 126. Pure bred.

These horses will make the season of 1912 at **FRESNO, CAL.**, at **Geo. L. Warlow's ranch**. Good pasturage and best of care taken of mares for \$3.00 per month, but no responsibility assumed for accidents or escapes. For tabulated pedigrees and further particulars, address **GEO. L. WARLOW, Fresno, Cal.**

NOGI 2:10 1/2

Winner of Pacific Breeders' Futurity, Occident and Stanford Stakes, and never beaten as a three year old.

Sired by **Athab 2:24 1/4**. First dam Cora Wickersham (dam of Athasham 2:09 1/4, Donasham 2:09 1/4, Nogi 2:10 1/2, Mattawan (3) 2:17 1/4, Kinneysham (2) 2:18 1/4) by Junjo; second dam by Whippleton 1883; third dam by Gladiator 3336.

Nogi 2:10 1/2 is a very handsome bay stallion with black points; 7 years old; stands 16 hands and weighs 1150 pounds; and although he has only been bred to a very few mares he has proven to be a sure foal-getter, and all his colts have size, good looks and plenty of trot. No one can make a mistake in breeding to this horse.

(Registered under California Stallion Law as a Grade. Certificate No. 25.)

Season of 1912 at barn of **DR. T. A. DANIELSON, Madera, Cal.**

TERMS: \$25 for the season, cash or approved note, payable at time of service. Usual return privilege or money refunded at owner's option. For further particulars address **J. E. VINCENT (Mgr.), Madera, Cal. GEO. L. WARLOW (Owner), Fresno, Cal.**

The Standard Stallion

NOBAGE 48390

Sire of

Zombowage, the sensational yearling trotter, that stepped a full mile in 2:40 and a half in 1:18, with 30 days' work last year, and was purchased by Mr. Ted Hayes at the State Fair.

NOBAGE 48390 is by Bon Voyage 2:08; dam Loma B. by Stam B. 2:11 1/4; second dam Italia (great broodmare) by Sidney 2:19 1/4; third dam Dot 2:29 by Prompter, sire of dam of Gratt 2:02 1/2. Nobage's first crop of colts, sired when he was two years old, are all high-class and show great inherited speed.

Pasture \$2.50 per month, and all mares from a distance will be first month free.

Will make the season of 1912 at **EASTERBY RANCH**, 3 miles east of **FRESNO, CAL.** **TERMS:** \$50 to insure. Address **A. S. KELLOGG (Owner), 120 Fourth Camp Avenue, Fresno, Cal.**

PARKER GUNS

Wear Well, Shoot Well, and Handle Well.

Wear well because they are made of the best material by the most skillful craftsmen.

Shoot well because they hold the charge compactly together at extreme ranges.

Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline.

Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

For further information regarding guns in gauges ranging from 8 to 28, address

PARKER BROS., Meriden, Conn.

2-7-0. Race Record 2:20 1/4.

By Dexter Prince 11363 (sire of Lisonjero 2:08 1/4, Eleata 2:08 1/2, James L. 2:09 1/2, Edith 2:10, etc.); dam Woodflower (dam of 2, 1 sire of 10 and 1 dam of 1) by Ansel 2:20 (sire of 14, 4 sires of 11 and 14 dams of 17 in 2:30) by Electioneer, second dam Mayflower, a great broodmare by St. Clair 16675, etc.

Sire of Prince Lot (2) 2:29, 1911, 2:09 1/2; Wesos 2:12 1/4; Adansel (3) 2:14 1/2; Dorothy Ansel (2) 2:20, 1910; Laura Rodgers (2) 2:18 1/4; Frances C. (3) 2:24 1/4; Mat. 2:19; Anjella 2:27 1/4, tr. 2:16 1/4; Bonnie Princess 2:25 1/2; Princess Mamie 2:27 1/4, tr. 2:18 1/4; Prince Gay, tr. 2:12 1/4; Harold M., tr. 2:23; Josie Ansel, tr. 2:23; Ansevola, tr. 2:22; Ima Dudley (3), tr. 2:29; Joseph D. (2), tr. 2:18 1/2; Oddmark (2), tr. 2:23; Georgie K. (2), tr. 2:30.

PRINCE ANSEL is a handsome bay stallion, stands 15.3 hands and weighs 1200 pounds. During the season of 1910, 6 of his get took records, 4 of them being 3-year-olds and under. Prince Lot started 7 times, was once fourth, once third, three times second and twice first. In 1911 he lowered his record to 2:09 1/2. Adansel, his three-year-old son, lowered his record to 2:14 1/2 and Wesos started three times and won twice, lowering his record to 2:12 1/4.

Season of 1911 at the **Race Track, WOODLAND, CAL.**

Terms: \$50 to insure, \$40 by the season, with return privilege. Pasture for mares during season at \$3.00 per month; not responsible for accidents or escapes. For further information, address **A. B. KENNEY, Manager Woodland Stock Farm, Woodland, Cal.**

The Standard Trotting Stallion

LOS ALTO Registered No. 57267

By McKenna 39460, son of McKinney 2:11 1/4, out of Helena 2:11 1/4 (dam of 5 in 2:30) by Electioneer 125.

First dam Ida Apetz by Nutwood Wilkes 2:16 1/4 (sire of Copa de Oro 1:59, John A. McKerron 2:04 1/2, Happy Dentist 2:05 1/2, etc.); second dam Novelist 2:27 by Norval 2:14 1/4; third dam Elsie (dam of 5 in 2:30 list) by Messenger Duroc.

LOS ALTO 57267 is a magnificent brown stallion; stands 16 hands high and weighs 1250 pounds. He is well built, stylish and a horse of high quality in every respect. He is a good-gaited trotter. Is 5 years old. As a three-year-old he broke him and trotted him a mile in 2:30, a half in 1:13 and a quarter in 36 seconds with very little work. He has not been worked since that time, but he proved to my satisfaction that he had all the speed that belonged to him as a representative of the McKinney-Guy Wilkes and Electioneer blood.

Season of 1912 at **MAYFIELD, Santa Clara Co., Cal.**

SERVICE FEE: \$30; \$15 time of service and \$15 when mare proves in foal. Good pasturage and the best of care taken of mares. For further particulars, address **J. S. PHIPPEN, Manager, Box 172, Mayfield, Cal.**

FEE: \$75 for the season. (Limited to 50 mares.)

CARLOKIN 2:07 1/2

REG. NO. 36548.

Exhibition Mile 2:05 1/4; 15.2 hands; 1100 lbs.

By McKinney 2:11 1/4; dam the great broodmare Carlotta Wilkes (dam of Inferlotta 2:04 1/4, Mary Dillon 2:06 1/4, Carloklin 2:08 1/4, Volita 2:15 1/4, Lottie Dillon 2:16 (trial 2:10 1/4), Frank S. Turner 2:28, etc.); second dam Aspasia (dam of 4 standard performers); third dam Miss Buchanan, great broodmare, etc.

FEE: \$75 for the season. (Limited to 50 mares.)

The above stallions will make the Season of 1912 at

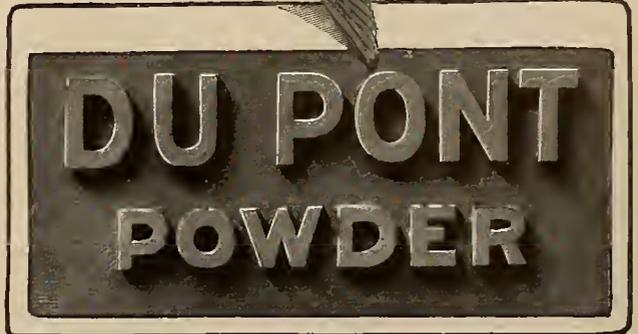

New Exposition Park, Los Angeles, Cal.

Very best care taken of mares at reasonable rates. For further particulars, address

W. G. DURFEE,

Box 1, University Station, Los Angeles, Cal.

RESULT OF OVER A CENTURY'S EXPERIENCE.

Perfection in powder-making is only achieved by exercising the most scrupulous care in the selection and preparation of raw materials, employing skilled workmen exclusively, and using only the most improved modern mechanical equipment.

This is the **DU PONT** method and accounts for the unequalled reputation among sportsmen enjoyed by the **DU PONT** brands of **SMOKELESS SHOTGUN POWDERS**. One of the most popular of these brands is

A dense powder that is absolutely uniform in velocity and pattern. Waterproof—not affected by extremes of heat or cold. "Infallible" SMOKELESS SHOTGUN POWDER will not pit the gun barrels.

Unequaled for Field and Trap-Shooting.

See that your shells are loaded with INFALLIBLE. Send to-day for Infallible Booklet No. 99. It gives best loads for various kinds of game and other information of value to shooters. It's free.

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpufts and Bunches which will not yield promptly and permanently to

Quinn's Ointment

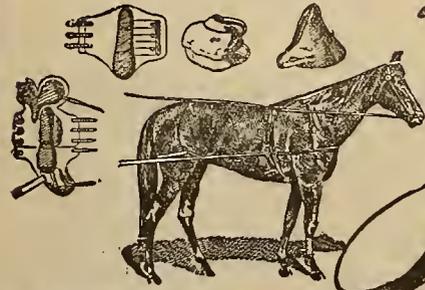

It has saved thousands of good horses from the peddler's cart and the "broken-down" horse market. Mr. C. B. Dick writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpufts and all bunches it has no equal." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

LOADED
SHOTGUN SHELLS

"Leader" and "Repeater" loaded with Smokeless Powders. "Nublack" and "New Rival" loaded with Black Powders.

NOW SOLD ON THE PACIFIC COAST

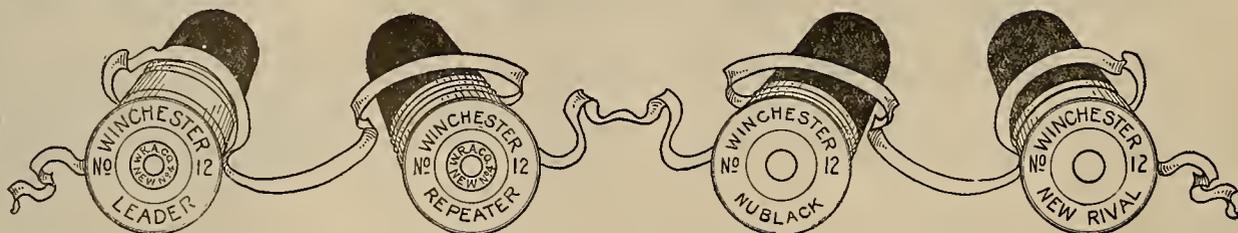

To meet the insistent demand for Winchester Factory Loaded Shotgun Shells, we have arranged to market on the Pacific Coast, through the regular trade channels, our famous Red **W** Brand of shotgun ammunition. Therefore, western sportsmen should henceforth have no difficulty in buying Winchester Factory Loaded Shotgun Shells, loaded with either smokeless or black powders, and in all desirable combinations of powder and shot. All Winchester Factory Loaded Shotgun Shells with the Red **W** on the label are made and loaded at our works in New Haven, Conn.

WINCHESTER REPEATING ARMS CO.

WINCHESTER SHELLS CAREFULLY MADE AND LOADED

It makes no difference what make of shotgun you shoot nor whether your favorite sport is field or trap shooting, Winchester Factory Loaded Shotgun Shells will give you the greatest measure of shooting satisfaction. No shells will make a good shot out of a poor one, but shells that are loaded so that they are uniform in velocity, spread the shot evenly, and give it good penetration, help wonderfully to make good bags in the field and high scores at the traps. Winchester Factory Loaded Shotgun Shells embody all these important elements to the fullest degree. They are designed correctly, made carefully, and loaded with exactness. The Winchester Patent Corrugated Head is an ingenious and distinctive feature of Winchester Shells. It is a superior method of construction to the old English system of metal lining, once used in Winchester shells, but discarded years ago. Other reasons for the superiority of Winchester Shells are their quick and sure primers and the high class of materials used in their construction and loading. When buying, don't simply ask for "some shells." Be specific and insist upon having Winchester—the Red **W** Brand, and the results will repay you for your pains.

A CHANGE TO WINCHESTER SHELLS IS A CHANGE FOR THE BETTER

BREEDER AND SPORTSMAN

Turf and Sporting Authority of the Pacific Coast.

TWENTY days ago it was predicted we were to have a "dry" year in California, and the croakers who are always in evidence when disaster threatens, saw many opportunities to air their pessimistic views. The newspapers in the interior as well as those published in the larger cities kept silent upon this vital subject, only printing what was deemed absolutely necessary regarding climatic conditions and all pertaining to them. Nevertheless, there were many forebodings as to the prospects for the year. Relief seemed to be far off, as day after day no signs of rain appeared. So urgent did the situation become to stockmen that a petition was forwarded to Washington asking that the government reservations be thrown open for grazing purposes, for without the use of the pasture on these vast areas thousands of cattle and sheep would die of starvation.

Wells which had never been known to dry up began to show shrinkages in the amount of water they carried; steps were being taken to deepen them and some pumping plants installed at great expense in many of our valleys. Rivers were lowered and our inland shipping menaced. Stacks of hay garnered for winter use diminished rapidly because there was no feed in the pastures; grain fields which a few weeks previous gave every evidence of being better than they had been for years, began to turn yellow and the new sown grain to stand still. To conserve the moisture, farmers had to resort to

rolling their fields. Water in the irrigation ditches was getting lower every day; there was no snow in the mountains to melt and fill the reservoirs, lakes and streams and rivers; the power companies which furnish light and electricity throughout the land were approaching a condition never heretofore thought of, and a most serious one it was, for it not only involved the loss of much capital but it also meant darkness and privation for many in the cities and towns who were dependent upon them for light and power. All engaged in agricultural pursuits shook their heads and declared there was nothing but ruin staring them in the face. Our dairymen with their immense herds of cattle looked worried as they gazed upon the poor animals and wondered how they would be able to furnish fodder and water for them throughout the long spring, summer and autumn months. The horsemen who had their little bands of broodmares almost ready to foal became exceedingly nervous as they contemplated the disappointments they knew were in store for them in the advent of their choicely bred foals.

Then, as the old song says, "a change came o'er the scene." The wind changed and the rains fell; every drop of this welcome moisture was absorbed by the dry and receptive earth. The amber tinted pastures assumed an emerald hue, trees blossomed, the yellow clay turned brown and streams and rivulets sang on their way to the sea, rejoicing, as it were, in their efforts to prove that the country and all it contained was saved. Farmers, dairymen, miners, manufacturers, merchants and business men shared in the joy those welcome showers brought. Clouds of woe were dispelled by the bright sun of prosperity and the world seems all the brighter since its inhabitants had been so sorely tried in this ordeal; and more convinced than ever are they that California, after all, is the very best place to live in, blessed as it is, with full and plenty and always receiving Nature's truest blessings.

IT HAS been some years since the horsebreeders of California have had an opportunity to purchase as many really high class, well-bred trotters and pacers as those advertised to be sold at Exposition Park, Los Angeles, May 27th, by Wm. G. Durfee, the famous reinsman. In our business columns he states in the most explicit manner why he is going to hold this sale, and, although it is with many pangs of deep regret he will see all these sold, he knows that everyone will more than fulfill the prophecies he makes for them. Mr. Durfee has decided to take a small string of six trotters and pacers east and believes that is enough to take the risks of shipping with. He had contemplated taking some more, then at the last moment decided not to, but would consign them to this sale. The attention of our readers is called to this grandly bred lot. "There's not a cull among them." They will be sold to the highest bidder and as there are some royally bred young stallions, fillies and broodmares consigned it will be a splendid chance for some of our readers to get them at their own price. Trotting horse interests on this coast, as well as throughout the East and Middle West, never looked more propitious than at present, and buyers of any of these will never have cause to regret it. There is no doubt that some of the heavily staked youngsters to be sold will "win themselves out" this year; hence we most urgently solicit all who intend to own nothing but the very best to attend this sale. Remember the place and date.

THERE is a growing activity among the various fair and racing associations on the Pacific Coast because it will soon be time to arrange programmes and purses. The full list of all horses—trotters and pacers—which have records and will be starters on the coast this year must soon be compiled; consultations will be held by the directors of the racing associations regulating the classes and also ascertaining which will draw the largest entry lists. The P. C. T. H. B. Association will soon be ready to hear from cities wherein racetracks are, so as to decide what one will be the most preferable this year. From present indications it is considered that the entry lists in all classes will be better, the fields larger and the racing better than it has been for many years on the Pacific Coast, therefore there will be keen rivalry among the cities to get the Breeders' meeting this year.

FOLLOWING is a list of those who have made the sixth payment on foals of 1909 in the Pacific Breeders' Futurity Stake No. 9. There are 51 in all and the event is to be decided at the Breeders' meeting this year:

D. L. Bachant's b. c. Soison by Athasham, dam Soisette by Guy McKinney.
Mrs. S. V. Barstow's br. f. Belle Ammen by Nearest McKinney, dam Aunt Joe by Iran Alto.
Harvey Blackwell's ch. c. Golden State by Stam B., dam Zaya by Bay Bird.
I. L. Borden's br. c. Albaloma by Almaden, dam Loma B. by Stam B.
Alex. Brown's rn. f. Anselia B. by Prince Ansel, dam Serpolo by Mendocino; b. f. Bonnie Ansel by Prince Ansel, dam Bonnie Derby by Chas. Derby; b. f. Josie Ansel by Prince Ansel, dam Josie L. by Nutwood Wilkes; br. c. Gayristo by Nushagak, dam Nosegay by Langton.
Harry D. Brown's b. f. Laura A. Keyes by Alconda Jay, dam Helen Keyes by Sidney Dillon; b. c. Cole Pointer by Star Pointer, dam Grace Cole by Nutwood Wilkes.
W. C. Brown's ch. c. Prince Malone by Kinney Lou, dam Princess Bessum by Egyptian Prince.
H. Busing's b. c. Bonnie Hal by Bonnie Searchlight, dam Sweet Halle by American Hal.
John W. Considine's b. c. True Kinney by Kinney Lou, dam Trueheart by Nearest.
A. G. Dahl's br. c. Zomjud by Zombro, dam Judith by William Harold.
E. D. Dudley's ch. c. Enchilada by Palite, dam Paprika by Oro Belmont; b. c. Leonid by Aerolite, dam Loma Doone by Bayswater Wilkes.
W. G. Durfee's b. c. by Carlokin, dam Lady H. by Del Coronado.
Morris Friedberger's b. f. Beauty Pointer by Star Pointer, dam Black Beauty.
Robt. Garside's bl. c. Chanate by Alconda Jay, dam Dora Mac by McKinney.
A. Hardy's b. f. Miss Helen by Greco B., dam Fannie G. by Nutwood Wilkes.
H. H. Helman's bl. c. Allen Jay by Alconda Jay, dam Ada M. Kinney by McKinney.
Hemet Stock Farm's br. c. Hemet by Geo. W. McKinney, dam Lady Zombro by Zombro; ch. c. Wilbur Lou by Kinney Lou, dam Louise Carter by Chestnut Tom.
J. L. Hodapp's br. f. Queen Demonio, dam Belle D. by Chestnut Tom.
John Hogan's br. f. Valentine Lou by Kinney Lou, dam Sally M. by Rinaldo; ch. f. Ruby Mc. by Diamond Mac, dam Babe by Count Lionel.
H. S. Hogoboom's b. c. Going Some by Iran Alto, dam Ollie Mac by McKinney.
S. H. Hoy's b. f. Busy Body by Iran Alto, dam Diawalda by Diablo.
J. B. Iverson's s. c. Salinas Star by Nutwood Wilkes, dam Ivoneer by Eugeneer; b. f. Belle Neer by Eugeneer, dam Dictatus Belle by Dictatus.
La Siesta Ranch's b. f. Mabel Claire by Constructor, dam Lady Belle Isle by Eros.
W. S. Maben's ch. g. Volador by El Volante, dam Chloe by Conifer.
Geo. H. Magruder's b. f. Aeroletta by Aerolite, dam Deviletta by Diablo.
Frank Malcolm's rn. f. Miss Bodaker by Bodaker, dam by Athalbo.
Mastin & Kerr's s. f. Queen Ansel by Prince Ansel, dam Nuvoia by Nushagak.
Chas. M. McCarthy's b. c. George Hammett by Nutwood Wilkes, dam School Belle by Prodigal.
John McLeod's f. Abbie D. by C. The Limit, dam Bonner Belle by Bonner N. B.
Estate of G. L. Pugh's br. c. Ardonia by R. Ambush, dam Birdie Wood by Nutwood II.
A. L. Scott's b. f. Nutwood Lou by Nutwood Wilkes, dam Cora by Ira.
J. H. Torrey's br. c. Joe Todd by Baronter Todd, dam Bessie T. by Zombro.
D. W. Wallis' br. f. Sissy by Greco B., dam Josephine by Nutwood Wilkes.
F. E. Ward's br. f. El Bell Maden by Almaden, dam The Silver Bell by Silver Bow.
Geo. L. Warlow's br. c. Kinneysham by Stanford McKinney, dam Cora Wickersham by Junio.
R. B. Wilcox's b. c. Happy Jack by Demonio, dam Louisa by Welcome.
Capt. C. H. Williams' bl. f. by Unimak, dam Miss Mascot by Iran Alto; b. c. by Unimak, dam Ellita by Nutwood Wilkes.
T. D. Witherly's br. c. Valentine by T. D. W., dam Jetta Richmond by Soudan.
F. E. Wright's b. c. Jas. H. Donnelly by Lijero, dam Pearl Sinclair by Hanford Medium.
Zibbell & Son's f. Baby Doll by Tom Smith, dam Kate Lumry by Shadeland Onward; b. f. The Raisin Girl by Tom Smith, dam Lady Owyhee by Owyhee; b. f. by Tom Smith, dam Nona Washington by Geo. Washington.

SANTA MARIA MATINEE RACING.

The first matinee racing over the new half-mile race track at Santa Maria took place February 22d. The attendance was excellent and much enthusiasm displayed. Mr. F. E. Lewis, secretary of the Santa Maria Driving Club, sends the following summary of the day's racing and adds that it is the intention of the club to hold matinee races at regular intervals all summer. The next meeting will be held May 1st.

| Kitty Wilkes (Fred Earl) | 2 |
| Time—3:02, 2:59, 2:59. | |

The once great pacing mare Lena N. 2:05 1/4, by Sidney, died recently at Starkweather Stock Farm, Northville, Mich. She was a member of the harem at Dromore Farm for some years, but did not get with foal, so she was sold. Mr. Starkweather bred her to Donald Wilkes 2:1 1/4, and after her death had an autopsy performed, which showed that she was in foal.

NOTES AND NEWS

Send in your items.

Entries to the Kentucky Futurity will close April 1st.

The Bondsman has been bred to twenty mares so far this season.

Charley James is working S. Christenson's handsome mare Reina Directum at Pleasanton.

Leetter B., the dam of Cresto 2:12, is to be bred to Tom Smith 2:13½; the resultant foal should be a good one.

It is estimated that something over \$400,000 will be distributed in purses and stakes in the Great Western Circuit the coming season.

Shirley Christy, secretary of the Pacific Coast Racing Circuit is in Los Angeles working in the interests of the organization he represents.

Todd 2:14¾, foaled in 1899, died in 1908, was the sire of 67 standard performers, of which 60 were trotters and nine made records from 2:04½ to 2:10.

The Grand Rapids, Mich., Association will hang up \$10,000 for 2:12 trotters in the Furniture City stake and \$5000 for the Comstock stake for 2:11 pacers.

Lena Andrews by McKinney 2:11¾, out of Stemwinder (dam of Directum 2:05¾, etc.) is to be bred to Almaden D. 2:18¾, by Direct 2:05¾, out of Rose McKinney 2:29, by McKinney 2:11¾.

Chas. W. Winter, of Alhambra, Cal., sent his six-year-old gelding Alarich, to W. G. Durfee, Exposition Park, Los Angeles, and just before the last rain storm this horse stepped a half in 1:07½.

C. A. Harrison, Seattle, will not send his horses to North Yakima as formerly reported, but will train them over the Seattle speedway until April 1st, when he will decide on some track on which to train.

Charles Wilson, of Regina, Saskatchewan, was a visitor at Pleasanton and purchased the beautiful stallion Kalatan by Kinney Lou 2:07¾, out of Cricket 2:10, and will take him north next week.

J. H. Booth, Roseburg, Ore., president of the board of directors of the Oregon State Fair, was elected a member of the Pacific district board of the National Trotting Association at its last meeting.

One of the best lot trotters ever seen in Los Angeles is a nine-months-old colt by Bon McKinney, out of Helen Keyes, by Sidney Dillon. The twelfth time he had the harness on he trotted an eighth in 23 seconds!

John H. Dickinson has two fast prospects that he will enter in the M. & M. stake this season—Eva Bellini, trial 2:08¾, by Bellini, and Parisette (4), by Bellini, out of Prelates (2) 2:15¾, by Ponce de Leon 2:13.

Endow 2:14¾, by Cecilian, dam Bon Mot, by Erin, formerly owned by William F. Deakyne, of New York, was killed a few days ago at Paterson, N. J. He was crushed during a wind storm by a wall falling on him.

Lou Dillon 1:58½ is not expected to produce a foal this year. She was bred to Moko. This year she may be mated with Atlantic Express 2:08¾, an untried four-year-old by Bellini 2:13¾, out of Expressive 2:12¾, by Electioneer.

Dr. D. F. Herspring, of Woodland, was here yesterday. The doctor proposes to open a public training stable at the Woodland race track and has quite a number of good horses in his string. He is an expert in that line of work.

Mr. R. J. MacKenzie was at Pleasanton last Friday and Saturday and enjoyed driving many of his horses. He thoroughly understands how to drive and can handle a fast trotter or pacer as well as any one at this famous course.

Mr. Eugene Sherwood, the founder of Salinas, passed away last week in Alameda. Deceased was about 80 years old. He was always noted for his liberality and many years ago donated to the city of Salinas, Sherwood Park, including the race track. The news of his death will be read with regret by thousands who knew him.

The McMurray Sulky Company has inaugurated a new departure this year. With every sulky of their make which is sold a guarantee bond is given guaranteeing to keep the sulky in shape during its life. This innovation will be appreciated by drivers, although fewer McMurray "bikes" go to the shop than any other make.

William Bradley, of the Ardmaer Farm, New Jersey, expects soon to be the owner of a full brother or sister to Uhlán 1:58¾. He owns the sire and dam of the first legitimate two-minute trotter and the mare is heavy in foal to Bingen 2:06¼. Sweet Marie 2:02, and Harvest Girl, the latter a full sister to The Harvester 2:01, are among the noted mares due to foal this year to the sire of Uhlán.

During the five days of the big horse sale held in Lexington, there were 395 head sold for \$128,375, an average of \$325 per head. Of this number there were 158 saddle horses sold for \$55,265, an average of \$325 per head. J. J. Gethin, of this city, bought one gelding at this sale for \$470. He is a seven-year-old son of Dignity Dare, out of a mare by Black Squirrel.

Will G. Durfee sold Esperanza, a nine-months-old trotting filly by Carlokín 2:07¾, out of Irene S. (2) 2:28½ full sister to Zulu Bell 2:16¾, to C. J. Berry for \$1500. Then he sold a nine-months-old bay colt by Copa de Oro 1:59, out of Lady H. 2:26, by Del Coronado 2:09¾; second dam by Gossiper 2:14¾, to the same buyer for \$500. This colt was hitched up ten times and paced an eighth in 21 seconds.

Ken Walker, one of the most popular men in Kentucky, and for many years secretary of the Kentucky Sales Company at Lexington, is appointed secretary and business manager of our worthy contemporary, the "Stock Farm." We extend congratulations to him and to every one engaged in the light harness horse industry in Kentucky, for Mr. Walker is a worker and will make his influence felt in his new vocation.

Following is a list of borses in training on the half-mile track at Rocklin: W. H. Gaffett's Harold B. (pacer) 2:12; A. Levison's Jewess (pacer) 2:12½; J. Petch's Advance (pacer) 2:19; P. Johnson's Peter J. (pacer) 2:35; D. Blower's Cecile B. (trotter) 2:30; S. Hendrickson's Antea Jr. (trotter) 2:27; D. Perkins's All Style (trotter) 2:12½; B. N. Scribner's Stamrock (trotter) 2:12½; L. C. Scribner's Lady S. (trotter) 2:30; E. Pfosis's Frank Bates (trotter) 2:30.

W. E. Detels, of Pleasanton, has been busily engaged getting certificates regarding the great pacing mare Cricket 2:10. This mare is eligible to registration as a standard trotting mare, according to rule 4 of the American Trotting Register rules. She is by a standard trotting horse Steinway 2:25¾ and is the dam of two trotters with records of 2:30 viz: Hopper 2:14¾, and Isobel 2:19. This makes Wm. Harold 2:13¾ and all her daughters and sons (including Kalatan by Kinney Lou 2:07¾) standard.

Anton F. Schweer (more familiarly known as "Toney" Schweer) passed away at his home in Pleasanton, Wednesday, March 6th. Deceased enjoyed the friendship and esteem of everyone in that town and was well known to horsemen throughout California. He conducted the livery stable adjoining the Rose Hotel, and in that line of business made countless friends who will read with regret of his demise. "Toney" was a general favorite, quiet and unassuming at all times; he will be missed wherever horsemen gather.

We are indebted to Mr. Howard H. Grigsby, of Napa, for the following: "In your very valuable and interesting article on A. W. Richmond, I noticed an error which I believe you will be pleased to have pointed out: Nourmahal was the grandam (not the dam) of Grandee 2:23½, etc. Professor E. P. Heald bought her daughter, Norma, by Arthurton, from the late Wm. Corbitt, Norma was the dam of Grandee, and was carrying Grandissimo at the time he bought her. I had this little mare nine years. She is also the dam of Prince Howard 2:22 that Prof. Heald named after me and Dexter Prince."

The "Horse Review," some time ago, asked for selections from the leading breeding experts as to which were the ten greatest broodmares, and the following is a composite list of those received: 1—Miss Russell, by Pilot Jr. 12; 2—Sorrento, by Grand Sentinel 2:27¾; 3—Paronella, by Parkville 6050; 4—Fanela 2:13, by Arion 2:07¾; 5—Clara, by American Star 14; 6—Ethelwynn 2:33, by Harold 413; 7—Nancy Hanks 2:04, by Happy Medium; 8—Beautiful Bells 2:29¾, by The Moor 870; 9—Green Mountain Maid, by Harry Clay 2:29, and 10—Santos, by Grand Sentinel.

William B. Miller, secretary, and H. E. Andress, attorney for the Diamond Rubber Company, of Akron, Ohio, accompanied by C. E. Mathewson, the Pacific Coast representative of this immense concern, were visitors at the Pleasanton track last Saturday. Mr. Miller owns a number of choicely bred mares and at one time owned that remarkably game and consistent trotter Kim 2:13¾, son of Eryia and Die Vernon by Robert McGregor 2:17½. They spent a most enjoyable day and were delighted to see how well Mr. R. J. MacKenzie's horses were doing. They say that last year the sympathies of everybody in the business were extended to this good, game enthusiast, and if his horses win every race they start in this season it will only be fulfilling the hopes and wishes of thousands of people who admire him for his pluck.

The Detroit Driving Club announces in our business columns its Twenty-eighth Annual Blue Ribbon Meeting, which takes place July 22d to 26th, inclusive. The six early closing purses amount to \$25,500 and entries for these will close Tuesday, April 2d. Read the liberal conditions and do not overlook this splendid meeting, one of the very best in the Grand Circuit.

Geo. L. Warlow writes: "I guess Cora Wickersham must have heard my prayer when I mated her with E. G. Diablo 51456, because she presented me today with a bay filly, small star in forehead, and two hind feet white. She is very tall and racy looking. Although this young lady is too young for me to claim she is speedy, in fact, she is too young for me to figure on her speed or gait, nevertheless, she will be given a chance to beat 2:10 if she keeps healthy and meets with no accident."

George B. Doyle, of Fresno, has a full brother to the mare Dariel, and says there are quite a number of good trotters by him in Fresno county. Unfortunately, he gelded this horse some time ago. He wants to get his full pedigree. It is as follows: Sired by Arthur Wilkes 2:28½, dam Lady Whips, by Whips 2:27½; second dam Volita, by Antevolo 2:19½; third dam Ruby, by Winthrop 505; fourth dam Daisy (dam of Chief Thorne 2:20 and Mount Vernon 2:15¾, sire of the dam of Vernon McKinney 2:02, etc.) by Chieftain 721.

Mr. Al. Russell, the well-known trainer, now in Los Angeles, writes: "I have added three more new horses to my string, owned by Joe Torrey; they are: Bessie T. 2:26½, by Zombro. She worked a mile last year in 2:14. Zo Mack (4) a nice looking green pacer, by Zolock, dam by Zombro. Joe Todd, a three-year-old trotter by a son of Todd, dam by Zombro. This colt is entered in all the colt stakes on the coast. I worked Auto Zombro, a green pacer, and Miss Jerusha 2:08¾, a mile together in 2:09½, last week."

Thrown from an automobile at San Jose last Friday Patsy Davey, the well known horseman, narrowly escaped being killed, as it was he was severely injured and has been compelled to use crutches. It seems that a friend invited him and Baxter Mead, the six-year-old son of Ray Mead, owner of the San Jose Driving Park, out for a ride, and the auto, being a small, high-powered machine, in making a sharp turn careened over and Mr. Davey, carrying the little toy on his lap, being on the lower side, was unceremoniously hurled out, the child escaping with a few minor bruises. Davey says he has given up auto riding and prefers a sulky hereafter.
